

# Introduction

## Don't panic!

If you just discover this game, you're probably panicking right now. Don't panic, you'll manage. . .

*Europa Universalis* is without a doubt a monster game. The core rules are more than 300 pages long. Each player has a 9 pages player's aid. The game components include two huge maps and almost 3500 counters. Lastly, a turn usually require 2 to 6 hours to play. Hence a *great campaign*, the way it is meant to be played, represents between 250 and 350 hours of playing. That is, if you play one week-end per month, your game will last for a couple of years (the game has a rather low density of counters and writing down positions between play sessions in not too hard).

However, *Europa Universalis* is not that hard to play. . . Great efforts have been made to streamline the rules (apart from the specific rules). The motto being "the game is complex, not complicated". Most actions in the game are quite similar from one turn to another. Quickly, you will learn to do them without hesitating. Quickly, you'll will be able to concentrate on the time-consuming but interesting aspects of the game: Diplomacy and Strategy.

*Europa Universalis* is about Diplomacy. This is a multiplayer game. You cannot win alone. You will need to discuss a lot with other players. You will see that the Diplomacy phase is very important and has a lot of depth. Countries are not balanced in term of strength. If you play a weak country, you'll need to find alliances to get money, troops, peace, . . . If you play a strong country, you'll need to divide your opponents or they will still be able to crush you. We do not advice to put a time limit on the Diplomacy phase. It is not uncommon for a single Diplomacy phase to last for 1 hour, sometimes 2. These are usually intense hours worth playing.

*Europa Universalis* is about Strategy. The Military phase is the other important phase. It can lasts for 2 or 3 hours during big wars. You will see that the Military rules are quite detailed, maybe the most complicated rules around. That makes a good strategy really worthwhile. You will learn the geographic strengths and weakness of your country. You will soon cherish those few +1 die roll modifiers you can grab. You will know the thrill of a good strategy winning you the war. You will curse the stroke of bad luck that can turn an easy battle into a disaster.

*Europa Universalis* is a very deep game. You will feel the real position of a Monarch taking decisions that greatly affect your country. *Europa Universalis* is a game with a great emotional implication of the players. You will probably want to recall some of your best (or worse) moves even years after, or to tell them to other EU players.

**Playing tip:** Due to the highly interactive Military phase (with many interceptions possible), *Europa Universalis* is not well suited to play-by-mail and we advice a face-to-face game.

When playing a game with beginners, the best is to have at least two experienced players. One can play the monster (Spain), hard to begin with, while the other can play a less important country (such a Portugal or Poland) and act as a rule layer and arbiter. If you have only one experienced player, it is probably better to have him play a small country and be a rule layer (with time to answer questions). Give Spain to a player who is not afraid of monster games. . .

Before playing with beginners, we advice you to play an initiation session. After a quick overview of the rules, you can "jump" into a new game. Everybody will make a lot of errors (both "cheating" (rule errors) and strategic or tactical errors). But after 3 to 6 turns (1 or 2 days, usually), everybody should know the rules well enough. Then, you can start the real game. "Loosing" 2 days of play may seem long, but compared to the duration of the game, this is actually OK. Before playing for real, make sure that everybody knows the most common rules. Each player should also read the specific rules of his country. The rest can be interesting but is not necessarily. Decide also on an arbiter (usually the most experienced player) as rules conflicts will probably arise.

## Organisation of the game

The game is composed of: the rule book, itself split in six parts (rules, events, appendix, tables, scenarios, indexes), the counters (more than 3000), the maps (two A0 maps), the record sheets (most individual record sheets, except two global record sheets), ten-sided dices and pens (not included).

The first rulebook part contains the game description and mechanics. After a short overview of the game in chapters I and II, the following chapters follow roughly the turn order. The last chapter is dedicated to specific rules.

The second rulebook part is the set of historical events (or almost historical) that make the game tick. It is divided in economic events and political events, ordered by period of apparition (period I starting in 1492 and period VII ending with the French Revolution).

The third rulebook part contains various listings such as minor countries characteristics. Most of this information is already available on counters.

The fourth rulebook part holds the game tables and players aids. There are eight pages of general tables plus one page per country played (thirteen different countries are available during the course of the game).

The fifth rulebook contains the scenarios as well as some advices on playing the game. The game is meant to be played as a *Great campaign* spanning over 300 years of history, from Columbus journey to America to the French Revolution. Other scenarios, for a shorter game as well as ways to learn the rules progressively, might be written someday.

The sixth rulebook part contains the table of contents, the index and various lists. It is not necessary for the game (but may be useful while browsing the rulebook).

Apart from this introduction, each point of this rulebook is fully numbered (such as "paragraph C.3 of section III.3.3.3"). The counters are not pre-cutted. Thus, you will need to print them (23 pages, in full colours), glue them and cut them. Beware that some counters are double-sided while some are simple-sided. Beware that there are two size of counters (plus the triangle shaped manufactures). Gluing and cutting is a tiresome process. We advice to do it all before playing (rather than waiting for the counter to be needed). You will probably need counters trays (6 is good) to hold them.

The maps are intended to be printed on a A0 sheet (each). You can try printing them smaller (A1) but they will then be very crowded with the counters. That means that you will need one (or two) large table to hold the maps, enough room for nine players around, and some private space for secret diplomacy. . .

## Organisation of the rules

As stated, the whole rulebook is organised into several booklets.

### Rules

Following this informal Introduction, the rules are organised in chapters, Sections, and numbered paragraphs. Each point being fully numbered for easy reference.

The first two chapters, chapter I (Game components) and chapter II (The powers: at home and abroad), are introductory chapters. They describe the components and the main concepts of the game. The following chapters, from chapter III (Events) to chapter XII (Inter-turns Phase) describe the core rules. Each chapter corresponds to one phase of the game turn (or part of), in order. These should be read by each player before playing.

Then, chapter XIII (Winning the game) deals about fame, glory and all that. Victory Points (VPs) are earned slowly during the game, a bit at each turn and slightly more at the end of each period. Each player will need to read the corresponding part of this chapter in time, but reading all of it is not necessarily.

The rules close with chapter XIV (Specific Rules). This chapter explain the specific rules of each country. Both the majors and minors countries do have specific rules ("ways to cheat"). These specific rules are the salt of the game, the thing that makes each country different from the other. Each player must at the very least read the specific rules of

his country. Reading the specific rules of your opponents is not required but can greatly help build a strategy against them. Reading the specific rules of all minors countries is usually not needed but you should probably read the rules for countries with which you will interact (that is, countries in your geographical area).

### Events

#### Political events

If the specific rules of each country are the salt of the game, the political events are the real meat. Each turn, four historical events are rolled for in a more or less organised way. These events create special conditions to apply. Often, they give opportunities (or obligations!) to create new wars. Sometimes, they provide with drastic changes of alliances or new political situations.

Most of the events happened historically. Some of them did not happened but seemed plausible enough to be added to the game. Political events are grouped by periods so that, say, the American Revolution may not occur before England has a chance to colonise North America.

Even if grouped by historical periods, the events occurs in a randomly fashion. This provides a unique, yet hopefully plausible, historical background for each game. Moreover, the way the players react to the events can be quite different from the historical reactions of the monarchs of this time. Thus, the history in game can be quite different from the History as it did happen.

In order to win the game, each player will need to react properly to the events. Trying to be in a good position to exploit opportunities and to avoid major drawbacks requires a careful playing. Between the (political) choices proposed for each event and the actual military conduct of the wars, players will have a lot to do.

Reading the events is not necessarily before playing. In some way, it is even better if nobody knows them as each player will then enjoy the surprise of things as the historical monarchs did. However, knowing the events (especially the big ones) helps planning. Moreover, after playing once, you will know the big events and this will give you an edge over beginners. Each group should choose which policy to apply toward events (read them in advance or not) and stick to it (and, especially, use fair play if you decide to keep the events secret. . . )

#### Revolts, diplomacy and economic events

In addition to the political events, there are also some economical events. These occur once per turn per country, always among the same set of events. They give an additional random flavour to the game.

Sometimes, political events will simply result in a peasant's revolt as well as some diplomatic instability. This is resolved using the revolt and diplomacy events.

### Tables, Appendices, Scenarios, Index

#### Appendices, Tables and Index

The appendices mostly contain the complete description of minors countries. You don't need to read them before you actually need them. You may want to browse through it in order to know which are the strong minors. It contains mostly a lot of quite arid information that makes little sense before you actually start playing.

The Player's aids contain the summary of all the tables required to play. They are also in the rules, so there is nothing new in the aids worth reading before playing. Each player will need a full set of player's aid during the game, so make sure to print enough.

The index is used it for reference purpose only.

#### Scenarios

The scenarios booklet should contains several scenarios for larger and larger games. It currently only contains the largest one: the Great Campaign.

*Europa Universalis* is designed to be played as a Great Campaign. You'll find there the setup for this scenario.

Someday, we might add additional setups for shorter games, both shorter campaigns and “battle” or “war” scenarios. But frankly, this is not our most important task today.

## A couple of meta-tips about the rules

These rules use many visual tools to help the reader. Coloured boxes are sometime used to highlight some features of the game such as the following ones:

**Design note:** Sometimes, we feel the need to explain stuff about the meaning of the rules.

**History of the game** In the 1990’s, Philippe Thibault wrote the original *Europa Universalis* game, that we refer as “EU6” as it was designed for 6 players only. In the early 2000’s, Pierre Borgnat and Bertrand Asseray wrote an addendum to these rules, adding two players and modifying many aspects of the game. Quickly, Jean-Yves Moyon and Jean-Christophe Dubacq joined the project. We decided to rewrite the whole rules from scratch and to add a ninth player. The result is thus called “EU9”.

Most terms in these rules that do refer to something precise, such as a rule, an event, a leader, . . . are usually hyperlinks. That means that if you’re reading the rules on an electronic device (computer, tablet, . . .) you can click on almost anything and jump to the page in the rules where it is described.

**Example:** Try clicking on the following and see where it leads (your device probably has a “back” feature to come back here afterwards):

ANG, chapter V (Incomes), section VI.3.3 (Bankruptcy), **BRAZIL**, event I-1 (Treaty of Tordesillas), event part IV-A.α (Creation of the Germanic Alliances), subevent VII-5.y (Reign of Terror and Directoire), **I. Süleyman**, **Richelieu**, Prinz Eugen.

Lastly, the choice of language, fonts and colours in which terms are written also carries information on what kind of entity it actually depicts. If two terms are written in the same way, that usually means they depict similar entities (leaders, country, troops, cities, . . .)

**Example:** Consider the differences between:

NORVEGIA (minor country, in Latin), NORWAY (a region on the map, in English), **Norge** (a single province, in local language) and **Mer de Norvège** (a sea zone, in French).

## Getting help

If you have questions about the game, or if you need help on the rules, please feel free to contact us.

You can ask us on the EU mailing list at Yahoo groups, either in English (EU-list@yahoogroups.com) or in French (EuropaUniversalis@yahoogroupes.fr). Since both of these mailing lists were created for the original Azure Wish edition of the game (EU6) and not for this BAMGames rewriting (EU9), please make sure that you state clearly that your question is about the BAMGames rewrite. Otherwise, you might annoy people and you’ll probably get answers based on the EU6 version of the rules which, in some points, is quite different from this one.

Or you can ask at the forum <http://europa-universalis.frbb.net/forum.htm> (in French, but we’ll answer in English if needed). This forum is specifically about the BAMGames version of the game. There is also a dedicated thread on the BoardGameGeek forums: <https://www.boardgamegeek.com/thread/1278052/eu9-9-players-rewrite>

Some of us are also present on other gaming forums such as ConsimWorld (<http://talk.consimworld.com/>, in English) or Strategikon (<http://www.strategikon.info/phpBB3/>, in French). This is however not the most reliable way to reach us.

# People

## Authors

The original *Europa Universalis* game was written by Philippe Thibaud for *Azure Wish Edition* in 1993. Risto Marjomaa did a tremendous work of rewriting and clarifying all the events.

This rewrite is based both on the original version and the rewrite of the events and include many new things. Numerous comments from the EU mailing-list were also taken into account when designing the map and balancing details of the rules.

This text was written by the united minds of Pierre Borgnat, Bertrand Asseray, Jean-Yves Moyon and Jean-Christophe Dubacq. Composition was made using T<sub>E</sub>X. Accompanying maps were created by J.-C. Dubacq.

## Illustrations

Illustrations used in chapter headers are excerpts of famous masterpieces as follow: *De astronoom* (*The Astronomer*), Vermeer; *Port de mer avec la villa Médicis* (*Seaport*), Lorrain; *La liberté guidant le peuple* (*Liberty Leading the People*), Delacroix; the American Constitution; *De korenoogst* (*Harvesters*), Brueghel the Elder; *La construction de Versailles* (*Construction of the Château de Versailles*), Meulen; *De Nachtwacht* (*Night Watch*), Rembrandt; *La rendición de Breda* (“*Las lanzas*”) (*The surrender of Breda*), Velázquez; *Het sluiten van de Vrede van Munster* (*The Ratification of the Treaty of Munster*), Borch; 漢宮春曉 (*Spring Morning in the Han Palace*), 仇英 (Qiu Ying); *Le sacre de Napoléon* (*The Coronation of Napoleon*), David; *Le tricheur à l’as de carreau* (*The Cheat with the Ace of Diamonds*), La Tour; *Las bodas de Caná* (*Wedding at Cana*), Murillo; *Creazione di Adamo* (*The Creation of Adam*), Michelangelo; manuscript of *Beowulf*; *World map*, Mercator; *Columbus Landing*, Vanderlyn; woodcut from an Italian chess treatise (1493); *I bari* (*The Cardsharps*), Carravagio;

## Testers

Preliminary versions of the game were tested by:

Bertrand Asseray, Pierre Borgnat, Nicolas Bourgeois, Michael “MKL” Chagnon, Silvère Corsange, Sylvain Domergue, Jean-Christophe Dubacq, Manuel Esteban, Erwan “R1” Grasland-Mongrain, Maxime le Heiget, Bruno “Boka” Kauffmann, Gwendal Kervern, Benoît “Kloeky” Kloeckner, Thomas “Satori” Milot, Jean-Yves “Jym” Moyon, Rémi Moyon, Fabrice Randeau, Éric “Troll” Schaeffler, Aurélien Schoumaker, Benoît Trédez, Rémi “DL” Vanicat and Benjamin Wack.

Part I

# Rules

# Game components

## Chapter I

**Design note:** This Chapter describes in details the components of the game, mostly the maps and counters. Most of the concepts explained here are common with other strategy games.

**A** *Europa Universalis* is composed of:

A.1 Two maps. One depicting Europa and the other depicting the whole World.

A.2 3300 (?) counters.

A.3 This 650 (?) pages long book of rules.

**B** In order to play, you will also need:

B.1 Separate printed version of the Players aids and the various record sheet.

B.2 Pens and dices (ten-sided dices).

B.3 Some extra blank paper can be handy.

**C** Players aids and record sheet work best if used the way they were designed. See chapter XXVII (Playing the game) for details on this.

### I.1 Description of the world: the maps

#### I.1.1 Europa and Rest of the World

**A Two maps** The world is divided in two distinct maps: the European map, and the Rest of the World map (ROTW). Although there is a lot in common to the way these maps can be read, they do not work in the same way.

**B Europa** The European map is where most of the military game is played. Each player plays an European country.

**C ROTW** The ROTW map is used for the great discoveries and colonisation of the European powers.

C.1 It also holds the game turn, technology, diplomacy and exotic resources tracks.

#### I.1.2 Provinces and Sea Zones

**A Provinces and Sea Zones** Each map is divided into provinces (on land) and sea zones (at sea).

**B Names** Every European province has two names: the province name, and a city name (beside a fortress icon).

B.1 Although provinces and cities do not play the same role, since these names are unique, they can both be used to designate the province.

**Design note:** The local name is used, as far as it makes sense. Alternatives are sometimes written in parentheses. When the local name is too far from something readable or recognisable, a French equivalent is written in italic typeface. A transliteration is also provided (between square brackets) for non-Latin alphabets.

B.2 *Disconnected provinces* Some provinces are in fact several pieces of land, e.g., the provinces **Cyclades** or **Illes Balears** (several islands), or **Çanakkale Boğazı** (in Turkey). They are always treated as one province only.

**C Multiple coasts** Some provinces have two coasts that are not connected together (by sea). This is the case of **Slesvig** (in Denmark), **Ifriqiya** (in Tunisia) and **Hellas** (in Greece) in Europe, and some others in the ROTW. See section VIII.4.1 (Special Movements) for the effects.

C.1 All other provinces have only one coast (that may span over different sea zones).

**D Terrain** The colour of a provinces corresponds to its terrain type. See the terrain chart on the map. Non-plain terrains affect movement and battle.

**E** Two regions are magnified on the ROTW map and one on the European map for practical purposes: North-Eastern America, India and Belgium-Holland.

E.1 Provinces and Sea zones are thus present twice: both in and out of the magnified area. It is advised to use the magnified area for all military counters and to keep economic counters out of the way on the un-magnified map.

E.2 Sea zones going around the magnified areas have all their contacts shown. Especially, there is no contact between **Mer des Laquedives** and **Quarantièmes rugissants**, or **Cinquantièmes hurlants** and **Océan Indien**, but there is between **Cinquantièmes hurlants** and **Quarantièmes rugissants**.

**F Frontiers** Adjacent provinces can be connected by river (blue), mountain pass (pale), regular frontier (black) or straits (double-arrows).

F.1 *Straits, mountains pass and rivers* affect movement and battle. All terrain effects (both from the province and the frontier) are cumulative.

**G Lakes** Lakes are impassable and do not provide contact between provinces.

G.1 Sea units cannot go through rivers or lakes.

**H Reaching the Bering Strait.** **KAMCHATKA** is considered adjacent by land with any of the four provinces neighbouring the impassable area north of **Mer d'Okhotsk**. It takes one full campaign round to make this move (12MP).

**I Small provinces** Some islands and similar places are too small and are thus represented by a large square instead.

I.1 When the corners of the square are cut off, it means the island is not plain (usually forest, except **Sulawesi S.** which is swamp). Similarly, the flag in the island is white for plains and has a black cross otherwise.

I.2 The province of **Cap Breton** in **ACADIE** is connected with its neighbouring province with a river.

I.3 **Ormus** is an island in **Golfe Persique**. It is connected with a strait to **Bam** and **E. Oman**. The province is a ROTW province, located on the ROTW map and all counters have to be put on the ROTW map. A fortress in **Ormus** is also a *Præsidio* for **Bam**.

**Example: Frontiers and islands.—** *Normandie and Caux are adjacent provinces by river, whereas Normandie and Maine are adjacent by frontier.*

*The southernmost province of GRANDS LACS is not adjacent to the north-eastern province of ILLINOIS, even though they share a lake border.*

*The island of SAINTÉ-HÉLÈNE is a plain (regular square and white flag) while the island of Guadeloupe is a forest (cut off square and crossed flag).*

**J European provinces in ROTW** The ROTW map bears some European provinces: **Herât** (as long as it belongs to PERSIA), **Islas Canarias** and **Açores**. Those provinces behave in every way as European provinces including the cost of movement, income, etc.

#### I.1.3 Symbols in provinces

**Design note:** Of course, not everything could be shown through symbols on the map. For instance, annexation of Scotland to England has not been shown. In a word, symbols on the map are not the rules.

**A Income value** This is the large number written in or beside the province name (in Europe).

**B Anchors** Anchors indicate that the province has ports (in Europe).

Figure I.1: A sample of possible symbols on the map

**B.1** All coasts in a province with port are considered to have ports, even if the anchor symbol does not touch all coasts.

**B.2** Anchors with a white circle are ports that can be blockaded with a *Præsidio*

**B.3** *Golden anchors* A golden anchor indicates an *arsenal*, a larger port that can hold and supply larger fleet.

**B.4** *Red anchor Cabo Verde* has a red anchor. This red anchor means that sea units of the player that owns the province may pass from one of the four connected sea zones to any other without paying the movement inside the province.

**B.5** *The Strait fortifications* Red sea frontier represent permanent *Strait fortifications* guarding entrance to the sea. They are controlled from the province with the guard tower symbol (see §D (Strait fortifications) of section VIII.10.7 (Effet d'un presidio (COMPLETER avec 53.8))).

**C Shields** The shields bearing (somewhat simplified) arms of countries are here as a reminder of several things, related to the relation between provinces and countries.

**C.1** *Major countries* Shields bearing the symbol of major countries define the *national provinces* of the major country. They may differ from the initial setup.

**C.2** *Minor countries existing in 1492* Shields bearing the arms of a minor country recall the initial possessions of the minor country.

**C.3** *Influence* Blurred shields represent influence of a country (either major or minor) on a province. These are not national provinces.

**C.4** *Commercial reminders* Half-parted shields in some provinces and sea zones are reminders of commercial specificities (see section XIV.14.8 (Commercial specificities)).

**C.5** *Tordesillas reminders* On the ROTW map, some shields on areas indicate the Tordesillas belonging of the area (see event I-1 (Treaty of Tordesillas)).

**Example: Shields.—** The island of **Gotland** (in Baltic sea) has a Swedish shield. It is thus a Swedish national province even if it does belong to Denmark at the beginning of the game. **Skåne** has both a Swedish and a half-parted shield. It is a Swedish national province (Swedish shield) **and** it plays a role in the Baltic trade (half-parted shield also present in **Baltique**).

**Kreta** has a blurred Venetian shield. It is **not** a Venetian national province (the shield is blurred) but Venice does have some influence here (in this case, namely, it owns the province in 1492).

**Kuban** (East of the Black Sea) has both a Georgian shield and a blurred Crimean shield. It does belong to GEORGIANI in 1492 (shield of a minor country) and it may be annexed by CRIMEA (blurred shield indicating influence).

**Hinterpommern** (Northern Germany) initially belongs to D.S.M. THEUTONICORUM (regular shield). It can be annexed by HANSA (blurred shield) and it can become part of DUCHY OF PRUSSIA (the other blurred shield). It can also be part of POMMERANIA but this was not shown on the map.

**D Gold mines** Some provinces hold gold mine. If there is a number in it (in the ROTW), this is the income of the mine.

**E Salt resources** Salt heap in Europe allow the construction salterns (salt manufactures) in the province.

### I.1.3.1 Wasteland area

*This area represents the great size and the low density of population in those regions. This particularity will not extend to newly conquered areas, nor will the provinces lose their specificity if conquered by some country other than Khanates, Cossacks and Russia.*

**A Geographical limits** The north-eastern provinces of the map are bordered with a yellowish line. They represent the initial territories of Khanates, Cossacks and Russian principalities, as well as some Lithuanian and Ukrainian territories.

### I.1.3.2 Cold Area

**A in Europe** All provinces within a whitish line on the North of the map form the European cold area.

**B in the ROTW** Areas with a snowflake “exotic resource” are all part of the ROTW cold area. This corresponds to northern America and Siberia.

### I.1.3.3 Germany, Italy, Persia

**A** The provinces of the Holy Roman Empire are bordered with a red line.

**B** The provinces of Italy are bordered by a blue line.

**C** The provinces of the *Persian core* are bordered by a black line.

## I.1.4 Cities

**A** Cities represent the urban infrastructure of the provinces. There is one city in each European province as well as in some ROTW provinces.

**A.1** Each city has a name.

**A.2** Each province actually contains many cities, however, only one of them is used in the game (and represents all).

**B Level** Cities are fortified with a fortress of level 1 (single tower) or of level 2 (bunch of towers). Counters are used to mark higher levels.

**Design note:** Sometimes, the cities simply did not exist in 1492, at the beginning of the game. Since it is in those cases rarely important, a more recent city was chosen. Cities built after the 17<sup>th</sup> century have been avoided. Also, keep in mind that a city represents the whole urban infrastructure of a province. Sometimes taking a city will really mean “take a bunch of cities all hidden deep in the mountains”.

In the ROTW, cities are actually places where European control can be exercised, and conquest done; we do not mean to say that India or China were empty of cities (this would be most untrue), only that most places would not lend themselves to conquest.

### I.1.4.1 Control of a province

**A** Each province is owned by one country.

**A.1** Change of ownership can only occur by formal annexation (usually at the end of a war, sometimes by wedding or other events).

**B** During wars, provinces can also be *controlled* by a country different from their owner.

**B.1** Control of a province occurs by taking and holding the city of the province.

**C** It is possible and common for a given province to be owned by a country, but controlled by another country.

### I.1.5 Symbols in Sea Zones

**A** Each sea zone has a *difficulty*. It is the number written in the picture of a storm (or calm sea).

**B** Some sea zones in the ROTW have an additional *malus*, either **+1** or **+2** making travel through them even harder.

**C** Some sea zones are also trade zones. The trade zones are depicted with the silhouette of a ship in a coloured square (*Sea Trade Zone*) or circle (*Country Trade Zone*).

**C.1** The numbers in the silhouette are the incomes of the trade zone.

### I.1.6 ROTW provinces

**A** On the ROTW map, provinces are grouped in *areas*. All the provinces of an area share some characteristics: income value, colonisation difficulty, trading-post implantation difficulty, initial number of natives and exotic resources.

**A.1** All provinces of the same area are grouped by a coloured line. The characteristics of this area are written in a box of the same colour near the area.

**B** The three numbers are (in order) the income, difficulty, and tolerance of the area.

**B.1** Each province of the area has these numbers.

**B.2** If an area has no tolerance, use its difficulty whenever tolerance is required.

**C** The strength of natives in the area is written below the soldier picture.

**C.1** The choice of soldier (Indian, Zulu, Samurai, . . . and a couple of Easter eggs) is purely decorative and has no influence on the game.

**C.2** Natives are present in each province of the area with the same strength.

**D** Exotic resources are depicted with symbol (for the type of resource) and numbers (for the quantity of such resource).

**D.1** Exotic resources are shared by all the provinces of the area. They are not present in the same amount in each province. They can be exploited from any province of the area and countries will need to agree (or fight. . . ) if several of them want to exploit the same resource.

**D.2** The snowflakes are not an exploitable resource but design the cold areas in the ROTW. The higher the number, the colder the area.

**E Round the world** The sea zones **Pacifique Sud-Est** and **Pacifique Nord-Est** are adjacent to **Grand océan pacifique**.

### I.1.7 Tracks

**A** The ROTW map also holds several game tracks.

**A.1** There are two diplomatic tracks, one for the European diplomacy with one line per major country, and one for the ROTW diplomacy with one box per ROTW minor country. Diplomacy works differently in Europe and in the ROTW.

**A.2** The exotic resources tracks are used to store both the total amount of exotic resources exploited (by type) and the price of them. This information is updated once per turn.

**A.3** The technology track keeps both the technological level of countries (both major and minor) and the technology goals to be reached (they will move).

**A.4** The turn track is coloured by periods. It can also be used to hold those counters that only come into play at precise time (mostly historical leaders).

## I.2 Counters

**TODO:** Add images of more or less all type of counters (not only leaders).

**A Types of counters** There are several types of counters: Military (land and sea units, fortresses) ; Leaders ; Economical (colonies and trading posts, trade fleet, manufactures, gold mines, trade centers) ; Military markers (control and ownership, siege-works, revolts, pillages) and Game markers (diplomacy, technology and exotic resources).

**A.1** The military markers are in unlimited quantity. If you need more of them than provided, use whatever you think convenient to represent them.

**A.2** All other counters are in quantity limited by the game. If you need more than you have, too bad but you can't create them.

**B Levels and side** Many two-sided counters act as "containers" for smaller counters (military) or abstract economical stuff.

**B.1** These counters can hold a certain number of "levels" (usually 2, 4 or 6).

**B.2** They are used on the side marked  $\ominus$  if they hold half or less than their maximum level and on the side  $\oplus$  if they hold more than half.

### I.2.1 Military counters

**A** All these counters are intensionally in a limited amount. If you don't have enough, you can't do what you intended.

**A.1 Exception:** REBELLIS (both "Rebellion" and "Revolt") and PIRATÆ counters are in unlimited amount.

#### I.2.1.1 Land units

**A Detachments** The basic land unit is the land detachment (LD). It contains both infantry and cavalry.

**B Armies** Army counters (A) contain both infantry, cavalry and some artillery.

**B.1** An  $A\ominus$  is always exactly 2LD (plus some artillery). An  $A\oplus$  is always exactly 4LD (plus artillery).

**B.2** A can be broken up at almost any time. The result is a number of counters representing the same number of LD without creating new A counter.

**B.3** Thus, an  $A\oplus$  can be broken into an  $A\ominus$  and 2LD, or into 4LD but never into  $2A\ominus$ .

**B.4** An  $A\ominus$  can be reinforced by 2LD and turned into an  $A\oplus$ .

**B.5** It is never possible to merge several LD into a new A counter.

**C Exploration detachments** In the ROTW only, it is possible to break a LD into 3 land detachments of exploration (LDE) as a result of battle or attrition.

**C.1** Conversely, 3LDE can be merged into a LD.

**C.2** LDE cease to exist the moment they enter a province or sea zone on the European map.

**D Army class** The roman number on each land unit is its *Army Class*.

**D.1** Army class is an abstract representation of the military doctrine of a country. It plays a huge role during battle (it mostly represents relative size of troops, as well as quantity and quality of artillery and cavalry).

**D.2** The Arab number (or letter) is an identification number of the counter and plays no in-game role.

**D.3** The image has purely decorative function and plays no role whatsoever, although armies of the same class tend to have similar images.

**E Militia and natives**

<p>[R]14</p> <p>Counters</p> <p>E.1 The white counters represent colonial militiæ and are used when not at full strength (to keep track of the current strength).</p> <p>E.2 Similarly, the BARBARIA counters are used to keep track of reduced native strength.</p> <p><b>I.2.1.2 Sea units</b></p> <p><b>A Detachments</b> The basic sea unit is the naval detachment (NID). A naval detachment is roughly 3 or 4 ships of the line plus accompanying smaller ships (depending on the period).</p> <p>A.1 Notice that NID are on the back of LID. Thus, creating a NID <i>de facto</i> reduce the number of available LID. This is intended.</p> <p><b>B Galleys</b> In the Mediterranean and Baltic seas, it is also possible to use galleys detachments (NGID).</p> <p><b>C Transports</b> Naval transport detachments (NTID) contain only transport ships. They may not participate to battles but can be used to carry gold or troops.</p> <p><b>D Fleet</b> A fleet (F) counter is only a container of a certain number of NID (or NGID) and NTID.</p> <p>D.1 The exact countenance of a F counter varies depending on the period and the country.</p> <p>D.2 It is always possible to break a F into its components (NID and NTID).</p> <p>D.3 It is always possible to group some NID (and NTID) into a F counter, even if the counter is not full. It is even allowed (but usually unwise) to create a F with a single NID.</p> <p><b>E Exploration detachments</b> As a result of battle or attrition, a NID can sometimes be broken into three naval detachments of exploration (NIDE).</p> <p>E.1 Thus, a NIDE is 1 or 2 ships.</p> <p>E.2 NGID can never be broken into NIDE.</p> <p>E.3 3NIDE can always be merged into a NID.</p> <p>E.4 NIDE can exist both on the ROTW and European maps.</p> <p><b>F Privateers</b> (P) are smaller ships armed to harm enemy trade.</p> <p>F.1 They are not military units per se but whenever needed, each side of a P is considered to be equivalent to 1NID (e.g. for hierarchy purpose).</p> <p><b>G</b> The image and number on F and NID counters are here for identification purpose only.</p> <p>G.1 The identification number is used to keep track of the content of each F on the corresponding record sheet.</p> <p><b>I.2.1.3 Fortresses</b></p> <p><b>A Levels</b> Fortresses can be of level 1 to 5.</p> <p>A.1 Contrary to many counters, there is one different counter for each level.</p> <p>A.2 Fortresses of high level cannot be built at the beginning of the game and have different conditions before becoming available.</p> <p>A.3 Since the counters are double-sided, building a fortress of a given level usually prevents another one from being built. Typically, building a level 5 fortress prevents the country from building the level 4 fortress on the back of the counter.</p> <p><b>B Permanent fortress</b> Each city (in Europe or not) also holds a fortress of level 1 or 2. These are permanent fortresses and no counter is needed to represent them.</p> <p><b>C Forts</b> Fort are considered as fortresses of level 0. They can only be built in the ROTW.</p> <p><b>D Level 1</b> fortresses also exists as generic (white) counters. These are in unlimited amount (make more if needed) and are used <b>only</b> to depict temporally diminished fortresses during wars and to depict the permanent fortress of level 6 COL in the ROTW.</p>	<p>Game components— master – 2016-04-14</p> <p>[R]15</p> <p>D.1 Each country has its own set of level 1 fortresses in case it needs a permanent level 1 fortress (usually, in the ROTW).</p> <p><b>I.2.2 Leader counters</b></p> <p><b>I.2.2.1 Values of leaders</b></p> <p><b>A Categories and name</b> Leaders all have a symbol depicting their <i>category</i> (e.g. general, admiral, . . . ) The category indicates which actions a leader can do (e.g. an admiral leads fleet, not armies).</p> <p>A.1 At the top of the counter, the name of the leader is written. It can be either a real name (for historical leaders), a generic name (such as “King”), or a ? (for anonymous commanders).</p> <p>A.2 The colour of the counter, as well as the shield on the right, indicates which country the leader serves.</p> <p><b>B Life and death</b> On the left of the counter of historical leaders are two numbers. They indicate the turns at which the leader is available.</p> <p>B.1 The leader is active during all these turns. Thus a leader with the numbers “3-7” is available from the beginning of turn 3 to the end of turn 7.</p> <p>B.2 Historical leaders may die during battle and thus become unavailable earlier than what is indicated on the counter.</p> <p>B.3 Some leaders have instead a first number in Roman number (e.g. “III-20”). These are leaders arriving into play by an event and the number identifies this event (in this case, event III-20 (The Great Moghol Akbar)).</p> <p><b>C Values</b> The bottom of the counters holds the proper values of the leader.</p> <p>C.1 The letter is the <i>rank</i>. The earlier in the alphabet, the higher the rank (i.e. rank “A” is better than “B” and so on).</p> <p>C.2 The three numbers following the rank are the values of (respectively) <i>manoeuvre</i>, <i>fire</i> and <i>shock</i>. They are use during movement and battle and are often the most important piece of information concerning a leader. They range between 1 (sometimes 0) and 6.</p> <p>C.3 Some leader have a fourth value (between 1 and 4), the <i>siege</i> value.</p> <p><b>D Modifiers</b> Some leaders have optional modifiers on the right of the counter. See below for their meaning.</p> <p>D.1 Special powers that only exists for leaders of one country are shown using a different colour for the symbol depicting category.</p> <p><b>E Pachas</b> are special Turkish leaders. See §C (Pashas) of section XIV.8.1.2 (Turkish Military system) for details.</p> <p><b>I.2.2.2 Symbols on leaders</b></p> <p><b>A</b> Information on the leader counters can be read as shown in figure I.2 (A sample of all leader counters possible).</p> <p><b>B</b> The meaning of the various symbols that define the leaders in this rulebook is as follows:</p> <p>B.1 For the main category: ⚓ (admiral), ☞ (conquistador), 🗺 (explorer), ✕ (general), 🛠 (engineer), 👑 (king), 🏰 (admiral-king), ⚔ (privateer), 🏛 (governor), ✈ (missionary).</p> <p>B.2 For the optional marks: R (allowed in the ROTW), \$ (allowed only in <b>AMERICA</b>), * (main side of the counter), @ (allowed only in <b>ASIA</b>), P (is also a privateer), m (allowed only in the <i>MEDITERRANEAN SEA</i>), ♡ (does not die at the first failed survival test in battle).</p> <p>B.3 The country-specific powers are marked with a main category of different colour: Dutch Indonesian Conquistadors (☞), English Sea hound (⚓, 🗺), French Licensed privateers (⚔, ⚓), Portuguese Viceroy (☞, 🗺, ⚓), Turkish Barbary Coast privateers (⚔, ⚓) and Turkish Viziers (🏛).</p> <p>B.4 Two leaders (<i>Marlborough</i> and <i>Friedrich II</i>) have their name and values written in a different colour (white instead of black or yellow). They have a bonus (actually, an absence of malus) to their survival tests in battle.</p> <p><b>C Double-sided leaders</b> Some leader counters have two sides (both representing the same individual).</p> <p>C.1 In most cases, one of the sides bears a *. This denotes the main side of the leader.</p> <p>C.2 Under no circumstances the two sides of a counter may be used at the same time.</p>
--	--

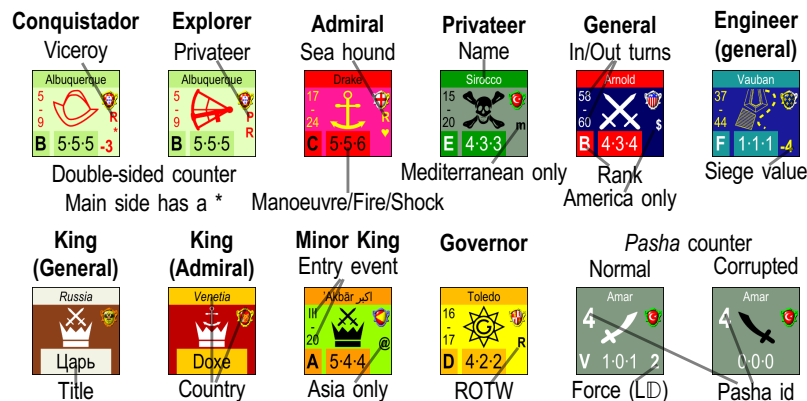

Figure I.2: A sample of all leader counters possible

C.3 When the leader dies while on one side, and unless special rules specifically counter this rule, the leader is definitely dead (for all sides).

C.4 See section VIII.1.1.1 (Double-sided Leaders) for details.

### I.2.3 Economical counters

**A** All these counters are intensionally in a limited amount. If you don't have enough, you can't do what you intended.

A.1 **Exception:** Gold mines counters are in unlimited amount.

A.2 A country may freely destroy any of its COL, TP, MNU or TF at the beginning of the Administrative phase in order to reuse it elsewhere.

#### I.2.3.1 Colonies and trading posts

**A** Colonies (COL) and trading posts (TP) represent the European colonial effort to either populate the New World or trade with the natives.

A.1 Each counter can hold up to 6 levels.

#### I.2.3.2 Manufactures

**A** Manufactures (MNU) are pre-industrial centres of production of goods.

A.1 Each counter has only two levels: one per side.

#### I.2.3.3 Gold mines

**A** These counters represent discovery (or depletion. . . ) of new mines in Europe.

A.1 Although they are called "gold" mines, they can actually be silver, gems, or other precious mineral.

#### I.2.3.4 Trading fleet

**A** Trading fleet (TF) represent the relative commercial power of each country in each of the sea trade zones.

A.1 Each TF can hold up to 6 levels.

#### I.2.3.5 Trade centres

**A** Sea trade zones are grouped into commercial areas. The country with the most levels of TF within a given area get the corresponding Trade centre.

A.1 Trade centres provide a large amount of money to their owners.

### I.2.4 Military markers

**A** All these counters are in an unlimited amount. If you don't have enough, print more or use whatever you think convenient to represent the missing counter.

**B Ownership** markers are used when the owner of a province changes: simply put the marker of the new owner (with its shield) on top of the shield printed on the map.

**C Control** markers are used during wars as reminder of which fortresses have fallen into the hands of another country.

**D Siege-work, Revolt, Pillage, Flood** Use these markers whenever required by the game.

### I.2.5 Game markers

**A** All these counters are intensionally in a limited amount. If you don't have enough, you can't do what you intended.

**B Technology** There is one technology marker for each of the technological goals (both land and naval) that can be reach during the game.

B.1 Conversely, there are two such markers (land and naval) for each major country as well as for some more or less culturally consistent groups of minors.

B.2 Whenever the marker of a country is beyond the marker of a goal, that means that the country has reached this technological goal. This usually provides huge advantages in battles.

**C Exotic resources** There are two markers for each kind of exotic resource: one to keep track of the total amount exploited and the other to keep track of the current price of the resource.

C.1 There is also one marker for the current percentage of inflation.

**D European diplomacy** Each minor country in Europe has a diplomacy marker with its diplomacy values written on it.

D.1 When a major country gains influence over a minor country, put the corresponding diplomatic marker on the major track.

D.2 Thus, at most one major country can have influence over each European minor country at a given time.

**E ROTW diplomacy** Most major country have Relation/Treaty (FR/AT) markers. These are in limited amount.

E.1 When a major gains influence over a ROTW minor, put one of his FR/AT marker in the corresponding box.

E.2 Thus, several majors can have influence over the same ROTW minor country at the same time.

**F Various markers** There are some other various markers (for turn and round, for convoys, or for keeping track of various in-game information such as variable incomes) to be used when needed.

## I.3 Tables and dice

### I.3.1 Tables

**A** Each player has its own *Player's aids* that groups all tables and information most relevant to play. It is recommended to keep at least one clear copy of each.

**B** Most of the table are common for each country (8 pages). Each country also has one page with its own specific tables and reminder of special rules.

### I.3.2 Dice

**A** The dice used in this game are ten-sided. A zero on the die always represents ten.

A.1 Sometimes, the player will be asked to roll 1d100. This is done by rolling two dice, using one as units and the other as tens. 00 always represents 100.

A.2 When required to roll 2d10, roll two dice and add the results (thus giving a result between 2 and 20).

**B** Having between 10 to 20 dice appears to be a good number to play comfortably without spending too much time looking for them. . .

### I.3.3 Players aids and Record sheets

**A Players aids** There are two kinds of players aids:

A.1 The generic players aids (8 pages) contain all the tables common to all players. They are organised roughly in turn order.

A.2 The specific players aids (1 page per country) contain the tables specific to each country, as well as a quick reminder of the specific rules of that country.

**B Players record sheet** Each player has a set of record sheet to record his actions, his military forces and strengths, his treasury, his income calculations. . . These are:

B.1 Two *Economic Record Sheet (ERS)*, one for computation of incomes and expenses and the other for keeping track of the Treasury and Loans.

B.2 One *Monarch sheet* on which characteristics of the country and its ruler can be written. This is also used to write all diplomatic and administrative actions before performing them.

B.3 One *Colonial sheet* to keep track both of the colonial, commercial and naval estates of the country.

**C Global record sheets** are provided to keep track of global information or as summary of some look-up rules, namely:

C.1 The *Exotic resources sheet* keeps track of which country exploit which exotic resource.

C.2 The *Trade fleet sheet* keeps track of the levels of the various TF in the various STZ/CTZ.

C.3 The summaries of minors countries and of objectives, as well as the revolt tables are used as quick look-up.

C.4 The events tables are used to note which historical events already happened.

**D** See chapter XXVII (Playing the game) for a detailed discussion on how these sheet are meant to be used.

## I.4 Lexicon

### I.4.1 Major countries

**A** Full-time major countries

**HIS** Spain, named **HISPANIA**

**FRA** France, named **FRANCIA**

**ANG** England, named **ANGLIA**

**TUR** Turkey, named **TURCIA**

**RUS** **RUSSIA**

**B** Part-time major countries

**VEN** Venice, named **VENETIA**

**POR** Portugal, named **PORTUGALLIA**

**POL** Poland, named **POLONIA**

**HOL** Holland, named **HOLLANDIA**

**SUE** Sweden, named **SUECIA**

**PRU** **PRUSSIA** (see also **BRANDENBURGUM**). This name is only used for the major power

**AUS** **AUSTRIA** (see also **HABSBURGUM**). This name is used for the major power

**C** Part-time major countries: some notations

**POR\*** Either **PORTUGALLIA** or minor **PORTUGALLIA**

**PRU\*** Either **PRUSSIA** or minor **BRANDENBURGUM**

**HOL\*** Either **HOLLANDIA** or minor **HOLLANDIA** or **TERRÆ DEPRESSÆ** or **PRIMA HOLLANDIA**

**POL\*** Either **POLONIA** or minor **POLONIA** (and **LITUANIA** before Union of Lublin (II-13))

**AUS\*** Either **AUSTRIA** or minor **HABSBURGUM**

**[AUS/HIS]** When pointing to a player, either **AUSTRIA** if it is a major country; if not, **HISPANIA** after Dynastic Alliance of the Habsburg (I-A)

**GE** German Empire (never existed, also **GERMANUM IMPERIUM**)

**HRE** Holy Roman Empire, a political entity of central Germany (also **SRI**)

### I.4.2 Various terms used throughout these rules

**A** Army, a large-size land force.

**ADM** Administrative value of a Monarch.

**CB** Casus Belli, a reason that makes declaring the war towards another country easier.

**CC** Commercial centre (a regional platform of trade).

**COL** Colonies (overseas European settlement).

**CTZ** Country Trade Zone, something that represents the foreign trade of a country.

**ID** A military detachment, either a **LD** or **ND**.

**Ɔ** Ducat, the monetary unit of the game.

**DC** Dynastic Crisis, that may occur when some monarch dies (see §C (Dynastic Crisis) of section III.2.1 (New monarchs)).

**DIP** Diplomatic value of a Monarch.

**DTI** Domestic Trade Index, a value that measures the domestic commercial power of a major power.

**ERS** Economic Record Sheet, displayed on page [R]93.

**F** Fleet, a large-size naval force.

**FTI** Foreign Trade Index, a value that measures the international commercial power of a major power.

**f** One level of fortress, obtained through reinforcements.

**LD** Land Detachment, a small land force.

**LDE** Land Detachment of Exploration, a smaller land force meant for the ROTW.

**LD/ND** Land Detachment or Naval Detachment.

**LDE/NDE** Detachment of Exploration (any kind).

**LoS** Line of Supply, a path along which supplies can be brought without crossing enemy territory..

**MAJ** A major power, the main country of a player.

**MIL** Military value of a Monarch.

**MIN** A minor power.

**MNU** Manufacture, a centre of goods production in a country that is of special importance.

**MP** Movement Points, to define distance on the maps.

- ND** Naval Detachment (any kind).
- NDE** Naval Detachment of Exploration, 1 warship.
- NGD** Naval Galley Detachment, about 10 galleys.
- NTD** Naval Transport Detachment, about 10 transport ships.
- NWD** Naval Warships Detachment, a small naval force (about 3 warships).
- PA** Products of America, the goods that came from the New World: tobacco, dye and other various goods.
- PO** Products of Orient: all kinds of goods coming from the Far East: tea, precious wood, porcelain, jade, etc..
- P** Privateer or Pirate unit, a small naval force of privateers that aim for trade ships and pillage.
- R/D** Revolt/Disorder, a state of general disarray in Europe that makes certain alliances and internal conflicts go wrong.
- REB** The major power controlling rebels in various events descriptions (not the rebel side itself).
- ROTW** Rest-of-the-World, everything on Earth outside Europe.
- RT** Royal Treasury.
- STZ** Sea Trade Zone, something that represents the sea trade throughout some area.
- TP** Trading Post, a small commercial establishment used as a European foothold overseas.
- TF** Trade Fleet, a fleet of merchants represented by a level (from 1 to 6) on the Trade Fleets Sheet and a counter in their STZ/CTZ of activity.
- TFI** Trade Fleet Implantation, an administrative operation that may increase the level of a TF.
- VGD** Galeasses Detachment, large galleys firstly used by Venice.
- VP** Victory Points (accumulated through the game by each player). Also VPs (plural).

### 1.4.3 Continents in the ROTW

**Design note:** For game purposes, continents are composed of a given set of *Areas* and provinces. In several cases, this significantly differs from the actual geographical continent bearing the same name (e.g. **ASIA** does not include **SIBERIA**). In game, continents are usually areas of influences of some power and thus include only the geographical zone where that power actually tried to impose an exclusive power (e.g. **HISPANIA** tried to impose a Spanish exclusive in **SPANISH WORLD** without bothering about the Portuguese in **BRAZIL** (as a result of the Treaty of Tordesillas)). In short: beware that in game “continents” are not always exactly the same as geographical continents.

- AFRICA** is the whole continent of Africa, inland from **MAURITANIE** to **SOUDAN** and including the islands of **SAINTE-HÉLÈNE**, **CABO VERDE**, **MADAGASCAR**, **MASCAREIGNES** and **SEYCHELLES**.
- AMERICA** is all the New World, including **MALOUINES**, **CARIBBEAN** and **BRAZIL**.
- BRAZIL** is the following *Areas*: **BELÉM**, **RECIFE**, **RIO**. Note that this is exactly the American *Areas* with a 🗺️ shield (Tordesillas reminder).
- SPANISH WORLD** contains all the inland areas of **AMERICA** South of **CHICHIMECA** (included), excluding **BRAZIL**. Note that this is exactly the *Areas* with a blurred 🗺️ shield. Note that the island of **Trinidad** is part of **GUYANA**, hence of **SPANISH WORLD** even if it is an island.
- NORTH AMERICA** contains all the inland areas of **AMERICA** North of **CHICHIMECA** (excluded).
- CARIBBEAN** is composed of **Haïti**, **CUBA**, **ANTILLES** and **FLORIDA**. This is exactly the *Areas* with a 🗺️ shield (commercial reminder). Note that **FLORIDA** is both part of **NORTH AMERICA** and **CARIBBEAN**. Note that the island of **Trinidad** is part of **GUYANA** hence not of **CARIBBEAN**.

- EXTREME ORIENT** is the union of the following areas: **JAPON**, **FORMOSE**, **CHOSŌN**, **MANDCHOURIE**, **PÉKIN**, **NANKIN**, **CANTON**, **PHILIPPINES**. Note that this is exactly the Asiatic *Areas* with a 🗺️ shield (Tordesillas reminder).
- INDIA** is the part of the Indian sub-continent magnified on the map. Namely: **DELLĪ**, **AYODHYĀ**, **BĀNGLĀ**, **GUJARAT**, **PĀJĀB**, **INDUS**, **ORISSĀ**, **GONDĀNĀ**, **MUMBAĪ**, **HYDĀRĀBAD**, **MALABĀR**, **KARNĀṬAKA** and **SINGALA**.
- INDONESIA** is the archipelago South-East of Asia, namely **SUMATRA**, **JAVA**, **BORNÉO**, **CÉLÈBES**, **ÎLES DE LA SONDE** and **ÎLES AUX ÉPICES**.
- INDOCHINA** contains **BIRMANIE**, **MALACCA**, **AYUTTHAYA** and **DAI VIET**.
- MIDDLE EAST** is the arabic peninsula (**NEDJ**, **OMAN** and **ADEN**, including the island of **Soqotra**), plus **Ormus**, **AFGHANISTAN**, **BALOUCHISTAN** and **ARAL**.
- SIBERIA** is the union of all northern territories from **SIBÉRIE** to **AMOUR** and **KAMCHATKA**.
- ASIA** is composed of **MIDDLE EAST**, **INDIA**, **INDOCHINA**, **EXTREME ORIENT**, **INDONESIA** and **OCEANIA** (thus excluding **SIBERIA**).

### 1.4.4 Land and Sea regions in Europe

- BALKANS** contains the provinces marked with a 🗺️ shield, namely: **Alabania**, **Hellas**, **Moreas**, **Dalmacija**, **Montenegro**, **Corfou**, **Bosna** and **Serbia**. These provinces are subject to rule section XIV.14.1 (Instability of the Balkans)).
- BALTIC SEA** contains the sea zones **Baltique**, **Baie de Botnie**. Galleys may navigate it.
- BLACK SEA** contains the sea zones **Mer Noire occidentale** and **Mer Noire orientale**.
- SPANISH NETHERLANDS** contains the provinces of the Burgundian legacy that are marked with a solid 🗺️ shield, namely: **Vlaanderen**, **Flandre**, **Hainaut**, **Brabant**, **Limburg**, **Luxemburg**, **Artois**. Note that **Franche-Comté** is part of the legacy but not part of **SPANISH NETHERLANDS** (it is marked with a blurred shield). Note that **Liège** is not part of the inheritance and thus not part of **SPANISH NETHERLANDS** either.
- DENMARK** contains all the initial provinces of **DANIA** that are neither in **NORWAY** nor in **SWEDEN**, namely **Slesvig**, **Sjælland**, **Jylland**.
- DUCHY OF COURLAND (HERZOGTUM KURLAND)** is initially empty and may contain the provinces marked with a blurred 🗺️ shield, namely: **Kurland** and **Livonija**.
- DUCHY OF PRUSSIA (HERZOGTUM PREUSSEN)** contains the provinces marked with a blurred 🗺️ shield, namely: **Memel**, **Preußen**, **Hinterpommern**.
- FINLAND** contains the provinces marked with a blurred 🗺️ shield, namely: **Finland**, **Tavastland**, **Nyland**, **Karelen** and **Kexholm**.
- IRELAND (EIRE)** contains the provinces marked with a blurred 🗺️ shield, namely: **Mumhan**, **Laighean**, **Connacht**, **Brega**, **Uladh**.
- ITALY** contains all the provinces of the italian peninsula within the blue thick line, plus the Italian islands, namely **Savoia**, **Nice**, **Monferrato**, **Liguria**, **Lombardia**, **Trentino**, **Mantova**, **Veneto**, **Friuli**, **Parma**, **Lucca**, **Modena**, **Romagna**, **Toscana**, **Siena**, **Lazio**, **Umbria**, **Marche**, **Abruzzo**, **Campania**, **Puglia**, **Basilicata**, **Calabria**, **Sicilia**, **Palermo**, **Saldigna**.
- MEDITERRANEAN SEA** contains all the sea zones of the Mediterranean and Black seas (**Mer Noire occidentale**, **Mer Noire orientale**, **Marmara**, **Mer Égée**, **Bassin Levantin**, **Adriatique**, **Mer Ionienne**, **Mer Tyrrhénienne**, **Golfe de Gabès**, **Golfe du Lion**, **Mer d'Alboran**). Galleys may navigate it.
- NORWAY** contains the provinces marked with a blurred 🗺️ shield, namely: **Trøndelag**, **Vestfold**, **Østlandet**.
- PERSIAN CORE** contains the four easternmost European provinces of **PERSIA**, outlined in black and bearing a solid 🗺️ shield, namely: **Pars**, **Isfahan**, **Bam**, **Meshhed**.

**SWEDEN** contains all the national provinces of **SUECIA** that are not part of *FINLAND*, namely: **Småland, Jämtland, Gästrikland, Bergslagen, Svealand, Västergötland, Gotland, Skåne**.

**UKRAINE** contains the provinces marked with either a solid or blurred 🛡 shield, namely: **Podolie, Ukraïnya, Poltava, Zaporozhye, Donets and Don**.

# The powers: at home and abroad

## Chapter III

**Design note:** This Chapter describes the main concepts used in the game: structural limits of a country, stability, colonial settlements. It also includes the detailed turn sequence.

Several concepts are common with other diplomacy and wargames while some of them are specific to *Europa Universalis*. This Chapter only gives an overview of them so that the rest of the rules is readable. The rest of the rules is ordered in game turn order and each concept will be fully described (with all the rules governing it) in due time.

## II.1 Generalities

### II.1.1 Fair play

**A** Due to the nature of the game, it is extremely easy to cheat by “accidentally” making errors while computing incomes, expenses or DRM, by putting the wrong number of counters on maps, . . .

**A.1** In case of genuine errors, correct them as best as you can. Often, it is possible to correct a wrong computation of income or expense by simply reporting it to the current turn (if it did not happen too long ago). Sometimes, the error is too old or backtracking too complicated, improvise as best as you can. . .

**A.2** The game designers may not be held responsible for any physical damage that could occur as a result of fellow players discovering that you’ve cheated.

### II.1.2 Precedence

**A** In case of apparent contradiction within the rules, resolve the conflict with the following precedence:

- Event descriptions supersede any other rule (and often create abnormal situations).
- Specific rules take precedence over regular rules. They are “ways to cheat” allowed (or mandatory) for each country.
- Common rules only apply if not contradicted elsewhere.

**B** If there is a contradiction between two events, then the one that occurred the latest takes precedence. But this is usually not intended and probably is a bug in the rules.

**C** If there is a contradiction between two specific rules, or between two regular rules, this is a bug. Please contact us so we can answer it.

### II.1.3 Rounding

**A** When rounding is required, it is always done in the disfavour of the player performing the action.

**A.1** Especially, any gain (in money, victory points, . . .) is rounded down while any loss is rounded up.

**A.2** In case of doubt, use the rule of thumb “who can the more can the least”. If a country should gain 1.9 ⚡, it has not gain 2 ⚡, thus the sum must be rounded down; conversely, if a country has to pay 1.1 ⚡, it has to pay more than 1 ⚡ and the debt must be rounded up.

**A.3** Note that if country A decides to give 1.5 ⚡ to country B, then country A has to pay more than 1 ⚡, hence 2 ⚡ (round loss up) but country B has gained less than 2 ⚡, hence only 1 ⚡ (round gain down). Free hint: don’t plan do to this if you don’t want money to disappear. . .

### II.1.4 Order of resolution

**A** Often, several similar actions should theoretically be resolved simultaneously but may require decisions of players and are thus resolved one by one (e.g. sieges, attacks of natives, automatic competition . . . ) Normally, it is explicit in the rules how to do the resolution in case of disagreement. If not, use the following guidelines.

**A.1** If a single player has a decision to make before each roll (e.g. for sieges: assault or proper siege), then each alliance, in decreasing order of initiative, resolve its action in the order of its choice (in case of disagreement inside the alliance, in a random order).

**A.2** If several players have a decision to make before each roll (e.g. for automatic concurrence), then the actions are resolved in a random order.

### II.1.5 The letter and the spirit

**A** As much as possible, we try to write precise and unambiguous rules. We also try to explain the “spirit” of the rules and to make our intention clear.

**A.1** In some cases, the rules are very technical, almost “algorithmic”, and you may not understand the whys immediately. In those cases, apply them without thinking.

**B** In a couple of cases, the precise description of the rule is too complicated to write (as this is not a mathematics book . . . ) and we may explain only the spirit without formalising completely the letter. Those cases will always be explicitly mentioned in the rules.

**B.1** In those cases, use good sense to interpret the rules. In case of disagreement, use discussions and votes (among players not implied) and create home rules as needed.

**C** If any rule seems strange, allows some non-historical behaviour, or is abused by tricky players, you are welcome to create home rules to circumvent the problem. After all, this whole rule book is mostly home rules and clarification on the original *Europa Universalis* game by Philippe Thibault.

## II.2 Countries

**A Majors and minors** Countries are separated into *Majors countries* and *Minors countries*.

**B** Majors countries are the ones who, during the historical framework of the game, played a role of great influence in Europe or even in the whole World, thus shaping History as we know it.

**B.1** Some majors countries had a more local (geographically or timely) influence.

**B.2** Each player plays one Major country at a time. Some players play the same Major during all the game while some switch mid-game.

**C** Minors countries are countries who played only a small role in History.

**C.1** This can be either because they were too small (e.g. COLONIA) or because they were quickly destroyed by their powerful neighbour (e.g. SYRIA), or because their influence was very local and only influenced a couple of other nations (e.g. PERSIA or SCOTIA).

**C.2** This does not mean that minors countries did not shape History, but merely that they lack the World-wide or Europe-wide influence that, say, England or Austria had and that playing them would be less interesting.

**D** See section I.4.1 (Major countries) for a list of majors countries and section XXIV.2 (Short list of all minor countries) for a list of minors countries.

**E Europeano-centrism** The game is, voluntarily, centred on Europe and European powers. This is because we want to focus on the Age of Discoveries and the way the colonial powers managed to take control of almost all the World.

**E.1** Thus, non-European powers are always minors countries, even those who did had a large influence and territorial base such as CHINA or MOGOLIS IMP.

**E.2** This choice allows the game to focus on intra-European relationships.

## II.3 Religions and cultural groups

### II.3.1 Religions and standings

**A** Each country, major or minor, has a *religion*.

**A.1** Several actions or events in the game depend on the religion of a given country.

**A.2** Several countries (both major and minor) may (or must) change religion during the course of the game.

**A.3** The religion of minor countries is indicated in the description of the country, see section XXIV.2 (Short list of all minor countries). The religion of major countries is indicated in scenario description.

**A.4** Religions are also indicated on the map. The colour of the border of the main (non-blurred) shield in each province depends on the religion of the province (which is usually the religion of the country).

**B** Several religions are further subdivided into *standings*. Some actions depend not only on the religion but also on the precise standing of the country.

**B.1** Minors countries usually have no standings, unless explicitly stated.

**B.2** The precise standing inside a religion is noted as “Religion/Standing” such as “Catholic/Counter-Reformation”. Sometimes, only the standing is specified (e.g. “Counter-Reform” means “Catholic/Counter-Reformation”).

**B.3** If no standing is precised, then the effect apply to all countries of the given religion, whether they have a standing or not.

**B.4** Majors countries have no standing at the beginning of the game and have to choose one when event I-8 (1) (Reformation) happens or when they change religion as well in a few other circumstances. Some Majors may stay without standing.

### II.3.2 Cultural groups

**A** Each country (major or minor) belongs to one cultural group (except POL and RUS who belong to two groups).

**A.1** These groups are used to determine the technological level of minor countries and the way they progress. Check section VI.8.1 (Technology) for details on technology.

**B** Cultural groups usually contains all countries of one or more religion. Thus, we may use the same names (and symbols) to depict them. But these should not be confused.

**C** The cultural groups in which a minor country belongs is indicated as its “Military doctrine” in the Appendix.

### II.3.3 List of religions and cultural groups

**A** We give here a list of all religions, standings and cultural groups.

#### II.3.3.1 Catholic

†

**A** Before event I-8 (1) (Reformation), this religion has no standings

**A.1** After, there are two Catholic standings: *Conciliatory* and *Counter-Reform* (also called *Counter-Reformation*).

**A.2** If needed and not specified, consider Catholic minors as begin Catholic/Counter-Reformation.

**B** Catholic provinces have a golden shield border.

#### II.3.3.2 Protestant

†

**A** This religion is created by event I-8 (1) (Reformation).

**A.1** Before this event, treat all Protestant countries as Catholic.

**B** There are four Protestant standings: *Anglican* and *Puritan* (available only for ANG); *Strictly protestant* (or *Rigorous*) and *Tolerant* (available only for SUE).

**B.1** Protestant minors, as well as other Protestant majors, have no standing.

**C** Protestant provinces have a white shield border.

**II.3.3.3 Latin** †

**A** The *Latin* cultural groups contains all Catholic and Protestant countries, plus POL, plus RUS after its army reform.

**II.3.3.4 Orthodox** ‡

**A** There are two Orthodox standings, available only for RUS: *Religious tolerance* and *Champion of Orthodoxy*.

**A.1** Orthodox minors, as well as POL if it choose to become Orthodox, have no standing

**B** Orthodox provinces have a orange/brown shield border.

**C** The Orthodox cultural group contains all Orthodox countries, plus POL.

**C.1** Notice that POL belongs to both the Latin and Orthodox groups, whatever its religion but that POLONIA (once it becomes minor) belongs only to the Latin group.

**II.3.3.5 Christian**

**A** Christian countries are either Catholic, Protestant or Orthodox.

**A.1** If an event of effect affects Christian countries, then it affects all countries of these three religions.

**II.3.3.6 Sunni** ☾

**A** This religion has no standings.

**B** Sunni provinces have a green shield border.

**II.3.3.7 Shi'ite** ☿

**A** This religion has no standings.

**B** Shi'ite provinces have a blue shield border.

**II.3.3.8 Muslim**

**A** Muslim countries are either Sunni or Shi'ite as well as some ROTW countries.

**A.1** If an event of effect affects Muslim countries, then it affects all countries of these two religions and ROTW minor Muslim countries.

**A.2** European Muslim countries are either Sunni or Shi'ite. ROTW Muslim countries do not have this distinction.

**A.3** ROTW Muslim countries are the one with a ☾ symbol on the ROTW diplomacy track: ACEH, ADEN, AYMAN, SUDANIA and GUZARATE. Other ROTW countries are considered as having no religion for game purposes.

**II.3.3.9 Islam** ☾

**A** The Islam cultural group contains all European Muslim countries and some ROTW countries.

**A.1** beware that in the ROTW the Islam group and the Muslim minors are not the same things. eg: GUZARATE is Muslim but not in the Islam group while MOGOLIS IMP. is within the Islam group but not Muslim (for game purposes).

**Design note:** The effect of being Muslim is to give Diplomatic bonus to TUR on the minor. Since MOGOLIS IMP. was a large independent country, TUR should not easily ally with it (and only smaller ROTW countries are Muslim). The effect of being in the Islam group is a faster technological advance. Thus, only larger ROTW countries are in the Islam group.

**II.3.3.10 Other religions** ☿

**A** The *Other* "religion" groups all religions that are not already specified.

**A.1** It mostly includes Hinduism, Buddhism, Shinto and various Paganism.

**A.2** We do not mean that these religions are all the same. But they played no role in European conflicts and were treated more or less the same way by Christian missionaries in India, Africa, America or Asia. Thus, they have the same effect in game.

**A.3** Similarly, we do not mean that religions or standings not listed here (eg Judaism) did not exist. But they had no large scale effect and do not require special rules within the game.

**II.3.3.11 Medieval**

**A** The Medieval cultural group contains INCA and AZTECA.

**A.1** Natives in **AFRICA**, **SIBERIA**, **OCEANIA** and **PACIFIQUE** are considered to be part of this group.

**II.3.3.12 ROTW** ☿

**A** The ROTW cultural group contains all ROTW countries that are neither in the Islam group nor in the Medieval one.

**A.1** Natives in continents and areas not listed as Medieval are considered to be part of this group.

**A.2** Beware that some ROTW countries are of Muslim religion but belong to this cultural group.

**II.3.3.13 Special cases**

**A** HELVETIA is both Catholic and Protestant.

**A.1** Whenever a major attempts an action on it, considered its religion to be the worst possible case between them.

**A.2** Typically, HELVETIA is always considered to have another religion for Diplomatic actions ; Catholic/Counter-Reform countries have no religious CB against HELVETIA and may not convert it (as it is also Catholic) ; and so on.

**B** UNITED STATES is either Protestant or Catholic, but not both.

**B.1** Its religion depends on the religion of the major against who it declared its Independence. See event VII-4 (War of Independence in the Colonies) for details.

**B.2** UNITED STATES may be created several times (representing Bolivarian revolutions as well as hypothetical revolutions in Canada, India or Indonesia). In this case, each of the different UNITED STATES may have a different religion.

**II.3.4 Religious enmities**

**A** When the game start (in 1492), religious enmities are actives. They last until the end of event IV-A (Thirty Years' War).

**A.1** Religious enmities mostly make relations between Catholics and Protestants harder, but they also hamper a bit relations between Christians and Muslims.

**II.4 The passing of time****II.4.1 Periods**

A period represents a number of game turns, historically homogeneous, with a duration of approximately 30 to 50 years (more or less). The 62 game turns are distributed in seven periods to simulate the different epochs of the era covered by the game.

These periods give the rhythm of the campaign game, especially the 1492-1792 Grand Campaign. Each player possesses for his country, a series of strcutral limits to his purchases and actions that is determined for each one of the periods covered in the game. These limits are a maximum that cannot be exceeded, except for a very few specific cases.

**II.4.2 List of periods**

The seven periods (with corresponding length in game turns and main historical features) covered by the game are the following:

- Period I, 1492-1519: 6 turns (discovery of the New World, Wars in Italy and consolidation of the powers)
- Period II, 1520-1559: 8 turns (Turkish expansion, exploration and colonisation by HIS and POR, Reformation and first religious struggles)
- Period III, 1560-1614: 11 turns (Spanish domination, Dutch war of independence, French wars of religion, Swedish rise to power)
- Period IV, 1615-1660: 9 turns (Dutch commercial domination, Thirty Years War)

<div>[R]28</div> <div>The passing of time</div> <div> <ul style="list-style-type: none"> <li>• Period V, 1660-1699: 8 turns (French “Grand Siècle”, wars of <b>Louis XIV</b>)</li> <li>• Period VI, 1700-1749: 10 turns (Russian and Prussian rise to power)</li> <li>• Period VII, 1750-1800: 10 turns (English domination, from the Seven Years War to the American Revolution)</li> </ul> </div> <div>II.4.3 Limits by period</div> <div> <p><b>A</b> Within each of the above periods, countries played by the different players have a certain number of structural limits for their different actions and purchases as well as for the number of available counters (whether military or commercial) and the content of these counters.</p> <p><b>B Limits</b> These limits are valid each turn during the period for which they apply.</p> <p><i>B.1</i> The period limits cannot be exceeded, except for some particular cases specified in the rules.</p> <p><b>C Limits Tables</b> The limits, for each player, are regrouped in two different tables on the specific player’s aid. The first presents the limits per period applicable globally for the whole duration of a period, such as the maximum number of counters of a given type usable in the period. The second table presents the limits per turn within each period, such as the maximum purchase available each turn.</p> <p><i>C.1</i> Taking into account the variable length, in number of turns, of the different periods, it is usually necessary to read the numerous information printed on these tables at the beginning of a given period, their usage proving then very repetitive within a same period, thereby making them self learning.</p> <p><i>C.2</i> The monarch sheet holds space to write down the limits of the current period to allow an easy access in game.</p> <p><b>Example:</b> <i>If you are unfamiliar with the game, take a player’s aid with you before reading the following. We advice to use the Portuguese one as it contains few exceptions and is thus easier to understand.</i></p> <div>II.4.3.1 Period limits table</div> <p><b>A</b> The limits fixed in this table cannot be exceeded in principle. This is valid in any and all turns of the period.</p> <p><i>A.1</i> Some events or other particular circumstances may change the limits. These special cases are all recalled in the table.</p> <p><b>B Trade</b> The DTI (Domestic Trade Index) represents the global dynamic of the internal trade of the country. The FTI (Foreign Trade Index) represents the global dynamic of the foreign trade of the country.</p> <p><i>B.1</i> Some countries also have a special FTI usable only for a precise set of actions. See the Specific rules of the country for details.</p> <p><i>B.2</i> DTI, FTI and special FTI may vary between 1 and 5.</p> <p><i>B.3</i> The actual value may never exceed the limit for the current period printed in the table.</p> <p><i>B.4</i> The actual value of the DTI, FTI and special FTI is written by the player on his monarch sheet.</p> <p><i>B.5</i> If, for any reason, the actual DTI, FTI or special FTI of a country is above its period limit, immediately decrease it to its maximum value.</p> <p><i>B.6</i> If the actual value is 1 and an event require it to be decreased, don’t change the value. The actual value may never be smaller than 1.</p> <p><i>B.7</i> The actual value of the special FTI may never be smaller than the actual value of the FTI. If the case arise, increase the value of the special FTI so that it is equal to the FTI.</p> <p><b>C Manufactures</b> The country has a limit of MNU (Manufacture) counters (triangle shaped) that it may have in play, on the map of Europe, during a given period.</p> <p><i>C.1</i> This is a limit in terms of counters. Each counter has two sides representing an increasing capability of the MNU.</p> <p><i>C.2</i> This limit may be exceeded by 2 counters, at the risk of economical losses. See section II.4.3.2 (Exceeding Limits in MNU).</p> </div>	<div>The powers: at home and abroad— master – 2016-04-14</div> <div>[R]29</div> <div> <p><b>D Colonial establishments</b> The country has a limit of COL (Colonies) and TP (Trading Post) counters that may be placed on the map, outside of Europe, for the whole length of a period.</p> <p><i>D.1</i> This is a limit in terms of counters. Each counter has two sides with up to 6 levels representing an increasing development of the establishment.</p> <p><i>D.2</i> This limit may never be exceeded. If at any moment a country has more COL or TP on map than counters available for the period, immediately remove (at player’s choice) exceeding counters.</p> <p><b>E Fleet</b> Each country has a maximum number of NID that may be in play at the same time.</p> <p><i>E.1</i> This counts both the NID counters and the NID inside the F counters.</p> <p><i>E.2</i> NGID only count as half.</p> <p><i>E.3</i> This limit may not be exceeded. If a country ever owns more NID than this limit, immediately destroy exceeding NID (at player’s choice).</p> <p><b>F Troop size</b> Land and sea unit have some specific size. This is a structural description of the military doctrine of the country rather than a real limit.</p> <p><i>F.1</i> A F counters may contain up to a certain number of NID (first value) and NTID (second value), depending on their side. NGID count as half a NID. F counters are only containers and may be created for free at any time if the need occurs.</p> <p><i>F.2</i> An A⊕ counters automatically contains the indicated number of Artillery. An A⊖ only contains half as much (round down). A counters do contain artillery even with <i>Medieval</i> technology (this is siege artillery only).</p> <p><i>F.3</i> Land troops belong to a certain class of army. This is the military doctrine of the country and may not be changed voluntarily. Armies of the same class hold roughly the same number of infantry and cavalry.</p> <p><b>Example:</b> <i>During period I, Portugal has a maximum DTI of 3, as per scenario description, it is also its actual value in 1492. Thus, POR will not be able to increase its DTI during period I. However, the maximum DTI switch to 5 in period II. This does not automatically increase the actual DTI, but simply allows POR to attempt administrative actions to do so.</i></p> <p><i>During period I, POR may never have in play more than 3 MNU counters. Since two of them are placed in 1492, POR may only create one more before 1520, when a fourth counter will be available. POR may also increase the level of its MNU (and flip them to their ⊕ side) since this does not create new counters. A total of 6 Portuguese MNU are provided in order to give the player choice on which industry to develop.</i></p> <p><i>During the first three periods of the game, F⊖ of POR may contain at most 2NID and 1NTID. Its F⊕ may contain only 4NID and 1NTID. It is possible to have a non-full counter (such as a F⊖ with only 1NID and no NTID or a F⊕ with 3NID and 1NTID). The exact content of the counter being written on the colonial sheet. Note that due to maintenance cost, it is usually most unwise to have F counters with very few NID in them. POR may not, in period I, have more than 12 total NID on the maps (including those in F).</i></p> <p><i>In period I, A⊕ of POR automatically contain 2 artilleries (an abstract measure of the guns, howitzers and such). In 1520, this switch to 3 and all existing A are automatically upgraded to this value (as the typical content of field forces evolves with time). A⊖ contains half that many artilleries, round down, hence only 1 in this case. Troops of POR are of class III, an abstract measure of the military doctrine of the country (notably with respect to typical size of field forces as well as cavalry number and doctrine). This never changes (only a handful of countries change their army class). Class III regroups most occidental powers.</i></p> <div>II.4.3.2 Exceeding Limits in MNU</div> <p><b>A</b> A player can decide to exceed the limits of a period by up to 2 MNU counters, with the restriction that the absolute limit is the number of such counters provided in the game. However, this puts the economical stability at risk.</p> <p><b>B</b> If a revolt occurs in such a power, and if the result of the die-roll serving to determine the strength of the revolt is even, then the power immediately suffers economical losses.</p> <p><i>B.1 Exception:</i> If it has created its Stock Exchange HOL (event event III-2 (Amsterdam Stock Exchange)) and ANG (event IV-8 (1) (Creation of the London Stock Exchange)), suffer from losses only if the die is 10, 12, 14, 16, 18 or 20.</p> <p><i>B.2</i> If there was no die-roll (eg some revolts caused by events), roll to check for economical losses.</p> </div>
--	--

<div>[R]30</div> <div>The passing of time</div> <p><b>C</b> If the power is at Stability-1, -2 or -3 at the beginning of a turn (before rolling for monarch survival), it has 50% chance to suffer economical losses in addition.</p> <p><i>C.1 Exception:</i> If it has created its Stock Exchange HOL and ANG may suffer losses only if Stability is -2 or -3 at the beginning of a turn.</p> <p><b>D Economical Losses</b> The power loses 1 in Stability and 2 MNU counters (not levels) are eliminated (chosen at random).</p> <div>II.4.3.3 Actions and investments</div> <p><b>A</b> At each turn, each country is allowed to do a certain number of actions (administrative or diplomatic) to increase its economical capacity or diplomatic influence.</p> <p><b>B</b> Most actions are performed by spending a certain amount of money. There are usually three possible costs, called investments, for each kind of action.</p> <p><i>B.1</i> Paying an higher investment increase the chances of success of the action.</p> <p><i>B.2</i> Specific value of the monarch also have a lot of influence on the chances of success.</p> <div> <p><b>Playing tip:</b> It is usually better (in term of probability of success relative to the amount spent) to do several time the same action at the basic investment than to do it once at high investment. However, it will also take more time as some attempts will fail.</p> <p>Thus, for the long term development of the country (almost all administrative actions and often for Diplomacy), it is usually a good idea to use only basic investments. In some cases, however, the result has to be achieved as fast as possible (typically for raising Stability or technology, and in some case for administrative actions to meet certain objectives). Then, a higher investment is the way to go but the result might cost a lot of ₤ . . .</p> </div> <p><b>C</b> Each turn, all actions are first written down, and payed for, before being resolved simultaneously. Thus, it is impossible to wait for the result of a given action before deciding to do another one.</p> <p><b>D</b> Most administrative actions are resolved on table VI.1 (Administrative Actions) by cross-referencing a column (depending on the estate of the power and the investment for the action) and a die-roll.</p> <div>II.4.3.4 Turn limits Table</div> <p><b>A</b> The turn limits per period concerns essentially diplomatic and administrative actions, and also the logistical elements (recruitment, etc.) for each country and each period of the game.</p> <p><b>B Diplomacy</b> Each country has a maximum number of diplomatic actions relative to its diplomacy on minor countries allowed during each turn of the period.</p> <p><b>C Administration</b> Each country has a maximum number for every administrative operation that it can attempt each turn within the period, in particular:</p> <ul style="list-style-type: none"> <li>• Commercial Development</li> <li>• Colonisation</li> <li>• Establishment of Trading Posts</li> <li>• Competition Action</li> </ul> <p><b>D</b> A country may always use fewer actions (or even none) than allowed by his maximum period/turn limit.</p> <p><b>E Technology</b> In addition to these specific limits, each country may attempt each turn to increase both its land and its naval technology.</p> <p><i>E.1</i> However, only one of the two technology increases may be attempted with more than a minimal investment.</p>	<div>The powers: at home and abroad— master – 2016-04-14</div> <div>[R]31</div> <p><b>F Domestic action</b> Each country may also each turn attempt one (and only one) of the following actions:</p> <ul style="list-style-type: none"> <li>• Increase its actual DTI.</li> <li>• Increase its actual FTI. This does not increase the special FTI unless the FTI becomes larger than the special FTI (in which case the special FTI is raised at the same value as the FTI).</li> <li>• Increase its actual special FTI.</li> <li>• Create a new MNU. This can either switch an existing counter from its ⊖ side to its ⊕ or create a new ⊖ counter.</li> <li>• Raise exceptional taxes.</li> </ul> <p><b>G Free maintenance</b> Basic forces indicate the number of units considered to have a free maintenance (i.e. those in play without having to pay their maintenance each turn). Land units of this basic force are veterans.</p> <p><b>H Military force purchase</b> The military force purchase indicates the maximum number of forces, (either LID or NID), that the country may buy in each Purchase phase.</p> <p><i>H.1</i> NGID count only for half a NID in the purchase limit.</p> <p><i>H.2</i> Exploitation of wood and fisheries increase the limit of NID, see section VII.3.3 (Naval forces).</p> <p><i>H.3</i> The NID limit may not be exceeded.</p> <p><i>H.4</i> the LID limit may be exceeded. Every LID recruited below the limit is payed at normal cost, then every LID below twice the limit is payed at double cost and finally every LID below three times the limit is payed at triple cost.</p> <p><i>H.5</i> It is not possible to recruit in a given turn more LID than three time the turn limit.</p> <p><b>I Minimum Leaders</b> The player must also have in permanence a certain number of leaders, specified by type (♂, ♀, ☼, ☾, ⚔, ⚓). If the historical (named) leaders that the player receives do not suffice to reach this minimum leader quantity per type, he can take some additional leaders at random, among his available unnamed Ⓢ leaders of the required type.</p> <p><i>I.1</i> The Ⓢ leaders of majors countries are removed each turn and new ones are drawn if needed.</p> <p><i>I.2</i> The monarch leader as well as the Turkish Vizier and Swedish heirs are never counted in this limit (they all bore a “monarch” symbol (crown)).</p> <p><i>I.3</i> If a country as more named leader than its limit, then no unnamed one is drawn.</p> <p><i>I.4</i> Should a country fall below its limit during the turn (due to death in battle), a new Ⓢ leader is drawn at the beginning of the next round in order to reach the limit again.</p> <div> <p><b>Example:</b> In period I, POR may attempt each turn up to 2 diplomatic action, 1 Trade Fleet Implementation, 1 COL, 2 TP and 2 concurrence actions. None of them is mandatory. Any action performed must be paid for and is not guaranteed to succeed.</p> <p>In period I, POR maintains for free one Ⓢ ⊖ and 3 Ⓢ Ⓢ. The Ⓢ Ⓢ may be used either for LID or NID.</p> <p>In period I, POR may not buy more than 4NID each turn. It may buy up to 2LID at normal cost, plus 2 more at double cost and again 2 more at triple cost. It cannot buy more than 6LID in a given turn.</p> <p>In period I, POR must have each turn at least 1♂, 1♂, 1☼ and 1☾. At turn 1, its only historical leader is Dias, an ☼. Thus POR must draw at random amongst its leader one Ⓢ ♂, one Ⓢ ♂ and one Ⓢ ☼. Should Dias dies during the turn (eg, speared by natives in the Cape peninsula), he is replaced by a Ⓢ ☼ at the beginning of the next round. Similarly, if the Ⓢ ♂ attempts a war in MAURETANIA and dies in the desert, he is replaced by another Ⓢ ♂ (possibly the same) at the beginning of next round.</p> <p>At turn 2, the leader limits have not changed but POR received new historical leaders and now has: Dias (provided he did not die on turn 1), an ☼; Cabral, another ☼; and Da Gama, who counts as a ☼. Thus, it must draw a Ⓢ ♂ and a Ⓢ ♂. Having 2 ☼ (more than the limit) is not a problem since both of them are named (historical leaders). However, if one of them happen to die during the turn (eg, lost at sea near BRAZIL), the other one is enough to fulfil the limit of 1 and no Ⓢ ☼ is drawn. If, by a stroke of bad luck, both Dias and Cabral die during the turn, then a Ⓢ ☼ (and only one) is drawn as replacement in order to reach the limit (of 1).</p> <p>Note that Da Gama may be used as a ☼ but always counts towards the limit of ☼ (as per section VIII.1.1.1 (Double-sided Leaders)). Thus, it is possible for POR to have 3 ☼ active at the same time (Dias, Cabral and Da Gama), but Da Gama still counts as a ☼ and no Ⓢ ☼ is drawn. Similarly, if both Dias and Cabral die, a Ⓢ ☼ is drawn whichever side Da Gama is used.</p> </div>
--	--

## II.5 Estates of a Power

### II.5.1 The monarch

**A** The player represents the monarch of the country he is in charge of. He may execute different actions thanks to values of his monarch, whose reign has a limited duration.

**B Reign Length** A monarch has a reign length evaluated in number of turns. A monarch must undergo a survival test each turn, and if he succeeds them all successively, he dies at the beginning of the turn following its last turn of reign. The reign length of a monarch is determined at the moment of his advent.

*B.1* Monarchs may die earlier than scheduled due to failure of the survival test.

**C Characteristics of a monarch** Each monarch possesses 3 values:

*C.1* ADM: Administration

*C.2* DIP: Diplomacy

*C.3* MIL: Military

**D** These values usually vary between 3 and 9. Very few exceptions can drop these values below 3 in which cases the new limit will be explicitly stated.

**E** Each one of these characteristics is determined only once, at the time a new monarch ascends the throne (after the death of the precedent).

**F Administrative Value** ADM is the main modifier for most administrative operations, either for the choice of the column, or for die-roll modifications (see §B (Administrative operations) of section VI.2.1 (General mechanism and list of actions)).

**G Diplomatic Value** DIP is the main die-roll modifier for diplomatic actions, such as the attempt to get control of a minor country (see section IV.3.2 (Diplomatic actions)).

**H Military Value** MIL is the main modifier of the technology improvement operation (see section VI.8.1.2 (Technology improvement)). It also serves to determine combat values (maneuver, fire, shock) of the monarch when serving as a General.

**I No monarch** If a country has no monarch for any reason (usually because he was captured and not yet ransomed, or killed and the new monarch will only be rolled at the next monarch segment), it is considered to have a 3/3/3 monarch.

*I.1* Ministers may still be used.

#### II.5.1.1 The survival test

**A** Each monarch has to make a survival test at the beginning of each turn.

*A.1* if a monarch dies due to failure at this test or arriving at his scheduled reign length, the player has to roll for a new monarch.

**B** The procedure is explained in details in section III.2 (Monarch survival).

#### II.5.1.2 Initiative

**A** The initiative of each player is the sum of their respective monarchs values.

*A.1* Ties must be solved by unmodified competitive die-rolls, once per turn, the first time initiative is needed.

**B** The initiative is used during the military phase, to determine the order of play for the turn between the different players.

*B.1* Players (or alliances) play in turn, according to the descending order of initiative

#### II.5.1.3 Ministers

**A** Countries may get an excellent minister to administrate them, either by event E-2 (Excellent ministers) or by some political events.

*A.1* For each of the three characteristic (ADM/DIP/MIL), always use the best between the one of the monarch and the one of a minister.

*A.2* Exception: For determining the values of monarchs as general, use the MIL of the monarch, not the MIL of a minister.

**B** List of named excellent ministers (arriving through political events or special rules):

**Colbert, Heinsius, Kaunitz, Köprülü, Mazarin, Olivares, Oxenstierna, Patkul, Pitt, Potemkin, Richelieu, de Witt.**

### II.5.2 Stability

Stability is the most important indicator for a country in a campaign game. It is Stability that allows players to best manage their country because it has an impact on most administrative operations, as well as monarch survival, income, war duration and on peace levels achieved.

**A** The Stability of each country fluctuates between -3 and +3. A positive Stability is a good thing while a negative one hampers the country.

*A.1* The Stability of each country is recorded on the Stability track on the ROTW map.

*A.2* Each major country (as well as some other entities) has a Stability counter used to record its Stability.

**B Variation of the Stability** The Stability varies according to the actions of the players or situations affecting the player (e.g., state of war), or else by events.

*B.1* These variations are indicated here and there in the concerned rules or events. It is not necessary to learn each and every one variation, as they will be reminded to the players when the need arises.

*B.2* The main reason to loses Stability is by wars (either declaring one or going on in a existing war). Stability may also be lost because of revolts, bankruptcy and some other events.

*B.3* The main way to gain Stability is by paying the Stability improvement operation at the end of turn (see section X.5 (Stability Improvement)). Stability may also be gained by ending war and a handful of events.

### II.5.3 Technology

**A** Technology is an abstract representation of the weapons, army discipline, military doctrine and such.

#### II.5.3.1 Generalities about technology

**A Levels and goals.** Each major power and cultural group, as well as some other entities, has a technology level between 1 and 70.

*A.1* Technological goals represent major breakthrough in the art of war. They also have a level between 1 and 70.

*A.2* Whenever the level of a country is higher than the level of a goal, the country possess the corresponding technology.

*A.3* These level are recorded with counters on the technology track (on the ROTW map).

*A.4* The initial level of each technological goal is written on its counter (or specified in the scenario). The initial level of majors and groups is given in the scenario.

**B Land and Sea.** Technology levels and goals are split in *Land technology* (affecting armies and sieges) and *Naval technology* (affecting navies and exploration).

*B.1* Always ignore anything dealing with Land technology when handling Naval technology and always ignore anything dealing with Naval technology when handling Land technology. Typically, Land technological goals do not affect Naval technological levels and so on.

*B.2* Neither AUS nor PRU have a Naval technology counter. Their naval forces have the same technology than the Latin group.

**C Cultural groups.** The technology of a minor country is the technology of its cultural group.

*C.1* Major countries also belong to cultural groups. Whenever the technology of a major increase, the technology of its groups may also increase.

### II.5.3.2 Technological goals

**A Mobile markers** Mobile markers are used to record the level of the different technological goals and thus show which country possess the corresponding technology.

A.1 There is no counter for the technologies known to everybody in 1492 (*Medieval* for Land technology, *Carrack* and *Galley* for Naval technology). Their level is always 0.

A.2 There is also a marker for the *Tercios* technology (that can be taken only by HIS) and for the *Galleasses* technology (that can be taken only by VEN).

A.3 Each of the mobile markers has a turn (and the corresponding year) written on it. This indicates the first possibility of access to the corresponding technology.

A.4 If a country has a too rapid progression, its technology marker will be blocked at the level just below the goal until the turn written on it is reached.

**Example:** Technology *Arquebus* may not be discovered before turn 11, its initial level is 21 (as indicated on the counter). At turn 9, FRA has a Land technology of 19 and succeed in gaining 2 levels. That should bring it to level 21 and give it *Arquebus*. However, *Arquebus* is not accessible yet. So the Land technology of FRA is instead blocked at level 20 and the extra progression level is lost. At turn 10, FRA may still not get *Arquebus*. Thus, trying to improve its Land technology is useless as no level may be gained.

**B Stacking of counters.** Two technological goals counters (of the same kind: Land or Sea) may never be at the same level (or in the same box of the track) and must always have at least one free level between them. If a goal should move to the same level as another, or to the level immediately above, it stops two levels ahead.

B.1 The technology marker of a country (or group) may never be exactly at the same level as a technological goal (of the same kind). If it stop on it, it gains a one level bonus. Conversely, if a goal drops, it stops one level before any marker of the same kind.

B.2 Exception: Ignore the *Tercios* and *Galleasses* for everybody (including HIS and VEN).

**Example:** At turn 11, the Land technology of FRA is at level 20, just before *Arquebus* at level 21. *Arquebus* becomes available and FRA tries to raise its Land technology and manage to gain 1 level. This should put its marker at level 21 on top of the *Arquebus* marker. Since stacking of a marker and a goal is forbidden, FRA gets a bonus level of Land technology and goes directly to 22.

At turn 21, after technological improvement, no one managed to get *Muskets* and the higher level of Land technology is 29. As per goals adjustment (see section VI.8.1 (Technology)), *Muskets* should loss 1 level from 30 to 29. However, that would put it on top of a marker, which is forbidden, thus it stays at 30 instead.

### II.5.3.3 List of technologies

**A** We give here a list of all Land and Naval technologies, in chronological order, together with the year and turn of availability. For historical reference, we also give the first country (or countries) that acquired this technology, as well as a short commentary on what it represents. Only the first three columns are of interest in game.

A.1 Note that some countries are sometime allowed to gain technologies earlier than the indicated turn, thus the dates here may be later than the historical occurrence of the technology (typically, SUE gets *Baroque* in the 1630's and ANG gets it in the 1640's).

A.2 List of Land technologies:

Name	Year	Turn	First	Remark
<i>Medieval</i>		1		At start.
<i>Renaissance</i>	1492	1	FRA, TUR	Generalisation of field artillery.
<i>Tercios</i>	1520	7	HIS	HIS only. Mix of guns and pikes.
<i>Arquebus</i>	1540	11	FRA	" <i>Trace italienne</i> ".
<i>Muskets</i>	1590	21	HOL	Better infantry firepower.
<i>Baroque</i>	1650	33	SUE, ANG	<i>Läderkanonen</i> , New Model Army.
<i>Manoeuvre</i>	1685	40	FRA, AUS	Vauban fortification system.
<i>Lace</i>	1770	57	PRU	" <i>War in lace</i> ", oblique order.

#### A.3 List of Naval technologies:

Name	Year	Turn	First	Remark
<i>Galley</i>		1		At start. Mediterranean and Baltic seas only.
<i>Carrack</i>		1		At start. Caravels, Neefs, Great ships, . . .
<i>Nao-Galeon</i>	1492	1	POR, HIS	Portuguese Nao, Spanish Galleons.
<i>Galleon-Fluyt</i>	1560	15	HOL, ANG	Dutch Fluyt, British race-built galleons. Smaller and faster.
<i>Galleasses</i>	1560	15	VEN	VEN only. Galleys with cannons.
<i>Battery</i>	1590	21	HOL, ANG	
<i>Vessel</i>	1645	33	ANG, HOL	Ship-of-the-line, primitive battle line.
<i>Three-decker</i>	1690	41	ANG	British standardisation, early professionalisation of the navies.
<i>74's guns</i>	1735	50	FRA, ANG	Better blockade, faster 2nd line ships.

## II.6 Troubles at land and sea

### II.6.1 Revolts

A revolt is determined randomly, concerning where and when it occurs. A revolt usually brings a drop in the Stability level of the victim country. This country has to crush the revolt as quickly as possible otherwise taking the risk to witness an extension of that revolt (that can go as far as overthrowing the country's monarch).

Revolts are generated by events. The revolt tables indicate the strength and location of the revolt, according to the period in play. The revolt tables are located at the start of the Events handbook.

One table is used to determine the victim country. Another group of tables (one per country) helps determining the revolting province. Finally a table gives the strength of the revolt.

**A Resolving Revolts** Revolts are rolled for when required per the political events. See section III.7 (Revolt events) for full details on the procedure.

**B Revolt and Income** Provinces in revolt bring no income during the country's income phase. Rather than recomputing the income of unrevolted provinces each turn, this is recorded as a loss on the Economic Record Sheet (line ).

**C City control** Unless specified by the event causing the revolt or by the strength of the revolt, the city in a revolted province is still controlled by whoever controlled it last for all aspects of the game (eg for supply).

**D Technology** Revolted troops (if any) have the same characteristics (class, number of artillery, . . . ) as troops of the country in which the revolt occurs.

D.1 The technology of the revolted troops is the technology of the country in which it occurs at the beginning of the turn. Hence, it may be lower than its actual technology if the country managed to increase it during the turn.

**E Crushing revolts** During the military phase, a country may attempt to crush a revolt by sending troops in the revolted province.

**E.1** Revolts occurring inside minor countries that are not active are automatically removed at the end of turn.

**F** Only national units from the country in which it occurs may be used against revolts. No units belonging to minors (even vassals) or major allies may be used.

**F.1** Exception: the Emperor may use Holy Roman Empire units to repress revolts in the HRE.

**F.2** Exception: ANG may use troops of SCOTIA (after event VI-8 (Act of Union)) to fight all its revolts and troops of HANOVERE (after event VI-6 (Vassalisation of Hanovere)) to fight revolts inside his or HANOVERE's territory.

**F.3** Exception: during religious or civil war, any country at war or in intervention may fight revolts allied to the other side.

**G Revolts and Stability** At the end of turn, existing revolts cause loss of Stability as indicated in section IX.4.2 (Loss of Stability due to Revolts).

**H Extension of revolts** If one or more revolt still exists at the end of turn, it extends in the same or adjacent provinces, see section IX.4.3 (Extension of *Revolt*).

**I Revolt stacking** Each province may contain up to two revolt counters (any side) in addition to other military units (with usual stacking).

**I.1** Two *Revolt* ⊖ in the same province are immediately exchanged for one *Revolt* ⊕, before stacking limit is enforced.

**I.2** If a third counter had to be created in a given province, simply ignore it but apply all the other effects of this revolt (eg taking the fortress, adding troops, . . .)

**J Successful revolts** If they spread too much, revolts may have two separate but very negative effect on a country.

**J.1** If half the national provinces of a country are revolted at end of turn, then its tyrant is overthrown (executed or exiled) and replaced by a new benevolent monarch, see section IX.4.6 (Execution of the Monarch).

**J.2** If some specific provinces of a given group (eg Ireland) are revolted, the owner may choose to give independence to the revolted principality rather than trying to crush it now. See section XIV.14.9 (Independence of Revolted Principalities) for the list of concerned provinces.

## II.6.2 Pirates

Pirates appear in STZ/CTZ each turn and also due to some events. Each turn they remain in play, pirates will try to weaken all the commercial fleets, during the redeployment phase of the turn.

Pirates are represented by the abstract minor "country" PIRATÆ, mostly with IP counters as well as some ⚔ representing famous pirates (such as *Blackbeard*).

**A Appearance of Pirates** Pirates appear each turn in the ROTW STZ according to the Economic Situation die roll, see section III.5 (Piracy).

**A.1** The presence of named PIRATÆ ⚔ increase the risk of pirate appearing.

**A.2** The economical event event E-12 (Pirates) causes several appearances of pirates.

**B Stacking of pirates** Two PIRATÆ IP ⊖ in the same STZ/CTZ are immediately exchanged for one PIRATÆ IP ⊕. PIRATÆ IP ⊕ and ⊖ can coexist in a STZ/CTZ, without limit.

**C Effect of pirates** PIRATÆ IP (as well as countries IP) attack the commercial fleet of other countries.

**C.1** They may be fought during the military phase by navies.

**C.2** At the end of turn, they can cause loss of levels on TF.

**C.3** See section IX.3 (Attacks by Pirates & Privateers)

## II.7 The economical system

**A** The economical system in *Europa Universalis* tries to reproduce the constant need to (short term) loans that countries of the epoch endured, as well as the heavy strain caused by wars, bringing even large and rich superpowers to bankruptcy and the brink of ruin. Inflation is usually very high (due to the massive amount of gold and silver coming from America) thus preventing any country from stockpiling large amount of money (these quickly lose their value because of inflation).

**B** The count unit is the *ducat*, written ₧.

### II.7.1 Economic Record Sheets

**A** Each player has two sheets, separated in three actual *ERS*.

**A.1** *ERS* A keeps track of the *Royal Treasure* (RT) of a country. This represents the amount of gold stockpiled in the King's chests. . . or the amount of debts he has. The final value of the RT is carried over from one turn to the other.

**A.2** *ERS* B is used to compute the income and expenses during each turn. The values are useless after the end of the turn. However, since income does not change that often, it is usually efficient to copy almost all of the column of the previous turn.

**A.3** *ERS* C (below *ERS* A) is used to record loans. This information carries over from one turn to the following one.

**B** Each column of the *ERS* is used for one turn only. Information for the following turn should be written in the next column.

**C** The lines of the *ERS* are organised in turn order. They are usually filled from top to bottom. However, sometimes it is easier to plan expenses in advance and fill the corresponding lines as a reminder.

**C.1** The turn starts on top of *ERS* A, there is a "break" after line **A8** for computation of incomes and expenses on *ERS* B.

**D** The RT can well be negative (representing debts). This does not cause extra trouble (as long as the amount of the debt is not "too big").

### II.7.2 A Three stage process

**Design note:** We explain here the spirit of the economical system. For the technical explanation on how to really get it working (and the precise rules), see section X.3 (Exchequer test).

The rules here try to explain the whys of the system while the more technical rules there explain the hows.

**A** The bulk of the economical system works in a three stage process during each turn.

**A.1** First, the *gross income* is computed (Administrative phase).

**A.2** Then, the *expenses* are computed (Administrative and Military phases).

**A.3** Lastly, the *Exchequer test* tells how well the taxes were collected and the monarchs try to find money to fill the gaps (Exchequer test segment during the Budget and Peace phase).

## Economic record sheet A - Royal Treasure

## Economic record sheet C - Loans

[illegible]

### Economic record sheet B - Income

[illegible]

<div data-bbox="114 90 1117 167"> <div>[R]40</div> <div>The economical system</div> </div> <div data-bbox="114 167 1117 1513"> <div>II.7.2.1 Incomes</div> <p><b>A</b> Income is computed during the Administrative phase. Income comes from various sources such as:</p> <p>A.1 Provinces income (basically, taxing the peasants and the artisans).</p> <p>A.2 Industrial income (European gold mines and manufactures).</p> <p>A.3 Trade income (TF and trade centres).</p> <p>A.4 ROTW income (Colonial establishments and the resources they exploit).</p> <p><b>B</b> Lines in ERS B are grouped by kind of income in order to make partial sums and ease computation of the total.</p> <p>B.1 Income does not vary much from one turn to another (except for exotic resources). Hence, most of the time computing income is done by copying the previous column.</p> <p><b>C</b> Gold from the ROTW is not received as regular income. It must be physically brought back to Europa and then arrives directly into the RT (this is better).</p> <p><b>D</b> The total income is called the <i>Gross income</i> it is computed on line <b>B25</b> (Gross income B) and copied back on line <b>A14</b> (Gross income A) .</p> <div>II.7.2.2 Expenses</div> <p><b>A</b> Expenses come in two kind:</p> <p>A.1 The administrative expenses are used to maintain troops and buy new ones and to develop commercially or industrially a country.</p> <p>A.2 The military expenses are used to move troops during wars. This quickly becomes <b>very</b> expensive.</p> <p><b>B</b> Administrative expenses are written and computed during the administrative phase.</p> <p>B.1 They include loan interest and loan refund.</p> <p><b>C</b> Military expenses are computed during the military phase.</p> <div>II.7.2.3 The Exchequer test</div> <p><b>A</b> The gross income computed during the administrative phase is only a rough approximation of what will be available if taxes go well.</p> <p>A.1 At the end of the turn, each country performs the Exchequer test to discover how well the taxes went and how much money really made it to the palace.</p> <p>A.2 Low stability and wars tend to make taxes go wrong.</p> <p><b>B</b> The Exchequer test splits the incomes into three parts: the <i>regular</i> income, the <i>prestige</i> income and the <i>national loan</i> income.</p> <p>B.1 These incomes are expressed in percentages (of the gross income).</p> <p>B.2 It is possible (and intended) that these three percentages sum up to more (or less) than 100%.</p> <p><b>C</b> The <b>regular income</b> is used first to cover for the expenses.</p> <p>C.1 In the rare cases where the regular income is larger than the expenses, the surplus can be stockpiled into the RT.</p> <p><b>D</b> The <b>prestige income</b> may be used to cover for the expenses.</p> <p>D.1 Any part of it that is not spent to cover for expenses (either surplus or voluntarily kept) is immediately spent for "prestige" expenses such as building palaces or churches, organising receptions, . . .</p> <p>D.2 Prestige expenses provide VPs at the end of each period.</p> <p><b>E</b> The <b>national loan</b> income is the maximum amount of money that can be borrowed from national nobles and burghers.</p> <p>E.1 National loans are never mandatory and each country always choose how much to borrow (within the limit of this income).</p> <p>E.2 Money from national loans can be used to pay for expenses or can be stockpiled into the RT.</p> <p>E.3 Loans have a fixed interest rate of 10% that must be paid each turn until the loan is refunded.</p> </div>	<div data-bbox="1117 90 2121 167"> <div>The powers: at home and abroad— master – 2016-04-14</div> <div>[R]41</div> </div> <div data-bbox="1117 167 2121 1513"> <p>E.4 Refunding of national loans is never mandatory. A country may choose to continue paying interests each turns rather than refunding its citizens. . .</p> <p>E.5 However, having too many loans tends to hamper further Exchequer tests.</p> <p><b>F International loans</b> Sometimes, especially when the Exchequer test went poorly, a country will be in dire need for money and can ask for an international loan.</p> <p>F.1 International loans give money that can be used to pay for expenses or to be stockpiled in the RT.</p> <p>F.2 International loans also have a fixed interest rate of 10%.</p> <p>F.3 International loans, however, must be refunded within 15 years (3 turns).</p> <div>II.7.2.4 Bankruptcy and inflation</div> <p><b>A Bankruptcy</b> During the administrative phase, countries can choose to go bankrupt.</p> <p>A.1 Sometimes, the poor economical situation of a country (too many loans and debts) forces it to go bankrupt.</p> <p>A.2 Bankruptcies allow a country to erase some or all of its loans and debts.</p> <p>A.3 However, it usually cause some agitation (loss of Stability) and economical disarray (loss of TF and MNU) as well as a slight dishonour (loss of VPs).</p> <p><b>B Inflation</b> At the end of each turn, inflation will decrease the amount of the RT.</p> <p>B.1 It is worth noticing than even a negative RT will suffer from inflation. Going into debts is not a good way to get ride of inflation.</p> <p>B.2 Because of inflation, each country needs to get at least some money into its RT each turn.</p> <div> <p><b>Example: Exchequer test.—</b> Country A has a gross income of 300 ₮. It has a total expenses of 200 ₮ (includes administration, loans interest and refund and military) and 40 ₮ in RT. During the Exchequer test, the results give 50% in regular income, 40% in prestige income and 20% in loans (a good result). Thus, its regular income is 150 ₮ (50% of 300), its prestige income is 120 ₮ and its maximal national loan amount is 60 ₮.</p> <p>Money must be spent first from the regular income. So the 150 ₮ of the regular income are used and 50 ₮ of expenses remains. There are several solution to cover this:</p> <ul style="list-style-type: none"> <li>• It is possible to use 50 ₮ of the prestige income to pay for expenses. The 70 ₮ remaining must be spent for prestige VPs and cannot go into the RT. No loan is required and so none is contracted and inflation has to be payed from the 40 ₮ of RT.</li> <li>• It is also possible to choose to get more VPs by spending all the 120 ₮ of prestige income into VPs. A new loan of 60 ₮ can be contracted to pay for the remaining expenses (50 ₮) and get 10 extra ₮ into the RT (to pay for inflation).</li> <li>• Another possibility is to spent all the prestige income in VPs but forgo the loan. The remaining 50 ₮ of expenses is then payed from the RT (thus going to -10 ₮) and inflation will lower it some more (probably not the wisest choice).</li> </ul> <p>Several other possibilities exists and are up to the player choice. Notice that the easiest way to get money back into the RT (to pay for inflation and Diplomacy) is to contract a new loan.</p> </div> <div> <p><b>Example: The loan trick.—</b> Loan refund being expenses, they can be payed by the prestige income thus giving a process to circumvent the prohibition of putting prestige money in the RT:</p> <p>A country has 100 ₮ in loans and 200 ₮ in incomes. Its expenses are 80 ₮ and it choose to spend an extra 50 ₮ to refund loans (this must be chosen before the military phase, so do it carefully while at war!) Thus, its total expenses is 130 ₮.</p> <p>The Exchequer test gives 80 ₮ of regular income, 60 ₮ of prestige income and 60 ₮ of loans. The 80 ₮ of regular income is spent and 50 ₮ of expenses remains. These can be covered from the prestige income (and 10 ₮ of prestige is spent for VPs). A new loan of 50 ₮ is contracted and all its amount can go into the RT. The net effect on the loans is null and all happened as if prestige income went into the RT. . . But to do this trick you need to have some loans to refund (and re-contract immediately) and you need to carefully estimate the Exchequer test as a bad result can cause a huge hole in your RT. Trying to be too greedy when doing this is a good way to force you to take an international loan.</p> </div> </div>
---	---

**Example: When things go wrong: international loans.—** A country has 500 ₮ of gross income. Being at war, and forced to pay the interest of previous loans give a total expenses of 700 ₮ (those armies and fleet don't move for free). Fortunately, the RT is still quite OK at 10 ₮.

The Exchequer test goes badly (as often in wars) and gives a result of 30%/20%/40%. So the regular income is 150 ₮, the prestige income is 100 ₮ and a maximum loan of 200 ₮.

The regular income covers a small part of the expenses and the prestige income is also quickly swallowed to pay for some troops rather than receptions. . . 450 ₮ still need to be found. The burghers reluctantly loan 200 ₮ still leaving a 250 ₮ large "hole" in the budget.

Rather than going badly into debt (usually a bad idea), the country choose to appeal to Genoese and Dutch bankers and manage to get a 140 ₮ loan. Not bad but still not sufficient to cover the expenses. Moreover, the international loan must be refunded within 15 years (hopefully this won't happen in the middle of another war).

The 140 ₮ of the international loan cover for part of the expenses but the extra 110 ₮ must be taken from the RT, bringing it to -100 ₮ with 340 ₮ more in loans than at the start of the turn. Another similar turn and bankruptcy will knock on the door. Maybe now is a good time to try and make peace after all. . .

## II.8 The Great Discoveries

Countries can launch great expeditions in order to discover and explore the New World as well as find new routes to India and its riches. After the exploration, they may invest in order to build trading post and increase their hold on the spice and sugar trade or they may try to colonise the New World to either exploit gold or populate it.

**A Exploration** During the military phase, countries may send stack in the ROTW to try and discover new seas and new lands.

A.1 The presence of an explorer (on sea) or a conquistador (on land) greatly increases the chance of success of the voyage.

A.2 New discoveries have to be brought back to known areas in order to be effective.

A.3 See section VIII.5 (On discoveries [58]).

### II.8.1 Forts

Forts are small fortifications that bring little protection but are inexpensive to build and maintain.

**A Building forts** Forts may be built by LID during the military phase in the ROTW only.

A.1 Forts are considered to be fortresses of level 0.

**B Number of forts** The number of forts a country may have in play is limited by the number of counters only.

B.1 Forts are free to build.

B.2 Each fort costs 1 ₮ per turn to maintain.

**C Forts and supply** Forts are supply sources for LID and NID only. They do not provide supply for A or F counters.

C.1 Coastal forts are considered as ports for NID, but not for F.

### II.8.2 Colonies and Trading posts

Colonies (COL) and Trading Post (TP) are placed on the map after payment (and success) of an administrative Colonisation or Trading post implantation operation.

A newly implanted COL or TP begins at level 1, then it progresses according to actions of Colonisation or Trading post implantation of the owning country until it reaches the level 6 (maximum).

A COL generates an income according to its level (1 ₮ per level), and the wealth of the Area (simple or double income according to the COL side), as well as from exotic resources that it can exploit. It may also be fortified.

A TP generates an income (1 or 2 ₮ according to its side) and exploits most exotic resources (except square-shaped resources of **AMERICA** and **AFRICA**).

TP are vulnerable to actions of Competition from the other players. They can also be burnt down during wars. COL are more resilient and can only be exchanged as peace condition or in dowry.

#### II.8.2.1 Description

**A Number of establishments** For each period, the maximum number of COL and TP counters is limited and can never be exceeded (See section II.4.3.1 (Period limits table)).

**B Placement** New COL or TP may only be placed on map via the colonisation or trading-post administrative action.

B.1 Using a conquistador, missionary or explorer greatly improves the chances of success.

B.2 TP may be turned into COL in some cases as a colonisation action.

**C Level of an establishment** A newly placed COL or TP is automatically level 1, and placed side ⊖ on the map.

C.1 Each following successful colonisation or trading-post operation increase its level by 1.

C.2 Up to level 3, the COL/TP is placed side ⊖ on the map.

C.3 From level 4 up, the COL/TP is placed side ⊕ on the map.

C.4 A COL/TP may never have more than 6 levels.

**D Establishments and port** Each COL/TP located in a coastal province is considered to be also a port.

D.1 In case of provinces with multiple coasts (e.g. **PANAMA**), the principal coast, where the port is located, must be chosen upon creation of the COL/TP. At least one sea zone on which the establishment is a port must be known (e.g. one may not build a COL on the Pacific coast of **PANAMA** if only the Atlantic coast is known).

**E Fortifications** COL/TP may be fortified. A F marker can be built in a COL/TP provided the owning country has the required technology.

E.1 Unfortified COL of level 5 or less and TP are considered to have only a fort as a fortification. A level 1 F has to be built before further fortifications.

E.2 The cost of construction and maintenance of a F is double in the ROTW than in Europe.

E.3 In TP and COL of level 5 or less, only F of level 1 or 2, or the special arsenal-F may be built.

E.4 Arsenal may be built in COL/TP instead of a F of the same level. They provide an arsenal (rather than a port) in addition to the benefits of the F. The limit of arsenals building is the counter limit.

**F Colony of Level 6** A COL of level 6 is considered to be a European province for all military purpose.

F.1 It has an intrinsic F level of 1 even if no F was built. Use a white level 1 fortress counter as reminder, possibly freeing any existing country-specific level 1 fortress here. Since this is a permanent fortress, it does not require upkeep and may not be voluntarily destroyed.

F.2 F of any level may be built in COL of level 6. They cost the normal (European) price both to build and to maintain.

F.3 It becomes known to every country without need to discover the province.

F.4 The cost in MP for entering the province is now computed as if it was an European province and not a ROTW one.

F.5 However, its income is still computed as a COL (including exploitation of gold or exotic resources).

#### II.8.2.2 Colonial militia

**A** Each COL has an intrinsic colonial militia of 1LDE of conscripts per 2 levels plus 1LDE if there is a mission.

A.1 Militias have the same military feature (technology, class, . . . ) as the player owning the COL.

**B Utilisation of Militias** These colonial militias can never leave their Colony of origin. They are never counted in stacking limit.

B.1 Militias can either stay within the fortress or fight in the field (eg to try and repulse a landing party) at controller's choice.

B.2 In case of combat, just add the force of militias to military units already present in the Colony (up to 8LID participating in the battle on each side).

B.3 If militia are lost, use the generic militia counters (white) to remember how many LIDE are still present.

B.4 If the COL is still controlled by its legitimate owner, militias are automatically reconstituted for free at the end of turn.

### II.8.2.3 Destruction of TP

**A** TP that are military occupied during wars may be destroyed by the occupant during the redeployment phase.

**B** It is possible to do concurrence action on TP. Each successful concurrence action reduce the level of the TP by 1.

B.1 When the TP reach level 0, remove it from the game. The counter may be reused by its owner.

### II.8.3 Exploitation of Exotic resources

**A Resources** Exotic resources are exploited by Colonies (COL), Trading-Posts (TP) or Manufactures (MNU). There are ten such resources: *Cotton, Fish, Furs, Products of America, Products of Orient, Salt, Silk, Slaves, Sugar, Spices*.

A.1 *Salt* and *Fish* are the only resources that are also exploited through MNU, in Europe. All other resources are only exploited in the ROTW.

A.2 The *Exotic Resources Record Sheet* keeps track of the exploitation of Exotic Resources (globally) while each player has a *Colonial sheet* to record the exotic resources exploited by his colonial establishments (and MNU).

**B** Each exotic resource has a price, recorded on the prices track (on the ROTW map).

B.1 Prices change each turn, partly because of the global economic situation (one die roll) and partly because of a specific market situation (one die roll per resource, depending on the exploited quantity). See section VI.12 (Exotic resources price variation, Trade centres and convoys) for details.

B.2 Exotic resources bring to each country an income equal to the product of the price of the resource and the quantity exploited by that country.

**C** Exotic resources are depicted on the ROTW map by a symbol as well as a number in a coloured shape. The number indicates how many resources of this type are available while the shape indicates how the resource can be exploited.

C.1 The shape of the symbol of the resource indicates how it can be exploited. See section V.5.2 (Exotic resources) for details about exploitation of exotic resources.

**D Monopoly on Exotic Resources** A country exploiting at least 6 resources of the same kind can claim a monopoly.

D.1 A partial monopoly is if the country exploits at least as many units as all other countries together.

D.2 A total monopoly is if the country exploits all exploited units but two.

D.3 Resources exploited by minor countries are counted in the total, but see §B of section IV.4.4.5 (Guzarate, Ayman, Aden, Aceh).

**E Progressive appearance** Some resources appear only late in the game: *Sugar* (in **BRAZIL**) in 1560 (turn 15, period III), *Products of America* and *Sugar* (elsewhere) in 1615 (turn 26, period IV), *Cotton* (in **AMERICA** and **INDONESIA**) in 1750 (turn 53, period VII).

E.1 In 1615 and 1750, when the resources appear, they appear at the rate of exactly one resource per turn per Area. If there are several possibilities for a given Area, the resource is determined at random.

**Example:** **GUYANA** provides 3 resources that appear in 1615: 2 *Sugar* and 1 *Product of America*. Thus, in turn 26 only one of them (chosen at random) will be available; on turn 27, a second one (still chosen at random) appears and only in 1625 (turn 28) will the three resources be exploitable.

**ANTILLES** has 8 *Sugar*. Thus, it will only reach its full production capacity by turn 33 (1650).

In 1615, there are in **ANTILLES** both colonies of FRA and ANG with enough levels to exploit 1 *Sugar* each and a colony of HOL with enough levels to exploit 2 *Sugar*. The first *Sugar* appears and 3 countries can exploit it. Thus an automatic competition is done. The resource is finally exploited by FRA.

In 1620, a second *Sugar* appear. FRA still has the right to exploit the first one and keeps it, hence FRA has no more free levels in **ANTILLES** to exploit the new resource. An automatic competition is done between ANG and HOL only and the resource goes to HOL.

In 1625, a third resource appears. Both ANG and HOL still have the capacity to exploit it (because HOL has enough levels to exploit 2 *Sugar*). Hence a new automatic competition is resolved and the resource goes again to HOL.

In 1630, FRA managed to raise its COL and can now exploit 2 *Sugar*. Thus, both FRA and ANG are able to exploit the fourth *Sugar*. However, the players agree and FRA forfeits its claim. The resource is exploited by ANG.

In 1635, the fifth resource appear and only FRA can exploit it, thus taking it without need for competition.

In 1700, several other COL have been settled in **ANTILLES** thus exploiting the 8 *Sugar* there. HIS wants a part of the trade and successfully create a new COL. Since all the resources are already attributed, there is no automatic competition and HIS will need to do some voluntary competition (spending money and action and angering other players) in order to exploit some *Sugar*.

**F Development of trade in India** The trade of exotic resources changes during the game in India. Some events may change the flux of goods towards south India and Bengal.

F.1 Before the fall of the Kingdom of BISINAGAR (due to event II-A (Mogolis Imp. Expansions), event III-21 (Wars in India)... ) one can exploit only 1 *Products of Orient* and 1 *Spice* in **KARNĀTAKA**. A marker is used to show that the resources are limited.

F.2 After the fall, one can exploit fully the 2 *Products of Orient* and 2 *Spices*.

F.3 Before event III-20 (The Great Moghol Akbar), **BĀNGLĀ** is limited to 1 resource of each type. Use a marker as reminder.

F.4 After event III-20 (The Great Moghol Akbar), **BĀNGLĀ** can now exploit 2 resources of each type. Flip the marker to its "2" side.

F.5 When a COL is built in Kaḷaḷaṭṭa and either event III-20 (The Great Moghol Akbar) has happened or this is period VI or VII, the full potential of the Area is reached (3 *Products of Orient*, 3 *Spices* and 3 *Cotton*).

**G Fishing and naval construction** The owner of many fisheries get some reward from the great numbers of fishers in his country related to the construction of military naval units (see §B (Increasing the limit) of section VII.3.3.1 (Naval recruitment in Europe) and §C (Fisheries) of section VII.3.3.2 (Naval Recruitment in the ROTW)):

### II.8.4 Trade of Wood

**A** Wood is not an exotic resource. As such, it does not bring any income coming from a fluctuating price. However, it is exploited in a similar way (through colonial establishments or manufactures).

**B Wood production** Wood is produced each turn, and cannot be kept. Each unit of wood can be produced by either a MNU or a ROTW establishment.

**C ROTW Wood** A COL⊕ or TP⊕ in an Area with a *Wood* resource can be turned in a Wood factory: it brings the normal income, and produces 1 unit of wood that can only be used by the owner of the colony.

C.1 A wood factory TP or COL cannot exploit any exotic resources, nor a gold mine. Several different players can produce wood in the same Area, but only one unit of *Wood* can be produced per player per area.

C.2 The exploitation of wood begins with a simple declaration (as a diplomatic announcement) and can only be stopped by the loss of the establishment.

C.3 A minor country wood factory does provide the wood to its Patron (in the case of PORTUGALLIA). However, it is not possible to turn an establishment of a minor into a wood factory (that is, if POR creates a wood factory, it stays so and will provide wood for the patron of PORTUGALLIA, but the patron of PORTUGALLIA may not decide to turn a Portuguese establishment into a wood factory).

**D European Wood** A *Wood* MNU of level 1 produces 1 unit of Wood that can only be used by the producer. A *Wood* MNU of level 2 produces the same thing, plus 1 unit of Wood that can only be sold to a foreign country.

D.1 The price is fixed to 10  $\text{D}$  per unit, that goes in line **A4** (Wood and Slaves) of *ERS*.

D.2 The buyer must not be at war with the seller, and either the buyer has a commercial fleet in the seller's CTZ, or the seller has a commercial fleet in the buyer's CTZ.

D.3 For this purpose, PRU, POL and SUE count the STZ *Baltique* as their CTZ, and POR uses CTZ *HISPANIA*.

**E Use of wood** Wood raises the naval construction limits and the free maintenance (see §G (Effect of Wood.) of section VII.2.1 (Basic forces) and §B (Increasing the limit) of section VII.3.3.1 (Naval recruitment in Europe)).

### II.8.5 Minors colonial politics

**A** Some minor countries did also attempt to colonise the new world with more or less success.

A.1 These attempts are resolved using event part E-19.a (Minor country colonisation).

#### II.8.5.1 Minor establishments

**A Effects** Minor establishment exploit 1 resource per side (whatever the usual rules for this resource).

**B Military** A Minor establishment  $\ominus$  is a fort with 1LD of veteran militia (Latin, class III).

B.1 A Minor establishment  $\oplus$  is a fort with 2LD of veteran militia (Latin, class III).

B.2 The militia fights out of the fort if and only if enemies are landing in the province (it stays inside if the enemy comes by Land). It can only retreat in the fort and will never attempt retreat at the end of first day of battle.

B.3 Minor establishments never trigger native reaction or declaration of war by ROTW minors.

**C Destruction** Any country may attack a Minor establishment during any round.

C.1 Each establishment attacked during the turn costs 1 Stability (declaration of oversea war against an unspecified country).

C.2 A Minor establishment is immediately destroyed if a country controls it.

C.3 Minor establishment cannot be target of competition, and always win automatic competition.

#### II.8.5.2 Pirate haven

**A Effects** Pirate haven (arsenals) give a malus to fight *PIRATÆ*  $\text{IP}$  in the CTZ they are located.

**B Military** A Pirate haven  $\ominus$  is a fortress of level 1 with 1LD of conscript militia (Latin, class III).

B.1 A Pirate haven  $\oplus$  is a fortress of level 2 with 2LD of conscript militia (Latin, class III).

B.2 The militia fights out of the fortress if and only if enemies are landing in the province (it stays inside if the enemy comes by Land). It can only retreat in the fortress and will never attempt retreat at the end of first day of battle.

B.3 Pirate haven never trigger native reaction or declaration of war by ROTW minors.

**C Destruction** Any country may attack a Pirate haven at no cost during any round.

C.1 A Pirate haven is immediately destroyed if a country other than *PIRATÆ* controls it.

## II.9 The detailed game sequence

**A** Each game turn is composed of several phases, each of the phase is subdivided into several segments.

A.1 The Military phase is instead composed of several rounds repeating the same segments. The second segment of the phase is composed of one impulse per alliance, each alliance performing the same actions (movement and battle) in order during its impulse.

**B** Theoretically, each segment must be completed before moving to the next.

B.1 However, most of the diplomatic discussion and administrative stuff (incomes and expenses) can be played simultaneously by all the players and do not require strong synchronisation (it is common to have some players still discussing while some other are already planning their administrative actions).

B.2 Even the military phase can be de-synchronised when several distinct wars are ongoing, but this require a bit more adaptation to deal with the end-of-phase test.

### C Between period

C.1 Before the start of the game, between each period and after the end of the game, there is an *Inter-period* phase.

C.2 During this phase, VPs for the elapsed period (if any) are counted, as well as VPs for transfer and end of game when the case arise.

C.3 Next, objectives for the next period are chosen.

C.4 Before choosing objectives, players may discuss between them and make agreement. This is however not a Diplomatic phase, hence no change of game state may arise and agreements at this point are purely verbal.

**Design note:** The following chapters of the rulebook describe each of the phases and segments roughly in turn order.

**TODO:** Turn the names into links to the corresponding chapter/section.

### D Events (III)

D.1 Monarch survival (III.2)

D.2 Economical events (III.3)

D.3 Economic situation (III.4)

D.4 Piracy (III.5)

D.5 Historical/Political events (III.6)

D.6 Revolt events (III.7)

D.7 Diplomatic events (III.8)

### E Diplomacy (IV)

E.1 Declarations of Wars caused by events, and induced Reactions

E.2 Negotiations between Players

E.3 Announcements of Alliances

E.4 Other Announcements: Agreements, Trade Refusal,...

E.5 Declarations of War, and Reactions

E.6 Diplomacy on Minor Countries

E.7 Resolutions of Diplomatic Actions

E.8 Diplomatic Counter adjustment

E.9 Activation of ROTW minors, and reactions

### F Incomes (V), Administration (VI) and Logistic (VII)

F.1 Income computation (V.7)

F.2 Mandatory actions and bankruptcies (VI.3)

F.3 Choices of actions (VI.4)

F.4 Maintenance (VII.2)

F.5 Recruitment (VII.3)

F.6 Resolution of actions (VI.9)

F.7 Administration for minor countries (VI.10)

F.8 Removal and Placement of leaders (VII.4)

F.9 Automatic competitions (VI.8.2.2)

F.10 Exotic resources price variation, Trade centres and convoys (VI.12)

F.11 Technology adjustment (VI.8.1 (Technology))

### G Military (VIII) (for each military round)

G.1 Phase end test

G.2 Movement and battle, for each alliance:

1. Hierarchy adjustment

2. Choice of campaign

3. Movement & Discovery

4. Attrition

5. Battles

G.3 Sieges

G.4 Fights against Piracy and Natives

G.5 End of round

### H Redeployment (IX)

*H.1* Attacks by Natives (IX.2)  
*H.2* Attacks by Pirates & Privateers (IX.3)  
*H.3* *Revolt* and *Rebellion* (IX.4)  
*H.4* Land Military Looting (IX.5)  
*H.5* Building *Præsidios* (IX.6)  
*H.6* Redeployment of land troops (IX.7)  
*H.7* Return to Port (IX.8)  
*H.8* Gold repatriation (IX.9)  
**I Exchequer test and budget (X)**  
*I.1* Exceptional taxes (X.2)  
*I.2* Exchequer test (X.3)  
*I.3* Budget (X.4)

*I.4* Stability Improvement (X.5)  
**J Peaces (XI)**  
*J.1* Ransoms (XI.2)  
*J.2* Peace offers and discussions (XI.3)  
*J.3* Stability adjustment (XI.4)  
*J.4* Inflation (XI.5)  
*J.5* Test for crusade (XI.6)  
**K Inter-turns Phase (XII)**  
*K.1* Trade centres (XII.2)  
*K.2* Monarchs, Natives, Militias and Fortresses (XII.3)  
*K.3* VPs per turn (XIII.2)

# Events

## Chapter III

### III.1 The events phase

**A Overview.** During the event phase, all players simultaneously check for monarch survival. If the previous monarch is dead (either because he died at the die roll or he was scheduled to die), a new one is rolled for. Each player then makes a roll for one economical event. A die is rolled for the economical situation and then 4 (sometimes 5) political events are rolled.

*A.1* Economical events are always rolled on the same table while political events are rolled to the table corresponding to the current period.

*A.2* Political events or other circumstances can call for a *Revolt* event (either anywhere or on some specific country table) as well to create some diplomatic disarray among minor countries.

#### B Sequence.

- B.1* Monarch survival (III.2)
- B.2* Economical events (III.3)
- B.3* Economic situation (III.4)
- B.4* Piracy (III.5)
- B.5* Historical/Political events (III.6)
- B.6* Revolt events (III.7)
- B.7* Diplomatic events (III.8)

### III.2 Monarch survival

**A** Monarchs that are scheduled to die at the current turn die. Their players roll for a new monarch.

**B** Players whose monarchs are not scheduled to die at the current turn roll for monarch survival.

*B.1* Some historical monarch are exempted from survival rolls during the first few turns of their reign. Check the specific rules of each country for details. If such a monarch is currently ruling a country, the corresponding player does not roll for monarch survival.

**C** Some events give a modifier for survival tests. These modifiers are cumulative.

*C.1* Countries with negative stability have a **+1** modifier for survival tests.

*C.2* Monarch with *fragile health* have a **+1** modifier for survival tests.

*C.3* Turkish sultans with less than 7 in MIL also have a **+1** modifier for survival tests.

**D** The result of the survival test can be found in the “survival” column of the table table III.1 (Reign).

*D.1* If the net result is 1, the monarch will rule 1 more turn than initially scheduled. This can only happen twice for each monarch (more “1” results are ignored). Mark this on the monarch sheet.

*D.2* If the net result is 10 or more, the monarch dies immediately. The player has to roll for a new monarch.

**E** For TUR only, if the result is 9 or more, a *Revolt* in Turkey is rolled as per section III.7 (Revolt events).

*E.1* In addition, for the Turkish player, if the result is 11 or more there is an automatic dynastic crisis when rolling for the new sultan.

1d10	Survival roll		Succession roll		reign length	Survival roll	Succession roll
	Surv.	TUR	Succ.	age			
≤1	+1T		DC		3T	+1 if <i>Fragile Health</i>	<i>Fragile Health</i> Reroll for age
2			—		4T	+2 turn 1 after a DC	
3			—		5T	+1 turn 2 after a DC	DC <i>Dynastic crisis</i> , stats/2 at turn 1,
4			—		6T	+1 if Stability <0	-2 Stability, reroll
5		<i>Pasha</i>	—		7T	<b>Age penalty</b>	— Use same line for age
6		<i>Pasha</i>	—		8T	-1 teenage	
7		<i>Pasha</i>	—		9T	-2 child } (not a leader)	
8			—	teen	10T	-3 baby }	
9		R	—	child	11T	-2 <b>VEN</b> for reign length, no DC	
10	dead	R				-2 <b>POL</b> for DC/reign length	
≥11	dead	R+DC	<i>Fragile health</i>	baby	12T	+1 <b>TUR</b> for Survival/revolts if MIL <7	

Table III.1: Reign

### III.2.1 New monarchs

**A** Players whose monarch died roll for a new monarch.

**B Reign length** First, a die is rolled in table III.1 (Reign) to check for dynastic crisis as well as reign length.

*B.1* Some countries have die roll modifier for this die. Check the specific rules of each country.

**C Dynastic Crisis** If the result is 1 or less, a dynastic crisis occurs.

*C.1* The country immediately loses 2 Stability and the values of the new monarch will be halved at the first turn (minimum value remains 3).

*C.2* In addition, if the country is at war or had dynastic ties with another major country, a succession war may occur as per section XIV.14.5 (The Wars of Succession).

*C.3* A new die as to be rolled to determine reign length. Neither dynastic crisis nor fragile health may occur this second time.

**D Fragile health** If the result is 10, the new monarch will have *fragile health*.

*D.1* A monarch suffering of *fragile health* has a **+1** modifier for all its survival tests.

*D.2* A new die has to be rolled to determine reign length. Neither dynastic crisis nor fragile health may occur this second time.

**E** If the result is neither 1 nor 10, or if this is the second roll (after a 1 or 10), read the 'age' and 'reign length' columns of the table.

**F** The scheduled reign duration of the new monarch is found in the "reign length" column of the table.

*F.1* On a result of 8 or more, the new monarch is young and will have limited capacities until he reaches adult age.

*F.2* On a result of 8, the monarch is only a teenager. He will have a **-1** to all characteristics on his first turn of reign.

*F.3* On a result of 9, the new monarch is still a child. He cannot be used as a general and he will have a malus of **-2** to all characteristic on his first turn of reign. He will become a teenager on the second turn (**-1** to all characteristics) and an adult on the third.

*F.4* On a result of 10, the new monarch is just a newborn. On its first turn of reign, he will have **-3** to all characteristics and cannot be used as a general. He will become a child on the second turn of reign, a teenager on the third and an adult on the fourth.

*F.5* These maluses can never drop the characteristic below 3.

**G** Note: the extreme results (1 or 10) for duration of the monarch may only occur as the second die roll in case of a DC or fragile health.

↓1d10	3	4	5	6	7	Base col for each MAJ
1	3	3	3	3	3	TUR 4
2	3	3	3	3	4	POL 5
3	3	3	3	4	5	RUS 5 (before reign of <b>Peter the Great</b> )
4	3	4	4	5	6	FRA 5 (before III-11)
5	4	4	5	5	6	HIS 6+endogamy mod.
6	4	5	5	6	7	Others 6
7	4	5	6	6	7	
8	5	6	7	7	8	+1 col. if former>base
9	6	7	8	8	8	-1 col. if former<base
10	7	8	9	9	9	

Table III.2: Successor's Values

**H Characteristics** For each of the three characteristics, roll for a new value in table table III.2 (Successor's Values).

*H.1* The base column for each country is indicated on the side of the table.

*H.2* If the deceased monarch had a characteristic higher than the base column of his country, roll in the column immediately to the right of the base column for his successor (for this characteristic).

*H.3* If the deceased monarch had a characteristic lower than the base column of his country, roll in the column immediately to the left of the base column for his successor (for this characteristic).

*H.4* If a dynastic crisis occurs this turn, the values of the new monarchs are always rolled on the base column of the country.

**I Military average** Unless specified for some named monarchs, the monarch can also be used as a general (or admiral for VEN) and lead troops in battle. However, the exact values of monarchs as military leaders are not known precisely before they actually fight a battle. Instead, only a "military average" is known which gives a global indication whether the monarch will be a good or bad leader, but surprises may arise.

*I.1* Once the characteristic of a monarch are known, roll 1d10 and cross-reference the result with the MIL of the monarch in table III.3 (Monarchs' Military Skills) to find the military average. Report this value on the monarch sheet.

*I.2* When needed, and only when needed, the precise values for *manoeuvre*, *shock* and *fire* are determined. This usually happens at the first battle involving the monarch, except for *manoeuvre* which may be needed earlier due to attrition.

*I.3* For each of the value needed, roll a die on the bottom of table III.3 (Monarchs' Military Skills) to obtain a modifier between **-2** and **+2** and add this modifier to the military average to get the exact value.

*I.4* These final values can never be less than 0 or more than 6.

**J Siege** Only monarchs whose military average comport a \* may have a siege value. All other have a siege value of 0.

*J.1* If a monarch with a \* is implied in a siege, consider his base value for siege as **1**, modified as the other characteristics by a roll on table III.3 (Monarchs' Military Skills) (minimum 0).

**Example: New monarch.—** It is the beginning of turn 3. The Doge, **Barbarigo** is scheduled to die now, so VEN has to roll for another one. The values of **Barbarigo** are 8/5/6 (for ADM/DIP/MIL). Since there is no specific monarch in the rules for the succession of **Barbarigo**, the regular procedure for new monarchs is used.

Firstly, VEN rolls for reign length. He rolls a 7 which is modified by **-2** per specific rules for VEN (see the modifier on the right of table III.1 (Reign)) for a result of 5, hence Loredano will last for 7 turns. He becomes Doge on turn 3 and is thus scheduled to die at the beginning of turn 10. (historically, he will fail a survival roll on turn 7).

Then VEN rolls for the characteristics. Looking on the right of table III.2 (Successor's Values), there is no special case for VEN, so the base value is 6. Since the ADM of **Barbarigo** is 8, larger than the base value, VEN gets a 1 column shift bonus for this characteristic. He rolls a 4, cross-referencing it in column 7 gives a new ADM of 6. Then, VEN rolls for DIP and gets a 6, cross-referencing it in column 5 (**-1** column for the less than base value of the predecessor), he gets 5. Lastly, he rolls a 8 for MIL which, in column 6 (predecessor has the same as base value), gives 7.

So, Loredano is 6/5/7, rather a good monarch.

**Remark:** The die rolls for determining the values of the Doge should all be modified by **+1** as per specific Venetian rules. This has been omitted here to simplify the example. Consider that the actual rolls were 3, 5 and 7 to obtain the same results.

Then, VEN rolls for military average and gets a 9! Cross-referencing it with the MIL of 7 in table III.3 (Monarchs' Military Skills) gives a military average of 3. The new Doge could even be a military genius.

Later, on turn 5, HIS, FRA and SANCTA SEDES ally themselves in the League of Cambrai and attack VEN! The player decides to send his Doge as an admiral to try and repulse the enemy fleet. When the Venetian galleys go at sea, VEN needs to know the manoeuvre of his Doge. He rolls a die and gets 6, this means no modification from the military average of 3. A bit later, the Venetian fleet engage the Spanish and the fire and shock of the Doge must be known. VEN rolls two dice, getting respectively 2 and 10 for modifiers of **-1** and **+2** from the military average.

So, as an admiral, the Doge is a leader 325. Quite good news for a galleys admiral in this age of boarding.

1d10 MIL	1	2	3	4	5	6	7	8	9	10
3	0	0	0	0	0	0	0	1	1	1
4	0	0	0	0	0	1	1	1	1	2
5	0	0	1	1	1	1	1	1	2	3
6	0	1	1	1	1	1	2	2	3	3
7	0	1	1	1	1	2	2	2	3	3
8	1	1	1	1	2	2	3	3	4	4*
9	1	1	1	1	2	2	3	3*	4*	5

Siege value: 0, unless \* is present  $\Rightarrow 1 + \text{mod.}$

Modifier for each value						Roll 1d10+?
1d10	1	2-3	4-7	8-9	10	Final value is
Modifier	-2	-1		+1	+2	min 0, max 6

?=POL +1 in Manoeuvre/Shock ; SUE +1 in Fire/Shock

Table III.3: Monarchs' Military Skills

**K Excellent Ministers** Some events can give *Excellent Ministers* that enhance the characteristics of the monarch for some time.

**K.1** Unless specified otherwise, the value of the Minister may be used instead of the value of the Monarch when rolling for a new Monarch.

**K.2** Unless specified otherwise, a Minister retires after the "new Monarch" segment of the event phase (during the turn he is scheduled to leave office).

### III.3 Economical events

**A** Each player rolls for an economical event during the "Economical events" segment of the Event phase.

**B** To roll for an economical event, each player rolls two dice and look for the result on table XV.1 (Random economical events).

**B.1** The first die gives a column. The second die gives a line. By crossing the column and line, the number of an economical event is found.

**B.2** The effect of the event applies immediately. Check chapter XV (Economical events) for the description.

**C** Unless explicitly specified in the description, each economical event only affects the player rolling it.

**D** In case of disagreement, economical events are rolled in decreasing order of initiative and resolved as soon as rolled.

### III.4 Economic situation

**TODO:** TBD Moves to the end of the Diplomatic phase if Economical Event Pirates is removed.

**A Economic Situation** A die is rolled for both the global economic situation and raise of piracy.

**A.1** Combined with the event E-12 (Pirates), it is now possible to place *Piracy* on the map.

**A.2** Place the *Economic situation* marker on the track on the ROTW map to remember the result of the roll. It will be used during the Administrative phase to handle the variation of prices of exotic resources. See section VI.12.1 (Price of exotic resources).

#### B Inflation

**B.1** If "Inflation" is obtained (1 or 10), increase the level of inflation by 1, that is move the marker one box to the right (without exceeding the maximum level). This is the same effect as event E-32 (Inflation) except that it can happen the same turn as another event E-32 (Inflation) or event E-45 (Deflation).

**Design note:** The die roll for economic situation must be made during the event phase as it has an influence on piracy (see below). However, variation of prices must be made after the diplomatic phase as speculation has an effect on prices and is declared during diplomacy. Thus, the result of this die must be kept and reused later in the turn. In practice, speculation is rare and the important point is that prices variation occurs once per turn.

### III.5 Piracy

**TODO:** TBD Moves to the end of the Diplomatic phase if Economical Event Pirates is removed.

**TODO:** TBD Make Piracy appear more frequently if Economical Event Pirates is removed. For example, for line 3 and 6, keep the Piracy whether there is a named Pirate or not.

#### III.5.1 Raise of Piracy

**A** The roll for economic situation, read in table III.4 (Random Piracy and Economy Roll), may cause the apparition of some *Pirate* (PIRATÆ IP). The result is partly modified if there is a named pirate in play at this turn, see section III.5.2 (Named Pirates).

**A.1** A *Pirate* IP⊖ or *Pirate* IP⊕ is placed in the target STZ according to the table, unless a result of 1 or 10 was obtained, in which case the procedure below is used.

1	Piracy in America and Inflation	Crisis
2	STZ <b>Golfe de Guinée</b>	
3	STZ <b>Caraïbes</b> ⊕ or Piracy in America if leader	
4	STZ <b>Amérique</b>	Normal
5	STZ <b>Mer de Recife</b>	
6	STZ <b>Côte de Patagonie &amp; Cap des tempêtes</b> or Piracy everywhere if leader	
7	STZ <b>Mer d'Arabie</b>	
8	STZ <b>Mer de Chine</b> ⊕	Boom
9	STZ <b>Océan Indien</b> ⊕	
10	Piracy in Asia and Inflation	

Table III.4: Random Piracy and Economy Roll

**B** If the economical situation roll was 1 or 10 (or 3 or 6 and a named PIRATÆ ⚔ is alive) or if event E-12 (Pirates) was obtained this turn, several **Pirate** may appear. Determine the target of piracy for the turn.

B.1 If there are two or more causes for piracy, then the target is "Everywhere".

B.2 If the only cause for piracy is the economic situation, the target is indicated in the table.

B.3 If the only cause for piracy is a single economical event, then the target is rolled at random: 1–5: America ; 6–10: Asia.

**C** For each STZ in the target, in the order indicated below (this is relevant for named pirates), roll on die. If the die is greater or equal than the appearance threshold of the STZ, place a **Pirate**⊖ there.

C.1 In a STZ with several **Pirate**⊕, or with a named pirate, check whether they stay at sea or try and loot an establishment.

**D Targets of piracy** Depending on the target, roll for the STZ indicated, in order.

D.1 Everywhere: STZ **Caraïbes**, STZ **Amérique**, STZ **Océan Indien**, STZ **Mer d'Arabie**, STZ **Golfe de Guinée**, STZ **Mer de Recife**, STZ **Côte du Pérou**, STZ **Mer de Chine**, STZ **Côte de Patagonie**, STZ **Cap des tempêtes**, STZ **Mer des Canaries**.

D.2 America: STZ **Caraïbes**, STZ **Amérique**, STZ **Golfe de Guinée**, STZ **Mer de Recife**, STZ **Côte de Patagonie**, STZ **Cap des tempêtes**, STZ **Mer des Canaries**.

D.3 Asia: STZ **Océan Indien**, STZ **Mer d'Arabie**, STZ **Côte du Pérou**, STZ **Mer de Chine**, STZ **Mer des Canaries**.

D.4 Yes, STZ **Mer des Canaries** is both for piracy in America and in Asia. Yes STZ **Golfe de Guinée** and STZ **Cap des tempêtes** are only for America. Yes, STZ **Côte du Pérou** is for Asia.

**E Appearance threshold** The appearance threshold for **Pirate** for each ROTW STZ is written on the right-hand-side of the STZ symbol.

E.1 Some STZ have several thresholds. Use the largest one if only one country has COL/TP bordering the STZ; use the second number if two countries have COL/TP bordering the STZ and use the smallest number if three or more countries have COL/TP bordering the STZ.

E.2 Remember that the STZ contains the seazone where the symbol is located as well as all adjacent seazones. Thus, an establishment borders the STZ if it is coastal and touch any of these zones.

**F Pirate Placement** When placing Piracy counters on the map:

F.1 No **Pirate** counter may be placed if there is no commercial fleet in the target STZ.

F.2 Two **Pirate**⊖ are immediately exchanged for a single **Pirate**⊕.

F.3 There are no limits to the number of **P** counters that can coexist in a single STZ.

### III.5.2 Named Pirates

**A** Some famous pirates appear as named PIRATÆ ⚔ and are treated like other named leaders.

A.1 If a named pirate is alive and not yet on the map, he will take command of the first **Pirate** that appears in his area of action (**AMERICA**, **ASIA**, or ROTW).

A.2 Named pirates may never be placed in Europe, even if a **Pirate** can be placed in Europe due to various events.

A.3 If more than one named pirate is in play, place them in decreasing order of Rank. It is possible that one or more named pirate are not placed at a given turn. It is possible that a pirate admiral is placed in the same STZ that another (existing from previous turn).

**B** **Pirate** with named admiral always test to check if they loot a TP or COL, with a modifier to the die roll equal to the *shock* of the admiral.

**C** At the end of a turn, if there is a **Pirate**⊖ with a named admiral, it becomes a **Pirate**⊕. **Pirate**⊕, even with admiral, remain unchanged.

**D** As any privateer, named pirates use their *manoeuvre* to protect the **Pirate** they are stacked with and check for survival if their **Pirate** is destroyed.

### III.5.3 Sea or land?

**A** If there are no named pirate and no more than one **Pirate**⊕ in a given STZ, then all **Pirate** in this STZ will attack TF.

A.1 If there is a named pirate, check if he stays at sea or tries to loot an establishment.

A.2 Whenever a second **Pirate**⊕ is placed in a STZ, immediately check if he stays at sea or tries to loot an establishment.

**B** Each **Pirate** that may loot is tested by one die, modified by +1 for each (other) **Pirate**⊖ and +2 for each (other) **Pirate**⊕ present in the STZ.

B.1 Named pirates also add their *shock* value to this test.

B.2 A result of 10 or more means a looting, otherwise the pirate will attack the commercial fleets.

B.3 The target of the looting is chosen at random among all TP or COL bordering the STZ. Move the counter to the target (it is considered to disembark at the beginning of the first round of the military phase).

## III.6 Historical/Political events

**A** Political events are grouped by period. To each period corresponds both a set of events and a table to roll for these. Events are rolled using two consecutive die rolls. Each result is either the number of an event or a 'R' followed by the number of an event.

**B** Each turn, 4 political events are rolled. It may happen that a fifth event is required. No more than 5 political events can happen on the same turn.

**C** To roll for an event, roll two dices.

**D** If the first result is 10, the second die indicates what to do according to the "10" column in the table.

D.1 A result of "+1" (event) indicates that a fifth event will be rolled this turn.

D.2 A period number (either the previous or next one) indicates that this event will be rolled on the table of the given period instead of the current one.

**E** If the second result is 10, the last line of the table indicates what to do.

E.1 Usually, this event will have to be redrawn in either the next or previous period. A third roll might be needed to decide between next and previous period.

**F** In no case can more than 5 events occur in the same turn. If the "+1" result is obtained more than once, this only means that the corresponding event will be rolled on another period table, as indicated.

**G** In no case events of a period other than the current, next or previous one can occur.

G.1 In such cases (double-next or double-previous), restart from the current period table.

**H** If none of the die roll is '10', proceed as follows:

*H.1* The first die gives a column in the table.

*H.2* The second die determines the precise event.

*H.3* Results of the table are counted from the top of the column.

*H.4* Already marked off results are skipped.

*H.5* If the bottom of the column is reached, then the count resumes in the next column (wrap around to the first column if the last column with events of the table was already reached).

*H.6* When the count reaches the second die, the result reached by the count will be applied.

**Design note:** This counting down is slightly more complicated than a simple cross-referencing of two numbers (as done for the economical events). It has, however, interesting properties with respect to the probabilities of each event occurring.

The first columns of each event table are usually more likely to be rolled than the last ones, hence events there are more likely to occur. However, marking off an event has the effect of "reducing" the size of its column, thus events at the top of the following column become more probable.

Hence, in a given period, events of the first columns are likely to occur early in the period while events in the last columns are unlikely to occur early but become more and more likely to occur as time goes.

**I** Once the result is found, if the corresponding event can be applied, mark the result off in the table as it must be skipped in future counts.

*I.1* Some events cannot occur if certain conditions are not met, in which case an event must be re-rolled with or without marking off the corresponding result in the table. Check the precise event description for details.

*I.2* Most events can only happen a given number of time (usually, only once). If an event is drawn after already occurring its maximum number of time, mark off the result in the table but play R/D instead.

*I.3* Some events share the same number in the events list for the period, such as event I-11 (1) (The End of the Golden Horde) and event I-11 (2) (Russian Annexation of Pskov and Ryazan). If this number is obtained in the table, apply these events in order. It is possible that all the events with the same number occur in the same turn if this number is rolled several time in the table.

**J Revolts** If the result if 'R' followed by a number, a R/D (*Revolt*/Diplomacy event) may occur.

*J.1* If no R/D occurred this turn (either by another 'R' result or because a specific event description told to apply a R/D event), then a *Revolt*/Diplomacy event (R/D) happens as per section III.7 (Revolt events) and section III.8 (Diplomatic events). Mark off the box.

*J.2* If one or more revolts already occurred this turn, then the event given by the number may occur. Consider that the box only contains the number and proceed as described above.

*J.3* Events creating revolts or rebellions without explicitly applying a R/D event (eg event I-7 (2) (Revolt of the Comuneros)) are not considered as a R/D and thus do not prevent further 'R' result to be treated as a R/D rather than a number.

**K** If the result is a number, the corresponding event may occur.

*K.1* Check the event description for effects and applicability.

**Example: Rolling for events.—** *It is the first turn of the first period. Political events are thus rolled on chapter XVII (Political Events of Period I). The first die roll is 9. The second is 6. In the column 9 of the event table for period I, we look at the sixth non marked off number. It is "R6". Since no revolt has been rolled this turn, the first event will be R/D and this box of the table is marked off.*

*Then, for the second event, the rolls are 10 and 1. This indicates that there will be 5 events this turn.*

*Then, we reroll for the second event. The rolls are 7 and 9. In the column "7-8", the ninth non marked number is 3. Since I-3 (1) (Wars in Italy (Napoli)) can happen (as explained in the event description), the box is marked off and the event will happen.*

*Then, we roll for the third event. The die are 3 and 4. The fourth number in column "1-4" is 1. However, I-1 (Treaty of Tordesillas) cannot happen at the first turn (America has not been discovered). Hence, as per event description, the event is not marked off and the dice are rerolled.*

*Rolling again for third event, we obtain 10 and 2. Since there are already 5 events scheduled for this turn, there cannot be 6. Hence, according to what is written in the last column, the event has to be rolled in period II.*

*Rolling for third event in period II, the dice are 10 and 5. It should be an event in period III. However, in period I, no event of period III may happen. Hence, we go back to period I instead. . .*

*Rolling again for third event, the dice are 8 and 2. The second non marked box in column "7-8" is "R11". Since there already was a revolt this turn (as first event), the 11 is applied. The box is marked off and I-11 (1) (The End of the Golden Horde) will happen.*

*Then, we roll for fourth event. The dice are 7 and 5. In column "7-8", we looked for the fifth non marked off box. Since the second box ("R11") has been marked off at the third event, it is skipped. The fifth non marked box is in the sixth line, "R4". Since there already was a revolt this turn, I-4 (1) (Declaration of Hungarian Freedom) is applied (and the box is marked off).*

*Lastly, we roll for the fifth event. The dice are 5 and 10, indicating that we must roll on the next period.*

*We roll for fifth event on period II. The dice are 8 and 6. Looking for the sixth non marked box in column 8, the result is 7. The box is marked off and II-7 (War between Poland and Turkey) will happen.*

*So, to sum up, there will be 5 events this turn (instead of 4) and these will be:*

*R/D, event I-3 (1) (Wars in Italy (Napoli)), event I-11 (1) (The End of the Golden Horde), event I-4 (1) (Declaration of Hungarian Freedom), event II-7 (War between Poland and Turkey).*

*The revolt is resolved as explained below. The other events are resolved as per their specific description.*

**Playing tip:** One player, usually one knowing the game quite well, should be designed to take care of political events. This "events-keeper" ask other players to roll the dice and take care of counting the boxes and marking off the results as needed, making note of which events do occur each turn.

It is easier to start by rolling all four events (with the event-keeper quickly checking that the event can occur). Then, once they are known, the event-keeper should read (aloud) the events descriptions for all to hear.

Since the precise order in which the events are resolved is usually not an issue, the events-keeper can read them in an order different from the one they were rolled. Especially, it is advised to first announce all the events names and then read the descriptions. It is also often preferable to start reading small events with few specific rules and finish with the big stuff.

Then while players start to discuss the new diplomatic situation created by the events, the events-keeper can ask another player to roll for the revolts and diplomatic events. Due to their many switching between tables, revolts are best rolled by one other player. Diplomatic events, on the other hand, require a lot of reading on the same table and are best rolled by the event-keeper with another player near the diplomatic track to implement the results.

### III.7 Revolt events

**A** *Revolt* may occur either when a R/D is rolled in the event table (either a result 'R' in the table, an event already occurred its maximum number of times or specific event condition) or because a specific event needs to roll for a *Revolt* in a given country (e.g. the survival test for TUR may require to roll for a *Revolt* in TURCIA).

**B** If the *Revolt* was rolled as an event (R/D), a Diplomacy event also happens as per section III.8 (Diplomatic events).

**C** For each *Revolt*, dies are rolled in order to determine:

*C.1* The country where the *Revolt* occurs (unless already specified elsewhere).

*C.2* The province where the *Revolt* happens.

*C.3* The strength of the *Revolt*.

**D** Roll 2d10 and read the revolted country in the column of the current period on table XVI.3 (Revolt table: target area and strength). The target country may be a MIN or other abstract entity in which case a pseudo-stability is provided in brackets.

*D.1* Decrease this pseudo-stability of minors in the table by -1 if:

- This is HOL\* and HIS perceived the taxes at the preceding turn;
- This is POR\* at the turn of event III-6 (Portuguese Disaster in Africa) or after.

*D.2* Even if the *Revolt* was caused by an event from another period, always use the column of the current period for determining the target country or area.

**E** Roll 1d10+the Stability of the target (or modified pseudo-stability) on the target country's table and read the result in the column corresponding to the current period (for some countries, there is only one column to use for all periods).

*E.1* Even if the *Revolt* was caused by an event from another period, always use the column of the current period for determining the revolted province.

*E.2 Exception:* For *Revolt* is FRA cause by event III-11 (Wars of Religion in France), follow the instruction on top of the table.

**F Groups** Often, the result will be a group of provinces; a further roll is required to choose the resulting province.

*F.1* In some groups, the number of targets may vary: roll with equal probability between all possible choices.

*F.2* Some groups bear the same name but do not have the same content. Use the definitions attached to the table.

**G** The revolt is against the owner of the province. This may be a different country than the one whose table was used (e.g. a revolt rolled on the table for FRA may well occur in HIS in which case the revolt is against HIS for all purposes).

*G.1* Revolts inside minors countries are automatically suppressed if the minor stays inactive for one full turn. Otherwise, they do expand as usual and hamper supply or income as well as Stability of the diplomatic patron.

**H** Lastly, roll 2d10 in the last column of table XVI.3 (Revolt table: target area and strength) to find the strength of the revolt.

*H.1* There may be any of the following: *Revolt* counter (either ⊖ or ⊕), troops (LD or A⊖), ✕ and sometimes seizing the ℱ (simply noted "ℱ" in the Table).

*H.2* If there are troops, they are considered to have the same characteristics (size, artillery, . . .) as the country in which the revolt occurs. Their technology is the technology this country had at the beginning of the turn. They may not move, are supplied within the revolted province and can only retreat in the ℱ after battle (they are thus destroyed if forced to retreat and they do not hold the ℱ). They may cause a major battle with the usual loss of Stability. They do besiege the ℱ, even if there are less LD than the level of the ℱ (exception to the normal siege rules).

*H.3* ✕ sometimes leads the revolt, sometimes the troops, sometimes there are two leaders, one for each. If the ✕ is written after the *Revolt*, he leads it, if he's after the troops, he leads them.

*H.4* If the ℱ is seized, the LD is inside it. The ✕ leads the *Revolt* and retreat inside the ℱ once the revolt is crushed (if the rebels still hold the ℱ).

*H.5* A CTZ or STZ may be rolled as a revolted province. Roll for the strength as usual but put in a *Pirate*⊖ or *Pirate*⊕ instead of a *Revolt*. Ignore the troops or capture of the city if any and use a ± instead of a ✕. The *Pirate* attacks all TF in the CTZ/STZ.

### III.7.1 Revolts and Rebellions

**A** Revolts may occurs both from R/D events or during civil wars events. In the second case, they are called Rebellions.

*A.1* Both of these case may put *Revolt* (or *Rebellion*) counters as well as A or LD in play.

*A.2* Unless specified otherwise, use counters labelled "Rebellion" when they come from a political event and counters labelled "Revolt" in all other cases (R/D, TUR survival roll, . . .)

**B** "Revolt" and "Rebellion" counters are not considered friendly to one another. That is, if a R/D occurs during a civil war, it is considered to be a peasants revolting against any and all factions at war.

*B.1* As a general rule, "Revolt" counters (either troops or *Revolt*) are friendly to nobody (including other "Revolt" counters from another province) while all "Rebellion" counters within the same country or entity are friendly one to another and they may be friendly to other powers.

**C** Apart from this, *Revolt* and *Rebellion* work in the same way. Especially for rolling dice to determine where it occurs and at which strength.

*C.1* Unless otherwise specified, rules applying to *Revolt* also apply to *Rebellion*.

## III.8 Diplomatic events

**Design note:** Description and meaning of diplomatic status of minors can be found in chapter IV (Diplomacy).

**A** Every time a R/D occurs, both a *Revolt* and a Diplomacy event occur.

*A.1* Diplomacy events do not occur when revolts are rolled as per a specific event description or special rule. Only the R/D event (result 'R' in the table) triggers a Diplomacy event.

*A.2* In some conditions an event cannot be played (e.g. because it was already played) and is resolved as a R/D result instead. Hence there may be several Diplomacy events in a given turn.

**B** If Diplomacy event occurs, a first die is rolled to know which religion suffers from troubles.

*B.1* Even if several Diplomacy events occur, only one religion will suffer from troubles.

*B.2* The troubled religion is rolled in table XVI.1 (Troubled Religion table).

*B.3* On some results, an additional check for \$D (Uprising of a conquered minor province) of this section will be made.

**C** Then, for each Diplomacy event, roll for a group of minors to test in table XVI.2 (Diplomatic table).

*C.1* For each minor country in the group, roll 2d10 (+3 if the minor is of the troubled religion).

*C.2* If the result is higher than the fidelity of the minor, the diplomatic status of the minor is lowered by one for each extra point (the marker goes one box to the left toward Neutral).

*C.3* For ROTW minors, if the roll is 2 or more than the fidelity, then all FR are broken to NR while AT go to FR; if the result is 5 or more than the fidelity, all AT and FR are broken to NR.

*C.4* If the fidelity of the minor is higher than the result, nothing happens.

*C.5* Countries that either do not exist (yet or any more) or are still/already a major country are not tested even if they do appear in the table.

**D Uprising of a conquered minor province** If a result of 1, 4 or 7 was obtained for the first die (troubled religion), check for the autonomous uprising of a province of a Minor country that would be owned by another power.

*D.1* The group or groups affected is obtained by rolling 1d10 in table XVI.2 (Diplomatic table). Then, in each group, in the order written, find the first (still existing) minor country that does not own all its National territory or that has a *Præsidio* in its territory. A group is defined by a name in bold (2 groups are sometimes obtained on a given result leading to 2 possible uprisings).

*D.2* ROTW countries are never subject of uprising.

*D.3* This minor immediately takes back the ownership of one of these territories, or destroy a *Præsidio* (chosen at random) and a state of war is considered to exist between this Minor and the previous owner of the province (or a state of overseas war if a *Præsidio* was destroyed this way). This is not a declaration of wars *per se* (more like a revolt) so there is no proper Call to allies (only as if continuing an existing war, the diplomatic patron of a minor involved can choose to enter the war (with a CB) or stay out (with no penalty)) and there can be no generalisation of war this turn if this is an overseas war.

*D.4* The MAJ victim of the uprising may sign an immediate white peace with the uprising minor, forfeiting the province or *Præsidio*.

**E Minor declares a war** If a result of 10 was obtained for the first die, a random minor declares war to a random neighbour.

*E.1* The minor is chosen by rolling 1d10 for a group of countries in the table above and then randomly choosing one existing minor of this group. For this purpose, consider each result as a single group even if there are two names in bold.

*E.2* The chosen minor declares war to one of its neighbours, chosen randomly.

*E.3* Usual calls for allies happen during Diplomacy phase, for all countries involved in this war.

*E.4* If the minor is a ROTW country, its neighbours are other minors countries owning areas adjacent to its own areas, as well as countries having a TP or COL in its areas or adjacent ones.

*E.5* If the minor is a ROTW country, the war is an overseas war.

*E.6* In case of PERSIA/ORMUS, it is considered as a single country with neighbours both in Europa and in the ROTW but will only declare war (regular or overseas) to one of its neighbours.

# Diplomacy

## Chapter IV

### IV.1 Diplomatic phase

**A Overview.** This phase is played simultaneously. Players may negotiate to establish agreements between them (official alliances or informal agreements). During this phase also, players may declare wars (between them or against minor countries). They end this phase by making diplomatic actions with minor countries to control them (or to lower the level of control of other players). These levels of control are appreciated to various degree (Royal Marriage, Subsidies, Military Alliance... etc.).

#### B Sequence.

*B.1* Declarations of Wars caused by events, and induced Reactions

*B.2* Negotiations between Players

*B.3* Announcements of Alliances

*B.4* Other Announcements: Agreements, Trade Refusal,...

*B.5* Declarations of War, and Reactions

*B.6* Diplomacy on Minor Countries

*B.7* Resolutions of Diplomatic Actions

*B.8* Diplomatic Counter adjustment

*B.9* Activation of ROTW minors, and reactions

### IV.2 Agreements between Major Powers

#### IV.2.1 Negotiations

##### IV.2.1.1 Negotiations between Players

**A** Players can negotiate freely between them to get into various kinds of agreements, as long as they respect the letter and the spirit of the rules. Players' diplomatic relationships may however be "officialized" in alliances, or may be broken.

**B** Players negotiate between them, freely. It is advised that the time of negotiations be limited to at most 10 minutes on an average (5 is counselled, but not always possible or realistic).

##### IV.2.1.2 Outcome of Agreements

**A** When negotiations are closed, players announce their agreements: informal agreement, or formal agreements: alliance (by specifying which), or some possible trade refusal.

*A.1* This is done during the Diplomatic Phase on the fourth segment (the Announcement Segment), after Declarations of Wars caused by events, but before the declarations of War and any Diplomacy on minor countries.

*A.2* Formal Agreements should be decided before the Announcement Segment. Then they are made made loudly in the order of the initiative. As the Agreements need not be written beforehand, a player could change his mind just when doing announcements: this is allowed but no negotiation can take place at this time.

*A.3* The simple public announcement of the agreement suffices to validate it. This public agreement bears treaty value.

A.4 A formal agreement can be written down during the phase of negotiations. If this is the case and one player refuses to make the announcements, his power loses 1 Stability.

A.5 Formal agreements can be kept secret: they have value only if written down and signed by all allies. They can be used later, but with reduced value.

**B** There exist several types of Announcements: Alliances of different kinds, each corresponding to a precise agreement, and Trade Refusal. The type of alliance must always be publicly announced to all other players, or kept secret and written down.

#### IV.2.1.3 Alliances

**A** Only players possessing a determined alliance can co-operate in the various domains considered hereafter. Alliances are of 4 different levels:

A.1 Dynastic Ties

A.2 Loan Treaty

A.3 Defensive Alliance

A.4 Offensive Alliance

**B Generalities** Alliances are concluded between two or more players. A player can conclude as many different alliances as he desires with the same player, and/or with different players, with the restrictions given for each type of alliance as described hereafter.

B.1 A Formal Agreement (except Loan Treaty) is valid for this turn, the two following ones, and the very beginning of the next turn, until the beginning of the segment of Announcements (at which point the Formal Agreement that ends could be signed again).

B.2 Secret agreements must specify the type of alliance, the powers involved, the first turn of the alliance, or would be void. They last 3 turns (like announced alliances). Dynastic Ties are always public and can not be kept secret (secret Dynastic Ties are void).

**C Dynastic Ties** A pair of players may conclude a marriage between the ruling families of their realms, so as to create family ties. They can no longer declare war on each other without Casus Belli (CB). This alliance lasts for the whole duration of the next 2 consecutive turns, except when specific events occurs, forcing its cancellation.

C.1 To conclude this marriage, one of the two players has to offer a dowry to the other. The dowry has to be 100 ₪ (minimum, more can be offered up to the gross income from previous turn of the Power), or consists of one single province, COL or TP, immediately ceded to the other, receiving, party upon conclusion of the agreement, at the end of the Diplomatic Phase. Note that the province is still owned by its former controller for the following segment of Declaration of Wars, the transfer would be latter, at the end of the phase.

C.2 Money transferred is recorded on line **A3** (Gifts and loans between players) of *ERS*.

C.3 The ceded province, Colony or Trading Post must be owned and controlled by the ceding player, i.e. it is not possible to cede any territory in revolt or occupied by another player at the time of the dynastic treaty.

C.4 The two players are authorised in addition to exchange an extra province, COL or TP. This exchange may be made in addition to the dowry (e.g., exchange of one province + dowry of a province/or 100+ ₪), but it is not compulsory and may never involve national provinces. The previous condition on control holds.

C.5 The dynastic alliance can be cancelled at any given time. The party that cancels it loses 2 Stability levels.

C.6 Only a dynastic alliance allows players to cede or exchange a province, COL or TP. Each ceded possession has to be specified at the time of the alliance conclusion.

C.7 Each ceding of a province, COL or TP, costs 1 level of Stability to the ceding party.

C.8 *War of Successions*. The player that pays the dowry can benefit from a War of Succession inside the other player's country, if a dynastic Crisis occurred in the country that received the dowry. After Dynastic Ties are established, the rights in case of War of Succession are valid for 8 turns. When a dynastic Crisis happens, the power is allowed to declare war on that country as if he had a CB, or on the contrary he is allowed to enter as an ally of that same country,

as if he had a defensive alliance with it. See section XIV.14.5 (The Wars of Succession) about the conditions of this war.

C.9 A dynastic alliance cannot be renewed with the same player less than 3 complete turns after the official end (i.e. be it after two turns or earlier be-cause it was previously broken) of the previous alliance.

C.10 A dynastic alliance cannot be formed with a player of a different religion unless a 2 Stability level loss is incurred for doing so. This applies until the end of *Religious Enmities* between Protestant, Catholic and Orthodox countries. It always applies between all Christians and Muslims.

C.11 No Dynastic alliance can be formed by TUR with any other player.

**D Loan Treaty** Only players that have agreed on a Loan treaty can lend money from one to the other. One is referred to as the "lender", the other as the "borrower".

D.1 The sole possibilities for a player to give money to another are by Dynastic Ties (as a dowry), by Peace Resolution or by a Loan Treaty.

D.2 Money transferred by loan treaty is recorded on line **A3** of *ERS*.

#### E Restrictions on loans

E.1 Powers having different religions and signing Loan Treaty lose 1 Stability if they transfer 50 ₪ or more to the same borrower in one turn.

E.2 *Exceptions*. FRA, if Catholic/Conciliatory, and ANG beginning with Period IV, may lend money to any MAJ with no penalty for Religion. HOL, after being recognised by HIS (see event III-1 (1) (Revolt of the United Provinces)), may also lend money to any MAJ with no penalty for Religion.

E.3 The lender can not give more than 150 ₪ per turn to a given borrower.

E.4 *Exception*. HOL or ANG if it has created its Stock Exchange (event III-2 (Amsterdam Stock Exchange) and event IV-8 (1) (Creation of the London Stock Exchange)) can transfer up to 250 ₪ per Loan.

E.5 Restriction: during one turn, the lender is forbidden to lend more than his gross income when adding all the transfers made.

E.6 A given Power can not be both borrower and moneylender in different Loan Treaties at the same time.

#### F Modalities of refunding

F.1 Modes of pay-back and interest are left to the discretion of players. The "loan" can be even a gift without refund.

F.2 The treaty remains valid as long as the borrower has not paid back all received ducats. Other loans can be concluded on following turns, but always in the same way (moneylender to borrower). No new, additional, loan treaty can be concluded between these two players as long as that one remains valid. Loans that are gifts end at the end of turn.

F.3 The borrower can break the treaty at any time, and refuse to pay interest and/or the capital owed to the lender. In such a case, he loses immediately 1 Stability level and receives a negative modifier of -1 on the Exchequer test during 5 turns.

F.4 The moneylender may freely abandon the Loan and transform it in a gift at any Declaration Phase of a following turn. This ends the Treaty.

F.5 If an event releases a CB between the moneylender and the borrower and that the war is declared between them, the treaty is immediately broken without penalty. In such a case, no back payment or reimbursement is to be made by the borrowing country.

**G Defensive Alliance** A player linked to another player by a defensive alliance may has to declare war on any other country that attacks his co-signer. He benefits from a CB for this specific declaration.

G.1 The Alliance is effective to be used on the turn of its contracting.

G.2 The player can either enters the war by its own will or if the co-signer ask him to honour the alliance.

G.3 If the player is called by his ally and refuses to declare war along with his co-signer, he immediately loses 2 Stability levels and the alliance is cancelled. The co-signer also receives a temporary CB against the defaulting player.

G.4 The co-signer player may also prefer not to call for his Ally (or Allies). In this case, the allied player is left free to declare his participation in this war (with a CB) or not. If the Ally chooses not to participate, he suffers no penalties and the Alliance is not considered as broken.

G.5 If a secret alliance is called for and the co-signer refuses to declare the war in response of this alliance, the loss is reduced to 1 Stability instead of 2. The betrayed power still has a temporary CB against the defaulting power.

G.6 This Alliance lasts for the duration of the next 2 turns, except when and if cancelled by events or voluntary cancellation by one (or even both) of the co-signer.

G.7 All declarations of war by this way cost only 1 Stability level (whatever number of declarations in the current turn).

G.8 When the players are forming an "Alliance", they have to sign together the same peace with their enemies. With a minor country: count all the modifiers enemy minor/all allies. If peace is accepted, the allies must share the gains. With a major country: as for minor country, except for allies make an average of their Stabilities (rounded down).

G.9 If at war against the same enemy, all allied players move and play together (at the lowest player's Initiative rating rank).

G.10 If an ally is twice at -3 Stability at the phase of Peace, he must sue for peace, and sign a separate peace. In this case, his Alliance is not considered as voluntarily broken (and there is no CB).

**H Offensive Alliance** Same as for the preceding type of alliance, except that it applies also in the case where the co-signer is at the origin of the war declaration on another, third-party player or minor.

H.1 The details are the same as for a Defensive Alliance.

#### IV.2.1.4 The Trade Refusal

**A** A player can refuse the access of his market to the foreign trade of another player, even in peace, but that costs him 1 Stability level at the moment he announces his decision. Once taken, the decision can be maintained from one turn to the other (without any additional decline in Stability); the decision can be repelled later by the power at no cost.

#### B Reaction of the Other Player

B.1 The other player whose trade has been denied then receives a temporary Commercial CB against the player refusing him trade. This CB is to be used in the segment of Declarations of Wars and starts a new war.

B.2 Alternatively, he may refuse his own trade in reaction and reprisal. He then suffers from the same effects (loss of 1 level of Stability, and Commercial CB to the enemy). This is to be announced immediately.

#### C Value of Trade Refused

C.1 When a player is refused the trade of another, a foreign trade loss is assigned: it is calculated on the basis of the refusing player's European Trade value, i.e. the income of the refusing player's provinces, including vassals. This value is added to the amount of the European Market that is denied as foreign trade.

C.2 The player being refused trade gains also no income from Commercial fleets in the own CTZ of the refusing MAJ (neither regular nor monopoly incomes).

C.3 The player being refused trade gains half of its usual income (trade plus monopoly income if he has the monopoly) in some STZ, depending of the MAJ that refuses Trade:

- TUR: STZ **Mer Caspienne**, STZ **Mer Noire occidentale**, STZ **Mer Ionienne**;
- VEN: STZ **Golfe du Lion**, STZ **Mer Noire occidentale**, STZ **Mer Ionienne**;
- POR: STZ **Mer des Canaries**, CTZ **HISPANIA**;
- POL and SUE: STZ **Baltique**.
- HOL and ANG: STZ **Mer du Nord**.

C.4 These TF still count toward ownership of trade centres and the income of trade centres is not affected.

**D** A Trade Refusal breaks any past Loan Treaty between the two Powers with no further penalties. It forbids any Loan Treaty as long as the Trade Refusal continues.

#### IV.2.1.5 Others Announcements

**A** Others announcements can be made during the Diplomatic phase.

A.1 Most of them come from events specifying that a given choice must be made "as a diplomatic announcement".

A.2 Speculation on exotic resources is made as a diplomatic announcement. See §E (Speculation) of section VI.12.1.2 (Variation of price) for the effect.

A.3 Trade of wood is decided as a diplomatic announcement. See section II.8.4 (Trade of Wood) for the effect.

### IV.3 Diplomacy with European Minor Powers

#### IV.3.1 Presentation

##### IV.3.1.1 Actions and control

**A Informal Overview** After having negotiated between them, players may "negotiate" with minor countries. Each player has 1 to 6 diplomatic actions per turn. This number is given for each country and each period, as per the Limits table located on Players' Aides. Each diplomatic attempt against one minor country uses 1 such action and an investment in ducats which can be basic, medium or strong. Actions and diplomatic expenses have to be written on line **A5** (Diplomatic actions) of *ERS*. Results of those actions are assessed: each is solved with the help of three dice. In case of success, the influence that the player exerts on the minor is adjusted. Each minor country that is influenceable by the diplomacy of players has a diplomatic status marker displaying the relevant indications for the diplomatic game. Each such counter is placed on the diplomatic track located on the Rest-of-the-world map. Such a counter must be found in permanence placed in a square corresponding to its attitude towards a player or in the square reserved to the neutrals.

**B Levels of Diplomatic control** The principle of the diplomacy with European minor countries is that there can be only one influence of any one single player on a given minor, meaning that this player has a preponderant influence, or diplomatic control of the minor country; he is also names the "Patron" of the minor country. This influence is divided into different levels of increasing importance, which are:

**Neutral** Neutral (not really a status, rather the fact of being independent).

**RM** Royal Marriage (dynastic ties unite the reigning families of the two countries).

**SUB** Subsidies (the countries share economic ties and have mutual debts).

**MA** Military Alliance (the two countries have concluded military alliances and may help each other during wars).

**EC** Expeditionary Corps (the minor country is susceptible of sending larger armed forces).

**EW** Entry in war (the minor country may be called for a full participation in a war).

**VA** Vassal (the minor country is effectively dependant on the authority of the major country, and will participate in wars).

**AN** Annexation (the minor country has really become part of the major country in some form, and counts for many things as such).

**C Limit** This influence may be limited sometimes to a maximum level for some specific minor countries or for some particular players. It is even possible that a player could not make diplomatic action against a particular minor (e.g. the Turkish player against PERSIA).

**D The Diplomatic Track** Each player has a line of his own on the diplomatic track situated on the Rest-of-the-world map. Columns indicate the different diplomatic status that the player can achieve on a minor, as described immediately above.

**E Diplomatic Counters** Each counter (front/back) regroups information concerning the minor country mentioned on that counter. All this information also figures in the Annexes dealing with minor countries.

#### IV.3.1.2 Other

**A** It is possible to give a province to a minor country if either this is a province formerly owned by it (at any point during the game) or it has a blurred shield of the minor.

**A.1** This is not an action, this does not count toward the limit of actions per turn.

**B** If the minor is not existing anymore, it is immediately recreated as a VA of the major giving a province.

**B.1** If the minor cannot be VA, put it on the highest possible diplomatic level allowed for it instead.

### IV.3.2 Diplomatic actions

#### IV.3.2.1 Principles of diplomatic actions

**A** A player has a number of diplomatic actions which is limited according to the period in play (from 1 to 6 actions per turn). Even though the Diplomatic Actions are resolved after the Declarations of Wars, the rules are explained here (because Diplomatic control is helpful to understand the wars).

**A.1** The action is aimed at increasing the level of control of the player on that minor country, or decreasing the level of control of another power on a minor country.

**A.2** The player registers on his monarch sheet all his diplomatic actions of the current turn, by specifying which minor countries are aimed at. He must pay the cost of each action (written on line **A5** of *ERS*) and indicate on his monarch sheet the level of investment placed in that action (either basic, medium or strong).

**A.3 Diplomatic Supports** The player can also declare that he is supporting one action of another player. This support is a diplomatic action of the player by itself (it has to be paid as a basic investment diplomatic action), and must be written on the supporting player monarch sheet.

**A.4** Supports can be discussed and established as an informal agreement between the player granting support and the one receiving it.

**A.5** "Selling" supports is possible by contracting a loan treaty at the same time, but remember the limits on loan treaties.

**B Writing actions** When deciding which actions to make, a player should write all of them in details on his monarch sheet: the turn at which the action occurs, the country targeted, the amount of money spent (investment) and the resulting bonus to die roll (as explained below). Writing all this before actually resolving any of the actions will greatly speed up and smoothen play.

**C** A player can make only one action on a given minor country per turn.

**D** No diplomatic action is allowed on a European minor country that is fully involved in any war (even a Civil War) even by a major country that is not part of the war. The only "diplomatic" action allowed on minors at war with the player is separate peace. There is no such restriction for minors in limited interventions.

**E** Cost of Diplomatic actions The costs are the following:

**E.1** Basic investment: 20 ₮

**E.2** Medium Investment (+2 to the die-roll): 50 ₮

**E.3** Strong investment (+5 to the die-roll): 100 ₮

**E.4** Support (+1 to the die-roll): 20 ₮

**F** Actions must have been written down to be considered as valid.

#### IV.3.2.2 Resolution of an action

**A Order of Resolution** Intended actions are first written down by all players, then they are announced and then solved, minor by minor, the order of which being of no importance (choice of minor according to the initiative if contentions between players), in the following order:

**A.1** players decide of their reactions;

**A.2** resolve opposed actions (on minor countries already controlled by a power, or if two powers aim at the same Minor);

**A.3** resolve remaining unopposed actions.

**A.4** Note that all actions should be announced first, then all reaction should be decided and only after should the action be resolved. If you start resolving your actions earlier, don't complain that your opponent bases his ones actions or reactions on the results of your actions.

#### B Reactions by Another Player on a Minor it controls

**B.1** When an action is made on a minor already on the track of a player, this power may react depending on whether it was also making an action to increase his own level of control, or not.

**B.2 If the Patron is doing an action** There is no "reaction" investment to be paid by the controlling player excepts that the player may decide to immediately raise his level of investment and pay the difference. This level of investment is paid for his own action and the action will be considered at the same time as a the "reaction".

**B.3 If the controlling player did not plan to make any action on that minor** He is then allowed to take a "reaction" on that minor by paying the investment required. This reaction is in addition to the actions he is normally entitled for the current turn.

**B.4 If the controlling (i.e. defending) power refuses to make any reaction** by not paying any investment in reaction, the minor country is immediately placed in Neutral position and defends itself according to his new Neutral stance.

**B.5** Note that the defending player benefits from a bonus applicable to the die roll according to the degree of control that he exerts on the minor. This bonus is reminded to the player's attention at the top of the Diplomatic track on the map.

**B.6** Money spent for reactions (if any) is recorded on line **A6** (Diplomatic reactions) of *ERS*.

**C Resolution of Opposed Actions** If several powers are doing actions (including reaction) on the same minor, these actions are resolved together at the same time (each player rolls his die-roll and modifies it). The player that obtained the best result (i.e. the highest modified result) is selected to proceed further.

**C.1** Solve ties by competitive unmodified die-rolls, but the original result will be used for the resolution.

**C.2** If a reaction (that was not originally an action) is the best result, do not proceed further (no progression point can be gained, the reaction only served to keep the minor).

**D Resolution of the Action** The power selected with the best result compares its result to the following score:

**D.1** the score in reaction (even if it was originally a normal action) of the controlling power if it was opposing the attempt and did not achieve the best result (only the controlling players can use his score here, not another player attempting an action on the same minor);

**D.2** otherwise, the sum of 2d10 in all other cases.

**D.3** The player earns a number of progression points equal to the difference between his (modified) die roll and this latter result.

**D.4** If the difference is null or negative, it does get any points of progression (there is no "negative" progression).

**E Modifiers** Any player that rolls for this Minor Diplomacy has his die-roll modified as follows:

- +? DIP value of his monarch
- +0/+2/+5 Investment (20 ₣, 50 ₣, 100 ₣)
- +1 per other player supporting the action
- +1 RM or SUB box (controlling player only)
- +2 MA or EC box (controlling player only)
- +3 EW, VA or AN box (controlling player only)
- +1 same religion
- 4 different religion (until the end of Religious Enmities)
- 2 between Islam and Christianity (after the end of Religious Enmities)
- 3 For TUR against some *Barbaresque* countries
- +1 bonus of player's country as per the diplomatic marker of the minor country
- 3 on POLONIA (not applicable if Absolutism was established, or due to some events)
- +? as per applicable event
- +N if the MAJ gives a province of value N to the minor country this turn
- 1 for each province of the minor country owned by the MAJ.
- 3 if the player is or was at war (full or limited) against the minor during the current or preceding turn

**F How to read the Diplomatic Values of each Minor** Each Status (i.e. box) on the diplomatic track has a variable cost of progression, according to the level of control (status name is printed at the top of the track) and the concerned minor country.

**F.1** Political status Neutral, RM and SUB cost always 1 point of progression. Exception: to enter the SUB box for HELVETIA costs 3 points.

**F.2** The cost is variable for the other status according to minor countries. It is indicated on their diplomatic marker, as well as in the list of minor countries located in the Appendix handbook

**F.3** If a \* figures on the diplomatic marker for a particular status, it indicates that this political status is not achievable with this minor country.

**F.4** If initials appear instead of a figure (cost), they indicate that only the country having these initials can reach this political status, under the restriction that a specific event allowing it has occurred.

**G Diplomatic Markers Adjustment** Costs of progression indicate the minimum number of points of progression to advance the counter of the concerned minor on the diplomatic track.

**G.1** When all diplomatic actions have taken place, the minor country diplomatic marker is moved according to the number of points of progression obtained for that minor and the costs to enter the various status boxes, in favour of the player having obtained the success on this minor.

**G.2** Advancing a diplomatic counter is never mandatory. A player may always stop the marker progression even if sufficient progression points remain.

**G.3** Moving back a marker is mandatory. If the marker reaches the Neutral box while doing so and some remaining points of progression are still available, the marker can then progress in favour of the player that has succeeded in the action as explained below.

**G.4** All points of progression balance that do not suffice to enter into the box is lost and not applicable.

**G.5** The diplomatic marker of a minor country is moved on the track until it reaches a political status box, as allowed by the number of points of progression and the various costs to enter those boxes. If the marker has progressed, intermediate boxes indications are ignored. Apply only the result and benefits of the status corresponding to the box where the marker is located.

**H Handling reactions** When an action is opposed by a reaction (or in case of a competitive action lost by the controller), the score need to be compared both to the reaction score and later to 2d10 (as per regular minor).

**H.1** Comparing the action score with the reaction gives a number of progressions points used to reach Neutral.

**H.2** Once the minor is Neutral, roll 2d10 for it. Compare the (original) score of the action with them to get a number of progression points, then subtract the number of points previously used to reach Neutral. The result (if positive) is the number of progression points used to raise the

**Example: A simple action.—** At turn 1, FRA tries to do some diplomacy on SABAUDIA which is already in MA, the French monarch is **Charles VIII** with a DIP of 9 and he chooses to make a basic investment only. Both FRA and SABAUDIA share the same religion (Catholicism). Thus, the total modifier for FRA is **+12 (+9 for DIP, +1 for religion and +2 for control)**. FRA rolls a 3, for a net result of 15. Someone else rolls 2d10 for SABAUDIA and gets 6 and 5 for a result of 11. FRA thus scores 4 progression points. SABAUDIA is already in MA, the next box is EC. According to the diplomatic value (in the Appendix), it costs 2 points to raise SABAUDIA to EC. There are still 2 points left. However, raising SABAUDIA to EW would cost 3 extra progression points which FRA doesn't have. So, SABAUDIA stops in EC and the 2 extra progression points are lost.

**Example: A competitive action.—** At turn 1, both ANG and HIS want to make an action on PALATINATUS (which is Neutral). The three countries are Catholic (PALATINATUS will become Protestant later but it begins Catholic). Both ANG and HIS choose to make a basic action, their respective DIP is 7 and 6, thus giving modifiers of **+8** for ANG and **+7** for HIS. ANG rolls 4 for a final result of 12 while HIS rolls 7 for a final result of 14. Thus, only HIS is allowed to do an action. Someone rolls two dice for PALATINATUS and gets 4 and 9 for a total of 13, to the amusement of ANG. HIS thus only scores 1 progression point, enough to get PALATINATUS in RM but no further.

**Example: A reaction.—** At turn 1, FRA also wants to try and get SANCTA SEDES out of Spanish hands. Thus, he makes his second diplomatic action on it, still with a basic investment resulting in a **+10** modifier.

HIS did not plan any action on SANCTA SEDES and shocks when he learns about the French villainous move, claiming that he is the most Catholic king out there and should morally be the only one with ties to the Pope. FRA smiles and calmly asks if HIS wants to react to this action or forfeit his illegitimate claims on Rome.

If HIS choose not to react, then SANCTA SEDES will immediately becomes Neutral and the French action is then resolved normally. However, HIS wants to keep his lead on SANCTA SEDES and thus choose to react. He has to decide at which investment. Since his DIP is only 6, a basic investment will yield in a **+8** modifier (**+1** for religion and **+1** for control), somewhat smaller than the French **+10**. So, HIS decides to limit the risks and use a medium investment, thus spending an extra 50 ₣ but reaching a **+10** modifier.

Both roll a die. FRA rolls 7 for a total of 17 while HIS only rolls 1 for a total of 11. Thus, FRA gets 6 progression points. The first one is used to bring SANCTA SEDES back to Neutral. Then, the rest of the action is resolved as against a normal Neutral (and the extra progression points against HIS are lost). HIS swear to take his revenge and quickly grab two dice, rolling 6 and 8 for a total of 14. FRA initial total was 17, so he has 3 progression points against SANCTA SEDES, however, one is considered to have been already used against HIS, so there are 2 left, just enough to bring SANCTA SEDES in SUB.

Even if HIS had initially rolled 9, for a total of 19, higher than FRA, he could not have raised his control on SANCTA SEDES because this was a reaction and not a planned action.

**Playing tip:** It is more efficient to have all the players simultaneously write down all the diplomatic actions they want to do this turn, including the computation of the bonus ; then have pair of players (as soon as they are finished) roll for their actions (with the other rolling for the minor) and write down the result (number of progression points) ; and lastly implement the results (going to the diplomatic track and moving the markers, maybe rolling for subsidies or dowries. This avoids numerous back and forth journeys to the diplomatic track to implement the results and speeds the rolling process by pre-computing everything (thus requiring less time overall).

Note also that the influence of the diplomatic actions of other players on the immediate other phases (incomes and expenses) is almost null. So, as soon as one has resolved ones diplomatic actions, one can begin computing ones incomes and thinking about expenses. Only the military phase will require further synchronisation between players.

**I Reading markers** The cost for entering the different boxes is specified in the Appendix. Additionally, it is written on the diplomatic counters for easy reference during game. The front of the counter shows values for dowry, subsidies and MA while the back (with the "at war" strip) shows values for EC, EW, VA and AN.

### IV.3.3 Effects of the Diplomatic control

#### IV.3.3.1 Royal Marriage

**A** The Royal Marriage (RM) box gives the advantage of a bonus of +1 during any ulterior diplomatic phase as long as the player controlling the minor country retains this status.

**B The Dowry** When the minor country diplomatic marker reaches the RM box by advancing (not by moving back), the player rolls one die. If the result is:

*B.1* Even the player receives the sum of the dowry in ducats as indicated on the diplomatic marker.

*B.2* Odd: the player has to pay the dowry.

**C** This sum (positive or negative) is written on line **A7** (Subsidies and dowries) of *ERS*.

**D** If the player refuses to pay the dowry, the marker is returned immediately to the Neutral box.

#### IV.3.3.2 Subsidies

**A** The position of a diplomatic marker on the Subsidy (SUB) box gives a bonus of +1 during any ulterior diplomatic phase for the player controlling the minor country.

**B Payment of Subsidies.** When the minor country diplomatic marker reaches the SUB box by advancing (not by moving back), the player rolls a 1d100. He modifies the obtained die-roll result by the Subsidy modifier (always negative) indicated on the minor country marker. If the result is:

*B.1* positive: it indicates the number of ducats that the player receives from the minor;

*B.2* negative: it indicates the number of ducats that the player has to pay to the minor.

**C** This sum (positive or negative) is written on line **A7** of *ERS*.

**D** If the player refuses to pay, the marker is immediately and directly returned to the Neutral box.

**E** The positive net amount obtained by Subsidies can never exceed 50 ₤, except explicit precision of the contrary as explained in some events.

**F** When a player pays the subsidies, the ducats thus transferred to the minor are deducted from the player treasury (and just marked-off i.e. there is no such thing as "minor country treasury").

#### IV.3.3.3 Military Alliance

**A** The position on the Military Alliance (MA) box gives a bonus of +2 during any ulterior diplomatic phase for the player controlling the minor country.

**B Alliance.** As it is an alliance, if the MIN is declared war upon or if it declares war, it will call for its patron, that is also an ally.

**C Limited Intervention in wars.** Conversely, the MIN is allowed to be involved in a limited way in the wars of their patron. This declaration is a Reaction, and is shown by placing the forces of the MIN on the map. Additionally and as an exception to the rules of reaction, a limited intervention can be declared at the instant a status of MA (or better) is obtained, so at the end of the phase of Diplomacy (and not at the usual segment where reactions are allowed).

*C.1* A limited intervention of a minor country is made only with its basic forces. It can draw supply only from its own provinces (and so can not go further than 12 MP from its country).

*C.2* Units can not go out of the European map if the minor country has no TP/COL on the ROTW map. They can not participate in discoveries if it is not specified for this minor power (mainly PORTUGALLIA and HOLLANDIA are allowed).

*C.3* In MA, the intervention is at most of one land stack and one naval stack outside the minor country.

*C.4* The MIN receives reinforcements each turn in the administrative phase. The base reinforcement is given in the Appendix. These reinforcements are only used to recreate the basic force of the MIN, should they be diminished.

*C.5* The MIN has a free active campaign each turn, and free passive campaign each other round. Its Patron may increase the level of the campaign by paying for this.

*C.6* The MIN is in fact out of the war: its territories can not be attacked or trespassed if it is only in limited intervention. The MIN is not part of the Peace Treaty that will end the war. The MIN may withdraw from the war if its diplomatic status changes.

*C.7* A MIN that is announced in limited intervention in a war offers a free CB to the enemy alliance to involve fully the MIN in the war.

**D Full involvement in wars.** Some events, or declaration of wars may involve fully the minor country in a war.

*D.1* In this case, the status is shown by putting the Diplomatic marker of the MIN on the side reading "At War" and the Diplomatic position is increased to Entry in War (EW).

#### IV.3.3.4 Expeditionary Corps

**A** The position on the Expeditionary Corps (EC) box gives a bonus of +2 during any ulterior diplomatic phase for the player controlling the minor country.

**B Alliance.** As it is an alliance, if the MIN is declared war upon or if it declares war, it will call for its patron, that is also an ally.

**C Limited Intervention in wars.** Conversely, the MIN is allowed to be involved in a limited way in the wars of their patron. The conditions are the same as in MA, except that the MIN in EC add one LD or ND (controller's choice) to its reinforcements each turn.

**D Full involvement in wars.** Some events or declaration of wars, may involve fully the minor country in a war. The conditions are the same as in MA.

#### IV.3.3.5 Entry in war

**A** The position on the Entry in War (EW) box gives a bonus of +3 during any ulterior diplomatic phase for the player controlling the minor country.

**B Alliance.** As it is an alliance, if the MIN is declared war upon or if it declares war, it will call for its patron, that is also an ally.

*B.1* Additionally, the Patron may ask for a full entry in war on the minor country, as an ally fully involved in the war. This is done during the announces of Reactions to a declaration of war (as if calling for alliances of MAJ). To participate, a minor must be rolled for and a modified result of 6 or more must be obtained on 1d10.

*B.2* Modifiers to this entry die-roll depend on the country the player wants his minor to declare war upon. They are the following:

+? political bonus of the MAJ on the country

+2 if the enemy has a common border with the MIN

-2 if the closest enemy province is 6 MP or more from the minor territory, and more than 2 sea zones away from a minor coastal province

-2 if the religion of all enemies is the same as that of the minor (until the end of *Religious Enmities*).

-3 for POLONIA (not applicable if Absolutism was established, or due to some events)

-4 if the minor country is already involved in a different war

*B.3* Failure to this test lowers the diplomatic control to EC immediately, and forbids the Major power to declare a limited intervention of this Minor country at the current turn in this war.

**C Limited Intervention in wars.** Conversely, the MIN is allowed to be involved in a limited way in the wars of their patron. The conditions are the same as in MA, except that the MIN in EW add one LD or one ND (controller's choice) to its reinforcements each turn.

**D Full involvement in wars.** Some events or declaration of wars may involve fully the minor country in a war.

*D.1* In this case, there is no restriction to the manner that the MIN conducts the war. The status is shown by putting the Diplomatic marker of the MIN on the side reading "At War".

*D.2* It maintains up to its Basic Force at the begining of each turn. Additional forces can be maintained by their Patron.

*D.3* It receives reinforcements based on a roll on the Reinforcement Table. It has, for free, an active campaign for each round, plus some major (or multiple) campaigns given by the reinforcements table. The Patron may complete the cost of those to a higher level of activity if need be.

*D.4* It will have to sign a Peace Treaty to cease the war (a Separate Peace or the common Peace Treaty).

#### IV.3.3.6 Vassalisation

**A** The position on the vassalisation (VA) box gives a bonus of +3 during any ulterior diplomatic phase for the player controlling the minor country.

**B Income** Vassal income from provinces, colonies, Trading Posts, exotic resources and commercial fleets is included in the controlling player's income, both during war or peacetime.

*B.1* Their income is added to blocked foreign trade for Foreign trade income, and count for domestic income.

**C** The territory of a VA country is always open to its controlling power. The allies of this powers and its enemies can pass through the VA if (and only if) the Patron has been in it before during the current turn.

*C.1* Movements, supply passing through, staying in and battles are permitted to those countries. The territory is friendly to the controlling power and its allies, and enemies to others.

*C.2* No siege or pillage are possible. The cities are supply sources only to the Vassal minor country.

*C.3* Fortresses may be maintained by the Patron.

**D Alliance.** A VA is tightly associated to its Patron.

*D.1* The controlling power may decide to fully use its VA in war, or to declare only a limited intervention, or do nothing (except that the territory of the VA is accessible as said above). All those declarations can be made as reactions at any turn of the war. Once a VA is fully involved in a war, it stays so until a Peace is signed.

*D.2* The enemies of the Patron can declare during the diplomatic phase that they fully include any VA in an existing war: the VA is now in full war. Also, a declaration of war against a VA is actually a joint declaration of war against the Patron.

*D.3* A VA can only be involved in war (full or limited way) if the VA is at the distance of 12 MP or 4 sea zones from one enemy province of a Power fully involved in the war.

**E Limited Intervention in wars.** The VA can be involved in a limited way in the wars of their patron. The conditions are the same as in MA, except that the MIN in VA gain no free reinforcement each turn, including its own basic reinforcements.

*E.1* Instead, the Patron may pay for reinforcements, on his own treasury, to raise troops up to the basic forces of the country. The maximal reinforcements so raised are the basic reinforcements indicated in the Annexes, plus 2 detachments (LID or NID).

*E.2* All the basic forces of the MIN can be used.

**F Full involvement in wars.** Some events or declaration of wars may involve fully the minor country in a war. Additionally, its Patron or the enemies of this power may declare at any Diplomatic Phase that the VA is now fully involved in the war.

*F.1* The conditions are the same as in EW.

*F.2 Vassals and Separate Peace* A vassal ally never accept to sign a separate peace unless its capital is under enemy control (and unbesieged by friendly forces), or it is forced to accept an unconditional peace (when totally conquered), or its monarch is captured and ransomed for the right to attempt a separate peace.

#### IV.3.3.7 Annexation

**A** The position on the Annexation (AN) box gives a bonus of +3 during any ulterior diplomatic phase for the player controlling the minor country. When the minor country marker is in the AN box of a player, that country is considered as annexed by the player.

**B Units and Income of Annexed Minors** All force of an annexed minor are removed, and provinces of that minor are annexed, although they cannot be considered as national provinces of the annexing player.

*B.1* The player receives all income from annexed provinces as if they were his own, including for Manufacture percentage income.

*B.2* He may build units there as in other non-national provinces.

*B.3* For military operations, the annexed country is part of the controlling power.

**C Condition of Annexation** To be annexed diplomatically, a minor country has to be adjacent to a province already controlled by the annexing player, otherwise the diplomatic counter of this minor cannot be move up to the Annexation box.

**D Dis-annexion** An diplomatically annexed minor can be dis-annexed if another player succeeds in moving the diplomatic marker of the MIN on the diplomatic track, away from the AN box.

*D.1* A minor can also be dis-annexed by a Diplomatic Agitation during the event phase, by a change that could make the marker's present position be moved one or more boxes.

*D.2* Destroyed minor countries (possible by some events, or by rules on Turkish, Russian or Polish Annexions) are not annexed for this rule: their diplomatic marker is not put in Annexion and the Diplomatic Agitations do not affect them.

### IV.4 Diplomacy with non-European countries

#### IV.4.1 Diplomacy status in ROTW

**A** The following minor countries are on ROTW map. INCA, AZTECA, GUZARATE, BISINAGAR, MOGOLIS IMP., CHINA, IAPONIA, SIBERIA, AYMAN, ADEN, SUDANIA, MYSURIA, HYDERABADA, IROQUOIS, DURRANIS IMP., ORMUS (a special part of PERSIA). The relations between European Major Powers and those countries are governed by different diplomatic rules.

**B Generalities** A Major Power has a specific status regarding each one of those countries:

**NR** No relation.

**FR** Formal relation.

**AT** Alliance Treaty.

*B.1* NR is not recorded;

*B.2* FR and AT are recorded by placing a ROTW diplomatic counter of the Major Power in the diplomatic status box of the relevant minor country, that is found on the ROTW map, on the side showing FR or AT as needed.

*B.3* Note that the number of ROTW Diplomatic counters provided to each MAJ is limited by design. A Major Power may always decide to lose a relation in order to free a needed counter. Each counter allow for one FR (front) or one AT (back).

**C** Diplomatic status is achieved by doing diplomatic actions, as described in the section IV.3.2 (Diplomatic actions). A diplomatic action on a country in the ROTW counts as one of the allowed actions, but it is resolved differently.

#### IV.4.2 Diplomatic actions in the ROTW

**A Conditions to attempt actions.** In order to attempt a diplomatic action on a ROTW minor country, a Major Power needs to have discovered at least one province of the minor country, and needs to

<p>[R]74</p> <p>Diplomacy with non-European countries</p> <p>A.1 either have a TP/COL in an area owned by, or adjacent to the country, or adjacent to the same seazone,  A.2 or have a Commercial fleet in a seazone bordering that country,  A.3 or have an emissary in the minor country at the diplomatic phase,  A.4 or be TUR attempting action on AYMAN, ADEN or SUDANIA,  A.5 or be VEN after subevent I-13.α (War in Indian Sea), attempting action on ADEN, AYMAN and GUZARATE  A.6 No diplomatic action is allowed if the power is fully at war against the minor country of the ROTW.</p> <p><b>B Emissaries</b> An emissary is a Conquistador (or an Explorator used as a C, with values divided by 2), a Governor, a Missionary, or a Mission. To be helpful, an emissary has to be in the target minor country, or in an adjacent region, or in a province bordering the same (discovered) sea as the minor country.</p> <p><b>C Resolution of diplomatic actions in ROTW</b> The result of the action is always given by the difference between 1d10 rolled by the MAJ (plus bonuses below) and the resistance given by the sum of 2d10.  C.1 as for actions on European minors, the actions (and final bonus) has to be written on the monarch sheet and the cost is recorded on line <b>A5</b> of ERS.</p> <p><b>D</b> Modifiers to the diplomacy die-roll  +0/+2/+5 Investment (20 ₮, 50 ₮, 100 ₮)  +FTI (the one applicable in the ROTW)  +? Manoeuvre of one emissary (3 for Mission; Bonus+Manoeuvre for Missionary)  +2 if same religion (TUR with AYMAN, ADEN, GUZARATE, and SUDANIA)  -2 for Christian on Muslims (until the end of Religious Enmities)  +2 in defence if the MAJ has already in AT</p> <p><b>E</b> Results (modified roll minus the resistance)  &lt;0 Failed, missionary killed  ≥2 one level gained  ≥5 goes to AT</p> <p>E.1 An adjusted roll strictly higher than the resistance (2d10) plus one raises the diplomatic status of one level (from NR to FR, or from FR to AT), or of two if the difference is 5 or higher (all the way to AT).  E.2 Going to a higher level of relations is always voluntary and can be declined.  E.3 More than one power can make a diplomatic action on a country in the ROTW at the same time. The attempts are not in opposition. Several major countries may have FR or AT with the same minor at the same time.  E.4 An adjusted roll less or equal to the resistance causes nothing, except that a Missionary that served as an Emissary is killed (and may come back afterwards).</p> <p><b>F Reaction</b> Any MAJ sharing an AT with the MIN has the opportunity to react. It uses the same condition and modifiers as diplomatic action in ROTW. As a reaction, the MAJ pays the action (according to the investment), this is recorded in line <b>A6</b> of ERS, but the action is not counted as one of its own at this turn. If the roll of the reacting player is higher than the resistance (sum of 2d10), the result of the action is given by the comparison with his roll.</p> <p><b>G Opposing to other countries' relations.</b> A Diplomatic action may be aimed at diminishing the diplomatic relations of some or all Major Powers with the minor. This counts as one diplomatic attempt and is allowed provided the power satisfies the conditions to make diplomacy on this minor country. The opposed MAJ (s) is/are announced before the action and they defend their status as usual, by paying the cost of a Diplomatic action (that is not counted as one of their permitted actions for the turn), if they have no action planned.  G.1 Both opposing MAJ make a roll of 1d10, modified as above. If the acting MAJ obtains a higher roll than an other MAJ opposing the action, the result is that this MAJ lowers its diplomatic status of one level (from AT to FR, from FR to NR).</p>	<p>Diplomacy— master – 2016-04-14</p> <p>[R]75</p> <p><b>Example: Diplomatic action.—</b> During turn 2, Da Gama lands in India and stays inside the territory of BISINAGAR at the end of turn. Thus, he may act as an emissary during the diplomatic phase of turn 3. The special FTI for ROTW of POR is 5 and the player chooses to make a small investment only. Thus, the final bonus is <b>+11</b> (+6 for the Manoeuvre and <b>+5</b> for the FTI) which is already rather good. . .  POR rolls 6, for a total of 17 while the minor rolls 4 and 8 for a total of 12. The difference between the two is 5 which is enough to go directly to AT. POR now has to pay 2d10 ₮ as presents to the local Rajahs (see below).</p> <p><b>Example: Diplomatic reaction.—</b> At turn 8, TUR manages to get an AT with ADEN, allowing it to get part of the spice trade. Since subevent I-13.α (War in Indian Sea) occurred earlier, VEN, always eager to get more hold on the spice trade, attempts some diplomacy on ADEN and TUR decides to react. None of them has emissary in the country. The FTI are 4 for VEN and 3 for TUR. VEN chooses to make a medium investment for a final bonus of <b>+4</b> (FTI, <b>+2</b> for the investment but <b>-2</b> for the religious difference) while TUR only reacts with a small investment for a final bonus of <b>+5</b> (FTI, <b>+2</b> for being both Muslims). VEN rolls 8, for a total of 12. ADEN rolls 3 and 2 for a total on 5. If the action was not opposed, this would be enough to get an AT! However, TUR rolls 5, for a total of 10. Thus, the Turkish roll is taken into account rather than the minor one and VEN only gets a difference of 2. Still enough to go to FR.</p> <p><b>Example: Hampering another status.—</b> It is turn 53 (1750). Both FRA and ANG have an AT with MYSURIA. Sensing that colonial tensions may arise in a state of war sooner or later, the East Indian Company decides to play on the intra-indian struggles and sends Clive in a attempt to convince MYSURIA to break its alliance with FRA. The Compagnie des Indes Orientales learns about it and quickly sends Dupleix to try and counter the English deeds.  ANG makes an action on MYSURIA, specifically to lower the relation with FRA, with a FTI of 5, a manoeuvre of 4 for Clive and a medium investment, thus getting a final modifier of <b>+11</b>. FRA also has a FTI of 5 and a manoeuvre of 4 for Dupleix but only reacts with a small investment (after all, India can't be more important than the sugar Islands of the Caribbean, says the King) for a final modifier of <b>+11</b> (+2 for defending its AT).  ANG rolls 8, for a final result of 19 while FRA rolls 7, for a final result of 18. Since the English result is higher, the diplomatic status of FRA is lowered by one level and goes to FR.</p> <p><b>IV.4.3 Consequences of "Formal Relations"</b></p> <p><b>A</b> In the provinces of the minor country, neither Native Activation (during each round), nor reaction of the MIN due to the presence of military forces, will be made if only stacks of one LID would be responsible of the test.  A.1 The presence of more than one LID in any one province, or of an A may still cause such activation.  <b>B</b> Any war (normal or overseas) between the powers and the minor country will break the status to NR. Native reaction in a province of the minor country is not a war and changes nothing.</p> <p><b>IV.4.4 Consequences of an "Alliance Treaty"</b></p> <p><b>IV.4.4.1 Generalities</b></p> <p><b>A</b> For INCA, AZTECA, GUZARATE, MOGOLIS IMP., CHINA, IAPONIA and DURRANIS IMP., the MAJ has to pay 1d100 ₮ immediately, or the status remains FR only.  <b>B</b> For BISINAGAR, SIBERIA, AYMAN, ADEN, SUDANIA, MYSURIA, HYDERABADA, IROQUOIS, and ORMUS, the MAJ has to pay 2d10 ₮ immediately, or the status remains FR only.  <b>C</b> The effect of FR on lone LID is still applied.  <b>D</b> Supplementary effects vary according to each MIN.  <b>E</b> Having an AT is analogue to a VA status for Victory Conditions.</p> <p><b>IV.4.4.2 IAPONIA and CHINA</b></p> <p><b>A</b> The MAJ can have a TP in each area of the minor country that will not cause a test of reaction of the Native country at the beginning of the turn.</p>
--	---

<p>[R]76</p> <p>Diplomacy with non-European countries</p> <p><b>B Closure of China or Japon.</b> Events subevent III-22 (1).α (Closure of China) and subevent IV-22.α (Tokugawa's Commercial Restrictions) close respectively CHINA and IAPONIA for the following effects:</p> <p><b>B.1</b> The reaction level of the country is raised to 11 (so a reaction is automatic if the conditions are met); the fidelity is raised to 16.</p> <p><b>B.2</b> The country refuses any diplomacy, except as detailed afterwards; existing diplomatic status remain so (and other powers are forbidden to try opposing existing relations);</p> <p><b>B.3</b> AT allow each country to keep only one TP in CHINA or IAPONIA, and not one per area (that TP causes no reaction of the minor country);</p> <p><b>B.4</b> No new TP counter can be placed in any area belonging to the country, by means of administrative actions, except in <b>FORMOSE</b> or <b>CHOSÓN</b>;</p> <p><b>B.5</b> The only way to have a new TP is to take control of the TP of another country (by military means, and a peace, or by placing a new TP in the same province and using automatic concurrence to try to replace the existing TP) in which case the Treaty status is given to the new controller of the TP and lost by the previous one.</p> <p><b>B.6</b> New areas that would be conquered later by CHINA or IAPONIA would suffer from the same restrictions, but existing TP or COL are not destroyed immediately (unless the event says so). Moreover, for the new areas controlled, the Activation level is 6 only (and not automatic). In these area, it is possible to create new TP by administrative action, but the rest of the restrictions apply.</p> <p><b>C Treaty of Nerchinsk.</b> Event event V-19 (The Treaty of Nerchinsk) results in the annexion by CHINA of area <b>AMOUR</b>, and some provinces in <b>Baikal</b>.</p> <p><b>C.1</b> The Activation level of CHINA is 6 herein.</p> <p><b>C.2</b> Powers having a COL/TP in this area are allowed to attempt diplomatic actions on CHINA. If they manage an AT status, they can have and keep up to 2 COL/TP in <b>AMOUR</b>, or (exclusive) keep one existing in the rest of CHINA (as per the previous rule ; note that such a TP can not be created) that will not cause reaction of the minor.</p> <p><b>IV.4.4.3 BISINAGAR</b></p> <p><b>A</b> BISINAGAR will not react to the presence of TP in its provinces. It will react to the presence of COL.</p> <p><b>A.1</b> Exception: with an AT of POR, BISINAGAR will never to the presence of a Portuguese COL in its territory.</p> <p><b>B</b> Neither BISINAGAR nor natives in its territory will react to the presence (movements or remaining) of stacks of at most one Δ⊕ in its territories.</p> <p><b>IV.4.4.4 MOGOLIS IMP., SIBERIA, SUDANIA, DURRANIS IMP.</b></p> <p><b>A</b> The concerned minor country will not react to the presence of TP⊖ in its provinces. It will react to the presence of COL or of TP⊕.</p> <p><b>A.1</b> Exception 1: with a Treaty, DURRANIS IMP. will not react to the presence of a COL in <b>Herât</b>.</p> <p><b>A.2</b> Exception 2: with a Treaty, SUDANIA will not react to the presence of COL of TUR.</p> <p><b>A.3</b> Exception 3: with a Treaty, MOGOLIS IMP. will never react to the presence of a Portuguese COL in its territory.</p> <p><b>B</b> Neither the minor country nor natives in its territory will react to the presence (movements or staying there) of stacks of at most one Δ⊕ in its territories.</p> <p><b>IV.4.4.5 GUZARATE, AYMAN, ADEN, ACEH</b></p> <p><b>A</b> Neither the minor country nor natives in its territory will react to the presence (movements or staying there) of stacks of at most one Δ⊕ in its territories.</p> <p><b>B</b> If there is only one power having AT with the country, the resources produced by the TP/COL of the minor country are given to this power (it gains the income and count those resources as its own to obtain a monopoly).</p> <p><b>C</b> The minor country can be used as an ally in wars.</p> <p><b>D</b> They do not react to COL of TUR, except ACEH.</p> <p><b>E</b> AYMAN controls <b>Soqotra</b> if no power has an establishment (fort, TP or COL) in the province.</p>	<p>Diplomacy— master – 2016-04-14</p> <p>[R]77</p> <p><b>IV.4.4.6 MYSURIA, HYDERABADA</b></p> <p><b>A</b> The minor country will not react to the presence of TP in its provinces. It will react to the presence of COL.</p> <p><b>B</b> Neither the minor country nor natives in its territory will react to the presence (movements or staying there) of stacks of at most one Δ⊕ in its territories.</p> <p><b>C</b> The minor country can be used as an ally in wars.</p> <p><b>IV.4.4.7 IROQUOIS</b></p> <p><b>A</b> IROQUOIS will not react to the presence of TP⊖ in its provinces. It will react to the presence of COL or of TP⊕.</p> <p><b>B</b> Neither IROQUOIS nor natives in its territory will react to the presence (movements or staying there) of stacks of at most one Δ⊕ in its territories.</p> <p><b>C</b> The minor country can be used as an ally in wars.</p> <p><b>IV.4.4.8 ORMUS, part of PERSIA</b></p> <p><b>A Specifics of Ormus.</b> <b>Ormus</b> is a ROTW province in <b>Golfe Persique</b> belonging to PERSIA. In general, <b>Ormus</b> is dealt with as a normal ROTW province (allowing forces to enter in it without war declaration, placement of TP, etc.), with usual Native reaction, or country ORMUS reaction.</p> <p><b>A.1</b> No COL can ever be placed in the province (but a TP may be).</p> <p><b>A.2</b> A reaction of the minor ORMUS is actually a declaration of Overseas war by PERSIA, as is a war declaration against ORMUS.</p> <p><b>A.3</b> A country at war against PERSIA and the owner of forces or TP in <b>Ormus</b> is allowed to attack it from the European map also.</p> <p><b>A.4</b> The fortress in <b>Ormus</b> acts as a <i>Præsidio</i> against <b>Bam</b>.</p> <p><b>A.5</b> See also §I.3 of section I.1.2 (Provinces and Sea Zones).</p> <p><b>B Effects of a Treaty.</b> AT with ORMUS allows a player to have a TP in <b>Ormus</b> that attracts no reaction from ORMUS, as long as the AT holds.</p> <p><b>B.1</b> The power can also enter this province with military forces, or fortify the TP. This draw no reaction from ORMUS.</p> <p><b>C Afghanistan.</b> PERSIA may also own <b>AFGHANISTAN</b> because of some event. It will not react to the presence in this area of TP⊖ of a power having a AT with ORMUS. It will react to the presence of COL or of TP⊕.</p> <p><b>C.1</b> PERSIA will also not react to the presence (movements or staying there) of stacks of at most one Δ⊕ in <b>AFGHANISTAN</b>, if those are owned by a power having a AT with ORMUS. Neither would natives react under this condition.</p> <p><b>IV.4.4.9 INCA and AZTECA</b></p> <p><b>A Permanent AT of Incas and Aztecs.</b> In 1492, INCA and AZTECA are always in AT with every power. This can change because of event II-19 (Resistance of the American Empires), or when a power besieges their capital.</p> <p><b>B Effect of AT.</b></p> <p><b>B.1</b> The concerned minor country will never react, neither to military forces, nor presence of TP/COL.</p> <p><b>B.2</b> Natives in the area of the country can be attacked with no declaration of war. The capitals of the empires can also be attacked without war against the country (but Natives has to be attacked first for assault or siege).</p> <p><b>C Fall of the American empires.</b></p> <p><b>C.1</b> If its capital is controlled by a power at the end of a turn, an American empire is destroyed. The number of Natives in each province is now 2 LID (instead of 20 LID).</p> <p><b>C.2</b> Place immediately a COL of level 3 on the city, owned by the power controlling the city. If this power is HIS, it must immediately place a mission there, either by drawing an available mission in the pool, or by moving a deployed mission that is in the same area; then the highest rank Conquistador present in the region is nominated as Vice-Roy of the area.</p>
---	--

**D Attack on capital** Whenever the capital of INCA and AZTECA is attacked, a test of reaction is made at the end of the round (after the result of siege or assault). If there is a reaction, the concerned minor country declares an immediate Overseas war against the aggressor.

*D.1* Its troops are deployed (even in occupied provinces) and Natives in all its provinces are activated for the war.

*D.2* If this is the last round of the turn, the Fall of the Empire is suspended for this turn (but may happen on the future turn).

#### IV.4.5 Countries from the ROTW as ally

**A** Some countries from the ROTW in AT can be used as ally in wars: ADEN, AYMAN, GUZARATE, MYSURIA, HYDERABADA and IROQUOIS. The power having the AT can ask for a limited intervention. This is a declaration in reaction, and is shown by placing the forces of the MIN on the map.

*A.1* If more than one power have AT, all that want can ask for limited intervention. Then they all roll 1d10, modified by the modifiers for diplomatic actions in the ROTW. The power that rolls highest gains the intervention for this turn (in case of ties, no intervention). This test should be renewed at each turn, and the side of intervention thus may change.

*A.2 Reciprocal alliance.* As it is an alliance, if the MIN is declared war upon or if it declares war, it will call for its patron, that is also an ally. If the power does not respond the alliance (at the least a limited intervention), the status is broken to FR.

#### **B Conditions of the Limited intervention in ROTW.**

*B.1* A limited intervention of a minor country is made only with its basic forces. It draws supply only from its own provinces (and so can not go further than 12 MP from its country). Its units can not go on the European map.

*B.2* The intervention is at most of one land stack and one naval stack outside the provinces of the minor country.

*B.3* The MIN receive reinforcements each turn in the administrative phase. The base reinforcement is given in the annexes. These reinforcements are only used to recreate the basic force of the MIN, should they be diminished.

*B.4* All campaign costs for the MIN are paid by its ally.

*B.5* In the provinces that it controls, the MIN is allowed to attack forces of enemies, but the Natives are not activated (only the basic forces may attack). During the end of turn, the forces can do "Native attack" on TP/COL of an enemy power that is in an area the MIN controls, but this does not use also the Natives (unless specified in the description of the country).

*B.6* The MIN is in fact out of the war. The MIN is not part of Peace Treaty. But its territories could be crossed as it is usually permitted.

#### IV.4.6 Military Diplomacy and Treaty

**A** A power at war (normal or overseas) against a country in the ROTW signing a victorious peace treaty of level 2 or higher, and forfeiting all other conditions of peace, may do the following:

*A.1* reducing any or all AT and FR of other powers, to respectively FR and NR. A power that has its diplomatic status broken this way gains a temporary free Overseas CB against the responsible power;

*A.2* and, sign a FR with the ROTW country, or upgrade a FR in AT.

**B** A power at war (normal or overseas) against a country in the ROTW achieving a peace of level 4 or higher, and forfeiting all other conditions of peace, may do the following:

*B.1* break any or all AT and FR of other powers to NR. A power that has its diplomatic status broken this way gains a temporary free Overseas CB against the responsible power;

*B.2* and upgrade its position by imposing a AT to the ROTW country.

**C** Note that Allies in this victorious war can each apply the previous effects (excepted to break or reduce FR or AT of Allies in the same war).

#### IV.4.7 Activation of ROTW minors

**A** At the end of the diplomatic phase, a test is made for each ROTW minor to see whether it declares war against countries inside its territory.

*A.1* a ROTW minor may react against any or all countries having either troops (including LDE, forts of fortresses) or colonial establishment (COL or TP) inside its territory (the areas it owns and the provinces with its own colonial establishments).

*A.2* FR and AT may allow some troops and/or establishment inside the territory of a minor without triggering activation, as explained above.

*A.3* Leaders alone (with no troops) never cause minor activation.

**B** For each minor and each country that can cause activation of the minor, roll one die.

*B.1* If the roll is strictly smaller than the Activation level of the minor, it declares an oversea war against the offending country (and breaks an eventual AT or FR to NR).

*B.2* Otherwise, nothing happens.

*B.3* Activation levels are given in the Appendix (in the description of the minor) and recalled on the ROTW diplomatic track (on the ROTW map).

*B.4* Remember that for some countries (eg CHINA), the activation level may depend on the province where the troops or establishment are located.

*B.5* It is completely possible for a minor country to declare war this way against one offending country but not against another, even in the same turn. The test is made for each offending country separately (in decreasing order of initiative in case the order is relevant).

**C** Reactions after these declarations of war happen as usual.

**D** Activation of ROTW minor should not be confounded with activation of the natives.

*D.1* The former is the whole country declaring war, it is done in the diplomatic phase and result in diplomatic announcements.

*D.2* The later is local population reacting, it is done during each military round and does not cause a new war or change the diplomatic status. Moreover only one province is concerned each time.

*D.3* Colonial establishments usually do not cause native activation (the local population is rather happy to trade) while it may cause minor activation (the government is not happy to see its trade regulation broken by European).

*D.4* The same troop, however may both cause minor activation and native activation (and thus must roll both in the diplomatic phase and each military round as long as the condition for activation exists).

**Design note:** Since the activation happens at the end of the diplomatic phase, you have one attempt to get a good diplomatic status after landing troops. This typically occurs in two cases:

- At the end of a military phase, an emissary lands in a country. During the upcoming diplomacy phase, the emissary has one attempt to establish diplomatic status with the country before the troops he might have with him cause minor activation.
- During the event phase, a R/D causes the diplomatic status of a ROTW minor to decrease. You have one attempt to re-establish it before seeing your trade burnt to the ground (or more if by chance the minor is not activated this turn. . .)

#### IV.5 On wars

##### IV.5.1 How Wars Begin

Wars take place due to independent decisions of any player or players (announced during the Diplomatic phase) or may be started by events.

#### IV.5.1.1 Wars caused by events

**A** Some wars may be caused by events, offering a CB to some MAJ, or telling that some MIN declares a war.

**A.1** The description of political events may offer a CB to some countries. The CB that are described under the "Event Phase" part are used during the first step of the Diplomacy Phase, before formal Agreements are made and before private discussions are allowed. By order of Initiative, all players announce which declaration(s) of war allowed by events they use, or not.

**A.2** The reaction on wars breaking down this way are resolved at that time. Note that no new Formal Agreement could have been signed at this turn, but Alliances of a past turn are usable (they finish in the next segment only).

**A.3** If an event gives a CB under the "Diplomacy phase" part of the description, then the CB is used normally after discussion and other agreement, including new alliances.

**A.4** If an event gives several CB, all countries using these CB against common enemies are automatically allied for this war (only), unless the event specifically speaks of distinct wars being possible.

**B Wars continuing other wars** If a war should begin between two countries already at war against each other, the exact meaning of this depends on the nature of the war about to begin for the country declaring the war: mandatory, incompatible with other wars, or provoked by the country. Most events are mandatory; the other ones are explicitly mentioned in the event.

**B.1 Mandatory war** The new conditions of war described in the event are added to already existing conditions. A MAJ can announce at the diplomatic phase that an already running conflict becomes the new war. Calls for allies are made at this point (according to the conditions of the new war) because the war's motives change. The only thing that should be ignored is the initial declaration of war, since the country is already at war (a CB for this turn is deemed to have been used).

**B.2 Incompatibility** The new war can be made incompatible with wars between the two countries about to begin the new one. Usually, the event calls for a replacement event (the event did not happen at all, and another one is rolled for instead). However, a war with incompatibilities can be followed by a mandatory war.

**B.3 Controlled war** The new war is indicated as being controlled by a country. It may delay the event (which, as above, did not happen at all and is replaced by another one), or accept the event and apply it as if it were mandatory.

**B.4 Armistices** An Armistice may not be signed for an ongoing war that is transformed by either a controlled or a mandatory war.

#### IV.5.1.2 Wars by voluntary declarations

**A** Wars are also declared during the Diplomatic phase by the attacking player, in the fourth segment of the phase, after the segment of Announcements of Formal Agreements. No private negotiation is permitted between the Announcements and the Declarations of Wars.

**B** War using CB described under the section "Diplomacy Phase" of an event, has to be declared at that time.

**C** A whole segment of reactions following these declarations of wars is then made.

**D Restriction on Wars** A War is usually declared against an Alliance that is either a power currently at peace, or an Alliance already formed in an ongoing war.

**D.1** The only way to declare against only one power of a warring Alliance (instead of the whole Alliance) is if the attacker has a CB (either permanent or given by event, temporary CB are not enough) and uses it against this power.

#### IV.5.2 Casus Belli

**A** A Casus Belli (CB) allows declaring war by losing only 1 Stability level, without any loss of victory points (VP). CB are of two different types, permanent or temporary, and may be usual or free. Free CB allows declaring of wars without loss of Stability.

**B Temporary Casus Belli** The temporary CB is provided by events, or by the rules. Usually it may be used only once and is then cancelled; a temporary CB is valid for 6 turns, excepted if specified differently in the description of the CB. Some temporary CB are linked to the existence of a condition: the CB is valid as long as the condition is met; if the CB is used and the war terminates, the CB could still be valid if the condition is satisfied.

**C Permanent Casus Belli** Here are the permanent CB:

**C.1** Following the event event I-8 (1) (Reformation), all Catholic countries have a permanent CB against all Protestant countries (and vice versa). This is no longer valid after the end of *Religious Enmities*.

**C.2** HIS has a permanent CB against all Pagan or Muslim countries. This is no longer valid after 1700, included.

**C.3** TUR has a permanent CB against all Christian countries, against PERSIA, against ÆGYPTUS and against SYRIA. This is no longer valid after 1700, included.

**C.4** A player has a permanent CB against any country (player or minor) that has annexed a national province of the player.

#### IV.5.3 Cost of a War Declaration

**A** A declaration of war costs VP, as well as a loss of Stability, according to whether the player has a CB or not.

**B** Cost in Victory Points

**B.1** No VP: with CB

**B.2** -10 VP: without CB, against a player or a minor country vassal of a player.

**B.3** -5 VP: without CB, against a minor (except vassal minor country - see above).

**C** Cost in Stability

**C.1** none: with a Free CB.

**C.2** -1 level: with CB.

**C.3** -2 levels: without CB.

**C.4 Note** Cost in lost Stability may be altered by existing treaties and alliances between players, or also by event description. Especially, breaking and alliance (either defensive or offensive) costs 2 extra levels of Stability.

**D Wars and reduction of Trade** The war forces all belligerent players to refuse mutually the trade access to their market. This influences the calculation of their foreign trade income as follows:

**D.1** The European market value of each power is decreased by the amount of Income of the enemy player's provinces (including vassals).

**D.2** Other commercial income sources (commercial fleets, exotic resources, etc...) are not affected directly by the state of war.

**D.3** Note that this reduction of Trade does not affect the commercial fleet, as would do a Trade Refusal declaration (but a declaration for this effect can be added to the war).

#### IV.5.4 Overseas Wars

##### IV.5.4.1 Commercial and Overseas CB

**A** Some CB are obtained to wage a restricted kind of war that is called an *Overseas War*. They are called Commercial CB or Overseas CB and may be free, permanent or temporary as usual. Some events, or conditions in the rules, give other Commercial or Overseas CB, as indicated in their description.

**B** Overseas CB not coming from events

**B.1** TUR vs. all Christian countries in periods II and III;

**B.2** Permanent CB against any country that has the monopoly of the player's CTZ (be it a MAJ or a MIN);

**B.3** Permanent CB against any country that is in *Trade Refusal* against him;

**B.4** VEN vs. TUR (both ways) as long as the *BALKANS* are troubled;

<p>[R]82</p> <p>On wars</p> <p>B.5 HIS (before III-1 (1)), HOL, FRA, ANG have a permanent CB against owner of CC Atlantic;  B.6 HIS against powers having TP or COL in <b>SPANISH WORLD</b> (free) or in <b>CARIBBEAN</b>; (recall that <b>SPANISH WORLD</b> does not include <b>BRAZIL</b> and the islands)  B.7 Any Protestant country against HIS and POR (or PORTUGALLIA) during periods I to IV;  B.8 HOL against catholics having COL/TP in Asia in period III and IV after creation of the VOC;  B.9 All Christian countries have a permanent CB against the <i>Barbaresques</i> countries;  B.10 All MAJ have a permanent CB against minor countries from the ROTW (excepted ORMUS);  B.11 POR with a Vice-Roy, against ROTW minor countries (except ORMUS) (free CB).  <b>C</b> A Commercial/Overseas CB may be used to initiate an Overseas War. Declaring an Overseas War without a Commercial/Overseas CB is not allowed.  <b>D</b> When an Overseas War is declared, reactions caused by the war may be made as usual.</p> <p><b>IV.5.4.2 Permanent State of Overseas War</b></p> <p><b>A Barbaresque countries.</b> Barbaresque countries (XIV.13.1.3) (countries of the Barbary coast) are CYRENAICA, TRIPOLIS, TUNESIA, ALGERIA and MAURETANIA. They are always in a state of restricted Overseas War against every Christian countries.  A.1 It allow them to use Privateers and naval forces (no land forces) to attack Christian countries. Christian countries can use their own naval forces or <i>Præsidios</i> to fight against the Barbaresques.  A.2 As an exception, Privateers of the Barbaresque countries (XIV.13.1.3) may loot European provinces adjacent to the STZ they attack, even if they are European provinces usually outside the scope of Overseas Wars.  A.3 TUR plays the <i>Barbaresques</i> that are neutral, and the diplomatic patrons play those that are not. The specific rules tell the STZ that are attacked by the Privateer.  A.4 This state of war causes no loss of Stability.  A.5 <i>Reinforcements</i> They receive some reinforcements each turn: ALGERIA gains a <math>\text{P}\ominus</math> each turn; in periods I to III it receives also a <math>\text{NID}</math> or 2 <math>\text{NGID}</math> (player's choice) and in periods IV and after, only one <math>\text{NGID}</math> or a <math>\text{NDE}</math>. Other countries gain only a <math>\text{P}\ominus</math> 2 turns after their Privateer has been destroyed.  A.6 <i>Exception.</i> Whenever <i>Dragut</i> is in play and if it used in its Privateer leader role, a <math>\text{P}\ominus</math> of TUNESIA is raised (even if eliminated at previous turn).  A.7 <i>Mandatory Sea Sortie</i> The Privateers usually have to go out at sea each turn, except if their Patron decides against it: a test is made at the beginning of the 2nd round if the Privateer is not at sea, by rolling 1d10 for each country the Patron wants to keep the Privateer at port. This is permitted if the result is lower or equal to the number of the current period plus the Diplomatic status bonus and the geopolitical bonus.</p> <p><b>B The Knights.</b> The ORDO HOSPITALIS is always in a state of restricted Overseas War against TUR.  B.1 It allow them to use Privateer and naval forces (no land forces) to attack TUR. TUR can use their own naval forces to fight against them.  B.2 The diplomatic patron of the ORDO HOSPITALIS play this forces, or HIS if it is neutral.  B.3 The annexes specify the reinforcements gained by the ORDO HOSPITALIS each turn: a <math>\text{P}\ominus</math> (or <math>\oplus</math> if in <b>Rhodos</b>), and a <math>\text{NGID}</math> or a <math>\text{NDE}</math>.  B.4 This state of war does not cause automatic Stability loss at the end of turn. But, at each turn that the pirate of The Knights inflicts losses on Turkish commercial fleets, TUR loses at least 1 Stability level (that is, the Knights' privateer causes a loss of Stability if and only if TUR does not already loose Stability for another reason at the end of turn (war, revolts, . . . ))</p> <p><b>IV.5.4.3 Restriction in Overseas Wars</b></p> <p><b>A Reaction of the victim.</b> A country that has an Overseas war declared upon gains a temporary CB against the attacker to declare a regular war.</p>	<p>Diplomacy— master – 2016-04-14</p> <p>[R]83</p> <p>A.1 If/When this CB is used, the war changes and causes a whole new set of reactions allowed by this new full-blown war. The state of Overseas war is no more.  A.2 This CB can be used in reaction as a free CB on the first turn of the war, or as a normal CB to declare a full war on following turns (as long as the Overseas war continues).  <b>B</b> Reactions other than this case are restricted:  B.1 Calls of allies (Formal Alliance or Limited Alliance) are made as usual excepted that they give only Overseas CB;  B.2 No minor country may be involved completely in an Overseas war if it was not the victim of the war, or if it is not a VA of an involved MAJ;</p> <p><b>C The course of the war.</b>  C.1 Overseas wars can cause no military action on the European mainland (that is all land provinces on the European map), except provinces in Barbaresque countries (XIV.13.1.3), ÆGYPTUS and MESOPOTAMIA.  C.2 No trade refusal or reduction is applied (except if an added declaration of Trade Refusal is made by one country).  C.3 An Overseas War is not exactly a state of War for the power. If it is its only war, a MAJ would have to use the costs of Maintenance as if at peace.  C.4 Minor countries in EW cannot be called for a full intervention in the war.  C.5 In any other aspect, except when specified, an Overseas War is conducted as a regular war. For instance, any naval operation, attacks by Privateers, fights in the ROTW (COL, TP, in any provinces on the ROTW map) are allowed, as well as limited intervention of MIN.</p> <p><b>D Peace and Overseas wars.</b>  D.1 A minor country always accepts a proposed white peace to end an Overseas War at the end of a turn.  D.2 A peace treaty ending an Overseas War may not involved change of ownership of any province on the European map.  D.3 Transfer of TP (even <math>\ominus</math>) counts as a full province.  D.4 If an Overseas War is not finished at the end of a turn, the loss of Stability (due to this war) by involved countries is limited to 2 levels per turn (instead of 4).</p> <p><b>IV.5.5 Reactions to a Declaration of War</b></p> <p><b>IV.5.5.1 Generalities about Reactions</b></p> <p><b>A</b> On both segments allowing Declarations of wars, Reactions can be made by any power, after all initial Declarations of War. Going through in the order of initiative, and then circling again until no-one has anything left to declare, each power can make none, one, or several declarations in reaction.  A.1 Note that some reactions can only be made just following some initial declaration (usually a new war, or mere new conditions due to events) – at the same turn and segment; whereas others can be made spontaneously at any turn.  <b>B</b> Reactions immediately after a declaration of war  B.1 Call for help by a MIN at war of its Patron (this is done before other reactions of Major powers, see afterwards)  B.2 Call for a MAJ Ally (offensive if aggressor; defensive or offensive if attacked)  B.3 Use of an offensive or defensive alliance (even if not explicitly called by the ally – it cannot forbid it)  B.4 Signing an Alliance for Intervention (and thus declaration of limited intervention by a MAJ)  B.5 CB to transform an Overseas War into a full-blown war (free CB)  <b>C</b> Reactions at any turn  C.1 Begin/End a limited intervention of a MIN in MA, EC, EW or VA  C.2 Begin/End a limited intervention of a country from the ROTW with which one has AT  C.3 Call for full intervention of one of its own minor in EW; requires a test, not permitted in Overseas Wars (no further than 12 MP from the nearest enemy)  C.4 Full implication of one of its VA, no further than 12 MP or 4 sea zones from the nearest enemy fully involved</p>
--	---

<p>[R]84</p> <p>On wars</p> <p>C.5 Full implication of one of the VA of the enemy, no further than 12 MP or 4 sea zones from the nearest ally fully involved</p> <p>C.6 Association of two alliances at war against the same third alliance; not on the first turn of war of any of the alliances</p> <p>C.7 Declaration of War against an alliance that is at war against the same third alliance as the declaring country (this is done with a CB and is not allowed in Overseas Wars)</p> <p>C.8 Armistice in a war continuing from a previous turn</p> <p>C.9 CB to transform a continuing Overseas War into a full-blown war (normal CB)</p> <p>C.10 Foreign Intervention in a Religious War, or a Civil War</p> <p>C.11 Declaration of complete Trade Refusal against powers that are at war with the reacting power</p> <p><b>IV.5.5.2 Guidelines about successive declarations of wars.</b></p> <p><b>A</b> No new war can begin by reactions (excepted by reacting to a Trade Refusal). Reactions are mere extensions of an existing war. One can react after a reaction, broadening further the scope of the war.</p> <p><b>B</b> When a reaction puts a country in a war, this country has to join a whole alliance and its thus at war against every enemies of this alliance. If it is allied to countries in both sides of the war, it has to break one of the alliances.</p> <p><b>C</b> The sole possibilities to have multi-sided wars is then to have different wars involving the same country(ies). All country that join the alliance at war against several alliances at the same time will have to declare war against all those alliances.</p> <p>C.1 Conversely, entering the war at the side of an alliance B, when alliance A is at war against B and C, is a war only against A and the Neutrality is conserved regarding C, i.e. no co-operation, no supply, no passing through provinces controlled or occupied by the other alliance. Note that this situation gives a CB to alliances B and C against the other one, or on the contrary, they could declare that they ally together in this war.</p> <p>C.2 Three-sided wars (or more) where more than two alliances are at war against each other are allowed.</p> <p><b>IV.5.5.3 Signing an Alliance for Intervention</b></p> <p><b>A</b> Alliances for Intervention are signed in reaction to a declaration of war. Such an Alliance involves two Major powers, one at war and another one. The second country enters then the war in a limited intervention at the side of the alliance of the first power.</p> <p>A.1 This is a kind of alliance and the intervening power uses a CB given by the alliance to enter the war in this limited way: it loses 1 Stability.</p> <p>A.2 Usually, only a country that is victim of a declaration of war (even in reaction due to alliance, or by a minor country) can sign an Alliance for Intervention.</p> <p>A.3 Exception: ANG and PRU may always sign Alliances for Intervention with attacking countries.</p> <p>A.4 Signing an Alliance for Intervention is only possible on the first turn of a war (or new developments), except if written otherwise in some events.</p> <p>A.5 Limited intervention is forbidden in Religious or Civil Wars, excepted if the event explicitly says otherwise.</p> <p><b>B Conditions of a limited intervention of a MAJ.</b></p> <p>B.1 The power is not at war because of the intervention. It uses the costs of Maintenance at peace (if not involved in another war).</p> <p>B.2 The power can use up to one land stack and one naval stack to do anything as part of the war. Once a land or naval stack has been committed, no other land or naval (respectively) force of the power can be involved in this war. These forces are the only one that can move in provinces at war, attack, besiege, assault, do naval transport of forces at war, make a blocus, fight against Privateers, and so on. . . All conquests (including captured monarchs) are made for the sake of the alliance at war (he chooses one country, a MAJ is possible). All pillages made by his stack go in his TR.</p> <p>B.3 All other forces of the power doing a limited intervention are as if at peace. All provinces of the power are also not part of this war and only its forces can enter them.</p>	<p>Diplomacy— master – 2016-04-14</p> <p>[R]85</p> <p>B.4 Minor countries controlled by the power are not part of the intervention (this includes VA). Exception: see §C of section XIV.1.1 (English intervention in wars).</p> <p>B.5 A power can do limited interventions at the same time in more than one war. It cannot intervene on the side of enemy alliances.</p> <p><b>C Continuation of a limited intervention.</b></p> <p>C.1 After the Truces, if the war is still going on, any power of the enemy Alliance has first the possibility to declare Full war against the intervening Power, having a CB and paying 1 Stability to do so.</p> <p>C.2 Else, a limited intervention ends at the end of the turn, excepted if the power doing the intervention spends 1 Stability at the end of turn (after Stability improvement action), in addition to any other loss of Stability.</p> <p>C.3 If the intervention ends, the forces are redeployed as when signing a white peace. There is no gain of Stability.</p> <p>C.4 If the intervention continues, the power will be able to send reinforcements as long as those are stacked at the end of the first round with the intervening stacks.</p> <p>C.5 If the intervention continues, the enemy alliance has a free CB at the following Event Phase to declare a full war against the intervening power.</p> <p><b>Example: Alliance going into flames.—</b> It is turn 10. HIS, VEN and POL are allied in a holy Catholic league (defensive alliance) while TUR and FRA also have a defensive alliance. TUR decides to send the Levant convoy (see §B (Levant Convoy) of section VI.12.2.1 (The convoys)) to FRA, thus providing a commercial CB to VEN (who owns the Mediterranean centre of trade and thus believes he should get the convoy). VEN decides to use this CB (thus loosing 1 Stability). TUR reacts by turning the war into a full blown war, hoping to advance in the Balkans (no Stability lost as this is a free CB). Since VEN has now been victim of a declaration of war, the Doge calls his Polish allies (to protect the Balkans) and POL accepts and declares war on TUR (cost 1 Stability for POL). TUR then decides to call its minor VA, CRIMEA, fully into the war to chop on the Polish flank.</p> <p>In the West, HIS was not called into the war, however, <b>Carlos V</b> decides that this is a good opportunity to try and seize Tunis. Thus, HIS uses the CB provided by his alliance and declare war to TUR and then to its VA, TUNESIA (1 Stability lost). <b>François I<sup>er</sup></b>, always eager to harm the Hapsburg, then uses its alliance to react to the Spanish aggression by also declaring war. He'd like to declare war only on HIS but cannot as war must be declared against the full alliance, in this case VEN, HIS, POL (and maybe some minors allies). This cost him 1 Stability.</p> <p>HIS would then like to call for a full war his ally, PALATINATUS, in order to open a second front against FRA. However, PALATINATUS is only in EW. Since PALATINATUS is not adjacent to FRA but nonetheless less than 6 MP away, and HIS has no specific bonus on it, he must roll 6 or more on a die to successfully call it. HIS rolls 7 and PALATINATUS declares war on FRA.</p> <p>Back in the East, RUS believe that this could be an opportunity to weakens the Crimean. So, he react to the Turkish attack by signing an alliance for limited intervention with HIS, VEN and POL (cost 1 Stability).</p> <p>After Diplomatic actions on minors are made, both CAZAN and ASTRACAN are on the Turkish diplomatic track, thus TUR decides to call them for limited intervention in this full blown war (to defend CRIMEA).</p> <p>Both CRIMEA and PALATINATUS are fully at war. They will thus receive reinforcements in the upcoming administrative phase. On the other hand, CAZAN and ASTRACAN are only in limited intervention. They will only have their basic forces but are not part of the war (and thus cannot be entered by enemy troops). RUS is also not fully at war. He will use the (more expensive) peace maintenance cost and cannot send more than one stack in the war ; moreover all his conquests will be made for the behalf of another major (for example HIS), and count as his for peace purpose. But no enemy troops can enter Russia and besiege his fortresses.</p> <p>At the end of turn, RUS can choose to stop its intervention. In this case, Russian troops go back in Russia but the fortresses he has conquered are not given back to TUR (they are still controlled by HIS). Alternatively, RUS can choose to stay in intervention (loosing 1 Stability). In this case, at turn 11, TUR can choose to generalise the war and fully imply RUS in the war (with no Stability lost, this is a free CB to be used at the same time as CB provided by events). If this is done, this new declaration of war can causes a full new set of reactions. . .</p>
---	--

**Example: Three-sided wars.—** In 1700 (turn 42), event VI-1 (The Great Northern War) is rolled. As per event description, it provides both RUS and POL CB against SUE (plus some other conditions). Both RUS and POL separately decide to use them. So, there are two wars going on: RUS (and eventual allies) against SUE and POL (and allies) against SUE. However, Russian may not enter Poland or attack Polish troops and conversely as these countries are not in the same war. Swedish troops (and allies) can go both in Poland and Russia as SUE is at war against both. Note that if a Swedish fortress is besieged and taken by RUS, POL cannot later go and besiege it as this would be an attack against a Russian fortress. . .

In turn 43, the war is going on. Since there are two alliances (namely RUS and POL) at war against the same third alliance (SUE), they can do one of the following:

- Keep the wars separate and continue as the previous turn.
- Decide to join the wars. RUS and POL will then be allied for the duration of the war (only). They can now go in each other territory, stack troops together, . . . but must sign a peace together.
- Declare war one to another. The alliance (RUS or POL) declaring the war loses 1 Stability for this (normal CB). Then, there will be a three-sided war between SUE, RUS and POL. Each of them can go in each other territory, or attack each other troops. Polish troops can now besiege a Swedish fortress that was previously taken by RUS and, in case of success, the fortress will be controlled by POL (and count as such for peace). Three different peaces will need to be signed as there are 3 wars, each peace using specific differential for its own war. . .

#### IV.5.5.4 Armistice

**A** An armistice can be signed in any war that began in a previous turn (but not if it begins this turn, or has new conditions due to an event or a transformation from Overseas to full war). All powers in both enemy alliances has to agree the Armistice; if not, none is signed.

A.1 Usually, no Armistice is allowed in Religious or Civil Wars, excepted if the event says otherwise.

A.2 Some events call for mandatory Armistices: no one has to agree. . .

**B** The countries stay at war for the turn but can make no offensive action against the enemy alliance. All besieged provinces at the time of the Armistice has to be freed on the first round. Provinces that are controlled by the enemy stay so.

B.1 During the turn, it is forbidden to enter a province, COL or TP of the enemy that was not controlled at the beginning of the turn. Interception, siege, attack by naval units or privateers are also forbidden.

B.2 Use of *Præsidios* or *Strait fortifications*, however, is still allowed (as when the countries are at peace).

**C** At the end of the turn of the Armistice, if no peace is signed, the enemy alliances lose 1 Stability in addition to normal losses (after Stability improvement action), in replacement of the Stability losses normally caused by this war. Moreover, this turn will not be counted as a turn of war to compute the length of the war (and the Stability loss associated).

C.1 The countries are still considered at war for attempts of Stability improvement and maintenance.

#### IV.5.5.5 Religious Wars, Civil Wars

**A** Some wars caused by events are said Religious Wars, or Civil Wars. In a Religious War, any Major Power that shares the religion of one of the two sides may intervene in the war to help the side having the same religion. In a Civil War, any Major Power can intervene for one side or the other.

A.1 Those interventions are ruled by the Foreign Intervention (§B of this section) limits.

A.2 Several kinds of more important interventions (limited war or full war) may be allowed in the precise description of the event. Except for those allowed, interventions, any other kind of war or attempts to be involved in a Religious or Civil War implies the effects described in "Excessive Foreign Implication".

A.3 Exception: during event III-1 (1) (Revolt of the United Provinces), wars against HIS or HOL do not qualify as Excessive Foreign Implication if fought out of Holland and the Spanish Netherlands.

A.4 *List of Religious Wars.* **TODO:** Double- or triple-check the list of religious and civil wars. . .

event II-9 (War of the Schmalkaldic League), event III-D (Religious Wars in France), event III-1 (1) (Revolt of the United

Provinces), event III-1 (3) (League of Nassau), event IV-A (Thirty Years' War), event III-B (Religious War in Sweden), event III-C (Religious War in Poland), event III-15 (2) (The Time of Troubles in Russia), event IV-1 (1) (Bohemian Revolt), event IV-1 (2) (Revocation of the Truce of Augsburg), event IV-7 (1) (English Civil War), event IV-14 (Revolt of La Rochelle)

A.5 *List of Civil Wars.* event IV-16 (The Fronde), event IV-2 (2) (War for the Unity of the HRE), event IV-13 (2) (Agitation of the Swedish Nobles), event IV-7 (2) (The Parliament and the English Kings), event V-4 (The War of Spanish Succession), event V-3 (The Glorious Revolution in England), event VI-11 (War of Polish Succession), event VI-13 (War of Austrian Succession), event VI-4 (Jacobite Rebellion), event VI-14 (War of Succession in Kurland), event VII-13 (Revolt of Pugatchev), event VII-4 (War of Independence in the Colonies), event VII-5 (The French Revolution), event VII-2 (The War of Bavarian Succession).

A.6 Added to these lists, any War of Succession following a Dynastic Crisis becomes a Religious Civil War before the end of *Religious Enmities*, and a Civil War afterwards.

**B Foreign Intervention** Other countries may, without declaring a war on the country suffering the civil war, send units to fight in that country. In Religious Civil Wars, the intervention is necessarily on the side of a faction that shares same religion as that of the intervening player.

B.1 This Foreign Intervention is not a war (nor a declaration of war) and costs **1 Stability** for each intervention. It is announced as a reaction during the Diplomatic Phase.

B.2 This intervention is limited to a maximum of one land stack of at most one  $\Delta\oplus$ , and/or one  $\mathbb{F}$  counter per allied player. (i.e. per country, not group of countries). These forces are the only one that can move in provinces involved in the Religious/Civil War (including provinces of powers that are fully involved in the war); movements or campaigns in the ROTW is not allowed (excepted if the event says otherwise). All conquests are made for the sake of the side supported in the war. All pillages made by his stack go in his own TR.

B.3 Minor countries controlled by the power are not part of the intervention (this includes VA).

B.4 A power can do Foreign interventions at the same time in more than one war. It cannot intervene at the same time on the side of enemy alliances.

#### C Continuation of a Foreign Intervention.

C.1 A Foreign intervention ends at the end of the turn if no force of the Foreign power stays in a province at war.

C.2 If the Foreign Intervention continues, no reinforcement can be send in the war; no Stability is lost by the intervening power. It is possible to end an intervention and resumes is afterwards (see next point) so that new forces are sent.

C.3 A Foreign intervention can be resumed at any turn after it has ended but this costs **1 Stability** to the Foreign power intervening. In Civil Wars, the Foreign intervention could resume as an ally of the other side.

**D Excessive Foreign Implication.** No player can send more than one  $\Delta\oplus$  on the side of any one faction in such a war, if a limited or full intervention of his power is not allowed in the event.

D.1 If ever a power declares war on the country where the civil war rages, the civil war stops temporarily in a mandatory Armistice. The victim country may use units of both factions in his civil war to fight against the invader(s). In addition:

1. Revolts do not incur any Stability loss during excessive foreign interventions.
2. Rebel and loyal units may not collaborate (i.e. transport, stack and/or fight together).
3. If an Excessive Implication occurs, events concerning the same Civil War are still marked off but their application is suspended. On any following turn when the intervention is over, such already marked off events (during the above intervention turns) will occur in addition of regular events on a even roll of 1d10 (no more than 1 per turn).

D.2 However, the units of both factions are kept under the control of the victim country until the peace is signed with all foreign invaders.

D.3 Once the Excessive Implication is over, the civil war is resumed and the rebels receive reinforcements if they have lost 25% or more of their initial strength (proceed as per first turn of the civil war).

**Design note:** Excessive foreign intervention is not really meant to happen. If you start to think that it is often a good thing to do to achieve your goals, you're probably abusing some loophole in the rules. Typical games should not see more than one or two excessive foreign intervention (and most of the time, none should occur).

Typically, trying to use excessive foreign intervention to artificially lengthen a civil war, lower the Stability or your enemy or destroy loyal troops while keeping rebels alive to give them the edge are abuses.

Excessive foreign intervention should only arise when another event is rolled and call for a new war with a country already in civil war.

**TODO:** Add a (high) VP cost for EFI unless using a CB provided by event to dissuade players from abusing it ???  
-30VP should be enough to prevent abuses.

## IV.5.6 Call for ally by Minor countries

### IV.5.6.1 Generalities

**A** A minor country can be involved in various ways in a war:

A.1 Limited intervention, as per the previous rules; this intervention is possible in a war of its Patron if the diplomatic status is MA, EC, EW or VA;

A.2 Full intervention if it was declared war upon, or if it declares war. When a European minor country is fully involved in a war, no-one is allowed diplomacy action on it.

A.3 In Overseas wars, the intervention are of the same kinds, but constrained by the limits of Overseas wars.

**B** A minor country can declare a war in the following occasions:

B.1 Some events (including R/D);

B.2 A VA is fully involved by its Patron, as a reaction. This costs no additional Stability.

B.3 The country is in EW and its Patron tests for declaration of war by the minor country (as explained in section IV.3.3.5 (Entry in war)) and successes.

B.4 A country in the ROTW may declare an Overseas war due to reaction against European presence.

**C** A minor country can be declared war upon in the following occasions:

C.1 As a usual declaration of war (with, or without CB; sometimes caused by events);

C.2 If it is a VA, only as part of a declaration of war jointly against its controlling country ; or as a generalisation of the war against the patron.

C.3 If it is in limited intervention in a war and the enemy alliance decides to fully involve the minor country in the war (this is done in reaction).

**D** Note that some specific alliances are dealt with different rules. That is for instance the case of the alliance between HIS and minor HABSBURGUM, or of some alliances forced by events.

### IV.5.6.2 When a minor country is attacked

**A** A minor country that is attacked will call for some help according to the rules explained here. Those calls are the first reactions resolved, in a random order, before other kinds of reactions announced by Major powers.

**B If the minor country is Neutral.** The first power listed in the Appendix in the preference list, and that is not at war against the MIN, is called as an ally in the war.

B.1 The MAJ can refuse any help, in which case it plays the minor country but is by no means involved in this war and the MIN stays "Neutral";

B.2 If it accepts, he makes a limited intervention (as if signing an Alliance for Intervention) in the war, and the minor country is put in MA of the intervening power.

B.3 If the limited intervention ends before the war against the minor country, this is a break of alliance: it costs 2 Stability to the power breaking the alliance, and the MIN is put as "Neutral".

### C If the minor country is in RM or SUB.

C.1 The controlling power can refuse its help, in which case the diplomatic status is broken, the MIN is now "Neutral" and the previous situation is applied, ignoring the MAJ that just refused to help.

C.2 The controlling MAJ may accept to do a limited intervention (as if signing an Alliance for Intervention) in the war, and the minor country is put in MA of the intervening power.

C.3 If the limited intervention ends before the war against the minor country, this is a break of alliance: it costs 2 Stability to the power breaking the alliance, and the MIN is put as "Neutral".

C.4 The controlling MAJ may accept to do a full intervention in the war, that is to declare a war with a CB against the attacking alliance; the minor country is then put in EW of the MAJ.

### D If the minor country is in MA, EC, EW or AT (in ROTW).

D.1 The controlling power can refuse its help, in which case the diplomatic status is broken, the MIN is now "Neutral" and the previous situation is applied, ignoring the MAJ that just refused to help. If the status was EW or AT, the MAJ loses 1 Stability (for the breaking of this alliance).

D.2 The controlling MAJ may accept to do a limited intervention (as if signing an Alliance for Intervention) in the war, and the minor country is put in MA of the intervening power (or stays in AT in the ROTW).

D.3 If the limited intervention ends before the war against the minor country, this is a break of alliance: it costs 2 Stability to the power breaking the alliance, and the MIN is put as "Neutral".

D.4 The controlling MAJ may accept to do a full intervention in the war, that is to declare a war with a CB against the attacking alliance; the minor country is then put in EW of the MAJ (or stays in AT in the ROTW).

**E If the minor country is a VA or in AN.** The declaration of war is only possible jointly against the controlling power, or if a war against this power is already active.

**F** Note that in the frequent case where the MAJ is already at war when one minor country it controls is declared war upon, the existence of the existing war is sufficient to respond the alliance (and the minor is raised in EW if it had a lower status).

### IV.5.6.3 When a minor country is declaring war.

**A If the minor country is Neutral.** Excepted if an event says otherwise, the first power listed in the Annexe in the preference list that is not at war against the MIN, is called as an ally in the war.

A.1 The MAJ can refuse any help, in this case he will play the minor power, but he is by no means involved in this war and the MIN stays "Neutral";

A.2 If the MAJ accepts, he makes a limited intervention (as if signing an Alliance for Intervention) in the war, and the minor country is put in MA of the intervening power.

A.3 If the limited intervention ends before the war against the minor country, this is a break of alliance: it costs 2 Stability to the power breaking the alliance, and the MIN is put as "Neutral".

### B If the minor country is in RM or SUB.

B.1 The controlling power can refuse its help, in which case the diplomatic status is broken, the MIN is now "Neutral" and the previous situation is applied (ignoring the MAJ that just declined).

B.2 The controlling MAJ may accept to do a limited intervention (as if signing an Alliance for Intervention) in the war, and the minor country is put in MA of the intervening power.

B.3 If the limited intervention ends before the war against the minor country, this is a break of alliance: it costs 2 Stability to the power breaking the alliance, and the MIN is put as "Neutral".

### C If the minor country is in MA, EC, EW or AT (in ROTW).

C.1 The controlling power can refuse its help, in which case the diplomatic status is broken, the MIN is now "Neutral" and the previous situation is applied (ignoring the MAJ that just declined intervention). If the status was EW or AT, the MAJ loses 1 Stability (for the breaking of this alliance).

C.2 The controlling MAJ may accept to do a limited intervention (as if signing an Alliance for Intervention) in the war, and the minor country is put in MA of the intervening power (or stays in AT in the ROTW).

C.3 If the limited intervention ends before the war against the minor country, this is a break of alliance: it costs 2 Stability to the power breaking the alliance, and the MIN is put as "Neutral".

C.4 The controlling MAJ may accept to do a full intervention in the war, that is to declare a war with a CB against the attacking alliance; the minor country is then put in EW of the MAJ (or stays in AT in the ROTW).

**D If the minor country is a VA.** The declaration of war by a VA gives a free CB to the controlling power, to be used now (in reaction), or at any following turn as long as the war continues.

## IV.6 Conflicts against non-European

### IV.6.1 Generalities

**A Areas owned by minor countries.** The Natives in areas owned by minor countries in the ROTW, and the cities, can not be attacked by a power if it is not at war against the minor country. Exception: a reaction during the turn by Natives may cause battles in such a province without involvement of the minor country; in this case the power can continue to attack the Natives in this province until the end of the turn, but not the cities.

**B Wars in the ROTW.** An overseas war is sufficient to make a war against a country in ROTW, by definition of this kind of war.

B.1 Forces of a country in the ROTW may never go on the European map. They are deployed in any province they own (even if there is COL or TP or enemy forces; in the last case, an immediate battle happens before the first military round).

B.2 A country in the ROTW always receives fixed reinforcements each turn of limited or full war, as described in the Annexes. Those can only raise their force to the basic forces of the country.

B.3 If a minor country is at peace during one whole turn, its basic forces come back entirely.

B.4 The forces of a minor country are always in full supply in the provinces of owned areas, and use those provinces as supply sources if outside the area. A province where there is a TP/COL or a fort controlled by an enemy can not be used as supply source to go outside (but minor troops are still supplied within the province).

B.5 A country in the ROTW uses all the Natives that are in the areas that it controls. Natives are of moral "conscript" (exception: Natives in **JAPON** are "veteran") and are added to regular forces if there is any in the province. They never move. They will attack TP and COL in their provinces if they are at war against the owning country.

B.6 Natives and regular forces of minor countries can do "Native attack" in owned areas at the end of the turn to destroy COL or TP. Additionally, regular forces can burn down controlled TP as per normal rules (Natives cannot).

**C Areas with no minor countries.** Some areas are less organised: no minor country owns them. A European country can decide to attack Natives or cities in the corresponding provinces without being at war, with no declaration beforehand.

C.1 If Natives are attacked in a given province, they will continue to react (as defined afterwards) against the aggressor until the end of the turn.

C.2 To assault or besiege a city, a power has first to attack the Natives of the province (or they have to be already active).

**Design note:** By "less organised", we do not mean, of course, that areas such as South-East Asia or Indonesia were lacking states. Dai Viet, Ayutthaya, the sultanate of Borneo and other countries clearly exists. However, these countries were of a rather local importance and their relative strength and tolerance to the Europeans is directly represented by the values of the corresponding area. ROTW countries correspond to large empires such as China or the Mogols, with a large territorial base or a powerful army.

### IV.6.2 Reactions by countries in the ROTW

**A** At the end of the phase of event, a test of reaction is made in a country from the ROTW where one of the conditions is met:

A.1 there is a military force in one of its province (excepted if this force is in a foreign COL settled in the province, or if allowed by a FR or AT);

A.2 there is a European COL or TP that is not allowed by diplomatic status (or a special rule).

**B** The test is 1d10, compared to the Activation level of the country. If it is strictly lower, the minor country declares an Overseas war against any and all powers that satisfy one of the previous conditions.

B.1 List of the Activation levels:

9/3 MOGOLIS IMP. before/after event VI-17 (The Last of the Great Mughals)

9/11 CHINA and IAPONIA before/after subevent III-22 (1).α and subevent IV-22.α, except in newly conquered areas (6)

9 GUZARATE

8 IROQUOIS, SUDANIA

4 INCA, AZTECA, BISINAGAR

6 All others: SIBERIA, AYMAN, ADEN, MYSURIA, HYDERABADA, DURRANIS IMP., ORMUS

### IV.6.3 Reactions by Natives during the rounds

**A** At the end of each military round, before the sieges, a test of reaction is made in every province in the ROTW where there is a European military force that is

A.1 Neither in a COL of a European power;

A.2 Nor allowed by some FR or AT in this province by a minor country owning the area.

A.3 When a land stack moves also through a province where none of the two previous conditions hold, a test of reaction is also made before it leaves the province.

A.4 Finally some attempts of putting TP or COL in a province may cause an automatic reaction of the Natives, see §B of section VI.7.2.1 (Normal procedure) and §B (Critical failure) of section VI.7.3 (Trading posts).

**B** The test of reaction is resolved by rolling 1d10. If it is strictly inferior to the Tolerance level in the area, the Natives react. When the Tolerance is "-", no reaction can happen.

#### C Effect of a reaction.

C.1 The reaction is an attack of the Natives against the units that caused the reaction, and all units of the same country in the province (not area).

C.2 The attack is resolved immediately (as an interception if it is caused by a movement, or a regular battle if it is at the end of the round or due to botched TP/COL action).

C.3 The reaction last until the end of the turn and the Natives will attack any other force of the power causing the reaction that is in the province. Only one battle is possible each round (at the time of the first interception by reaction, or at the end of the round). Natives will then attack COL/TP owned by the power at the end of the turn. Note that if A has activated the Natives against him, and controls a fort or fortress of the side B who has not, the Natives would attack A and besiege its forces (attrition if A is withdrawn in the fortress) but would not attack a COL/TP owned by B (even if controlled by A) at the end of the turn.

C.4 If units of another player enter the province later in the turn, they can also provoke a reaction of the Natives against them.

# Incomes

## Chapter V

## V.1 Incomes

**A Overview** The Income segment of the administrative phase is detailed here. It is played mostly independently (the only information that one may need from the other players is their *Gross Land Income* if they are at war or doing Trade Refusal). Each player will compute the income of their country, coming from various sources. All this is summed up to form their new RT. It helps to refer to the *Economic Record Sheet (B)* included in this chapter to understand everything. The *Economic Record Sheet (B)* serves as a register for all financial operations of the country. The RT and on-going loans are stored (and computed) on the other ERS (A and C).

Computation of income is only the first segment of the administrative phase. However, it is separated from the rest of the phase for clarity.

Part of the income is differed (gold form ROTW, Convoys, Exceptional taxes) and only perceived at the end of the turn (usually with some hazards on the way). They are however briefly described here in order to have all the income sources together. Check the corresponding Chapters for a complete definition of these incomes.

## V.2 Land income

**A** The player registers three kinds of land income:

- The income of all his provinces in line **B1** (Provinces income) of *ERS*;
- The income of all the provinces of his vassal minor countries in line **B2** (Vassal provinces income) of *ERS*;
- In negative, all the provinces (either his of his vassals') that are inexploitable (due to revolts, military occupation, looting, enemy control, or corrupted pashas) are recorded in line **B3** (Occupation, Pillages, Revolts) of *ERS*.
- Some random events (e.g. event E-4 (Agricultural crisis)) mark their gains or losses in line **B4** (Event) of *ERS*.

A.1 The sum of all this is the *Land Income*, and goes in line **B5** (Land income) of *ERS*.

**TODO:** Add partial ERS to the examples.

**Example:** All along, the examples will details the income phase of the first turn for POR.

At the beginning of turn 1, POR owns the provinces of **Trás-os-Montes** (income 5), **Beira** (3), **Tejo** (6), **Alentejo** (6), **Algarve** (5), **Tânger** (2) and **Açores** (2) (counted as an European province even if located on the ROTW map). Thus, its Provinces incomes is 29  $\text{D}$ , written in line **B1**.

At the beginning of the game, POR has no minor ally, especially no VA and no Vassal provinces income. However, since the Diplomatic phase occurs before the income segment, it is possible that a lucky Diplomatic action succeeded in getting POR a VA. This is unlikely and we'll suppose it did not happen. So POR has no Vassal provinces income and can leave line **B2** empty (or write 0 in it, but leaving it empty is usually more readable).

Let's suppose that the events of turn 1 resulted in a revolt in **Beira**. Then POR write -3 in line . Notice that it is easier to do this count in negative because the content of line **B1** will usually be the same every turn (except when one annexes or loses provinces) while the revolts change almost every turn. This avoid tedious recomputation of incomes each turn.

Thus, the Land income of POR is  $29+0-3=26$  \$, written in line **B5**.

[illegible]

### V.3 Industrial income

#### V.3.1 Manufactures

**A** Manufactures represent industries of all types developed by the player (triangular-shaped counters).

**B** The manufactures all have a *fixed income*.

B.1 The sum of all the incomes of the manufactures goes in line **B6** (Manufactures val.) of *ERS*

B.2 The income of resources exploited by various manufactures (fishing, salt) is not recorded here.

B.3 A MNU brings no income if the province it is located also brings no income (due to military occupation, revolt, pillage, corrupted pashas, . . .)

**C** All manufactures bring other advantages than their incomes.

C.1 If there is a \* on the counter (*Metal*, *Instruments* and *Art* manufactures), only one such MNU per country provides the bonus (that is, only consider the MNU of this type of higher level).

C.2 Otherwise, the advantage is summed for all manufactures of this type.

C.3 Quick summary of the advantages: *Metal* MNU enhance land technology research ; *Instruments* MNU enhance naval technology research ; *Art* MNU help increase Stability; *Cloth* and *Wine* MNU increase the income from foreign trade ; *Cereals* MNU increase the income from domestic trade ; *Salt*, *Fish* and *Wood* MNU produce resources of Salt, Fish or Wood.

**Example:** At turn 1, POR has two MNU. The *Instruments* MNU in *Tejo* has an income of 7  $\text{€}$  while the *Wine* MNU in *Trás-os-Montes* has an of 4  $\text{€}$ .

Since none of them are in the revolted province of *Beira*, both provide their income. Thus, the income is  $7+4=11$   $\text{€}$  (written in line **B6**).

#### V.3.2 European Gold

**A** Each European mine brings a fixed income of 20  $\text{€}$  as long as that mine is not depleted (this may happen following event E-26 (Depletion of a mine)). The European mine income is registered on line **B7** (European mines) of *ERS*.

A.1 A mine brings no income if the province it is located also brings no income (due to military occupation, revolt, pillage, corrupted pashas, . . .)

**B** The income of mines located outside of Europe is processed separately, because it has to be repatriated to Europe before it can be credited to the player's treasury.

B.1 *Exception: Elmina*. If POR is a major country and owns a TP in *CÔTE D'OR*, it exploits two gold mines as European mines (for a total of 40  $\text{€}$ ). Destruction or loss of ownership of this TP definitely cancels this effect.

**Example:** As per Specific rules, POR can exploit two gold mines in *Elmina* as if it were European gold (see above and section XIV.4.1.5 (The African gold)). Thus, its European mines income is 40  $\text{€}$  (20  $\text{€}$  per mine), recorded in line **B7**.

#### V.3.3 Industrial income

**A** The sum of all these incomes is put in line **B8** (Industrial income) of *ERS*.

**Example:** The Industrial income of POR is  $11+40=51$   $\text{€}$ .

### V.4 Trade income

#### V.4.1 Domestic trade

**A** The Domestic Trade is computed by cross-indexing the *Total provinces Income* (the sum of line **B1** of *ERS* and line **B2** of *ERS*, that is the province income of both the country and its vassals without considering pillages, revolts, military occupation or other hazards) added to bonuses provided by MNU against the DTI of the country in table V.1 (Domestic Trade Income).

A.1 Each level of *Cereals* MNU owned by the country adds 20  $\text{€}$  to the *Total provinces Income* for this computation only.

A.2 The result is put in line **B9** (Domestic trade income) of *ERS*.

Land Income+?	DTI				
	1	2	3	4	5
1–40	1	2	3	4	5
41–80	3	6	9	12	15
81–120	5	10	15	20	25
121–160	7	14	21	28	35
161–190	9	18	27	36	45
191–220	12	24	36	48	60
221–240	15	30	45	60	75
241–250	18	36	54	72	90
≥251	20	40	60	80	100

?=+20  $\text{€}$  × sides of *Cereals* MNU

Table V.1: Domestic Trade Income

**Example:** The *Total provinces income* of POR is  $29+0=29$   $\text{€}$  (the revolt in *Beira* does not change it). Since POR has no *Cereals* MNU, it stays unchanged. Thus, POR will look in line 1–40.

The DTI of POR is 3, so POR looks in column 3, the result is 3  $\text{€}$  written in line **B9**.

Notice that if POR decide to build a *Cereals* MNU (and succeed), its Land income would become  $29+20=49$   $\text{€}$  (for this computation) allowing it to look in the second line (41–80) for a total of 9  $\text{€}$ . So, in addition to its fixed and variable incomes, this MNU would bring 6  $\text{€}$  of Domestic trade income each turn and will quickly refund itself. . . (it may, however, not be the best strategic choice to do immediately).

#### V.4.2 Foreign trade

**A** The Foreign Trade is computed according to the *Blocked trade* and the FTI of the country.

**B** Each country has a *Basic blocked trade* (corresponding to its Domestic market), expressed below table V.2 (Foreign Trade Income).

B.1 For some countries, this is fixed and for some other it depends on the provinces owned.

B.2 Note: countries not mentioned (POL, POR, PRU, VEN) have a *Basic blocked trade* of 0  $\text{€}$ . RUS also has a *Basic blocked trade* of 0  $\text{€}$  before it fulfils the condition indicated in the table.

**C** Each country has an *Extra blocked trade* which is the sum of its vassals income, trade refusal (including due to wars) and some other events.

C.1 The *Extra blocked trade only* is reduced by 50  $\text{€}$  for each side of *Wine* or *Cloth* MNU owned by the country (thus 100  $\text{€}$  for a level 2 MNU).

C.2 The *Extra blocked trade* can never be reduced below 0.

D The sum of the *Basic blocked trade* and the *Extra blocked trade* is the *Blocked trade*.

D.1 Note that the *Basic blocked trade* is never reduced. Thus, the *Blocked trade* will always be at least equal to the *Basic blocked trade*.

D.2 Locate the line corresponding to the *Blocked trade* in table V.2 (Foreign Trade Income).

D.3 For each UNITED STATES that exists and is at peace, go up one line in the table (several UNITED STATES may be created as result of revolts in the colonies of other countries than ANG).

D.4 Cross-referencing the line for the *Blocked trade* with the column corresponding to the FTI of the country gives the *Foreign trade income*, to be put in line **B10** (Foreign trade income) of *ERS*.

Blocked Trade	1	2	3	4	5
≤49	30	60	90	120	150
50-99	27	54	81	108	135
100-149	24	48	72	96	120
150-199	21	42	63	84	105
200-299	18	36	54	72	90
300-399	15	30	45	60	75
400-549	12	24	36	48	60
550-699	9	18	27	36	45
700-899	6	12	18	24	30
900-1099	3	6	9	12	15
≥1100	1	2	3	4	5

**Basic blocked trade per country:** FRA 200 ₮/ ANG 100 ₮/ HOL, SUE 50 ₮

HIS 50 ₮, or 100 ₮ if owns 2 of: BURGUNDIA, SICILIE, HOLLANDIA  
 AUS 50 ₮, or 100 ₮ if owns 2 of: BURGUNDIA, BOHEMIA, HUNGARIA  
 RUS 50 ₮ if owns 3 Khanates (or Cossacks) countries  
 TUR 100 ₮, or 200 ₮ if owns 2 of: HUNGARIA, SYRIA, ÆGYPTUS

NB: a country is owned when half (round up) its provinces are owned.

**Extra blocked trade:** Vassals, Trade refusals, wars, events.

*Wine* and *Cloth* MNU: reduces extra blocked trade by 50 ₮ × sides

If UNITED STATES exists and is at peace, up one line in the table

Table V.2: Foreign Trade Income

**Example:** POR has a Basic blocked trade of 0. Let's suppose it declared war on MAURETANIA on turn 1 and TUR chose to defend MAURETANIA ... Then MAURETANIA is refusing trade to POR, creating an Extra blocked trade of 12 ₮ (the sum of the incomes of its provinces). Similarly, TUR refuses trade to POR creating an Extra blocked trade of 88 ₮. The total Extra blocked trade of POR is 12+88=100 ₮.

However, POR has a *Wine* MNU of level 1. This allows it to reduce its Extra blocked trade by 50 ₮ for a final value of 100-50=50 ₮.

The Blocked trade of POR is 0+50=50 ₮, so it will look its Foreign trade income in the second line of the table (50-99). Its FTI is 2 (never use special FTI here), so POR looks in the second column and find the result of 54 ₮ for its Foreign trade income, written in line **B10**.

What happens with TUR? At turn 1, it has a Basic blocked trade of 100 ₮. POR creates an Extra blocked trade of 29 ₮. Even if TUR had a *Cloth* MNU (this is not the case at turn 1), it would only reduce the Extra blocked trade by 50 ₮. So it will actually reduce it by 29 ₮ and the extra 21 ₮ of bonus would be lost.

## V.4.3 Commercial fleets

### V.4.3.1 Trading zones

A Each TF bears a letter for identification and has a level between 1 and 6 recorded in the *Commercial fleet table* situated on bottom left of the *Colonial record sheet*.

A.1 The counter is to be placed on its ⊕ side if the level is between 4 and 6, on its ⊖ side otherwise.

A.2 Counters are placed in a CTZ or a STZ. Each country can have only one TF per CTZ or STZ.

A.3 For easy reference, a global Trade fleet sheet is also provided to record the level of each country in each sea zone. It is best kept by a player with heavy commercial activity (POR, HOL or ANG, usually).

B A commercial fleet in a STZ brings an income of 1 ₮ per level.

B.1 A commercial fleet in a CTZ brings an income of 2 ₮ per level

B.2 *Exception: Baltic* Each level of TF in STZ **Baltique** brings an income of 2 ₮, as if it were a CTZ.

B.3 These incomes are reported in line **B11** (STZ+CTZ level income) of *ERS*.

**Design note:** There is no CTZ for Sweden, Poland and Prussia, that went through the Baltic Sea for their trade. However, there was an intense flux of merchandise going through this area.

**Example:** At turn 1, POR has a TF of level 3 in STZ **Mer des Canaries**, bringing 3 ₮ of Level income (1 ₮ per level in STZ) and a TF of level 1 in STZ **Golfe de Guinée** for another 1 ₮ of Level income. So, its total STZ+CTZ level income is 3+1=4 ₮ written in line **B11**.

### V.4.3.2 Monopolies

A If in any CTZ or STZ, a country has a TF of level 6, it has a *total monopoly* and can register the sum inscribed in large print in the CTZ or STZ symbol in line **B12** (STZ+CTZ monopoly income) of *ERS*.

A.1 Note that in this case, no other country may have a TF in this CTZ or STZ. See section VI.8.2 (Competitions).

B Otherwise, if it has a TF⊕, it has a *partial monopoly* and can register half the sum inscribed in large print in the CTZ or STZ symbol in line **B12** of *ERS* (round down).

B.1 Only one country may have a TF⊕ in a given CTZ or STZ. See section VI.8.2 (Competitions).

C For each CTZ or STZ where a country has a TF⊖, it can register the sum inscribed in small print in the CTZ or STZ symbol in line **B12** of *ERS*.

C.1 This sum is usually 1/10<sup>th</sup> of the large sum, or 1/5<sup>th</sup> on the ROTW map.

D Players also register the **number** of partial and total monopolies they have in Trade Zones as these bring VPs. This is recorded in line **B13** (Partial/Total monopolies (trade)) of *ERS*. This is used for VPs computation.

**Example:** POR has no monopoly. However, it has TF in two STZ and still gets a presence bonus equal to the number in small print in these STZ. For STZ **Mer des Canaries**, this is 4 ₮ while for STZ **Golfe de Guinée**, this is 3 ₮. Thus, its STZ+CTZ monopoly income is 4+3=7 ₮ written in line **B12**.

Since it has no monopolies, it has nothing to write in line **B13**

## V.4.4 Trade centres and convoys

### V.4.4.1 Trade centres

A Trade centres represent the main hubs of trade in selected areas of the World. They are given to the country dominating the trade in these areas (usually by having more TF) and bring a substantial income. Trade centres must be located in a province of the owning country.

B There are four *Trade Centres*, marked by counters: *Great Orient*, *Atlantic*, *Mediterranean* and *Indian*.

B.1 Position of the Trade Centres change during the Interphase (at the end of turn). However, we remind here how they are attributed. See section XII.2 (Trade centres) for details.

**C** The initial positions are **Nil** for the *Great Orient* centre, **Veneto** for the *Mediterranean* centre, **Vlaanderen** for the *Atlantic* centre and **Diğ** for the *Indian* centre.

**D** If the province in which the Trade Centre is located is militarily occupied, the trade centre does not bring any income this turn.

*D.1* Revolts, pashas, pillages or other hazards do not impact the Trade Centres income.

#### V.4.4.2 The Great Orient centre

**A** The *Great Orient* centre is initially located in **Nil** and moves to **İzmir** as soon as **Nil** is not own by **ÆGYPTUS** (usually at the time of conquest by TUR).

**B** The income of the *Great Orient* centre is 100 ₪, plus modifiers.

*B.1* 10 ₪ are added for every complete group of 3 non-European COL or TP counters (any side).

*B.2* Exception: If a minor is giving its colonial income to a Christian major other than VEN due to §B of section IV.4.4.5 (Guzarate, Ayman, Aden, Aceh), do not count its establishments as non-European ones (don't count them as European ones either).

*B.3* 10 ₪ are subtracted per complete set of 5 COL or TP counters (any side) in **ASIA** (except **SIBERIA**) of a Christian player (all but TUR).

*B.4* 10 ₪ are added for Muslim control of **Ormuz**; 10 ₪ for **Soqotra**; and 10 ₪ for either **S. Malacca** or **Central Sumatra**. For these rule, these provinces are considered controlled, in decreasing order of precedence by (i) a major (other than VEN) having a AT with a country with a COL/TP in the province ; (ii) any country (major or minor) having a COL/TP in the province ; (iii) Muslim controlled if the province is empty.

*B.5* 10 ₪ are subtracted per Christian TF counter (any side) in STZ **Mer d'Arabie** and STZ **Océan Indien**, with maximum of -50 ₪.

*B.6* 50 ₪ are subtracted if TUR and PERSIA are at war.

*B.7* It can never be negative. At worse, it becomes 0 ₪.

*B.8* Therefore, the income at turn 1 of the *Great Orient* centre is 170 ₪, since there are 10 TP of GUZARATE, 1 TP and 1 COL of ADEN and 1 COL of AYMAN and the 3 straits are controlled by Muslims (GUZARATE for **S. Malacca** and **Ormuz** and empty for **Soqotra**).

*B.9* Notice that if POR signs an AT with ADEN, then its COL and TP are not counted as “non-European” anymore (without being counted as “Christian”), thus there will only be 11 non-European establishment instead of 13 and the income of the centre will drop to 160 ₪.

*B.10* This income is registered in line **B14** (Trade centres income) of ERS of the country owning the centre.

*All along the 16th century, there was a commercial (and sometime military) fight to bring the goods from Orient (pepper and other spices, silk, . . . ) to Europe. The historical road went mostly through land with the Silk road from China and the indo-arab trade in the Red sea. Portuguese opened a sea road going round Africa.*

*The land road went through Egypt and Turkey, both of them raising heavy taxes on this trade represented by the Trade centre income. Venice was principally in charge of distributing it in the Mediterranean, again with heavy profit, thus building its commercial empire.*

*As soon as Christian found a new road for these good, they try to get rid of the Turks and Venetian in between. Portuguese, then Dutch and English merchant seized the spice trade.*

*Thus, the “land road” income decrease with the number of Christian establishment buying or producing goods and sending them to Europe along the “sea road”. Venice is an exception to this because it still wanted to use the “land road” rather than the “sea road”. Minor countries tend to keep the old (land) road except if they have specific agreement with majors. Controlling the straits also allows to control the trade.*

*The growth of the “sea road” is reflected in the appearance of the East Indies convoy described after the Trade centres.*

**C** As long as the *Great Orient* centre is in **Nil**:

*C.1* One half of its income is gained by **ÆGYPTUS** if at war ; or VEN otherwise.

*C.2* The other half is gained by SYRIA if at war ; or TUR if SYRIA is either conquered or not at war and on the turkish diplomatic track.

**D** The *Great Orient* centre moves to TUR when **ÆGYPTUS** is conquered.

#### V.4.4.3 Atlantic, Mediterranean and Indian Ocean centres

**A** The Atlantic and the Mediterranean trade centres bring a fixed income to their owner of 100 ₪.

*A.1* The Indian Ocean trade centre brings a fixed income to its owner of 50 ₪.

*A.2* They are given to the country having the most levels of TF in the corresponding STZ and CTZ. See section XII.2 (Trade centres) for details.

*A.3* This income is registered in line **B14** of ERS.

#### V.4.4.4 Trade centres losses

**A** “*Guerre de course*” is not reliable for a country which is dominating trade in a region as privateers are likely to turn against the most numerous vessels rather than against the sparser enemy ships.

**B** If a IP belonging to a country allied with the owner of a Trade centre (including the owner himself) causes permanent losses on an enemy TF in a STZ or CTZ belonging to this centre, then the income of the centre is decreased by 10 ₪ per permanent loss caused for the next turn.

*B.1* See section IX.3 (Attacks by Pirates & Privateers) for details.

**C** This loss is recorded (in negative) in line **B15** (Trade centre losses) of ERS.

#### V.4.4.5 Convoys

**A** Convoys represent heavy trade of specific resources (gold or spices). They are given to the country dominating trade in this resource (usually by exploiting most of it). They do not bring income per se but must be brought back to Europe where the gold they carry can be unloaded. However, the journey can be dangerous and convoys can be attacked and seized by pirates, privateers or enemy fleet.

*A.1* Convoys are not taken into account during the Income segment. However, they do bring income at the end of turn (especially the Spanish gold fleets) so we remind here how they are attributed.

**B** There are four possible convoys: the *Levant* fleet of İzmir, the *East Indies* convoy, the *Flota de Oro*, and the *Flota del Perú*.

*B.1* Convoys are attributed during the Interphase.

*B.2* Each convoy represent a certain number of ships carrying gold. During the Military phase they must be moved toward Europe and can be attacked by IP or enemy F.

*B.3* When a convoy safely reaches Europe, its gold is unloaded into the country's RT (line **A10** (Gold from ROTW and Convoys) of ERS).

**C** The *Flota de Oro* and *Flota del Perú* convoys are given to HIS when it exploits sufficiently many gold in **AMERICA**.

**D** The *Levant* convoy is given to TUR as soon as it owns the *Great Orient* trade centre. TUR must send it to another player each turn.

**E** The *East Indies* convoy is given to the country who exploits the most of the following resources: *Silk*, *Product of Orient* and *Spices* if it exploits at least 10 of them.

#### V.4.5 Trade income

**A** The sum of all these incomes is put in line **B16** (Trade income) of ERS.

**Example:** POR does not own any Trade centre at the beginning of the game, so it has nothing to write in lines **B14** and **B15**. Thus, its Trade income is  $3+54+4+7+0-0=68$  ₪ written in line **B16**.

## V.5 Colonial income

### V.5.1 Colonies & Trading-posts

**A** Each COL brings an income registered in line **B17** (Colonies) of ERS:

A.1 A COL $\ominus$  brings 1  $\text{₮}$  per level, and as many  $\text{₮}$  as the income value of the Area (first number, see section I.1.6 (ROTW provinces)).

A.2 A COL $\oplus$  brings 1  $\text{₮}$  per level, and twice the income value of the Area.

A.3 However, COL exploiting gold do not provide income. See §A.4 of section V.5.3 (ROTW gold).

**B** Each TP brings an income registered in line **B18** (Trading posts) of ERS:

B.1 A TP $\ominus$  brings 1  $\text{₮}$ .

B.2 A TP $\oplus$  brings 2  $\text{₮}$ .

**C** COL and TP do not bring any income if they are pillaged, revolted or military occupied.

**D** [BLP] If the path between a COL or TP and Europe goes through a Fortified strait, the controller of the Strait may choose to close it.

D.1 This has to be announced in the Diplomatic phase. This immediately gives an Overseas CB to the owner of the establishment.

D.2 Establishment behind closed Straits do not bring any income this turn. Neither regular income or resource income.

**Example:** At turn 1, POR has a COL of level 3 in **Cabo Verde** bringing an income of 3 (level) + 1 (one time the income of the **CABO VERDE** area) = 4  $\text{₮}$  written in line **B17**.

It has a TP of level 3 in **Elmina**, bringing an income of 1  $\text{₮}$  (it is side  $\ominus$  and the income of **CÔTE D'OR** is not taken into account for TP) written in line **B18**.

### V.5.2 Exotic resources

**A** COL and TP, as well as certain MNU in Europe can exploit a limited number of exotic resources.

A.1 The income of the exotic resources is the product of the number of exploited resources of each kind, multiplied by the price of each resource (computed as per section VI.12.1 (Price of exotic resources))

A.2 This is recorded in line **B19** (Exotic resources) of ERS.

A.3 Players exploiting sufficiently many resource can speculate to try and increase the price. See §E (Speculation) of section VI.12.1.2 (Variation of price).

**Example:** At turn 1, the TP in **Elmina** can exploit 3 **Slaves** as it is level 3 (and does so even if it produces gold as per Portuguese special rule). The initial price of **Slaves** is 2  $\text{₮}$ , so POR gains  $3 \times 2 = 6$   $\text{₮}$ , written in **B19**.

**B Manufactures** MNU can have only 2 levels per counter.

B.1 A Fishery (**Fish** MNU) may only be built in a coastal province. It exploits as many **Fish** as its level (1 or 2).

B.2 A Salter (**Salt** MNU) may only be built in a province with **Salt** resource (the number indicating the quantity).

B.3 A Salter of level 1 exploits 1 **Salt**.

B.4 A Salter of level 2 exploits all **Salt** from the province (up to 3).

B.5 **Exception:** A Venetian Salter of level 2 in **Veneto** exploits all the **Salt** from Venetian coastal provinces.

**C Square resources.**

C.1 In **ASIA**, it requires 3 TP levels or 2 COL levels to exploit 1 unit of **Sugar**, **Cotton** or **Products of America**, without need for Slaves.

C.2 Outside of **ASIA**, it requires 2 COL levels to exploit 1 unit of **Sugar**, **Cotton** or **Products of America**. Furthermore, those resources are subject to the need of Slaves in **AMERICA** (see §L (Slaves and plantations) of this section).

**D Fish.** It requires 1 COL level to exploit 1 unit of **Fish**.

**E Fur.**

E.1 Each TP level can exploit up to 2 units of **Fur**.

E.2 A COL can exploit all the **Fur** in an Area. However, each COL $\oplus$  in the Area reduces the number of available **Fur** by 1 unit.

**F Circled resources.** For all other resources (**Products of Orient**, **Salt**, **Silk**, **Slaves**, **Spices**), one level of COL or of TP exploits up to 1 unit of the resource.

**G Gold.** See §A.4 of section V.5.3 (ROTW gold) if there is a gold mine in the province where a COL is.

**H Wood.** **Wood** does not bring income as other resources, but it brings advantages in naval constructions and can be sold to other countries. See section II.8.4 (Trade of Wood) for exploiting and selling **Wood** and §G (Effect of Wood.) of section VII.2.1 (Basic forces) and §B (Increasing the limit) of section VII.3.3.1 (Naval recruitment in Europe) for the effects of **Wood**.

I A ROTW minor country will exploit resources if and only if it has TP or COL to exploit them, following the same rules as major countries.

**J Exotic resources** on the ROTW map are shared for a whole Area (see section I.1.6 (ROTW provinces)); if there is only two resources of Spices in an Area, two outposts in different provinces of the same Area will have to share the exploitation.

J.1 If there is disagreement for the exploitation of resources, this is settled through the *competition mechanism* (section VI.8.2 (Competitions)), that eliminates levels until there can no more be disagreement.

J.2 Note, however, that the right to exploit a resource may change only if there is a change of situation in the Area (new level of establishment, a country announce that it stop its exploitation, . . . )

**K New exploitation** There are only a few cases where there might be a disagreement for the exploitation of a resource: a new resource appeared (through events, because of competition or military intervention in the previous turn, because it is one of the resources that appear late), or the number of levels available to exploit the resource changed in this turn.

K.1 Those two cases will lead to *automatic competition*. At the end of the administrative phase, a *competition* will take place until there are enough resources (or no more enough levels) for everybody to be satisfied with the current attribution of resources.

K.2 If the whole market in an Area is already attributed, there is no *automatic competition*. The players have to spend *competition actions* (see section VI.8.2 (Competitions)) to change the market repartition, or do it through the use of diplomacy (exotic resources exploitation can change in the Diplomatic phase by a simple announce).

**L Slaves and plantations** Some resources require **Slaves** to be exploited in plantations in **AMERICA** (the square ones: **Sugar**, **Products of America** and **Cotton**). At least 1 unit of exploited Slaves is required for each unit of exploited resource requiring slavery.

L.1 *Triangular trade* These units of **Slaves** can come either from the same country exploiting it (and gaining income both for the **Slave** and the other resource), from another major selling its **Slaves**, from minors allies or from contraband.

L.2 *Reselling of slaves* If a major country wants too sell part of its **Slaves** production, it is free to do so at any price. He must perceive the sum during the diplomatic phase (written in line **A4** of ERS). However, the sold **Slave** units cannot be used in his own plantations (obviously).

L.3 *Contraband of slaves* If a country has at least one level of TF in STZ **Mer d'Arabie** or STZ **Golfe de Guinée**, or if another MAJ in this position gives him this right, he can use the contraband of **Slaves** for his colonies. He receives only half the usual income (round down for each unit of the resource) for the exotic resources exploited with contraband **Slaves**.

**L.4 International contraband** If a country needs **Slaves** but does not fill the conditions above, it still can use the contraband of **Slaves**, but he will receive no income for the exotic resources exploited that way. The resources, however, are considered exploited for price variation purpose (it is not possible to “hold back” exploitation).

**L.5 Slaves of allies** Minor countries can sell for free the **Slaves** they exploit to their Diplomatic patron (e.g. PORTUGALLIA during event III-7 (Annexation of Portugal by Spain)).

**L.6** Note that **Slaves** always bring income to the country that produce them. The sale of **Slaves** happens independently of this income and does not change it.

**M** Players also register the **number** of partial and total monopolies they have in Trade Zones as these bring VPs. This is recorded in line **B20** (Partial/Total monopolies (resources)) of ERS.

**Example: Using Slaves.—** In the late 17th century, ANG exploits a total of 6 **Sugar** (price 6) and 3 **Product of America** (price 5). Thus, it should theoretically bring an income of  $6 \times 6 + 3 \times 5 = 51$  ₪.

However, since all this is done in **AMERICA**, **Slaves** are needed to work in the plantations (**ASIA** had much more local population that was used as workers in the plantations). ANG only exploits 4 **Slaves** (price 7).

If ANG do not find anyone wanting to sell **Slaves** and has no TF close to **AFRICA**, it must use international contraband. Thus, its 4 **Slaves** allow to exploit 4 **Sugar** but the rest (2 **Sugar** and 3 **Product of America**) is lost. The income is thus  $4 \times 7$  (for the **Slaves**) +  $4 \times 6$  (for the **Sugar** exploited with them) + 0 (for the other resources exploited with contraband **Slaves**) = 52.

Note that (i) **Slaves** both brings income per se and allows other resource to bring income, making it a very valuable resource ; and (ii) ANG cannot choose not to use contraband **Slaves** and not to exploit the remaining resources (lower exploitation has a better chance of raising prices). If it has sufficient levels of COL to exploit it, it must do so.

Now, suppose that the treaty of Methuen has been signed. PORTUGALLIA is on the Diplomatic track of ANG and gives its 2 **Slaves** for free, for a total of 6 **Slaves**. Only 3 resources still require **Slaves**. HIS agrees to sell 1 **Slave** for 3 ₪. ANG cannot find the last ones but has a TF in STZ **Golfe de Guinée** allowing for direct contraband.

Thus, the situation is now:

For HIS, the **Slave** both brings an income of 7 ₪ during incomes and a “gift” of 3 ₪ during the Diplomatic phase.

For ANG, 3 ₪ are paid to HIS for 1 **Slave** during the Diplomatic phase. So ANG has a total of 7 **Slaves** (4 of its owns, 2 of its minor ally and 1 brought to HIS) and must use two from contraband for the last resources. It get to choose which resources use contraband **Slave** and only brings half income, it is better to choose the cheapest one, in this case **Product of America**.

The final income for ANG is  $4 \times 7$  (its **Slaves**) +  $6 \times 6$  (all the **Sugar** is exploited normally) +  $1 \times 5$  (1 **Product of America** can be exploited) +  $2 \times 2$  (2 **Product of America** is exploited at half price, round down) = 73 ₪.

### V.5.3 ROTW gold

**Note:** Gold may be produced by gold mines located in the ROTW map. This gold is not registered in the country's income immediately, because it has first to be repatriated to Europe. But it is nevertheless produced during the income phase. The repatriation of the gold takes place during the Military phase.

**A** To exploit a gold mine, a COL (with any number of levels) has to be in the province containing the mine symbol. If a country wishes to exploit gold, it simply has to announce it during the Diplomatic phase.

**A.1** A country is never obliged to exploit a mine even if it has a Colony in that province.

**A.2** Once announced, the exploitation is definitive until depletion of the mine (by event E-26 (Depletion of a mine)) and cannot be voluntarily stopped.

**A.3** A ROTW gold mine produce 20 ₪ worth of gold (or silver, jewels, . . .) each turn, except for the mine in **Tenochtitlan** (**AZTECA**), producing 40 ₪, and the mine in Potosi (**INCA** East), producing 50 ₪. Both these incomes are recalled on the map.

**A.4** A COL exploiting a mine produces no other income, nor does it exploit Exotic Resources. The gold produced is reported on the *Colonial Record Sheet*.

**A.5** No slaves are needed to exploit a gold mine.

**A.6** Gold has a major influence on the variation of inflation, see section XI.5.1 (Increase of Inflation).

**B** Gold can be transported by earth during the income phase or during the redeployment phase (see section IX.9 (Gold repatriation)) (or both).

**B.1** During the income phase, Gold can be stored in any port COL in the *Area* where it was produced or an adjacent one.

**B.2** From the ports, the gold has to be repatriated to Europe using NTID, the *Flota de Oro* convoy or the *Flota del Perú*. Each NTID can carry up to 15 ₪ worth of gold (each Transport point is worth 5 ₪).

**Example:** Since POR has a specific rule for its gold in **Elmina**, there is no ROTW gold for it. So, it's ROTW Income is  $4 + 1 + 6 = 11$  ₪.

## V.6 Other incomes

### V.6.1 Events & diplomatic incomes

**A** Economic events may change the RT. The economical events all tell exactly at which point their effect goes in the ERS. The political events usually act between line **A1** (RT at start of turn) and **A2** (RT after Events) while the economical ones usually act on lines **A2**, **B4** and **B24** (Events) .

**B** Diplomatic events modify the RT in two ways: expenses for the diplomatic actions, subsidies and gifts or loans between major players. The latter go in line **A3** of ERS, the first and second in line **A5** of ERS, line **A6** of ERS and line **A7** of ERS. Reimbursement of loans between major players also comes at this point.

### V.6.2 Exceptional taxes

**A** Exceptional taxes are an administrative operation. However, since it brings money, the computation is recalled here.

**A.1** Exceptional taxes being a domestic action, it cannot be performed at the same time as another domestic action, and it might be forbidden by bankruptcy.

**A.2** Check section VI.6.3 (Exceptional taxes) for details.

**B** Exceptional taxes may be raised only if at war and if Stability is not -3.

**C Summary.** To compute the exceptional taxes modifier:

**C.1** First, lower Stability by 1 (except if an enemy stack besiege or occupy a province during a non-civil war).

**C.2** Then, add 3 times the Stability to the ADM of the monarch.

**D** The modifier is written in line **B39** (Exceptional taxes modifier B) of ERS and copied in line **A11** (Exceptional taxes modifier A) of ERS.

**D.1** At the end of turn (only), roll 1d10, add the modifier and multiply the result by 10.

**D.2** This is the amount of ₪ gained (or lost in case of a negative number) by the taxes.

## V.7 Income computation

### V.7.1 Gross income

**A** The *Gross income* is the sum of the *Land Income*, *Industrial Income*, *Trade Income* and *Colonial Income*. It is written in line **B25** of ERS and copied in line **A14** of ERS.

**A.1** The *Land Income* was defined in section V.2 (Land income) and is the income of owned provinces.

**A.2** The *Industrial Income* is the sum of the various incomes of section V.3 (Industrial income), i.e. Manufactures income and European Gold.

**A.3** The *Trade Income* is the sum of the various incomes of section V.4 (Trade income), i.e. Commercial fleets, Domestic Trade, Foreign Trade and Trade Centres (but not Convoys).

A.4 The *Colonial Income* is the sum of the various incomes of section V.5 (Colonial income), i.e. Colonies & Trading-Posts income and Exotic Resources exploitation, but not ROTW gold.

A.5 *Stability* The Gross Income has an effect on Stability at the end of the turn (see §E (Prosperity) of section X.5 (Stability Improvement)).

**Example:** Thus, for POR at turn 1 (with a *Revolt* in Beira and a war against MAURETANIA and TUR), the results were :

- 26 ₤ of Land Income in line **B5** of ERS ;
- 51 ₤ of Industrial Income in line **B8** of ERS ;
- 68 ₤ of Trade Income in line **B16** of ERS ;
- 11 ₤ of ROTW Income in line **B21** (ROTW income) of ERS.

For a grand total of 156 ₤ written in line **B25** of ERS. This is not much and should increase quickly as the colonial empire expands. Maybe that war against MAURETANIA and TUR is not such a great way to start the game. . .

# Administration

## Chapter VI

### VI.1 Expenses

This chapter and the following one describe mainly all the logistics (maintenance and purchase of new forces), country management and development operations. All of these form the administrative phase, that may be cut into three main sections: administrative operations, automatic actions and logistics. Administration and Logistic are conducted independently and simultaneously by all players while automatic actions resolve the conflicts that arise from the new state (incompatible placements of new colonies, monopolies, etc.) Most of the parameters of administrative operations were explained in chapter II (The powers: at home and abroad), and serve mostly in chapter V (Incomes) and these chapters. The nature of military troops is also explained before the logistics details.

Even if the Incomes and Logistic are parts of the Administrative phase (and, for Logistic, is interleaved with other actions), they are in separate Chapters to keep things clearer. Especially, the Logistic Chapter also describes a lot of military concepts.

**Playing tip:** The easier way to play the administrative phase is to have all players simultaneously compute their income and plan their expenses (both administrative and logistic). Once all expenses are planned, players can resolve them two by two (one player resolves his action with the other watching the die rolls).

Often, one will find out that planning logistic ahead (prevision for campaigns cost, then buying troops and fortresses) has to be done before planning administration as military can be the priority expense and administration only gets the “leftover” money. Of course, this must be based only on an estimate of the income, since the exact amount will only be known at the end of the turn, after the Exchequer test. . .

The most efficient way to plan and resolve actions is to write everything on the monarch record sheet: nature of the actions, investment, column and bonus. Thus, resolving the action is very fast: simply announce column and bonus and roll one die with the other player checking the result in the table. Writing down the result of your actions (success, failure, or amount of progression gained) will allow to quickly resolve all the actions in a row. Then, you can “release” the other player and actually implement the results obtained (which can require finding the right counter and similar things).

#### A Sequence.

- A.1 Income computation (V.7)
- A.2 Mandatory actions and bankruptcies (VI.3)
- A.3 Choices of actions (VI.4)
- A.4 Maintenance (VII.2)
- A.5 Recruitment (VII.3)
- A.6 Resolution of actions (VI.9)
- A.7 Administration for minor countries (VI.10)
- A.8 Removal and Placement of leaders (VII.4)
- A.9 Automatic competitions (VI.8.2.2)
- A.10 Exotic resources price variation, Trade centres and convoys (VI.12)
- A.11 Technology adjustment (VI.8.1 (Technology))

## VI.2 Overview of Administrative actions

### VI.2.1 General mechanism and list of actions

**A Mechanism** All administrative actions are solved according to the following scheme: all administrative actions are written down (including all details); a column and die-roll modifier is determined for each administrative action; the column mostly depends on the *investment*, that is the amount of money put into the action, and the characteristics of the monarch (for domestic operations) or of the country (for external ones); one die is rolled for each action in table VI.1 (Administrative Actions); the result qualifies the success or failure of the action.

A.1 The Technological roll reads the table in a slightly different way (see section VI.8.1.2 (Technology improvement)).

A.2 If an action has become impossible, the cost is still to be paid. This is especially the case for competition (because the target of the competition can be eliminated by somebody else), or any operation that would raise the level of a COL, a TP or a commercial fleet beyond 6 (such as two identical actions on a level 5 COL to diminish the chances of failure).

**B Administrative operations** The following operations are available:

B.1 Domestic operations: *Creation of MNU, FTI improvement, DTI improvement, Exceptional taxes.*

B.2 External operations: *Commercial fleet implantation, Colonisation, Trading-post establishment.*

B.3 Technological operations: *Land Technology Improvement, Naval Technology Improvement.*

B.4 Competitions: *Normal competition* (often called simply *Competition*) and *Automatic competition* (used to resolve abnormal situations resulting from simultaneous actions of different countries).

B.5 Administration for minors: Some minors countries have administrative actions (usually TF implementation, sometimes colonisation) that are handled by their diplomatic patron.

**C Administrative limits** Each player is entitled to a certain number of actions:

C.1 Domestic operations are mutually exclusive. Each country can attempt at most one each turn.

C.2 The limitations for the external operations and (normal) competition are given in the player-specific tables. They form an upper bound on the number of operations and a player can choose to do less external operations than this limit. See section II.4.3.4 (Turn limits Table) for details.

C.3 Both technological operations (naval and land) can be done each turn but only one may have an investment higher than a *Basic investment*.

C.4 If a player has a limit greater than 1 for a given type of operation (e.g. Colonisation or Competition), he can choose between either several separate attempts or a multiple attempt on the same objective (or any combination).

**Example:** With 2 actions of Colonisation per turn in period VI (1700-1759), the English player can make 2 attempts on the same Colony or 1 attempt each on 2 different Colonies, in the same turn... or no attempt at all since the actions are not mandatory.

C.5 Some players are entitled to actions with specific restrictions (e.g. HIS may have actions restricted to POR administration while event III-7 (Annexation of Portugal by Spain) is in effect).

C.6 Bankruptcies may change the limits of a country on the turn they occur.

**D Investment** All administrative actions have a general mechanism called investment: each action can be made with a *Basic investment*, a *Medium investment* or a *Strong investment*.

D.1 The values of the investments are 10  $\text{d}$ , 30  $\text{d}$  and 50  $\text{d}$  for the following operations: *Commercial Fleet Implantation, Trading-Post Establishment, Normal Competition.*

D.2 The values of the investments are 30  $\text{d}$ , 50  $\text{d}$  and 100  $\text{d}$  for the following operations: *MNU creation, FTI or DTI improvement, Colonisation, Technology improvement.*

D.3 The investment changes the column used in table VI.1 (Administrative Actions) for the die-roll. Each action is done with one (and only one) investment, but two similar actions (such as two *Colonisations*) can be done with different investments during the same turn.

D.4 The sum of all investments goes in line **B35** (Administrative actions) of *ERS*.

**E** Each action (except Exceptional taxes) is resolved using table VI.1 (Administrative Actions).

E.1 In each case, a column of the table is determined as explained for each action.

E.2 In each case, the investment adds 0, 1 or 3 columns to this computation. In each case, the column is first thresholded between -4 and +4 and then investment is added. Thus, attempting to improve technology with only 3 in MIL (without MNU) and a strong investment results in a base column of -6 (3-9) thresholded at -4 and then switched to -1 (+3 columns for a strong investment).

E.3 Once the column is determined, a modifier is also determined.

E.4 The result is read by rolling 1d10 plus the modifier above and cross referencing this with the column used for the action.

**F** Results of administrative actions is either S,  $\frac{1}{2}$  or F (sometimes with a  $\star$ ).

F.1 Usual meaning of these are:

S The action is a Success.

$\frac{1}{2}$  The action may be successful. Roll 1d10 and compare with the FTI of the country (special FTI may apply). If the roll is less or equal than the FTI, treat as S, otherwise, treat as F.

F The action is a Failure. The money for the investment is lost but nothing happens.

F.2 Check each specific action for the precise explanation of the results. They may differ from the general case explained here. Especially, *Technology improvement* uses a different mechanism to read its result.

Die	-4	-3	-2	-1	0	1	2	3	4
$\leq 1$	F $\star$	F $\star$	F $\star$	F $\star$	F $\star$	F $\star$	F	F	F
2	F $\star$	F $\star$	F $\star$	F $\star$	F	F	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}\star$
3	F $\star$	F $\star$	F $\star$	F	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}\star$	$\frac{1}{2}\star$
4	F $\star$	F $\star$	F	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}\star$	$\frac{1}{2}\star$	$\frac{1}{2}\star$	$\frac{1}{2}\star$
5	F $\star$	F	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}\star$	$\frac{1}{2}\star$	$\frac{1}{2}\star$	S
6	F	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}\star$	$\frac{1}{2}\star$	$\frac{1}{2}\star$	$\frac{1}{2}\star$	S	S
7	$\frac{1}{2}$	$\frac{1}{2}$	$\frac{1}{2}\star$	$\frac{1}{2}\star$	$\frac{1}{2}\star$	S	S	S	S
8	$\frac{1}{2}$	$\frac{1}{2}\star$	S	S	S	S	S	S	S
9	$\frac{1}{2}\star$	S	S	S	S	S	S $\star$	S $\star$	S $\star$
$\geq 10$	S	S	S $\star$	S $\star$	S $\star$	S $\star$	S $\star$	S $\star$	S $\star$

$\frac{1}{2}$ : If  $1d10 \leq FTI \rightarrow$  "S", else "F" (special FTI may apply)

**Native attacks:** if unmodified die on COL attempt is 1 or 2

and  $1d10 \leq TOLerance \rightarrow$  Attack of Natives on target province

Table VI.1: Administrative Actions

### VI.2.2 Counters limitation

**A** The number of COL, TP, MNU and TF counters that a country may have in play at a given time is limited.

A.1 This is a limit on the number of counters, each of them may have any number of level in it (within the allowed values for this counter: 1 or 2 for MNU, between 1 and 6 for the others).

A.2 The limit of MNU (only) may be exceeded as per section II.4.3.2 (Exceeding Limits in MNU).

A.3 The limit of TF is usually the number of counters provided by the game (exception: SUE), while the limit of COL and TP evolves as the game goes and can be found in the country tables (see section II.4.3.1 (Period limits table)).

**B** If, for some reason, a country has more counters of one type that allowed, it must immediately remove the exceeding ones (at controlling player's choice).

**B.1** Counters lost that way are simply removed from the map. The levels in them are lost and nothing is gained in exchange of this loss.

**C** A country may not attempt an action that would create a counter of a kind whose limit is reached. For example, a country having reached its maximum number of COL for the period may try to increase the level of existing ones but it may not attempt to create a new COL.

**C.1** However, it is possible at the beginning of the administrative phase to voluntarily destroy COL, TP, MNU or TF in order to free counters and use them elsewhere. It must be done before actions are planned (and resolved).

## VI.3 Mandatory actions and bankruptcies

### VI.3.1 Commercial fleet adjustment

**A Temporary losses** TF suffer temporary losses from piracy. This is handled by having a *maximum level* and a *current level*.

**A.1** The *current level* represents the current amount of trade a country has in a trade zone.

**A.2** The *maximum level* represents the potential trade that a country will have once the turmoils caused by piracy will be tamed and repaired.

**A.3** Both the current and maximum levels must be kept for each TF (by its owner and on the general TF sheet).

**A.4** Both these levels are between 0 and 6.

**A.5** The current level may never be larger than the maximum level. If this somehow happens, decrease the current level to the value of the maximum level.

**A.6** A commercial fleet is destroyed when its *maximum level* reaches 0, not its *current level*.

**B Current level** Unless specified, when the level of a TF is mentioned in the rules, use the *current level*.

**B.1** Specifically, use the *current level* for deciding which side (⊖ or ⊕) the counter should be, computing incomes, deciding monopolies, allocating Trade Centres and modifying TFI actions.

**B.2** If the *current level* is 0 but not the *maximum level* then the TF still exists: the counter is still here and cannot be used elsewhere and the TF is considered as present for all effects where presence only (ie whatever the level) affects game (eg as modifier for TFI or concurrence done by other countries).

**C Maximum level** The maximum level is used only to determine monopolies for end-of-period VPs.

**D Changing levels** Unless specified, any change of level (whether gain or loss) changes both the *current* and *maximum level*.

**D.1** Especially, bankruptcies, TFI and competitions affect both the current and maximum levels.

**D.2** If this would cause the current level to go below 0, or the maximum level to go above 6, then only the level that can be affected is modified (eg, if your opponent has a TF with a current level of 0, you can still do competition on it to decrease its maximum level; conversely, if one of your TF has a maximum level of 6 and a current level of 2, you can spend money to do TFI on it and speed up the recovery process).

**D.3** Only piracy and automatic adjustment (recovery from piracy) may affect the current level without affecting the maximum level.

**E Automatic adjustment** Each TF whose *current level* is smaller than its *maximum level* increases its *current level* by 1 (that is, recovers from previous temporary losses).

**E.1** This gain is of 2 levels for a TF that has a *maximum level* of 5 or 6.

**E.2** Notice that this adjustment automatically happens for each TF of each country in each CTZ/STZ. That is, a player does not have to choose which TF is adjusted and may not transfer adjustment from one TF to another or save it for a further turn.

### VI.3.2 Loan management

**A Interests** Each country must pay a 10% interests on all ongoing loans.

**A.1** For international loans, it is 10% of the original amount, even if it was partly refunded. Note that once the loan is totally refunded (even before term), it is no more ongoing and does not require paying interests anymore.

**A.2** For national loans, it is 10% of the current amount (round up).

**A.3** Interests must be payed the turn the loan is refunded (ie refunding loans happens after paying interests in turn order). This prevents one turn interest-free loans.

**B** Interests are written on the loan ERS, in line **C2** (International loans interests) of ERS and line **C6** (National loans interests) of ERS.

**B.1** line **C2** of ERS is filled when an international loan is contracted.

**B.2** line **C6** of ERS is filled at this segment, it is 10% (round up) of line **C5** (National loans at start) of ERS.

**B.3** The sum of line **C6** of ERS and line **C2** of ERS is copied in line **B26** (Loan interests) of ERS.

**C Mandatory refund** International loans must be refunded at most 3 turns after they are contracted. If line **C3** (International loans refunds) of ERS is not empty, an international loan ends this turn. Write in line **B27** (Mandatory loan refund) of ERS the amount in line **C3** of ERS.

**C.1** National loans don't need to be refunded. . .

**Example:** At turn 1, POR contracts an international loan of 70 ₮. It must pay 7 ₮ interest at turns 2, 3 and 4 and refund the loan no later than turn 4.

Even if POR refund 20 ₮ of this loan at turn 2, the interests at turns 3 and 4 are unchanged (7 ₮). However, if POR fully refund the loan at turn 3 (in this case, by paying the 50 ₮ left from turn 2), then it is no more ongoing and there are no interest to pay at turn 4.

At turn 1, FRA contracts a national loan of 54 ₮. At turn 2, it has still 54 ₮ of ongoing national loans and must pay 6 ₮ interest (rounding in disfavour of the player, as always). Then, still at turn 2, FRA decides to refund 30 ₮ of this loan but contracts a new one of 83 ₮. At turn 3, it has 54-30+83=107 ₮ of ongoing national loans and must thus pay 11 ₮ of interests. These loans do not need to be refunded and may well last for the whole game if the player wishes so (but interests must be payed each turn, actually this represent refunding old obligations and contracting new ones).

**D Treasure collapse** At this point, if the sum of the RT and the Gross income minus the loan interests and the mandatory refund is negative, the country suffers a collapse. This usually happens when the RT is highly negative because of several turns of spending much more than the income.

**D.1** In case of collapse, the country **must** makes a *Complete bankruptcy* (see section VI.3.3 (Bankruptcy) below).

### VI.3.3 Bankruptcy

**A** Players decide whether their country attempts a bankruptcy and which kind (small, major or complete).

**A.1** In case of Treasure collapse, the country **must** undergo a Complete bankruptcy (see above).

**A.2** Bankruptcies must be declared and resolved before planning administrative actions as their result can prevent some of them.

**A.3** Bankruptcies are declared and resolved immediately.

**A.4** Notice that bankruptcies are declared and resolved after interests are payed and after mandatory refund of international loans.

**B Complete bankruptcy** In case of Complete Bankruptcy, do all the following, in order:

**B.1** Set the RT to 0 ₮ (change the value in line **A8** (RT after Diplomacy) of ERS).

**B.2** Erase all national loans: Write in line **C7** (National loans bankruptcy) of ERS the amount which is currently in line **C5** of ERS.

**B.3** Erase all international loans: Write in line **C4** (International bankruptcy) of *ERS* the amount of ongoing international loans (sums of the amounts in line **C3** of *ERS* of all the following turns) and erase any values currently in line **C2** of *ERS* and line **C3** of *ERS* for the following turns.

**B.4** Loss 30VPs.

**B.5** Apply the worst possible bankruptcy result: loss 2 Stability; loss either 2 levels of TF or 1 level of MNU (player's choice when a choice exists); this turn, the country may not attempt domestic actions (DTI or FTI improvement, MNU placement, Exceptional taxes); the country has 2 TFI actions less than normal this turn.

**B.6** Loss 1 level of DTI (unless this would put it below the minimal value of 1).

**B.7** Counts as 2 bankruptcies: it will hamper further Exchequer tests for 5 turns.

**C Major bankruptcy** In case of Major bankruptcy, do all the following, in order:

**C.1** Erase loans: choose between erasing all national loans (write in line **C7** of *ERS* the amount which is currently in line **C5** of *ERS*) or up to 200 ₴ international loans (write any number between 1 and 200 in line **C4** of *ERS* and diminish the line **C3** of *ERS* of the following turns by the same amount (may be split among many loans), if this puts the amount of ongoing international loans at 0 ₴, erase the value in line **C2** of *ERS* for the following turns). Only one of the two possibilities can be made with each Major bankruptcy.

**C.2** Loss 15VPs.

**C.3** Apply the worst possible bankruptcy result: loss 2 Stability; loss either 2 levels of TF or 1 level of MNU (player's choice when a choice exists); this turn, the country may not attempt domestic actions (DTI or FTI improvement, MNU placement, Exceptional taxes); the country has 2 TFI actions less than normal this turn.

**C.4** Counts as 1 bankruptcy: it will hamper further Exchequer tests for 5 turns.

**D Small bankruptcy** In case of Small bankruptcy, do all the following, in order:

**D.1** Determine amount: choose the amount of national loan erased, between 1 and 200 ₴. This amount may not be larger than the current amount of national loans (line **C5** of *ERS*). Write this amount in line **C7** of *ERS*.

**D.2** Determine effects: roll 1d10, add the ADM of the monarch and the Stability of the country (may be negative), plus any modifier listed below table VI.2 (Bankruptcy Roll). Find the result in the first column of table VI.2 (Bankruptcy Roll) to determine the line in which effects are read.

**D.3** Loss Stability: According to the effect, a certain amount of Stability may be lost.

**D.4** Loss TF: According to the effect a certain number of TF levels may be lost by the country. These may be lost in any STZ or CTZ. If the result is 10 or less, the player may choose to lose 1 level of MNU instead of all the levels of TF if the choice exists (that is, it is not possible to choose to "lose" 1 or 2 levels of nonexistent TF in order to save a MNU, if the country has less levels of TF than what must be lost and the result is 10 or less, one level of MNU must be lost). However, if the country has no TF and no MNU (or no TF and the result is 11 or more), then nothing is lost.

**D.5** Loss actions: According to the effect, a certain number of TFI are lost for this turn only (if this is more than the allowed number of actions in a given turn, no TFI are allowed this turn but there is no "carry over" of lost action to the next turn). If the result is 14 or less, in addition, the country may not do any domestic operation this turn (DTI or FTI improvement, MNU creation or Exceptional taxes).

**D.6** Loss 5VPs.

**D.7** Counts as 1 bankruptcy: it will hamper further Exchequer tests for 5 turns.

**Playing tip:** Bankruptcies affect the Exchequer test for the next 5 turns. In order to remember this, one can put a small \* in line **A14** of *ERS* of the next 5 turns.

**Example:** At turn 10, with 150 ₴ of national loan, more than its income, RUS tries a bankruptcy. The monarch is **Ivan IV** who is not afraid to take money from its boyars without asking; he has an ADM of 6. RUS decides to do a small bankruptcy in order to "erase" all the debt (150 ₴). RUS has a Stability of 2.

Thus, the die roll is modified by +6 (ADM of **Ivan IV**) +2 (Stability) -3 (larger than 100 ₴ bankruptcy) = +5. RUS rolls 7 for a net result of 12. Looking in the table in the line "11-14", RUS lose 1 Stability (going to 1), 1 TF level (but since it has none, nothing is lost), 1 TFI for this turn (again not a loss since RUS has no TFI in period II) and may not do any domestic action for this turn.

If the die roll had been 4, and the result 9, then RUS would had to choose between losing 1 TF level or 1 MNU level, and since it has no TF at this point, it would had to lose 1 MNU level.

1d10 +mod.	Stability lost	TF lost	Actions lost
≤1	-2	2 <sup>†</sup>	2TFI, *
2-5	-2	1 <sup>†</sup>	2TFI, *
6-10	-1	1 <sup>†</sup>	1TFI, *
11-14	-1	1	1TFI, *
15-17	-1	0	1TFI
18+	0	0	0

<sup>†</sup>or one level of MNU (player's choice)

\* No Domestic Action: no Exceptional taxes nor DTI, FTI, MNU.

#### Test: 1d10+ADM Monarch±Stability

+1 has a Stock Exchange

-3 if larger than 100 ₴ Small Bankruptcy

-1 per MNU counter above limit

± per event (HIS: +1 if Expulsions)

#### Types of Bankruptcy

**Small** (up to 200 ₴ National Loan): test (-5VPs?)

**Major** (all National Loans or up to 200 ₴ International Loan): lose 15 VPs, apply the worst result

**Complete** (all Loans, RT=0): lose 30 VPs, automatically worst result, DTI -1, counts as 2 Bankruptcies

Table VI.2: Bankruptcy Roll

**E** Results of the bankruptcy are applied immediately, especially before any administrative action is planned.

**E.1** Since the modifiers for some actions depends on the Stability, the levels of TF or of MNU, this may have an impact.

**E.2** Moreover, knowing which TF are lost might give another country trade opportunities (at monopolies or *Trade centres*) and thus affect the choice of actions and not only their resolution.

**Playing tip:** Complete and Major bankruptcies are very costly and should be avoided. . . But sometimes it's better to hang the bankers rather than curse the debt.

Small bankruptcies can be done quite frequently. Especially with a good monarch. **Felipe II** made a huge use of bankruptcies during his reign to avoid paying the bankers. With a good monarch and a good Stability, a small bankruptcy can be almost harmless and a huge relief for the budget. However, a backfire is always possible, so don't try them during wars.

The loss of TF and TFI make small bankruptcies quite costly for the commercial powers (such as ANG or HOL), especially during the periods where the *Trade centres* are disputed. On the other hand, powers such as RUS or POL will usually not lose much more than 1 Stability. Beware that a poor result (below 10) will still cost them 1 MNU which can be very expensive for these countries with less means to build new ones.

Bankruptcies hamper the Exchequer test, but loans also do (and they cost money each turn in interests). So, using small bankruptcies is often a good way to manage loans. . . Don't hesitate to borrow some money from your nobles when in need (at war, usually), even if you don't intend to repay them. But take into account the fact that you will need some time at peace in order to do your bankruptcies in a good situation (and to refund other loans if wanted). Moreover, the Economical system works better if you have a small amount of loans all the time, so take that into account when deciding whether to go bankrupt or not.

## VI.4 Choices of actions

**A** All players simultaneously chose which administrative actions they which to perform. The description of actions is done in the following Sections (from section VI.5 (Loan refund) to section VI.8 (Other administrative operations)).

**A.1** Each planned action is written down. Even if the explanation of the resolution of the action is done together with the explanation of the action itself, resolution occurs only when all actions have been planned.

**B** Maintenance and recruitment of troops and fortresses is also part of the administrative actions. Even if they have their own description later and their own Segments in the turn sequence, they must be planned as other actions.

## VI.5 Loan refund

**A** Countries may refund loans. Either national loans (this is never mandatory) or international loans before they come to term.

**B National Loans** Choose the amount of refund you want to do. It must be smaller than the current amount of National Loan (difference between line **C5** of ERS and line **C7** of ERS).

**B.1** Write this amount in line **C8** (National loans refunds) of ERS.

**C International Loans** Choose the amount of refund you want to do in advance. It must be smaller than the current amount of International Loans (the total of line **C3** of ERS for all the following turns, but not the current one).

**C.1** Write this amount in line **C3** of ERS, adding it to the current value if any.

**C.2** Decrease the values in line **C3** of ERS by the same total amount, distributed as wanted among all the following turns.

**C.3** If this put one value to 0  $\text{¤}$ , decrease the value of line **C2** of ERS by 10% of the **initial** amount of that loan, for all the turns between the current one (excluded) and the last turn of the loan (included).

**D** Write in line **B29** (Optional loan refunds) of ERS the sum of line **C3** of ERS (the part that was not taken into account in line **B27** of ERS) and line **C8** of ERS.

**Example: Simple loan: contracting the loan.—** At turn 1 (during the Budget phase), FRA contracts an International Loan of 100  $\text{¤}$ . As per §D (International Loans) of section X.4.1 (Expenses), it writes 100  $\text{¤}$  in line **C1** (New International loan) of ERS of turn 1 (new money), 100  $\text{¤}$  in line **C3** of ERS of turn 4 (refund in 3 turns) and 10  $\text{¤}$  in line **C2** of ERS of turns 2, 3 and 4. The loan ERS of FRA is:

Turn	1	2	3	4	5
C1 (new)	100				
C2 (interest)		10	10	10	
C3 (refund)				100	

**Example: Simple loan (cont.): partial refund.—** At turn 2 (during the Administrative phase), FRA decides to refund 40  $\text{¤}$  of this loan. Thus, it write 40 in line **C3** of ERS of turn 2 and decrease line **C3** of ERS of turn 4 by the same amount (leaving 60). Since the loan is still ongoing, the interest are not changed. The loan ERS is now (with changes in red):

Turn	1	2	3	4	5
C1 (new)	100				
C2 (interest)		10	10	10	
C3 (refund)		40		10060	

Note that the interests do not decrease if the capital does not reach 0.

**Example: Simple loan (cont.): term.—** Suppose that FRA does not refund its loan at turn 3. Then, at turn 4 its loan ERS is still:

Turn	1	2	3	4	5
C1 (new)	100				
C2 (interest)		10	10	10	
C3 (refund)		40		10060	

Thus, FRA has no choice and must refund now the 60  $\text{¤}$  of capital still due (in addition to the 10  $\text{¤}$  of interests).

**Example: Simple loan (cont.): complete refund.—** Suppose now that at turn 3, FRA decides to refund the last 60  $\text{¤}$  of the loan. Thus, it writes 60 in line **C3** of ERS of turn 3 and decrease line **C3** of ERS of turn 4 by the same amount. Since this amount reaches 0  $\text{¤}$ , the loan has been entirely refunded and no more interests shall be payed. Thus, FRA erases line **C2** of ERS for turn 4 only (all the turns between 3 excluded and 4 included). The loan ERS looks like:

Turn	1	2	3	4	5
C1 (new)	100				
C2 (interest)		10	10	100	
C3 (refund)		40	60	100600	

Note that interest must be payed on the turn where the capital is refunded. Note also that if FRA did not remember the initial amount of the loan (typically because another loan is ongoing), it can always find it by looking back at line **C1** of ERS 3 turns before the term that was just erased.

**Design note:** Most practical cases fall in the previous examples. The following example is an extreme case that almost never happens.

**Example: Double loan: contracting the loans.—** At turn 1, POL contracts a 50  $\text{¤}$  International Loan and at turn 2 another 60  $\text{¤}$  one. Thus, its loan ERS is as follows:

Turn	1	2	3	4	5
C1 (new)	50	60			
C2 (interest)		5	511	511	6
C3 (refund)				50	60

**Example: Double loan (cont.): partial refund.—** At turn 3, POL decides to refund 60  $\text{₤}$  of international loans. Thus, it writes 60 in line **C3** of ERS of turn 3. POL now has to decrease the amount of ongoing loans (that is, line **C3** of ERS of future turns) by 60. It may choose to either refund the first loan and part of the second, or refund the second, or refund part of both (probably not the best solution). POL chooses to refund the second loan. This will remove more interests (two turns), but also means that the first loan will have to be refunded at turn 4.

Thus, POL sets line **C3** of ERS of turn 5 to 0. This is a 60  $\text{₤}$  decrease, hence no other action is needed on that line. Since a loan has been entirely refunded (set to 0), its interests also have to be removed. Thus, POL removes 6 from line **C2** of ERS of turns 4 and 5 (between now and the term of the loan). The loan ERS is:

Turn	1	2	3	4	5
C1 (new)	50	60			
C2 (interest)		5	511	5115	6
C3 (refund)			60	50	60

**Example: Double loan (cont.): partial refund.—** Suppose that instead of refunding the second loan, POL chooses to refund the first one completely as well as 10  $\text{₤}$  of the second one. Since the second loan is still ongoing, its interests have to be paid in full and the loan ERS is:

Turn	1	2	3	4	5
C1 (new)	50	60			
C2 (interest)		5	511	5116	6
C3 (refund)			60	50	6050

There are more interests to pay, but the final refund is later. Thus, it is not clear which solution is the best, and it may depend on the situation. Typically, if POL is planning to be at war at turn 4, it may be best not to have a refund scheduled at the same time.

## VI.6 Domestic operations

**A** Each country may attempt at most one *Domestic operation* each turn.

A.1 Bankruptcies may prevent countries from doing any Domestic operation at a given turn.

### VI.6.1 Manufacture creation

**A** The operation of *MNU creation* uses column ADM +DTI-9+Investment.

A.1 The following modifiers to the die-roll are used:

- +? Stability of country
- 1 For HIS if inflation level is 10% or more.
- 1 For RUS before construction of <sup>S</sup>St. Petersburg, for TUR and for POL.
- +2 For ANG, from period VI onward.
- ±? By event

A.2 If the result is a "S", then one level of MNU is gained. One can either turn a counter on its second level side, or take a new MNU counter.

A.3 The place where the MNU is built must respect the location restrictions (below).

A.4 For limits on the number of counters, see section II.4.3.1 (Period limits table) and section II.4.3.2 (Exceeding Limits in MNU).

A.5 If the result is "F", nothing happens (and the money is lost).

A.6 If the result is "½", use the normal procedure: roll 1d10 if the result is less or equal than the FTI, treat as "S" if larger than the FTI, treat as "F". Note that FTI is used even if it played no other role in this operation (ie it is not used to compute the column, only to resolve ½).

**B Manufacture placement** The MNU has to be placed on the European map, in a province which is both owned and controlled. Some kind of MNU have specific locations:

B.1 *Cereals* MNU must be put in a plain province.

B.2 *Wood* MNU must be put in a wooden province (either sparse or dense forest). By exception, ANG must put it preferentially in IRELAND (but may move it elsewhere if it loses the province), and TUR is allowed to put it in Lubnān.

B.3 *Salt* MNU must be put in a province with a Salt resource in it.

B.4 *Fish* MNU must be put in a coastal province.

B.5 *Art* MNU must be put in a province with an income of 5 or more.

B.6 Only one MNU may be put in a single province, unless the country does not own sufficiently many provinces.

B.7 Relocating a MNU is possible only if the province is ceded or conquered. In this case, simply take the counter and place it in another legal province.

**Example:** At turn 1, POR wants to develop a MNU (either to switch one of the two existing one from side  $\ominus$  to side  $\oplus$  or to create a new one). It has a DTI of 3 and the monarch has an ADM of 8. Thus, the base column is  $8+3-9=2$ . Depending on the investment (30, 50 or 100  $\text{₤}$ ), the final column will thus be 2, 3 or 5.

Spending 100  $\text{₤}$  would be quite a waste since column 5 does not exist. POR may choose to either spend 50  $\text{₤}$  and roll on column 3 or to spend only 30  $\text{₤}$  and roll on column 2. The difference between the two columns is a ½ changed into a S, that is roughly 10% more success. However, with a DRM of +3 for its Stability, POR thinks that the odds are already pretty good and spending more money is useless. So he decides to only spends 30  $\text{₤}$  on this action.

**Design note:** Note that it is usually better in term of overall probabilities of success to attempt several similar actions with a Small investment rather than a single one with a higher investment. This is especially true for external actions (because there is no real limit to the number of levels of TF or COL that one country may have, thus even in case of success you will do the action another time the next turn) but stay true for domestic ones. Making several actions, however, takes more time and if one needs the result immediately, a high investment can be a good idea.

Typically, in this case, with a Small investment (column 2 at +3 with 2 FTI) POR has 76% of success, with a Medium one (column 3), this goes to 84% and to 92% with a Strong one. Thus, for the same amount of money (100  $\text{₤}$ , that is 3 Small investments, 2 Medium or 1 Strong), the average number of MNU created would be 0.92 with Strong investments, 1.68 with Medium investments and 2.28 with Small investments.

**Example: continued.—** So, POR decides not to spend too much money at once and do a Small investment, resulting in a column of 2, with a final DRM of +3 for Stability. He rolls the die for a result of 3, modified to 6. In table VI.1 (Administrative Actions), cross-referencing column 2 and line 6 he reads the result of ½. So he must roll 1d10 under the FTI. Since this is a domestic operation, special FTI does not apply and the FTI of POR is only 2. Rolling another die gives 1, less than the FTI, thus the operation is a success. POR may either flips one of the two existing MNU from side  $\ominus$  to side  $\oplus$  or take another MNU counter and put it on side  $\ominus$ .

**Design note:** The risk for exceeding limits of MNU is only checked at the beginning of a turn, before the administrative phase. Thus, at the last turn of a period, if your limit in MNU increase in the following period, you may attempt a MNU creation at no risk.

### VI.6.2 Trade index improvement

**A** The improvement of either FTI or DTI uses column ADM-9+Investment.

A.1 The following modifiers to the die-roll are used:

- +? Stability of country
- 1 For HIS if inflation level is 10% or more.
- 1 For RUS before construction of <sup>S</sup>St. Petersburg, for TUR and for POL.
- +2 For ANG, from period VI onward.
- ±? By event

<div data-bbox="114 90 1117 874"> <div data-bbox="114 90 1117 127"> <div data-bbox="114 90 224 127">[R]116</div> <div data-bbox="524 90 703 127">Domestic operations</div> </div> <div data-bbox="114 167 1117 790"> <p>A.2 A “S” is a success, and the FTI or DTI increases by 1.</p> <p>A.3 A “F” is a failure and nothing happens.</p> <p>A.4 A “½” is resolved as normal: roll 1d10 and treat as “S” if less or equal than FTI, “F” otherwise.</p> <p>A.5 For limits, see section II.4.3.1 (Period limits table).</p> <p><b>B Other Trade Indexes</b> Some countries (POR, RUS, HIS, HOL) have two FTI: one reserved for some operations in the ROTW, and one for all other operations.</p> <p>B.1 The specific FTI can be used in all covered administrative operations instead of the normal FTI, to determine the column as well as for the case where a ½ is obtained.</p> <p>B.2 Improvement of the FTI does increase the two values; that is, consider the special FTI to be “regular FTI +n” rather than a value by itself.</p> <p>B.3 However, it is possible to increase the special FTI only (to avoid going over the limit of regular FTI). This is done by a regular FTI improvement action.</p> <p>B.4 Conversely, if the special FTI is already at its maximum, increasing the regular FTI does not change it.</p> <p><b>Example:</b> At turn 1, RUS has a FTI of 1. Since this is also its limit for the first period, it may not increase it. However, RUS has a special FTI with a limit of 3 for period I. Thus it may attempt to increase its special FTI. With a ADM of 6, this gives a base column of -3 before investment. The DRM is +2 (+3 for Stability but -1 for Russian under-development before S<sup>t</sup>.Petersburg). Let's suppose that by the end of period V, RUS managed to increase its special FTI to 4 (the regular one is still at 1 since this is the limit). At the start of period VI, the Russian limit for FTI becomes 2. Thus, RUS may increase its regular FTI to 2. In case of success, this also increases the special FTI to 5.</p> <p>At the start of period VII, if S<sup>t</sup>.Petersburg has been created, the limit of FTI goes to 3. Thus, RUS may increase if again. However, since the special FTI is already at its limit of 5, it does not change.</p> </div> <div data-bbox="114 805 1117 874"> <p><b>Playing tip:</b> Since the DTI improves the column for MNU creation, it is easier to first improve DTI and then try to improve MNU. But MNU provide more advantages than simply money and you may want then asap.</p> </div> </div> <div data-bbox="114 898 1117 1511"> <div data-bbox="114 898 1117 941"> <h3>VI.6.3 Exceptional taxes</h3> </div> <div data-bbox="114 949 1117 1511"> <p><b>A Condition</b> In order to raise <i>Exceptional taxes</i>, a country must both:</p> <p>A.1 be at war (including civil or religious wars but excluding overseas wars and mere interventions) and</p> <p>A.2 be able to pay the eventual cost in Stability (see below). That is, a country at -3 Stability may not raise exceptional taxes unless these don't cost a loss of Stability.</p> <p><b>B Loss of Stability</b> A country raising exceptional taxes immediately loses 1 Stability unless both of the following conditions occur:</p> <p>B.1 The country is involved in at least one regular war (ie neither civil nor religious nor overseas, interventions don't count) and</p> <p>B.2 At least one national province is either controlled or besieged by an enemy in this war.</p> <div data-bbox="114 1228 1117 1511"> <p><b>Design note:</b> In other words:</p> <ul style="list-style-type: none"> <li>• Oversea wars don't allow one to raise exceptional taxes because the people won't see the need of raising funds to defend a few acres of snow.</li> <li>• Religious or civil wars allow to raise taxes but this always causes turmoil (loss of Stability) because there is always an opposite faction within the country to disagree with the need.</li> <li>• “Normal” wars allow to raise for taxes and if a province is occupied the people even see that the nation is in danger and everybody gladly gives money for war effort without second thought.</li> <li>• If you're not able to pay for the Stability cost, that means that the country is so wary of the war that people can't and won't do more efforts. . . except in case of great danger (where you don't need to loss Stability).</li> </ul> </div> </div> </div>	<div data-bbox="1122 90 2121 1511"> <div data-bbox="1122 90 2121 127"> <div data-bbox="1122 90 1449 127">Administration— master – 2016-04-14</div> <div data-bbox="2058 90 2121 127">[R]117</div> </div> <div data-bbox="1122 167 2121 1511"> <p><b>C</b> To proceed with the taxes, the player announces he will perceive the taxes, and his country loses 1 Stability level (if needed). The decrease in Stability occurs immediately at the beginning of the administrative segment (hence, before any other administrative action is resolved).</p> <p>C.1 The modifier is obtained by adding the ADM of the monarch, the value of Stability level multiplied by 3, and other possible modifiers (from events). It is written in line <b>B39</b> of ERS and copied in line <b>A11</b> of ERS.</p> <p>C.2 Only at the end of turn (after expenses. . . ) will the real amount of the taxes be known. It will be obtained by rolling 1d10, adding the previous modifier, and multiplying this sum by 10. This number of ₮ is added to the RT in line <b>A12</b> (Exceptional taxes) of ERS.</p> <p>C.3 The result could be negative, with a low Stability.</p> <p>C.4 See section X.2 (Exceptional taxes) for the details.</p> <p><b>D Remember:</b> do not roll for exceptional taxes during income. Only write down the modifier. The exact roll will happen at end of turn, once expenses are planned. Thus, one can only get a rough estimate of this amount and must spend money according to this estimation.</p> <div data-bbox="1122 646 2121 981"> <p><b>Example: Good taxes.—</b> At the beginning of the Seven Years War, <b>Friedrich II</b> decides to gets extra income to prepare the invasion of Saxony and raises exceptional taxes. The Stability of PRU is +3 (as the war was declared with a free CB), so PRU is allowed to raise taxes. It immediately loses 1 Stability.</p> <p>The ADM of <b>Friedrich II</b> is 9, the Stability of PRU is now 2 (3-1). Thus, the modifier is 9 (ADM) + 3 × 2 (Stability) = 15, written in line <b>B39</b> of ERS and copied in line <b>A11</b> of ERS. At the end of the turn, PRU checks the precise amount of the taxes by rolling 1d10 and gets 7. Thus, the final amount is 10 × (7+15) = 220 ₮. All in all, a good operation, but things could not go wrong with high Stability and ADM.</p> <p>Later in this war, the Russian armies have invaded <b>Brandenburg</b> and are looting left handed gloves in Berlin! Moreover, the war in Bohemia did not went that well and war weariness took its toll, thus decreasing the Prussian Stability to 0. <b>Friedrich II</b> decides to raise exceptional taxes again. Since one national province (<b>Brandenburg</b>) is currently besieged by Russian troops, there is no need to loose Stability. Hence the modifier for the taxes is 9+3×0=9. This still guarantees a good income (at least 100 ₮).</p> </div> <div data-bbox="1122 1045 2121 1511"> <p><b>Example: Bad taxes.—</b> During the French wars of religion, the French monarchy is desperately looking for money to fund its campaign against the Huguenots and repeatedly summons the États Généraux in successive attempts to increase taxes.</p> <p>French king, <b>Henri III</b> has an ADM of 6. and FRA has a Stability of -2 due to the already long turmoil. Since it can loss 1 Stability, FRA is allowed to raise exceptional taxes. Then compute the modifier of 6 (ADM) + 3 × -3 (Stability) = 6 - 9 = -3. Write this on the ERS.</p> <p>At the end of the turn, the exact amount of taxes is computed. Rolling 1d10 gives only 2, for a final amount of 10×(2-3) = -10 ₮. . . FRA actually has to pay some money as result of this operation (representing cost for gathering members of the États Généraux and to send tax collectors without a large success). Note that it is not possible to renounce this “tax” once the result is known, so better check the modifier before deciding and estimate risks cautiously.</p> <p>A couple of years later, the Holy League takes arms against the French king and immediately takes control of Paris. In a bold move, <b>Henri III</b> decides to assassinate the League leader, Guise. This creates such a turmoil that the Stability of FRA goes to -3 and a new religious war erupts.</p> <p>FRA would like to risk exceptional taxes again. However, its Stability is already at -3 so it cannot pay for it. Paris is enemy-controlled but this does not provides “cost-free” taxes during religious wars (many people supported the late Duke of Guise and are rather reluctant to help fund the war against his followers. . . ) So, exceptional taxes are not possible until FRA somehow manage to raise its Stability.</p> </div> </div> </div>
--	--

## VI.7 External Operations

### VI.7.1 Trade fleet Implantation

**A Commercial Fleets** The operation of *Trade fleet implantation* targets a STZ/CTZ. Then, use base column FTI-#Fleets+Investment.

A.1 See the access limitations in section VI.7.4.1 (Trade fleet) for restriction on the seas that may be targeted.

A.2 #Fleets is the number of foreign commercial fleets in the targeted STZ/CTZ, whatever their side.

A.3 When targeting its CTZ, a country adds its DTI to the initial column.

A.4 When targeting the CTZ of another country, the DTI of the owner of the CTZ is subtracted from the initial column.

A.5 POR and HOL (after creation of the VOC) use their special FTI if targeting a STZ in the ROTW, both for column computation and to resolve ½.

A.6 The following modifiers to the die-roll are used:

- +1 If attempting country's TF is already ⊕.
- 1 If at least one pirate is present in the STZ/CTZ.
- 1 If there was at least one battle, pirate or privateer during the previous turn in the targeted STZ/CTZ.
- ±? By event.

A.7 A result of "S" increases the level of the TF by 1. If this is the first level, put a counter in the STZ/CTZ (beware that the number of counters is a restriction on the number of TF a country may have, and some countries have other limits). If the TF reaches level 4, turn the counter on its ⊕ side. A TF may never have more than 6 levels.

A.8 See §D (Fleets) of section VI.8.2.2 (Automatic competitions) if two fleets are ⊕ in the same STZ/CTZ or when one TF reaches level 6.

A.9 A result of "F" is a failure: nothing happens but the money is lost.

A.10 A result of "½" is treated as normal: roll 1d10, if less or equal than FTI (use special FTI if allowed), treat as "S", otherwise, treat as "F".

**Example:** At turn 1, ANG wants to increase its trade in the Baltic sea and attempts a TFI in STZ **Baltique**. The base column is 2 (FTI) - 4 (for the presence of 4 others TF: HOLLANDIA, DANIA, HANSA and SUECIA) = -2, the DRM is 0. Maybe, trying to raise the FTI first could be a good idea.

At turn 1, VEN wants to increase its trade in the Adriatic and attempts a TFI in CTZ **VENETIA**. The base column is 3 (FTI) + 3 (DTI, since the target is its own CTZ) = 6 which is thresholded to 4 (the maximum possible) and the DRM is +1 because the TF is already ⊕.

At turn 1, TUR wants to try and steal the Venetian trade in Adriatic and attempts a TFI in CTZ **VENETIA**. The base column is 2 (FTI) - 3 (DTI of VEN since the target is someone else CTZ) -1 (for the presence of the Venetian TF) = -2 and the DRM is 0.

### VI.7.2 Colonies

#### VI.7.2.1 Normal procedure

**A Colonisation** The operation of *Colonisation* targets a province in the ROTW that does not already contains a foreign COL, a *Minor establishment* or a *Pirate haven*. Then use column FTI-Difficulty+Investment (where Difficulty is the Difficulty value for the *Area*).

A.1 See the access limitations in section VI.7.4.2 (Pioneering [TBD]), section VI.7.4.3 (Inland advance) and section VI.7.4.4 (Native empires) for restriction on the provinces that may be targeted.

A.2 Countries with a special FTI use it, both for column computation and to resolve ½.

A.3 The following modifiers to the die-roll are used:

- +2 If the province has been pacified (all natives killed).
- 1 If at least one battle occurred in the *Area* during the preceding turn.
- +2 If it is the improvement of an already existing COL.
- 3 For the first ever colonisation attempt by the country during the whole game.
- 2 For the second colonisation attempt (see above), if the first was a failure.
- 1 For the third colonisation attempt (see above), if the first two were failures.
- ±? By event.

A.4 Use also one (and only one) of the following modifiers:

- +M Manoeuvre of a ☞ (or half manoeuvre of a ☞) or a ☛ in the province.
- +B Bonus of a Mis in the province.
- +1 If a ☛ is in the *Area*.

A.5 A result of "S" increases the level of the COL by 1. If this is the first level, put a counter in the province (beware that the number of counters usable during each period is restricted). If the COL reaches level 4, turn the counter on its ⊕ side. A COL may never have more than 6 levels.

A.6 A result of "F" is a failure: nothing happens but the money is lost.

A.7 A result of "½" is treated as normal: roll 1d10, if less or equal than FTI (use special FTI if allowed), treat as "S", otherwise, treat as "F".

**B** An unmodified result of 1 or 2 (even if the action is a success) requires a second roll of 1d10: if it is *strictly less* than the Tolerance value for the *Area*, the natives are immediately activated and will attack during the redeployment phase (as per section IX.2 (Attacks by Natives)).

B.1 Note that *Area* with no Tolerance (eg in **AMERICA**) are not subject to this critical failure.

### C Special cases

C.1 If per chance several players choose the same province for a first COL implantation, they will do an automatic competition between their COL. Resolve it as automatic competition between TP with the loser(s) losing 1 level of COL until only one country still has levels here. See section VI.8.2.2 (Automatic competitions).

C.2 If the province was occupied at the beginning of the administrative phase (either by a fort, or military forces, or a TP of another country), the implantation gives an Overseas CB to this country (even in case of failure). By exception, this CB is used at the end of the administrative phase. Minors never use this CB.

C.3 If a COL is successfully created and survives automatic competition, enemy Forces in the province are repatriated to the nearest TP or COL, an enemy fort or TP in the province is destroyed.

C.4 There is a rule to transform a TP in a COL if a city is present in the province. See below.

**Example:** At turn 1, POR wants to raise its COL of **La Praya** in **CABO VERDE**. The Difficulty is 3, the FTI of POR is 5 (special FTI for the ROTW) and POR chooses to make only a small investment. Thus the base column is 5 (FTI) - 3 (Difficulty) = 2. There is a +2 DRM because the COL already exists.

POR rolls a 2 for a net result of 4, in column +2 this gives a ½. So POR has to roll lower than its FTI (use special FTI again) and rolls a 6. This is a failure; the COL gains no level but the 30 ₤ of the action are lost. It is an unmodified die roll of 1 or 2 and can thus activate natives! But since there is no Tolerance in **CABO VERDE**, it has no impact.

On turn 2, HIS has left Colón (⚡ <R> H 6.1.1 [T1–T3]) in **CUBA** and wants to create a COL in the rich new World. The FTI of HIS is 2, the Difficulty of the Area is 3. This gives a base column of -1. Since HIS wants a base in America has soon at possible, it does two COL actions there and each of them with a Medium investment (50 ₤) to roll on column 0 (which has one less F than column -1).

There is a +3 DRM for the MAN of Colón (halved on land for ⚡). Since HIS has not succeed in any COL attempt in the game, one of the attempts (player's choice, but in this case it is not important since they are otherwise the same) will be the "first one" and suffer a DRM of -3 while the other only has -2. Note that since all actions must be scheduled before any is resolved, the second malus will stay even if the first attempt is successful (the worst case for the player applies).

So, the first attempt is in column 0 at 0. HIS rolls 6 and gets ½, a second roll of 4 is larger than the FTI, thus it is a failure. The second attempt is still in column 0, but at +1. HIS rolls 7 for a net result of 8. It's a success! A COL of level 1 is put in the province and HIS won't suffer the "first attempts" malus anymore (on following turns).

**Playing tip:** The MAN of a ☹ is very important for creating COL (and TP). Indeed, each point of MAN is basically 10% more chances of success. So, at the end of a turn, you have to think in advance to where you'll want to colonise on the next turn and place your leaders there.

For countries with many good ☹ (HIS, POR and in a smaller measure HOL then FRA), correct placement is the key to a very fast grow of the colonial empire at small cost. Since even in column -4 there is a success, with a ☹ with a MAN of 5, this means 60% chance of S (plus some other for the ½). . .

On the other hand, countries with less ☹ (ANG) will sometimes need several actions to put a COL. The bonus for an existing COL will help them to concentrate on existing establishments, but spreading the empire is harder and must be done either with the few ☹ you'll get or with massive amounts of money (Large investments).

The malus for first attempts is very painful, especially with no ☹ to overcome it. Basically, unless you have someone competent or vast amount of money at your disposition, consider that there is a 90 ₤ "fee" to enter the colonial game and that the first three attempts are wasted in paying it. A good surprise may arise.

### VI.7.2.2 Transforming a trading-post in a colony

**A** A TP in a province *with a city* or *with a mission* can be turned into a COL following this procedure:

A.1 The MAJ announces this during the diplomatic phase.

A.2 The MAJ must declare war (overseas or regular) to the ROTW minor country owning the *Area* (if any). If already at war against it, there is no need to declare a new war.

A.3 The natives of the province are automatically and immediately activated and will attack at the end of the turn as per section IX.2 (Attacks by Natives).

A.4 The country must spend one COL action with strong investment (100 ₤) during administrative phase. There is no die roll to resolve this colonisation attempt.

A.5 The city must be controlled at the end of the military phase (either taken this turn or a previous one). The fortress level used for the defence against the native attacks is the better between the one of the TP and the one of the city.

A.6 If, after the native attack, the TP still exists and the city is controlled, the TP is turned into a COL of the same level as the TP. The fortress level used for the COL is the maximum between the fortress of the city and the one of the TP (put a fortress counter for free is needed).

A.7 If a mission was used to convert the TP to a COL, there is no need to capture the city (if any), but the mission can never be removed unless the COL is lost.

**B Bengal** If MOGOLIS IMP. own the **BĀŅGLĀ**, and some country has a AT with them, the transformation of a TP in a COL in **Ḳaḷākātā** will not generate a reaction by MOGOLIS IMP. (only the natives will attack) neither for the capture of the city, nor for the presence of forces in the province to do it, and troops of MOGOLIS IMP. do not participate in the indigenous attack at the end of the turn (see also §F (Development of trade in India) of section II.8.3 (Exploitation of Exotic resources)).

B.1 Note, however, that the presence of a COL afterwards can still trigger reaction of MOGOLIS IMP. as per section IV.4.4.4 (Mogolis Imp., Siberia, Sudania, Durranis Imp.).

**Design note:** This is what is considered to have happened in **Goā** (with Portuguese special rules), in **Jakarta** (by Coen) and in **Ḳaḷākātā** (established as a British centre of trade and power in India after event VI-17 (The Last of the Great Mughals)).

### VI.7.3 Trading posts

**A Trading posts** The operation of *Trading-post establishment* targets a province in the ROTW that does not already contains a foreign COL. Then use column FTI-Tolerance+Investment (where Tolerance is the Tolerance value for the Area, use Difficulty if the Area has no Tolerance).

A.1 See the access limitations in section VI.7.4.3 (Inland advance) and section VI.7.4.4 (Native empires) for restriction on the provinces that may be targeted.

A.2 Countries with a special FTI (except HIS) use it, both for column computation and to resolve ½.

A.3 The following modifiers to the die-roll are used:

- 1 Per TP of another country in the *Area*.
- 1 If target already enemy occupied (fort, forces, TP).
- +2 If the province has been pacified (all natives killed).
- 1 If at least one battle occurred in the *Area* during the preceding turn.

A.4 Use also one (and only one) of the following modifiers:

- +M Manoeuvre of a Conquistador or a Governor in the province.
- +B Bonus of a Missionary in the province.

+1 If a Governor is in the *Area*.

A.5 A result of "S" increases the level of the TP by 1. If this is the first level, put a counter in the province (beware that the number of counters usable during each period is restricted). If the TP reaches level 4, turn the counter on its ⊕ side. A TP may never have more than 6 levels.

A.6 A result of "F" is a failure: nothing happens but the money is lost.

A.7 A result of "½" is treated as normal: roll 1d10, if less or equal than FTI (use special FTI if allowed), treat as "S", otherwise, treat as "F".

**B Critical failure** A result of "F\*" means that in addition to the failure, the natives are immediately activated and will attack during the redeployment phase (section IX.2 (Attacks by Natives)). A result of "F" means a simple failure.

### C Special cases

C.1 If per chance several players choose the same province for a first COL and a first TP implantation, and both succeed, the TP is eliminated.

C.2 If the target province contains several TP at the end of the round, there will be an automatic competition between the TP of the province.

C.3 If the province was occupied at the beginning of the administrative phase (either by a fort, or military forces, or a TP of another country), the implantation gives an Overseas CB to this country (even in case of failure of if the automatic competition allows the former TP to stay in place). By exception, this CB is used at the end of the administrative phase.

C.4 If a TP is successfully created and survives automatic competition, enemy Forces in the province are repatriated to the nearest TP or COL, an enemy fort in the province is destroyed.

<div data-bbox="114 90 1117 127"> <div>[R]122</div> <div>External Operations</div> </div> <div data-bbox="114 172 1117 228"> <p><b>D Trading-posts, forts and cities</b> A European fort or TP is considered as a separate place as the city in the same province. Sieges are made against one or the other (besieger's choice).</p> </div> <div data-bbox="114 231 1117 316"> <p><i>D.1</i> However, the TP of a ROTW country is considered to be in the city. This means that in order to take military control of the TP, a power must take the city. This may require being at war against two minor countries (typically in <b>INDIA</b> where GUZARATE has TP in cities owned by BISINAGAR).</p> </div> <div data-bbox="114 327 1117 419"> <p><b>Playing tip:</b> America is meant to be colonised, not to receive TP. So, the missing number in American areas is the one used for TP. If you don't remember whether the second or third number should be used for COL or TP placement, look in America: the missing number is the one to use for TP.</p> </div> <div data-bbox="114 443 1117 480"> <p><b>VI.7.4 Limited access to the ROTW</b></p> </div> <div data-bbox="114 491 1117 547"> <p><b>A</b> Trade and colonisation in the ROTW must progress slowly through unknown areas. Thus, it is not possible to colonise any province nor to attempt trade (with TF) before having strong contacts with natives or colons.</p> </div> <div data-bbox="114 550 1117 604"> <p><b>B</b> Some countries have other specific restrictions on where they may put their establishments. See specific rules for details.</p> </div> <div data-bbox="114 616 1117 643"> <p><b>VI.7.4.1 Trade fleet</b></p> </div> <div data-bbox="114 651 1117 707"> <p><b>A Caspian sea</b> In order to target the STZ <b>Mer Caspienne</b> for TFI, one must either own a province (or have a COL or TP) adjacent to the sea (even without port), the CC Grand Orient or the CC Mediterranee.</p> </div> <div data-bbox="114 719 1117 775"> <p><b>B ROTW STZ</b> In order to target a ROTW STZ for TFI, at least one sea zone must have been discovered in the STZ, and at least one condition among the following must be fulfilled:</p> </div> <div data-bbox="114 778 1117 805"> <p><i>B.1</i> The country has a COL/TP bordering the STZ</p> </div> <div data-bbox="114 809 1117 893"> <p><i>B.2</i> The country has trade rights given by somebody that has a COL/TP bordering the STZ (a minor country that is at least in MA will give the rights). Once given, the trade rights are removed by <i>trade refusal</i>, or as soon as the minor country is no more in MA.</p> </div> <div data-bbox="114 896 1117 979"> <p><i>B.3</i> The STZ is either STZ <b>Mer des Canaries</b>, STZ <b>Golfe de Guinée</b>, STZ <b>Mer d'Arabie</b>, STZ <b>Océan Indien</b> or STZ <b>Mer de Chine</b> and the country has discovered all the sea zones of the STZ (i.e. the sea zone in which is the symbol, plus all neighboring ones).</p> </div> <div data-bbox="114 983 1117 1038"> <p><b>C</b> If the condition allowing a new implementation disappears, the TF can no more increase in level through administrative actions, but remains where it is.</p> </div> <div data-bbox="114 1050 1117 1106"> <p><b>D Competition for trade fleets</b> TF competition can be done if either a TF implementation would be allowed, or if a TF already exists.</p> </div> <div data-bbox="114 1117 1117 1209"> <p><b>Design note:</b> At least one sea must be known in order to know where to send traders. Then, the other conditions represent who will trade with you: either your own colons and merchants, or those of a country giving you trade rights or those of natives in organised areas once you know the sea sufficiently well.</p> </div> <div data-bbox="114 1230 1117 1340"> <p><b>Example:</b> Notice that even if STZ <b>Mer des Canaries</b> touches Europe and European provinces on the ROTW (<b>Açores</b> and <b>Cabo Verde</b>), this is not sufficient to increase its trade there. A COL/TP (such as <b>La Praya</b>) must be here. Specifically, at turn 1, ANG, FRA, HIS and POR all have a TF in STZ <b>Mer des Canaries</b> but only POR is allowed to increase it. Other may do it after exploring all the seas of the STZ.</p> </div> <div data-bbox="114 1361 1117 1394"> <p><b>VI.7.4.2 Pioneering [TBD]</b></p> </div> <div data-bbox="114 1399 1117 1426"> <p><b>A</b> During periods I-V, a province with a COL of level 2 or 3 may not be the target of colonisation attempts.</p> </div> <div data-bbox="114 1430 1117 1457"> <p><i>A.1</i> Exception: provinces with gold mines always ignore this restriction.</p> </div> <div data-bbox="114 1460 1117 1487"> <p><i>A.2</i> Exception: provinces with missions always ignore this restriction.</p> </div> <div data-bbox="114 1490 1117 1517"> <p><i>A.3</i> Exception: provinces with arsenals always ignore this restriction.</p> </div>	<div data-bbox="1122 90 2121 127"> <div>Administration— master – 2016-04-14</div> <div>[R]123</div> </div> <div data-bbox="1122 172 2121 228"> <p><i>A.4</i> Exception: If a country benefits from an event E-19 (Rush of colonists), an event E-20 (Refugees), or a <i>Colonial Dynamism</i> political event (as well as a few other events), it may ignore this restriction for the turn.</p> </div> <div data-bbox="1122 231 2121 287"> <p><i>A.5</i> Exception: TUR ignores this restriction in <i>Area</i> belonging to Muslim minors (<b>ADEN</b>, <b>OMAN</b>, <b>SOUDAN</b> and, if they still belong to GUZARATE, <b>GUJARAT</b> and <b>MALACCA</b>).</p> </div> <div data-bbox="1122 298 2121 325"> <p><i>A.6</i> Exception: SUE ignores this restriction if it has a policy of <i>Overseas expansion</i>.</p> </div> <div data-bbox="1122 328 2121 384"> <p><i>A.7</i> Exception: HOL may ignore this restriction after event III-1 (2) (Vereenigde Oostindische Compagnie) on turns it choose to destroy another COL.</p> </div> <div data-bbox="1122 411 2121 445"> <p><b>VI.7.4.3 Inland advance</b></p> </div> <div data-bbox="1122 459 2121 544"> <p><b>A Settlements</b> A province may not be targeted by a COL or TP attempt unless the province has been discovered by the country, is linked to a province on the European map by a continuous path of known sea zones and provinces (even if enemy-occupied or through closed straits fortifications), and at least one of the following conditions is true:</p> </div> <div data-bbox="1122 552 2121 636"> <p> <div>The province is coastal.</div> <div>OR The province is within supply distance (12MP) by land only of a COL, TP or European province owned by the country.</div> </p> </div> <div data-bbox="1122 639 2121 667"> <p><i>A.1</i> No exception.</p> </div> <div data-bbox="1122 699 2121 754"> <p><b>B Inland advance [TBD]</b> A province with a COL (any level) may not be targeted by a colonisation attempt unless one of the following conditions is true:</p> </div> <div data-bbox="1122 762 2121 877"> <p> <div>The province is coastal.</div> <div>OR The <i>Area</i> contains a COL⊕ or a mission of the same country.</div> <div>OR The <i>Area</i> is adjacent to an <i>Area</i> containing a COL⊕ or a mission of the same country.</div> <div>OR The <i>Area</i> is adjacent to an European province owned by the country.</div> </p> </div> <div data-bbox="1122 880 2121 908"> <p><i>B.1</i> No exception.</p> </div> <div data-bbox="1122 930 2121 1015"> <p><b>Design note:</b> Thus, one must first colonise coasts before going inland. Two attempts on an empty province may raise the COL to level 2 without problem. Notice that to raise a COL with an inland gold mine to a high level, you must still fulfil this condition (by, typically, building a mission in the <i>Area</i>).</p> </div> <div data-bbox="1122 1059 2121 1093"> <p><b>VI.7.4.4 Native empires</b></p> </div> <div data-bbox="1122 1107 2121 1163"> <p><b>A Siberia</b> A province of <b>SIBERIA</b>, east of the <i>Area</i> <b>SIBÉRIE</b> may not be targeted for TP or COL implementation as long as the minor country SIBERIA exists. Provinces of <i>Area</i> <b>SIBÉRIE</b> can be targeted though.</p> </div> <div data-bbox="1122 1171 2121 1227"> <p><i>A.1</i> This restriction is permanently removed when SIBERIA is destroyed (see §C (Siberia) of section XIV.13.4.2 (The Nordic Orders, Pskove, Rezane, Siberia)).</p> </div> <div data-bbox="1122 1259 2121 1315"> <p><b>B Cities</b> A province with a city may not be targeted by a colonisation attempt unless one of the following conditions is true:</p> </div> <div data-bbox="1122 1323 2121 1350"> <p><i>B.1</i> A COL of the country already exists in the province.</p> </div> <div data-bbox="1122 1353 2121 1380"> <p><i>B.2</i> This is an attempt to transform a TP to a COL as per section VI.7.2.2 (Transforming a trading-post in a colony).</p> </div> <div data-bbox="1122 1383 2121 1468"> <p><i>B.3</i> The country attempting the action has taken military control of the city (in an Overseas war), and still holds it during the administrative phase (meaning that the war still is in effect). Note that since the war is still ongoing, the new COL may well be destroyed by native attacks later this turn. . .</p> </div> <div data-bbox="1122 1476 2121 1503"> <p><i>B.4</i> No (other) exception.</p> </div>
--	---

<div data-bbox="114 90 1117 127"> <div>[R]124</div> <div>Other administrative operations</div> </div> <div data-bbox="114 167 1117 215"> <div>VI.8 Other administrative operations</div> </div> <div data-bbox="114 244 1117 292"> <div>VI.8.1 Technology</div> </div> <div data-bbox="114 300 1117 335"> <div>VI.8.1.1 Procedure for technology progression</div> </div> <div data-bbox="114 343 1117 1511"> <p><b>A</b> The administrative action of raising technology is special because it is done both by the major countries and the minors countries (or rather the cultural groups). Moreover, some progression may occur due to events as well as in the administrative phase. Lastly, the Administrative table is not read in the usual way when resolving this action.</p> <p><b>A.1</b> Once everybody has performed its increase technology action (both majors and minors), an adjustment of counters occurs. Check the precise procedure below and follow it closely. The order in which the adjustments occur is important and must be precisely respected.</p> <p><b>B Technology: general procedure</b> The improvement of technology is done as follows, each step must be completed by all countries before moving to the next. Some steps occur both during event and administrative phases while some occur only during the administrative phase (during the Technology adjustment segment).</p> <p><b>B.1</b> Progression through events (majors and cultural groups, event phase);</p> <p><b>B.2</b> Progression through administrative operations (majors, administrative phase);</p> <p><b>B.3</b> Minor countries progression (cultural groups, administrative phase);</p> <p><b>B.4</b> Cultural groups adjustment (cultural groups, administrative phases);</p> <p><b>B.5</b> Goals adjustment (goals, administrative phases);</p> <p><b>B.6</b> Goals time adjustment (goals, administrative phase).</p> <p><b>C Progression</b> When a country or cultural group gains technological levels, advance the corresponding marker (Land or Naval) in the corresponding box.</p> <p><b>C.1</b> A marker can never stack with a goal of the same kind (Land or Naval). If a technology marker exactly reaches the box where a goal is, then it gains one extra level for free and is put just after the goal.</p> <div data-bbox="114 938 1117 1029"> <p><b>Example:</b> At turn 11, the Land technology of FRA is at level 20 and the goal Arquebus at level 21. FRA manages to gain 1 level of Land technology, thus reaching level 21. Since the marker for FRA may not stack with the marker for Arquebus, FRA gains an extra level for free and is now at level 22.</p> </div> <p><b>D Events and majors</b> Follow the text of any event (economical or political) that tells to move some technology markers.</p> <p><b>D.1</b> Major country may progress in technology through an administrative action. See section VI.8.1.2 (Technology improvement) for details.</p> <p><b>E Cultural groups progression</b> There are four symbols in the turn track: †, €, £, ¥. When one of these symbols is in the current turn box, the technology counters (both Land and Naval) for this group advance of 1 box during the administrative phase.</p> <p><b>F Cultural groups adjustment</b> If the technology of a cultural group is 7 or more levels below the technology (of the same kind: Land or Naval) of a major belonging to that group, increase the level of the cultural group so that it is only 6 levels below the highest major of that group.</p> <p><b>F.1</b> Remind: POR, HIS, FRA, ANG, VEN, HOL, SUE, AUS, PRU are in the Latin group ; POL is <b>both</b> in the Latin and Orthodox groups ; RUS is in the Orthodox group and also in the Latin group after its reform ; TUR is in the Muslim group.</p> <div data-bbox="114 1412 1117 1511"> <p><b>Example:</b> At turn 11, the Land technology for FRA is at 20 and for the Latin group at 15. FRA manages to raise its technology to 22. Latin do not increase normally at turn 11. However, at the end of the administrative phase, the Latin marker is more than 6 boxes below the French one. Since FRA is part of the Latin group, increase the Latin Land level to 16 (=22-6).</p> </div> </div>
--

<p>[R]126</p> <p>Other administrative operations</p> <p>A.1 To increase its technology, a MAJ must do an operation of <i>Technology improvement</i>. Both technological operations (Naval and Land) can be done each turn but only one may have an investment higher than a <i>Basic investment</i> (either Naval or Land).</p> <p>A.2 <i>Resolution</i> The base column for Technology improvement is MIL-9 (minimum -4).</p> <p>A.3 Add 1 (or 2) bonus column if the country has a MNU of level 1 (or 2) of the adequate type (<i>Metal</i> for Land, <i>Instruments</i> for Naval), even if the province is not controlled, pillaged, in revolt, . . . Only one MNU counts.</p> <p>A.4 Then add 1 or 3 columns for Investment as usual.</p> <p>A.5 The following modifiers to the die roll are used:</p> <ul style="list-style-type: none"> <li>+? If the MAJ is late behind its group, +1 per level beyond the fifth (see below).</li> <li>-1 for TUR, depending of its Military Reforms (see §A.4 (Technology limitation) of section XIV.8.1.2 (Turkish Military system)).</li> <li>+? By event.</li> </ul> <p>A.6 When a MAJ is late behind its own group, it receives a bonus of +1 per level beyond the fifth counting from the marker of its group (Latin for countries belonging to two groups).</p> <p><b>B Result of the Technology operation</b> The result depends on whether the next Technology goal is available or not.</p> <p>B.1 Result “F” is always a failure: the money is spent and no level of technology is gained.</p> <p>B.2 If the next Technology goal is available, Results “S” or “S*” add 2 levels, Result “½” adds 1 level (no test under FTI);</p> <p>B.3 If the next Technology goal is not available, Result “S*” adds 2 levels, Results “S” adds 1 level, Result “½” is treated as normal: roll 1d10, if less or equal than FTI treat as “S” (never as “S*”, even if this was a “½”), otherwise, treat as “F”.</p> <p>B.4 Count <i>Tercios</i> and <i>Galleasses</i> as a “next Technology” (that can be available) for every country even if only HIS and VEN (respectively) gains the advantage of these technology goals.</p> <p><b>Example: Next goal unavailable.—</b> At turn 10, FRA has a land technology of 19, a FTI of 2, a MNU of <i>Metal</i> with two levels in <i>Champagne</i> and its king is <b>François I<sup>er</sup></b> with a MIL of 9. FRA tries to raise its Land technology. The base column is 9-MIL = 0 and FRA has 2 bonus columns for its MNU (notice that another metal MNU would be useless). So, the player decides to only makes a small investment and roll in column 2. There is no DRM.</p> <p>FRA rolls 5 and gets ½. The next technology is <i>Arquebus</i>, available on turn 11, hence it is not available now and ½ is treated as usual. So, FRA rolls another die, gets 2 which is smaller than its FTI, so the result is treated as “S”. Since the next technology is not available, this only gives 1 level and FRA is now level 20 in Land technology.</p> <p><b>Example: Next goal available.—</b> On turn 11, FRA still wants to increase its technology and still makes a basic investment, thus rolling again in column 2 at +0. FRA rolls 3 and get another ½. However, now the next technology (<i>Arquebus</i>) is available, so this gives 1 level to FRA. FRA reaches level 21. Since this is also the level of the <i>Arquebus</i> goal, FRA gets a bonus level and reaches 22. At the end of the phase (after technology improvement of other countries), <i>Arquebus</i> will need to be adjusted.</p> <p><b>Example: Lagging behind.—</b> Suppose that RUS is level 14 for Naval technology, and the Orthodox group is level 22. Therefore, RUS will receive a +3 (= (22-14) - 5) bonus to his die-roll for naval improvement.</p> <p><b>Example: Lagging behind goals.—</b> On turn 10, RUS has still not reached the Renaissance technology. So, for RUS the “next goal” is Renaissance, and it is available. RUS will use the resolution for “next goal available” even is the absolute next goal of every countries is <i>Arquebus</i>, which is not available. The resolution is relative to the situation of the country attempting the action.</p> <p><b>VI.8.1.3 New Technology</b></p> <p><b>A Reaching a new technology</b> After reaching a new technology, a country must pay a cost of conversion to this new technology.</p> <p>A.1 This cost of conversion has to be paid immediately for the totality of armies, fleets or detachments of the concerned country (except vassals) that are currently on the map.</p>	<p>Administration— master – 2016-04-14</p> <p>[R]127</p> <p>A.2 The cost is 10 ₮ per A⊕ or F⊕ counter, 5 ₮ per A⊖ or F⊖, 1 ₮ per detachment (any kind).</p> <p>A.3 Naval forces composed only of NGID do pay for technological conversion even if they usually do not benefit from it (there is still some minor changes done on the galleys over time).</p> <p>A.4 Minor countries never have to pay conversion costs, whatever their diplomatic status.</p> <p>A.5 Write this amount in line <b>B37</b> (Other expenses) of <i>ERS</i>, even if the new technology was obtained during the Events phase (i.e. it is a scheduled expense that must be done this turn).</p> <p><b>B</b> Remark that from now on, the price of the various forces is changed (according to the new technology).</p> <p>B.1 Since all administrative actions (including logistic) must be payed before any is resolved, troop raised the turn a new technology is reached are recruited at the old cost (the new technology is not reached when planning the construction of troops) but conversion cost must be payed for them. Follow the turn order, as well as the order of the lines on the <i>ERS</i> closely.</p> <p><b>C Technology advantage</b> Beyond the fact that countries with different technologies do not use the same columns on the combat result table, technology has the following effects:</p> <p>C.1 There is a +1 DRM to the die-roll for interception in land combat if the Land technology counter of the intercepting country is 6 boxes or more in advance related to the intercepted force.</p> <p>C.2 There is a +1 DRM to the die-roll for wind-gauge in naval combat if the Naval technology counter of the country is 6 boxes or more in advance related to the opposing force.</p> <p><b>Playing tip:</b> “6 boxes behind” is the limit where things occur. If a major is “6 boxes behind” its group, it starts getting a bonus to technology improvement. Conversely, groups may be “6 boxes behind” majors but no more before being adjusted. Between majors, being “6 boxes behind” gives a combat bonus to opponnent.</p> <p><b>VI.8.1.4 Special technologies</b></p> <p><b>A</b> Two technologies are available only for one country each:</p> <p>A.1 <i>Tercios</i> (Land) is available only for HIS.</p> <p>A.2 <i>Galleasses</i> (Naval) is available only for VEN.</p> <p>A.3 Check the special rules of these countries for details on the effect of these technologies.</p> <p><b>B</b> The markers for the special goals never block the progression of other technology markers.</p> <p>B.1 Neither do these goal prevent stacking of markers on their box.</p> <p>B.2 For example, any country (including HIS) may have its Land technology higher than the <i>Tercios</i> counter, or even on it, at any point.</p> <p><b>C</b> When resolving a technology improvement action, if a special goal is available but not the next regular goal, a country use the resolution for “next goal available” even if it cannot benefit from the special goal.</p> <p>C.1 Special goals undergo Time adjustment.</p> <p>C.2 Special goals never undergo Goal adjustment.</p> <p><b>D</b> The special goal is reached by a country if both:</p> <p>D.1 it's level is equal or larger than the level of the goal;</p> <p>D.2 and the goal is accessible (the current turn is equal or greater than the one written one the counter).</p> <p><b>E</b> A special goal marker may be removed as soon as it stop having effect, that is:</p> <p>E.1 It has been reached by the allowed country;</p> <p>E.2 and the next regular goal is available.</p> <p><b>VI.8.1.5 Former majors</b></p> <p><b>A</b> When a major powers become minor during the game (POR, VEN, POL), do the following with its technology markers (both for Land and Naval):</p> <p>A.1 If the marker is below the marker for the Latin group, immediately remove the marker of the former major.</p> <p>A.2 Otherwise, keep it.</p>
--	---

<p>[R]128</p> <p>Other administrative operations</p> <p><b>B</b> Every time the technology of the Latin group increase, also increase the technologies (both Land and Naval) of each former major by 1 level (if it is still on the track).</p> <p><b>C</b> As soon as the technology of the Latin group is at the same level (or above) than the one of a former major, immediately remove the marker of the former major. This occurs because only the group undergoes Cultural Group adjustment.</p> <p><b>D</b> When a former major (PORTUGALLIA, VENETIA, POLONIA) is involved in battle:</p> <p>D.1 use the technological level of the marker or this major if it is still on the track;</p> <p>D.2 otherwise, use the technological level of the Latin group.</p> <p><b>VI.8.1.6 Military Revolutions</b></p> <p><b>A</b> Some events/leaders give the possibility of Military Revolution. Only one of the two effects below may happen each turn for each country:</p> <p>A.1 <i>Catching up</i> If the country does not already have the newest technological goal that can be obtained, it gains it and its marker goes to the box immediately after it. It may gain several technologies in one turn (if it was really lagging behind) in which case it pay the conversion cost that many time.</p> <p>A.2 <i>Breakthrough</i> If the country has the highest technology goal available, and the next one will become available during the current period, the country obtains this goal, and its marker is placed <b>two</b> boxes ahead of the goal marker which is not moved ; the goal will not undergo Goals adjustment nor Time adjustment before the turn written on the counter. The country may not increase its technology further before the goal is regularly available for everybody. The country has to pay the conversion cost for reaching a new technology as usual.</p> <p><b>B</b> Note that military revolutions are free and replace the technology advancement action on the turns where they occur.</p> <p><b>C Spreading breakthrough</b> If a country participate in a battle including at least one of its <b>A</b> and one <b>A</b> of a country that has a technology which is not yet available, it gains the right to reach this technology on following turns.</p> <p><b>D</b> The two <b>A</b> involved may be either allies or enemies in said battle, that is one may learn both from it allies and it enemies.</p> <p>D.1 The countries that do not directly benefit from the breakthrough must still increase their technology as usual in order to reach the goal.</p> <p>D.2 The goal is still considered as not available when resolving the action.</p> <p>D.3 The goal does not undergo Goal or Time adjustment before being regularly available.</p> <p>D.4 Countries that did not directly benefit from the breakthrough must stop at the level immediately above the level of the goal (ie, the level immediately below the level of the country benefiting from the breakthrough).</p> <p>D.5 Neither the country benefiting from the revolution nor the ones getting the technology some other way may improve their technology further until the technology is available for everybody.</p> <p><b>E</b> Existing Military Revolutions:</p> <p>E.1 during event IV-7 (1) (English Civil War), due to <b>Cromwell</b> (<i>Baroque</i> (representing the New Model Army), or <i>Arquebus</i> in period III);</p> <p>E.2 during event IV-A (Thirty Years' War), due to <b>Gustav Adolf</b> (usually <i>Baroque</i>, representing <i>Läderkanonen</i> and other innovations);</p> <p>E.3 due to <b>Friedrich II</b> (<i>Lace</i>, representing the Oblique order).</p>	<p>Administration— master – 2016-04-14</p> <p>[R]129</p> <p><b>Example:</b> At turn 27, event IV-1 (1) (<i>Bohemian Revolt</i>) occurs and at turn 28, it degenerates into event IV-A (<i>Thirty Years' War</i>). At turn 29, SUE enters the war and, as per event description, it benefits from a <i>Military Revolution</i> on each turn of the war. Suppose that the current technology of SUE is only <i>Arquebus</i>. Since SUE does not have the best technology available (<i>Muskets</i>), it only has a <i>Catching up</i> and immediately gets <i>Muskets</i> for free. Nothing more happens. SUE still need to pay for conversion costs on this turn.</p> <p>On turn 30, SUE does have the best technology available. The next one is <i>Baroque</i>, available at turn 33, which is during the current period (IV). So SUE benefits from a breakthrough. It immediately gets <i>Baroque</i> and is placed 2 levels above (hence level 42). It may not move before <i>Baroque</i> is available (turn 33). SUE still need to pay for conversion costs on this turn (and is usually happy to do so).</p> <p>During turn 30, a battle takes pace at <i>Brettenfeld</i> involving 1<sup>A</sup> of SUE (plus Saxons allies) against 1<sup>A</sup> of AUS (plus Bavarian allies). The Austrians are severely beaten, but since they experimented the new tactics the hard way, they can now reach <i>Baroque</i> (of course, not before turn 31 since technology does not increase during military phase).</p> <p>At turn 31, SUE cannot gain the next technology as it is not available during this period, so even if it still benefits from a military revolution (one per turn during the event), it has no effect. AUS can get <i>Baroque</i> and succeed. It must stop at level 41 (one level above the goal) and may not move further before turn 33 (when the goal will be available).</p> <p>During turn 31, a stack composed of 1<sup>A</sup> of AUS and 1<sup>A</sup> of HIS fight against 1<sup>A</sup> of HOL. HOL learns the new tactics the hard way, but HIS learn them from watching their allies. Thus, at turn 32 both HOL and HIS will be allowed to reached <i>Baroque</i> (and stop at level 41). At turn 33, everybody may reach <i>Baroque</i> and countries that already have it may move further.</p> <p><b>VI.8.2 Competitions</b></p> <p><b>A</b> The <i>competition mechanism</i> is the way to settle all matters of conflicts of the administrative phase. This is used to reduce other people's trading fleets, settle the cases where two TP or COL are installed at the same time in the same province or where a single resource may be exploited by several outposts, etc. There are two kinds of competition: normal competition (one country pays for an action that will target another country), and automatic competition (some conditions are not respected in a specific zone, and there is competition until the conditions are respected).</p> <p><b>B Sequence</b> Normal competition happens during the administrative phase, at the same time as other administrative actions. Automatic competition happens at the end of the administrative phase, after all other administrative actions have been resolved, to solve conflicting situations. Automatic competition for the exploitation of exotic resources may also happen after the Peace phase (since peace may change owners of TP or COL or destroy TP).</p> <p><b>VI.8.2.1 Normal competitions</b></p> <p><b>A Target</b> The administrative action of normal competition targets an item of another country (major or minor).</p> <p>A.1 Competition may target: a commercial fleet, a TP, or a COL exploiting resources.</p> <p>A.2 A TP or COL can only be targeted if the country has a TP or a COL in the same Area.</p> <p>A.3 A commercial fleet in the ROTW may only be targeted if it is in a legal STZ according to section VI.7.4.1 (Trade fleet).</p> <p><b>B Reaction</b> The target country, may react by paying a <i>Basic investment</i>, <i>Medium investment</i> or a <i>Strong investment</i>.</p> <p>B.1 This does not count towards its own limit of actions. There is no limit on the number of reactions a country may do each turn.</p> <p>B.2 The player must be informed of all the details of the action (target and investment) before choosing whether to react. The player may wait to know all the competitions that are done against him before deciding whether to react for each of them. That is, Administrative actions (including competitions) should be all planned, then announced publicly before deciding to react; and only after reactions are decided can actions be resolved.</p> <p>B.3 Minor countries automatically react with a medium investment.</p> <p>B.4 Money expanded for reactions is recorded in line <b>B36</b> (Administrative reactions) of ERS.</p> <p><b>C Column</b> The competition actions are resolved in table VI.1 (Administrative Actions). The column is: (FTI country) + (Investment country) - (FTI target) - (Investment target).</p>
---	--

<p>[R]130</p> <p>Other administrative operations</p> <p>C.1 Investment adds (or subtracts) 0, 1, 3 columns for Basic, Medium, Strong (as usual).</p> <p>C.2 If targeting a TF in a CTZ, the owner of the CTZ adds its DTI to his FTI (as bonus if it is the acting country, malus if this is the target).</p> <p>C.3 If the target chooses not to react at all (no investment), then do not subtracts its FTI nor its DTI for finding the column.</p> <p><b>D Modifiers</b> The die-roll is modified as follows:</p> <p>D.1 <i>Commercial fleet</i> -1 if there is at least one commercial fleet of a third party in the target STZ or CTZ.</p> <p>D.2 <i>TP or COL</i> -1 if at least one third party TP is in the Area.</p> <p>D.3 <i>Wars</i> -1 if there were battles (including fighting privateers or piracy) in the Area or the STZ (or CTZ) in the previous turn.</p> <p><b>E Results</b></p> <p>E.1 A result of “S” decreases the level of the target by 1 (Exception: COL, see below). If this is the last level, remove the counter in the province or sea zone. If the TF or TP reaches level 3, turn the counter on its ☹ side.</p> <p>E.2 A result of “F” is a failure: nothing happens but the money is lost.</p> <p>E.3 A result of “½” is treated as normal: roll 1d10, if less or equal than FTI (use special FTI if allowed), treat as “S”, otherwise, treat as “F”.</p> <p><b>F Competition on COL</b> If a competition targets a COL and succeed, the COL does not loss a level.</p> <p>F.1 However, it loss, for this turn only, the possibility to exploit one of its resources.</p> <p>F.2 The resource is thus freed and can be exploited by other establishments in the Area.</p> <p><b>G freeing resources</b> If a COL is victim of competition, or a TP is victim of competition and does not have enough level to exploit all its resources anymore, it must free one resource (or more) for other establishments to exploit.</p> <p>G.1 The freed resource is chosen by the owner of the establishment. Minor countries always free the resources that currently cost less, in case of equality the resource whose maximum price is the smallest (at random in case of further equality).</p> <p><b>Example:</b> At turn 2, Da Gama, in a brief war against GUZARATE, manages to seize the TP in <b>S. Malabār</b> and thus exploits the <b>Spice</b> and the <b>PO</b> that it exploits. During turn 3, POR wants to seize the other <b>Spice</b> in the Area and does competition on the TP of GUZARATE in <b>Kolīkoṭ</b> (since POR has a TP in the same Area, it may do competition). POR chooses to do two competitions (its limit for the period) on the TP, each with Medium investment (60  total).</p> <p>The minor country automatically reacts with Medium Investment and a FTI of 2 (as explained in section VI.10 (Administration for minor countries)). Thus, the column is 5 (Special FTI of POR) + 1 (Investment of POR) - 2 (FTI of GUZARATE) - 1 (Investment of GUZARATE) = 3. There is a -1 DRM as battles (in this case sieges) occurred in the Area on turn 2 for the capture of the TP.</p> <p>For the first action, POR rolls 7 for a result of 6. It's a success and the TP of GUZARATE losses a level. For the second action, POR rolls 3 for a result of 2, it's a ½. A second roll gives 5, less than the FTI of POR (5), so it's also a success and the TP losses a second level.</p> <p>Since the TP of GUZARATE is now of level 1, it can not exploit 2 <b>Spice</b> anymore (it can only exploit 1). So it must free one of the two exploited resource (in this case, the choice has no importance). If POR also managed to raise the level of its newly conquered TP, it can immediately exploit this resource (otherwise, since there are no other establishment, the resource is not exploited immediately).</p> <p><b>VI.8.2.2 Automatic competitions</b></p> <p><b>A Conditions</b> Automatic competition occurs when abnormal situations arise after resolving administrative actions. Namely:</p> <p>A.1 A STZ or CTZ contains several TF⊕.</p> <p>A.2 A STZ or CTZ contains one level 6 TF and one or more other TF.</p>	<p>Administration— master – 2016-04-14</p> <p>[R]131</p> <p>A.3 Players disagree on the repartition of exploited resources in a given Area (and there has been a change of situation in this Area: new resource, new levels of COL/TP, successful competition freeing some resource, . . . )</p> <p>A.4 There are two COL or two TP in the same province (note that this may only happen if both were created this turn).</p> <p><b>B Mechanism</b> Automatic competitions use the following mechanism: every country involved in an automatic competition rolls one die and checks the result in table VI.1 (Administrative Actions).</p> <p>B.1 The column is usually (FTI country) - (Highest FTI of opponent). There is no investment.</p> <p>B.2 Treat ½ as usual by a roll under FTI.</p> <p>B.3 A “F” implies the loss of one level for the field of competition.</p> <p>B.4 The procedure is reiterated again until the conditions of automatic competition do not apply any more.</p> <p>B.5 The automatic competitions do not count in the limit of competitions for the turn.</p> <p>B.6 Resolve automatic competition in each STZ, CTZ or Area separately. That is, if a country competes against two different opponents in two different STZ, each one will use a different FTI of enemy.</p> <p><b>C</b> If there is a disagreement concerning the order in which automatic competitions should be resolved, they are resolved in a random order.</p> <p><b>D Fleets</b> All TF⊕ in a given STZ or CTZ must compete between them. Simultaneously, each level 6 TF competes again all other TF in its STZ or CTZ.</p> <p>D.1 Note that TF of <i>current</i> level 0 do exist and thus compete against TF of level 6 (and loose <i>maximum</i> level in case of failure).</p> <p>D.2 Each country use the highest FTI of opponents involved in competition against it.</p> <p>D.3 In its own CTZ, a country adds its DTI to its FTI (both as a bonus for itself and a malus for opponents), before finding the highest FTI.</p> <p>D.4 No modifiers apply.</p> <p>D.5 Each country that does not obtain “S” (including after ½) loss one level of TF.</p> <p>D.6 Repeat the procedure until the conditions for competition do not exist anymore.</p> <p><b>Example:</b> Suppose, that during period V, the CTZ <b>FRANCIA</b> contains a TF of level 6 of HOL (FTI 5), a TF of level 4 of FRA (DTI 2, FTI 4) and a TF of level 2 of ANG (FTI 5). Since there is a TF of level 6, it must compete against all other. FRA being in its CTZ adds its DTI to its FTI for a total of 6. Each other only has 5. Since ANG does not compete against FRA (both their TF could co-exist), it use the FTI of HOL as opponent. So, FRA rolls on columns 1 (6-5), ANG in column 0 (5-5) and HOL in column -1 (5-6). FRA rolls 7, it is a S; ANG rolls 4, ½, a second rolls give 7, thus a F and the level of the fleet decrease; and HOL rolls 3, a F.</p> <p>So, after 1 round of competition, there is a TF of level 5 of HOL, a TF of level 1 of ANG and a TF of level 4 of FRA. The English TF is no more in danger but there are still several TF ⊕, so competition goes on between HOL (column -1) and FRA (column 1) until one of them goes down to level 3.</p> <p><b>E Establishments in a province</b> There is an automatic competition when several countries happen to create a COL or TP at the same time in the same province.</p> <p>E.1 There is no automatic competition if a country creates a COL and one creates a TP in the same province at the same time: the COL remains.</p> <p>E.2 Use the highest FTI of opponents involved in the competition.</p> <p>E.3 Any country that does not roll “S” loss one level to its establishment.</p> <p>E.4 The competition ends when only one establishment remains in the province.</p> <p><b>F Resource exploitation</b> When players disagree on the exploitation of free resources in an Area, automatic competition occurs.</p> <p>F.1 Resources that were exploited on the previous turn are not subject to this competition unless they are first freed somehow (usually, by regular competition).</p>
---	---

F.2 New resources appearing in a province are subject to automatic competition if several countries have enough levels to exploit them and the players disagree.

F.3 When several establishments gain level in a given Area, there may be more levels than necessarily to exploit all the remaining resources, in which case automatic competition occurs if the players disagree.

F.4 A player may, as a diplomatic announcement, free some (or all) resource exploited by its establishment in some Area. Note that this happens before the Income computation, thus the freed resources will not generate income on this turn and can be exploited by someone else only at the end of the Administrative phase.

**G Area with multiple resources** In Area producing several kind of resources, competition is done for each resource in an order chosen by the involved country with the better initiative.

**H Order of competitions** If the player disagree on the order in which the competitions should be resolved, do it in a random order.

H.1 Players may renounce to their rights of exploitation at any time during the process. Typically, after a successful automatic competition in one Area, a player may magnanimously decide to leave the resources to someone else in another Area.

H.2 Agreements between players may be done globally for several Area. Any agreement announced publicly must be respected.

H.3 If a country chooses to stop competition before the end in a given Area (to avoid losing levels), it may not exploit any of the remaining non-attributed resources in this Area during this turn (in case every body else loses).

H.4 TP lose levels permanently, COL do not lose levels but only rights of exploitation for the turn. A TP reaching level 0 is destroyed.

H.5 Resources are not freed in case of *Speculation* (§E (Speculation) of section VI.12.1.2 (Variation of price)).

**Example:** HOL, ANG and FRA are competing for the exploitation of two *Spices* resources. HOL and FRA both have enough levels to exploit one and ANG can exploit both. ANG and HOL have TP while FRA has a COL.

After one roll, nobody lost and the situation is unchanged. ANG does not want to risk its levels and says it agree to leave the competition if the other leave 1 *Spice* to ANG. The other are reluctant but finally convinced after seeing the size of the English navy. So ANG takes 1 *Spice* and loses the possibility to exploit the second one this turn. The competition goes on between FRA and HOL.

At the next roll, both HOL and FRA are unsuccessful and thus lose the possibility to exploit the new *Spice* this turn. Since HOL had a TP in this competition, it losses a level. The French COL does not loss any level but is simply prohibited from exploiting one resource this turn.

ANG is not allowed to take the remaining free resource, even if it has the possibility to do so, because it has already renounced its rights this turn. This last *Spice* will be exploitable next turn, both by ANG without creating new Establishment (as one of its level still remains with no exploitation), by FRA without creating new establishment (as the "extra" level of COL will regain its rights for exploitation on the next turn) and by anybody successfully managing to create new levels.

## VI.9 Resolution of actions

**A** Once all players have chosen their actions, and written them down with all relevant column, DRM, and such, they can be resolved.

A.1 In practise, conflicts are few and players may start resolving their actions as soon as they have finish planning them.

**Playing tip:** Players should "pair" to solve their actions. One of them state his actions, one by one, with relevant column and DRM, and roll the die while the other check the table to see whether it's a success or a failure.

**B** The procedure to resolve the action is described together with the action itself, check the relevant Sections.

## VI.10 Administration for minor countries

### VI.10.1 Trade fleet

**Note:** The minor's trading fleets are characterised by three different levels, their current level, their maximum level, and their reference level. If the first two resemble those of the major countries, the third one is the threshold that gives the minor countries TFI actions.

**A Commercial fleet levels** Some minor countries have commercial fleets. Their *reference level* is the one of 1492, sometimes changed by events. Reference level is not reduced by competitions and piracy and may only change by events explicitly stating the change.

A.1 *Exception* PORTUGALLIA and VENETIA have their reference levels fixed by event III-6 (Portuguese Disaster in Africa) for PORTUGALLIA and at the time it becomes minor (usually 1615) for VENETIA.

**B** There also exists both a *current level* and *maximum level* for the fleet, as for the major countries, used to distinguish between losses by piracy and losses by competition.

B.1 Competitions and TFI affect both the *maximum level* and the *current level*.

B.2 Piracy (either privateers or pirates) diminish the *current level*, but not the *maximum level*.

B.3 *Current level* increase automatically at the beginning of the administrative phase if it is lower than the *maximum level*.

B.4 All in all, *maximum* and *current* levels work for minor countries exactly in the same way as they work for majors.

**C Commercial indexes** PORTUGALLIA, VENETIA, GENOVA, SUECIA, DANIA and HOLLANDIA have a FTI of 3 in periods I-III and 4 in periods IV-VII.

C.1 Other minors have a FTI of 2 in periods I-III and 3 in periods IV-VII.

C.2 HOLLANDIA has a DTI of 4. Other minors have a DTI equal to their FTI.

### VI.10.2 Colonisation by minor countries

**A** Former major countries (PORTUGALLIA and VENETIA) keep their colonial establishments when becoming minors. They have specific actions to increase them, depending on the events that already occurred.

A.1 Some other minor countries did explore and colonise during the game period. They do not have actions and this is abstractly represented by event part E-19.α (Minor country colonisation).

### VI.10.3 Administrative actions of minors

**A** Minor countries have administrative actions (TFI, COL, TP and concurrence).

A.1 Only PORTUGALLIA has COL, TP and concurrence actions. VENETIA also has a specific limit of TFI.

A.2 These actions are free (payed by the minor) and always made at medium investment.

A.3 These actions are never mandatory.

A.4 They are planned (and resolved) by the diplomatic patron of the country. If neutral, use the first major not at war against this minor in the preference order for controlling it.

#### B Portugal

B.1 Before event III-6 (Portuguese Disaster in Africa), PORTUGALLIA has each turn one COL, one TP and one TFI action.

B.2 Between event III-6 (Portuguese Disaster in Africa) and annexation by HIS, PORTUGALLIA has each turn one COL or one TP action (choice every turn) and one TFI.

B.3 While annexed by HIS, PORTUGALLIA has no actions but HIS may use its own for the minor.

B.4 After event VI-7 (Treaty of Methuen), if it is no more annexed by HIS, PORTUGALLIA has each turn one COL or one TP or one TFI action.

B.5 By exception, in period III, these actions are planned and resolved by HIS whatever the diplomatic status of PORTUGALLIA (and even if HIS is currently at war against PORTUGALLIA).

**Design note:** This latest exception prevents other players from poorly playing a country that will soon be part of HIS for a long time.

### C Venice

C.1 During periods IV and V, VENETIA has 1 TFI each turn.

C.2 Afterwards, it is treated as other minor countries.

### D Vassals

D.1 Vassals have no actions. However, their diplomatic patron may use its own TFI for the benefits of a vassal.

D.2 In this case, the patron has to pay for the action.

### E Other cases

E.1 Non-vassal minors have 1 TFI each turn if and only if there is at least 1 CTZ/STZ where their *maximum level* is strictly less than their *reference level*.

E.2 This action must target one CTZ/STZ where the *maximum level* is strictly less than the *reference level*.

## VI.10.4 Logistic of minors

A Like major countries, minors have to maintain and recruit troops. See section VII.2.4 (Maintenance of Minor Powers) and section VII.3.5 (Recruitment of Minor Powers) for details.

## VI.11 Administrative expenses

A Write in line **B38** (Adm. total) of ERS the sum of line **B26** of ERS, line **B27** of ERS and all lines between line **B29** of ERS and line **B37** of ERS included.

## VI.12 Exotic resources price variation, Trade centres and convoys

### VI.12.1 Price of exotic resources

#### VI.12.1.1 Exploitation level

**A Exploited quantities.** The “exploited quantities” markers must always be adjusted to their correct values (in practice, it is usually sufficient to do it at the end of each administrative and peace phases).

A.1 The following things may require an adjustment of the counters: new colonies or trading posts, competition, burned trading posts, peace conditions implying the assignment of resources exploitation to other trading-posts, events that may have changed the number and level of trading-posts or colonies, and any other event that may change the exploitation of exotic resources.

A.2 Minor ROTW countries do exploit resources where they have a TP or a COL. They do not exploit in other provinces (typically in provinces they own but without an establishment).

A.3 Even if they do not appear at the same time, the *Sugar* in **BRAZIL** and elsewhere is still considered to be the same resource. Same thing goes for the *Cotton* in **AMERICA** and **ASIA**.

**B Bookkeeping quantities.** Each resource has an *exploited quantity* marker to denote on the Exotic resource tracks the amount which is exploited.

B.1 There are 3 Exotic resource tracks, depending on whether the maximum exploitable quantity is 20 (*Product of America* *Cotton*, *Salt* or *Silk*), 30 (*Fish*) or 40 (*Products of Orient*, *Spice*, *Fur*, *Sugar* or *Slaves*). There are reminders near them to recall which track to use for which resource.

B.2 There is also an *Exotic resources sheet* with one box per exploitable resource. This is a global sheet and whenever a player exploits (or stops to exploit) a resource, he should note it on this sheet. This allows for easier counting of the exploited quantities and avoid some errors where players accidentally exploit the same resource twice.

C Depending on the amount of resource exploited and the maximum amount exploitable for this resource (20, 30 or 40), each resource has an exploitation level which is either *rare* (green), *low* (blue), *medium* (white), *large* (purple), *high* (yellow) or *excess* (red).

C.1 These levels are colour-coded on the tracks for easy reference.

C.2 The colour of the box in which each *exploited quantity* marker indicates the exploitation level for this resource.

#### VI.12.1.2 Variation of price

##### A Economic situation.

A.1 The economic situation die roll gives an *economic situation* on table III.4 (Random Piracy and Economy Roll). The economic situation can be one of *Crisis*, *Normal* or *Boom*.

A.2 Remember that this roll is done during the Event phase as it also controls apparition of piracy. See section III.4 (Economic situation). The situation is recorded on the ROTW map.

A.3 Crossing the economic situation with the production level of each resource gives a basic variation of the prices, from -2 to +2 boxes (see table VI.3 (Exotic resources variations)).

A.4 table VI.3 (Exotic resources variations) is recalled on the ROTW map, near the exotic resources tracks, using the same colour-code as them for exploitation levels.

condition	rare	low	medium	large	high	excess
Crisis	0	0	-1	-1	-1	-2
Normal	+2	+1	+1	+1	0	0
Boom	+2	+2	+2	+1	+1	+1

Table VI.3: Exotic resources variations

B On each price marker of each resource, there are two numbers: left is for the low price threshold, right is for high price threshold.

**C Market variation.** Roll a die for each resource, and add it to the current price of the resource. If the result is less or equal to the low threshold, then the market variation will be +1. If the result is greater or equal to the high threshold, the market variation will be -1. Otherwise, the market variation is 0.

C.1 The combination of the basic variation and of the market variation gives the number of boxes the price marker will move to the right (positive value) or to the left (negative value).

C.2 The price variation cannot exceed 2 boxes to the left or to the right. If the two variations sum up to +3 or -3, use +2 or -2 instead.

D There is a minimal value and maximal value for all resources. Under no circumstances shall the price marker go out of those bounds.

D.1 The price marker stops when reaching the maximum or minimum value.

D.2 These values are written in the exotic resources prices track, on the top line for the minimal price and on the bottom line for the maximum price.

**E Speculation** A MAJ may speculate on a product to have a better chance of increase of the price of this product. He must announce it before the price adjustment, and he will gain only half of his normal income for this resource.

<div data-bbox="114 92 1117 124"> <div>[R]136</div> <div>Exotic resources price variation, Trade centres and convoys</div> </div> <div data-bbox="114 172 1117 459"> <p>E.1 Speculation on price must be announced during the Diplomatic phase, as a diplomatic announcement.</p> <p>E.2 If he has either a total or partial monopoly (see §D (Monopoly on Exotic Resources) of section II.8.3 (Exploitation of Exotic resources)), he puts the production counter upside-down. The resource is considered to have a <i>rare</i> production level (green) for the computation of its basic variation.</p> <p>E.3 If he has no monopoly but at least 4,6 or 8 units exploited (according to the maximal production of the product that could be 20,30 or 40), the counter is put left-to-right to show that a -1 will be added to the roll for market regulation of this resource.</p> <p>F Price for all resources is computed independently, but there is only one economic situation roll, common to all resources.</p> <p>F.1 Price variation comes from the global market dynamism, and individual adjustments depending on threshold prices.</p> </div> <div data-bbox="114 475 1117 738"> <p><b>Example: Prices of exotic resources.—</b> The production of <i>Spice</i> is 32, current price is 7, and the production of <i>Salt</i> is 3, current price is 6 (rightmost box). The die-roll of economic situation gives a 10: a Boom. First thing, the inflation marker is moved one box to the right. The thresholds for <i>Spice</i> are 8 and 16, the thresholds for <i>Salt</i> are 7 and 15.</p> <p>The basic variation of the <i>Spice</i> price is +1 (since there already is high production). A dice is rolled for a result of 9. Adding the price (7) to it yields a total of 16, larger than the high threshold, thus giving a market variation of -1. Therefore, the price variation of <i>Spice</i> is +1-1=0, the price does not change at all.</p> <p>The basic variation of the <i>Salt</i> price is +2, because there is only a rare production. Adding a die-roll of 1 to the price (6) yields a result of 7, smaller than the low threshold, thus giving a market variation of +1. The total variation is thus +3, which is capped at +2. The price marker should be moved 2 boxes to the right. However, the maximum price for <i>Salt</i> is the leftmost 7 box, so the marker stops there.</p> </div> <div data-bbox="114 770 1117 802"> <div>VI.12.2 Attribution of centres of trade and convoys [to move in Interphase]</div> </div> <div data-bbox="114 818 1117 986"> <p>A Convoys represent heavy trade of specific resources (usually gold). They are given to the country dominating trade in this resource (usually exploiting most of it). They do not bring income per se but must be brought back to Europe where the gold they carry can be unloaded. However, the journey can be dangerous and convoys can be attacked and seized by pirates, privateers or enemy fleet.</p> <p>B There are four possible convoys: the <i>Levant</i> fleet of İzmir, the <i>East Indies</i> convoy, the <i>Flota de Oro</i>, and the <i>Flota del Perú</i>.</p> </div> <div data-bbox="114 1002 1117 1034"> <div>VI.12.2.1 The convoys</div> </div> <div data-bbox="114 1042 1117 1511"> <p>A The convoys are represented as a special NTID, and may be moved during the military phase (see section VIII.6.1 (Convoys))</p> <p>A.1 They represent a certain number of NTID, each carrying 15 ₪ that is credited only upon arrival in a port during the military or redeployment phases, to the owner of the port (or its Patron, if it is a minor vassal).</p> <p>A.2 The sum is reported in line A10 of ERS.</p> <p>A.3 They can be attacked by either enemy fleets, pirates or privateers (see section VIII.6.1 (Convoys)).</p> <p><b>B Levant Convoy</b> This convoy contains 2 to 4 NTID, each carrying an income of 15 ₪. It appears every turn in <b>İzmir</b>, at the administrative phase, if the CC Grand Orient is owned by TUR.</p> <p>B.1 If <b>İzmir</b> does no more belong to TUR, any Turkish port on <i>MEDITERRANEAN SEA</i> will do instead.</p> <p>B.2 The actual content of the Convoy depends on the current income of the CC Grand Orient: 4NTID if 100 ₪ or more, 3 NTID if 50 ₪ or more and 2 NTID if less than 50 ₪.</p> <p>B.3 The convoy is attributed by TUR to any other player of his choice, provided that this player either has a port in <i>MEDITERRANEAN SEA</i> (owned or vassal) or controls the CC Meditteranee, and it accepts the convoy. This attribution is done as a diplomatic announcement (and thus can be part of a larger agreement such as “buying” the convoy).</p> <p>B.4 If TUR attributes the convoy to another player, it receives 20 ₪ as soon as the convoy reaches the other player (in line A10 of ERS).</p> </div>	<div data-bbox="1120 92 2125 124"> <div>Administration— master – 2016-04-14</div> <div>[R]137</div> </div> <div data-bbox="1120 172 2125 547"> <p>B.5 The Turkish player may refuse to grant the convoy or possibly no one accepts it. In such a case, TUR immediately loses 20 ₪ from its RT and 1 Stability.</p> <p>B.6 If the convoy is not attributed to the player that controls the CC Meditteranee, this player receives an immediate and temporary CB against TUR (overseas or normal) at this turn only.</p> <p>B.7 The convoy can be escorted by TUR or by the receiving MAJ. TUR decides when the convoy leaves the port (and thence, who escorts it).</p> <p>B.8 Income of the convoy is credited in the player’s treasury immediately upon arrival in any home port or vassal port of that player in Europe, i.e. during the Military or Redeployment phase (and not the Logistics sub-phase).</p> <p>B.9 Any player at war with either TUR or the receiver of the convoy (except TUR and the receiver) may try to intercept the convoy. The escorting force may always participate in the defence of the convoy, whatever the status of war between the interceptor and the escort (see section VIII.6.1 (Convoys)).</p> <p>B.10 If the convoy never arrives at its final destination (in a port of the designed MAJ), the penalty for not attributing the convoy is applied immediately to TUR.</p> </div> <div data-bbox="1120 563 2125 818"> <p><b>C East Indies convoy</b> It is attributed to the player that does exploit the most of the following resources: Silk, Products of Orient, Spices, and at least 10 of them.</p> <p>C.1 In case of ties, the convoy is attributed, among the tied countries, in the first one in the following order: the country controlling the <i>Atlantic Trade Centre</i> ; HOL (before 1700, turn 42); ANG (after 1700, turn 43). If the tie cannot be broken that way, the convoy is not attributed.</p> <p>C.2 The East Indies convoy must start from a COL⊕ or a TP⊕ in <b>ASIA</b>, and must reach a port of its owner on the Europe map. It is worth 4 NTID carrying 15 ₪ each.</p> <p>C.3 The gold obtained when reaching a port on the Europe map with a convoy is accounted for in line A10 of ERS of the receiving player (either the original owner or someone else seizing it during the trip).</p> </div> <div data-bbox="1120 834 2125 978"> <p><b>D Spanish convoys</b> The Spanish gold fleet can only transport gold stored in Spanish ports. The <i>Flota de Oro</i> and the <i>Flota del Perú</i> are each equivalent to 5 NTID.</p> <p>D.1 The <i>Flota de Oro</i> appears in a port on the Atlantic coast, the <i>Flota del Perú</i> appears in a port on the Pacific coast.</p> <p>D.2 Spanish convoys can load and unload gold in ports, thus transporting gold from port to port, and finally to Europe (see §D (Flota de Oro) of section VIII.6.1 (Convoys)). They are initially empty, as opposed to the other convoys.</p> </div>
---	--

# Logistic

## Chapter VII

**Design note:** This Chapter describes the Logistic aspects of the Administrative phase: Maintenance of old forces, buying new ones and Leaders management.  
Beware that most of this is interleaved with administrative actions (described in the previous Chapter). Logistic rules are grouped here for easier reference.

### VII.1 Description of Military forces

We describe here the different kinds of military forces: troops, navies and fortifications. Troops and navies work in similar ways, especially with the notion of *detachment*, but with small differences.

All these forces are in limited amount. The number of counters provided in the game is an absolute limit on what is usable. Different countries have different number of counters of each kind.

Exception: PIRATÆ IP, BARBARIA troops, neutral fortresses and revolted troops are not limited. If you need more than provided by the game, you may use whatever you wish to represent them.

#### VII.1.1 Land forces

##### VII.1.1.1 Troops

**A Troops** are represented by three different kinds of counters corresponding to various size of land forces: *Army* (A), *Land Detachment* (LD) and *Land Detachment of Exploration* (LDE).

A.1 The basic count unit is one LD.

**B Detachments.** One LD represent some infantry and cavalry. The precise number of them depends on the country and the period. LD are abstract representation of small field forces and consists roughly in 1000 to 10000 soldiers.

**C Armies.** A counters have two sides. An A⊖ is two LD plus some field and siege artillery. An A⊕ is four LD plus more artillery.

**D Breaking armies.** An A counter can be broken into an equivalent number of LD (2 or 4) of the same country at any time in the game. Note that artillery is lost in the process.

D.1 Similarly, an A⊕ can be turn into one A⊖ and two LD at any time.

D.2 However, an A⊕ may not be broken into two A⊖ as this would create an A counter (see below).

D.3 Especially, A can be broken during movement or to satisfy losses (whether combat or attrition). If one A⊕ suffers a 1 LD loss, there is one A⊖ and 1 LD remaining.

D.4 However, if there are not enough LD counters to satisfy the loss, heavier loss are suffered. If one A⊖ suffers a 1 LD loss but there are no more unused LD of the same nationality available, then the entire A⊖ is annihilated.

**E Creating and reinforcing armies.** The only way to create a new A counter is to buy it during the Administrative phase (logistic segment).

E.1 Especially, it is never possible to “merge” two LD into an A⊖ nor to break an A⊕ into two A⊖.

E.2 On the other hand, it is possible to reinforce an A⊖ with two LD (in one stack) and turn it into an A⊕. This can be done at any time in the game.

E.3 It is also possible to merge two A⊖ into one A⊕.

**F Special armies.** The armies of SRI and PERGRINI act as containers. Each may contain up to 4LD of some nationality and can be created at any point during the turn. The precise contents of these armies must be written down in order to give back the LD to their owners when the army is broken.

F.1 As an exception to normal rules, these A can be created during the military rounds.

**G Detachments of Exploration.** One LDE represents roughly one third of a LD.

G.1 LDE can only exists on the ROTW map (including European provinces on the ROTW map). As soon as one LDE enters the European map, it is immediately destroyed.

G.2 One LD can be split in 3 LDE at any time (especially to satisfy losses in the ROTW). 3 LDE stacked together must be turned into 1LD after movement.

G.3 For maintenance and purchase, 1LDE costs as much as half a LD.

G.4 LDE are never counted in stacking and supply limits.

**H Natives.** Each ROTW Area holds a certain number of natives per province. They are written on the ROTW map in number of LD.

H.1 Counters are provided to remember losses of natives in each province. You may use A⊕/⊖ to represent 4/2 LD of natives but this is for convenience only: they are not considered as A for game purposes. These counters are in unlimited quantity.

##### VII.1.1.2 Military doctrine

**A** Each country has an *Army Class* written in roman numerals on its counters.

A.1 The class of a country determines three factors: its *Size*, its *Cavalry* and its *Artillery*.

A.2 Some countries (mostly majors) belong to one army class but have special cases for artillery and cavalry.

A.3 The army class of each country can be read in table VII.1 (Army Classes — Repartition and Size). There is one line per class with its number and name on the left and the list of countries belonging to it on the right.

A.4 Most minor countries are grouped according to their cultural groups.

A.5 The army class of minor countries can also be found in their description in the appendices under the name “Military doctrine”. It is also written on each counter.

Class	Name	Period							Countries
		I	II	III	IV	V	VI	VII	
IM	<i>Russia</i>	7	7	7	4	3	4	4	RUS
I	<i>Hordes</i>	7	7	7	4	4	4	4	TUR, Khanates, Cossacks
	<i>Reformed TUR</i>	4	4	4	2	2	2	2	TUR after reform M-1a
II	<i>Orient</i>	4	4	4	2	2	2	2	Islam
IIIM	<i>Mixed Orient</i>	4	4	4	2	2	2	2	POL, HUNGARIA, Orthodox
IIIM	<i>Mixed Occident</i>	0	0	0	2	2	3	3	SUE, SAXONIA, SABAUDIA
III	<i>Occident</i>	0	0	0	0	0	2	2	VEN, HOL, HIS,POR, AUS*, Latin
IV	<i>Major</i>	2	2	2	2	3	4	4	FRA, PRU, AUS, UNITED STATES
IVM	<i>Mixed Major</i>	0	0	0	0	0	2	4	ANG
A	<i>Other</i>	7	7	7	7	7	4	4	Asia, Americas, Africa

Table VII.1: Army Classes — Repartition and Size

**B Size.** The army size of each country, per period, can be read in table VII.1 (Army Classes — Repartition and Size) by cross-referencing the army class of the country (or its name) with the current period.

**B.1** The result is a number between 0 and 7 representing an abstract measure of the typical size of forces fielded by this country during that period.

**B.2** A larger size means that the country usually fielded more men in battles. However, this is an abstract measure and there is no direct correspondence between the size and an actual number of soldiers. Moreover, these numbers are relative (to other countries). A decreasing size does not mean that the country had smaller armies, but rather than its neighbours started having larger ones.

**B.3** Countries with larger size do more damage in battle when facing countries with smaller size.

**C Cavalry** is abstractly represented by giving a small bonus in battle to certain classes of armies during certain periods of the game.

**D Artillery.** Each  $\Delta\ominus$  and  $\Delta\oplus$  contains a certain number of artillery. This number is an abstract representation (rather than an actual number of guns and howitzers) of the amount and efficiency of field and siege artillery.

**D.1** The number of artillery per  $\Delta\oplus$  can be read in table VII.2 (Artillery per  $\Delta\oplus$ ) by cross-referencing the country (or class) with the current period.

**D.2** An  $\Delta\ominus$  always contains half the number of artillery of an  $\Delta\oplus$  (rounded down).

Nation	I	II	III	IV	V	VI	VII
VEN	2	3	3	3	4	5	5
HOL			4	4	5	5	5
AUS*	2	2	3	4	4	5	6
POR	2	3	3	3	4	5	5
SUE	2	2	3	4	4	5	5
HIS	2	3	4	4	4	5	5
FRA	2	3	3	4	5	6	6
ANG	2	2	3	4	4	6	6
TUR	1	2	3	4	4	4	4
<i>Yeniçeriler</i>	2	3	4	4	4	4	4
RUS	1	1	1	2	3	4	4
<i>Reformed</i>	1	1	1	3	4	6	6
POL	1	2	3	3	4	4	4
PRU	2	2	3	3	4	6	6
UNITED STATES						6	6
Other countries							
I/II	1	2	3	3	3	3	3
II/III	2	2	3	3	4	5	5
III/IV	2	2	3	3	4	5	5
Asia A	1	1	1	1	1	2	2

$\Delta\ominus$ : divide by two, round down.

**Artillery value** = value of one  $\Delta$  counter, +2 if other

$\Delta$  with art.  $\geq 2$  else +1 if other  $\Delta$  with art. 1

Table VII.2: Artillery per  $\Delta\oplus$

**E Artillery of stacks.** When two (or more)  $\Delta$  are stacked together, their artillery numbers do not simply add. Instead, use the following computation:

**E.1** Take the artillery value of one  $\Delta$  in the stack (the larger the better); add **+2** if there is another  $\Delta$  with 2 or more artillery otherwise, add **+1** if there is another  $\Delta$  with 1 artillery.

**Example:** FRA is of class IV ("majors"). In periods I to IV, it has a size of 2, then 3 in period V and 4 afterwards. In period II, FRA has 3 artillery per  $\Delta\oplus$ . Thus, it has only 1 artillery per  $\Delta\ominus$  (3/2, rounded down). A stack with 2  $\Delta\oplus$  of FRA is thus considered to have 3 (first  $\Delta$ ) + 2 (second  $\Delta$  with 2 or more artillery) = 5 artillery for all game purposes (battles and sieges). A stack of  $\Delta\oplus$   $\Delta\ominus$  has 3 + 1 (second  $\Delta$  with only 1 artillery) = 4 artillery. Lastly, a stack of 3  $\Delta\ominus$  of FRA only has 1 (first  $\Delta$ ) + 1 (second  $\Delta$  with 1 artillery) = 2 artillery (i.e. the third  $\Delta$  counter does not add any artillery to the stack).

## VII.1.2 The Navy

**A Naval forces** are represented by three different kinds of counters corresponding to various sizes of naval forces: *Fleet* (F), *Naval Detachment* (ND) and *Naval Detachment of Exploration* (NDE).

**A.1** The basic count unit is one ND. However, there are several kind of ND corresponding to various type of ships.

**B Warships and Galleys.** ND can represent different kinds of ships. Mostly warships, galleys or transports.

**B.1** Thus, there are several kind of ND: *Naval Warship Detachment* (NWD), *Naval Galley Detachment* (NGD) (also the *Galleass*, written VGID because they are first used by VEN) and *Naval Transport Detachment* (NTD).

**B.2** All those naval detachments are treated differently, but some rules apply to all. In this case, the generic term ND will be used.

**B.3** VGID are considered NGD when the case apply (i.e. whenever there are rules for NGD without special cases for VGID, these rules apply).

**B.4** NGID can only exists in the *MEDITERRANEAN SEA* and the *BALTIC SEA*.

**C Detachments.** One ND represents roughly 2 to 6 first category ships (galleys, galleons, man-o-war, . . . ) plus various second category ships. The precise number depends on the country, the period and the kind of ships involved.

**C.1** NTD only contains transport ships. They do not participate in battles but can be used to transport troops or gold.

**D Fleets.** F counters are containers. They may hold a certain number of NWD (or NGD) plus some NTD.

**D.1** Unlike  $\Delta$ , the exact content of a F counter depends both on countries and period (representing evolution of the naval doctrines).

**D.2** The (maximal) content of the fleets is detailed in the table VII.3 (Countenance of Fleets). It can contain a number of NWD (a NGD counts for half a NWD) and a number of NTD. This number depends on the period and the country involved.

**D.3** There is one line per country (or class) and one column per period. Each box contains four numbers as " $x/y : x'/y'$ ". The first two ( $x/y$ ) are the maximum number of NWD/NTD in a  $F\ominus$  and the last two ( $x'/y'$ ) are the maximum number of NWD/NTD in a  $F\oplus$ .

**D.4** A F is put on the side  $\oplus$  only if there is not enough room in a  $F\ominus$  to accommodate all the ND. The counter is turned as necessary.

**D.5** Since the exact content of F counters is not fixed, it must be written down. There is space for this on the colonial record sheet of each country.

**E Creating and breaking fleets.** A F may be broken into several ND (depending of its content) at any time.

**E.1** Similarly, several ND can be merged into a F (or incorporated into an existing one) at any time. F counters may be created this way.

**E.2** Even if it does not provides a direct military advantage (such as the artillery for  $\Delta$ ), using F rather than ND usually decrease maintenance cost and allows for more concentration of forces (because of stacking limits).

**F Detachments of Exploration.** One NDE represents roughly one or two warships (one third of a NWD).

**F.1** NDE can exists both on the ROTW and European maps.

**F.2** One NWD (only) can be split in 3 NDE at any time (especially to satisfy losses). 3 NDE stacked together must be turned into 1NWD after movement.

Country ↓	Period NWD/NTD (F-):NWD/NTD (F +)						
	I	II	III	IV	V	VI	VII
ANG	2/1:4/1	2/1:4/1	2/1:5/1	2/1:5/2	3/1:6/2	3/1:7/2	3/1:7/2
AUS	2/1:4/1	2/1:4/1	2/1:4/1	2/1:4/1	2/1:4/1	2/1:4/1	2/1:5/2
HIS	2/1:4/1	2/1:4/2	2/1:5/2	3/1:6/1	3/1:6/2	3/1:6/2	3/1:6/2
HOL			2/1:4/1	3/1:5/1	3/1:6/1	3/1:6/2	3/1:6/2
FRA	2/1:4/1	2/1:4/1	2/1:5/1	2/1:5/1	3/1:6/2	3/1:7/2	3/1:7/2
POL	1/1:2/1	1/1:3/1	1/1:3/1	2/1:4/1	2/1:4/1	2/1:5/2	2/1:5/2
RUS		1/1:2/1	2/1:3/1	2/1:5/2	2/1:5/2	3/1:6/2	3/1:7/2
TUR	2/1:4/1	2/1:5/1	2/1:5/1	3/1:5/2	3/1:5/2	3/1:6/2	3/1:6/2
VEN	2/1:4/1	2/1:5/1	2/1:5/1	2/1:5/2	3/1:5/2	3/1:6/2	3/1:6/2
SUE	2/1:4/1	2/1:4/1	2/1:4/1	2/1:5/2	2/1:5/2	3/1:5/2	3/1:6/2
II, A	2/1:4/1	2/1:4/1	2/1:4/1	2/1:4/1	2/1:5/1	2/1:5/1	2/1:5/1
III,POR	2/1:4/1	2/1:4/1	2/1:4/1	3/1:5/2	3/1:5/2	3/1:6/2	3/1:6/2

Table VII.3: Countenance of Fleets

F.3 For maintenance and purchase, 1NDE costs as much as half a NWD.

F.4 NDE are never counted in stacking and supply limits.

**G Pirates.** The last naval forces are pirates and privateers. They represent independent sailors that attack trade fleets. Privateers (P) work for one country; pirates are represented by the (abstract) minor country PIRATÆ (who mostly has P units). P have to be maintained or bought.

**H Trade fleets (TF)** are not naval forces. They only represent trade activity (not specific ships), do not move and can only be attacked by pirates and privateers.

**Example:** In period III, the size of English fleets is “2/1:5/1”. Thus, a F ⊖ of ANG may contain up to 2NWD and 1NTD while a F ⊕ may contain up to 5NWD and 1NTD.

If ANG wishes to group together 3NWD (and no NTD), it must use a F ⊕ (and pay the maintenance cost for one) because this cannot fit within one F ⊖.

In period III, TUR has also a fleet size of “2/1:5/1”. However, since NGD only count as half a NID in fleet countenance, one F ⊕ of TUR may hold up to 10NGD and 1NTD.

### VII.1.3 Fortifications

**A Fortifications** are immobile forces used to defend provinces. There are two kinds of fortifications: fortresses and forts. In Europe, fortifications represent the whole defence system of the province thus including several actual fortresses, citadels, fortified towns, . . .

A.1 Fortifications are also supply sources for both land and naval troops.

#### VII.1.3.1 Fortification counters

**A Fortresses** have a level between 1 and 5.

A.1 Each European province, as well as some ROTW provinces, has a basic fortress of level either 1 or 2 drawn of the map.

A.2 Fortresses of higher level may be built provided the country has a sufficiently high technology.

A.3 Fortresses may lose levels due to sieges. If this puts the fortress below its basic level, use the white level 1 counters to denote it. In no case can the fortress of an European province go below 1.

A.4 Note that fortresses counters are double-sided. Thus, building a fortress prevents a country from building the one on the back of the counter. It is always possible to switch one fortress counter for another (of the same level (and country)) if the need arise.

**B Forts** are sometimes referred to as “level 0 fortresses”. They may only exist in the ROTW.

B.1 All colonial establishments (COL and TP), as well as missions automatically have a fort.

B.2 Other forts may be built during the military phase by land forces.

B.3 A COL of level 6 is considered to be an European province. Thus, it gains for free a basic fortress of level 1. Use white level 1 counters to denote it. Since this is a basic fortress, there is no need to pay for its maintenance.

**C Præsidios** are small fortifications built in enemy territory to try and control access to the sea rather than the land itself.

C.1 In European provinces where there is a circled anchor (whatever its colour), a foreign country may build a *Præsidio*. See section IX.6 (Building *Præsidios*) for building it and section VIII.10.7 (Effet d'un presidio (COMPLETER avec 53.8)) for its effects.

**D Arsenals.** Some countries have fortresses counters with a gold anchor on them. These are *arsenals*.

D.1 Arsenals can only be built in the ROTW (exception: *Gibraltar*, *Sebastopol* and *S'-Petersburg*).

#### VII.1.3.2 Fortifications as Supply sources

**A Land Supply.**

A.1 Forts may only supply detachments (LID or LIDE).

A.2 Other fortresses can supply any number of land troops, whatever the level of the fortress.

A.3 COL and TP, although they only have a fort, are supply sources for any number of land troops (that is, the establishment has more supply capacity that its intrinsic fort).

**B Naval Supply.**

B.1 Forts may only supply detachments (NID or NIDE).

B.2 Regular (non-arsenal) ports can supply any number of naval stacks containing at most one F counter (each), whatever the level of the fortress.

B.3 Arsenal can supply any number of naval forces of any size.

B.4 COL and TP, although they only have a fort, are supply sources as regular ports: each can supply any number of naval stacks containing at most one F counter (that is, the establishment has more supply capacity that its intrinsic fort).

**Design note:** Note that supply limits are cumulative. That is, a single fortress may supply as many stacks (land or naval) as wanted, as long as it can supply each of them individually. There is no “using up” of the supply capacity. The “extra supply capacity” of COL or TP (with respect to their fortification level) is reminded in the size of the counter: they use big counters because they have a lot of food.

#### VII.1.4 Veteran and Conscripts

**A Veterans and Conscripts.** All land forces can be either *Veteran* or *Conscripts*. A *Veteran* army has seen more battles than conscripts, is better trained, and less likely to flee in the presence of the enemy. A *Conscript* army is formed of newer soldier and paid less.

A.1 *Veteran* have a bonus in battle (better moral). However, their maintenance cost is also higher.

**B Who is Veteran?** If the country is at peace (being only engaged in *Overseas Wars* (see section IV.5.4 (Overseas Wars)) and limited interventions (see section IV.5.5.3 (Signing an Alliance for Intervention)) counts as being at peace), all land forces are maintained as *Veteran* forces, using the *Peace maintenance* price.

B.1 If the country is at war, then all land forces already existing at the beginning of turn can be maintained (unit by unit) as either *Veteran* or *Conscript*. Newly recruited units are *Conscripts*.

**C Mixed stacks.** A force formed by stacking or merging several units is *Veteran* only if more than half of the LID composing the units are *Veteran*.

**Example:** An  $\text{A}\oplus$  composed by the merging of 1 Veteran  $\text{L}\ominus$  and 1 Veteran  $\text{A}\ominus$  and 1 Conscript  $\text{L}\ominus$  is considered to be a Veteran unit. But if this  $\text{A}\oplus$  is stacked with an  $\text{A}\ominus$  of Conscripts, this stack is considered Conscripts (since there are as many Conscripts as there are Veteran). However, if one  $\text{L}\ominus$  of this stack is destroyed (due to battle or attrition), one  $\text{L}\ominus$  of Conscripts will be removed (leaving either  $2\text{A}\ominus$  and  $1\text{L}\ominus$  or  $1\text{A}\oplus$  and  $1\text{L}\ominus$ ), and the stack as a whole will be Veteran.

**Playing tip:** Think twice before upkeeping troops as *Conscripts*. The extra moral will make a huge difference in battles and is usually worth your money.

**D Navy** Naval forces are *Veterans* if they are maintained from a previous turn, or *Conscripts* if there are newly recruited this turn.

D.1 The difference only occurs for Naval technologies *Vessel* and *Three-decker*.

## VII.2 Maintenance

**A** Each turn, forces existing from a previous turn must be maintained or disbanded. Maintaining troops costs money.

### VII.2.1 Basic forces

**A** Depending on the period, each major country is entitled to some *basic forces*. These forces are maintained for free. *Basic forces* can be found in the player's aids.

A.1 The units maintained as part of the *basic forces* are maintained as *Veteran*.

**B** The basic forces comes in three kinds: specific land forces (such as  $\Delta\oplus$ ,  $\Delta\ominus$ ,  $3\text{LD}$ ), specific naval forces (such as  $\text{F}\oplus$ ,  $1\text{ND}$ , etc.) or generic detachments ( $\text{D}$ ) that can either serve as  $\text{LD}$  or  $\text{ND}$ .

B.1 In some cases (see below), it is possible to convert basic forces from one denomination to another. For these conversions (only), use the equivalences:  $1A \ominus = 2LD$ ,  $1A \oplus = 2A \ominus = 4LD$ ;  $1F \ominus = 2ND$ ,  $1F \oplus = 2F \ominus = 4ND$ . Note that for naval forces this can be sensibly different from the actual content of  $F$ .

**C** If possible, the *basic forces* must be used to maintain (fully or partially) counters that are the same size or larger than them.

**D** If all *basic forces* cannot be used to maintain counters that are the same size or larger than them, then the rest can be converted to **LID** (or **NID**) and used to maintain forces of any size.

**E** At most one land counter and one naval counter may be partially maintained with the *basic forces* (due to the fact that already deployed forces are larger than the *basic forces*).

E.1 The units partially maintained with *basic forces* will have to be maintained with a *Veteran* maintenance.

**F** Some *basic forces* include  $\mathbb{P}$  counters. These forces cannot be converted to anything else. If no  $\mathbb{P}$  is used, the basic force is lost.

**G Effect of Wood.** Each Wood resource, that can be either bought or produced by a MAJ, increases the *basic forces* by 1 NID.

G.1 A MAJ may use up to 3 **Wood** each turn (thus gaining up to 3ND of basic force).

### VII.2.2 Extra Maintenance

**A** All the units that are not maintained by *basic forces* must be paid for in order to be kept.

A.1 If a unit is partially maintained, the part which is not maintained is disbanded (destroyed).

A.2 Maintenance costs depends both on the technology and the country. They can be found in the player's aids.

**B** The maintenance cost for land units also depends on the state of war of the MAJ.

B.1 A country at peace (including if it is only engaged in *Overseas Wars* (see section IV.5.4 (*Overseas Wars*)) and limited interventions (see section IV.5.5.3 (*Signing an Alliance for Intervention*))) uses the *Peace maintenance* and its land forces are automatically *Veterans*.

B.2 A country at war must choose, for each counter, whether it is maintained as *Veteran* or *Conscript* and use the corresponding price.

B.3 A counter cannot be maintained partially as *Veteran* and partially as *Conscripts*.

C the maintenance price is found by cross-referencing the country's technology with the kind of maintenance used (size of counter and Veterans/Conscripts status).

**D** A counter must be maintained as a whole. That is, it is not possible to maintain one  $\mathbb{A} \ominus$  for the price of two  $\mathbb{L}\mathbb{D}$ .

D.1 However, it is possible to partially maintain a counter and have the rest destroyed. That is, one  $\mathbb{A} \ominus$  may be broken before maintenance and only one of the two  $\mathbb{L} \mathbb{D}$  maintained (and the other is destroyed).

**E** For troops partially maintained by *basic force*, use the conversion of *basic forces* to determine what is left to be paid.

E.1 Example: if a  $\mathbb{F} \oplus$  is partially maintained by  $3\mathbb{N}\mathbb{D} (= \mathbb{F} \ominus, \mathbb{N}\mathbb{D})$  of *basic force*, only  $1\mathbb{N}\mathbb{D}$  is missing and must be paid as extra maintenance (whatever the actual content of the  $\mathbb{F}$ ).

**F**  $\mathbb{P}$  that are not included in *basic forces* may not be maintained. They can, however, be recruited anew.

**G** the sum of all extra maintenance costs is written in line **B30** (Unit maintenance) of *ERS*.

**Example: Maintenance of forces.**— HIS is with technologies Renaissance and Nao-Galeon, at war, during period II. It has a basic force in period II of  $2A \oplus$  and  $3D$ . Its existing troops are  $2A \oplus$ ,  $1F \oplus$  and  $4LD$  and it wants to maintain all of them. Since basic forces must first be used to maintain unit of the same or larger size, the  $2A \oplus$  of basic forces must be used to maintain the  $2A \oplus$  counters (i.e. they may not be used to maintain the  $LD$ ). However, the  $3D$  may be used either to maintain some  $LD$  and/or (part of) the  $F$ .

HIS may choose to use the 3D to maintain 3LD. This leaves 1LD and 1F ⊕ to pay for. The LD may be maintained as either Veteran (7 D) or Conscript (4 D) while the F ⊕ costs 80 D to maintain.

The less expensive solution however is to use the 3ID to partially maintain the F. Since, for maintenance purpose,  $1F \oplus$  is considered to be 4ND, this leaves only 1ND to maintain (17D) and the 4LD must also be maintained (for 4 or 7D each, depending on their status).

It is also possible to use  $2\mathbb{D}$  to maintain  $\mathbb{F} \ominus$  and the third to maintain one  $L\mathbb{D}$ . This leave  $3L\mathbb{D}$  and  $\mathbb{F} \ominus$  to maintain.

If HFS only has 1A ⊕, 4LD and 1F ⊕, then it is possible to use the second A ⊕ of basic force to maintain the the 4LD (because there is no counter of same or larger size, thus the remaining A ⊕ of basic forces is turned into 4LD).

If HIS only has 2A ⊕ and 3A ⊖ (and no naval forces), then the 2A ⊕ of basic forces must be used to maintain the 2A ⊕ of actual troops. Then, the 3A ⊖ will use the 3D. However, since at most 1 land counter may be partially maintained by basic forces, it is not possible to use each D to partially maintain 1A ⊖ (leaving 3LD to pay). Thus, HIS must use 2D to maintain 1A ⊖, then 1D to partially maintain the second A ⊖. This leaves 1LD (7 D, since it is a partially maintained counter, it must be maintained as Veteran) and 1A ⊖ (12 or 8 D) to pay for.

**Design note:** Since all administrative actions must be planned (and payed) before any is resolved, troops are always maintained using the cost for the technology that the country had at the beginning of the Administrative phase. Indeed, maintenance is planned and payed at the same time as administrative actions, thus it is not known whether a new technology will be reached or not.

### VII.2.3 Maintenance of fortresses

A All fortresses that are not at their basic level have to be maintained in activity (including *Præsidios*). The cost of maintaining a fortress is indicated in the last column of table VII.4 (Cost of Fortresses).

- A.1 The maintenance cost of a fortress is paid by its controller.
- A.2 The maintenance cost of a fortress in Europe is its level.
- A.3 Maintenance is doubled in the ROTW. A fort or Mission requires a maintenance of 1  $\Phi$ .
- A.4 Maintenance is doubled for fortresses of level 3 before obtaining the technology *Arquebus* (representing the spreading of the “*trace italienne*” during the Wars in Italy).
- A.5 Maintenance is doubled for fortresses of level 4 before Turn 40 (representing the spreading of the ideas of *Vauban*).
- A.6 The free forts given by TP or COL do not need any maintenance. The ones given by missions do, even if the local fort/fortress is of a higher level. The free level 1 fortress of a level 6 COL also remains free.
- A.7 The level of a fortress can be lowered by its owner if he controls it. A lowered fort is destroyed.

**B Arsenals** An arsenal is maintained at the same cost as a fortress of the same level.

**C** the sum of all maintenance costs of fortifications is written in line **B31** (Fort. and presidios maintenance) of *ERS*.

Level	Cost EU/ROTW	Required Technology	Maint. EU/ROTW
Miss. Fort 1	NA/one missionary NA/LD +2 rounds (25)/25 $\Phi$ or COL level 6		NA/1 NA/1 1/2
2	25/50	Medieval	2/4
3	*50/(100†)	Renaissance	*3/6
4	**75/(150†)	Baroque	**4/8
5	100/NA	Turn 40&Man.	5/NA

\*= x2 before *Arquebuse* \*\*=x2 before Turn 40

†=in ROTW, only arsenal may be at level 3 or more.

Table VII.4: Cost of Fortresses

## VII.2.4 Maintenance of Minor Powers

**A At peace** a MIN maintains up to its *basic forces*. Extra forces (troops, navy, fortifications) are destroyed.

A.1 Exception: a MAJ may pay to maintain fortresses of a VA. [TBD: remove]

A.2 Exception: former MAJ (PORTUGALLIA, VENETIA and POLONIA) maintain all their fortresses for free (unless otherwise specified, typically for non-absolutist POLONIA).

**B At war** a MIN maintains up to its *basic forces*.

B.1 The diplomatic Patron of a MIN fully involved in a war, may maintain any or all forces above the *basic forces* of the MIN, up to its counter allowance.

B.2 The costs are the same as those of the MAJ for the Technology of the MIN.

B.3 A MAJ may pay to maintain fortresses of a VA. [TBD: remove]

B.4 Other minors (non VA) at war maintains all their fortifications in addition to their *basic forces*. [TBD: remove]

B.5 Minors fully at war without MAJ allies maintain all the forces they have.

**C Moral** Troops maintained by minors are always *Veteran*.

C.1 Troops maintained by the diplomatic patron are either *Veteran* or *Conscript*, depending on the cost paid.

**Design note: Cost of maintenance** The cost may vary according to the technologies and to the countries, but the cost per LD is usually higher for the  $\Delta\ominus$ , then the LD, then the  $\Delta\oplus$ . That is, the cost for 1  $\Delta\ominus$  is usually more than twice the cost for 1LD while the cost for 1  $\Delta\oplus$  is usually less than the cost of 4LD. To achieve the cheapest maintenance (but it may not be always the best due to the *Veteran* distinction), it is better to try and use basic forces to maintain those in this order.

Similarly, the cost per NID (on the basis of 1  $\mathbb{F}\ominus=2\text{NID}$ ) is usually  $\mathbb{F}\ominus$ , NID,  $\mathbb{F}\oplus$ . However, a  $\mathbb{F}\ominus$  contains more than 2NID (sometimes a lot more), so fleets are usually a better way to maintain the naval forces (if they are regrouped enough). As for the ID, they are usually best used as NID (costing much more than LD to pay), unless the naval forces are few enough to be covered by the naval allowance.

## VII.3 Recruitment

### VII.3.1 Land forces

#### VII.3.1.1 Land recruitment in Europe

##### A Limit

A.1 Each country has a recruitment *limit*, expressed in LD, varying by periods (and some specific conditions).

A.2 It can be found in the player's aid of each country, in the column “Troops purchase”.

A.3 It is also summarised in table VII.5 (Recruitment per Country) (first line for each country).

A.4 Each turn, it is possible to recruit up to 3 times this limit.

##### B Costs

B.1 Each country has a recruitment cost, for LD and  $\Delta\ominus$ , varying with its current technology.

B.2 It can be found in the player's aid of each country, in the columns “Land Purchase”.

B.3 The cost for one  $\Delta\ominus$  is usually the cost of 2LD (exception: RUS).

B.4 In order to buy an  $\Delta\oplus$ , a country usually buys 1  $\Delta\ominus$  and 2LD and immediately (during the administrative phase) merge them into 1  $\Delta\oplus$ . It is also possible to do so by buying 2  $\Delta\ominus$  but it is usually more expensive and requires two  $\Delta$  counters instead of one.

**C Recruitment area.** Each country has a *Recruitment area*. Unless specified in its specific rules, it is all the provinces in its national territory.

C.1 Exceptions: HIS, TUR, RUS and SUE.

**D Recruitment.** Each country decides how many troops it wants to purchase, where it wants them recruited and under which form (counters). Then it computes the cost for these.

D.1 Recruitment can only takes place in owned, controlled, not besieged and not revolted provinces.

D.2 The cost is written in line **B33** (Units purchase) of *ERS* (together with the cost of newly brought navies).

D.3 The new units are put on the map when resolving administrative actions.

**E Multipliers.** Counters are brought in order chosen by the player. The total number of LD recruited so far is tallied and compared with the *limit* to compute the exact price of the counter.

E.1 Any counter that can fully be recruited under the limit is paid at the cost listed in the tables.

E.2 Any counter that cannot be recruited under the limit but can be recruited under twice the limit is paid at twice the price listed.

E.3 Any counter that cannot be recruited under twice the limit but can be recruited under thrice the limit is paid at thrice the price listed.

E.4 Any counter that cannot be recruited under thrice the limit cannot be brought.

E.5 Any counter recruited out of the *Recruitment* area has its cost doubled.

E.6 These multipliers are cumulative.

**Playing tip:** The order of recruitment can be important in some cases. Because of the multipliers, it can change the price one pays for the counters (see the examples below).

Do not put new counters immediately on map. Recruitment is supposed to be simultaneous, that is all countries plan which troops they want to buy and then put them on the map. If you put your troops on the map before your opponent has finished planning his actions, don't complain that he changes his mind and decide to recruit more (or less) troops. . .

When buying  $\mathbb{A} \oplus$  or reinforcing  $\mathbb{A} \ominus$  by buying 2LD for them, you can directly put the  $\mathbb{A} \oplus$  counter on the map (rather than placing 1 $\mathbb{A} \ominus$ , 2LD and immediately turning them into 1 $\mathbb{A} \oplus$ ). Especially, stacking limits are not enforced between the purchase and the conversion.

**F Moral.** The newly recruited troops are always *Conscripts* (except for SUE and PRU).

Period	I	II	III	IV	V	VI	VII	Max F/ND
VEN	4	5	4	3				
HOL	4/12	6/15	6/18	6/18	3	3	3	2/4
AUS			8/28	7/32	7/36	5/30	5/25	5/8
POR	2	3			0+1/1+3	0+1/1+3	0+1/2+6	(1)/3
SUE	4/12	4/15	6/18	4	3	3	3	1/8
HIS	5	5	5	5	5/24	4/24	4/24	4/10
FRA	4	4	4	4	4	4	4	6/8
ANG	2/8	3/12	4/14+2	5/18+2	6/26+6	7/30+6	7/38	6/8
TUR*	3/8	4/12	4/18	6/24	6/24	7/36	7/42	6/10
RUS*	5/12	7/15	9/30	9/26	8/24	6/22	5/18	6/6
POL	0/0	1/2	2/4	1+2/5	1+2/10	2+2/18	3+2/22	3/8
PRU	0/1	0/2	1/4	1/4	1/6	1/7	1/7	1/3

\* -1 LD after reform.      LD per turn  
ND per turn/max ND

Table VII.5: Recruitment per Country

**Example: Under the limit.**— HIS is Arquebus in period III (recruitment of 5LD), and wishes to recruit 1 $\mathbb{A} \oplus$  in its recruitment area. Since 1 $\mathbb{A} \oplus$  is 4LD, this is less than the limit and can be recruited at simple cost. HIS recruits 1 $\mathbb{A} \ominus$  and 2LD for 60 $\mathbb{D}$  and immediately turn them into 1 $\mathbb{A} \oplus$ . Actually, it is easier to directly put the  $\mathbb{A} \oplus$  in play to save time and manipulations.

**Example: Limit and whole counters.**— HIS wants to buy 3 $\mathbb{A} \ominus$  with its 5LD recruitment limit. The first two correspond to 4LD total and can thus be recruited at simple cost for 30 + 30 $\mathbb{D}$ . The third one, however, makes the total goes to 6LD, over the limit but under twice the limit. So, it must be recruited at double cost (for another 2 $\times$ 30 $\mathbb{D}$ ). Even if 1LD of the third  $\mathbb{A} \ominus$  is still within the limit, the whole counter price is doubled because it makes the total number of LD recruited go over the limit. HIS, however, could choose to buy 2 $\mathbb{A} \ominus$  and 2LD. In this case, both  $\mathbb{A} \ominus$  and the first LD are within the limit and only the last LD is paid at double cost. This, however, produce fewer  $\mathbb{A}$  counters and hence might not be the wisest solution.

**Example: Small limits and big counters.**— In period II, POR has 3LD of limit and is at technology Renaissance. It wants to recruits 1 $\mathbb{A} \oplus$  in Tejo (in the recruitment area). POR does so by recruiting 1 $\mathbb{A} \ominus$  and 1LD under the limit for 24 + 12 $\mathbb{D}$  and another LD above the limit for 2  $\times$  12 $\mathbb{D}$ . The total is thus 60 $\mathbb{D}$  and POR can directly put the  $\mathbb{A} \oplus$  in play. Note that if POR wanted to recruit its  $\mathbb{A} \oplus$  by merging 2 $\mathbb{A} \ominus$  instead of 1 $\mathbb{A} \ominus$  and 2LD, then the second  $\mathbb{A} \ominus$  does not fit within the limit and thus has to be paid entirely at double cost bringing the total to 24 + 2  $\times$  24 = 72 $\mathbb{D}$ . Moreover, this is simply impossible because it would require 2 $\mathbb{A}$  counters and POR has only one (even if the  $\mathbb{A} \oplus$  can be directly put on the map, the two  $\mathbb{A} \ominus$  are virtually here at some point during the process).

**Example: When order matters.**— In period I, POR has 2LD of limit and is at technology Medieval. It wants to recruits 2 LD in Tejo (in the recruitment area) and 2 in Tãnger (out of the recruitment area).

POR may chose to first recruit the 2LD in Tejo. Since they are below the limit and in recruitment area, the cost is not multiplied and they cost 10 + 10 = 20 $\mathbb{D}$ . Then, POR recruits the 2LD in Tãnger. Since they are above the limit, their cost is doubled. Since they are recruited out of the recruitment area, their cost is doubled a second time. Thus, they cost 2  $\times$  2  $\times$  (10 + 10) = 80 $\mathbb{D}$ . The total cost is 100 $\mathbb{D}$ .

On the other hand, POR could first recruit the LD in Tãnger. Thus, they are below the limit and the cost is only doubled once (for being recruited out of the area) for 2  $\times$  20 = 40 $\mathbb{D}$ . Then POR recruits the LD in Tejo. Since they are above the limit, their cost is doubled for 40 $\mathbb{D}$ . But the total is only 80 $\mathbb{D}$ .

Because multipliers are cumulative, the order in which troops are recruited may change the final price.

**Example: Big computation.**— HIS is Arquebus in period III (recruitment of 5LD), and wishes to recruit 2 $\mathbb{A} \ominus$ , 1 $\mathbb{A} \oplus$  and 3LD, 2 of which are not in its Recruitment Area. The  $\mathbb{A} \oplus$  is bought with 1 $\mathbb{A} \ominus$  and 2LD, which brings the total to 3 $\mathbb{A} \ominus$  and 5LD. The cheapest way to purchase this is to purchase 2 $\mathbb{A}$  and 1LD (out of Recruitment Area) under the limit (for the cost of 30+30+2 $\times$ 15), 1  $\mathbb{A}$ , the second double-cost LD and two other LD under twice the limit (for 2 $\times$ 30+4 $\times$ 15+2 $\times$ 15+2 $\times$ 15) and the last LD for 3 $\times$ 15, which brings the total to 315 $\mathbb{D}$ . This is big, even for the Spanish treasury!

**Playing tip:** Even if it was frequent in the examples, recruiting above the limit is uncommon and recruiting at thrice the price is a very rare occurrence. Especially, when there are very few troops above the limit, it is often better to simply recruit a bit less and wait for next turn. Typically, in the last example, the 11th LD cost 45 $\mathbb{D}$  alone and it would probably be better to simply not recruit it right now.

This means that recruitment sometimes has to be planned a bit in advance. Especially for countries with small limits (typically, ANG). If you plan to go on war, you may want to recruit one turn in advance. Obviously, that would cost the maintenance for one turn, but that will lower the recruitment cost at the crucial time and save money for campaigning (maintenance is lower than recruitment, especially at war). Moreover, that allows more troops to become veteran.

On the other hand, sometimes you just suffer several defeats and lose many troops and need to raise them asap if the war goes on. Recruiting above the limit when at peace is rarely a good idea. Similarly, maintaining a large army at peace is very costly and it is cheaper to demobilise it. But raising it again will require a bit of planning if one wants all its troop at the right time. . .

### VII.3.1.2 Land recruitment in the ROTW

**A Recruitment** in the ROTW is even more restricted than in European provinces that are not part of the recruitment area.

A.1 European provinces in the ROTW are considered as European provinces.

A.2 Even if they are usually considered as European provinces, recruitment in level 6 COL is also restricted.

A.3 Troops recruited in the ROTW are tallied against the limit, and their price might be doubled or tripled, just like other troops. This is the same limit as in Europe: both recruitment in Europe and in the ROTW are added to know if the limit has been reached.

**B COL level 6.** In a COL of level 6, it is possible to recruit each turn up to 2LD (at normal cost) or 1 $\mathbb{A} \ominus$  at double cost.

**C Other Establishments.** In other COL/TP, it is possible to recruit either 1LDE at normal cost or 1LD at double cost.

<p>[R]150</p> <p>Recruitment</p> <p>C.1 It is not possible to recruit in a mission or a fort.</p> <p><b>D Exploration.</b> A LDE count as half a LD for recruitment purposes: its price is half the price of 1LD, rounded up ; and it is considered as half a LD in the recruitment limit.</p> <p><b>Example: Recruitment in the ROTW.—</b> During period I, POR is Renaissance and has a recruitment limit of 2LD. POR wants to recruit 1A ⊖ in Goa (a level 6 COL), 2LD in Tejo (in the recruitment area) and 1LD in BRAZIL (in level 2 COL in the ROTW). POR can choose to recruit first the LD in Europe for 12 + 12 = 24 ₤, then the A ⊖ at quadruple cost (doubled because it is an A ⊖ in a COL of level 6 and doubled because it is above the limit) for 2 × 2 × 24 = 96 ₤, and lastly the LD in BRAZIL at 6 times the cost (thrice for being above twice the limit and doubled for recruiting 1LD in the ROTW) for 3 × 2 × 12 = 72 ₤ for a grand total of 24 + 96 + 72 = 192 ₤.</p> <p>By recruiting first the A ⊖, then the Brazilian LD and lastly the European LD, POR would have paid only 156 ₤.</p> <p>If POR wants to recruit 1LD in Europe and 3LDE in 3 different ROTW establishments, the cheapest way is to recruit first the LD for 12 ₤, then the first 2LDE at normal cost for (12/2) + (12/2) = 12 ₤ and lastly the third LDE is above the limit (even if a LDE represent a third of a LD, it takes half of an LD in recruitment limit), thus at double cost for another 12 ₤. The total is thus 36 ₤. If POR starts by recruiting the 3 LDE at simple cost, then part of the LD is above the limit and it must be payed at double cost for a total of 42 ₤.</p> <p>Note that it is not allowed, during a single turn, to recruit several LDE at the same place ; or to recruit 3LD or more (including 1A ⊕) in a COL of level 6.</p>	<p>Logistic— master – 2016-04-14</p> <p>[R]151</p> <p>E.1 Except for the named arsenals of Gibraltar, Sebastopol and S<sup>1</sup>-Petersburg, arsenals may only be built in a coastal TP or COL (including COL of level 6).</p> <p>E.2 The named arsenal Brazilie can only be built in BRAZIL.</p> <p>E.3 The named arsenal Gibraltar can only be built in Gibraltar or Tãnger.</p> <p>E.4 The named arsenal Sebastopol can only be built in a province bordering the BLACK SEA.</p> <p>E.5 The city S<sup>1</sup>-Petersburg is also an arsenal S<sup>1</sup>-Petersburg with specific rules attached to its construction (see §C (Construction of S<sup>1</sup>-Petersburg (Санкт-Петербург)) of section XIV.6.1 (Russian under-development)).</p> <p><b>F Forts</b> are built during the military or redeployment phases.</p> <p>F.1 A LD is required and the construction takes 2 rounds.</p> <p>F.2 A Mis can be transformed in a Mission during the redeployment phase.</p> <p><b>G Wasteland</b> In the Wasteland (see section I.1.3.1 (Wasteland area)), until 1615 (periods I–III), fortresses may not be more than 1 level higher than the basic level on map (i.e. the maximum level is 2 on provinces with a basic level of 1 and 3 in provinces with a basic level of 2).</p> <p>G.1 After 1615 (periods IV–VII) and until the construction of S<sup>1</sup>-Petersburg, the limit becomes 2 levels higher than the one on the map.</p> <p>G.2 After the construction of S<sup>1</sup>-Petersburg, all limits are removed.</p> <p>G.3 This does not remove other conditions on fortresses level (such as Land Technology level).</p> <p><b>H Præsidios</b> are built only according to rule section IX.6 (Building Præsidios), during the redeployment phase of the turn. The maximum level of any Præsidio is 3.</p> <p>H.1 As an exception to fortress building, Præsidio can be constructed directly at any level. The cost is the sum of cost for all intermediary levels.</p> <p><b>Example: Building fortresses.—</b> At turn 3, FRA has Renaissance and, being at war against HIS, wants to fortify its Southern border. FRA would like to build fortresses of level 3 both in Béarn and Languedoc. However, since the current fortress of Languedoc is only of level 1 (the default level for this province), it is not possible to go directly to level 3.</p> <p>So, FRA decides to increase by one level the fortresses of Béarn and Languedoc. In Languedoc, FRA builds a fortress of level 2 (on top of the existing level 1) for 25 ₤. In Béarn, FRA build a fortress of level 3. Since FRA is not Arquebus yet, the cost is doubled for 100 ₤. The total is 125 ₤, to be written in line B34 of ERS. FRA now has to find the proper counters in its counters mix to put on the map (this should be easy at this point).</p> <p>In turn 4, the war is still going on, so FRA wants to increase the fortress of Languedoc. Since there is already a fortress of level 2, it is possible to build a level 3 here, for 100 ₤ (since FRA is still not Arquebus).</p>
<p><b>VII.3.2 Purchasing fortresses</b></p> <p><b>A Generalities.</b> Fortresses can be raised above the level indicated on the map, up to level 5.</p> <p>A.1 Each turn, the level of each fortress may only increase by 1.</p> <p>A.2 Fortresses of high level may only be built in the late game when the corresponding land technology is reached.</p> <p>A.3 A fortress may only be built in a controlled, not besieged and not revolted province. Note that ownership of the province is not required.</p> <p>A.4 Præsidios are not built as other fortresses.</p> <p>A.5 The “fortress” counters can be exchanged at will (they are two-sided counters, and not always equivalent). A combination of counters with the desired levels has to exist to be allowed to build fortresses.</p> <p><b>B Technology.</b> In order to raise a fortress to a given level, a country must have at least the land technology indicated in the “Required Technology” column of table VII.4 (Cost of Fortresses). Note that since all administrative actions are planned before any is resolved, that means that one cannot increase a fortress on the same turn it reaches the required technology.</p> <p>B.1 In addition, no fortress of level 5 may be built before turn 40.</p> <p><b>C Cost.</b> The cost for each level of fortress is indicated in the “Cost” column of table VII.4 (Cost of Fortresses).</p> <p>C.1 The first number is the cost to build a fortress of this level in Europe (usually, 25 ₤ per starting level of the fortress). The second is the cost to build a fortress of this level in the ROTW (usually, twice more).</p> <p>C.2 The cost of all fortresses of level 3 is doubled for countries that do not have the land technology Arquebus (representing the spreading of the “trace italienne” during the Wars in Italy).</p> <p>C.3 the cost of all fortresses of level 4 is doubled before turn 40 (representing the spreading of the ideas of Vauban).</p> <p>C.4 The total cost for building fortresses is recorded in line B34 (Fort. purchase) of ERS.</p> <p><b>D ROTW.</b> COL of level 6 are treated like European provinces for building fortresses.</p> <p>D.1 In other provinces, it is not possible to build a fortress of level higher than 2, unless it is an arsenal.</p> <p>D.2 Fortresses of level 1 can be build in any COL or TP.</p> <p><b>E Arsenals</b> are built instead of a fortress of the same level. That is, instead of building a fortress of a given level, one can build an arsenal of the same level. All conditions (and price) for building this level of fortress must be met (or paid).</p>	<p><b>VII.3.3 Naval forces</b></p> <p><b>VII.3.3.1 Naval recruitment in Europe</b></p> <p><b>A Limit</b></p> <p>A.1 Each country has a recruitment limit, expressed in NID, varying by periods (and some specific conditions).</p> <p>A.2 It can be found in the player's aid of each country, in the column “Troops purchase”.</p> <p>A.3 It is also summarised in table VII.5 (Recruitment per Country) (second line, first number).</p> <p>A.4 Each turn, it is possible to recruit up to this limit. Contrary to land recruitment, it is not possible to recruit more than the naval limit.</p> <p>A.5 NGID and NDE count as half a NID for this limit. NTID and VGID count as a full NID.</p> <p><b>B Increasing the limit</b></p> <p>B.1 Each Wood brought or produced increase the naval recruitment limit by 1NID, up to a maximum augmentation of 3NID.</p> <p>B.2 In addition, a country having a partial or total monopoly on Fish adds 1NID to its naval recruitment limit.</p>

<div>[R]152</div> <div>Recruitment</div> <p><b>C Navy size</b>  C.1 Each country has a maximum number of NID allowed on map at the same time, varying by periods. This counts both NID counters and NID in IF counters.  C.2 It can be found in the player's aid of each country, in the column "Max. NID".  C.3 It is also summarised in table VII.5 (Recruitment per Country) (second line, second number).  C.4 NGID and NIDE count as half a NID toward this limit. NTID and VGID count as a full NID.</p> <p><b>D Costs</b>  D.1 Each country has a recruitment cost, for NWID, NTID, IF ⊖, and sometimes also for NGID and IF ⊖ of NGID, varying with its current technology.  D.2 It can be found in the player's aid of each country, in the columns "Navy Purchase" and "Purchase (other)".  D.3 The cost for one IF ⊖ is the cost for a full counter, up to its countenance.  D.4 Beware! Countries with small recruitment limit (e.g. POL or RUS) may not recruit a IF ⊖ in one turn unless they first increase their limit. That is, the existence of a price for a counter does not remove other conditions for buying it.  D.5 Even if they do not benefit from the technologies, the cost of NGID varies with them.  D.6 NIDE cost half the price of a NID, rounded up.</p> <p><b>E Recruitment area.</b> There is no specific recruitment area for navies. They can be brought in any European province with a port, including European provinces in the ROTW and (coastal) COL of level 6.</p> <p><b>F Recruitment.</b> Each country decides how many ships it wants to purchase, where it wants them recruited and under which form (counters). Then it computes the cost for these.  F.1 The cost is written in line <b>B33</b> of ERS (together with the cost of newly brought armies).  F.2 The new units are put on the map when resolving administrative actions.  F.3 Since IF counters are containers, it is possible to recruit some NID directly "inside" them (if there is still room left for them) without physically putting the NID counter on the map.</p> <p><b>Example: Naval recruitment.—</b> In Period IV, the recruitment limit of SUE is 4NID. Since its IF ⊕ contains 5NID and 2NTID, SUE may not buy one of them in one turn.  If the naval technology of SUE is Battery, SUE can in on turn buy one IF ⊖ (containing 2NID and 1NTID) for 150 ₤, plus an additional NWID at 55 ₤. This makes a total of 4NID, the recruitment limit for a given turn. The NWID may be directly incorporated within the IF, since a IF ⊖ is too small to contain 3NID, the counter is turned ⊕ (and will require maintenance of a full IF ⊕, thus it might be way cheaper to keep this stack as 1IF ⊖ and 1NID). On the next turn, SUE may buy another IF ⊖ and merge all of this into a full IF ⊕.</p> <p><b>Example: Wood.—</b> Continuing the previous example, suppose that SUE has one Wood MNU of level 1 and also buys a second Wood from ANG. Each of these Wood increases its limit by 1NID to a total of 6NID. Thus, SUE may now recruit 2IF ⊖ on the same turn (but still not a full IF ⊕).  If SUE exploits Wood in the ROTW and has the possibility to buy another Wood from POL, that would make a total of 4 Wood available. However, the limit may only be increased by 3NID. That is, the fourth (and subsequent) Wood is useless and, in this case, buying it is a waste of money.</p> <p><b>Example: Galleys.—</b> In Period III, TUR may "only" recruit 9NID per turn. However, NGID count as half, so TUR may recruit up to 18NGID per turn! Its IF ⊕ can hold up to 5NID and 1NTID, that is 10NGID and 1NTID. Thus, TUR can largely buy 1IF ⊕ and 1IF ⊖ each turn. . .  This is, typically, what happened after Lepanto where the Turkish navy was crushed but rebuilt in a couple of years. Given the high cost of both building and upkeeping navies, it is very rare to buy that much NID during a given turn and things are usually more evenly spread over time.</p> <p><b>VII.3.3.2 Naval Recruitment in the ROTW</b></p> <p><b>A Level 6 COL</b> are considered as European provinces and follow the normal rules for naval recruitment.</p>	<div>Logistic— master – 2016-04-14</div> <div>[R]153</div> <p><b>B Other establishments.</b> Each NID (or NTID) built in a COL (of level 5 or less) or TP costs twice the normal price and counts as 2NID in the recruitment limit.  B.1 When building IF ⊖ in the ROTW, make sure that the recruitment limit is high enough!  B.2 It is not possible to build navies in forts or missions (alone).</p> <p><b>C Fisheries</b> In a COL (including of level 6) where Fish is exploited, up to 1NIDE per two levels of Fish exploited can be built outside of the construction limit, at normal cost.</p> <p><b>Example:</b> In Period IV, FRA has a COL of level 4 in TERRE-NEUVE, exploiting 4 Fish. Thus, it may build there 2NIDE that do not count toward the recruitment limit (of 5NID). If FRA wants to build 2NID there, that is 3NIDE plus 1NID, the first two NIDE do not count toward the limit, but the third counts twice (thus, as a full NID) and the NID also counts twice, so this takes 3NID of recruitment.  If the technology of FRA is Battery, this would cost 23 ₤ (22.5 rounded up) for each of the first two NIDE, then the cost of the rest is doubled. This brings the total to 23 + 23 + 2 × 23 + 2 × 55 = 167 ₤.</p> <p><b>VII.3.3.3 Privateers</b></p> <p><b>A</b> IP may be recruited in any controlled and owned port, including in the ROTW.  A.1 Each side cost 10 ₤ and counts as 1NID toward recruitment limit.  A.2 When IP are included in basic forces, they are rebuilt for free (both cost and limit) if destroyed (up to the basic forces).  A.3 Some IP are also obtained via specific rules (see rules dealing with each power, especially section XIV.2.1.1 (French Privateers) and section XIV.14.8.4 (Ragusa)). These are free of the costs mentioned here (both in ₤ and construction limit) but the specific rules may entail specific costs.</p> <p><b>VII.3.4 Exceptional Levies [should be moved in chMilitary]</b></p> <p><b>A Declaring Exceptional Levies</b>  A.1 Once per turn, a country which is fully at war may declare <i>Exceptional levies</i> at the end of any round during which it suffered a major defeat in a land battle. This is possible only during regular full wars (i.e. not during civil, religious or overseas wars and not during limited or foreign interventions).  A.2 The country immediately loses 1 Stability. Levies may be declared by a country already at -3 Stability, at no additional cost.  A.3 Once declared, levies are available for the rest of the turn. It is not possible to declare Exceptional Levies several times during the same turn.  A.4 <i>Exception:</i> SUE and PRU may declare levies after any defeat in a land battle (not necessarily major). Moreover, one of them may declare levies after a <b>major</b> defeat without paying 1 Stability.  A.5 <i>Exception:</i> POR may declare Exceptional Levies during <i>Overseas Wars</i>, if it has a Vice Roy alive. There are specific conditions for these levies, see section XIV.4.1.1 (Viceroys of the India).</p> <p><b>B Recruitment during Exceptional Levies</b>  B.1 Once Exceptional Levies are declared, the Country may recruit land forces at the end of each round of the turn, except the last one. This is done during the End of turn segment, after the continuation roll.  B.2 The recruitment limit is halved (rounded up) and the number of LID recruited this turn is reseted to 0 when levies are declared.  B.3 Recruitment due to exceptional levies follows the normal recruitment rules, with this new limit.  B.4 The cost of recruitment is written in line <b>B44</b> (Exceptional recruitments) of ERS.</p>
--	---

<div data-bbox="114 90 1117 121"> <div>[R]154</div> <div>Recruitment</div> </div> <div data-bbox="114 172 1117 199"> <p>B.5 SUE and PRU do not recruit <i>Veteran</i> troops with <i>Exceptional Levies</i>.</p> </div> <div data-bbox="114 209 1117 671"> <p><b>Example:</b> During Period IV, HIS has a land recruitment limit of 5LD. Exhausted by the Thirty Years War, it suddenly has to face FRA in addition to the Protestants! Thus, it decides to recruit 6LD (one at double cost) during the administrative phase. HIS has a Stability of only 0, due to the already long war. Its technology is Baroque.</p> <p>Alas! At Rocroy, the Spaniards are hopelessly crushed by Grand Condé, a major defeat. HIS loses 1 Stability because of the defeat (thus going to -1) and then decides that there are way too many blue counters on the map and that adding some yellow ones is required. Thus, it declares exceptional levies. This brings the Stability down to -2.</p> <p>Now, HIS may recruit troops anew. The limit is halved (to 3LD), but the number of troops recruited so far is reseted. HIS decides to recruit an A ⊕, that is 4LD. Since the limit is 3LD, the fourth is doubled for a cost of <math>50 + 25 + 2 \times 25 = 125</math> ₤.</p> <p>On the next round, HIS manages to avoid the main French armies and wage a war of attrition, thus suffering no new major defeat but still loosing some troops in skirmishes. Since levies are declared for the full turn, it may still recruit troop at the end of this round. The treasure fleet made its way safely from AMERICA, thus HIS decides to raise another A ⊕, that is 4 new LD. Since it has already recruited 4LD last round with exceptional levies, and the limit is only 3LD, that means that 2LD are below twice the limit and the last 2 are at triple price, for a cost of <math>2 \times 50 + 3 \times 50 = 250</math> ₤! Hopefully, disagreement within the French nobility will prevent this war from lasting too long. . .</p> <p>Later this turn HIS suffers yet another major defeat at Nördlingen. Since 8LD were already recruited with Exceptional Levies, it is possible to recruit only one more. Thus, HIS would very much like to declare Exceptional Levies a second time to reset the count of recruited troops. However, this is not possible and HIS has to hold for the rest of the turn with what is left of its armies.</p> </div> <div data-bbox="114 700 1117 735"> <h3>VII.3.5 Recruitment of Minor Powers</h3> </div> <div data-bbox="114 751 1117 782"> <h4>VII.3.5.1 Going to war</h4> </div> <div data-bbox="114 788 1117 1015"> <p><b>A</b> When a minor country enter wars, immediately (during the Diplomacy phase) put all its basic force in play. Especially the “one more fortress level per turn” rule do not apply for basic forces (only for reinforcements).</p> <p>A.1 Former majors may have some fortress already in play (maintained from previous turns). These levels are subtracted from any level of fortress they have in basic forces. That is, basic forces is the minimum the country has upon entering war, not the amount it gains.</p> <p>A.2 Basic forces are only received if the country was fully at peace and enters war. No basic forces are received in the middle of a war, even if the basic forces of the country change (due to some events, usually).</p> <p><b>B</b> Next, during the Administrative phase, minor receive reinforcement as described below.</p> </div> <div data-bbox="114 1026 1117 1212"> <p><b>Example:</b> VENETIA has a basic force of 4 ₤. If there already are 5 extra levels of fortress on the map when war occurs, VENETIA do not receive any more. If there are 3 extra levels on the map, then VENETIA would only receive 1 level as basic force (to reach the total to 4).</p> <p>Before event IV-11 (The Great Elector Friedrich-Wilhelm of Prussia), the basic forces of BRANDENBURGUM are A ⊖, LD. After, they switch to A ⊕, LD. If this event occurs while BRANDENBURGUM is at war and only as A ⊕ in play (more than the old basic force, but less than the new one), BRANDENBURGUM do not gain any new forces (it will roll for reinforcement as usual). That is, the country needs one turn of peace to recruit its troop up to its basic forces.</p> </div> <div data-bbox="114 1233 1117 1264"> <h4>VII.3.5.2 Minors fully at peace</h4> </div> <div data-bbox="114 1270 1117 1469"> <p><b>A Troops and Navies</b> A minor which is fully at peace (no war, overseas war or Limited intervention) recruits up to its basic forces.</p> <p>A.1 Remember that troops in excess of the basic forces are disbanded (except some fortresses), see section VII.2.4 (Maintenance of Minor Powers).</p> <p>A.2 Thus, it is not necessarily to put these counters on map. Once a minor is at peace during the Administrative phase, all its counters (except some fortresses) may be removed from the map. The next time the minor goes to war, it will receive its basic forces.</p> </div> <div data-bbox="114 1484 1117 1511"> <p><b>B Fortresses</b></p> </div>	<div data-bbox="1122 90 2123 121"> <div>Logistic— master – 2016-04-14</div> <div>[R]155</div> </div> <div data-bbox="1122 172 2123 528"> <p>B.1 [TBD ] A minor country with Land Technology <i>Baroque</i> or higher has an extra basic force of one level of fortress for every two provinces it owns.</p> <p>B.2 [TBD ] A minor country with Land Technology <i>Manoeuvre</i> or higher has an extra basic force of one level of fortress for every province it owns.</p> <p>B.3 [TBD ] These levels do not need to be evenly spread over the provinces and may be grouped into the same province.</p> <p>B.4 In addition, during periods V-VII, each minor country with an <i>Income</i> of 16 or more gets one extra level of fortress in its basic forces.</p> <p>B.5 Before <i>Arquebus</i>, a fortress of level 3 can only be placed by minor countries at the cost of 2 levels of fortress on top of an existing level 2.</p> <p>B.6 Before turn 40, a fortress of level 4 can only be placed by minor countries at the cost of 2 levels of fortress on top of an existing level 3.</p> </div> <div data-bbox="1122 539 2123 780"> <p><b>Example: Fortresses.—</b> ALGERIA normally owns 6 provinces and has an <i>Income</i> of 17. If its technology is Baroque, in period IV, it receives 3 levels of ₤ as Basic forces and may choose to put 2 of them in <b>Algérie</b> (thus reaching level 3) and 1 in <b>Oran</b> (going to level 2). Note that it is not possible to put a level 4 fortress in <b>Algérie</b> as the fourth level (above a level 3) itself costs two levels before turn 40.</p> <p>In period V, ALGERIA gains a fourth level of fortress as Basic force due to its high <i>Income</i>. It may now put a level 4 fortress in <b>Algérie</b> (if allowed by technology). However, before turn 40, that would cost the four levels as going from level 3 to level 4 cost two levels.</p> <p>If ALGERIA reaches technology <i>Manoeuvre</i>, it now has a total of 7 level of fortress when going to war (1 per province plus 1 for high <i>Income</i>) and may choose to barricade the cost with level 3 fortresses in <b>Oran</b> and <b>‘Annābah</b>, and a level 4 in <b>Algérie</b>.</p> </div> <div data-bbox="1122 801 2123 831"> <h4>VII.3.5.3 Minors in Limited Intervention or Overseas wars</h4> </div> <div data-bbox="1122 837 2123 1225"> <p><b>A Maximum recruitment</b></p> <p>A.1 A MIN which is doing a <i>Limited Intervention</i> or is involved in an <i>Overseas War</i> (and is not fully at war in some other war) recruits troop if it has less than its <i>Basic forces</i>.</p> <p>A.2 Troops recruited during <i>Limited Interventions</i> or <i>Overseas Wars</i> may not raise the total number of troops above the <i>Basic Forces</i>.</p> <p>A.3 If the allowed reinforcement would bring the total number of troops above the <i>Basic Forces</i> of the country, then it only recruits up to its <i>Basic Forces</i> and excess reinforcement is lost.</p> <p><b>B Recruitment of non-VA</b></p> <p>B.1 A MIN which is either Neutral, RM, SUB or MA may recruit its <i>Basic Reinforcement</i> (indicated in the country description in the Appendices).</p> <p>B.2 A MIN in EC or EW may recruit its <i>Basic Reinforcement</i> plus one LD or ND (controller’s choice).</p> <p>B.3 These recruitment do not cost anything to anybody. There are considered as payed by the minor, whatever its actual income may be.</p> </div> <div data-bbox="1122 1240 2123 1442"> <p><b>C Recruitment of VA</b></p> <p>C.1 A MIN in VA gains no free reinforcement each turn.</p> <p>C.2 Instead, the Patron may pay for reinforcements, on his own treasury, to raise troops up to the basic forces of the country.</p> <p>C.3 The cost are those of the Controller, with the technology of the minor.</p> <p>C.4 These troops are not counted toward the recruitment limit of the major.</p> <p>C.5 The maximal reinforcements raised this way are the <i>basic reinforcements</i>, plus 2 detachments (LD or ND).</p> </div> <div data-bbox="1122 1457 2123 1511"> <p><b>D Moral</b></p> <p>D.1 All land reinforcements of MIN are <i>Conscripts</i>, except:</p> </div>
---	--

D.2 SUECIA recruits all its new forces as *Veteran*;

D.3 HELVETIA recruits its new forces as *Veteran* if its Land Technology is *Muskets* or less;

D.4 PERSIA recruits half of its new forces as *Veteran* (round down).

### E Campaigns

E.1 Neutral minors in overseas wars or interventions have 1 active campaign each round.

E.2 Countries that are neither Neutral nor VA receive 1 passive campaign each round, plus one active campaign for the turn. The controller may pay for larger campaigns (paying the difference between the chosen campaign and the passive one).

E.3 VA in overseas wars or interventions have no campaign. All their campaign cost must be payed by their diplomatic patron. The patron may either chose to move the minor's troops with its own campaign or pay a whole new campaign only for the minor (in addition to the one used for its troops).

#### VII.3.5.4 Minors fully at War

### A Generalities

A.1 Minor fully at war, whatever their diplomatic status, receive reinforcements according to a *Reinforcement roll*.

A.2 These roll are made during the **Administrative action of minors (incl. recruitment)** segment.

A.3 In case the order is relevant, each MAJ, in decreasing order of initiative, roll for reinforcements of its minors.

A.4 The reinforcement roll provides troops, campaigns, fortress levels and leaders.

### B Attitude

B.1 Before rolling for reinforcements, the controlling player chooses an *Attitude* for each minor.

B.2 The choice is usually free (but may be constrained by events). Typically, a minors that was declared war upon can choose an *Offensive* attitude.

B.3 The attitude chosen may change at each turn of the war.

B.4 Some attitudes entail constraints on the moves the country will be allowed to do during the turn.

### C List of attitudes

C.1 *Offensive*: this attitude gives more troops and campaigns

C.2 *Defensive*: the troops of the minor country may only move in provinces that it owns or owned at some point in the game, as well as provinces adjacent to the ones it currently owns. This is the best attitude for getting fortresses.

C.3 *Naval*: this attitude may only be chosen for a minor country that has naval counters at its disposal. It is the only attitude that gives naval forces.

### D Reinforcement roll

D.1 Roll 1d10, add some modifiers as indicated on the right of the table and cross reference the result in table VII.6 (Reinforcements of Minor countries Fully at War) with the attitude chosen.

D.2 This die roll gives troops, fortress levels, campaigns and a leader value (in the last column).

D.3 *Political* There is a Political modifier specific to some minor countries and periods (or events). These modifiers are indicated on the right of table VII.6 (Reinforcements of Minor countries Fully at War), and also in the country's description in the Appendix.

D.4 *Incomes* There is also an Economical modifier depending on the income of the country. This modifier is used for all minors and is cumulative with the Political modifier. It is based on the income of the provinces that are owned and controlled by the minor, and neither besieged, revolted or pillaged at the time the roll is made (*i.e.* the provinces that would count in the *Land income* if this was a major country). Industrial income (gold), Commercial income (TF, Monopolies) and ROTW income (exotic resources, COL, TP) also count toward this total for the few minors concerned.

1d10 +mod.	Minor country attitude			
	Offensive	Defensive	Naval	Leader?
≤1	1LD	1LD	de	0
2	1LD	f	de	0
3	2LD	1LD/f	de/MC	1
4	2LD/MC	2LD	1LD/de/MC	1
5	3LD/MC	2LD/f	1LD/1ND/f	1
6	3LD/2MC	2LD/2f	1LD/1ND/MC	2
7	4LD/f/MC	2LD/2f/MC	1LD/f/1ND	2
8	4LD/2MC	3LD/f	2LD/f/⊖	3
9	5LD/MC	3LD/f/MC	3LD/f/⊖/MC	3
10	5LD/2MC	4LD/f	3LD/1ND/2f/MC	4
11	6LD/f/2MC	4LD/2f	4LD/f/⊖/f/MC	5
12	6LD/2MC	4LD/3f	4LD/f/⊖/f/MC	6
13	7LD/MC	5LD/f/MC	4LD/3ND/MC	6
14	7LD/2MC	5LD/2f/2MC	4LD/3ND/2f/MC	7
≥15	8LD/2MC	6LD/3f/2MC	5LD/f/⊕/f/2MC	8

2LD→A⊖, 4LD→A⊕, f=1 fortress level, 1de=1NDE or 1NGD, 1ND=1NWD, 1 VGD, 2NGD or 1NTD.

MC=1 multiple campaign. **Note:** 1 free active each round.

Leader: reroll 1d10, if result≤*Leader?* column, 1 *random leader*

During pV–VII, add f to basic forces if Income≥16.

Table VII.6: Reinforcements of Minor countries Fully at War

+1 FRATRES MILITIAE CHRISTI and D.S.M. THEUTONICORUM before I–H

+1 *Barbaresque* countries in periods I–III

+1/+3 BRANDENBURGUM after IV–11/V–13

+2 PERSIA in periods I–III

+1 DANIA and SAXONIA in periods I–IV

+1 BAVARIA after IV–1 (1) or VII–2

+1 SUECIA always

+1 SABAUDIA in periods IV–VI

+1 HANOVERE in periods VI–VII

+2 POLONIA if *Absolutism* established

+3 PORTUGALLIA before III–6

+1 VENETIA in periods IV–V

-1 0≤Income≤5

+1 16≤Income≤30

+2 31≤Income

D.5 The initial income of each minor is written in the appendices. The actual figure has to be recomputed each time it is needed, the figure in the appendices is only the initial income of the country and typically varies if it loses or gain provinces.

### E Troops

E.1 The reinforcement roll can give some LD and ND to the minor. The new troops must be placed in owned and controlled provinces that are neither besieged nor revolted.

E.2 LD may be freely converted into A as the usual rate of 2LD=1A⊖, 4LD=1A⊕.

E.3 ND may be used for either 1 NWD, 1 NTD, 1 VGD or 2 NGD.

E.4 Naval forces can be included into f, according to the fleet size of the minor.

E.5 There is no limit to the amount of recruited troops other than the counter limit for the country.

### F Moral

F.1 All land reinforcements of MIN are *Conscripts*, except:

F.2 SUECIA recruits all its new forces as *Veteran*;

F.3 HELVETIA recruits its new forces as *Veteran* if its Land Technology is *Muskets* or less;

F.4 PERSIA recruits half of its new forces as *Veteran* (round down).

**G Fortresses.** Some levels of fortresses are obtained by the Reinforcement Roll. The new levels must be placed in controlled provinces that are neither besieged nor revolted.

G.1 A given fortress can not be improved by Reinforcements by more than one level at a given turn. This rule does not constrain the fortresses that are in the *Basic Forces*.

<p>[R]158</p> <p>Recruitment</p> <p>G.2 Before <i>Arquebus</i>, a fortress of level 3 can only be placed by minor countries at the cost of 2 levels of fortress on top of an existing level 2.</p> <p>G.3 Before turn 40, a fortress of level 4 can only be placed by minor countries at the cost of 2 levels of fortress on top of an existing level 3.</p> <p><b>H Campaigns</b></p> <p>H.1 Each minor fully at war gets 1 active campaign each round.</p> <p>H.2 In addition, it may receive multiple campaigns (MC) per reinforcement roll.</p> <p>H.3 The diplomatic patron may pay for more campaigns (paying the difference between the chosen campaign and the active one).</p> <p><b>I Military Leaders of Minors: basic forces</b></p> <p>I.1 If there is a living named leader of the country, he automatically comes into play.</p> <p>I.2 Some minors have military leaders in their <i>basic forces</i>. If there are not enough named leaders to reach this limit, the minor receive ② leaders. If possible, take these among the minor country pool, otherwise among the generic grey leaders (of “country” QUIDAM).</p> <p>I.3 Contrary to major countries, ② leaders of minors are not changed each turn. They are only removed when the country is fully at peace. If, due to death, the country falls below its basic forces (in number of leaders), it immediately receive a new one.</p> <p><b>J Military Leaders of Minors: reinforcements</b></p> <p>J.1 By cross-referencing the (modified) reinforcement roll with the last column in table VII.6 (Reinforcements of Minor countries Fully at War), one gets a <i>Leader value</i>.</p> <p>J.2 1d10 is rolled. If less or equal than this value, the minor receive a leader for the duration of the war. This does not change its basic forces (that is, no replacement if the leader is killed).</p> <p>J.3 If the attitude of the minor is <i>Naval</i>, then it receives either a ② ⚓ or a ② ✕ (controller’s choice). Otherwise, it receives a ② ✕.</p> <p>J.4 This leader is taken at random among those of the minor, if some exist and among the generic grey ones otherwise.</p> <p>J.5 Like other ② leaders of minor, the leader will be available for this minor until it is fully at peace.</p> <p><b>K Military Leaders of Minors: double-sided monarchs</b></p> <p>K.1 Several Minors have generic double-sided monarchs. These leaders are usually in the basic forces of the minor.</p> <p>K.2 These are treated like ② leaders. That is, one of the side is chosen (at random) when the minor is activated and it is kept until the minor is fully at peace (or until the death of the leader).</p> <p>K.3 List of concerned leaders (and countries): <i>Unknown leader Caliph</i> (ÆGYPTUS), <i>House of Giray</i> (CRIMEA) and <i>Shāh</i> (PERSIA).</p> <p>K.4 Note that <i>Grand Maître</i> (ORDO HOSPITALIS) is not concerned as it is the same leader that may serve either as ✕ or ⚓.</p> <p><b>L Military Leaders of Minors: named and generic monarchs</b></p> <p>L.1 Some minors have two (or more) different counters for their monarch, usually an unnamed one (as above) and a named one.</p> <p>L.2 The named one replace the unnamed one when he is alive. He enters game either at a given turn or following certain rules or event.</p> <p>L.3 As long as a named monarch is available for a minor, the unnamed one is not available and may not enter game (even through reinforcements).</p> <p>L.4 List of concerned leaders (and countries): <i>La Valette</i> replaces <i>Grand Maître</i> (ORDO HOSPITALIS), <i>Shāh ‘Abbās I</i> and <i>Nādir Shāh Afshār</i> both replace <i>Shāh</i> (PERSIA) and <i>Akbar</i> replaces <i>Great Mughal</i> (MOGOLIS IMP.).</p>	<p>Logistic— master – 2016-04-14</p> <p>[R]159</p> <p>L.5 Note that the ② ✕ of DANIA and UNITED STATES are not concerned. They are always available for these countries as reinforcement leaders even if there are some named leaders alive.</p> <p><b>Example: Minor reinforcements.—</b> At turn 10, ALGERIA is at peace. Thus, whatever it had left on previous turn, it rebuilds and keeps only its basic forces of ⚓ and ⚔ (the ⚔ is left out of this example). There is no need to keep these counters on map. The technology of ALGERIA is Renaissance and ALGERIA is a VA of TUR.</p> <p>At turn 11, event III-10 (Revolt in Sierra Nevada) occurs (earlier than historically) and TUR decides to go to war, together with its ally ALGERIA.</p> <p><b>Basic forces.</b> First, the basic forces of ALGERIA are put on map. TUR puts the ⚓ and the ⚔ both in <b>Algérie</b>. Then, since Barbarossa is still alive, he is also put in play (or, probably, kept).</p> <p><b>Reinforcements.</b> Next, TUR rolls for reinforcements of its minor (after all majors have finished their administrative actions, especially after TUR and HIS both have brought their own troops). Since ALGERIA is one of the Barbaresque countries (XIV.13.1.3), it gets a +1 political DRM (in periods I-III). Since its total income is 17 ⚖ (it still own all its original provinces and no more), it also gets a +1 economical DRM (for income between 16 and 30 ⚖).</p> <p>TUR chooses a Naval attitude for ALGERIA as it wants to try and invade Spain. The roll is 5, modified to 7. Thus, ALGERIA gets 1LD, 1 level of fortress and 1ND. The leader value is 2. TUR rerolls on die for the leader and gets a 2, smaller than the leader value, thus ALGERIA gets an extra leader for the duration of the war. Since it already has an ⚓ (Barbarossa), TUR chooses to take a ✕ for ALGERIA (at random among the grey ② ✕). Then, TUR raise the fortress of <b>Algérie</b> to level 2. As for the troops, TUR chooses to take 2NGD instead of 1ND and put them directly in the ⚔ (and note on its record sheet the exact content of the Algerian ⚔). The LD is put in <b>Algérie</b>, waiting to board for an invasion of Spain. . .</p> <p><b>VII.4 Removal and Placement of leaders</b></p> <p><b>Design note:</b> Note that removal of leaders must physically occur before placement of new ones because it is possible that the same ② counter is immediately reused (at the same place or elsewhere). However, they are considered to happen simultaneously, especially for the replacement of ⚔/⚓ in the ROTW.</p> <p><b>VII.4.1 Removal of leaders</b></p> <p><b>A Death</b> Each named leader whose last turn of activity has passed is removed from the game.</p> <p>A.1 For leaders with turns on the counter, it happens if this turn is the after the second turn written on the counter.</p> <p>A.2 For leaders with event on the counter, or other special conditions, check the description of the event to know how long the leader lasts.</p> <p>A.3 Named major monarchs are removed during the Monarchy Survival phase (section III.2 (Monarch survival)) at the time where the Monarch dies.</p> <p>A.4 Note that leaders may be removed earlier due to death in battles.</p> <p><b>Design note:</b> Turns of “life” may either represent the actual life of historical people or their period of military activity. “Death” of a leader (whether scheduled or during battle) may be either actual death, retirement of old age or after a severe wound, change of career (often to become minister), fall in disgrace, . . .</p> <p>Turns of life are sometimes longer than the actual life of the historical leader. This may happen for several reasons, mostly because the actual historical character died early (in battle) and the counter allows for a “what if he didn’t die” or for game balance reasons. A leader may last one or two turns more than its historical counterpart to ensure that a given country has a good enough leader at a crucial period. Typically, leaders active in one war are often given “extended” lifetime over the following peace as the in-game wars and peace won’t match the historical ones and there are no great historical generals during peaces. . .</p>
--	---

<div data-bbox="112 89 1117 122"> <div>[R]160</div> <div>Removal and Placement of leaders</div> </div> <div data-bbox="112 172 1117 371"> <p><b>Example: Removing named leaders.—</b> It is Administrative phase of turn 47. Marlborough (✕ A 5.5.6 -2 [T43–T46]) is scheduled to live for turns 43–46. Since his last turn of activity (turn 46) has passed, his counter is removed from the game (historically, he died in 1722, in the middle of turn 47).</p> <p>At the beginning of turn 26, event IV-1 (1) (Bohemian Revolt) occurs. As per Event description, BAVARIA receives Tilly (✕ A 4.4.4 -1 [Event IV-1]) for 4 turns. Thus, he is considered as having turns 26–30 on his counter. At the Administrative phase of turn 31, if he is still alive, Tilly is removed from game (historically, he died facing Gustav Adolf at the battle of Rain in 1632, during turn 29).</p> </div> <div data-bbox="112 392 1117 564"> <p><b>B Anonymous</b></p> <p>B.1 All ? leaders of major countries return to their respective pool.</p> <p>B.2 Exception: besieged leaders stay on the map.</p> <p>B.3 All mercenaries leaders return to the pool of mercenaries.</p> <p>B.4 ? leaders of minors countries fully at peace return to their respective pool.</p> <p>B.5 ? leaders of minors at war stay on the map.</p> </div> <div data-bbox="112 579 1117 722"> <p><b>C Free redeployment</b> Each player may choose to redeploy any of its named leader still alive. The counter is removed from the map and will be replaced immediately as a new leader arriving this turn.</p> <p>C.1 Exception: besieged leaders must stay on the map.</p> <p>C.2 Exception: Leaders in the ROTW with unknown discoveries must stay in place (hint: you should have redeploy them to an establishment during voluntary redeployment of previous turn).</p> </div> <div data-bbox="112 735 1117 796"> <p><b>Playing tip:</b> In other words, named leaders have a free “teleportation” movement at this point. Use this either to change your frontlines or to ensure hierarchy is respected. This is also the occasion to redeploy ✱ to other Areas.</p> </div> <div data-bbox="112 823 1117 858"> <p><b>VII.4.2 Placement of leaders</b></p> </div> <div data-bbox="112 871 1117 957"> <p><b>A New leaders</b> Each leader who is schedule to be active starting this turn is placed on the map by its controller.</p> <p>A.1 Each leader that was removed due to free redeployment is also placed.</p> <p>A.2 Leaders that were wounded but did not recover during the previous turn are also placed.</p> </div> <div data-bbox="112 970 1117 1031"> <p><b>Example: New leader.—</b> This is the Administration phase of turn 43. Marlborough (✕ A 5.5.6 -2 [T43–T46]) is active starting with turn 43, thus he is placed on the map now. ANG chooses where to place him (see some restriction below).</p> </div> <div data-bbox="112 1045 1117 1189"> <p><b>B Anonymous</b> Major countries check their minimum leader limit.</p> <p>B.1 For each category of leaders (✕, †, ⚔, ☹, ✱) where a country as less leaders than its minimum, draw as many ? leaders as necessary to reach the minimal value (among those of the country).</p> <p>B.2 If a country has more leaders than its minimal value, none is received but none is lost either.</p> <p>B.3 Note that ? leaders that are besieged and thus stay on map are counted toward the limit.</p> </div> <div data-bbox="112 1203 1117 1324"> <p><b>Example: Minimum leaders.—</b> At turn 2, RUS has one ✕ (Shchenya (✕ A 3.1.4 [T1–T5]), provided he did not die during turn 1) but (for period I), RUS has a minimum limit of 2✕. So, RUS gets one ? ✕ at the Administrative phase of turn 2.</p> <p>At turn 4, suppose Shchenya is still alive. RUS receives I. Vorotynsky (✕ B 5.1.3 [T4–T7]) as he is scheduled for turn 4. Thus, RUS now has 2 ✕, equal to its minimum limit, and does not receive any ? ✕.</p> </div> <div data-bbox="112 1340 1117 1401"> <p><b>C Missionaries</b> Some countries receive Mis. Check the specific rules of the country to know when.</p> <p>C.1 If this is the case, new Mis are placed now.</p> </div> <div data-bbox="112 1415 1117 1476"> <p><b>D Placement</b> All leaders deemed to be placed at a given turn are placed simultaneously. That is, one first draws all its ? leaders before placing any.</p> </div> <div data-bbox="112 1489 1117 1513"> <p><b>E Where to place?</b></p> </div>	<div data-bbox="1120 89 2121 122"> <div>Logistic— master – 2016-04-14</div> <div>[R]161</div> </div> <div data-bbox="1120 172 2121 459"> <p>E.1 Mis must be place in an owned, controlled and unbesieged province of the European map.</p> <p>E.2 ✱ must be place in an owned, controlled and unbesieged establishment (COL, TP or fort) in the ROTW, possibly in a COL of level 6. The Area in which they are placed will restrict their possible movement.</p> <p>E.3 Other leaders (✕, †, ⚔, ☹) may be placed either with any unbesieged troop of the same country or in any owned, controlled and unbesieged province. Note that they may be placed with troops in enemy territory if a war is going on.</p> <p>E.4 Additionally, ⚔ and ☹ may be placed in any province or seazone where another leader of the same category was just removed, even if there are no more counter of the country here and even if the discovery of this province or seazone has still not been brought back home (the expedition is too small to be represented, but there are still some members to take the lead once the initial leader is dead).</p> <p>E.5 Note that ⚔ or ☹ may be placed either in Europe or in the ROTW.</p> </div> <div data-bbox="1120 474 2121 643"> <p><b>Example: Replacing a ☹.—</b> At the end of turn 3, HIS decides to let the lone Colón (⚔ &lt;R&gt; H 6.1.1 [T1–T3]) in CUBA. At turn 4, Colón dies and the counter is removed from game. The province is now empty. However, Solís (⚔ &lt;R&gt; J 4.4.2 [T4–T7]) is scheduled to arrive at turn 4, hence he is placed now. Since both are ⚔, Solís may be placed exactly where Colón was.</p> <p>ANG leaves a lone ? ☹ on the cost of AMERICA. Since this is an ? leader, it must be removed at the end of turn. However, ANG receives another ? ☹ for the next turn and may choose to place him at the same place. Note that since ANG has only 3 ? ☹, there is 33% chance that the new one is the same as the old one.</p> </div> <div data-bbox="1120 663 2121 863"> <p><b>F Geographic restrictions</b> Some leaders have Geographic restrictions as where to be placed (America, Asia or Mediterranean).</p> <p>F.1 In addition to other rules, these leaders must be placed in a province or seazone where they are allowed.</p> <p>F.2 That is, e.g., a ✕ with a \$ (America) restriction must be place with a stack or establishment in AMERICA and may not be placed in Europe or Asia.</p> <p>F.3 Note that leaders without capacity to go in the ROTW are <i>de facto</i> restricted to Europe and thus must be placed on the European map.</p> </div> <div data-bbox="1120 877 2121 938"> <p><b>G Hierarchy</b> After placement of leaders, hierarchy must be respected.</p> <p>G.1 If not, you should probably have use free redeployment to solve the problem.</p> </div> <div data-bbox="1120 952 2121 1125"> <p><b>H Pashas</b> TUR receives new Pashas each turn as per §C (Pashas) of section XIV.8.1.2 (Turkish Military system). They are placed now.</p> <p>H.1 The correct procedure of placement is (i) decide a province where a Pasha will be placed ; (ii) draw a random Pasha and place it here ; (iii) repeat until all new Pashas are place.</p> <p>H.2 That is, TUR may not wait to see the actual values of a new Pasha before deciding where to place him.</p> <p>H.3 Placement of Pashas may break hierarchy.</p> </div>

# Military

## Chapter VIII

### VIII.1 Preparations

#### VIII.1.1 Leadership

##### VIII.1.1.1 Double-sided Leaders

**A** Some leaders have two different sides for the same country and the same turns but with two different roles, and can be used as either one or the other of their roles.

A.1 The counter has a ★ written on one of the sides, indicating in which limit the counter counts (independently of the role for which it is used).

A.2 Kings that can also be something else do not count in the limits as soon as they are kings.

A.3 For most countries, the role has to be determined at the beginning of the round, effective for the whole round. POR is an exception (see §A.1 of section XIV.4.1.6 (Portuguese Explorers)).

**B** Some leaders have two sides but no ★.

B.1 The side they're used (and the category they're considered) has to be determined at the beginning of each turn and is effective for the whole turn.

B.2 In most cases, the choice is restricted because each side denotes a change of state of the leader (e.g. change of nationality, crowning, ...) and thus only one of them is available at a given time.

B.3 Especially, generic monarchs of minor countries (e.g. *Shāh*) are chosen at random when the country goes at war and cannot be changed before total peace.

**C** Beware! Some double-sided leaders do not have the same turns of activity on each side. Thus during certain turns only one side will be usable.

##### VIII.1.1.2 Leaders of Multi-national stacks

##### A On land

A.1 If there is a Leader with a monarch symbol (Monarch, Turkish Vizier or heir allowed to lead troops) in the stack, he must takes command.

A.2 Otherwise, the leader with the most troop of its country (or troops he is allowed to command) takes command (this may be a replacement leader if the country with the most troops has no leader in the stack).

A.3 In case of tie, highest ranking tied leader takes command.

A.4 If tied again, players choice (at random in case of disagreement).

A.5 The country of the commanding leader pays for campaigns and win/loss Stability in case of Major Battle.

##### B At sea

B.1 If there is a Monarch, he take command.

B.2 Otherwise, the highest ranking leader among those which can command at least one F counter takes command.

B.3 Otherwise, highest ranking leader takes command.

B.4 In case of tie, players choice (at random in case of disagreement).

B.5 The country of the commanding leader pays for campaigns and win/loss Stability in case of Major Battle.

#### VIII.1.1.3 Deployment of leaders

##### A Replacement of unammed leaders

A.1 If, during military rounds, one player falls below the minimum limit of leaders for one category (due to death or injury) he gets as many random ② as necessary to reach the limit again.

A.2 The new leader arrive at the beginning of next round, in the same place (⚡ and ⚡ may also be placed in Europe or in any COL/TP).

A.3 This may break the hierarchy in which case the player must try to restore it.

A.4 When a wounded leader comes back, the lowest ranking ② leader of the same category is removed and the wounded may take command of any stack without breaking the hierarchy.

**Example:** At the beginning of turn 1, FRA has two ✕: Foix (rank A) and ② 2 (rank F). During the military campaign in Italy Foix get ambushed by perfidious Spaniards near Napoli. He barely escaped with several sword wounds and must rest for many months.

Since FRA has now only one ✕, he pick at random a ② ✕ and gets ② 1 (rank E).

A few rounds later, Foix comes back and can take command of any stack. Since ② 2 has the lowest rank (F), he is relieved from command and removed from the game.

During turn 2, POR has two ⚡ (Dias, if not dead during turn 1, and Cabral). Dias boldly tries to circumnavigate America but dies, his ship crushed in the ice at Cape Horn. Since POR still has 1 ⚡, which is larger or equal to his limit for period I, he does not get any ② ⚡ in replacement.

**B Admirals in the ROTW** An admiral temporary gets the possibility to go in the ROTW if both the following conditions are fulfilled:

B.1 The country has no naval leader allowed in the ROTW (either ⚡ or a ⚡ with the ROTW capacity).

B.2 It is period V or later, or the country as at least 3 COL/TP in **AMERICA**.

B.3 The ⚡ allowed to go in the ROTW (for this turn) is the lowest ranking ⚡. He may not go in seazones with a malus. If he arrives this turn, he must be placed in Europe.

**C Conquistador table** The Conquistador table may be used only:

C.1 in **AMERICA** and **AFRICA**, by any ⚡ and ⚡ (half values) ;

C.2 in **INDONESIA** by Coen, van Diemen and Maetsuycker only ;

C.3 in **INDIA** by all ⚡ restricted to **ASIA** (@). Namely, Clive, Dupleix, Bussy and the minimum ⚡ @ of FRA and ANG in period VII.

#### VIII.1.2 Stacking

### VIII.2 Deployment [to be moved from ch. V]

### VIII.3 On campaigns [12]

### VIII.4 On movements [13,14,15,reactions]

#### VIII.4.1 Special Movements

**A Provinces with several coasts** Movements that imply entering a port and going out of a port may allow a naval stack to go out through a different sea zone than the one used to enter.

A.1 It is not possible if this means to go through land (if the province has multiple coasts as defined in §C (Multiple coasts) of section I.1.2 (Provinces and Sea Zones)).

<div>[R]164</div> <div>On battles [17]</div> <p>A.2 This is possible only if the naval stack owns the port. A COL or TP is required for a <math>\mathbb{F}</math>, a fort is sufficient otherwise (including convoys).</p> <p>A.3 <i>Portugal</i> It is possible for HIS to go through <b>Cabo Verde</b> (or any other portuguese settlement) if it has PORTUGALLIA as a special vassal.</p> <p>A.4 <i>Cape Horn</i> As a special exception, it is not possible to go out through a different sea zone if it avoids <b>Cap Horn</b>, unless the naval stack ends its movement there (and goes out at the next round).</p> <p><b>Example:</b> <i>It is possible, with a TP placed in Kyōto, to enter in the same move with 1NWID coming from Mer du Japon and going out from Mer des Philippines, without going through Mer Jaune nor Pacifique Nord-Ouest. However, it is not possible with a <math>\mathbb{F}</math>, nor if the TP is not owned by the naval stack.</i></p> <p><b>B Wasteland</b> Movement in the Wasteland area (see section I.1.3.1 (Wasteland area)) (for all purposes, including LoS length computation) is doubled until the end of the Wasteland (see §B of section XIV.6.1 (Russian under-development)).</p> <p><b>C Blockading with several coasts</b> A naval stack may blockade a port from any sea zone adjacent to the port, unless there are multiple coasts as defined in §C (Multiple coasts) of section I.1.2 (Provinces and Sea Zones).</p> <p>C.1 In this special case, there is a <i>main coast</i> which is the one that must be blockaded (usually where the anchor is drawn).</p> <div>VIII.5 On discoveries [58]</div> <p><b>A</b> One can try to discover several sea or provinces at the same time, using the most difficult sea and adding +1 for each sea eone/province beyond the first. On Land, themovement capacity limits how many provinces can be discovered.</p> <p><b>B</b> As long as the forces doingthe discoveries have not came back to an establishment existing at the beginning of the military phase, the discovery are not yet usable by other forces. Neither is 'rendez-vous' authorized between stacks having made independent discoveries (no stacking).</p> <p><b>C Diffusion of discoveries</b> MODIFICATION 07/2007.</p> <p>C.1 <i>On sea</i> At the beginning of period IV, all discovered sea zones of Atlantique Ocean are known to everyone else at the beginning of the military phase of the turn following the discovery. Other discovered sea zones have a bonus of -2 for discoveries by other players.</p> <p>C.2 <i>On land</i> At the beginning of period IV, all provinces containing a COL or TP are known to everyone else at the beginning of the military phase of the turn following the discovery.</p> <div>VIII.6 On battles [17]</div> <div>VIII.6.1 Convoys</div> <p>Do not use if using the experimental system for Revolts, <math>\mathbb{P}</math> and Natives.</p> <p><b>A Convoy movements and Pirates/Privateers</b> A convoy (or a naval stack carrying Gold) entering a sea zone of STZ or CTZ is attacked on table IX.1 (Pirates, Privateers and Natives raids) by the pirates, and each privateer allowed to attack the owner of the convoy present in the STZ (even if not in the right sea zone) if it has the right to attack the power (see section IX.3 (Attacks by Pirates &amp; Privateers)).</p> <p>A.1 Only <math>\mathbb{P}\oplus</math> may attack (be they pirates or privateers).</p> <p>A.2 The pirates attack first (one only, with leading named Pirate if any), then the privateers in order of initiative. The attack is resolved before regular naval interceptions.</p>	<div>Military— master – 2016-04-14</div> <div>[R]165</div> <p>A.3 Only one attack for all the pirates in a given STZ or CTZ; and one attack per <math>\mathbb{P}</math> is allowed per move.</p> <p><b>B Attack Procedure</b></p> <p>B.1 Roll for naval interception. Pirates with no leader use 2 as Manoeuvre. If successful, reduce the <math>\mathbb{P}</math> to <math>\ominus</math> and proceed with the attack, else test for the next interception.</p> <p>B.2 Before the attack, an accompanying fleet may try to disperse and reduce the pirates or privateers by making a roll on the corresponding table. If successful, the <math>\mathbb{P}</math> is not reduced but the attack is aborted.</p> <p>B.3 If not aborted, resolve the attack on the Pirate/Privateer raid table.</p> <p>B.4 Each level in the column <math>\text{TF}\oplus</math> corresponds to one NTID captured (with 15 <math>\mathbb{D}</math>).</p> <p>B.5 Afterwards, <math>\mathbb{P}</math> goes at port and are finished for the turn. However Pirates stay in the CTZ or STZ and will attack normally Trade Fleets .</p> <p>B.6 The <i>Barbaresque</i> corsairs cannot attack a Convoy if it is not in <i>MEDITERRANEAN SEA</i>.</p> <p><b>C Convoy in battles</b> If a battle occurs between two naval forces, one of them containing a convoy or Transports, the convoy does not take part in the battle, nor incurs losses during it.</p> <p>C.1 However, at the end of the battle, the pursuit <math>\star</math> result may apply to the convoy or the Transports if the winner decides so.</p> <p>C.2 Each <math>\star</math> captures 2 NTID with corresponding transports points sunk if loaded with troops, or 10 <math>\mathbb{D}</math> captured and 5 <math>\mathbb{D}</math> sunk for NTID loaded of Gold.</p> <p>C.3 The rest of the convoy is kept by the loser.</p> <p><b>D Flota de Oro</b> As soon as the <i>Flota de Oro</i> (and only this convoy) is sunk or reaches Europe, it reappears in a Spanish port on the Atlantic coast.</p> <div>VIII.7 Siegecraft [18]</div> <div>VIII.8 End-of-phase [19]</div> <div>VIII.9 Redeployment [20]</div> <div>VIII.10 Unsorted rules</div> <div>Design note: This Section consists in a bunch of unrelated rules relevant to the Military Phase. These rules should be properly grouped and dispatched in the correct place of this Chapter. This will be done when the military rules will be written (aka in a long time. . . ) Rules presented here are sometimes barely more than a summary rather than a proper rule written in a proper way.</div> <div>VIII.10.1 Occupations [BLP]</div> <p><b>A</b> Occupation markers are in limited amount.</p> <p><b>VIII.10.1.1 Placement of occupations</b></p> <p><b>A</b> Occupations markers may be placed instead of Controls in any of the following cases.</p> <p>A.1 Any country may place occupations in <b>CARIBBEAN</b>.</p> <p>A.2 [TBD] Any country may place occupation on TP of a major or former major country.</p>
--	--

<div>[R]166</div> <div>Unsorted rules</div> <p>A.3 POR may place occupations on AYMAN and ADEN.</p> <p>A.4 RUS may place occupations on any province adjacent to its national territory.</p> <p>A.5 HIS may place occupations on Dutch provinces during event III-1 (1) (Revolt of the United Provinces). Similarly, HOL may place occupation on Spanish provinces that were part of BURGUNDIA during the same Event.</p> <p>A.6 TUR, AUS and POL may place occupations in any province that was part of HUNGARIA, after event I-E (Downfall of Hungary).</p> <p>A.7 [TBD] VEN may place occupations in <i>ITALY</i> if <i>Itali e San Marco</i> has been declared.</p> <p>A.8 [TBD] Before event II-1 (1) (Act of Supremacy), ANG may place occupations in former territory of the 100 years war: <b>Guyenne, Quercy, Poitou, Picardie</b>.</p> <p>A.9 FRA may place occupations in provinces of the HRE that are adjacent to owned territory.</p> <p>A.10 SABAUDIA may place occupation in any province with its shield (blurred or not).</p> <p><b>B</b> Contrary to Controls, occupations are not removed when peace is signed and may stay in place.</p> <p><i>B.1</i> However, the peace treaty may include removal of certain occupation. This does not change the rest of the peace (i.e. it is purely an agreement between players and do not change the level of the peace or the number of conditions exchanged).</p> <p><b>C</b> Occupations may be voluntarily removed by a diplomatic declaration. In that case, the control of the province is immediately given back to its owner.</p> <p><b>D</b> If a country annex an occupied province, the occupation is removed.</p> <p><b>E</b> As control markers, if an occupied province is besieged and taken by another power, the occupation is removed.</p> <p><b>F</b> In order to maintain occupation, a country must keep at least 1LD in each occupied province. If, at any moment, this garrison is not present, immediately remove the occupation marker and</p> <p><i>F.1</i> If the occupant and the owner are at peace, return control of the province to its rightful owner;</p> <p><i>F.2</i> If they are at war, replace the occupation by a control of the same country.</p> <div>VIII.10.1.2 Effect of occupation</div> <p><b>A</b> In addition to giving control of the province or establishment, occupations also give income (including exploited resources) to the occupant rather than the owner.</p> <p><b>B</b> Each country with an occupied owned province has a free CB (Overseas CB if this is a COL or TP) against the occupant.</p> <p><b>C</b> The province is still owned by the rightful owner for all VPs purpose (especially for period objectives).</p> <p><b>D</b> The occupant must maintain a garrison of at least 1LD.</p> <p><i>D.1</i> If there are less troops and the occupant and occupied are not at war (interventions do not count), remove the occupation and control of the province is immediately returned to its owner. Any remaining occupant troops (NIDE in the ROTW) are immediately destroyed.</p> <p><i>D.2</i> If there are less troops and the two countries are at war, immediately replace the occupation by a control.</p> <p><b>E</b> The Portuguese occupations also enforce an AT with AYMAN or ADEN.</p> <div>VIII.10.2 About logistic</div> <p><b>A Campaigns for MIN</b></p> <p>A.1 limited intervention: 1 simple campaign each turn. 1 passive campaign each round. More can be paid by the MAJ (pay only the difference in cost of campaign, not the full campaign).</p> <p>A.2 full intervention: 1 simple campaign each round. Multiple campaigns may be obtained by reinforcement. More can be paid by the MAJ (as above).</p> <div>VIII.10.3 Military campaigns</div> <p><b>A</b> Interception is allowed according to the last campaign paid.</p>	<div>Military— master – 2016-04-14</div> <div>[R]167</div> <p>A.1 For player without initiative, this is the campaign of the previous round.</p> <p>A.2 During first round, players without initiative may intercept (before their first move) as if they had done a passive campaign.</p> <p><b>B</b> When moving both at sea and on land, the cost of both campaigns is computed separately and only the maximum cost is paid.</p> <div>Example: A Major campaign allows to both:</div> <ul style="list-style-type: none"> <li>• attack with one naval stack of 3F;</li> <li>• move without attacking (exploration possible) with as many naval stacks as wanted (non-aggressive movement is not restricted);</li> <li>• maintain as many blocus and fight against IP as wanted (only movement is restricted);</li> <li>• attack with as many small (<math>\leq 5LD</math>) land stacks as wanted (the reason for which the campaign is Major needs not to be the same at sea and on land);</li> <li>• move without attacking as many large land stacks as wanted (non-aggressive movement is not restricted);</li> <li>• maintain as many sieges and fights against revolts with large stacks as wanted (only movement is restricted).</li> </ul> <p><b>C None</b> 0 <math>\Phi</math>: No action, no movement, no exploration, no siege, . . . allowed (troops may retreat before battle and will fight back if attacked). No interception allowed.</p> <p><b>D Passive</b> 10 <math>\Phi</math>:</p> <p><i>D.1</i> Interception allowed only in friendly provinces.</p> <p><i>D.2</i> On land: Moving in friendly provinces; maintaining sieges and fights against revolts; moving X (and <math>\odot</math>) to reestablish hierarchy.</p> <p><i>D.3</i> At sea: Moving stacks of 1F maximum. No attack.</p> <p><i>D.4</i> Naval actions: friendly-to-friendly transport, maintain fight against IP, exploration, maintain blocus.</p> <p><b>E Active (aka Simple)</b> 20 <math>\Phi</math>: All allowed by Passive plus</p> <p><i>E.1</i> Any interception.</p> <p><i>E.2</i> On land: one stack of <math>\leq 5LD + 1</math> Pasha without restriction [TBD: or +2 pashas ?]</p> <p><i>E.3</i> At sea: one stack with at most 1F counter without restriction.</p> <p><b>F Active/No Logistic</b> 10 <math>\Phi</math>: Same as Active but</p> <p><i>F.1</i> At sea: one stack <b>without</b> F without restriction.</p> <p><i>F.2</i> On land: all stacks <math>\geq 3LD</math> roll for attrition (even if not moving).</p> <p><b>G Major</b> 50 <math>\Phi</math>: All allowed by passive plus</p> <p><i>G.1</i> On land: either one stack without restriction (neither size nor action) or all stacks <math>\leq 5LD + 1</math> Pasha without restriction [TBD: or +2 pashas]</p> <p><i>G.2</i> At sea: either one stack without restriction (neither size nor action) or all stacks with at most 1F counter without restriction.</p> <p><b>H Multiple</b> 100 <math>\Phi</math>: all stacks may act without restriction.</p> <div>VIII.10.4 Supply, Attrition, Sieges</div> <div>VIII.10.4.1 Sources of Supply, Lines of Supply</div> <p><b>A Source of Supply - Land</b></p> <p>A.1 Source of Supply on Land: any controlled city; TP or COL. Exception: neither owned nor allied: gives weak supply. Fortresses in desert: gives full supply in the province, only weak supply further.</p> <p>A.2 Forts: are Sources of Supply on Land for LD or LDE only.</p> <p>A.3 <i>Præsidios</i> are Sources of Supply only for forces inside the fortress.</p>
---	--

<div>[R]168</div> <div>Unsorted rules</div> <p><b>B Supply by naval forces</b> Naval forces may provide SoS to Land forces in coastal provinces.</p> <p>B.1 NDE only: can supply up to 1LD (and 2LDE) and blockade only fort.</p> <p>B.2 NID counters: supply up to 3LD (without A) and blockade up to F level 1.</p> <p>B.3 One F counter and at least 2 NID in the stack: may supply up to 5LD (including A) and blockade up to F 3.</p> <p>B.4 F⊕ with at least 3NID in the stack: may supply any stack and blockade any F.</p> <p>B.5 Convoys and are never taken into account for supply and blockade.</p> <p><b>C Source of Supply - Sea</b> Arsenals are SoS for all naval forces; other ports of city, COL or TP are SoS for stacks with at most one F;</p> <p>C.1 Forts (not of TP) are SoS only for stack with at most one NID (and possibly NDE).</p> <p>C.2 <i>Præsidios</i> are SoS for naval forces without F; however, a naval force containing up to one F may enter a <i>Præsidio</i> to supply it (if besieged) or bring forces.</p> <p>C.3 <i>Stacking</i>: Arsenals contain any size of force; Normal ports can have at most one F inside; forts may contain only NID, NDE (no F).</p> <p><b>D Line of Supply - Land</b> LoS goes from SoS to troops.</p> <p>D.1 In Wasteland, any non Wasteland native country double the cost in MP for LoS until construction of S<sup>1</sup>:Petersburg or event VI-1 (The Great Northern War) (whichever occurs first).</p> <p>D.2 In non-national desert, double the cost in MP for LoS.</p> <p>D.3 <b>When supplied by naval forces</b> Length of LoS is 3MP (6MP in Wasteland or Desert) plus 1 per sea crossed from a SoS able to supply the naval stack.</p> <p>D.4 Note that the seazone with the fleet is <b>not</b> crossed by the LoS (only entered to turn the fleet into a SoS for the troops), hence troops supplied by ships adjacent to a port have a LoS of length 3MP only.</p> <p>D.5 Note also that only the 3MP of "supply by sea" is doubled if required, not the extra MP for extra seas.</p> <div>VIII.10.4.2 When does Attrition occur?</div> <p><b>A Supply Segment</b> (Before movement). Land stacks (only) roll for attrition if at least one of the following case occurs. If several cases occur, each above the first gives a +2 malus to the roll ("Double cause").</p> <p>A.1 No LoS ;</p> <p>A.2 weak Supply, namely:</p> <ul style="list-style-type: none"> <li>LoS of 6 or more MP (except LD/LDE in ROTW)</li> <li>LoS through non-national desert (including last province)</li> <li>SoS not owned by alliance (only controlled)</li> <li>Supplied by a fleet not adjacent to its own SoS (except for LD/LDE in the ROTW).</li> <li>Besieged (siege attrition)</li> </ul> <p>A.3 Force in <i>Cold area</i> in an uncontrolled province after Winter round (including in case of Summer/Summer transition and end of turn) (in the ROTW, add the malus of the area) ;</p> <p>A.4 <i>Timarlar</i> after Winter round (as above) (Special, see §B (Yearly Campaigning.) of section XIV.8.1.2 (Turkish Military system))</p> <p><b>B Movement Segment, land</b> Land stacks roll for attrition at the end of movement (before battle) if at least one of the following case occurs. If several cases occur, each above the first gives a +2 malus to the roll ("Double cause").</p> <p>B.1 Large stack (≥ 6 LD, or ≥ 3LD if no logistic) ;</p> <p>B.2 moving 6MP or more ;</p> <p>B.3 moving 3MP or more during <i>bad weather</i> ;</p> <p>B.4 if embarking or disembarking not in friendly port.</p> <p><b>C Attrition at sea</b> Naval stacks always roll for attrition except when staying at port the whole round.</p>	<div>Military— master – 2016-04-14</div> <div>[R]169</div> <p><b>D Siege Attrition</b> (during Supply or Siege Segment)</p> <p>D.1 Besieged during Supply Segment.</p> <p>D.2 Besieger if the siege is impossible (not enough troops or no LoS) or if requested by the siege roll.</p> <p><b>E After battle</b></p> <p>E.1 On land, any non-winning troop (use specific table).</p> <p>E.2 At sea, any moving stack (retreat or following to port).</p> <p><b>F End of round (or turn)/Redeployment</b> In the following cases, a stack must move and roll for attrition at the end of round or turn. Usual causes of attrition for movement occur and cause maluses.</p> <p>F.1 If no LoS during Supply Segment and still no LoS at end of round: forced redeployment (and attrition). If no way out (naval not allowed), the stack is destroyed.</p> <p>F.2 Siege not maintained at end of turn (no Siegework⊕).</p> <p>F.3 Fleet staying at sea at end of turn.</p> <p>F.4 Fleet going to port at end of turn.</p> <p>F.5 Peace evacuation</p> <div>VIII.10.4.3 Attrition results</div> <p><b>A</b> The effect of the result <b>P</b> in the attrition table depends on the technology of the stack. In case of mixed stacks, take the worst technology.</p> <p>A.1 Until <i>Arquebus</i>: 1LD lost during movement <b>and</b> one side of <i>Pillage</i> in any non-neutral province entered or left.</p> <p>A.2 <i>Muskets, Baroque, Manoeuvre</i>: either 1LD lost during movement or both <i>foraging</i> (-1drm during 1st day of battle) and one side of <i>Pillage</i> in any non-neutral province entered or left.</p> <p>A.3 <i>Lace</i>: either 1LD lost during movement or one side of <i>Pillage</i> in any non-neutral province entered or left.</p> <p>A.4 Besieged troops cannot pillage and thus must lose 1LD.</p> <div>VIII.10.5 Autour du mouvement</div> <p><b>A Empilement</b></p> <p>A.1 sur terre, [3 pions et 8 DT] + 2 pachas</p> <p>A.2 sur mer [3 pions] + 2 Tr</p> <p>A.3 de et dc ne sont pas comptés, mais au plus 2 dans une pile.</p> <p>A.4 <i>Arsenaux et ports</i> Ports réguliers ne peuvent contenir plus d'un pion F. Seuls les arsenaux (en Europe: indiqués sur la carte; ROTW (et cas particuliers) : indiqué sur le pion forteresse) peuvent accueillir 2 ou 3 F. Les forts ne peuvent accueillir que des NID ou NDE.</p> <p><b>B Pour l'interception</b></p> <p>B.1 Noter que c'est l'intercepteur qui attaque toujours. et que la bataille est résolue tout de suite entre la pile qui intercepte et la force interceptée. Il peut choisir de regrouper dans sa pile les forces immobiles amies dans la province.</p> <p>B.2 un intercepteur peut être intercepté à son tour [les forces qui interceptent viennent en renfort de la pile qui a été la 1e interceptée] ; c'est tout de même le joueur qui n'est pas en phase qui est l'attaquant.</p> <p>B.3 Si une force intercepte dans une zone où il y a déjà une force ennemie, cette for peut intercepter comme par la paragraphe précédent pour se joindre à la défense [remarque : il peut alors y avoir plus de 8 DT, les forces supplémentaire n'ont simplement aucun effet sur le combat].</p> <p>B.4 Si un combat d'interception a lieu dans une province avec des forces non impliquée dans le combat, ces forces suivent la retraite éventuelle de la pile allée engagée en bataille (mais sans perte). [TBD]</p> <p>B.5 une pile qui a combattu pendant une phase de mouvement et n'a pas gagné (perdu ou ex-aequo) ne peut plus bouger ni intercepter.</p>
--	--

<div>[R]170</div> <div>Unsorted rules</div> <p>B.6 malus aux interceptions :  intercepter à travers passe de montagne -2  intercepter depuis ou vers un marais -1  intercepter à travers détroit : impossible</p> <p><b>C Transport maritime</b>  C.1 Considéré comme l'action de la flotte.  C.2 Les forces terrestres doivent partir soit d'une côté quelconque, soit d'un port/arsenal pouvant contenir la pile navale. A destination nécessairement d'un port/arsenal ami (contrôlé, allié,...) pouvant contenir la pile navale. La force navale doit stopper son mouvement là.  C.3 Les forces terrestres ont dépensé 2 MP si de port ami à port ami (3 en ROTW), 3 MP sinon (6 MP en ROTW), et peuvent rester dans la forteresse ou continuer le mouvement comme province si la forteresse n'est pas assiégée. Elles peuvent être intercepté dans la province si ils sortent et ont alors le malus débarquement pour la bataille [TBD ?].  C.4 Jet d'attrition de mouvement pour force terrestre si a embarqué ailleurs qua dans un port/arsenal.  C.5 Exception avec C ou Gouv ou Expl dans la pile (combinée), l'embarquement et débarquement en ROTW est tjs considéré dans un port ami si il n'est pas opposé (pas de ville, COL, TP ou forces d'un ennemi en guerre contre soi).</p> <p><b>D Invasion navale</b> Force terrestre : part d'un port ou arsenal contrôlé. La flotte doit pouvoir entrer dans le port.  D.1 Il coûte 3 MP à la force terrestre pour être laissé sur une côte sans port contrôlé (6 MP en ROTW).  D.2 Jet d'attrition de mouvement pour force terrestre si a débarqué ailleurs que dans un port/arsenal.</p> <p><b>E combiner mvt terre/mer</b> Une force terrestre doit commencer dans la province côtière.</p> <p><b>F Mouvement le long d'un rivièrè en ROTW</b> se qualifie si un même fleuve ou lac est adjacent aux deux provinces. Ajouter le coût de traversée du fleuve le cas échéant.  F.1 Ne sert pas au mvt de pions A; sert pour mvt de LD, LDE et au ravitaillement.</p> <p><b>G Combat d'écrasement (Overrun)</b> En cas de disproportion des forces en présence, un combat d'écrasement est possible pendant le mouvement qui ne l'arrête pas (et l'attrition n'est testée que plus tard); inversement, si une force attaque un adversaire en surnombre, le défenseur peut déclarer un combat d'écrasement immédiat.  G.1 Si 4 LD vs. 1 LD ou moins : résoudre le combat et si la force la plus nombreuse gagne, elle peut continuer son mouvement (ou continuer des interceptions si ce n'était pas sa phase).  G.2 Si 8 LD vs. 1 LD ou moins : la force la plus faible est éliminée automatiquement sans combat (et son chef ne fait pas de test de perte).  G.3 Dans les 2 cas, le défenseur peut dire qu'il se retire dans la forteresse de la province avant le combat d'écrasement.</p> <div>VIII.10.6 règles navales</div> <p><b>A Ravitaillement des flottes et ports d'attache</b> Arsenals are SoS for all naval forces; other ports of city, COL or TP: for stacks with at most one F; forts: only for stack with at most one ND (and possibly NDE).</p> <p><b>B Taille des forces navales</b> pour le ravitaillement terrestre, des forteresses et le blocus.  B.1 NDE seuls : ravitaille jusqu'à 1LD (+ LDE) et blocus ou ravitaillement de fort (f0) seulement  B.2 pions ND: ravitaille jusqu'à 3LD (sans A) et blocus ou ravitaillement de f0 ou f1  B.3 un pion F et au moins 2 ND ravitaille jusqu'à 5LD (avec A possible) et blocus ou ravitaillement jusqu'à f3  B.4 un pion F⊕ et au moins 3 ND (Convoy ne comptent pas): ravitaille pile de taille quelconque et blocus ou ravitaillement jusqu'à f5  B.5 Les pions Convoys ne comptent pas.</p> <p><b>C Rappel de tout ce qui vaut pour une action de la flotte</b></p>	<div>Military— master – 2016-04-14</div> <div>[R]171</div> <p>C.1 <i>Exploration</i> – résolu pendant le mouvement de la pile</p> <p>C.2 <i>Transport naval ou invasion navale</i> (c'est-à-dire embarquement, débarquement, y compris ravitaillement et éventuel blocus de la province d'arrivée) : achève le mouvement naval.  Le joueur doit anoncer en entrant dans la mer son intention de débarquer des forces et dans quelle province.  Exception: une pile qui débarque avec un C - ou un E - ne compte pas comme une action.  Noter : après bataille navale, interdiction de débiter une transport naval (oui invasion) au même round (on peut seulement finir celui-ci, si victorieux)</p> <p>C.3 <i>Blocus d'un port et/ou ravitaillement maritime</i> d'un force sur une côte</p> <p>C.4 <i>Ravitaillement maritime</i></p> <p>C.5 <i>Ravitaillement d'un port sous blocus</i> il faut entrer dans le port en étant passé dans un autre port (peut s'accompagner d'un débarquement de troupes dans le port) et avoir au moins autant de forces navales que ce qui serait nécessaire pour le blocus.</p> <p>C.6 attaque – à la fin du mouvement de la pile</p> <p>C.7 lutte contre pirates et corsaires – résolu à la fin du round</p> <p><b>D Actions passives</b>  D.1 Mouvements  D.2 Interception : une flotte d'un joueur inactif (pas en phase) peut tenter d'intercepter chaque pile qui bouge dans sa mer ou une mer adjacente (autant de tentatives que d'opportunités, mais un pays/une alliance ne peut faire qu'une seule tentative par mer). Si au port : dans une des mer adjacente.</p> <p><b>E Blocus</b> Il faut avoir au moins la force navale voulue selon le niveau de forteresse (voir table ou supra).  E.1 Coupe le bonus de -3 au test de ravitaillement des assiégés ;  E.2 Flotte qui veut sortir ou entrer : doit faire un test pour échapper au blocus (ou attaquer la flotte en blocus)</p> <p><b>F Rappel des mod. d'interception VOIR TABLE</b>  <b>G</b> Interception: success on <math>\geq 8</math> or natural 10  ±? Manoeuvre differential  +1 if technology counter has an advance of 6 cases or higher  +1 If the target province contains a friendly force/city  -1 From or to swamps (-2 if both) or from Flooded province  -2 Through mountain pass, river or <i>bad weather</i>  -2 If the target province contains an enemy force  -1 If interceptor was besieging or blockading at current or previous round  +1 If intercepting in the same province/sea zone or with <i>Three-decker</i>  or +2 if intercepted Fleet will make a Debarkment in same sea zone,  or same province as port, or adjacent sea zone from arsenal  or -3 If interceptor at port (except arsenal)  G.1 Pour les flottes faisant Invasion/Naval Transport : le bonus +2 remplace le malus de -3 au port ou le bonus de +1(même mer) si intention de débarquée a été indiquée. Pour une flotte en mer: +2 si c'est dans la même zone; flotte dans arsenal : +2 dans les mers qui bordent l'arsenal; flotte dans port: +2 si c'est dans la province du port.</p> <div>VIII.10.7 Effet d'un presidio (COMPLETER avec 53.8)</div> <p><b>A Presidios and Blockade</b>  A.1 The port is considered as blockaded by this fortress, even if the country that thus exerts the blockade is not at war with the owner of the blockaded port.</p>
---	---

<div data-bbox="112 89 181 119">[R]172</div> <div data-bbox="544 89 680 119">Unsorted rules</div> <p>A.2 Any exit from or entry into this port by units (privateers, Dn or F) may trigger an reaction by the fortress. This reaction is decided by the owner of the Presidio. This a declaration of war (with the usual CB cost) if the interception is against any unit except privateers.</p> <p>A.3 The reaction is resolved as a fire by the Presidio on the following table:</p> <p><b>B</b> <i>Præsidos</i>: roll 1d10+fortress level+1 if <math>\mathbb{F}</math></p> <p><b>B.1 <i>Strait fortifications</i></b>: as level 2 in Europe, level/2 (round down) in ROTW.</p> <p><b>B.2 Result</b>: <math>\geq 9</math> End of move, <math>\geq 11</math> Loss of 1ND, <math>\geq 13</math> Loss of 2ND</p> <p><b>C As Source of Supply</b></p> <p>C.1 <i>Præsidos</i> are Sources of Supply only for forces inside the fortress.</p> <p>C.2 <i>Præsidos</i> are SoS Sources of Supply for naval forces without <math>\mathbb{F}</math>; however, a naval force containing up to one <math>\mathbb{F}</math> may enter temporarily a <i>Præsidio</i> to supply it (if besieged) or bring forces.</p> <p><b>D Strait fortifications</b> Certain straits are marked with a red naval frontier and a tower symbol near the province controlling them. These are the strait between Italy and Sicily (controlled by <i>Messina</i>), the entrance to <b>Adriatique</b> (controlled by <b>Corfou</b>), the Dardanelles (<b>Çanakkale Boğazi</b>) and the Bosphorus (<b>Trakya</b>) in Europe; and the entrance to Saint-Laurent river (Louisbourg, on Cape Breton Island), entrance to <b>Mer rouge (Sogotra)</b>, entrance to <b>Golfe Persique (Ormus)</b>, the Malacca strait (<i>Malacca</i>) and the Sunda strait (<i>Java</i>) in the ROTW.</p> <p>D.1 In Europe, they act as a <i>Præsidio</i> of level 2 against any fleet trying to cross the red lines. Using them against any unit but <math>\mathbb{P}</math> gives a free CB to the owner of the intercepted stack for the next turn.</p> <p>D.2 If a power has a <i>Præsidio</i> on the <b>Çanakkale Boğazi</b>, it negates the effect of the Strait Fortifications for this power.</p> <p>D.3 In the ROTW, they act as a <i>Præsidio</i> of level half the level of the fortress in the province (rounded down). Using them against any unit but <math>\mathbb{P}</math> give a free CB (normal or oversea, offended player's choice) to the owner of the intercepted stack.</p> <p>D.4 For the Sunda strait, the city of <i>Java</i> must also be owned, usually by placing a COL there.</p> <p>D.5 Minor countries (usually VENETIA in Europe and GUZARATE for Malacca (sometimes CHINA)) will always use them against power at war with them. If they are at peace, their controller chose whether to use it or not. If they are neutral, they will always use them against <math>\mathbb{P}</math> and never against other naval units.</p> <div data-bbox="112 970 1115 1010"> <b>VIII.10.8 Les sièges</b> </div> <p><b>A</b> Pour la sape, effet du terrain (non cumulatif)</p> <p>A.1 -2 Port sans blocus, terrain clair</p> <p>A.2 -3 Port sans blocus, terrain autre que clair</p> <p>A.3 -2 Terrain accidenté (montagne, marais, forêt, désert) sans port ou blocus</p> <p><b>B TBD</b> si un assaut a causé au moins 1 perte (sans modif de taille ni bonus "grosse armée" dans le tour : +1 à la sape et à l'assaut (max +1, non cumulatif avec le +2 de brèche).</p> <p><b>C</b> Les tables sont à jour !</p> <p><b>D Expérimental</b> Un assaut qui a obtenu au moins 1 pertes (sans compter les bonus de Janissaires, RUS, POL) sans prendre la forteresse donnera un bonus de +1 aux jets de sape et aux assauts suivants du tour.</p> <p><b>E Port Siegeworks</b> Ports that are besieged with at least one level of Siegework are submitted to a fire from the siegework that works the same way as the Presidios, with a +1 per counter Siegework⊕. <b>But the port is not blockaded.</b></p> <p><b>F Impossibilité de tenir un siège</b> Ceci est regardé au début de la phase de siège (nbre de DT <math>\geq</math> niveau) ; si impossible, mvt de redéploiement forcé vers chez soi - en fin de tour: si pas Usure⊕, redéploiement forcé.</p>	<div data-bbox="1117 89 1388 119">Military— master – 2016-04-14</div> <div data-bbox="2056 89 2121 119">[R]173</div> <div data-bbox="1117 167 2121 207"> <b>VIII.10.9 Terrains</b> </div> <p><b>A Effet du terrain sur mouvement et combats</b></p> <p>A.1 Plaine: 1 PM si ami, 2 PM sinon (2 et 4 si hors-Europe) ;</p> <p>A.2 Accidenté en Europe : 2 PM, sauf 3 PM en Montagne ennemi ;</p> <p>A.3 Accident en ROTW: 4 PM si ou mvt de forces d'un pays mineur de ROTW ; 6 pm si ennemi ;</p> <p>A.4 Rivière, passe, détroit, arrivée ou départ en marais: +1 PM (et +2 PM HE)</p> <p>A.5 Déplacement naval: 3 PM (indépendamment du terrain de départ ou d'arrivée, y compris marais), sauf si de port ami à port ami 2 PM. 6/3 PM en rotw.</p> <p><b>B Les différentes zones de forêts</b></p> <p>B.1 forêts nordiques : suède+Finlande+côte baltique actuellement orientale</p> <p>B.2 forêts orientales : celles actuelles (sauf dessus) et Prussia et adjacent, Lovonie, Podolie.</p> <p><b>C Effet sur le combat</b> REVOIR : tables à jour</p> <p>C.1 Modificateurs feu et choc</p> <p>en marais, forêt ou désert -1</p> <p>en montagne pour l'attaquant (sauf s'il a intercepté) -1</p> <p>force traversant un fleuve ou une passe de montagne -1</p> <p>(1er round, et sauf si il a intercepté)</p> <p>C.2 Modificateurs feu</p> <p>force débarque ou traverse un détroit -2 [1er round]</p> <p>C.3 Modificateurs choc</p> <p>force débarque ou traverse un détroit -3 [1er round]</p> <p>C.4 Modificateurs poursuite</p> <p>en marais, forêt, désert ou montagne -1</p> <p>vainqueur a traversé fleuve, passe, ou détroit ou débarque -1</p> <p>retraite du perdant à travers passe, fleuve, détroit ou réembarquement +1</p> <p><b>D</b> Si plusieurs piles se rejoignent dans une même province pour une bataille (2 forces qui convergent ou interception), on prend le plus défavorable effet de terrain de frontière.</p> <p><b>E Finlande-Suède</b> Un mouvement de retraite (après bataille ou redéploiement forcé) est autorisé entre les provinces au nord de ces deux zones. Le mouvement prend toute la capacité de mouvement restante (donc il faut faire un test d'attrition car les 12 MP sont dépensés). C'est la seule forme de mouvement autorisée par ce chemin.</p> <div data-bbox="1117 1109 2121 1149"> <b>VIII.10.10 Les batailles</b> </div> <p><b>A Victoire majeure</b> Elle est obtenue aux conditions suivantes</p> <p>A.1 Sur terre en Europe : dérouté du perdant et différence des pertes égale à 3LD ou plus</p> <p>A.2 Sur terre en ROTW: dérouté du perdant, perdant avait au moins un pion A européen et différence des pertes égale à 3LD ou plus</p> <p>A.3 Sur mer : dérouté du perdant et différence des pertes d'au moins 5ND ou 8 DGa.</p> <div data-bbox="1117 1305 2121 1345"> <b>VIII.10.10.1 Les batailles terrestres</b> </div> <p><b>A Organisation des armées et cavaleries</b> Valable si au moins un pion armée de la classe en question.</p> <p>A.1 <i>Sipahi</i> TUR (avant réforme M-2) a +1 en choc et poursuite plaine/désert</p> <p>A.2 <i>iim</i> bonus +1 au choc en I-IV en plaine/forêt orientale</p> <p>A.3 <i>tercios</i> toutes les autres armées ont un malus -1 en choc contre eux sauf i, im, ii et iim en I-V</p> <p>A.4 <i>iiim</i> bonus +1 au choc en IV-V en plaine et forêts occidentales,</p>

---	---

<div data-bbox="114 90 1115 127"> <div>[R]176</div> <div>Le combat rapide revisité – Version initiale du PPI – en chantier – BEWARE</div> </div> <div data-bbox="114 167 1115 207"> <div>VIII.11.1</div> <div>Présentation</div> </div> <div data-bbox="114 220 1115 363"> <p>Ce système de combat terrestre rapide est repris de celui qui doit être présenté dans la 2<sup>e</sup> extension d'Europa Universalis toujours à paraître. Il doit permettre de ne plus prendre en considération les contenance d'armées pour aucun aspect du jeu, même hors Europe (usure et combat contre les indigènes). Les règles du combat rapide, laissant de côté l'attrition, le problème de la taille des armées, les spécificités des campagnes hors Europe, etc, des propositions de complément sont données ici.</p> </div> <div data-bbox="114 367 1115 448"> <p>Les règles écrites par Ph. Thibaut sont utilisées sauf pour les ajustements que nous proposons ; les majeurs sont indiqués en <i>italique</i> ci-dessous. Cette nouvelle écriture des règles est complète (à la différence de <code>eu8combat.pdf</code> qui ne donne que les changements proposés aux règles de combat rapide).</p> </div> <div data-bbox="114 451 1115 507"> <p>Enfin, comme le restant de nos modifications ajoutent deux joueurs et des puissances majeures potentielles (Pologne, Suède, Prusse, Russie en périodes I et II), les tableaux font apparaître ces nations.</p> </div> <div data-bbox="114 523 1115 563"> <div>VIII.11.2</div> <div>Autres règles militaires</div> </div> <div data-bbox="114 571 443 598"> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="114 606 1115 646"> <div>VIII.11.2.1</div> <div>Phase de jeu</div> </div> <div data-bbox="114 646 443 673"> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="114 676 1115 788"> <p>On propose comme clarification et modification de la phase militaire de prendre la suivante. Le premier camp, ayant l'initiative, est celui qui a son monarque dont la somme des valeurs est la plus forte. Les alliés doivent bouger ensemble (ceci rend possible une coopération militaire) et prennent alors l'initiative du moins bon monarque. En cas d'égalité entre deux camps, tirer au hasard pour tout le tour au début du premier round.</p> </div> <div data-bbox="114 804 405 831"> <p><b>A Séquence du round militaire</b></p> </div> <div data-bbox="114 834 1115 1121"> <ul style="list-style-type: none"> <li>• Test de fin du tour après le round qui commence.  <b>Modification</b> : il n'y a pas de test au 2<sup>e</sup> round – ainsi le tour comporte au moins 3 rounds.</li> <li>• Phases du camp 1 :  choix de la campagne, mouvements et découvertes ; interceptions (et batailles immédiates) possibles par le camp 2 pendant les mouvements, puis usure et batailles.</li> <li>• Phases du camp 2 :  choix de la campagne, mouvements et découvertes ; interceptions (et batailles immédiates) possibles par le camp 1 pendant les mouvements, puis usure et batailles.</li> <li>• Phases finales :  dans l'ordre d'initiative, sièges des deux camps (sape et/ou assaut), lutte contre les révoltes et les pirates.</li> </ul> </div> <div data-bbox="114 1129 1115 1169"> <div>VIII.11.2.2</div> <div>Mouvement, empiement, attrition</div> </div> <div data-bbox="114 1169 443 1197"> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="114 1209 1115 1297"> <p><b>A b. Empiement, usure</b> L'empiement maximum est de trois pions dans une même zone terrestre pour un camp donné avec une limite de 8 équivalents détachement d'un même camp et deux pachas. Cette limite doit être respectée à la fin du déplacement de chaque pile.</p> </div> <div data-bbox="114 1300 1115 1382"> <p>L'usure des mouvements terrestre est jouée sur la table d'attrition donnée ci-dessous dès que la pile fait au moins 6 PM. Elle se fait sur la table ci-dessous en Europe (voir plus pour hors-Europe). Les forces enfermées dans des fortifications subissent aussi une attrition si le siège a été mis depuis au moins le round précédent.</p> </div> <div data-bbox="114 1398 1115 1511"> <p><b>B c. Réorganisation des forces.</b> Pendant la phase de mouvement d'un camp, il lui est possible d'intégrer des détachements dans des armées face -. Il faut deux détachements pour passer une armée - en armée +. Il est aussi possible de séparer des pions en armée sans que le nombre équivalent de détachement soit modifié. Ces ajustements peuvent se faire au cours du mouvement.</p> </div>	<div data-bbox="1124 90 2121 127"> <div>Military— master – 2016-04-14</div> <div>[R]177</div> </div> <div data-bbox="1124 167 2121 231"> <p>En revanche, il est interdit de faire apparaître un nouveau pion armée ; ainsi 2 DT ne peuvent devenir une A- ou une A+ ne peut se couper en 2 A-. On peut si on veut éliminer un pion armée dans les réorganisations.</p> </div> <div data-bbox="1124 234 2121 402"> <p>Les forces qui interceptent un ennemi peuvent se réorganiser à la fois dans la zone de départ (pour laisser des forces en arrière) et dans celle d'arrivée (pour intégrer des forces déjà sur place). Le général qui a servi à l'interception doit suivre les forces interceptantes. Celles qui sont interceptées ne se réorganisent qu'après le combat. L'intercepteur peut donc gagner la bataille et se retrouver dans la même province qu'une pile ennemie : il aura le droit de tenter de l'intercepter si elle cherche à sortir de la province, et si les deux piles sont toujours au même endroit après les mouvements, une bataille sera résolue, la pile ayant interceptée comme attaquant.</p> </div> <div data-bbox="1124 405 2121 486"> <p>Le niveau d'expérience des forces amalgamées (en une A+) doit être noté sur un papier. Il faut noter le nombre de DT équivalent vétéran (le reste est conscrit). Il faut aussi noter (pour la détermination du moral en cas d'égalité aux détachements) le moral du pion armée.</p> </div> <div data-bbox="1124 502 2121 646"> <p><b>C d. Hiérarchie des chefs.</b> La hiérarchie des généraux doit être respectée à chaque round. Si la hiérarchie n'est pas respectée en début de round, des forces terrestres ne peuvent être intégrées à une pile ou laissées que si cela permet de satisfaire à nouveau la hiérarchie (si plusieurs mouvements sont nécessaires, ils sont autorisés dans n'importe quel ordre du moment qu'à la fin des mouvements la hiérarchie est correcte). Sinon aucune armée ne peut modifier sa composition. Une pile terrestre ne peut pas ramasser ou laisser des forces en violant la hiérarchie.</p> </div> <div data-bbox="1124 649 1630 676"> <p>Les piles multi-nationales sont commandées comme il suit :</p> </div> <div data-bbox="1124 679 2121 879"> <ul style="list-style-type: none"> <li>- le monarque passe devant tous les autres généraux (y compris d'un autre pays) pour commander une pile,</li> <li>- la majorité des troupes décide sinon de quel général commande ; en cas d'égalité du nombre de DT les joueurs choisissent (ou tirent au hasard si ils ne se mettent pas d'accord) ; si le pays majoritaire n'a pas de général présent, on utilise un général de remplacement de ce pays,</li> <li>- pour le général qui commande, toute la pile est comptée au regard de la hiérarchie ; pour les généraux des autres pays qui ne sont pas le commandant en chef, ils n'ont que leur contingent sous leurs ordres pour déterminer le respect de la hiérarchie.</li> </ul> </div> <div data-bbox="1124 882 2121 963"> <p>Ces mêmes règles s'appliquent pour les forces maritimes, avec comme seule différence que la taille de chaque contingent est comptée comme pour les forces terrestres : un pion F- compte comme 2 D, et un F+ comme 4. Les DGA comptent comme les DNav et les DC comme un demi.</p> </div> <div data-bbox="1124 979 2121 1061"> <p><b>D e. Interception</b> Une pile ne peut tenter d'intercepter qu'une seule fois pendant le mouvement d'une pile ennemie. Une même pile peut cependant être victime de plusieurs tentatives d'interception par différentes piles ennemies durant son mouvement, au plus une interception par province dans laquelle elle entre.</p> </div> <div data-bbox="1124 1064 2121 1208"> <p>Lors d'une interception, la pile interceptante peut laisser des forces en arrière et se réorganiser après le mouvement avec une force déjà sur place (pour respecter la limite de pions dans la région). Cette pile du camp en réaction est l'attaquant lors du combat qui est immédiatement résolu (avant tout autre mouvement) ; si l'interception est dans une province contenant des forces terrestres amies de l'intercepteur, c'est la force en mouvement qui est l'attaquant. Personne ne peut tenter de refuser le combat d'une interception réussie.</p> </div> <div data-bbox="1124 1211 2121 1267"> <p>La force interceptante doit faire un jet d'attrition si elle entre dans une province ennemie non occupée par des troupes amies (qui feraient le siège). Celle interceptée teste l'attrition si elle a déjà bougé d'au moins 6 PM.</p> </div> <div data-bbox="1124 1270 2121 1326"> <p>Après le combat, si la force interceptée a gagné le combat, elle peut poursuivre son mouvement (mais n'aura plus à tester l'attrition si elle a déjà dû le faire).</p> </div> <div data-bbox="1124 1342 2121 1453"> <p><b>E f. Passer outre l'ennemi.</b> Une force de 2 A+ entrant dans une province ne contenant qu'un détachement peut déclarer un combat d'écrasement. Le combat est immédiatement résolu (sans résoudre maintenant l'attrition) et si la force active gagne, elle peut continuer son mouvement. Si elle perd, elle retraite et test après le combat l'attrition éventuelle si elle avait fait au moins 6 PM avant la bataille.</p> </div> <div data-bbox="1124 1457 2121 1511"> <p>Une force entrant dans une province contenant une forteresse hostile non assiégée doit s'y arrêter sauf si elle laisse une force suffisante pour mettre le siège (1 DT par niveau de la forteresse), le restant pouvant continuer le mouvement.</p> </div>
--	---

<div data-bbox="114 90 1117 124"> <div>[R]178</div> <div>Le combat rapide revisité – Version initiale du PPI – en chantier – BEWARE</div> </div> <div data-bbox="114 172 1117 199"> <p>L'attrition éventuelle portera en priorité sur les troupes qui ont poursuivi le mouvement.</p> </div> <div data-bbox="114 205 1117 234"> <p><b>VIII.11.2.3 Logistique des guerres</b></p> </div> <div data-bbox="114 242 1117 269"> <p><b>A a. Les campagnes.</b> Le fonctionnement des campagnes est modifié. Il existe 4 types de campagnes.</p> </div> <div data-bbox="114 301 1117 442"> <p>Un pacha compte pour 1 DT dans l'empilement pour cette règle et on peut en mettre un seul dans les piles des campagnes actives ou majeures limitées à 5DT. Quand il n'y a pas cette limite, l'empilement maximum est de 8DT, 3 pions plus 2 pachas (règle du chapitre II).</p> <p>La campagne d'une pile multinationales peut être payée par n'importe quel pays majeur ayant des troupes dans la pile. Un pays mineur ne peut prendre à sa charge que les piles qu'il commande.</p> </div> <div data-bbox="114 458 1117 628"> <p><b>B b. Achat de troupes.</b> L'achat de troupe se fait uniquement par pion entier. Les limites d'achat par période ont été adaptées dans le tableau final ; elles sont exprimées en équivalent détachement.</p> <p>Le prix d'achat d'un détachement terrestre est maintenant toujours égal à la moitié (arrondie au supérieur) du prix d'une A-. Il faut remarquer que les pions armées doivent être achetés comme tels et qu'il est impossible d'en créer au cours des réorganisations. À la phase de logistique les réorganisations sont possibles autant avant qu'après l'entretien et le placement des nouvelles unités.</p> </div> <div data-bbox="114 644 1117 901"> <p><b>C c. Entretien des troupes</b> <i>Pour rendre compte de la difficulté de maintenir une armée levée à cette époque, et à la payer, les coûts d'entretien sont majorés en temps de paix (y compris pendant seulement des guerres maritimes). Le prix n'est pas modifié quand le pays est en guerre car l'armée peut vivre partiellement sur le pays et parfois les soldats sont réquisitionnés et ne peuvent repartir même en l'absence de solde régulière.</i></p> <p>Le coût d'entretien des troupes n'est pas le même si le pays majeur est en guerre ou en paix. Les tableaux d'entretien indiquent les nouveaux coûts (pour vétérans et conscrits). Lors d'une guerre commerciale ou une intervention limitée (défensive ou offensive), le pays utilise le coût d'entretien en paix. Le coût en guerre est réservé à une guerre complète. Noter que certaines interventions dans des guerres provoquées par des événements (guerres civiles en particulier), sont des guerre complètes (du moment que l'intervention n'est pas qualifiée de limitée).</p> </div> <div data-bbox="114 917 1117 1147"> <p><b>D d. Levée exceptionnelle.</b> <i>L'épuisement des forces armées étant trop élevé, on donne la possibilité de lever des troupes durant la phase militaire.</i> En cas de pénurie de troupes durant la phase militaire, un pays peut procéder à une levée exceptionnel de forces terrestres si il vient de subir une DEFAITE MAJEURE. Décider d'une levée exceptionnel se fait en toute fin d'un round (dans l'ordre l'initiative) et fait perdre 1 en stabilité (sauf à la Suède et à la Prusse). Cette levée est la poursuite de la conscription à la phase logistique et respecte donc les limites d'achat de troupe (et les coûts correspondant) en ajoutant les nouvelles troupes à celles levées au début du tour. Une fois la levée exceptionnelle décrétée, le pays peut continuer de lever des troupes à la fin de chaque round (dans les limites du recrutement maximum) sans perdre de stabilité supplémentaire.</p> </div> <div data-bbox="114 1163 1117 1303"> <p><b>E f. Prêts exceptionnels.</b> Pour faire face aux dépenses imprévues des rounds militaires, il est possible de souscrire des prêts durant les phases militaires. Ils se font aux mêmes conditions que les prêts de la phase logistique, obéissent aux mêmes restrictions si ce n'est qu'on peut en faire un à ce moment même si un premier a été souscrit pendant la logistique. Un prêt demandé durant les phases militaires ou en fin de tour ne peut en revanche pas être refusé, quelles que soient les conditions obtenues.</p> </div> <div data-bbox="114 1319 1117 1348"> <p><b>VIII.11.3 Le combat rapide</b></p> </div> <div data-bbox="114 1370 1117 1511"> <p>– NE PAS PRENDRE EN COMPTE –</p> <p>Les forces armées terrestres sont dans ce système toujours évaluées en équivalent détachement pour toutes les fonctions du jeu : combat mais aussi logistique, empilement et attrition, en Europe comme dans le reste du monde. Faisons un survol du combat rapide : il se déroule en 1 ou 2 round, sans avoir à calculer des facteurs de Feu et de Choc. À chaque round, chaque joueur lance 1 dé pour le feu puis un pour le choc (<i>si personne n'a craqué au moral</i></p> </div>	<div data-bbox="1122 90 2123 124"> <div>Military— master – 2016-04-14</div> <div>[R]179</div> </div> <div data-bbox="1122 172 2123 430"> <p><i>après le feu</i>) sur la nouvelle table de combat ; la colonne y est déterminée par la technologie (tables des aides de jeu). Les dommages sont évalués en nombre équivalent de détachements perdus par l'adversaire et en points de moral.</p> <p>Si personne ne craque à la fin du 1er round ni ne tente de retraire pendant la bataille (règle §E (5. Rompre le combat.) of section VIII.11.3.3 (Pendant les rounds de combat)), un second round a lieu de la même manière mais avec -1 aux jets de dés pour les deux protagonistes. L'armée vaincue subit une poursuite (toujours en colonne E) <i>même si elle n'a pas craqué au moral.</i></p> <p>On calcule ensuite le nombre de pertes effectivement subies par chaque côté (<i>voir plus bas les modificateurs de taille d'armée à utiliser, section VIII.11.3.4 (Variation des pertes)</i>). Le perdant peut subir des pertes supplémentaires en faisant un test sur la table de retraite. La totalité des pertes sont alors appliquées aux armées.</p> </div> <div data-bbox="1122 438 2123 467"> <p><b>VIII.11.3.1 Description des armées, moral, technologie</b></p> </div> <div data-bbox="1122 475 2123 885"> <p>– NE PAS PRENDRE EN COMPTE –</p> <p>Toute force militaire est maintenant ramenée à son contenu en détachement selon l'équivalence : 1 A- = 2D ; 1 A+ = 4D. Les pachas turcs valent de 0 à 3 détachements selon ce qui est indiqué. Les pions armées ont quand même une particularité importante : ils sont les seuls à contenir de l'artillerie.</p> <p>Le <b>moral</b> d'une pile est celui de la majorité des forces, comptée en équivalent détachement. En cas d'égalité on prend d'abord le moral de la majorité des pions armées. Une égalité à nouveau donne un moral conscrit. Cette procédure est aussi utilisée pour connaître la technologie militaire d'une pile. La moins bonne est utilisée en cas d'égalité.</p> <p>Chaque pion appartient à une certaine <b>classe</b> militaire qui décrit en quelque sorte l'évolution des diverses doctrines et tailles des armées de l'époque et décide de sa taille (de 0 à 7) en fonction de la période en cours.</p> <p>La <b>taille</b> d'une pile militaire est donnée par la moyenne, arrondie à l'inférieure, des tailles de chaque unité. Cette moyenne est comptabilisée en équivalents détachements (donc une A+ compte pour 4 fois plus qu'un DT) et arrondie strictement à l'inférieur.</p> <p><b>Exception:</b> Si des pachas accompagnent l'armée, le moral est forcément conscrit. Le restant (taille et technologie) est déterminé selon la règle normale.</p> </div> <div data-bbox="1122 893 2123 922"> <p><b>VIII.11.3.2 Séquence de la bataille</b></p> </div> <div data-bbox="1122 930 2123 1511"> <p>– NE PAS PRENDRE EN COMPTE –</p> <p>La bataille commence après les tentatives éventuelles d'interception, de retraite avant combat, et les jets d'attrition des forces qui ont bougé.</p> <p><b>A.</b> Les rounds de combat, simultanés. Si à la fin d'un des 4 rounds, une armée a craqué au moral (aussi appelé déroute, c'est-à-dire est arrivé à 0 ou moins au moral), <i>passer directement en C.1</i></p> <p>1. Premier round de feu : chaque camp lance un dé modifié sous la colonne de feu. On retient les pertes faites par les deux camps.</p> <p>2. Premier round de choc : chaque camp lance un dé modifié sous la colonne de choc. On ajoute les résultat aux pertes faites par chaque camp.</p> <p><b>B.</b> Possibilité de rompre le combat, défenseur puis attaquant. Si les pertes sont à ce moment suffisantes pour que, une fois modifiées par les pertes variables, un camp soit éliminé, le combat cesse et on passe au C.</p> <p>3. Second round de feu : chaque camp lance un dé modifié sous la colonne de feu, avec -1 au dé. On ajoute le résultat aux pertes faites par chaque camp.</p> <p>4. Second round de choc : chaque camp lance un dé modifié sous la colonne de choc, avec -1 au dé. On ajoute le résultat aux pertes faites par chaque camp.</p> <p><b>C.1</b> Si une armée a craqué au moral et pas l'autre, effectuer un jet de poursuite (colonne E).</p> <p><b>C.2</b> Si une armée a moins de moral restant que l'autre mais n'est pas en déroute, elle perd le combat. <i>Le vainqueur fait une poursuite qui peut causer une déroute.</i></p> <p><b>C.3</b> Si les deux armées ont le même moral final ou que les deux ont craqué au moral, chaque camp retourne d'où il vient, on ne fait pas de poursuite et personne ne gagne</p> </div>
---	---

<div data-bbox="114 90 1117 127"> <div>[R]180</div> <div>Le combat rapide revisité – Version initiale du PPI – en chantier – BEWARE</div> </div> <div data-bbox="114 172 1117 343"> <p><b>D.</b> On totalise les pertes de chaque camp (des 4 rounds et la poursuite) qui sont modifiées en fonction de la taille de l'armée causant les pertes, <i>ensuite de sa classe comparée à celle de l'armée prenant les pertes</i>.</p> <p><b>E.</b> Le perdant du combat (qui doit retraiter) fait un test d'attrition au cours de la retraite qui peut accroître ses pertes de 1/2 ou 1. La manœuvre du général est utilisée si la force n'est pas en déroute.</p> <p><b>F.</b> Les pertes sont arrondies à l'entier inférieur (sauf 1/2 qui devient 1).</p> <p><b>G.</b> Les tests de perte des généraux sont faits (règle usuelle). On regarde si il y a eu bataille majeure.</p> </div> <div data-bbox="114 379 1117 446"> <div>VIII.11.3.3 Pendant les rounds de combat</div> <div>– NE PAS PRENDRE EN COMPTE –</div> </div> <div data-bbox="114 467 1117 638"> <p><b>A 1. Technologie et feu.</b> - Une armée en Médiéval ne lance pas de jet de feu.</p> <p>- En Renaissance, une force utilise le table de feu si elle contient des pions armées, ou bien si elle n'a que des DT, quand elle combat des indigènes ou pays non européens en Médiéval. Dans les deux cas elle ne fait que les pertes au moral.</p> <p>- En Arquebuse, les pertes obtenues sur la table doivent être divisées par deux (arrondies à l'inférieur).</p> <p>- Pour toutes les technologies après Arquebuse, les pertes sont celles indiquées.</p> </div> <div data-bbox="114 659 1117 686"> <p><b>B 2. Modificateurs.</b> Ils sont indiqués à côté de la table de combat (terrain; -1 au second round; effet des généraux).</p> </div> <div data-bbox="114 707 1117 906"> <p><b>C 3. Avantage de cavalerie.</b> Chaque pile contient un nombre de cavalerie qui dépend de sa taille et de la quantité de cavalerie par équivalent détachement. Une valeur <i>qui dépend de la nationalité de l'armée en question (voir ci-dessous)</i> est multipliée par le nombre d'équivalent de détachement et donne ainsi la quantité de cavalerie dans la force. Les DT contiennent autant de cavalerie par détachement que les A.</p> <p>Si un camp a au moins deux fois plus de cavalerie que son adversaire, il a +1 au dé pour le choc et la poursuite si la bataille est en plaine (qu'il soit défenseur ou attaquant), désert, ou dans les forêts orientales (voir section VIII.11.4.5 (La cavalerie et les forêts orientales), pour certaines technologies seulement).</p> </div> <div data-bbox="114 927 1117 1037"> <p><b>D 4. Poursuite.</b> Les jets de poursuite sont affectés par le différentiel de choc, le terrain, l'avantage de cavalerie et la condition à la fin du combat :</p> <p>+1 si l'adversaire a craqué au feu,</p> <p>+2 si l'adversaire a craqué à un des 2 premiers rounds (cumulable avec le précédent).</p> </div> <div data-bbox="114 1058 1117 1228"> <p><b>E 5. Rompre le combat.</b> Lors du segment B. de la bataille, entre les 2 premiers rounds de feu puis choc et les deux derniers, une armée peut décider de rompre le combat. Le défenseur a la possibilité de le faire et, si il décline ou échoue, l'attaquant peut le tenter.</p> <p>Un jet de dé inférieur à la manœuvre du général plus le moral restant à l'armée permet de finir la bataille tout de suite ; celui qui rompt le combat est le perdant. On finit le combat par le segment C.2 et les suivants. Si le test est échoué, le combat continuera et l'adversaire a un bonus de +2 à son jet de feu subséquent.</p> </div> <div data-bbox="114 1249 1117 1511"> <div>VIII.11.3.4 Variation des pertes</div> <div>– NE PAS PRENDRE EN COMPTE –</div> <p>Le résultat des pertes est le total de ce qui est fait aux différents tests de feu, choc et éventuellement poursuite (mais sans la retraite) donnant un nombre d'équivalent détachement encaissé par l'armée adverse. Cependant la table est prévue pour donner le nombre de pertes faites par une pile de 2 A+ à une armée de même taille. Notez qu'avoir plus de 8 DT dans une pile (pour la Turquie avec les pachas) ne donne aucun avantage : pas de pertes supplémentaires (à la différence du traitement des indigènes, voir <i>infra</i>).</p> <p><b>1.</b> Pour tenir compte de la taille réelle de l'armée, on consulte la table des pertes variables (voir tables de combat) qui indique combien de perte enlever pour obtenir le nombre de pertes final. <b>On applique une limitation importante</b></p> </div>	<div data-bbox="1122 90 2121 127"> <div>Military— master – 2016-04-14</div> <div>[R]181</div> </div> <div data-bbox="1122 172 2121 223"> <p><b>à ce stade : le total des perte ne peut être supérieur à la taille de l'armée causant les pertes, comptée en équivalent détachement.</b></p> </div> <div data-bbox="1122 231 2121 646"> <p><b>2.</b> <i>On compare ensuite le type de chaque armée.</i> Il y a 5 groupe d'armée qui sont les suivants, leur taille étant indiquée pour les sept périodes (la répartition précise est indiquée dans les annexes pour les mineurs et sur les tableaux des majeurs) :</p> <p>Le tableau suivant (à droite) permet alors de déterminer le différentiel selon la taille de chaque armée. On a mis en caractère gras les lignes et colonnes qui servent usuellement, en caractères normaux celles où des armées de tailles différentes sont mélangées (colonne 1, 5 et 6). L'armée qui subit les dommages est prise en ordonnée sur une colonne, celle qui les inflige sur une ligne ; le tableau est symétrique avec un changement de signe par rapport à la diagonale.</p> <p><i>Algorithme : diviser la différence de taille entre l'armée la plus grande et la plus petite par 3 et arrondir au modificateur le plus proche pour obtenir le +? accordé à l'armée de taille plus grande.</i></p> <p><b>3.</b> Les pertes véritablement infligées sont alors celles données par le tableau ci-dessus, la ligne 0 correspondant au nombre de perte calculé à l'étape A, avant le modificateur dû à la comparaison des classes d'armée.</p> <p><b>4.</b> On ajoute à la valeur obtenue le nombre de pertes données par la table de retraite (qui n'est pas modifié donc par le point 3). Les pertes obtenue sont arrondies à l'unité inférieure (sauf ½ qui donne 1) et donnent la valeur en équivalent détachement du nombre de pertes effectuées.</p> </div> <div data-bbox="1122 659 2121 726"> <div>VIII.11.3.5 Qui gagne le combat</div> <div>– NE PAS PRENDRE EN COMPTE –</div> </div> <div data-bbox="1122 734 2121 1114"> <p>Les différentes issues du combat sont données dans la séquence des batailles et détaillées ici.</p> <p><b>Le vainqueur de la bataille.</b></p> <p><b>C.1</b> Si une armée seule armée craque au moral (arrive à 0 ou moins) et pas l'autre à la fin d'un round, l'adversaire gagne le combat. Il effectue une poursuite, on ajuste les pertes. Le perdant recule dans une zone amie adjacente et fait un test d'attrition sans soustraire la manœuvre du général. Les PVs normaux sont accordés.</p> <p><b>C.2</b> Si aucune armée n'a craqué au moral après les 4 rounds, l'armée qui a le moins de moral restant perd le combat. <i>Le vainqueur fait une poursuite.</i> Les pertes dues à la poursuite peuvent entraîner une déroute du perdant, en quel cas la fin de la procédure est la même que C.1. Autrement, le perdant recule dans une zone amie adjacente et fait un test d'attrition modifié par la manœuvre du général. Des PVs réduits de moitié sont accordés.</p> <p><b>C.3</b> Si les deux armées ont le même moral final, ou si les deux ont dérouté, chaque camp retourne d'où il vient. C'est-à-dire qu'un siège continue à être maintenu, qu'une armée qui vient de se déplacer ou d'intercepter retourne dans la zone où elle était juste avant le combat. Il n'y a pas de poursuite; IL Y A ATTRITION de retraite et personne ne gagne ni ne marque de PV.</p> </div> <div data-bbox="1122 1150 2121 1321"> <p>Une <b>victoire majeure</b> est accordée si le perdant a effectivement perdu 3 détachements de plus que le vainqueur (après modifications de la classe, retraite et arrondis), ou 4 DT si le perdant avait un modificateur de comparaison de taille égal à -2.</p> <p>Les pertes sont réparties par celui qui les subit comme il le veut parmi ses forces. Il peut détruire des pions armées (une A+ = 4D) par exemple ou faire tout son possible pour en garder (par exemple 2 A+ subissant 4 pertes peuvent rester sous forme de 1 A+ ou 2 A- ou encore 4D – ce qui poserait des problèmes d'empilement...)</p> </div> <div data-bbox="1122 1342 2121 1380"> <div>VIII.11.4 Les sièges</div> </div> <div data-bbox="1122 1401 2121 1511"> <div>– NE PAS PRENDRE EN COMPTE –</div> <div>VIII.11.4.1 L'assaut</div> <div>– NE PAS PRENDRE EN COMPTE –</div> </div>

Les tables de combat montrent une colonne spécifique à l'assiégé et une pour l'assiégeant. Noter que l'assiégé fait une perte en moins au feu et au choc si le combat est suite à une <b>brèche</b>.</p> </div> <div data-bbox="114 279 1115 399"> <p><b>B Modificateurs.</b> L'assiégeant ajoute 1 si le défenseur est médiéval, soustrait 1 si le défenseur est en arquebuse ou mieux, à son feu et son choc. L'assiégeant soustrait aussi le niveau de la forteresse aux deux si il n'y a pas eu de brèche. Enfin, l'artillerie ajoute +1 en assaut si l'assiégeant a au moins 4 fois le niveau de la forteresse en artillerie (sauf contre un fort).</p> </div> <div data-bbox="114 414 1115 622"> <p><b>C Les ajustements aux pertes.</b></p> <ul style="list-style-type: none"> <li>• 1- si l'assiégeant n'a pas 2 A+, le tableau des pertes variables réduit ce qu'il inflige ;</li> <li>• 2- la Turquie et la Russie jusqu'en 1614, et la Pologne jusqu'en 1559 augmentent les pertes faites en assaut de 1/2 par A+ présente ;</li> <li>• 3- l'assiégeant prend une demie-perte en plus si il a craqué au moral.</li> <li>• 4- les pertes de l'assiégeant sont limitées au nombre de DT dans la fortification plus 2 fois la résistance de la forteresse (ajustée par la brèche).</li> </ul> </div> <div data-bbox="114 638 1115 726"> <p><b>D Résistance de la forteresse.</b> Les pertes faites à l'assiégé sont d'abord prises sur les unités enfermées dans la forteresse, puis sur la résistance de celle-ci. Cette résistance est égale à son niveau, mais est réduite en cas de brèche. Elle revient à son niveau maximum après chaque assaut.</p> </div> <div data-bbox="114 742 1115 893"> <p><b>E La victoire.</b> Elle revient au camp selon l'ordre de priorité suivant :</p> <ol style="list-style-type: none"> <li>1. Assiégé, si l'assiégeant est éliminé ;</li> <li>2. Assiégeant, si les troupes à l'intérieur sont éliminées et la résistance atteint 0, ou si l'assiégé craque au moral (même si l'assiégeant déroute) ;</li> <li>3. Assiégé, si l'assiégeant seul ou si personne ne craque au moral.</li> </ol> </div> <div data-bbox="114 901 1115 989"> <div>VIII.11.4.2 La sape</div> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="114 997 1115 1348"> <p><b>A Mettre le siège.</b> Le siège par usure n'est presque pas modifié. Un pion armée contient toujours un nombre d'artillerie égal à celui de la contenance maximum de sa nation à la période en cours. Une armée sur la face - contient l'artillerie de l'armée + divisée par 2 et arrondie à l'inférieur.</p> <p>Il faut pour maintenir le siège devant une forteresse disposer d'au moins autant d'équivalent détachement que le niveau de la forteresse. Si l'assiégeant ne peut maintenir le siège en fin de round (après un assaut ou une bataille), il doit immédiatement retraiter dans une province amie (avant de pouvoir piller) et jouer l'attrition. Si il choisit de maintenir le siège, il doit soit lancer un assaut, soit faire un test dur la table de sape (qui peut être suivi d'un assaut en cas de brèche).</p> <p>Le propriétaire de la forteresse peut laisser des troupes dans celle-ci. L'empilement dans une forteresse est d'au plus 2DT par niveau de la forteresse, ou d'un DT dans les forts. Ces forces subissent une attrition à chaque fin de phase de mouvement si le siège est déjà établi. Une fois enfermés dans une forteresse, une force ne peut en sortir qu'en fin de siège (victorieux ou non) et n'a pas le droit s'attaquer les assiégeants.</p> </div> <div data-bbox="114 1364 1115 1511"> <p><b>B Résolution de la sape.</b> On utilise la table des annexes, avec les modificateurs indiqués.</p> <p>Les pertes assiégeantes obtenues sur la table des sièges se résolvent en lançant 1d10, diminué des valeurs en siège des généraux et augmenté de 1 par DT (ou équivalent) en défense dans la forteresse. Si le résultat est inférieur (strictement) au nombre de round de siège écoulé, l'assiégeant doit faire un test d'attrition sur la table adéquate (Europe ou non) avec les modificateurs indiqués.</p> </div>	<div data-bbox="1124 90 2121 127"> <div>Military— master – 2016-04-14</div> <div>[R]183</div> </div> <div data-bbox="1124 167 2121 295"> <div>VIII.11.4.3 Prise des forteresse</div> <p>Une forteresse qui tombe par assaut ou sape perd 2 niveaux de fortification (avec la valeur mise sur la carte en tant que minimum), sauf si le nouvel occupant décide immédiatement de mettre un garnison. Il doit pour cela utiliser un DT qui est perdu (le DT peut provenir de la séparation d'un pion armée).</p> </div> <div data-bbox="1124 303 2121 486"> <div>VIII.11.4.4 Généraux ingénieurs</div> <p>– NE PAS PRENDRE EN COMPTE –</p> <p>Un petit nombre de généraux sont en fait des ingénieurs militaires : Vauban, Coehorn et Dahlberg. Ils n'ont pas à respecter la hiérarchie militaire si le joueur le souhaite (et peuvent ainsi autant aider à un siège que rester seuls dans une forteresse pour la défendre) mais sont alors restreints aux actions de siège. Il peuvent être utilisés comme des généraux mais entrent alors dans la hiérarchie.</p> </div> <div data-bbox="1124 494 2121 678"> <div>VIII.11.4.5 La cavalerie et les forêts orientales</div> <p>– NE PAS PRENDRE EN COMPTE –</p> <p><i>L'usage de la cavalerie en Europe orientale n'est pas entièrement simulée dans le jeu. En effet celle-ci domina pendant la période 1500-1600, en particulier la cavalerie polonaise (hussards), grâce à ses capacités de choc, sa mobilité et surtout la possibilité de contrôler les larges espaces de la région et de s'y ravitailler alors que le peuplement n'était qu'éparse. Les changements suivants sont proposés.</i></p> </div> <div data-bbox="1124 686 2121 774"> <p><b>A a. Étendue des forêts orientales.</b> Ce sont toutes les forêts à l'est de la ligne Neumark, Lausitz, Österreich, Steienmark (provinces comprises), au nord de Transylvania, Marosz, Moldavia (provinces comprises aussi) puis ligne plein est jusqu'à la carte. Les provinces de la Finlande ne sont pas dans la zone, ni celles de la Scandinavie.</p> </div> <div data-bbox="1124 790 2121 997"> <p><b>B b. Supériorité de cavalerie.</b> Le bonus de supériorité de cavalerie en combat est rétabli dans les zones de forêt d'europe orientale pour certaines technologies.</p> <p>Les pays de technologie latine ou orthodoxe peuvent en bénéficier dans ces forêts si leur technologie est Arquebuse, Mousquet ou Baroque. Si l'adversaire est de technologie Manœuvre ou Dentelles, tout avantage de cavalerie est annulé.</p> <p>Les pays musulmans n'ont jamais cet avantage du fait de leur cavalerie plus légère. Leur propre avantage réside dans le nombre de cavalerie présent dans leur armée.</p> </div> <div data-bbox="1124 1005 2121 1093"> <p><b>C c. Siège.</b> Une force pouvant bénéficier du bonus précédent et qui assiège en forêt orientale avec un nombre de cavalerie supérieur ou égal à 8, réduit le modificateur de mauvais terrain à -1 au lieu de -2. De plus elle n'a pas le malus de terrain non clair pour tester le résultat "pertes assiégeantes".</p> </div> <div data-bbox="1124 1101 2121 1189"> <div>VIII.11.4.6 Le militaire et la mer Baltique</div> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="1124 1197 2121 1364"> <p><b>A a. Les galères.</b> <i>Les galères qui agissent en mer Baltique n'eurent jamais une domination nette face aux navires de ligne comme cela put être en méditerranée. En fait les galères sont plus souvent des navires légers ne pouvant pas tenir des sorties océaniques longues, sans être techniquement des galères. Cela a permis la constitution de flottes pas trop chères et d'efficacité convenable à certains pays mais pas plus.</i></p> <p>Avant 1615, les galères en mer Baltique ne bénéficient pas du bonus en combat contre les vaisseaux de ligne de la règle 53.7.</p> </div> <div data-bbox="1124 1372 2121 1511"> <p><b>B b. Gel de la mer Baltique.</b> En cas d'événement de mauvais temps, si le jet de dé est 1 le détroit du Sund est gelé pour le round et autorise le passage d'armées entre la province Danmark et les provinces de Skåne, Schleswig, Lübeck et Jutland. Le passage est considéré un mouvement en terrain difficile mais sans détroit (y compris pour l'effet sur le combat). La province maritime "Sund" est impassable en cas de gel (et les flottes qui y sont présentes restent bloquées) ; une flotte à Copenhague ne peut sortir que en mer Baltique.</p> </div>
---	--

<div data-bbox="114 90 1117 124"> <div>[R]184</div> <div>Le combat rapide revisité – Version initiale du PPI – en chantier – BEWARE</div> </div> <div data-bbox="114 167 1117 207"> <div>VIII.11.5</div> <div>Diverses règles militaires</div> </div> <div data-bbox="114 215 1117 247"> <div>– NE PAS PRENDRE EN COMPTE –</div> </div> <div data-bbox="114 255 1117 438"> <p><b>A a. 53.22 Les monarques au combat.</b> Le tableau de la règle 53.22 est remplacé la procédure qui suit. On tire d'abord la valeur moyenne comme général du souverain sur la 1<sup>ère</sup> partie de la table. Seule cette valeur moyenne est initialement connue. À la première bataille que commande le souverain, on modifie séparément chaque valeur par le jet de 1d10 sur la table en-dessous ; avant cela on utilise la valeur moyenne comme manœuvre. La compétence en siège est de 0, ou 1 si la valeur moyenne est de 4 ou 5, modifiée par la seconde étape qui est tirée lors de sa première action de sape. Le modificateur pour un roi adolescent s'ajoute après la détermination des valeurs.</p> </div> <div data-bbox="114 446 1117 534"> <p><b>B b. 53.21 Inondation des provinces hollandaises.</b> L'inondation touche les provinces de Friesland, Utrecht, Holland, Overijssel, Gelderland. Elle est annoncée à la phase de mouvement de l'ennemi et toute armée hostile dans la zone doit retraiter (qu'elle vienne d'entrer ou non).</p> </div> <div data-bbox="114 542 1117 694"> <p><b>C c. Les Croisades.</b> Lors d'une croisade (guerre à l'appel du pape), deux pions armées Croisés sont disponibles qui peuvent être constitués de détachement de n'importe quels pays en guerre. Ils ont la contenance générique des pays d'occident (la même que ceux d'Italie et du Saint-Empire, classe III) et de technologie des latins. La composition exacte de ces armées doit être notée. Leur utilisation est entièrement confiée au chef de la croisade (y compris pour la répartition des pertes au combat).</p> </div> <div data-bbox="114 702 1117 821"> <p><b>D d. Les amiraux corsaires.</b> Les corsaires (dont le symbole est en blanc) de rang A, B ou C sont en fait aussi des amiraux et peuvent commander de flottes. Si ils ne sont pas mis avec des pions corsaires, ils font partie de la hiérarchie des amiraux. Les corsaires de rang inférieurs ne peuvent commander que des pions corsaires et des DN. <i>Les nouveaux pions remplacent tous les corsaires affectés par des amiraux corsaires et permettent de se passer de cette règle.</i></p> </div> <div data-bbox="114 829 1117 981"> <p><b>E e. Les alliés indigènes.</b> Les alliés indigènes et les troupes du mineur Iroquois ont les capacités particulières suivantes :</p> <ul style="list-style-type: none"> <li>• ils sont toujours ravitaillés dans leur province d'origine et jusqu'à 12 PM de celle-ci;</li> <li>• on considère qu'ils donnent une manœuvre de 5 pour le mouvement à la pile qu'ils accompagnent ;</li> <li>• si ils sont seuls en attaque, ils ne tiennent pas compte du terrain.</li> </ul> </div> <div data-bbox="114 989 1117 1077"> <p><b>F f. 53.14 Les Cosaques.</b> Quand la Russie bénéficie de l'aide des Cosaques, elle applique les deux effets suivants :</p> <ul style="list-style-type: none"> <li>• entretien gratuit de 2DT conscrits en Sibérie ;</li> <li>• achat gratuit à chaque tour d'un DT en Sibérie ou dans une province des Cosaques.</li> </ul> </div> <div data-bbox="114 1085 1117 1125"> <div>VIII.11.6</div> <div>Partie navale</div> </div> <div data-bbox="114 1133 1117 1165"> <div>– NE PAS PRENDRE EN COMPTE –</div> </div> <div data-bbox="114 1173 1117 1220"> <p><i>La gestion des forces navales est maintenant dans ces règles simplifiée de façon à ne comptabiliser que des détachements navals et des flottes (et non des navires individuels) et à utiliser le système de combat accéléré.</i></p> </div> <div data-bbox="114 1228 1117 1268"> <div>VIII.11.6.1</div> <div>Description des unités navales</div> </div> <div data-bbox="114 1276 1117 1308"> <div>– NE PAS PRENDRE EN COMPTE –</div> </div> <div data-bbox="114 1316 1117 1444"> <p>Les forces maritimes sont représentées par des <b>détachements navals</b>, notés <b>pions DN</b>, et appelés dans les règles <b>DNav</b> si ils contiennent des navires de guerre à voile, <b>DGa</b> si ils contiennent des galères. Pour Venise, <b>DGal</b> indiquent spécifiquement des galéasses. Elle dispose en effet à partir de 1550 d'au plus 2 DGal (soit dans des flottes, soit représentées par un pion DN) qui se comportent comme des galères, sauf en combat. Les pions détachements navals peuvent ainsi représenter des navires à voile ou des galères et ceci est à noter sur la feuille de marque.</p> </div> <div data-bbox="114 1452 1117 1508"> <p>Un nouveau type de pions, notés <b>DTr</b>, représentent des <b>vaisseaux de transport</b>. Les pays mineurs (autres que ceux qui peuvent devenir ou ont été majeur) disposent tous d'un pion DTr qui peut leur servir à représenter un détachement</p> </div>	<div data-bbox="1122 90 2121 124"> <div>Military— master – 2016-04-14</div> <div>[R]185</div> </div> <div data-bbox="1122 167 2121 231"> <p>de transports seulement en plus de ceux dans les flottes. Les pays majeurs en ont 4 (ESP, POR, FRA, ANG, HOL, TUR) ou 2 (les autres).</p> </div> <div data-bbox="1122 239 2121 319"> <p>La flottes de l'Or, le convoi de Smyrne et le convoi des Indes Orientales sont tous des flottes de transport : ils contiennent chacun 5 DTr. Les convois de Smyrne et des Indes portent 10d par DTr, et la Flota de Oro voie l'Or transportée dans sa capacité de transport d'Or illimitée répartie également entre les 5 DTr.</p> </div> <div data-bbox="1122 327 2121 622"> <p>Les explorations maritimes hors de l'Europe peut se faire avec des escadres réduites qui sont appelées de <b>détachements d'exploration</b>, ou <b>DE</b>, qui sont en gros un tiers ou un demi DN (selon le cas)<sup>1</sup>. Ils servent aussi pour fractionner l'attrition et les pertes en combat des navires de guerre et galères. Il est ainsi rajouté des pions DE dont le nombre maximal dépend du pays (les mineurs ont 2 DE au plus sauf Oman et Aden qui en ont 4 ; pour les pays majeurs voir la table des limites navales). Les pions DE contiennent en général des navires à voile (pour les explorations maritimes), sauf mention explicite sur la feuille de marque quand il s'agit de galères (après attrition ou combat)<sup>2</sup>.</p> <p><b>Consolidation</b> - Si 3 DE d'un même pays sont dans la même pile navale (après un combat ou des pertes par attrition, même si ils sont dans des pions F différents), ils sont immédiatement fondus en un DN si un pion est disponible. Il n'est pas possible de volontairement couper un DN en détachements d'exploration (mais on pourra acheter des DE séparément).</p> </div> <div data-bbox="1122 630 2121 821"> <p>Tous ces détachements peuvent être réunis dans des <b>flottes</b>, pions notés F, dont la contenance (face - ou +) varie selon le pays et la période (de 2DN/1DTr à 7DN/2DTr). Un DGa (ou DGal) ou un DE n'occupe dans une flotte la place que d'un demi-DN dans les pions de flotte F. Les détachements qui sont dans des pions de flottes n'utilisent pas de pions. Il faut noter sur la feuille militaire ce que contient exactement la flotte comme on note la nature des pions DN (vaisseaux, galères, transports, galéasses ou détachements d'exploration). Voir la <b>table de contenance des pions flottes</b> selon le pays.</p> </div> <div data-bbox="1122 829 2121 917"> <p>La <b>limite d'empilement</b> dans chaque pile navale est de deux pions plus un DE à tout moment la phase de mouvement (avant les combats). Des piles navales séparées d'un même camp peuvent être dans la même mer (pour ainsi faire des actions séparées). Un port ne peut contenir qu'un seule pile.</p> </div> <div data-bbox="1122 925 2121 965"> <div>VIII.11.6.2</div> <div>Logistique des forces navales</div> </div> <div data-bbox="1122 973 2121 1005"> <div>– NE PAS PRENDRE EN COMPTE –</div> </div> <div data-bbox="1122 1013 2121 1141"> <p>Les forces navales sont entretenues par pion DN, F- ou F+. L'entretien a un coût indiqué dans les tableaux de chaque pays. On peut utiliser l'équivalence suivante pour la force gratuite de base : D entretien 2 DE et 2D permettent l'entretien de F-, 4D de F+ (l'équivalence inverse n'est pas possible). En revanche un pion posé doit être entretenu sans lui appliquer cette équivalence (F+ ne peut être compté comme 2 F-). Les DTr s'entretiennent comme des DN (de même que DNav, DGa ou DGal s'entretiennent de la même façon).</p> </div> <div data-bbox="1122 1149 2121 1228"> <p>L'achat se fait par DN, les coûts étant différents entre les DNav, les DGa et les DTr. Il est aussi possible d'acheter des flottes entières F+ ou remplies à moitié F-, au coût indiqué (en général réduit). Enfin des DE peuvent être achetées au prix de la moitié d'un DN du type de navire choisi.</p> </div> <div data-bbox="1122 1236 2121 1348"> <p>On verra ci-dessous la <b>table des limites d'achat par tour et du maximum de DN par période</b>. Les DTr ne comptent pas dans ces deux limites ; les DGa si mais comme 1/2 DN seulement. Pour le nombre de navires, les DE dans les flottes sont arrondis au DN (ou DGa) supérieur, tandis que les DE qui ne sont pas dans les flottes sont limités par le nombre de pions disponibles. À l'achat, un DE compte pour 1/2 DN (pour le coût et la limite d'achat par tour).</p> </div> <div data-bbox="1122 1356 2121 1420"> <p><b>A Renforts des pays mineurs.</b> La table des renforts navals est modifiée de manière à convertir les navires reçus en DN ou DE. 2 ou 3N correspondent à DE ; 5 ou 10N à DN ; 15N à F- ; 20N à 3DN et DTr ; 30N à 4DN et DTr.</p> </div> <div data-bbox="1122 1436 2121 1508"> <p><sup>1</sup> Les DE sont comptés comme un demi en général, sauf dans les tables d'attrition et de pertes en combat où il sont un tiers des DN, et pour reformer un DN à partir de DE sur la carte où l'équivalence est de 3 DE pour un DN</p> <p><sup>2</sup> Les pions DE seront faits avec deux faces : l'une représentent les DE, l'autre sert aux DC, voir plus bas le paragraphe sur les explorations.</p> </div>
---	--

<div data-bbox="114 90 1117 127"> <div>[R]186</div> <div>Le combat rapide revisité – Version initiale du PPI – en chantier – BEWARE</div> </div> <div data-bbox="114 167 1117 199"> <div>VIII.11.6.3</div> <div>Clarification sur les mouvements</div> </div> <div data-bbox="114 207 1117 462"> <p>Une pile navale dispose d'un potentiel de mouvement illimité pendant un round et peut ramasser ou laisser des détachements en route librement. Des forces laissées ou ramassées ne peuvent faire ou avoir fait d'autres mouvements du round. Une pile est restreinte de deux manières durant la phase militaire. Premièrement elle ne peut faire que l'une des activités suivantes par round : transport naval (c'est-à-dire débarquement de troupes, accompagné d'un blocus de la province de débarquement et du soutien de ravitaillement des forces débarquées – on peut embarquer librement des troupes pour les transporter et faire une des actions décrites ici librement si on ne les décharge pas ; voir plus bas l'exception des conquistadors), mise en blocus d'un port (qui peut ne s'annoncer qu'à la phase des sièges, avant tout test de siège), lutte contre les pirates d'une zone commerciale, exploration d'une nouvelle mer, attaque d'une pile navale ennemie en mer.</p> <p>Deuxièmement elle doit faire un test d'attrition à la fin de son mouvement ainsi qu'à chaque combat ou au moment de débarquer des troupes, ce qui cesse même temporairement son mouvement. La flotte peut donc être conduite à faire plusieurs attritions dans un même tour et le nombre de provinces traversées est celui entre deux de ces tests d'attrition. L'empilement est limitée dans chaque pile navale à deux pions plus un DE, et non dans chaque mer. Cependant seule une pile navale d'un camp est autorisée à faire une action donnée dans une mer (c'est-à-dire lutter contre pirates et corsaires, ou attaquer une pile ennemie spécifique, ou encore mettre le blocus à un port précisé). Deux piles maritimes peuvent tout de même mettre un blocus de manière indépendante à deux ports sur la même zone.</p> <p><b>A Interception.</b> Durant les mouvements, les flottes ennemies peuvent tenter d'intercepter dans leur mer ou la mer adjacente la pile maritime qui bouge, sans limite du nombre de tentative. La force en mouvement peut tenter d'intercepter une fois (et une seule) toute pile maritime en mer en étant dans sa zone, afin de forcer le combat tout de suite. On résout d'abord les interceptions de forces inactives avant de tenter celles de la pile active. En cas de réussite, on fait immédiatement les tests d'attrition des flottes (celle active, et celle inactive si c'est elle qui intercepte). La flotte active pourra continuer son mouvement après interception si elle gagne la bataille. Une flotte défaite ne peut plus intercepter pendant jusqu'à début de sa prochaine phase de mouvement.</p> <p>De toute façon, et sans test d'interception, le combat devient possible et automatique contre une force maritime dans la même mer après les déplacements (mais ceci compte alors comme l'action de la force navale pour le round).</p> </div> <div data-bbox="114 957 1117 989"> <div>VIII.11.6.4</div> <div>Transport maritime</div> </div> <div data-bbox="114 997 1117 1372"> <p>– NE PAS PRENDRE EN COMPTE –</p> <p>La <b>table de transport maritime</b> indique le nombre de points de transport nécessaires pour embarquer un DT (il en faut 2) ou une A- (de 3 à 6 selon la classe d'armée). Une A+ compte comme deux A-. Les DN (DNav, DGa ou DGal) transportent 1 point chacun et les DTr transportent 3 points (c'est même leur unique fonction !). Les DE transportent seulement 1/2 points. Les DC (conquistadors) ne demandent eux que 1/2 point de transport.</p> <p>Autre limite, un pion naval ne peut en général transporter qu'un seul pion terrestre. Pour être plus précis, un pion F de navires peut transporter jusqu'à une A+ (soit l'équivalent de 4 DT, éventuellement en 2 pions, mais pas 3) ; si le transport est assuré par des DGa et des DTr dans F, la limite passe à 2A+ en 3 pions. Un détachement naval (de toute nature : DTr, DN, DE) ne peut contenir plus d'un pion (donc DC, DT ou A- pour les armées les plus petites).</p> <p>Une force navale doit faire un test d'attrition au moment où elle débarque des forces. Si elle obtient des pertes par attrition, le même pourcentage de perte est appliqué aux DT ou armées transportées en consultant la table des forces restantes après attrition. En combat maritime, les pertes n'affectent les armées que quand il n'y a plus assez de navires intacts pour transporter les troupes (les forces terrestres en trop sont détruites tout de suite).</p> </div> <div data-bbox="114 1380 1117 1412"> <div>VIII.11.6.5</div> <div>s</div> </div> <div data-bbox="114 1420 1117 1513"> <p>ectionAttrition en mer – NE PAS PRENDRE EN COMPTE –</p> <p>Les flottes qui se déplacent ou restent en mer encourent un risque d'attrition. La procédure est peu changée par rapport à la règle normale.</p> </div>	<div data-bbox="1122 90 2121 127"> <div>Military— master – 2016-04-14</div> <div>[R]187</div> </div> <div data-bbox="1122 167 2121 367"> <p>Le test d'attrition consiste à lancer 1d10 auquel on ajoute la valeur de risque la plus haute des mers pénétrées par la force navale. Les valeurs de risque sont diminuées de 2 si un port ami est sur la zone. On ajoute de plus la valeur des modificateurs de toutes les mers difficiles traversées (valeur en bleu), un malus de +1 par groupe (plein) de 4 zones de mouvement (on ignore les fractions), et un malus éventuel d'un événement (+2 si mauvais temps). On soustrait d'un autre côté la manœuvre d'un amiral (ou un explorateur si le mouvement commence ou se termine hors Europe). Le résultat est comparé à 11 : chaque point du résultat au-delà de 11 induit 10% d'attrition. Ce résultat peut être lu sur la table d'exploration et attrition hors-Europe.</p> </div> <div data-bbox="1122 375 2121 486"> <p>Ensuite, le pourcentage obtenu est converti en pertes à l'aide de la <b>table des attritions pour l'exploration et le mouvement maritime</b>. Ce tableau indique, selon la perte et le nombre de détachements présents, ce qu'il reste dans la pile après les pertes d'attrition. Un résultat * (dans la table d'attrition ou le tableau de ce qui reste) indique une chance sur deux de perdre un DE (sur mer) ou DC (sur terre).</p> </div> <div data-bbox="1122 494 2121 542"> <p>Les transports ne disposent pas de pions fractionnaires DE comme les DN. Si un détachement de transports doit prendre au moins DE de perte, il est détruit en entier.</p> </div> <div data-bbox="1122 550 2121 582"> <div>VIII.11.6.6</div> <div>Bataille navales rapides</div> </div> <div data-bbox="1122 590 2121 622"> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="1122 630 2121 694"> <p><b>A a. Séquence de bataille.</b> Les batailles navales sont résolues sur un système de combat accéléré qui utilise la table des résultats des batailles rapides. Le combat peut se poursuivre sur plusieurs jours selon la séquence suivante.</p> </div> <div data-bbox="1122 702 2121 1157"> <ol style="list-style-type: none"> <li>1. Décider du type de navires (Nav, Ga ou Tr) mis en avant (et en déduire le moral, les colonnes utilisées, et les modificateurs pour l'avantage du vent) ; ils doivent constituer au moins 1/4 des détachements de la pile.</li> <li>2. Déterminer l'avantage du vent (sauf dans un combat de galères contre galères).</li> <li>3. Segment de feu ; noter les pertes. Elles sont réduites de moitié si des Ga sont en 1e ligne. Si un camp craque au moral, aller directement en 7.</li> <li>4. Retraite optionnel du camp sous le vent, sans poursuite (mais avec suivi et attrition).</li> <li>5. Segment d'abordage ; noter les pertes.</li> <li>6. Ajouter les pertes de 3 et 5 et les ajuster en fonction du nombre de DN présents. Les retirer des forces navales.</li> <li>7. Si un camp est à 0 en moral, il rompt le combat et se réfugie au port (un des ports amis les plus proches), avec poursuite si l'autre camp n'a pas craqué au moral, et suivi éventuel pour établir un blocus.</li> <li>8. Si personne n'a craqué au moral, les deux joueurs choisissent en secret de rester ou de se replier au port. Si seule une force se replie, l'autre peut suivre au port pour mettre le blocus. Si les deux forces restent, reprendre une journée de combat au segment 2 en utilisant les valeurs de moral restant (contrairement aux batailles terrestres, le combat n'est pas limité à deux journées, le modificateur -1 s'appliquant à partir du 2<sup>e</sup> jour). Si jamais les DN du type de navires mis en avant sont tous détruits, il faut choisir un nouveau type et le moral est le minimum entre celui après la journée de combat et celui du nouveau type de navire en 1e ligne.</li> </ol> </div> <div data-bbox="1122 1165 2121 1284"> <p><b>B b. Effet des pertes.</b> Les pertes obtenues en 3 et 5 sont ajoutées et modifiées alors par un pourcentage dépendant du nombre de DN dans la flotte qui fait les pertes (les DE comptent comme une moitié de DN mais l'arrondi est fait vers le bas). Voir le <b>tableau des modificateurs des taille de flottes</b>. On arrondi les fractions du résultat au demi supérieur, sauf si le résultat est <math>\leq 0</math>, 3 qui est réduit à 0.</p> </div> <div data-bbox="1122 1292 2121 1404"> <p>Ensuite ces pertes sont réparties entre des détachements coulés, immobilisés (reviennent au tour suivant dans un port ami à décider immédiatement) et endommagés (reviennent au round suivant dans cette flotte) en consultant la <b>table de répartition des pertes navales</b>. Si les pertes sont plus que 3 D, utiliser plusieurs fois la table pour chaque tranche de 3 D et le reste. Les DE se combinent ici selon l'équivalence 1DN=3DE.</p> </div> <div data-bbox="1122 1412 2121 1436"> <p>Les pertes affectent d'abord les détachements des navires mis en avant, ensuite sur les autres navires.</p> </div> <div data-bbox="1122 1444 2121 1513"> <p><b>C c. Poursuite ou suivi au port.</b> La poursuite est un jet de perte sur la colonne E. Les pertes sont modifiées par la taille de la force navale qui poursuit (après les pertes du combat) et se répartissent pour moitié (arrondie à l'inférieur)</p> </div>
--	---

<div data-bbox="114 90 1117 124"> <div>[R]188</div> <div>Le combat rapide revisité – Version initiale du PPI – en chantier – BEWARE</div> </div> <div data-bbox="114 172 1117 228"> <p>comme des vaisseaux capturés et endommagés (reviennent rou round suivant dans un port ami au choix), et le restant comme des vaisseaux coulés.</p> </div> <div data-bbox="114 231 1117 344"> <p>Ensuite une force navale est parfois autorisée à suivre son adversaire qui retraite pour mettre le blocus devant le port atteint. Elle peut ne suivre qu'avec une partie de la flotte (qui cesse son mouvement en blocus, après attrition pour le déplacement) tandis que le restant de la flotte continue son mouvement si le combat résultait d'une interception, ou fera une autre action navale dans la mer ensuite (blocus, lutte contre des pirates, etc).</p> </div> <div data-bbox="114 363 1117 448"> <p><b>D d. Galères et galéasses.</b> Les DGa et DGal comptent en empiement dans les pions F comme un demi-DN. Ainsi les flottes de galères sont en général plus importantes. Cependant elle font des pertes réduites de moitié à l'étape 3 de feu (arrondir les fractions 1/4 vers le bas), ceci avant de les modifier par la taille.</p> </div> <div data-bbox="114 451 1117 536"> <p>Venise peut avoir jusqu'à deux détachements de galéasses. La présence d'un détachement de galéasses en combat contre des galères (uniquement) permet d'utiliser les pertes complètes au feu ; la présence de 2 DGal fait que le feu se fait en plus avec +1 au dé de feu. Contre des vaisseaux, les galéasses combattent comme des galères.</p> </div> <div data-bbox="114 555 1117 670"> <p><b>E e. Transports en combat.</b> Les DTr ne comptent pas du tout en combat maritime et prennent des pertes si les navires de guerre qui les accompagnent sont déjà perdus. Des DTr mis en avant au début d'un jour de combat rompent toujours au moral après le feu quel que soit le résultat adverse et ne font pas de pertes (même si des navires de guerre sont en retrait).</p> </div> <div data-bbox="114 689 1117 730"> <div>VIII.11.7 Explorations et découvertes</div> </div> <div data-bbox="114 742 443 770"> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="114 782 1117 813"> <div>VIII.11.7.1 Les détachements de conquistadors</div> </div> <div data-bbox="114 821 1117 935"> <p>Les règles précédentes s'appliquent entièrement aux unités qui sont sur la carte hors europe, sauf quelques ajustements pour les détachements se déplaçant seuls hors-europe et pour les indigènes. L'ajustement principal est qu'il existe des <b>détachements de conquistadors</b>, notés <b>DC</b>, utilisables uniquement hors europe. Les DC sont les versos des pions DE.</p> </div> <div data-bbox="114 938 1117 1080"> <p>Un DC s'entretient au coût de la moitié d'un DT conscrit (arrondi au supérieur) et occupe 1/2 DT en transport maritime. Il compte comme un pion pour l'empilement dans une case. Si 3 DC sont empilés ensemble, ils peuvent être regroupés en un DT (conscrit). Les DC sont toujours comptés comme des troupes conscrites (<i>simule le faible nombre de cavalerie en général</i>). <b>Exceptions</b> : les DC de tercios espagnols et les DC portugais qui sont toujours vétérans et se combinent donc en DT vétérans.</p> </div> <div data-bbox="114 1083 1117 1169"> <p>Si des DC apparaissent dans un transport maritime du fait de l'attrition, on arrondit lors d'un débarquement en Europe 2DC à 1DT et DC à rien immédiatement. Si le débarquement est dans les colonies, il n'y a pas d'arrondi (mais il faut veiller à respecter les limites d'empilement).</p> </div> <div data-bbox="114 1181 1117 1212"> <div>VIII.11.7.2 Mouvement, exploration, attrition hors europe</div> </div> <div data-bbox="114 1220 443 1249"> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="114 1252 1117 1423"> <p>La même table sert à résoudre attritions et explorations et une flotte ne teste pas l'attrition en plus du test d'exploration. Cependant, les explorations ne nécessitent pas de rajouter la difficulté des provinces traversées (on lit sur la première colonne, qui correspond en fait à une difficulté de 10), mais on ajoute tout de même 1 par groupe de 4 mers pénétrées pour l'exploration maritime. Les attritions dues aux explorations sont transcrites en pertes en équivalent détachement à satisfaire. La table est la même que pour l'attrition maritime, voir <b>table des restes après attrition pour exploration</b>. Les "de" indiqués indiquent bien sûr des DC.</p> </div> <div data-bbox="114 1426 1117 1511"> <p>L'attrition hors europe sans faire d'exploration est jouée sur la même table que l'attrition en mer, avec une difficulté des provinces de 8 si la pile ne passe que par des provinces explorées, ou 6 si toutes les provinces (de celle du départ à celle d'arrivée) sont explorées et amies (présence d'un établissement colonial ou un fort dans la province). Comme</p> </div>	<div data-bbox="1122 90 2123 124"> <div>Military— master – 2016-04-14</div> <div>[R]189</div> </div> <div data-bbox="1122 172 2123 228"> <p>pour l'attrition en mer, on ne compte que les résultats d'attrition en pourcentage. Si une exploration est faite en fin du mouvement terrestre, cela remplace le jet d'attrition.</p> </div> <div data-bbox="1122 231 2123 373"> <p>Le débarquement de troupes hors-europe ne compte pas comme une action pour une force navale si ce débarquement est accompagné par un conquistadors (ou un explorateur qui sert de conquistador) et ne contient pas de pion armée. Ainsi une force navale peut explorer une mer et débarquer des conquistadors à la découverte des terres adjacentes dans le même round. Il faut tout de même résoudre l'attrition maritime avant le débarquement si la flotte a bougé avant le débarquement (sans qu'une exploration résolve l'attrition de ce mouvement).</p> </div> <div data-bbox="1122 384 2123 416"> <div>VIII.11.7.3 Les combats hors europe</div> </div> <div data-bbox="1122 427 1449 456"> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="1122 459 2123 574"> <p>Les pertes hors europe ne sont pas arrondies : une demie perte fait perdre deux DC, et donc laisse un DC sur un DT. Les pertes infligées par DC ou 2 DC en combats sont réduites de 2 sur la tables des pertes variables, puis limitées à 1 perte maximum. Des DC en combat avec des DT ou armées comptent pour 1DT si il y en a 2, pour rien si il n'y en a qu'un.</p> </div> <div data-bbox="1122 577 2123 633"> <p>Les DC ne contiennent pas de cavalerie donc il faut au moins un DT pour obtenir un avantage de cavalerie sur des indigènes. Faire attention que les indigènes d'Asie ont 2 ou 3 cavaleries par équivalent DT.</p> </div> <div data-bbox="1122 636 2123 692"> <p>Les pertes causées aux indigènes sont de 15 points par détachement complet à perdre et 5 points pour une demie-perte (qui n'est pas alors arrondie).</p> </div> <div data-bbox="1122 703 2123 735"> <div>VIII.11.7.4 Les indigènes</div> </div> <div data-bbox="1122 746 1449 775"> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="1122 778 2123 836"> <p>En combat les forces indigènes sont transcrites en équivalent détachements selon le rapport : 15 points d'indigène = 1 DT ; 5 points = 1 DC. Ils sont de classe terrestre Asie, Afrique, Amériques, soit A.</p> </div> <div data-bbox="1122 839 2123 925"> <p>Si une force indigène compte au final plus de 8 équivalent DT, elle inflige une fois des pertes par fraction de 8 DT complète et une de plus pour la fraction restante en lançant plusieurs dés sur la table de combat (un par 8 DT ou fraction). Cette dernière fraction fera des dégâts diminués par la table des pertes variables.</p> </div> <div data-bbox="1122 928 2123 986"> <p>Les armées indigènes (Chine, Japon, etc) ne font pas apparaître de DC puisqu'ils n'ont pas de pions de ce type (leurs pertes sont donc arrondies comme les combats en Europe).</p> </div> <div data-bbox="1122 997 2123 1029"> <div>VIII.11.7.5 Forts, missions, milices</div> </div> <div data-bbox="1122 1040 1449 1069"> <p>– NE PAS PRENDRE EN COMPTE –</p> </div> <div data-bbox="1122 1072 2123 1185"> <p>Un fort est une forteresse de niveau zéro pour l'action de sape. Il suffit d'un détachement même réduit pour y mettre le siège. Lors d'un assaut, sa résistance est 1/2 sauf si une brèche fut obtenue en quel cas sa résistance est 0 : elle chute automatiquement sans combat si il n'y a pas de troupe enfermée dans le fort. On peut mettre un DT en défense dans un fort.</p> </div> <div data-bbox="1122 1189 2123 1275"> <p>Une COL dispose d'une milice d'un DC par fraction de 2 niveaux, et donc d'un DT complet aux niveaux 5 et 6. Elles sont en général conscrites. Par exception la France a des milices vétérans. Les colonies du Portugal ont des milices vétérans et au nombre de 1 DC par niveau de colonie.</p> </div> <div data-bbox="1122 1278 2123 1450"> <p>Tout comptoir possède de base un fort en défense qu'il faut prendre militairement pour avoir le contrôle du comptoir (et pouvoir alors le réduire à la phase de redéploiement). Des troupes en défense dans un fort de comptoir n'entraînent pas de réaction indigène. Celles qui font le siège, ou qui dépassent 1 DT, comptent. Si une forteresse de niveau supérieur est construite, elle remplace ce fort et la présence de plus d'un DT peut causer une réaction. Dans ce cas les troupes peuvent s'enfermer dans la fortification (et elles réduisent les dommages causés par la réaction indigène comme indiqué sur la table).</p> </div> <div data-bbox="1122 1453 2123 1511"> <p>Une mission compte dans une colonie comme un fort qui peut donc accueillir un DT et doit être prise pour assurer le contrôle militaire de l'établissement. Les milices peuvent s'enfermer dans les missions.</p> </div>
--	--

### VIII.11.7.6 Achats dans les colonies

– NE PAS PRENDRE EN COMPTE –

L'achat est limité à 1 DC par province hors-Europe avec une COL ou un COM, ou bien 1 DT au coût double, et comptant double dans les limites d'achat. On ne peut pas normalement pas acheter de pion armée dans les colonies et comptoirs. Les forces navales achetées dans les colonies le sont au coût double et comptent aussi double dans la limite d'achat du tour.

Une exception pour les colonies de niveau 6 : on peut y acheter par tour jusqu'à 2 DT au coût normal, ou bien une A- au coût double. Tous ces achats entrent dans la limite de construction normale. Des navires peuvent y être achetés exactement comme en Europe (coût normal).

Les pêcheries permettent d'acheter un DE par deux ressources de pêche exploitées au coût normal et en dehors de la limite des navires construits par tour.

# Redeployment

## Chapter IX

### IX.1 Overview

**A** During the redeployment phase, lasting military affairs are resolved. First, attacks by natives and privateers, then looting of occupied provinces, extension of revolts and construction of *Præsidios*, and lastly mandatory retreat of some troops and bringing ROTW gold back home.

#### B Sequence.

B.1 Attacks by Natives (IX.2)

B.2 Attacks by Pirates & Privateers (IX.3)

B.3 *Revolt* and *Rebellion* (IX.4)

B.4 Land Military Looting (IX.5)

B.5 Building *Præsidios* (IX.6)

B.6 Redeployment of land troops (IX.7)

B.7 Return to Port (IX.8)

B.8 Gold repatriation (IX.9)

### IX.2 Attacks by Natives

**Design note:** Ignore if using the experimental rules of Attacks during the military rounds.

**A** Natives activated during the turn, as well as forces of ROTW minor countries may attack colonial establishments.

A.1 Natives always attack in each and every province where they have been activated during the turn (whatever the cause of activation).

A.2 Troops of ROTW minor countries inside *Areas* owned by the minor always attack establishments of countries against which they are at war.

A.3 Troops of ROTW minor countries outside *Areas* owned by the minor may attack establishments of countries against which they are at war. The controller of the minor decides whether they attack or not.

#### B Combined attacks

B.1 If, in a given province, several forces attack, there are combined in one and only one attack is resolved, totalling all the troops participating in it.

B.2 This may include natives of the province as well as one or more (allied) ROTW minors.

B.3 If there is only one leader in such a stack, he is considered as commanding the attack. If there are two or more leaders, use normal rules to determine who is leading the attack.

B.4 In case of a combined attack with minor troops and natives, the controller of the minor may choose to attack with the minor troops only (typically, in order to avoid malus if the natives were defeated this turn). This is the only case where activated natives may skip their attack.

#### C Forces attacking

C.1 In each province, sum up the number of LD participating in the attack (ignore any remaining LDE).

C.2 Remember that each province of a given *Area* holds the same number of native LID and that killing natives in one province does not change the number of natives in other provinces of the *Area*.

C.3 Example: There are 40LID in **JAPON**. That means there are 40LID in each of the four provinces of the *Area*. Even if 30LID have been killed in **Edo** during a given turn, there are still 40LID in **Kyōto** this turn.

D All attacks are resolved simultaneously, that is all players decide simultaneously which troops attack (when there is a choice) before any attack is resolved.

### E Resolving the attack

E.1 Each attack is resolved by rolling one die on table IX.1 (Pirates, Privateers and Natives raids). This die-roll is modified by:

- +1 for each LID in defence of the establishment (even besieged).
- +N level of the fortress.
- +M Manoeuvre value of a *land leader* in defence.
- 1 For each LID of the attacking force (native or ROTW minor).
- 1 For each foreign COL or TP in the same *Area* (not belonging to the attacked country).
- M Manoeuvre value of an attacking leader (native or ROTW minor).
- +3 If the Natives were defeated at least once in the province this turn without being routed, and there is at least 1LID of natives in the attacking stack.
- +6 If the Natives were routed at least once in the province this turn, and there is at least 1LID of natives in the attacking stack.

E.2 All rolls are simultaneous, that is an establishment destroyed by an attack still provides a -1 to attacks in the same *Area*.

### F Reading the result

- F.1 The result is read by cross-referencing the (modified) die roll with the last two columns of the table.
- F.2 The "Pillages TP/COL" column gives a number of losses on the settlement. Ignore the ‡ and †.
- F.3 The "Perm. losses on land" column gives a number of losses on land forces.
- F.4 Both results (losses on settlements **and** on land forces) are applied.

### G Applying losses

G.1 Losses on settlements: The establishment of the province losses as many levels as indicated. If it reaches level 3, turn it ⊖. If it reaches level 0, it is immediately destroyed. Exceeding losses are ignored.

G.2 Losses on land forces: as many LID as indicated are lost. The losses may also be applied to fortifications (loosing 1 level of fortress or 1 fort instead of 1LID). The controller chooses whether to loose troops or fortifications, but as many loses as possible must be satisfied. Exceeding loses are ignored.

### H Exploited resources

- H.1 If an establishment loses levels and is still able to exploit all its resources, nothing change.
- H.2 If an establishment loses levels and is no more able to exploit all its resources, it must free some of them (controller choice) until it has sufficiently many levels to exploit the rest.
- H.3 Resources freed this way will be attributed during the next administrative phase to any establishment in the *Area* with free levels to exploit them, using the procedure for automatic competition in case of disagreement between players.
- H.4 Remember that it is possible to voluntarily free some resource as a diplomatic announcement, typically in order to be allowed to exploit a more valuable resource that has just been freed.

### I End of activation

- I.1 Once the attack is resolved in a province, natives of this province cease to be active.

1d10 +mod	Size		perm. loss	Pillages TP/COL	Perm. losses on land
TF⊕	TF⊖				
≤0	5	2	**	6‡	8 LID
1–3	4	1	*	6†	8 LID
4–6	3	1	*	4†	4 LID
7–9	2	1		3	2 LID
10–11	2	0		2	1 LID
12–13	1	0		1	1 LID
14–15	0	0		0	1 LID
≥16	0	0		0	0

### Modifiers against Pirates and Privateers

- +2 if Pirate/Privateer not exactly in the sea zone of the STZ (NA vs. Convoy).
- +3 if only one Pirate/Privateer⊖
- +1 per side of target TF or ℱ (NA against a Convoy)
- +1 If one or more NID in defence and no ℱ
- +2/+4 per ℱ⊖/⊕ defending (△ against land raids)
- +1 Per LID (including militia) against land raids
- +M Manoeuvre of a defending ⊕ (or ✕/⊖/⊗ against land raids)
- 1 per Year at sea/in province (max. -3) (NA on Convoy attacks)
- M Manoeuvre of a ℙ (½ for land raids in Europe)
- +1 if a naval battle occurred in the sea (not for land raids)
- 2 ORDO HOSPITALIS with port on **Mer Égée** or **Bassin Levantin**
- +N Twice the level of the fortress for land raids, +1 for fort

### Modifiers against Natives

- +1 per LID defending
- +M Manoeuvre of a defending leader
- +N Level of the fortress
- 1 per attacking LID
- 1 per third party COL/TP in the *area*
- M Manoeuvre of an attacking leader
- +6/+3 if Natives beaten this turn (routed/not routed)

### Pirates/Privateers effects

- Income of the STZ per fleet level destroyed
- Permanent losses: 1 TF level per \* (to be chosen in the targeted TFs)
- Centre of Commerce: -10 ₤ per \* caused by the Alliance having the CC (Exception: ℙ of ORDO HOSPITALIS)
- Land raids:‡ is a **Pillage**⊕, † is⊖; gives incomes pillaged (and Resources).

Table IX.1: Pirates, Privateers and Natives raids

- I.2 Remark: Natives of provinces owned by ROTW minors at war will be automatically reactivated next turn unless peace with the minor is signed.

**Example: Bantu raids.—** In the late game, event VI-16 (Bantu Raids) occurs. As per event description, natives in 4 provinces are activated and attack with 6LD and one leader. The 4 provinces are occupied as follows:

- **NYASA S.:** TP of level 2 of HOL, no fortress.  
HOL sends 2LD and scores a victory against the Bantu (but no rout). 2LD of natives are killed, the Dutch leader has a Manoeuvre of 3 and the Bantu has 4.
- **NATAL N.:** TP of level 3 of FRA, fortress of level 2.  
FRA does not manage to send any troops to fight the natives ; the Bantu leader has 3 in Manoeuvre.
- **NATAL S.:** TP of level 2 of ANG, no fortress.  
ANG sends 1A ⊕ and routs the Bantu, killing 5LD. The English leader has a Manoeuvre of 2 and the natives has 5.
- **CAP E.:** nothing.

The attacks are then resolved:

- **NYASA S.:** the modifier is +2 (troops in defence) +3 (Manoeuvre of the defending leader) -4 (4LD attacking) -4 (Manoeuvre of the native leader) +3 (native defeat) = 0. HOL rolls 9 and loses 3 level of TP (destroyed) and 2LD (both killed).
- **NATAL N.:** the modifier is +2 (fortress in defence) -6 (6 native LD) -1 (presence of a foreign TP in the Area (the English one)) -3 (native Manoeuvre) = -8. FRA rolls 6-8 = -2 and loses 6 level of TP (destroyed) and 8LD or level of fortress (destroyed).
- **NATAL S.:** the modifier is +4 (LD in defence) +2 (Manoeuvre) -1 (native LD) -1 (French TP) -5 (Manoeuvre) +6 (rout) = +5. ANG rolls 7+5 = 12 and loses 1 level of TP (1 stays) and 1LD (3 remain).

Remark : when sending troops to fight off natives, don't do it half-heartily. Otherwise, you may lose your troops in addition to your establishment. . .

### IX.3 Attacks by Pirates & Privateers

**Design note:** Ignore if using the experimental rules of Attacks during the military rounds.

#### TODO: Should move in Military

**A** Pirates and privateers attack commercial fleets to attempt to decrease their levels, and possibly to capture gold repatriated to Europe by these fleets.

**A.1 Pirates** Pirates appear as explained in section III.5 (Piracy) and they remain until completely eliminated. They are active every turn.

**A.2 Privateers** Privateers are raised by Major Powers (see section VII.3.3.3 (Privateers)), or are in the basic forces of some minor powers (the ORDO HOSPITALIS and the Barbaresque countries (XIV.13.1.3)). They must go out at sea on the first or second round or they will have no effect.

**A.3** Beginning with the third round, they stay in the sea they were placed in, and will be able to attack one STZ or CTZ in this sea or an adjacent sea. The specific STZ or CTZ has to be announced at that time.

#### TODO: Should move in Military

**B Raiding Fleets with Privateer Admirals** Privateer, or an Admiral with Privateer capacity, may lead one IP he starts the turn with. He may lead it in the same stack as naval forces not containing a IF. The IP does not count for attrition, nor in battle. The stack acts both as regular naval force (and can attack, blockade, and so on), and a Privateer stack (other players may attempt to suppress the IP counter). The IP does not count for attrition, nor in battle (nor is affected by battles). The stack may split at any time (for instance if the naval force has to retreat in a port), and the leader chose which stack he stays with.

**B.1** As an exception to §A.2 (Privateers) of this section, a IP led by Privateer or Privateer-Admiral may move after the second round, and has to remain in place only on the last round (the player telling at the beginning of this round which CTZ

STZ will be attacked if there are several of them). However, it still has to be at sea at the end of every round after the first, else (if at port), it cannot leave again for the rest of the turn and will not attack commercial fleets (or loot) this turn.

**B.2** Note that the leader may move as he prefers but can only lead the one IP he starts the turn with (even leaving it then coming back), or naval forces.

#### TODO: Should move in Military

**C Looting by Pirates or Privateers** Pirates and Privateers may try to loot Trading Posts or Colonies, and also enemy provinces for privateers, that are a province bordered by the sea they are in.

**C.1** Looted provinces, Colonies or Trading Posts may belong to minor countries or to players. For privateers to be allowed to loot, it is necessary that a state of war exists between the owner of the privateer unit and the owner of the looted province. Overseas Wars are enough to loot TP or COL, but not European provinces.

**C.2 Exceptions:** Looting of European provinces by the Barbaresque countries (XIV.13.1.3) is permitted, as well as looting in their provinces. Sea Hounds may loot European provinces also, see section XIV.1.2.1 (The Sea Hounds).

**C.3** Pirate may loot following section III.5.3 (Sea or land?). After a turn of looting, non-eliminated pirates go back to the STZ they belong to.

**C.4** The privateer intending on looting is placed in the concerned province, Trading Post or Colony. They have to disembark during any round except the last from the sea zone they are operating in.

**C.5** If privateer/pirate unit is still present at the Redeployment phase, it loots. Looting privateer/pirate are unaffected by forces or battles (except that those forces may attempt to destroy them during the military phases).

**C.6** A maximum of 1 privateer/pirate unit (any side up) can loot the same Colony/province in the same turn. Privateers/Pirates looting a province or COL/TP can not attack at the same turn the CTZ/STZ.

#### IX.3.1 At sea

**Design note:** Ignore if using the experimental rules of Attacks during the military rounds.

**A Naval actions of Pirates and Privateers** In each STZ/CTZ where IP are active, an attack on TF occurs.

**A.1** First, PIRATÆ IP attack all TF in the zone.

**A.2** Then, each alliance resolve the attacks of its privateers, in decreasing order of initiative. In case of disagreement within the alliance, attacks of this alliance are resolved in a random order.

**A.3** IP of different alliances that have the exact same targets (same TF in a given STZ/CTZ) attack together as if they were allied.

**A.4** Especially, all IP of Barbaresque countries (XIV.13.1.3) are considered as one alliance, acting at the initiative of TUR. They are automatically allied with any IP of TUR if they have the exact same targets.

<div>[R]196</div> <div>Attacks by Pirates &amp; Privateers</div> <p>A.5 The <math>\mathbb{P}</math> of ORDO HOSPITALIS acts at the initiative of its diplomatic patron, or of the Sole Defender of Catholic Faith (XIV.14.3.1) if neutral. It is automatically allied with any and all <math>\mathbb{P}</math> of any and all countries having the same target (that is, only TUR).</p> <p><b>B Targets of piracy</b></p> <p>B.1 <math>\mathbb{P}</math> of PIRATÆ target all TF in the STZ/CTZ they are.</p> <p>B.2 Note that some seas may belong to several STZ or CTZ (especially in Europe). However, <math>\mathbb{P}</math> of PIRATÆ are specifically created in one of them (e.g. event E-6 (Looting and insecurity) creates them in the CTZ of the country rolling it). They target this zone.</p> <p>B.3 <math>\mathbb{P}</math> of Barbaresque countries (XIV.13.1.3) attack all christian TF in the STZ/CTZ they are. TUR must declare when moving them which STZ/CTZ they'll attack</p> <p>B.4 <math>\mathbb{P}</math> of other countries attack all TF of countries against which they are at war (including overseas wars) in their STZ/CTZ. Owner must declare which STZ/CTZ is targeted when moving a <math>\mathbb{P}</math>.</p> <p>B.5 TUR may attack Christian TF while Instability of the Balkans (XIV.14.1) is active. TUR must declare upon moving its <math>\mathbb{P}</math> which CTZ/STZ and TF are targeted.</p> <p><i><b>Example: Combined attack.</b>— Note that only TF in the current STZ/CTZ may be targeted. Thus, e.g., if VEN is the only country with TF in one zone, a <math>\mathbb{P}</math> of Barbaresque countries (XIV.13.1.3) will only target VEN in that zone even if it would target other TF elsewhere. In this case, the <math>\mathbb{P}</math> could combine with a <math>\mathbb{P}</math> of TUR being at war against VEN only, even if in another zone the presence of a non-belligerent TF of FRA (targeted by Barbaresque countries (XIV.13.1.3) but not by TUR) prevents the combined attack.</i></p> <p><b>C Resolving the attack</b></p> <p>C.1 Each attack is resolved by rolling one die on table IX.1 (Pirates, Privateers and Natives raids). This die-roll is modified by:</p> <ul style="list-style-type: none"> <li>+2 if the <math>\mathbb{P}</math> is not exactly in the sea zone of the STZ/CTZ (the zone where the symbol is located).</li> <li>+3 if a lone <math>\mathbb{P}\ominus</math> is attacking.</li> <li>+1 per side of targeted TF.</li> <li>+1 If one or more <math>\mathbb{NID}</math> defending (see below) and no <math>\mathbb{F}</math>.</li> <li>+2/+4 per <math>\mathbb{F}\ominus/\oplus</math> defending (see below).</li> <li>+M Manoeuvre of one defending <math>\pm</math> (see below, count only one defending <math>\pm</math> per attack).</li> <li>-1 per year in the sea zone (max. <b>-3</b>) (see below).</li> <li>-M Manoeuvre of one <math>\mathbb{P}</math> <math>\pm</math> (count only one attacking <math>\pm</math> per attack).</li> <li>+1 if a naval battle occurred in the sea where the <math>\mathbb{P}</math> is located during this turn.</li> <li>-2 if the <math>\mathbb{P}</math> of ORDO HOSPITALIS is in the attack and there is a Christian port on <b>Mer Égée</b> or <b>Bassin Levantin</b>.</li> </ul> <p><b>D Years at sea</b></p> <p>D.1 Each military round is named by letter ('S' or 'W') and a number (from 0 to 5).</p> <p>D.2 Each round with a different number in its name, at the end of which the <math>\mathbb{P}</math> is in the zone, is considered as one "year at sea" and gives a <b>-1</b> to the roll.</p> <p>D.3 Two rounds with the same number in their name are considered as only 1 year and give only a bonus of <b>-1</b>.</p> <p><i><b>Example: Years at sea.</b>— A <math>\mathbb{P}</math> stays in the same zone during the rounds 'S4', 'W4' and 'S5'. There are only two years at sea ('4' and '5'), hence a bonus of <b>-2</b>. If it is here during the rounds 'S2', 'W3', 'S4', 'W4' and 'S5', that is 4 years at sea, thus the maximum bonus of <b>-3</b>.</i></p> <p><b>E Defending naval force</b> Any naval stack in any zone of a STZ/CTZ may be declared as a "defending force" by its controller if it is allowed to fight at least one of the <math>\mathbb{P}</math> in the attack.</p> <p><b>F Reading the result</b></p> <p>F.1 The result is read by cross-referencing the (modified) die roll with the first three columns of the table.</p>	<div>Redeployment— master – 2016-04-14</div> <div>[R]197</div> <p>F.2 The "<math>\mathbb{TF}\oplus</math>" column gives the number of levels temporarily lost by an eventual <math>\mathbb{TF}\oplus</math> in the zone.</p> <p>F.3 The "<math>\mathbb{TF}\ominus</math>" column gives the number of levels temporarily lost by <i>each</i> <math>\mathbb{TF}\ominus</math> in the zone.</p> <p>F.4 The "perm. loss" column gives the number of levels <b>permanently</b> lost (one per <math>\star</math>) by some TF in the zone.</p> <p>F.5 <math>\mathbb{NID}</math> may be lost instead of levels of TF.</p> <p>F.6 All results are applied.</p> <p><b>G Applying losses</b></p> <p>G.1 First, <b>each</b> targeted <math>\mathbb{TF}\ominus</math> decreases its <i>Current</i> level (see section VI.3.1 (Commercial fleet adjustment)) by the number of loss obtained for <math>\mathbb{TF}\ominus</math>.</p> <p>G.2 Then, if there is a <math>\mathbb{TF}\oplus</math> in the STZ/CTZ, decrease its <i>Current</i> level by the number of loss obtained for <math>\mathbb{TF}\oplus</math>.</p> <p>G.3 Instead of loosing TF levels, players may choose to loose <math>\mathbb{NID}</math> (or <math>\mathbb{NGID}</math>) of defending naval stacks. The choice is made by the controller of each defending stack on a 1 for 1 basis. It is possible to transform any number of levels lost in <math>\mathbb{NID}</math> (or <math>\mathbb{NGID}</math>) lost (but no more than the total number of <math>\mathbb{NID}</math> (or <math>\mathbb{NGID}</math>) in the defending stacks). Several defending stacks may thus protect the same or different TF.</p> <p>G.4 Lastly, each <math>\star</math> obtained decrease by 1 the <b>maximal</b> level of the largest targeted TF (the one with the largest maximal level). Apply these <math>\star</math> one by one. In case of equality, the controller of the <math>\mathbb{P}</math> chooses, at random if its neutral (e.g. PIRATÆ) or in case of disagreement (allied <math>\mathbb{P}</math>).</p> <p>G.5 Exception: In the ROTW, <math>\star</math> may only be applied to TF of major countries or of countries at war (minors at peace and close to their base manage to repulse local piracy).</p> <p>G.6 This decrease of the maximal level cannot be transformed into lost <math>\mathbb{NID}</math>. It does not decrease the current level unless the maximal level becomes higher than the current (in other words, result "<b>5 <math>\star</math> <math>\star</math></b>" on the first line means "2 permanent losses and 3 temporarily losses").</p> <p><b>Playing tip:</b> Remember that temporarily lost levels return one per turn per TF automatically, but the process can be sped up with TFI actions. Permanent losses, on the other hand, are gone for good and TFI actions must be use to regain these. However, monopolies (both for income and VPs) as well as attribution of Trade centres are computed according to the <b>current</b> levels. Thus, when there is a strong trade competition, a few temporarily losses may change the owner of the centres for a couple of turns, with dramatic influence on incomes which may be crucial during wars. End of period VPs are computed based on maximal levels in order to avoid a last moment backstab that would causes an important change in VPs and create an "end of period" effect.</p> <p><b>H Income of Privateers</b> Each level eliminated (temporarily or permanently) by a <math>\mathbb{P}</math> brings an income to its controller equal to the small number printed in the STZ (the presence income). <math>\mathbb{P}</math> of minor countries give no income (even if VA).</p> <p>H.1 This "privateers income" is recorded in line <b>A9</b> (Pillages, privateers) of <i>ERS</i>.</p> <p>H.2 In case of stacks with <math>\mathbb{P}</math> from several powers, this income is equally divided between the powers (including minor ones), dropping any fraction.</p>
--	--

**Example: Resolving the attack.—** During period II, Barbarossa (♠ <Pm♥> A 5.4.5 [T5–T11]) sails out of al-Jazā'ir with a P⊕ into **Golfe du Lion** where he is joined by a P⊖ of TUNESIA. During the turn, A. Doria (♠ <m♥> A 5.4.4 [T7–T16]) leads a Genoese P⊖ at sea and manage to hunt down the Tunisian P. At the end of the turn, the situation is as follows: P⊕ of ALGERIA lead by Barbarossa, P⊖ of GENOVA lead by A. Doria, TF⊕ of level 4 of FRA, TF⊖ of level 3 of HOLLANDIA, TF⊖ of level 3 of GENOVA, TF⊖ of level 2 of HIS, TF⊖ of level 2 of VEN and TF⊖ of level 1 of TUR.

The P stayed at sea for 3 years. Now, it is time to check the result of Barbarossa relentless attacks on the Christian trade. There are 6 targeted sides of TF (2 of FRA, 1 of each HOLLANDIA, GENOVA, HIS and VEN; the Turkish TF is not targeted as Barbaresque countries (XIV.13.1.3) only target Christian TF). Thus, the total DRM is +6 (targeted sides) +2 (P⊖ in defence) +5 (Manoeuvre of A. Doria) -3 (years at sea) -5 (Manoeuvre of Barbarossa) = +5.

TUR rolls one die and obtains 2 + 5 = 7. Thus, the TF⊕ loses 2 level and **each** TF⊖ loses 1 level. All these loses are temporarily, and there are no permanent loses. HIS (the diplomatic Patron of GENOVA) decides to lose 2 NGD on the Genoese P in order to save the Spanish and Genoese TF (one level each).

So, after the attack is resolved, the situation is as follows (with maximum level in parenthesis): TF⊖ of level 2 (4) of FRA, TF⊖ of level 3 of GENOVA, TF⊖ of level 2 (3) of HOLLANDIA, TF⊖ of level 2 of HIS, TF⊖ of level 1 (2) of VEN and TF⊖ of level 1 of TUR.

FRA will be the most hurt by this attack as it will lose the monopoly (income and VPs) of the STZ for 2 turns.

4 levels were actually lost in the attack. Thus, the P generate an income of 4 (levels lost) × 2 (presence income of the zone) = 8 ₤. However, these are “gained” by a minor country (ALGERIA) and thus forgotten.

If the Genoese P was not here, then the DRM would have been -2, resulting in a 2-2=0 causing 5 levels lost on the French TF and 2 on all other, and 2 permanent losses (the first must be on the French TF, the second on either FRA, GENOVA or HOLLANDIA, at the choice of TUR (say, GENOVA)). Thus, the situation at end would be: TF⊖ of level 0 (3) of FRA, TF⊖ of level 1 (2) of GENOVA, TF⊖ of level 1 (3) of HOLLANDIA, TF⊖ of level 0 (2) of HIS, TF⊖ of level 0 (2) of VEN and TF⊖ of level 1 of TUR. A much more devastating result.

## I Privateers and Trade Centres

I.1 Privateer attacks may cause temporary loss of incomes of the Trade Centre containing the STZ/CTZ they are located.

I.2 For each ★ obtained by a P allied with the country owning the Trade Centre of the sea zone (at the moment of the attack), decrease the income of the Centre by 10 ₤ for the next turn (only).

I.3 Exception: The P of ORDO HOSPITALIS does not decrease the income of the Mediterranean Centre if it is owned by a Christian country.

I.4 Exception: The P of Barbaresque countries (XIV.13.1.3) do not decrease the income of the Mediterranean Centre if it is owned by TUR.

**Design note:** Trade and piracy don't go well together. Even your own merchants will become suspicious of the privateers respecting their target or turning to piracy, thus decreasing the overall trade in the seas and the income of the Centre. This is especially true when you are dominating the trade. Since most of the trade ships are yours, even your privateers may lack legitimate targets and start attacking anything at sight.

In other words, to maintain a commercial domination, peace is required and frequent attacks on trade, even on the trade of someone else, will make it more dangerous and less profitable.

**Example:** In period V, a HOL-ANG-HIS alliance battles FRA. The Atlantic Centre is in HOL. ANG chooses to send a P in STZ **Amérique** in an attempt to dominate the trade with the new World and causes 2 ★ on the French TF there. Meanwhile, HIS sends a P in CTZ **FRANCIA** and causes another ★ on the French TF here. All in all, 3 ★ have been obtained in zones of the Atlantic Centre by allies of the owner, thus decreasing its income by 30 ₤ (to 70 ₤) for the next turn.

Note that eventual ★ in Mediterranean seas would have cause loss on the Mediterranean Trade Centre if it is also owned by a member of this alliance (but not if it is owned by FRA or TUR).

## J Privateer and Peaces

J.1 During Overseas wars (only), each TF ⊕ reduced to current level 0 or 1 counts toward peace.

J.2 See §D (Military situation in overseas war) of section XI.3.3 (Peace differential) for details.

### TODO: Should move in Military

#### K Minor countries against Piracy

K.1 Minor countries at war can use their naval forces against P in STZ or CTZ where they have a TF of their own (only).

K.2 Christian Minor countries whose TF are attacked by P of Barbaresque countries (XIV.13.1.3) may also use their naval forces to fight against those privateers (Patron's choice to move their forces), even if at peace.

K.3 Remember that minors at peace have only Passive campaigns each turn, thus the Patron must pay for moving (when entering the zone where P are located).

K.4 Against PIRATÆ, minor countries at peace fight in an abstract way in the STZ where there are no major country TF (usually in **ASIA** in the early game): each round, roll 1d10 for each STZ with PIRATÆ P and no major TF and add 1 for each side of commercial fleet of a minor country. If the result is 8 or higher, one P⊖ is eliminated.

### IX.3.2 On land

**Design note:** Ignore if using the experimental rules of Attacks during the military rounds.

**A Land actions of Pirates and Privateers** In each province where P are active, an attack occurs.

A.1 First, resolve PIRATÆ P attacks.

A.2 Then, each alliance resolve the attacks of its privateers, in decreasing order of initiative.

### B Resolving the attack

B.1 Each attack is resolved by rolling one die on table IX.1 (Pirates, Privateers and Natives raids). This die-roll is modified by:

+3 if a lone P⊖ is attacking.

+1 Per full LD in the province (including militia and LD in A).

+M Manoeuvre of a defending ✕/○/★.

-1 per year in province (max. -3) (computed as at sea).

-M Manoeuvre of a P admiral (½ for land raids in Europe).

+N Twice the level of the fortress, +1 for fort.

### C Reading and applying the result

C.1 The result is read by cross-referencing the (modified) die roll with the “Pillages TP/COL” column on the table, looking only the † or ‡.

C.2 If a ‡ is obtained, the province is looted: place a **Pillage**⊕. The P owner receives the total income of the province/settlement (including income of exploited resources at their current price).

C.3 If a † is obtained, the province is weakly looted: place a **Pillage**⊖. The P owner receives half the total income of the province/settlement (including income of exploited resources at their current price).

C.4 Income received by a minor country (including PIRATÆ) is lost.

C.5 This income is recorded in line **A9** of ERS.

C.6 Note that existing **Pillage** marker neither prevent new one nor prevent the P from getting money.

C.7 There is neither loss of land forces due to the looting (opposite to Natives attacks) nor protection by sacrificing forces in the province (opposite to attacks at sea).

### D Seizing gold

D.1 If either a † or ‡ was obtained in an attack against a COL/TP with Gold stored in it, all the gold is stolen.

D.2 Remove all the stored gold from the establishment.

D.3 The owner of the IP (nobody if PIRATÆ or a minor) records that amount in line **A10** of ERS.

### E Reducing Pillages

E.1 Pillage placed by land raids are considered simultaneous with military looting (section IX.5 (Land Military Looting)).

E.2 Especially, they are never reduced the turn they appear (contrary to Pillage caused by attrition during military rounds).

## IX.4 Revolt and Rebellion

### IX.4.1 Revolts in minor countries

**A** Revolt/Rebellion in inactive minor countries are automatically removed without any roll.

A.1 Revolt/Rebellion in active minor countries must be fought using the normal rules.

### IX.4.2 Loss of Stability due to Revolts

**A** If one or more Revolt/Rebellion still exist in a country, this country loses Stability.

A.1 For each Revolt/Rebellion⊕, it loses 1 Stability level.

A.2 For all Revolt/Rebellion⊖, it loses only one additional Stability level (only one, not one for Revolt and one for Rebellion).

**B** However, the maximum a country may lose from Revolt/Rebellion of all types is 3 Stability levels. Ignore excess losses.

**C** Revolt/Rebellion in minor countries cause loss of Stability as if they were in their diplomatic patron.

C.1 Especially, if there is a Revolt⊖ in a country and one in one of its minors, the country only losses 1 Stability.

C.2 Similarly, the maximum loss for all Revolt in a country and all its minor is 3, not 3 per country (the major and each minor).

**Design note: Revolts in minors** Since Revolt in inactive minor countries are removed before the loss of Stability occur, the easiest way to get ride of Revolt in your minor allies is simply to keep them at peace. This prevent abusing minors by sending all their troops to a foreign war instead of fighting local troubles, and letting the situation of the minor deteriorate without end.

### IX.4.3 Extension of Revolt

**A Who extend?** After Stability losses, Revolt and Rebellion extend. Adjust all the markers simultaneously:

A.1 each Revolt/Rebellion⊖ becomes a Revolt/Rebellion⊕;

A.2 each Revolt/Rebellion⊕ generates a Revolt/Rebellion⊖.

A.3 Unbesieged cities in revolt/rebellion and revolted/rebelled troops generate a Revolt/Rebellion⊖ in their province if there is neither Revolt nor Rebellion counter in it.

A.4 Note that this apply only for cities controlled by or troops with counter baring the name "Rebellion". When specific minor entities exists to depict rebellion (typically, FIDELIS REGI or HUGUENOTIS), they do not generate Rebellion.

### B Where to extend?

B.1 When extending, Revolt only create Revolt and Rebellion only create Rebellion.

B.2 When a Revolt/Rebellion⊕ extends, the new counter is placed in the same or adjacent province. If there are two Revolt⊕ in the same province, the two new Revolt⊖ may appear in separate provinces.

B.3 This province must belong to the victim country in case of Revolt.

B.4 This province must belong to the region allowed by the event in case of Rebellion (the victim country if no region is specified).

B.5 The choice is made by the player controlling the Revolt/Rebellion. If none was specified, roll one country on the Revolt table of the current period as controller for this turn (reroll until the result is not currently allied with the victim).

B.6 [TBD] Revolt/Rebellion in IRELAND may extend this way across Mer d'Irlande into ANG (and reciprocally): **Uladh** is considered adjacent to **Alba**, **Ayr**, **Galloway** and **Cumberland**; **Brega** is considered adjacent to **Cumberland**, **Lancashire** and **Cymru**; **Laighean** is considered adjacent to **Cymru** and **Cornwall**.

B.7 If the extension of a Revolt/Rebellion⊕ is not possible (due to overstacking of counters), a Revolt or Rebellion LD is placed in the same province (immediately merged with existing Revolted or Rebelled troops into an ⊕ or ⊕ using usual rules for conversion).

B.8 If there are two Revolt⊖ (or Rebellion⊖) in the same province, they are immediately merged in a Revolt/Rebellion⊕ (before checking stacking).

B.9 Remember, that there can be at most 2 Revolt/Rebellion markers stacked in each province.

**Example:** Suppose that there is a Revolt⊕ in French Béarn, a Revolt⊕ in Savoia (a French ally, active in an Italian war), a Revolt⊖ in Berry, another in Pfalz (another active French ally) and a last Revolt⊖ in Lorraine (an inactive French minor). Note that this is a very unlikely situation that almost never happens out of examples.

First, since LOTHARINGIA is inactive, the Revolt there is automatically removed without need for rolls or anything. Then FRA loses 3 Stability: 1 for each Revolt⊕ (in Béarn and Savoia) and 1 for all the Revolt⊖ (in Berry and Pfalz).

Next, Revolt extend. All the Revolt extend simultaneously, that is newly created Revolt do not extend in the phase they were created (otherwise, you're trapped in an infinite loop). Both Revolt⊖ become Revolt⊕. The two Revolt⊕ create new Revolt⊖. Since the Revolt⊕ in Béarn is in FRA, it may only extend in FRA. Thus, the new Revolt⊖ may not be created in Spanish Vizcaya, Navarra, Pirineos nor Rosseló. It may, however, extend in French Béarn (creating a second Revolt here), Guyenne or Languedoc. The controller of the Revolt chooses to create it in Béarn, hoping that the mountain will give some protection to it and that it will take longer to crush it (rather than risking an extension to Languedoc that would cause more money loss but will likely be easily crushed next turn). The Revolt⊕ in Savoia may only extend in SABAUDIA, hence either Savoia, Bresse or Nice. It may not go in Spanish Lombardia nor even in the French provinces even if SABAUDIA is a French ally.

Note that for FRA, the best way to get ride of this dire situation is probably to sign peace, thus making its minors inactive (that will remove two Revolt⊕ and one Revolt⊖) and freeing its armies from the front line to crush its peasants. However, French enemies are not likely to give an easy peace as they may want to take advantage of the troubles. . .

### IX.4.4 Revolts and fortresses

**A** If a Revolt (not a Rebellion) controls a fortress, reduce the fortress to level 2 (turn 39 or earlier) or 3 (turn 40 or later) if it is higher.

A.1 Each level lost that way gives one Revolt LD which stays inside the fortress and is immediately merged with existing troops. Exceptionally, the troops in the fortress may exceed the usual fortress capacity (of 1LD per level).

### IX.4.5 Independence of Revolted Principalities

**A** A MAJ may give the independence to some groups of provinces if all the provinces of the group he owns (except at most one) have a Revolt or a Rebellion. This announce is made during the diplomatic phase. See section XIV.14.9 (Independence of Revolted Principalities) for the precise conditions.

### IX.4.6 Execution of the Monarch

**A** If at least half of all owned national provinces (rounded up) are in revolt (either a Revolt or Rebellion counter or control of the city), the regime of the country is overthrown. The tyrant is executed and a new benevolent monarch accedes the throne.

A.1 At least 3 national provinces must be revolted for this to apply.

**Design note:** The last point avoids a “one revolt extends, you’re dead” effect for PRU and VEN with very few national provinces.

**B Consequences** Unless specified by an event, execution of the Monarch has the following effects:

B.1 All revolts present in the country are removed: all *Revolt* and *Rebellion* counters and troops are removed, and fortresses they control are given back to their legitimate owner.

B.2 A new monarch is immediately determined using normal rules. His first turn of reign is considered to be the current one. The new monarch is rolled as after a “Dynastic Crisis”.

B.3 The Stability is reduced by 2 levels and no Stability improvement action is allowed this turn.

B.4 The DTI is reduced by one (1 is the minimum).

B.5 3 levels of TF are reduced in the CTZ of the country (chosen at random among all the levels present, even on other countries’ TF)

**Design note:** This represents pillage and lost properties due to this really unstable situation!

### C Execution and Civil wars

C.1 In most events creating *Rebellion*, execution of the monarch ends the event in a loyalist defeat. Often, the precise effect is different from the ones described above (Stability loss, new monarch, . . . ) Check the precise description of the event.

**Playing tip:** Beware that execution of the monarch happens after extension of *Revolt*. Thus, a seemingly controlled situation may get out of hands because of poor prevision of the extension. This is especially true for small countries with few provinces.

Beware also that execution of the monarch happens after loss of Stability. This usually leaves the country in a very bad state. Since the execution prevents Stability improvement this turn, it is often a bad idea to use it as an “easy” way to remove *Revolt*, especially during wars (when troops may seem more useful on the front line).

## IX.5 Land Military Looting

**A Adjustment of Already Existing *Pillage* Markers** In each province where there is at least one *Pillage*:

A.1 Remove one *Pillage* ⊖ if there is one.

A.2 Otherwise, flip one *Pillage* ⊕ to its ⊖ side.

A.3 Exception: *Pillage* markers put this turn due to land raids of IP are not touched. They will only be reduced next turn.

**Design note:** Each side of *Pillage* represent one level, since there may be up to 2 markers in any given province, there may be up to 4 levels of looting. During adjustment of the markers, the “looting level” of each province is reduced by 1. Simply be cautious not to flip a *Pillage* ⊕ after removing a *Pillage* ⊖ in the same province as this would reduce the level by 2.

*Pillage* obtained because of attrition during the rounds may be immediately removed. Thus, a small “tax” on the local farms will have no impact. However, if the war stays in the same area for long, *Pillage* ⊕ may appear due to attrition and will cause a loss of income the next turn.

*Pillage* obtained by IP are not reduced the turn they appear. That is, they are considered to be placed at the same time as military looting, just after adjustment, but are resolved together with other actions of IP.

### B Looting

B.1 Each stack in a enemy province may loot if it has sufficiently many troop to besiege the province (either the province is already controlled, or 1L⊖ per level of fortress).

B.2 Looting is never mandatory.

B.3 The decision to loot or not is taken by the controller of the stack. The choice may vary from one province to another (it is possible to loot one province and decline the possibility in another province).

B.4 Looting are resolved in decreasing order of initiative: the alliance with the higher initiative resolves all its looting, then the next and so on.

### C Looting and *Pillage*

C.1 Place a *Pillage* ⊕ in each looted province.

C.2 Exception: in the ROTW, if the looting stack contains no A counter, only place a *Pillage* ⊖ (if another already exists here, immediately merge both into a *Pillage* ⊕).

C.3 If there are more than two *Pillage* markers in any province, remove the smallest one in each of these provinces (this can happen when looting a province which has already a *Pillage* ⊕ and a *Pillage* ⊖, or two *Pillage* ⊕).

### D Looting Income

D.1 If there was no *Pillage* marker in the province before the looting take place, money is gained from looting.

D.2 The controller of each looting stack gains income equal to the income of the looted province.

D.3 In the ROTW, only the regular income is taken, not income from exotic resources.

D.4 In the ROTW, if there was no A counter, gain only half the income.

D.5 The sum of these incomes is recorded in line A9 of ERS.

D.6 Nobody gets money for provinces looted by minors country (including VA). That is, the minor keep the money for itself.

### E Burning TP

E.1 Instead of looting, troops controlling enemy TP (not COL) may choose to burn it down.

E.2 Besieging is not sufficient to burn a TP. The establishment must be controlled, and a stack (at least 1L⊖E) has to be here.

E.3 Simply remove any burned TP from the map, it now has level 0 and exploit no more resource.

E.4 No income is gained from burning a TP. Only the destruction of the establishment.

**Example: Looting.—** In period III, HIS took control of Dutch **Utrecht** and besieges **Zeeland**, a stack is still present in **Utrecht** (defending against a potential counterattack). There is already a *Pillage* ⊖ in **Utrecht** (a *Pillage* ⊕ was here and was reduced). Since HIS is still besieging **Zeeland** and intends to continue the siege in the next turn, it chooses not to loot here. The *Pillage* would hamper the siege by increasing attrition. However, **Utrecht** being already controlled is a good target for looting. Indeed, a *Pillage* there would hamper a future attempt of Dutch reconquest. . . The presence of an existing *Pillage* here does not prevent looting: there are always more villages to burn and peasants to kill. A new *Pillage* ⊕ is put in **Utrecht**, but since another *Pillage* is present, no income is gained for HIS.

Note that HIS could have chosen to loot also **Zeeland**. This would be especially useful if it did not intend to continue the siege as the *Pillage* would prevent Dutch income for two turns. In that case, HIS would gain 9 ₤ (the income of **Zeeland**).

**Example: Burning TP.—** At the same time, HOL is besieging a TP ⊖ of PORTUGALLIA and controls another TP ⊕. It may choose to loot the TP ⊖. It may not burn it as it does not control it. If looting it, HOL will only gain 1 ₤ (regular income of a TP ⊖). For such a small amount, HOL chooses to leave it, hoping to take it later. On the other hand, the TP ⊕ is controlled and HOL chooses to burn it (rather than looting for 2 ₤). The province is now empty and open for attempts of Dutch TP placement. An efficient albeit morally disputable way of freeing old markets for your merchants. . .

## IX.6 Building Præsidios

### A Where to build?

<p>[R]204</p> <p>Redeployment of land troops</p> <p>A.1 <i>Præsidios</i> may only be built in provinces with a port or arsenal depicted with a circled anchor on the map.</p> <p>A.2 <i>Præsidios</i> may only be built in non-owned provinces.</p> <p>A.3 Only one <i>Præsidio</i> may be built in each province.</p> <p><b>B How to build?</b></p> <p>B.1 To build a <i>Præsidio</i>, a country must either control the province or besiege it and not be forced to redeploy (that is, either <i>Siege</i>work ⊕, Breach or HW obtained during the turn).</p> <p>B.2 It is possible to build <i>Præsidio</i> even if deciding to voluntary redeploy from the siege.</p> <p>B.3 <i>Præsidios</i> are never build during administrative phase. Similarly, raising a <i>Præsidio</i> can only happen at the same conditions than building it.</p> <p><b>C Cost</b></p> <p>C.1 <i>Præsidios</i> are fortresses and cost the same price (construction and maintenance). They have the same restrictions on levels and technology.</p> <p>C.2 <i>Præsidios</i> may never be of level more than 3.</p> <p>C.3 Contrary to fortresses, <i>Præsidios</i> may be built at any level directly. The cost is then the sum of costs for each level.</p> <p>C.4 This cost is recorded in line <b>B46</b> (Presidios build) of ERS.</p> <p><b>D Præsidios in play</b></p> <p>D.1 <i>Præsidios</i> are represented by fortresses of the owning power. Thus, they do count toward the counters limit of that power.</p> <p>D.2 At most one country may have a <i>Præsidio</i> in any given province.</p> <p>D.3 Because of <i>Præsidios</i>, up to two fortresses of different countries may exist in the same province. Put the regular fortress on top of the fortress icon on the map, and the <i>Præsidio</i> on top of the anchor.</p> <p>D.4 If a country ever gains ownership of a province where it has a <i>Præsidio</i>, it may either dismantle the <i>Præsidio</i> or keep it and replace the regular fortress of the province with it (remove any existing regular fortress counter and move the <i>Præsidio</i> counter on top of the fortress icon to depict the new fortress).</p>	<p>Redeployment— master – 2016-04-14</p> <p>[R]205</p> <p><b>D Where to redeploy?</b></p> <p>D.1 Stacks must redeploy into the closest (in MP) friendly controlled territory. In case of equality, the controller of the stack chooses.</p> <p>D.2 Exception: Redeployment by naval move is never forced if there is a possibility to redeploy by land, even if it is further (in MP).</p> <p>D.3 Redeploying stacks may not enter provinces with non-redeploying unbesieged enemy troops (troops that have finished their redeployment are still "redeploying" until the end of the segment and thus do not hamper other redeployments). Enemy fortresses, even unbesieged, do not hamper redeployment.</p> <p>D.4 Redeploying troops may use naval move if there is a large enough naval stack adjacent to the redeploying stack at the beginning of the redeployment. Redeployment is then done together with return to port of the naval stack (see below). Note that combined land/sea movement is not possible during redeployment.</p> <p>D.5 Redeploying stacks may not split nor pick up more troops. All the stack redeploy to the same place.</p> <p>D.6 Redeploying stacks may enter or cross provinces with friendly troops without any effect on these troops (no "rout").</p> <p>D.7 Redeploying stacks may not be intercepted.</p> <p>D.8 If redeployment is not possible in 12MP or less, the stack is destroyed. Any leader will reappear next turn as reinforcement.</p> <p>D.9 After redeployment, if any province exceed its stacking limit (8LD), remove any exceeding troops.</p> <p><b>E Redeployment and attrition</b></p> <p>E.1 Redeployment is a cause of attrition. Each redeploying stack must roll for movement attrition with the usual modifiers.</p> <p>E.2 In addition, troops redeploying because they have no LOS have a malus of +2 to this test.</p> <p>E.3 Troops conducting a voluntary redeployment have a bonus of -2 to this test.</p> <p><b>F Continuing siege</b></p> <p>F.1 Besieging troops which obtained either a <i>Siege</i>work ⊕, a Breach or a HW during the turn may continue the siege for next turn.</p> <p>F.2 In this case, remove all <i>Siege</i>work and put a <i>Siege</i>work ⊖ (even if there was no <i>Siege</i>work previously).</p> <p>F.3 Continuing siege does not cause attrition.</p>
<p><b>IX.7 Redeployment of land troops</b></p> <p><b>A Mandatory redeployment</b></p> <p>A.1 A stack without LOS must redeploy.</p> <p>A.2 A besieging stack must redeploy if it is too small to maintain the siege (less than 1LD per level of the fortress). This typically occurs in case of siege attrition during the last round.</p> <p>A.3 A besieging stack must redeploy if there is no <i>Siege</i>work ⊕ and there was neither Breach nor HW obtained during this turn.</p> <p><b>B Voluntary redeployments</b></p> <p>B.1 Other besieging forces may choose to redeploy. The controller of each stack decides what to do with it.</p> <p>B.2 Decisions to redeploy are taken in decreasing order of initiative. Redeployments are resolved once all decisions have been taken, thus the decision it self does not reopen LOS or similar effect.</p> <p>B.3 Stacks may not partially redeploy. Either the whole stack redeploy or the whole stack stays.</p> <p>B.4 If the redeployment of a stack would cause another stack to be out of supply, then the would-be OOS stack must also redeploy. This is, however, considered as voluntary redeployment.</p> <p><b>C Redeployment in the ROTW</b></p> <p>C.1 Any stack in the ROTW not in a controlled province may be redeployed as per voluntary redeployment procedure.</p> <p>C.2 This include stacks with unknown discoveries and this is a way to bring back discoveries.</p>	<p><b>Example: Simple redeployment.—</b> A Turkish stack is besieging Banat and got a <i>Siege</i>work ⊕ and a <i>Siege</i>work ⊖. It may choose to either stay (and replace both <i>Siege</i>work by a single <i>Siege</i>work ⊖) or redeploy to the first friendly province between Valahia (1MP), Serbia (2MP) or Bulgaristan (3MP) (or some other provinces, depending on the military situation but these three are the most likely). If it redeploy, it must roll for attrition at +8 (entering one enemy province, namely Banat), -2 (voluntary redeployment) -MAN (+2 if this is a large stack as this is an extra cause of attrition). If there was only a <i>Siege</i>work ⊖ in Banat, then redeployment is mandatory and the bonus of -2 to attrition is lost. Since the stack still has a LOS, there is no specific malus for the roll.</p> <p><b>Example: Double redeployment.—</b> Suppose that there was another stack besieging Buḡa in Magyarország, with a <i>Siege</i>work ⊕. If the stack in Banat redeploy, then the stack in Magyarország must also redeploy as it would otherwise be out of supply (its supply line goes through Banat). This is, however, voluntary redeployment, even if the redeployment in Banat was mandatory. That is, TUR must choose to redeploy from Magyarország, but the presence of a <i>Siege</i>work ⊕ allows for an orderly redeployment (and the -2 to attrition). Note that it is likely that the closest province is the same from Banat and Magyarország, thus resulting in an overstacking and destruction of exceeding troops. So, voluntarily redeploying both stacks might be a bad idea. . . This is not always the case due to rivers and mountain pass.</p> <p><b>Example: Mandatory redeployment.—</b> If a Polish counter-attack managed to relieve the siege of Banat (and stay there), then the Turkish stack in Magyarország is out of supply and must redeploy (with a malus of +2). The closest province is Serbia (provided there is no enemy troops in Croatie). The Polish stack in Banat may not intercept (neither in Croatie, nor in Serbia). If there was an HUNGARIA stack (even a lone LD) in Croatie, then the stack must go to either Moldova (if friendly) of Valahia (in that case, that's a 6MP move, hence another cause of attrition resulting in another +2 to the test).</p>

**Example: Impossible redeployment.**— Suppose now that **Dalmacija** belongs to **VEN** and that there are enemy troops in both **Croatie** and **Erdély** (due to a way too bold Turkish attack: destroy enemy troops before going deep in their territory). If **MOLDAVIA** is neutral, the Turkish stack is trapped and cannot redeploy: it is simply destroyed (it may not cross neutral territory). If **Moldova** is friendly, the troop may redeploy there. If both **Moldova** and **Basarabia** are enemy (eg Polish) and **Valahia** is neutral, then the stack could possibly redeploy through **Kárpátok**, **Bukovina**, **Moldova** and **Basarabia** to **Doğu Rumeli**. However, that 13MP, more than the 12MP limit, thus this redeployment is not possible and the stack is destroyed.

**Example: Naval redeployment.**— A Turkish stack of two **Yeniçeriler** ⚠ ⊕ landed in **Malta**. By the end of the turn, due to the heroic defence of **La Valette**, **TUR** only managed to get a **Siege** ⚠ ⊖ and is thus forced to redeploy. Fortunately, the Turkish armada is still here to carry the troops back home. Since naval move is 3MP whatever the distance and return to port is not constrained by distance, the stack can redeploy to any Turkish port (or arsenal). Contrary to regular naval move, the land stack may not move after landing in the port.

Note that in addition to the mandatory redeployment, the stack is conducting a naval move embarking out of controlled port, and is a large stack. Two extra causes for attrition, each giving a +2 to the roll.

If there was no naval stack adjacent to **Malta**, then redeployment would have been impossible and the Turkish army is destroyed.

If **SUE** is besieging **Danzig** and owns **Hinterpommern**, then its closest redeployment possibilities are first by sea (3MP) and then to **Hinterpommern** (4MP due to swamp and river). Redeployment by sea, however, does not take precedence over redeployment by land and **SUE** can freely choose any of the possibilities (but may not split its stack).

## IX.8 Return to Port

### A Navies

A.1 Naval stacks being located in a sea zone have the choice to either

- return to any friendly, unblockaded port (or arsenal) of the controller's choice (not necessarily the closest one);
- OR stay at sea.

A.2 This is considered a move (even if staying at sea) and, as any naval move, it causes attrition with the usual modifiers.

A.3 In addition, naval stacks staying at sea at the end of turn have a malus of +2 to this roll.

A.4 No interception, including by *Præsidios* or *Strait fortifications*, may occur during this move.

### B Pirates and privateers

B.1 **PIRATÆ** Ⓟ stay where they are. They will still be active next turn.

B.2 Other Ⓟ are repatriated to a port of their owner's choice.

B.3 No interception, including by *Præsidios* or *Strait fortifications*, may occur during this move.

## IX.9 Gold repatriation

### A Before redeployment

A.1 *Income*. During Income phase, gold produced in a COL may be stored in any coastal COL in the same or adjacent Area. See §B of section V.5.3 (ROTW gold).

A.2 *Military*. During military rounds, gold may be moved either with troops or ships (including convoys) and intercepted by enemies. See §D (Spanish convoys) of section VI.12.2.1 (The convoys) for the apparition of the Spanish convoys and section VIII.6.1 (Convoys) for the attacks on convoys.

### B Reaching Europe

B.1 As soon as a land or naval stack carrying gold reaches a owned and controlled province on the European map, the gold is emptied and the amount is tallied in line **A10** of *ERS*.

B.2 Note that COL of level 6, as well as **Açores** or **Islas Canarias**, are European provinces but not on the European map and are thus not sufficient to bring gold back home.

### C Gold transportation

C.1 During the Redeployment phase, gold gain a free land movement (only).

C.2 Exception: Gold in any establishment bordering the **Mer Caspienne** at the beginning of this segment may cross it and reach any other province bordering that sea.

C.3 It may thus moves any distance along a chain of friendly establishments (COL, TP or fort).

C.4 Each establishment along the chain must be 12MP or less from the previous one (counting the cost as for LID).

C.5 The path may not cross a province with a non-besieged enemy stack or fortress.

C.6 Gold can thus be repatriated for any distance as long as each "leg" of the movement is 12MP or less.

C.7 If Gold reaches an owned and controlled province on the European map, it is immediately emptied and tallied in line **A10** of *ERS*.

C.8 This movement of Gold may not be intercepted in any way.

**Design note:** Siberian gold is usually repatriated this way and thus do not require any campaign or accompanying troops to move.

On the other hand, American gold must cross the Ocean and can only do so during the military rounds. This repatriation still allows to easily concentrate all the gold in one place and prepare for an immediate naval move during the next turn.

# Exchequer test and budget

## Chapter X

### X.1 Overview of the phase

**A Administration** At the end of the turn, final administrative actions are resolved and budgets must be completed. First, exceptional taxes that were scheduled during the administrative phase are resolved. Then comes the exchequer test. At this point, players roll to determine how well the funds were collected this turn and to discover their precise income. If the income is not enough to cover for the expenses, loans must be contracted, either from the people of your country or from international bankers. Last but not least, countries may try to improve their Stability.

#### B Sequence.

- B.1 Exceptional taxes (X.2)
- B.2 Exchequer test (X.3)
- B.3 Budget (X.4)
- B.4 Stability Improvement (X.5)

### X.2 Exceptional taxes

**A Exceptional taxes** Exceptional taxes are scheduled during the Administrative phase. See section VI.6.3 (Exceptional taxes) for details (and examples). They are resolved at this point only. That is, until the end of the turn (and after most expenses have been planned), players won't know exactly the amount of collected taxes.

A.1 Note that Exceptional taxes must be planned during Administrative phase. If a country forfeited the possibility to do so, it is too late now to decide to raise taxes.

#### B Resolution of the taxes

- B.1 Each country which has planned taxes should have written a modifier in line **A11** of *ERS* (copied from line **B39** of *ERS*). This modifier was  $ADM + 3 \times \text{Stability}$  (at the time of the Administrative phase).
- B.2 Roll 1d10, add the modifier and multiply the result by 10. This is the amount of taxes (in  $\text{⚡}$ ).
- B.3 Write this amount in line **A12** of *ERS*. It may well be negative if the modifier was negative. In this case, the country will actually lose money because of the taxes. It is not possible to refuse a "tax" once the amount is known.

#### C RT before Exchequer test

- C.1 Players can now compute their RT before resolving the Exchequer test.
- C.2 This is the sum of lines **A8** (RT after Diplomacy) + **A9** (Pillages, privateers) + **A10** (Gold from ROTW and Convoys) + **A12** (Exceptional taxes) of *ERS*. It is written in line **A13** (RT before Exchequer) of *ERS*.
- C.3 Players should also copy line **B25** (Gross income B) of *ERS* in line **A14** (Gross income A) of *ERS* and line **B48** (Total expenses) of *ERS* in line **A19** (Expenses) of *ERS*.

### X.3 Exchequer test

#### X.3.1 Gross Income

**Design note:** We explain here the technical rules of the economical system. For a description of the spirit of these rules, see section II.7.2 (A Three stage process).

The rules here are quite "algorithmic" in order to have them as precise as possible and avoid misinterpretations. Thus, there are not well suited to understand the whys of the system (only the hows). These rules are meant to be closely followed step by step. Check section II.7.2 (A Three stage process) in order to understand what should happen, as well as read some examples.

**A Exchequer test** Each country roll a die on table VI.1 (Administrative Actions) modified as follows (cumulative):

- +2 If completely at Peace (no war (including civil or overseas wars), no intervention (limited or foreign)).
- 1 per full 100  $\text{⚡}$  of National Loan (drop smaller amounts).
- 1 per ongoing International Loan (whatever the amount, including the ones that are partially refunded).
- 1 per bankruptcy in the last 5 turns.
- 1 per loan treaty broken in the last 5 turns.

A.1 Find the result by cross-referencing the line of the modified result with the column equal to the Stability of the country.

A.2 The result may be either F\*, F,  $\frac{1}{2}$ \*,  $\frac{1}{2}$ \*, S or S\*.

**Playing tip:** Bankruptcies and broken loan treaties should be noted by a small \* in line **A14** of *ERS* for the turns where they affect the Exchequer test.

**B Percentages** By cross-referencing this result with the first three columns of table X.1 (Exchequer test), countries obtain three percentages for "Regular Income", "Prestige Income" and "National Loan".

- B.1 Add 10 to the "National Loan" of countries that are not completely at peace.
- B.2 Add 10 (cumulative) to the "National Loan" of HIS if it has declared a policy of expulsions (see section XIV.10.3.9 (Expulsion of the Jews and the Moriscos)).
- B.3 It is possible and intended that these percentages sum up to more or less than 100%.

**C Incomes** Apply each of the three percentages to the whole Gross Income (line **A14** of *ERS*), rounding down, to obtain three incomes.

C.1 Copy these incomes in line **A15** (Regular income) of *ERS*, line **A16** (Prestige income) of *ERS* and line **A17** (Max. national loan) of *ERS*.

**Playing tip:** It is often convenient to cut these three boxes in half (diagonally). After rolling the exchequer test, immediately copy the percentages in the top-left halves, this avoids forgetting the result. Next you can take your time to compute the actual value and write it in the bottom-right halves.

#### X.3.2 International Loans

**A Available money** The total amount of available money for international loans is:

- A.1 50  $\text{⚡}$  from the start (unspecified bankers).
- A.2 Always add 50  $\text{⚡}$ , or 100  $\text{⚡}$  for the emperor (German bankers).
- A.3 Always add 50  $\text{⚡}$ , or 100  $\text{⚡}$  for the diplomatic patron of GENUA (Genoese bankers).
- A.4 After event III-2 (Amsterdam Stock Exchange) add 50  $\text{⚡}$ , or 100  $\text{⚡}$  for HOL.
- A.5 After event IV-8 (1) (Creation of the London Stock Exchange) add 50  $\text{⚡}$ , or 100  $\text{⚡}$  for ANG.

Result obtained	Regular Income	Prestige Income	National Loan	International Loan
F★	30%	0%	40%	20%
F	20%	20%	40%	30%
½	30%	20%	30%	40%
½★	40%	30%	30%	50%
S	50%	40%	20%	70%
S★	60%	40%	20%	100%

**International Money available:** 50 ₮ + 50 ₮ for each Money Place (HRE, GENUA, Amsterdam Stock Exchange, London Stock Exchange) x2 if place controlled.

**Exchequer test:** Test on Administration Table, Stability as Column, modifiers:

+2 If completely at Peace

-1 per 100 ₮ of National Loan, or per International Loan

-1 per bankruptcy (or broken loan treaty) in the last 5 turns

+1 if has a Stock Exchange (For International Loans only)

**If not at Peace: Add 10% to the capacity of National Loan**

HIS: Add 10% to the capacity of National Loan if Expulsions

Table X.1: Exchequer test

A.6 Thus, the total available money will be between 150 and 350 ₮. Note that it does depend on the country, that is all the countries have different loan capacities.

**B International Loans test** Each country may roll a die on table VI.1 (Administrative Actions) modified as follows:

+2 If completely at Peace (no war (including civil or overseas wars), no intervention (limited or foreign)).

-1 per 100 ₮ of National Loan.

-1 per International Loan.

-1 per bankruptcy in the last 5 turns.

-1 per loan treaty broken in the last 5 turns.

+1 if the country has a Stock Exchange (HOL after event III-2 (Amsterdam Stock Exchange) and ANG after event IV-8 (1) (Creation of the London Stock Exchange)).

B.1 Find the result by cross-referencing the line of the modified result with the column equal to the Stability of the country.

B.2 The result may be either F★, F, ½, ½★, S or S★.

B.3 Note that even is modifiers look alike, this roll is different from the Exchequer test. Do not use the same roll for both the Exchequer test and the International Loans test as this would increase the chances of extremely bad results.

**C International Loan** By cross-referencing this result with the last column of table X.1 (Exchequer test), countries obtain one percentages for "International Loan".

C.1 Apply this percentage to the total available money and copy the result in line **A18** (Max. international loan) of ERS.

**Playing tip:** Often, International loans are not necessarily and this step may be skipped by most countries. It may be useful to start computing your budget (next step) before deciding whether to take an international loan or not. Hence, it is sometimes more fluent to start computing your budget and then possibly come back to looking at international loans. Since there is no new knowledge gained between the Exchequer test and the Budget, this does not change anything.

If you wish to follow closely the order of the steps, you should, however, always roll for international loan preventively, thus avoiding bad surprises.

Rolling for international loan do not force to take one. It is always possible to decline a new international loan after rolling the die and seeing the available amount.

## X.4 Budget

### X.4.1 Expenses

**A Regular income** Write in line **A20** (Remaining expenses) of ERS the difference between line **A19** (Expenses) of ERS and line **A15** (Regular income) of ERS.

A.1 This may be a negative number in the rare case where the Regular income is larger than the total expenses.

**B Prestige income** Write in line **A21** (from Prestige) of ERS any non-negative number smaller than both line **A16** (Prestige income) of ERS and line **A20** of ERS.

B.1 Small value means that more money is spent for prestige VPs and less for day-to-day expenses. Those will be covered by loans or debt.

**Design note:** You cannot spend additional money for prestige (it must be non-negative). You cannot take more from prestige than the "Prestige Income" (smaller than line **A16** of ERS). You cannot take more from prestige than what is left to pay after the regular income is spent (smaller than line **A20** of ERS).

**C National Loans** Write in line **A22** (from N. loan) of ERS any non-negative number smaller than line **A17** (Max. national loan) of ERS.

C.1 Copy this number in line **C9** (New National loans) of ERS.

**Design note:** National Loans are not limited by expenses. However, you'll have to pay interest for them and maybe even refund your people someday.

**D International Loans** Write in line **A23** (from I. loan) of ERS any non-negative number smaller than line **A18** (Max. international loan) of ERS.

D.1 Copy this number in line **C1** of ERS.

D.2 Copy this number in line **C3** of ERS, **three turns** after the current one.

D.3 Copy 10% of this number (round up) in line **C2** of ERS for the **next three turns**. If there is already a number in one of these boxes, add the new value to it.

D.4 That is, you should write 3 interests (for the next three turns), and one refund (for the same turn as the last interest).

**Playing tip:** International loans are usually a bad idea because of the scheduled mandatory refund. Use them only when in need.

**Example:** A correctly filled new international loan (of 100 ₮, at turn  $n$ , in red) over an existing one (of 200 ₮, from turn  $n - 2$ , in black):

	Turn	$n - 2$	$n - 1$	$n$	$n + 1$	$n + 2$	$n + 3$
1	New International loan	200		100			
2	I. loan interest		20	20	2030	10	10
3	I. loan refunds				200		100

See also section VI.5 (Loan refund) for more detailed examples on how to fill the loan management record.

## E New RT

E.1 Write in line **A24** (RT balance) of ERS the sum of line **A21** of ERS + line **A22** of ERS + line **A23** of ERS minus line **A20** of ERS. It may be negative if line **A20** of ERS is too big.

E.2 Write in line **A25** (RT after Exchequer test) of ERS the sum of line **A13** (RT before Exchequer) of ERS + line **A24** of ERS.

**Design note:** line **A20** (Remaining expenses) of ERS depict **expenses** that are left to be paid after using the Regular income. Hence it is subtracted from the RT while other lines are added (they are money taken from prestige or loan in order to fill the treasury).

If line **A20** of ERS is *negative*, regular income was enough to cover all expenses. Then, the surplus is added to the treasury (as subtracting a negative number results in an addition).

**Design note:** All in all, do not try to understand all the steps here while reading the rules. After a couple of turns of computing your budget, things will become more natural. Note that if you are having a “teaching session”, you should try several “stupid” things with your budget to see the consequences.

**Playing tip:** When planning expenses, it is obviously a good idea to keep an eye on the possible income. . . Too many expenses result in bankruptcy while too few result in money “wasted” for prestige (instead of being use for buying troops or waging war).

Here are some guidelines in preparing your budget:

First, check in the administrative actions table what are the possible and plausible results with respect to your current (and expected) Stability. You may discard very unlikely results (with only 10% chance of happening) but you know you take a risk doing so. It is especially important to take into account the worse possible result you may obtain if you want to limit risks.

Second, check in the Exchequer test table the sum of percentages these results produce. Check separately the sum of Regular + Prestige income (income without debt) and the sum of the three percentages (income with debt). Applying these percentage to your Gross Income will give some amount of money.

Do not spend more than your best income with debt, obviously, doing so will result in problems. Spending more than the worse income with debt means taking risks. Estimate the risks (Is it a 10% or 30% chance of getting the worse result?) compared to the situation (Do you have lot of money in your RT to handle the loss?) and the expected gain (Will the extra expense allow you to win the war?)

Spending less than the worse income without debt means that some money will necessarily go into Prestige VPs. Are you sure it won't be better used for troops, economical development, . . . ? Spending less than the best income without debt means that you may get Prestige VPs but they are not guaranteed either.

The good cases is when the worst income with debt is roughly equal (or larger) to the best income without debt. Spending that amount of money means that the worse that can happen is to take a new loan (that can be handled later) and that you won't waste too much money on Prestige. Note that you have to plan your administrative actions and loan refund before the military phase, thus without knowing precisely how long the turn will last and how much you'll spend for moving troops (especially if at war). Thus, there is often some risk involved. . .

Remember that the economical system works best if you have some loan that you refund and recontract immediately (for a net effect of transferring Prestige income into the RT). If you plan to use this loan trick, then the amount of loan involved is not really a debt, that is increase you income without debt by this amount when planning your expenses.

Remember that the worse that can happen is a RT collapse. But even for that you need several turns of bad luck, bad management, or bad wars. Thus, don't be afraid of making too big errors with the economical system. You should get the hand of it before catastrophic results occur. . .

Note also that the malus to the Exchequer test if for loans still going on during the test. Thus, if you have 299 ₮ of national loan at the start of the turn, and refund 100 ₮ of them during the administrative phase, you're left with 199 ₮ of loan before the test, thus only a **-1** malus (because that's not two “full 100 ₮”). Sometimes, it is better to refund a bit more than what you'd naturally do because avoiding a **-1** DRM can be an extremely good idea.

**Example:** If your Stability is +2 and you are at peace (+2 to Exchequer test), then you'll likely to get  $\frac{1}{2}\star$ , S or  $S\star$  (with only 10% chance of  $\frac{1}{2}$ ).  $\frac{1}{2}\star$  has 100% income with debt while  $S\star$  has 100% income without debt. Thus, by spending as much as your Gross income, you're almost guaranteed to be able to cover your expenses, maybe with some new loans. There is a small risk (10%) of a bad result ( $\frac{1}{2}$ ) that will leave you with only 80% income. Estimate the risk versus gain for the last 20% of expenses. On the other hand, a good result gives you up to 120% with debt, hence some choice on whether to contract loan in order to get more Prestige.

If your Stability is -2 and you roll at **-3** due to heavy loans or previous bankruptcies, then the likely result are  $F\star$ , F or  $\frac{1}{2}$  (disregarding the unlikely  $\frac{1}{2}\star$ ). If you are at war, the income with debt for  $F\star$  is 80%, and the income with debt of  $\frac{1}{2}$  is 90%. Thus by spending around 80% of your Gross Income, you're sure to be able to fill your budget with some loan. But you're also sure to need some new loan. . . (and a good surprise may arise in the form of  $\frac{1}{2}\star$ ).

Note that the true difference in the table is between  $\frac{1}{2}$  (only 50/80% of the total) and  $\frac{1}{2}\star$  (70/100%). Especially, being at peace with a Stability of +3 guarantees a good result.

## X.4.2 Loan Management

**A** Players must then correctly take care of their loans for the next turn.

### B International loans

*B.1* Since the interests are not changed by partial refund of the capital, management of the international loans is entirely done during the administrative phase (when bankrupting or refunding) and the budget segment (for new loans).

### C National loans

*C.1* Compute in line **C10** (National loans at end) of *ERS* the difference between line **C5** of *ERS*, minus line **C7** of *ERS*, minus line **C8** of *ERS* and add line **C9** of *ERS*.

*C.2* Report this number in line **C5** of *ERS* of the next turn.

## X.4.3 Prestige and Wealth

**A Wealth** During each period, a global wealth is computed for each country. Wealth represent the overall economical situation of the country, as well as exceptionally good management (in the form of Prestige).

*A.1* At the end of each period, wealth is converted into VPs. Each country has a different rate of exchange of wealth for VPs as each country has different typical economical situation.

*A.2* All in all, each country is expected to score around 100VPs for wealth each period, give or take a few dozens if this is supposed to be a period of glory or decay.

**B Prestige** Write in line **A26** (Prestige VPs) of *ERS* the difference between line **A16** (Prestige income) of *ERS* minus line **A21** (from Prestige) of *ERS*. That is the remaining Prestige income that was not spend for covering daily expenses.

**C Wealth** Turn wealth is the sum of the Gross income and the Prestige VPs. Period wealth is the sum of all turn wealth over all the period.

*C.1* Write in line **A27** (Wealth) of *ERS* the sum of line **A14** of *ERS* and line **A26** of *ERS*.

*C.2* Write in line **A28** (Period wealth) of *ERS* the sum of line **A28** of *ERS* of the previous turn and line **A27** of *ERS* of the current turn.

*C.3* Exception: If this is the first turn of a period, simply copy line **A27** of *ERS* into Period wealth. That is, period wealth is reseted at each period.

## X.5 Stability Improvement

**A Stability** A country may attempt to improve its Stability, but this is never mandatory. As many actions, Stability improvement requires an investment and is resolved by a die roll. Beware that in some situations the result may be negative and cannot be forfeited once the die has been rolled.

*A.1* Countries whose monarch was just overthrown due to revolts (see section IX.4.6 (Execution of the Monarch)) may not do a Stability improvement action this turn.

**B Investment** Each player wanting to improve the Stability of his country first chooses an investment and writes its cost in line **A29** (Stability improvement) of *ERS*. As for administrative actions, higher investments give bonuses to the roll.

*B.1* The investment are:

Basic Investment: 30 ₮

Medium (+2 to the die-roll): 50 ₮

Strong (+5 to the die-roll): 100 ₮

**C Procedure** This action is resolved without requiring a table. The player rolls a die modified as follows (all modifiers are cumulative):

+? ADM monarch.

+2/5 if medium/strong investment.

+2 if the country was victim of a declaration of war this turn without having broken an alliance or declared a war itself.

-3 if the country is at war with at least one major country (including overseas wars but excluding interventions).

-2 if the country is at war with at least one minor country and no major country (including overseas wars but excluding interventions).

-5 if an enemy **A** counter is in an owned national province and controls the city (not applicable during a Religious/Civil War, do not count revolt and rebel troops).

-3 Exception: for HIS, the malus for having an enemy **A** counter controlling the city, is -3 only, however it applies for any owned territory (not only its national territory). This specificity ends with event IV-2 (1) (Olivares) (if effects are applied), or with event V-4 (The War of Spanish Succession) (whatever the choices and outcomes).

+3 for a Prosperous Power (see below).

-3 for an Anti-Prosperous Power (see below).

±? by event.

**Design note: Spanish empire** The early Spanish empire was more of a multicultural empire including both Spain, Italy and the Netherlands than a modern country. Hence, occupying any part of the empire will hurt some people (and hamper Stability). There is no real notion of national territory to defend at all cost opposed to more distant vassals and "colony". However, only part of the empire is shocked by the war, thus the malus is smaller. Olivares policies recentred the empire on Spain, making it more like other European powers of the time.

**D Result** If the modified result is equal to:

5- the Stability **decreases** by 1.

6-10 Nothing changes.

11-14 the Stability increases by 1.

15-17 the Stability increases by 2.

18+ the Stability increases by 3.

*D.1* Reminder: Stability varies from -3 to +3. It is not possible to decline the result (especially the loss of Stability) once the die has been rolled.

*D.2* Stability is recorded on the Stability track on the ROTW map. Move the Stability marker according to the result of the action.

**E Prosperity** tracks the evolution of the Gross income (as recorded in line **A14** of *ERS*). A regular increase of the Gross income will make people happy and ease Stability improvement, a regular decrease will make people unhappy.

*E.1 Prosperous Power* A country is *Prosperous* if its Gross income has not decreased during the last 2 consecutive turns and increased during at least one of those turns.

*E.2 Anti-Prosperous Power:* A country is *Anti-Prosperous* if its Gross Income has decreased 2 consecutive turns.

**Example: Prosperity.—** If the Gross income for the last two turns and the current one are:

• 100, 110, 120: the country is prosperous.

• 100, 100, 101: the country is prosperous (no decrease, at least one increase).

• 100, 110, 109: nothing (one decrease prevents prosperity even if the final result is higher than two turns earlier)

• 100, 99, 98: the country is anti-prosperous.

• 100, 99, 99: nothing (one stagnation prevents anti-prosperity).

# Peaces

## Chapter XI

### XI.1 Overview of the phase

**A Peace** Wars can be ended only by a Peace. There are several types of Peace, from the white peace (return to statu quo) to the unconditional surrender. The type depends mostly on the difference between the Stability of the belligerents, slightly modified by the military situation. In some cases, countries must propose peace to their opponents, but usually some discussion occurs between the players.

**B Crusade** In the early game, if TUR conquers too many Christian provinces, the pope may try to launch a Crusade.

#### C Sequence.

- C.1 Ransoms (XI.2)
- C.2 Peace offers and discussions (XI.3)
- C.3 Stability adjustment (XI.4)
- C.4 Inflation (XI.5)
- C.5 Test for crusade (XI.6)

### XI.2 Ransoms

**A Majors** If a MAJ has its monarch (or Swedish heir) captured (due to battle), it **must** pay a ransom. The monarch is immediately liberated.

- A.1 The ransomed country loses 2 Stability and pay 200 ₮ to the ransoming country.
- A.2 If the monarch was captured by a minor country, the money is lost (it is payed but nobody gains it).
- A.3 It is not possible to avoid ransom in any way. No keeping prisoners, no execution, . . . even if both the ransoming and ransomed players agree.
- A.4 Thus, ransom may cause a later bankrupt or an immediate mandatory peace. Do not risk your monarch if you cannot afford the price.

**B Minors** If a MIN has its monarch captured by a major country, he **must** be ransomed.

- B.1 The major holding the prisoners chooses one (and only one) ransom among:

50 ₮.

OR +2 to a peace proposal.

OR possibility to do a separate peace proposal.

- B.2 If a minor monarch is captured by another minor country, he is automatically ransomed for free (some money transfer between minors, not represented).

**C** Money gained or lost due to ransoms is written in line **A30** (Ransom, peace) of *ERS*.

#### D The return of the king

- D.1 Ransomed monarchs will be available again during the next Interphase.
- D.2 Especially, Ransomed major monarchs may not use their values for the rest of the Peace phase.

### XI.3 Peace offers and discussions

#### XI.3.1 Signing Peaces

Countries at war (either major or minor) may sign peaces. Peaces are usually done between two alliances and not between single countries (each alliance may contain one or more country). Separate peaces are possible but usually harder. Peace between major countries (and their minor allies) are the result of an agreement between players. However, the Stability of the countries and the military situation creates a *Peace Differential* and strongly constrains the peace. This represents the overall opinion of the countries toward the current war and prevents players from signing unrealistic peaces. Peaces when one side only consist in minor countries (most of the time, a single one) are resolved by a die roll depending mostly on the military situation.

##### XI.3.1.1 Regular cases

**A Global peace** If two alliances are at war, they may sign a global peace between them.

**B Separate peace between majors** If two alliances are at war, some powers may sign peace with the whole enemy alliance.

B.1 Powers signing separate peaces are considered as breaking their alliance (loosing 2 Stability and giving a CB to former allies as per §G (Defensive Alliance) of section IV.2.1.3 (Alliances)).

B.2 If several members of the same alliance want to sign a separate peace with the same enemy alliance at a given turn, they must sign one single separate peace.

B.3 Note that this also prevent signing a separate peace with one member of the alliance and, at the same turn, a global peace with the rest of the alliance. All members of the alliance who want to sign peace (in this case, everybody) must do so together.

**C Minor allies** usually sign peace when their diplomatic patron does.

C.1 However, the diplomatic patron may choose to do a separate peace without some of its minor allies. In this case, the major loses 2 Stability for the separate peace and the diplomatic control of the minors staying at war.

**Example: Separate peace.—** *TUR is at war against VEN, HIS (and AUS) and POL. After an incursion in Hungary, Veneto itself is threatened, thus VEN would like to sign peace before it's too late. On the East side, RUS is massing troops along the Polish frontier and POL would also like to get out of here in order to defend its border. On the other hand, HIS and AUS have not suffered much and want to stay at war.*

*TUR may choose to accept the separate peace either with VEN alone, or with POL alone, or with both VEN and POL together (treating this as a peace with an alliance). In any case, the powers signing the peace (VEN or POL) are breaking their alliance with allies staying at war (HIS) and thus lose 2 Stability and give a CB to these allies for the next turn.*

*Any minor allies of VEN or POL (signing the peace) is also included in the peace. Minors allies of TUR are also part of the peace.*

**Design note:** It is not possible to sign several separate peace (in one war) in a single turn, and it is not possible to sign both separate and global peace on the same turn, in order to limit the number of peace conditions that may be exchanged each turn.

**D Proposing separate peace with minor** An alliance may propose separate peace with minor allies of an opposing alliance at the following conditions:

D.1 An alliance may propose a separate peace to any minor in VA or AN of one enemy if the alliance controls the capital of the minor.

D.2 An alliance may propose a separate peace to any minor in VA or AN of one enemy if the minor controls the capital of one major of the alliance. In this case, it must be a winning peace (level 1 or more) in favour of the minor.

<p>[R]218</p> <p>Peace offers and discussions</p> <p>D.3 An alliance may propose a separate peace to any minor of one enemy if it has captured the monarch of the minor and chooses to ransom it for a separate peace.</p> <p>D.4 An alliance may propose a separate peace to any minor <b>not</b> in VA or AN of one enemy if it controls any province of the minor.</p> <p>D.5 An alliance may propose a separate peace to any minor <b>not</b> in VA or AN of one enemy if the minor controls any province of one major of the alliance. In this case, it must be a winning peace (level 1 or more) in favour of the minor.</p> <p>D.6 In addition, each alliance may propose a separate peace to one and only one minor ally of each opposing alliance, <b>not</b> in VA or AN.</p> <p><b>E Signing separate peace with minors</b></p> <p>E.1 As all peaces with minors, separate peaces with minors are resolved by a die roll.</p> <p>E.2 Contrarily to separate peaces with majors, each separate peace with minors is resolved independently.</p> <p>E.3 However, it is not possible to sign a separate peace at the same turn as the global peace.</p> <p><i><b>Example: Separate peaces with minors.—</b> TUR, allied to MAURETANIA and TRIPOLIS, with VA ALGERIA and TUNESIA is at war against HIS, allied to VENETIA with VA ORDO HOSPITALIS. HIS controls <b>Jebel Tubqāl</b> (in MAURETANIA), <b>Oran</b> (in ALGERIA) and <b>Ifriqiya</b> (capital of TUNESIA). TUR does not control any Christian provinces.</i></p> <p><i>TUR may not propose peace to ORDO HOSPITALIS as it is a VA. It may propose peace to VENETIA.</i></p> <p><i>HIS may propose peace to MAURETANIA because it controls one of its provinces. HIS may propose a peace to TUNESIA, even through it is a VA, because it controls its capital. HIS may not propose peace to ALGERIA because it is a VA and even if it controls one province, it does not controls the capital. It may, in addition, propose peace to TRIPOLIS as each alliance is always entitled to one separate peace with one enemy minor at no condition.</i></p> <p><i>Thus, HIS may propose up to three separate peaces with minors. If it does, each of these peaces is resolved separately.</i></p> <p><b>XI.3.1.2 Mandatory peaces</b></p> <p><b>A Mandatory peaces between majors</b> It is usually not mandatory to sign a peace, however:</p> <p>A.1 If a country is at -3 Stability for two consecutive turns at the beginning of the peace offer segment, it must <b>propose</b> a peace to each alliance (containing at least one major) against which it was at war during these two turns. Note that the check happens <b>after</b> Stability improvement, thus mandatory peace usually occur because of a failed improvement (or a ransom).</p> <p>A.2 Exception: RUS, before its military reform, is only forced to propose peace if it is at -3 Stability for 3 consecutive turns.</p> <p>A.3 The opposing alliance is not forced to accept the peace. If the peace is refused, there is no penalty.</p> <p>A.4 Exception: if the level of the proposed peace (see below) is 4 or 5 in favour of the enemy, then the enemy is forced to accept it (this is basically an unconditional surrender). In this case (only), the winning alliance chooses the nature of the conditions for the peace.</p> <p>A.5 If two powers at war against one another must both propose a mandatory peace, then the peace must be signed.</p> <p>A.6 The peace proposal is made based on the <i>Peace Differential</i> as any regular peace. That is, the country is forced to proposed a peace but the other regular rules for peaces are still enforced. This is not necessarily a surrender, and in some cases it is even possible to be forced to proposed a winning peace. . .</p> <p><b>B Mandatory peace and alliances</b></p> <p>B.1 Since this condition is checked for each country (and not for each alliance), it may be a separate peace proposal (with only some members of the alliance forced to propose peace).</p> <p>B.2 If several members of the same alliance must propose a mandatory peace, they must propose it together (as usual with separate peaces).</p> <p>B.3 If a power is forced to propose a peace and that peace is accepted, that power is not considered to have broken alliance.</p> <p>B.4 Especially, this does not give a CB to its former allies.</p>	<p>Peaces— master – 2016-04-14</p> <p>[R]219</p> <p><b>C Mandatory peaces and global peaces</b> Note that if a global peace is signed, no separate peace may be signed first. Thus, mandatory peace proposals only happen if the global peace is not signed.</p> <p><b>D Mandatory peaces with minors</b></p> <p>D.1 If all provinces of a minor are controlled by enemies (not necessarily the same alliance), then the minor automatically signs a mandatory unconditional surrender (peace of level 5) with all its enemies together. That is, this is one global peace and not one surrender against each enemy.</p> <p>D.2 It is not possible to refuse that peace. In case of disagreement between the winners, they are considered allied for the resolution of the peace only.</p> <p>D.3 If the minor was at war allied to a major, it immediately goes to Neutral before resolving the peace (the minor consider that its patron should have protected it).</p> <p>D.4 If an alliance of minors is at war with no major ally, it automatically accepts an unconditional surrender (peace of level 5) in its favour if any enemy proposes it. See §G (Automatic peaces) of section XI.3.6 (Peace with Minor powers) for more on this.</p> <p><b>XI.3.1.3 Other specific cases</b></p> <p><b>A Tri-partite wars</b></p> <p>A.1 If three (or more) alliances are at war against one another, each peace signed is only signed between two alliances. The others stay at war.</p> <p>A.2 It is of course possible that all alliances at war decide to sign peace at the same moment.</p> <p><b>B Events and peaces</b> Many events create wars with specific conditions with regard to peace, including:</p> <p>B.1 Specific way to end a war, that is, specific conditions enforcing mandatory peaces.</p> <p>B.2 Specific peace conditions that may be taken, in addition to the regular one (described below).</p> <p>B.3 Specific peace proposal that will automatically be accepted by some minor countries.</p> <p><b>C Disagreements</b></p> <p>C.1 If members of an alliance do not agree toward signing a peace, all decisions concerning the proposal and acceptation of the peace are taken by the country whose monarch has the higher DIP (resolve ties at random) among those (of that alliance) involved in the proposal (that is, you have nothing to say about a separate peace made by your ally, except threatening it of later reprisals, but threats have no in-game effect).</p> <p>C.2 Note that effectively, the monarch with higher DIP takes all the decisions alone and is in no way forced to listen to his allies (however, do not complain that nobody wants you as an ally if you keep ignoring them).</p> <p>C.3 Only countries that are fully at war are considered. That is, countries in limited or foreign intervention may not impose their will to their allies and have a purely consultative say in the peace discussion.</p> <p><i><b>Example: Disagreements.—</b> FRA and HIS are at war against HOL and ANG. FRA and HOL both have higher DIP than their ally.</i></p> <ul style="list-style-type: none"> <li><i>• If HOL wants to sign a global peace (e.g. because <del>Amsterdam</del> is besieged) while ANG wants to stay at war (because it think situation in the ROTW will become better), HOL may impose its decision to ANG and sign the peace. HOL may also, obviously, decide to sign a separate peace.</i></li> <li><i>• If HOL proposes a separate peace that FRA wants to accept but HIS would like to refuse, FRA may impose its decision.</i></li> <li><i>• If ANG wants to sign a separate peace, HOL has nothing to say about it and may not force it to stay at war.</i></li> </ul> <p><b>D Timing for the insanes</b> Separate peaces between two alliances are considered simultaneous. Especially, a power signing a separate peace with an enemy alliance is still allowed to discuss any separate peace proposal from this alliance. Peace agreement may be global (as in "I sign this separate peace only is this one is only signed"). Remember that in case of disagreement, the countries stay at war and that's all.</p>
---	---

<div data-bbox="114 90 1113 126"> <div>[R]220</div> <div>Peace offers and discussions</div> </div> <div data-bbox="114 172 1113 371"> <p><b>D.1</b> Precise peace timing:</p> <ol style="list-style-type: none"> <li>Global peace proposals and discussions between majors. All proposals and agreement are simultaneous and it is not possible to wait for a peace before signing another.</li> <li>Separate peace proposals and discussions between majors, including mandatory separate peaces. All proposals and agreements are simultaneous.</li> <li>Peace with minors, including separate peaces with minor allies. All proposals are simultaneous before any die is rolled.</li> </ol> </div> <div data-bbox="114 379 1113 568"> <p><b>Example: Continued.—</b></p> <ul style="list-style-type: none"> <li>If both HOL and HIS want to sign a separate peace with their enemies, that FRA and HIS are ready to accept the Dutch peace but ANG would like to stay at war against HIS, then HOL is still part of the peace discussion and may force ANG to accept the Spanish peace at the same time that it itself sign peace with FRA.</li> <li>In the same situation, HIS may decide that its separate peace is valid if and only if the Dutch peace is accepted. Typically if ANG and HOL try to buy HIS out of the war by offering it an advantageous peace, HIS may link it to the peace with HOL in order to avoid leaving FRA alone against two enemies.</li> </ul> </div> <div data-bbox="114 584 1113 874"> <p><b>E Cultural agreement</b></p> <p><b>E.1</b> Peace agreements may include promises for future actions or agreements on future Diplomatic phases.</p> <p><b>E.2</b> It is, however, not possible to immediately sign any agreement (loan, dynastic alliance, military alliance, . . . ) Hence, it is always possible to “forget” about these between the signature of the peace and the next Diplomatic phase. Again, do not complain that nobody loves you if you keep forgetting your agreements (Europa Universalis is a long term game and treason is often a bad strategy).</p> <p><b>E.3</b> Such promises do not have to be publicly announced and may be kept secret between players (even from allies). Thus, they are often jokingly referred as “cultural agreements” as they have no in-game effect (only a promise between players). Players sometimes get out of a secret discussion announcing they are signing peace with “transfer of one province and some cultural agreements” . . .</p> </div> <div data-bbox="114 882 1113 1265"> <p><b>Playing tip: Peace discussions</b> Peace discussions may last for a long time, especially for big wars including many countries. It is advised to try and minimise the time involved for peace discussions and keep the negotiations for the Diplomatic phase. However, evaluation of the new situation is required and some complex transactions are not uncommon (nor unrealistic given what historically happened during the time frame of the game). Discussions should be kept focused on the current peace and not diverge toward long term agreements (these are best suited for the Diplomatic phase).</p> <p>Players may isolate themselves from other players in order to discuss peaces. Either allies wanting to prepare a common proposal or enemies wanting to discuss secret clauses without third party players interfering in the discussion. Private discussions do not need to include all members of a given alliance. . . As a rule of thumb, peace discussions between enemies is faster if there are no other players listening and commenting the proposals, trying to influence it. However, do not hesitate to ask advice from other players to check if some proposal is as balanced as it seems. Especially, inexperienced players may have hard time to grasp all the consequences of some agreement and may want to consult an experimented neutral player. . .</p> </div> <div data-bbox="114 1289 1113 1337"> <p><b>XI.3.2 Interventions</b></p> </div> <div data-bbox="114 1345 1113 1511"> <p><b>A</b> Countries in limited or foreign intervention in a war that goes on may choose to either continue the intervention or withdraw.</p> <p><b>A.1</b> The choice is made for each intervention separately. In case of disagreement, each country in decreasing order of initiative indicates for each intervention whether it stays or withdraws.</p> <p><b>A.2</b> The choice is made by the country doing the intervention. Not by the leader of the alliance as for signing global peaces.</p> </div>	<div data-bbox="1126 90 2121 126"> <div>Peaces— master – 2016-04-14</div> <div>[R]221</div> </div> <div data-bbox="1126 172 2121 292"> <p><b>B</b> Continuing a limited intervention will cost some Stability. Continuing a foreign intervention costs nothing but prevent reinforcing the stack. See section XI.4 (Stability adjustment).</p> <p><b>B.1</b> Withdrawing require evacuation of the intervening units as per §D (Peace Evacuation) of section XI.3.7 (General Consequences of the Peace).</p> </div> <div data-bbox="1126 308 2121 355"> <p><b>XI.3.3 Peace differential</b></p> </div> <div data-bbox="1126 363 2121 515"> <p><b>A The Peace Differential</b> is an abstract way of determining the winner of any war between majors. It is mostly based on the Stability of the countries involved, representing the people support for the war, slightly modified by the military situation.</p> <p><b>A.1</b> In case of separate peace, the <i>Peace Differential</i> is computed only between the countries involved in the proposal.</p> <p><b>A.2</b> <i>Peace Differential</i> strongly constrains the possibility of peace.</p> </div> <div data-bbox="1126 531 2121 651"> <p><b>B The basic Peace Differential</b> is the difference between the Stability of the enemies.</p> <p><b>B.1</b> In case of alliance, take the mean Stability of all members of the alliance. Do not round numbers at this point.</p> <p><b>B.2</b> Note that the basic PD is symmetrical, that is if an alliance has a basic PD of +1.5 versus another alliance, then the second alliance has a basic PD of -1.5 versus the first.</p> </div> <div data-bbox="1126 667 2121 962"> <p><b>C The modified Peace Differential</b> is obtained from the basic PD by checking the military situation.</p> <p><b>C.1</b> The alliance that controls more enemies provinces adds (and the other subtracts) to its basic PD:</p> <ul style="list-style-type: none"> <li>+1 if it controls 2 or 3 more provinces.</li> <li>+2 if it controls 4 or 5 more provinces.</li> <li>+3 if it controls at least 6 more provinces.</li> </ul> <p><b>C.2</b> Count capitals as 2 provinces.</p> <p><b>C.3</b> Do count provinces of minor allies (or provinces controlled by minor allies) together with those of its diplomatic patron.</p> <p><b>C.4</b> Count COL and TP as ½ province. Exception: COL of level 6 are considered as European provinces and count as a full province.</p> </div> <div data-bbox="1126 970 2121 1090"> <p><b>Example: Modified Peace Differential.—</b> <i>RUS is at war against allied TUR and SUE. The Stability are 1 for RUS, 0 for SUE and 1 for TUR. Thus, the basic PD is 0.5 (1 - (1+0)/2) in favour of RUS.</i></p> <p><i>RUS occupy Swedish Ingermanland and Karelen but TUR occupy both Astragan and Terek (annexed by RUS a long time ago). Both side thus controls as many enemy provinces and the PD is not modified.</i></p> </div> <div data-bbox="1126 1106 2121 1249"> <p><b>Example: PD and separate peaces.—</b> <i>In the same situation, if RUS wants to sign a separate peace with SUE, then its basic PD is 1 (1-0, the Stability of TUR does not count). Since this peace is only with SUE, provinces controlled by TUR are not taken into account. RUS controls 2 more provinces than SUE, and the PD in its favour is increased by 1 to 2.</i></p> <p><i>On the other hand, if RUS wants to sign a separate peace with TUR, the basic PD is 0 (they both have 1 Stability) modified to -1 as TUR controls two more provinces.</i></p> </div> <div data-bbox="1126 1273 2121 1361"> <p><b>Example: PD and minors.—</b> <i>If CRIMEA was at war allied to TUR and RUS controls Crimée, this province has to be taken into account for modified peace differential in any peace that include TUR. Since it is a capital, it counts as 2 provinces. Thus, the modified PD of RUS against the alliance is now +1.5, and against TUR (in case of separate peace), 0.</i></p> </div> <div data-bbox="1126 1385 2121 1511"> <p><b>D Military situation in overseas war</b></p> <p><b>D.1</b> During overseas wars, count occupied COL and TP as one province each.</p> <p><b>D.2 Privateer effect</b> In addition, each TF ⊕ which was reduced to current level 0 or 1 counts as 1 province (2 in the country own CTZ).</p> </div>
--	---

<div data-bbox="114 90 1117 127"> <div>[R]222</div> <div>Peace offers and discussions</div> </div> <div data-bbox="114 172 1117 199"> <p>D.3 Do count all CTZ/STZ where TF have been reduced without remembering who caused the losses.</p> </div> <div data-bbox="114 212 1117 363"> <p><b>Design note: Privateer effect</b> is triggered even if the losses were caused by PIRATÆ or a third party IP (typically, one of Barbaresque countries (XIV.13.1.3)), which may seem illogical. However, IP are only a partial and abstract representation of the actual privateer activity. It is assumed that the real activity is more widespread, including in zones where no counter was sent. Moreover, the target country probably doesn't know for sure who attacked each of its merchants. Or doesn't make a real difference between pirates and enemy privateers. . .</p> </div> <div data-bbox="114 384 1117 523"> <p><b>Example: Privateer effect.</b>— FRA and ANG are entangled in a commercial war. A TF of ANG of level 6 in CTZ <b>ANGLIA</b> was reduced to current level 0 due to attacks by Bart. Another TF of level 4 in STZ <b>Amérique</b> was reduced to level 1 due to combined attack of a PIRATÆ IP and a French IP. A third TF of level 5 was reduced to level 1 in STZ <b>Golfe du Lion</b>. Meanwhile, ANG manages to take a COL of level 4 of FRA in <b>QUÉBEC</b> as well as a TP in <b>INDIA</b>. This counts as 4 provinces occupied by FRA and 2 by ANG, thus a +1 to PD in favour of FRA.</p> </div> <div data-bbox="114 544 1117 719"> <p><b>E The net Peace Differential</b> is obtained by rounding the modified PD to the nearest integer. In case of halves, round down in disfavour of the winning side (that is, round toward 0). Then cap to <b>+5</b> (and <b>−5</b>) if needed.</p> <p>E.1 Note that fractions in the PD may only come from the Stability difference. However, the military situation may change the winner, thus the direction of the final rounding.</p> <p>E.2 The net peace differential is also symmetrical. Thus, it is always sufficient to compute the PD from the point of view of one of the alliances.</p> </div> <div data-bbox="114 727 1117 1038"> <p><b>Example: Rounding PD.</b>— SUE, POL and TUR are at war against RUS. The Stability of RUS and SUE is 1, while the Stability of POL and TUR is 0. No side controls enemy provinces. Thus, the basic (and the modified) PD is <math>1 - (1+0+0)/3 = 2/3</math> in favour of RUS, rounded to +1 in favour of RUS.</p> <p>SUE and TUR are at war against RUS. The Stability of RUS is 0, the Stability of TUR is 1 and the Stability of SUE is 2. Thus, the basic PD is +1.5 in favour of the alliance (or -1.5 in "favour" of RUS). If the military situation does not modify this, it is rounded to +1 in favour of the alliance.</p> <p>SUE and TUR are at war against RUS. The Stability of RUS and TUR are 1 while the Stability of SUE is 0. Thus, the basic PD is +0.5 in favour of RUS. However, the alliance controls four Russian provinces while RUS controls no enemy province. Thus, the PD is modified by 2 in favour of the alliance, for a result of +1.5, rounded down to +1 in favour of the alliance. Note that if rounding had occurred before modification, the PD would have been rounded to 0 and then modified to +2 in favour of the alliance. Hence, it is important not to round at the wrong time.</p> </div> <div data-bbox="114 1062 1117 1102"> <h3> XI.3.4 The Peace levels </h3> </div> <div data-bbox="114 1115 1117 1203"> <p>The <i>peace level</i> represents in an abstract way the amount of "winning" the winner has. It varies between 0 (white peace) and 5 (unconditional surrender). The peace level is strongly constrained by the <i>Peace Differential</i>. In turn, the peace level indicate how many <i>conditions</i> the loser has to give to the winner.</p> </div> <div data-bbox="114 1214 1117 1246"> <h4> XI.3.4.1 Peace levels and conditions </h4> </div> <div data-bbox="114 1254 1117 1511"> <p><b>A Peaces that are permitted</b></p> <p>A.1 In any case, a <i>Conditional Peace</i> of level equal to the PD in favour of the dominant alliance is allowed.</p> <p>A.2 If the <i>Peace Differential</i> is at most +2 in favour of one alliance, a <i>Negotiated Peace</i> of level 0 (White Peace) or 1 is permitted in favour of any alliance (even the one with the lowest modified PD, that is the apparent loser).</p> <p>A.3 Exception: if a power if forced to proposed a Mandatory peace (as in section XI.3.1.2 (Mandatory peaces)), it must propose a Conditional Peace and may not propose a Negotiated one.</p> <p>A.4 If at least one Major member of an alliance has its capital (or both if it has two) and at least half of its other national provinces controlled by enemies (not necessarily allied), then a Conditional Peace of level 5 is allowed against that alliance.</p> </div>	<div data-bbox="1122 90 2121 127"> <div>Peaces— master – 2016-04-14</div> <div>[R]223</div> </div> <div data-bbox="1122 172 2121 228"> <p><b>B Peace conditions</b> The level of the peace determine both the number of conditions that the losing alliance must give to the winning one and some details on these conditions, as described below.</p> </div> <div data-bbox="1122 231 2121 344"> <p>B.1 Only countries that are fully at war may give or take peace conditions. That is, countries in limited or foreign intervention do not risk to lose anything at peace time, but they may not either have any gain. Obviously, there may be some promises to be fulfilled at a later Diplomatic phase, but as always promises are not binding.</p> <p>B.2 There are 4 types of conditions that may be given at peace:</p> </div> <div data-bbox="1122 347 2121 1034"> <p><b>Territorial concessions:</b> The losing alliance gives ownership of one province to the winning alliance.</p> <p>See section XI.3.5 (Transfers of Provinces by Peaces) to know which province may be annexed by who. The province may belong to any member of the losing alliance (including minor allies). The province can be given to any member of the winning alliance (including minor allies). The choice of the province is made either by the losing or winning alliance, depending on the level of the peace.</p> <p><b>Indemnities:</b> The losing alliance must give some money to the winning alliance. The money must come from the RT of one or more majors of the losing alliance (minor allies may not pay the indemnities) and can be given to one or more members of the winning alliance (minor allies may receive the indemnities). The amount is written in line <b>A30</b> of ERS of the concerned countries (negative for the losers, positive for the winners). If the losing alliance is composed solely of minor countries, they may pay indemnities.</p> <p>The losing alliance always choose who pay, while the winning alliance always choose who gets the money.</p> <p><b>Diplomatic concessions:</b> Either of the choice below. The precise choice is only decided when implementing the condition and is always made by the winning alliance. The minor involved must not necessarily be part of the war to be chosen (drastic changes of alliances and distant weddings were not uncommon). The minor involved may however not be at war elsewhere (it may be part of the just finishing war).</p> <ul style="list-style-type: none"> <li>• (Europe) The losing alliance must give diplomatic control of one of its European minor allies to the winning alliance. If the losing alliance is solely composed of minors, then the winning alliance may gain diplomatic control of one of them.</li> <li>• (ROTW) One ROTW minor breaks its diplomatic status with some member of the losing alliance and may increase its status with some member of the winning alliance.</li> </ul> <p><b>Special conditions:</b> Events and other specific rules sometimes create specific concessions that may (or must) be used as peace conditions for some wars. Sometimes, a minimum level of the peace is required in order to ask for this concession. Sometimes, a concession is automatically added to other peace conditions as soon as the peace reaches a certain level.</p> </div> <div data-bbox="1122 1038 2121 1126"> <p><b>C Terms of the peace</b> When a peace is agreed between majors, the terms must specify both the level of the peace and the nature of the conditions. For example, two countries may sign "a peace of level 3 with one territorial concession first and then one diplomatic concession".</p> </div> <div data-bbox="1122 1129 2121 1214"> <p>C.1 Once the peace is agreed, players may choose the precise conditions (which province to annex, who is going to pay the indemnities, . . . )</p> <p>C.2 The order of the concessions is important only in case of disagreement between players.</p> </div> <div data-bbox="1122 1222 2121 1511"> <p><b>D Deciding details</b> In each alliance, the country whose monarch has the higher DIP has all power to decide which peace to sign.</p> <p>D.1 However, for the precise choice of the conditions, the choice is made in decreasing order of DIP in each alliance. That is, the monarch with higher DIP chooses the first condition, the second one chooses the second, and so one (looping back to the monarch with higher DIP if needed).</p> <p>D.2 Not that choices are made sometime by the losing alliance and sometime by the winning one. The choice order is followed by each alliance separately.</p> <p>D.3 For Territorial concessions only, the alliance who choose depends on the level of the peace and the number of territorial concessions (only). That is, if the only territorial concession is the second condition of the peace, it is still the first territorial concession.</p> </div>
--	--

<div data-bbox="114 90 1117 159"> <div>[R]224</div> <div>Peace offers and discussions</div> </div> <div data-bbox="114 159 1117 558"> <p><b>Example: Disagreement.—</b> HIS and HOL are losing a war against FRA, allied to PORTUGALLIA. HOL has higher DIP than HIS. The peace differential is 4, so the only peace that may be signed is of level 4, hence three conditions. After some discussions, FRA and HOL agree on indemnities as first conditions and then two territorial concessions after that. Note that having lower DIP, HIS may take part in the discussion but in the end, the decision is made by HOL, however, if HOL wanted to stay at war, HIS could have signed a separate peace.</p> <p>Since HOL has the higher DIP, he choose how to implement the losing side of the first condition and decides that HIS is going to pay all the indemnities (they could have been split in any way between the losers). Being the only Major, FRA chooses who receive the money. Even if it could have given some to PORTUGALLIA, it prefers to keep all of it. . . (note that as part of the discussion, it could have been agreed that this money goes to PORTUGALLIA (and is lost) but this would have been only a verbal non binding agreement and in the end FRA decides who gets the money). Even if the first territorial concession is the second condition, it is the first territorial one, hence chosen by the winning alliance (for a peace of level 4). FRA chooses to annex a Spanish province. Lastly, the second territorial concession is implemented. It is chosen by the losing alliance. Since HOL already has its turn in choosing a condition (for the indemnities) and HIS did not has its, HIS chooses and decides to give a Dutch COL to PORTUGALLIA.</p> </div> <div data-bbox="114 558 1117 858"> <p><b>Playing tip:</b> Note that letting an unwilling ally support all the weight of the peace is probably not a good long term strategy if you still need allies for future wars. Usually, the precise implementation of the peace conditions is agreed upon between players before signing the peace. The precise order of choice is rarely needed.</p> <p>A lot of rules are written to handle disagreements because that's the special cases where we need how to resolve the situation for the rare cases where players really have divergent opinions. In most of the cases, the players go out of the negotiation room already knowing all the details of the peace, and the high DIP country discuss with its allies rather than imposing a peace.</p> <p>Especially, <i>Europa Universalis</i> is a (very) long term game. Backstabbing people during peace negotiation is probably not a good long term strategy. You may do it sometime when you really have a huge gain or a big opposing goal with someone, but be careful.</p> </div> <div data-bbox="114 858 1117 1401"> <p><b>E Disagreement</b> Any power in the winning alliance who is currently controlling at least one province of the losing alliance and does not receive a full peace condition may denounce the peace (receiving part of some indemnities is not enough to prevent a country from denouncing the peace).</p> <p><i>E.1</i> In this case, all the majors of the winning alliance that received at least one full peace condition immediately break their alliance with all the powers denouncing the peace.</p> <p><i>E.2</i> As usual, powers breaking alliance lose 2 Stability and give a CB to their former allies.</p> <p><i>E.3</i> Powers breaking alliance that way stay allied together. Powers denouncing the peace stay allied together.</p> <p><i>E.4</i> Powers that neither denounce the peace nor received a full peace condition must immediately chose either to denounce the peace or to accept it.</p> <p><i>E.5</i> If they accept the peace, they are breaking their alliance with the power denouncing it (and stay allied with the others), at usual cost.</p> <p><i>E.6</i> If they denounce the peace, they stay allied with the other powers denouncing it.</p> <p><i>E.7</i> Note that the powers breaking the alliance are the ones that did receive something (or stick with them), not the ones that choose to denounce the peace. That is, the powers denouncing the peace have been wronged and ask their former allies for compensations, and it is the refusal of giving such compensations (unrepresented in game) which causes the breaking of the alliance.</p> <p><i>E.8</i> Note also that denouncing the peace does not automatically create a war between the former allies. It only breaks the alliance and give a CB to some of them.</p> </div> <div data-bbox="114 1401 1117 1511"> <div data-bbox="114 1401 1117 1436"> <div>XI.3.4.2</div> <div>Description of peace levels</div> </div> <div data-bbox="114 1436 1117 1511"> <div>A Peace of level 0 (White peace)</div> <div>No conditions are given or taken.</div> <div>B Peace of level 1</div> <div>The winning alliance receives one peace condition.</div> </div> </div>	<div data-bbox="1117 90 2121 159"> <div>Peaces— master – 2016-04-14</div> <div>[R]225</div> </div> <div data-bbox="1117 159 2121 1511"> <p><i>B.1 Territorial concession</i> The province is selected by the losing alliance.</p> <p><i>B.2 Indemnities</i> The losing alliance gives 50 ₧ of war indemnities to the winning alliance.</p> <p><i>B.3 European Diplomatic concession</i> One European country, neither in VA nor AN, is removed from one loser's Diplomatic Track and placed back into the Neutral box. If the losing alliance is composed solely of MIN powers, the winning alliance may gain one of them in RM status.</p> <p><i>B.4 ROTW Diplomatic concession</i> One ROTW country breaks FR status with one member of the losing alliance. If the losing alliance is composed solely of MIN, then one of them is forced to sign a FR with one member of the winning alliance.</p> <p><b>C Peace of level 2</b> The winning alliance receives one peace condition.</p> <p><i>C.1 Territorial concession</i> The province is selected by the winning alliance.</p> <p><i>C.2 Indemnities</i> The losing alliance gives 75 ₧ of war indemnities to the winning alliance.</p> <p><i>C.3 European Diplomatic concession</i> One country (any status, excepted if blocked by other rules of events) is removed from one loser's Diplomatic Track and placed back into the Neutral box. If the losing alliance is composed solely of MIN powers, the winning alliance may gain one of them in RM status for one peace condition or in MA for two peace conditions.</p> <p><i>D.4 ROTW Diplomatic concession</i> One ROTW country either breaks AT with one member of the losing alliance or both breaks FR with one member of the losing alliance and signs FR with one member of the winning alliance. If the losing alliance is composed solely of MIN, then one of them is forced to sign a FR with one member of the winning alliance, or a AT for two conditions.</p> <p><b>E Peace of level 4</b> The winning alliance receives three peace conditions.</p> <p><i>E.1 Territorial concession</i> The first and third territorial concessions are chosen by the winning alliance. The second one is chosen by the losing, alliance.</p> <p><i>E.2 Indemnities</i> The losing alliance gives 100 ₧ of war indemnities to the winning alliance.</p> <p><i>E.3 European Diplomatic concession</i> One country (any status, excepted if blocked by other rules of events) is removed from one loser's Diplomatic Track and placed back into the Neutral box, or in RM status of one winner. If the losing alliance is composed solely of MIN powers, the winning alliance may gain one of them in RM status for one peace condition or in MA for two peace, or in either EW or VA (if this status is possible) for three peace conditions.</p> <p><i>E.4 ROTW Diplomatic concession</i> One ROTW country breaks any status (FR or AT) with one member of the losing alliance and signs FR with one member of the winning alliance. If the losing alliance is composed solely of MIN, then one of them is forced to sign a FR with one member of the winning alliance, or a AT for two conditions.</p> <p><b>F Peace of level 5 (Unconditional Peace)</b> The winning alliance receives three peace conditions.</p> </div>
--	--

<div>[R]226</div> <div>Peace offers and discussions</div> <p><i>F.1 Territorial concession</i> All provinces are chosen by the winning alliance.</p> <p><i>F.2 Indemnities</i> The losing alliance gives 150 ⚔ of war indemnities to the winning alliance.</p> <p><i>F.3 European Diplomatic concession</i> One country (any status, excepted if blocked by other rules of events) is removed from one loser's Diplomatic Track and placed back into the Neutral box, or in RM status of one winner. If the losing alliance is composed solely of MIN powers, the winning alliance may gain one of them in RM status for one peace condition or in MA for two peace, or in either EW or VA or AN (if these status are possible) for three peace conditions.</p> <p><i>F.4 ROTW Diplomatic concession</i> One ROTW country breaks status with one member of the losing alliance and signs FR with one member of the winning alliance. If the losing alliance is composed solely of MIN, then one of them is forced to sign a FR with one member of the winning alliance, or an AT for two conditions.</p> <p><b>G Indemnities</b> Note that the amount given for indemnities is the amount <i>per condition</i>. That is, if a peace of level 5 is signed with three indemnities as the three conditions, the total amount is <math>3 \times 150 = 450</math> ⚔!</p> <div><b>XI.3.5 Transfers of Provinces by Peaces</b></div> <p><b>A</b> If a peace includes territorial concessions, some provinces owned by the loosing alliance (including minors) immediately change ownership and now belong to one member of the winning alliance (possibly a minor).</p> <p><i>A.1</i> Not all powers may annex all provinces. If there is not enough provinces to annex in order to fulfil all the territorial concessions, the peace may not be signed under these terms. That is, some other conditions must be chosen rather than territorial ones.</p> <p><b>B Choice of Provinces</b> The provinces that may be annexed are:</p> <p><i>B.1</i> Capitals may never be annexed unless explicitly specified elsewhere.</p> <p><i>B.2</i> Any power may annex provinces it controls at the time of the peace.</p> <p><i>B.3</i> Any power may annex any of its national provinces, whoever controls it (even if still controlled by the enemy alliance).</p> <p><i>B.4</i> Any power may annex any province it previously owned during the game, whoever controls it (even if still controlled by the enemy alliance).</p> <p><i>B.5</i> Any power may annex any province with its blurred shield in it, whoever controls it (even if still controlled by the enemy alliance).</p> <p><i>B.6</i> Any power may annex a TP or COL (including of level 6) if it was controlled during some point of the war by any member of its alliance.</p> <p><i>B.7</i> Any power may annex a TP or COL (including of level 6) if it owned an establishment in the same <i>Area</i> at some point during the game.</p> <p><i>B.8</i> Exception: if a province, TP or COL is currently controlled by a third party power (not member of any of the alliances signing peace), it may only be annexed if the controlling power agrees. In that case, the controlling power must evacuate the province as per §D (Peace Evacuation) of section XI.3.7 (General Consequences of the Peace).</p> <p><b>C Priority</b> If any national province of the winning alliance is currently owned by any member of the losing alliance and controlled by a member of the winning alliance, it must be chosen as territorial concession (if the peace includes some territorial concession).</p> <p><i>C.1</i> If several exists, the choice is made by the power choosing how to implement the condition (§D (Deciding details) of section XI.3.4.1 (Peace levels and conditions)).</p> <p><i>C.2</i> Note that this priority does not prevent any other peace condition (indemnities, diplomatic concessions, . . . ) to be obtained at peace instead of territorial concessions.</p>	<div>Peaces— master – 2016-04-14</div> <div>[R]227</div> <p><i>C.3</i> Note that provinces with blurred shield are (usually) not national provinces and thus don't have priority.</p> <div> <p><b>Example:</b> <i>SUE and RUS are at war. SUE owns Ingermanland (a Russian national province) from a previous war. They decide to sign a peace of level 1 favouring RUS.</i></p> <ul style="list-style-type: none"> <li>• If RUS controls both <b>Ingermanland</b> and <b>Karelen</b>, and the belligerent agree on a territorial concession, then SUE must choose to give <b>Ingermanland</b> as occupied national provinces have priority.</li> <li>• Whether RUS controls <b>Ingermanland</b> or not, they may agree on Indemnities or a Diplomatic concession as the sole peace condition. The national province does not prevent other conditions but simply constrains territorial concessions.</li> <li>• If RUS controls <b>Karelen</b> but not <b>Ingermanland</b> and they agree on a territorial concession, SUE can choose to give either <b>Ingermanland</b> or <b>Karelen</b> to RUS. Non occupied national provinces are eligible as territorial concessions but have no priority.</li> <li>• If RUS does not control <b>Karelen</b>, then it cannot annex it at peace (whatever the level of the peace). Non-national provinces must be occupied to be annexed.</li> </ul> </div> <p><b>D Transfer of Colony or Trading Post</b></p> <p><i>D.1</i> One territorial concession (whatever the level of the peace) allows to annex two COL or TP if (i) both are controlled by the winning alliance at the end of the war and (ii) none of them is a COL of level 6.</p> <p><i>D.2</i> COL of level 6 or establishments that are not controlled at the end of the war are annexed for a full condition each.</p> <p><i>D.3</i> The two establishments may be annexed by different winners and from different losers.</p> <p><i>D.4</i> The power choosing how to implement the peace condition does chose both establishments and their new owners.</p> <p><b>E Overseas Wars</b> A peace treaty ending an Overseas War may not involved change of ownership of any province on the European map, <b>Islas Canarias</b> or <b>Cabo Verde</b>.</p> <p><i>E.1</i> Note that COL of level 6 may still be annexed and that the “two for one” rule above still applies.</p> <p><b>F Transfer of provinces of minor countries</b></p> <p><i>F.1</i> Minors signing peace at the same time as their Diplomatic patron are involved in the peace as any power and may thus cede or annex provinces.</p> <p><i>F.2</i> For this purpose, provinces with a non-blurred shield, as well as provinces formerly owned by the minor, count as “national provinces” of the minor (especially for the priority of annexation rule).</p> <p><i>F.3</i> Additionally, provinces of <b>BALKANS</b> are considered as national provinces of <b>VENETIA</b>.</p> <p><i>F.4</i> Provinces gained or lost by minors count as if gained or lost by their Diplomatic patrons for VPs.</p> <p><i>F.5</i> If the losing alliance chooses to give a province of a minor when it may have chosen a province of a major from the European map, this minor goes to Neutral after the peace is signed.</p> <div> <p><b>Design note:</b> The last case only occurs when the minor thinks that its patron “sold” its territory. Especially, it is not triggered if the annexed province is chosen by the winners (then the loosing alliance could not have done it better), nor if the priority of annexation forces the loser to give a province of the minor (e.g. the winner do not occupy other provinces, or the minor owns a national province of a winner, . . . )</p> </div> <div><b>XI.3.6 Peace with Minor powers</b></div> <p><b>A</b> Peaces with minor powers are handled by a die roll.</p> <p><b>B Global peace</b> An alliance at war against an alliance composed solely of minors (often a single major against a single minor) may propose peace to the whole alliance of minors.</p> <p><i>B.1</i> As usual, minors allied to majors in the proposing alliance are included in the peace treaty.</p> <p><b>C Separate peace</b> An alliance at war may propose a separate peace to some minors allied to an opposing alliance.</p> <p><i>C.1</i> Check §D (Proposing separate peace with minor) of section XI.3.1.1 (Regular cases) to see at which conditions an alliance may propose a separate peace to minor enemies (1 per alliance per turn + specific situations).</p>
---	--

<p>[R]228</p> <p>Peace offers and discussions</p> <p>C.2 Note that this include proposing separate peace to members of an alliance composed solely of minors.</p> <p>C.3 Contrary to separate peace with majors, each separate peace with minor is signed with a single minor. However, a war may not end the same turn one or more separate peace with minors involved in it is attempted.</p> <p><b>Example: Separate and global peace.—</b> At turn 7, FRA is at war against HIS and SABAUDIA. FRA is crushing SABAUDIA but is loosing on the Spanish side of the war. Thus, the global peace differential would only allow a white peace. However, FRA would like to sign a favourable separate peace with SABAUDIA in order to annex Bresse, even if this forces an unfavourable peace with HIS.</p> <p>If FRA attempts to sign a separate peace with SABAUDIA at turn 7, it may not, at the same turn, sign a global peace with HIS (whatever the result of the attempted peace with SABAUDIA). FRA may (attempt to) sign a peace with SABAUDIA at turn 7, stay at war and sign a global peace with HIS (and SABAUDIA if the separate peace failed) at turn 8. Obviously, there is a risk in doing so that HIS overruns FRA during this extra turn of war. . .</p> <p><b>D Disagreement</b> As usual in case of disagreement inside an alliance, any decision on which peace to (try to) sign is made by the country whose monarch has the higher DIP.</p> <p><b>E Method</b></p> <p>E.1 The alliance proposing peace choose the level of the peace, between -5 (unconditional peace favouring the proposing alliance) and +5 (unconditional peace favouring the target alliance) (that is, the level of the peace is seen from the minor's perspective) as well as the nature of the conditions.</p> <p>E.2 Unless this is a special case of automatic peace (see §G (Automatic peaces) of this section), the proposing alliance roll a die, modified as in §F (Peace modifiers) of this section.</p> <p>E.3 If the result is 6 or more, the peace is signed.</p> <p>E.4 If the result is less than 6, the peace is not signed and the countries stay at war.</p> <p>E.5 Note that Stability of the majors is not taken into account. The military situation, however, plays a huge role in the DRM.</p> <p><b>F Peace modifiers</b> The DRM to the peace roll are all cumulative.</p> <p>F.1 <i>Nature of the Peace</i> These modifiers take into account the level of the peace as well as the nature of the conditions given or taken.</p> <ul style="list-style-type: none"> <li>± 3 per level of the peace (positive if the target alliance wins the war, negative if the proposing alliance wins);</li> <li>+ ? per peace condition given to the target alliance (depending on the nature of the condition);</li> <li>- ? per peace condition taken from the target alliance (depending on the nature of the condition).</li> </ul> <p>F.2 The modifiers for the nature of the conditions are:</p> <ul style="list-style-type: none"> <li>+1 per territorial condition;</li> <li>-1 per indemnities;</li> <li>0 per diplomatic condition;</li> <li>± ? per specific condition (0 if not specified).</li> </ul> <p>F.3 <i>Nationality Modifier</i> is applied when signing peace with specific minors. In case of peace with an alliance of minors, apply the sum of the nationality modifiers of all the minors in the alliance.</p> <ul style="list-style-type: none"> <li>-4 peace with either PERSIA, ÆGYPTUS, SYRIA, CHINA or IAPONIA;</li> <li>-3 peace with either UNITED STATES, MOGOLIS IMP., VENETIA, POLONIA, HABSBURGUM or, after event IV-11 (The Great Elector Friedrich-Wilhelm of Prussia), BRANDENBURGUM;</li> <li>-2 peace with PORTUGALLIA or DANIA.</li> </ul> <p>F.4 <i>Modifiers for military Situation</i></p>	<p>Peaces— master – 2016-04-14</p> <p>[R]229</p> <ul style="list-style-type: none"> <li>+2 per province, TP⊕, COL or city in the ROTW owned by the target alliance and controlled by the proposing alliance;</li> <li>-2 per province, TP⊕, COL or city in the ROTW owned by the proposing alliance and controlled by the target alliance;</li> <li>+1.5 per TP⊖ owned by the target alliance and controlled by the proposing alliance;</li> <li>-1.5 per TP⊖ owned by the proposing alliance and controlled by the target alliance;</li> <li>+2 per capital province of the target alliance that was conquered at any point of the war (even if liberated since);</li> <li>-2 per capital province of the proposing alliance that was conquered at any point of the war (even if liberated since);</li> <li>-2 If at least one member of the target alliance is heretic toward at least one member of the proposing alliance (Catholic vs. Protestant, before the end of the <i>Religious Dissension</i>).</li> </ul> <p>F.5 <i>Modifiers for military action</i> These modifiers are only valid the turn they happen and are reseted at each turn.</p> <ul style="list-style-type: none"> <li>+2 per major battle won by the proposing alliance;</li> <li>-2 per major battle won by the target alliance;</li> <li>+1 per battle won by the proposing alliance;</li> <li>-1 per battle won by the target alliance;</li> <li>+1 per military leader of the target alliance (including Monarchs) killed or captured;</li> <li>+2 per Monarch of the target alliance captured and whose Ransom is used for Peace modifier;</li> <li>-1 per military leader of the proposing alliance killed or captured;</li> <li>+1 per siege won by the proposing alliance (+2 if this is a capital);</li> <li>-1 per siege won by the target alliance (-2 if this is a capital).</li> </ul> <p>F.6 <i>Separate peace</i></p> <ul style="list-style-type: none"> <li>-2 if it is an attempt to negotiate a separate peace;</li> <li>± ? the peace differential of the proposing alliance versus the alliance of the minor (maximum, -3/+3).</li> </ul> <p><b>G Automatic peaces</b></p> <p>G.1 If all provinces of a minor are controlled by enemies it automatically signs a mandatory unconditional surrender with all its enemies together. See §D (Mandatory peaces with minors) of section XI.3.1.2 (Mandatory peaces)</p> <p>G.2 If an alliance of minors is at war with no major ally, it automatically accepts an unconditional surrender (peace of level 5) in its favour if any enemy proposes it. In this case (only), the controllers of the minors select the nature of the conditions and must choose territorial or specific conditions if possible (and indemnities last), resolving disagreement as if they were allied. Note that it is still possible to attempt a regular peace of level +5 (favouring the minor) and rolling die.</p> <p>G.3 Minor countries always accept to sign a global White Peace in Overseas War. Note that the major may choose not to propose the peace and stay at war, or roll to try and get a winning peace.</p> <p><b>H Consequences of Peace</b></p> <p>H.1 The conditions of Peace are the same as for a Peace between Major powers.</p> <p>H.2 A Minor country will at most pay indemnities up to 4 times its income (total), immediately before the conclusion of the Peace (before changing ownership of provinces) but disregarding enemy control, <i>Revolt</i> or <i>Pillage</i>. Any other indemnities are void but are still a valid peace condition.</p> <p>H.3 The controller of the minor makes all decisions concerning peace if needed (normally, only the choice of annexed provinces, depending on the level of the peace and the number of territorial concessions). If the controller has to choose which provinces to annex, he must choose provinces adjacent to the minor's territory if possible.</p> <p>H.4 A minor country nevers takes Diplomatic concessions, only provinces, indemnities and special conditions. It may, however, give Diplomatic concessions.</p>
---	--

**Design note: Fair play** When making decision on behalf of a minor, players should always take the minor's interest into account. Neutral minors do have a controller only as a game artefact because it's impossible to play them otherwise. However, the controller should not take advantage of this to poorly play the minor, and especially not as an asset to be negotiated (*i.e.* "I choose to have the minor annex a province you don't need for your victory objectives if you give me 50  $\text{D}$ ." is definitely not the way this game is intended to be played. . . )

As much as possible, we tried to have neutral minors controlled by powers who should have interest in letting the minor do well (or at least no interest in having it do poorly). But this is not always the case due to circumstances. Don't abuse your position as controller of a minor's country. Play it for the best interest of the minor, not yours. Don't hesitate to ask advice to other players on the decisions the minor should make if you have doubts.

Minors who have a Diplomatic patron are another matter. They are basically part of one country's empire and more or less obey the orders. . .

**Example: Military situation.—** On turn 15, event III-4 (1) (Northern Seven Years War) erupts and DANIA attacks SUE. During turn 15, SUE wins two naval battles but loses one where its admiral is captured (in game, killed) and loses one land battle, while trying to invade **Skåne**. Meanwhile, the Swedish Northern army manages to take control of **Trøndelag**. Thus, the situation modifier is +2 (one province of the minor is occupied) while the action modifier is +2 (two battles won by SUE) -2 (two battles won by DANIA) -1 (one Swedish leader killed) +1 (one successful siege) = 0. Since there is a -2 nationality modifier for DANIA and an additional -2 due to the Danish claim on the Swedish crown (section XIV.7.2.1 (Relations with Dania)), the global modifier is -4. Not wanting to sign a white or losing peace, SUE decides to stay at war.

During turn 16, SUE wins three naval battles, killing the Danish admiral once and on land both win once. **Trøndelag** stays in Swedish hands and no other siege succeed but the Danish general Rantzau is nonetheless killed in an unsuccessful assault. Thus, the situation modifier is still +2. The action modifier, however, is now +4 (four Swedish victories) -1 (one Danish victory) +2 (two Danish leaders killed) = +5. Note that the actions of turn 15 are now forgotten and only what happened recently is taken into account. With the nationality modifier and the special modifier, this results in a +1 favouring SUE.

Being also involved in the Livonian war, SUE wants to sign peace. Being in a not too bad situation (especially with Rantzau dead), SUE wants to attempt a winning peace. Depending on the peace, the modifier will be:

- Peace of level +1 (Danish victory), giving indemnities (no province may be given as DANIA controls none): +1 (situation, action and nationality modifiers) + 3  $\times$  (+1) (level of the peace) + (-1) (giving indemnities) = +3 and will have 80% chances of success (3 or more).
- Peace of level 0 (back to status quo): +1 + 3  $\times$  0 = +1 (60% success).
- Peace of level -1 (Swedish victory), annexing a province (either **Trøndelag** or one of the three national provinces of SUE owned by DANIA): +1 + 3  $\times$  (-1) (level of the peace) - (+1) (taking one territorial concession) = -3 (only 20% success only, and the special modifier stays for future peaces).
- Peace of level -1, taking indemnities: +1 + 3  $\times$  (-1) - (-1) (taking indemnities) = -1 (40% success, but very little gain with only 50  $\text{D}$ .)
- Peace of level -1, asking DANIA to abandon claims on the crown (special peace condition provided by section XIV.7.2.1 (Relations with Dania)): +1 + 3  $\times$  (-1) - 0 (no modifier for this condition) = -2 (30% success and future peaces will be much easier). This was the historical result of the war (treaty of Stettin).
- Peace of level -2, asking heavier indemnities: +1 + 3  $\times$  (-2) - (-1) = -6 (impossible). In this not really decisive situation, it is simply impossible to ask for a peace of level 2.

**Example: Separate peace.—** At turn 7, FRA is at war against HIS and SABAUDIA. FRA controls **Savoia** (from a previous turn) and **Bresse** (from this turn) but HIS controls **Artois** (annexed earlier by FRA) and **Languedoc**. SABAUDIA was not involved in any battles (its last troops heroically defended **Nice** against a french siege). The Stability of FRA is +0 and the Stability of HIS is +1.

The Peace Differential between the alliances, seen from the French side, is -1 (Stability differential) not modified (FRA controls 3 provinces, the capital counting as two, but HIS controls 2, so there is only 1 extra province, not enough to modify the PD). HIS is not willing to sign an unfavourable negotiated peace (level 1 favouring FRA) and FRA also refuse the conditional peace of level 1 (favouring HIS). However FRA wants to try and get SABAUDIA out of the war in order to free its occupation troops and repulse the Spaniards. The situation modifier is +4 (two provinces occupied, the Spanish occupation does not count for a peace with SABAUDIA) +2 (capital was conquered) = +6. The action modifier is +1 (one siege) and there is a separate peace modifier of -2 (Separate peace) -1 (Peace differential versus the alliance of the minor) = -3. Thus, the global modifier is +4. FRA is almost guaranteed to have a white peace (90% success) and may even try to annex **Bresse** (50% success).

**Design note: Peace differential** If the minor is on the winning side of the war, it does not want to betray its allies to get out (or only with heavy spoils), thus the PD acts negatively in the peace roll. On the other hand, if the minor is on the loosing side of the war, it may want to try and cut its loses before being involved in a dramatic peace, thus the PD acts positively. Always take the PD as seen from the alliance proposing peace. Always consider the PD versus the whole alliance of the minor (not only its controller, this is **not** a separate peace with the controller).

**I Multiple and Separate Peace** If one or more major sign a separate peace with a minor country (and stay at war against the controlling country); this minor may not be again involved in a war against these majors next turn (unless by an event).

**Example: Nature of the peace.—** Proposing to a minor a peace of level -1 (the minor loses) with territorial concessions (*i.e.* annexing one province of the minor), creates a modifier of 3  $\times$  (-1) (level of the peace) - (+1) (territorial concession) = -4. With indemnities, the modifier would be -3 - (-1) = -2. Minors are more eager to sign peace giving money than territory (one needs to roll high to obtain peace).

Proposing a peace of level +3 (the minor wins) with two indemnities (for a total of 150  $\text{D}$ ) creates a modifier of 3  $\times$  (+3) (level of the peace) + (-1) + (-1) (two indemnities) = +7. With two territorial concessions, the modifier would be +9 + (+1) + (+1) = +11. It's easier to sign peace if you give territory than money.

<div>[R]232</div> <div>Peace offers and discussions</div> <div> <p><b>Example: Max indemnities.—</b> <i>FRA is at war against the lone LOTHARINGIA and controls Lorraine. Since it is the only province of the minor, it automatically accepts an unconditional surrender leaving FRA with three conditions to choose. Since its only province is a capital, FRA may not annex it. FRA choose to take 3 indemnities. Since it is a peace of level 5, each indemnity is worth 150 ⚡ for a total of 450 ⚡. However, the income of LOTHARINGIA is only 7 ⚡, thus the maximum indemnities it may pay is <math>7 \times 4 = 28</math> ⚡ total. The 422 other ⚡ are lost (but still represent a valid peace condition, that is FRA may sign the peace for 28 ⚡). Remark: in this situation, it would probably be wiser for FRA to ask for diplomatic concessions, representing in this case the long-term French occupation of LOTHARINGIA in the 16th and 17th centuries.</i></p> </div> <div> <h3> XI.3.7 General Consequences of the Peace </h3> </div> <div> <p><b>A</b> Peace brings the conflict opposing the belligerent countries to an end.</p> <p>A.1 Unless involved in another war, the countries are now considered at peace for all game purposes.</p> <p><b>B</b> <b>Resolving peaces</b> Peace conditions must be transferred immediately upon signing the peace.</p> <p>B.1 Provinces given as territorial concession change ownership. Mark with the correct ownership counters. If there is a fortress in the province, the new owner may immediately replace it with one of its fortress of the same or lower level or destroy it (special European arsenals may be replaced by a fortress of the same level or an European arsenal if one is allowed here).</p> <p>B.2 COL and TP given as territorial concessions also change ownership. Replace the counter by a counter of the same nature of the new owner. Level and exploited resources stay the same, update the corresponding record sheets. Any fortress or arsenal may be replaced by a counter of the same nature and same or lower level of the new owner (a fortress may also replace an arsenal, an arsenal may not replace a fortress), or destroyed.</p> <p>B.3 If the new owner does not have available counters, it may immediately destroy (or reduce levels of) existing ones as needed.</p> <p>B.4 If not enough fortress, COL or TP counters are available (COL and TP limit is usually smaller than counter mix), the owner may destroy one of its existing one. If not enough ownership counters are available, make new or use whatever mean you wish to denote ownership.</p> <p>B.5 Any minor given as diplomatic concession changes patron. Place its diplomatic counter at the right position on the diplomatic track.</p> <p>B.6 Indemnities must be payed immediately in full, even if this leads to a future bankrupt.</p> <p>B.7 Other specific conditions are also implemented immediately, marking any changes as possible.</p> <p><b>C</b> <b>Returning control</b> Remove any control markers of country signing peace that is located inside a country signing peace with it. Control of these provinces is returned to their rightful owner.</p> <p>C.1 Any fortress of a country signing peace located in a province owned by another country signing peace with it may be immediately replaced by a counter of the same or lower level of the owner, or destroyed. Owner of the province chooses.</p> <p>C.2 Exception: <i>Præsidios</i> are kept. They do not change ownership and are not removed.</p> <p><b>D</b> <b>Peace Evacuation</b> Any land unit in a not-owned province must evacuate unless the owner of the unit is either at war or intervention with (ally) or against (enemy) the owner of the province.</p> <p>D.1 Evacuating units must move to owned and controlled territory.</p> <p>D.2 Evacuating units may move through any country that was part of any just ended war with (ally) or against (enemy) them, including former enemies, regardless of the presence of any unit (even those that were not part of a just ended war, e.g. third party units involved in another war).</p> <p>D.3 Exception: they may not enter a province with an unbesieged enemy unit or fortress (from another war).</p> <p>D.4 Evacuating units may not, however, move through provinces of countries that were not part of the war.</p> <p>D.5 Evacuating units may move by sea, even if there is no fleet to transport them.</p> </div>	<div>Peaces— master – 2016-04-14</div> <div>[R]233</div> <div> <p>D.6 Evacuating units have unlimited movement capacity (<i>i.e.</i> they are not limited to 12MP). Evacuation is not necessarily done toward the closest province, however, evacuating units may not move more than 12MP if they can evacuate in 12MP or less.</p> <p>D.7 Evacuating units may not be intercepted.</p> <p>D.8 Evacuating units roll for attrition as usual, with a <b>−2</b> to the roll, and considering all provinces as friendly. Ignore any bad weather. Each set of 6MP expanded is one cause of attrition.</p> <p><b>E</b> <b>Evacuation at sea</b> Naval units of a country signing at least one peace may either evacuate to any owned and controlled port or stay at sea.</p> <p>E.1 If they return to port, they must roll for attrition with a bonus of <b>−2</b>.</p> <p>E.2 However, if they stay at sea, they do not need to roll for attrition.</p> <div> <p><b>Design note: Control and evacuation</b> Returning control and evacuating only happens between former belligerents (including allies). If a country is involved in another war, it does not have to return control and evacuate from this war (if it is still going on).</p> <p>When, evacuating, you must also evacuate from your ally, except if your are still together fighting in another war.</p> <p>If ending an intervention, you must also evacuate any unit that was part of the intervention.</p> <p>Land unit in non-controlled provinces of countries at war are handled by section IX.7 (Redeployment of land troops).</p> </div> <p><b>F</b> <b>Evacuation and redeployment</b> If any stack is out of supply after evacuation (this may happen because of separate peace), it may chose to also evacuate or stay where it is.</p> <p>F.1 If it evacuate, it does not get the <b>−2</b> to attrition roll. In addition it is considered to have entered at least one enemy province (the one where it starts its evacuation).</p> <p><b>G</b> <b>Memento</b></p> <p>G.1 At this point of the turn, land units should be either:</p> <ul style="list-style-type: none"> <li>In a controlled province.</li> <li>OR In a controlled <i>Præsidio</i>.</li> <li>OR Besieging a province where they could maintain siege.</li> <li>OR In a province controlled by a member of the same alliance, together at war (or intervention).</li> <li>OR Besieged in a fortress.</li> <li>OR In the ROTW, in a province without any establishment.</li> </ul> <p>G.2 Any other land unit must either have redeploy or evacuate [or I did overlook an obvious special case].</p> <div> <p><b>Example: Returning control and Evacuation.—</b> <i>FRA and HIS sign peace and are now fully at peace. After any change in ownership of provinces due to the treaty, FRA must give back control of any province owned by HIS it currently controls and reciprocally HIS must give back control of French provinces. Next, any French troop in Spanish province must evacuate to a French province. During evacuation, it may cross any French or Spanish province and ignore the presence of any other unit (stacking limit is still enforced at the end of evacuation). Similarly, Spanish troops must evacuate French territory.</i></p> <p><b>Example: Neutral provinces.—</b> <i>FRA and HOL sign peace and are now fully at peace. When evacuating Dutch provinces, French troops may not cross Spanish provinces (typically in the Spanish Netherlands) because HIS was not part of the just ended war.</i></p> <p><i>FRA is involved in two separate wars, one with HIS and the other with HOL. Both end the same turn. Now French unit evacuating Dutch territory may cross Spanish provinces (it would be too complicated and no that much realistic to try and track which troop was in which war).</i></p> </div> </div>
---	---

<div data-bbox="114 90 1117 127"> <div>[R]234</div> <div>Peace offers and discussions</div> </div> <div data-bbox="114 159 1117 1513"> <p><b>Example: Neutral and enemy troops.—</b> FRA is at war against HIS and HOL (separately) and HIS is also at war against HOL. FRA signs peace with HOL but stays at war against HIS. HIS stays at war against HOL and currently control or besiege several Dutch provinces. FRA must evacuate from Dutch territory as it is now at peace with HOL. FRA do not need to evacuate from Spanish territory as it is still at war against HIS. When evacuating from Dutch territory, French troops may not cross provinces owned by HIS (they are not part of a just ended war) nor Dutch provinces with Spanish control or siege (military presence of an ongoing enemy). If, on the other hand, FRA signs peace with both HIS and HOL, then its troops evacuating from Dutch territory may move through Spanish units (ignore any non-enemy unit). Even if FRA was not at war against HIS (but only against HOL), its evacuating troops may move through Dutch province controlled by Spanish troops.</p> <p><b>Example: Alliance.—</b> FRA is at war against allied HIS and HOL, they sign peace and are now fully at peace. HOL must not only evacuate from French provinces but also from Spanish ones (not-owned, not at war allied with). If the war goes on, however, Dutch troops may stay in Spanish or French provinces. Similarly, if HOL and HIS are still involved together in another war, Dutch troops in Spanish provinces should not be evacuated and must stay here (evacuation is not an option, if you don't need to evacuate, you may not evacuate). If ANG is in limited intervention allied to HIS and HOL and stops its intervention (either because the war ends or because it wants to do something else), then it must evacuate from the territory of FRA, HIS and HOL and must go back to England. If the intervention continues, however, the English stack may stay on the continent.</p> <p><b>H Pacification</b> Unless this is a Negotiated Peace, or a Conditional white peace: H.1 All existing CB at the time of the peace are negated for 1 turn, even permanent ones. H.2 Additionally, each loser is forbidden to declare war without CB against any victor next turn. H.3 For this purpose, all peaces of level 1 are considered Conditional peace if possible. Only the peaces that could not have been signed as Conditional peace are Negotiated peaces.</p> <div data-bbox="114 805 1117 885"> <p><b>Design note:</b> This effectively prevents the losers from attacking the winners next turn, unless an new CB appears, usually by event. The winners, however, may attack the losers but at high cost (no CB).</p> </div> <p><b>I Peace and Casus Belli</b> I.1 Any permanent CB whose cause does not exists any more is cancelled (e.g. return of the last national province, conversion of an heretic, . . . ) I.2 Unless this is a white peace, all temporary CB from all belligerents (not only the attacker) obtained before the end of the war are considered to have been used.</p> <div data-bbox="114 1029 1117 1133"> <p><b>Design note: Temporary CB</b> Most temporary CB are one time. In case of war, all of them are considered used, that is, the war is waged over all former causes of resentment not just over the single border dispute that made it erupt. Some temporary CB are multiple use (e.g. once per period). In this case, the war “uses” one of these.</p> </div> <p><b>J Peace and Stability</b> Any major country that both   was fully at war against at least another major country or was victim of a declaration of war by a minor (either by political event or R/D) during one of the previous turns ;   AND is now completely at peace (no intervention either) for the first time since these wars ; immediately gains 1 Stability. J.1 If the country is not completely at peace now, the Stability will be gained when it will be at peace, even if the last peace treaty should not be enough to gain it. J.2 This gain is limited to 1 Stability per country per turn, no matter how many peaces are signed.</p> <div data-bbox="114 1372 1117 1513"> <p><b>Example: Standard case.—</b> At turn 46, at the end of event V-4 (The War of Spanish Succession), FRA and HIS sign peace with ANG, HOL and AUS. AUS is still involved in a war in HUNGARIA against TUR. Since FRA, HIS, ANG and HOL are now fully at peace they each gain 1 Stability, and only 1, no matter how many enemies they signed peace with. AUS is prevented from gaining it by still being at war against TUR. At turn 47, AUS and TUR sign peace. They are now fully at peace and both gain 1 Stability.</p> </div> </div>	<div data-bbox="1120 90 2121 127"> <div>Peaces— master – 2016-04-14</div> <div>[R]235</div> </div> <div data-bbox="1120 159 2121 1513"> <p><b>Example: Peace with minors and Stability.—</b> At turn 5, TUR attacks SYRIA, a minor. If it signs peace at the end of turn 5, it does not gain Stability as this is a minor and TUR was the attacker. At turn 5, TUR attacks SYRIA. At turn 6, event II-5 (War between Persia and Turkey) happens early and PERSIA attacks TUR. At the end of turn 6, TUR manage to sign peace with PERSIA. Since it was victim of a declaration of war by a minor, it should gain Stability. However, it is still at war against SYRIA and may not gain it, but the fact that it got out of a “big” war is remembered. At turn 7, TUR signs peace with SYRIA. Since it is now completely at peace, it gains 1 Stability.</p> <p><b>Example: Separate peaces and Stability.—</b> At turn 10, TUR is at war against allied HIS and VEN. It signs a separate peace with VEN. Since it is a major country, it should gain 1 Stability but is prevented to do so by still being at war against HIS. VEN, however, is now fully at peace and gain 1 Stability (thus mitigating the 2 Stability loss of breaking an alliance for separate peace). At turn 8, TUR and HIS sign peace. TUR is now fully at peace and has two reasons to gain Stability: the former treaty with VEN and the current with HIS. However, the max gain is 1 per turn, so it gains only 1 Stability. Similarly, HIS is now fully at peace and gains 1 Stability.</p> <p><b>Example: Peace and interventions.—</b> At turn 28, POL is both at war against RUS and in foreign intervention in event IV-A (Thirty Years' War). It signs peace with RUS. Since it is a peace with a major, it should gain 1 Stability, but being in intervention prevents this. At turn 29, POL ends its intervention. At the end of the turn, since it is now fully at peace and was previously at war against a major, it gains 1 Stability.</p> <div data-bbox="1120 742 2121 821"> <p><b>Playing tip:</b> This Stability gain may only occur when a country becomes fully at peace. So most of the time you don't need to figure out whether you gain Stability or not. The question should only arise when becoming fully at peace.</p> </div> <div data-bbox="1120 885 2121 949"> <h2>XI.4 Stability adjustment</h2> </div> <div data-bbox="1120 989 2121 1045"> <h3>XI.4.1 Wars</h3> </div> <p><b>A</b> The Stability of each country that is not fully at peace (and some other cases) decreases.</p> <p><b>B Full war</b> B.1 Each country fully at war (either against a major or minor) loses as many Stability as the duration of the war (in turns). B.2 Thus, the loss is 1 Stability on the first turn of the war, 2 on the second and so on. B.3 The loss is limited to a maximum of 4 Stability per turn. B.4 Note that this loss is applied <b>after</b> peaces have been signed, thus countries signing peace are not affected by it.</p> <p><b>C Overseas Wars</b> C.1 The same loss of Stability is applied for Overseas Wars C.2 The loss for an overseas war is limited to 2 Stability per turn, however.</p> <p><b>D Multiple Wars</b> Loses for wars are not cumulative. Only apply the bigger loss.</p> </div>
--	---

<div data-bbox="114 90 1117 124"> <div>[R]236</div> <div>Inflation</div> </div> <div data-bbox="114 167 1117 467"> <p><b>Example: Thirty years war.</b>— At turn 26, event IV-1 (1) (Bohemian Revolt) occurs and AUS enters war against BOHEMIA. At the end of the turn, AUS loses 1 Stability for this war.</p> <p>At turn 27, the war degenerate in event IV-A (Thirty Years' War) and both HIS and HOL enter the war. At the end of the turn, HIS and HOL both lose 1 Stability, as they have been at war for one turn, while AUS loses 2 Stability, as it has been at war for two turns.</p> <p>At turn 28, SUE takes the defence of the protestant cause and enter the war. At the end of the turn, SUE loses 1 Stability, HIS and HOL lose 2 each and AUS loses 3. . .</p> <p>At turn 29, FRA enter the war against the Habsburg empire. At the end of the turn, FRA loses 1 Stability, SUE loses 2, HIS and HOL lose 3 each and AUS loses 4.</p> <p>At the end of turn 30, FRA loses 2 Stability, SUE loses 3, HOL and HIS lose 4 each and AUS should lose 5 but the loss is limited to 4. <b>Richelieu</b> starts asking his opponents if they're ready to accept his terms. . .</p> </div> <div data-bbox="114 491 1117 933"> <div data-bbox="114 491 1117 531"> <div>XI.4.2 Interventions</div> </div> <div data-bbox="114 531 1117 933"> <p><b>A Limited Intervention</b></p> <p>A.1 For each continued limited intervention, the intervening country loses 1 Stability.</p> <p>A.2 This loss is cumulative with the loss for full wars.</p> <p><b>B Foreign intervention</b></p> <p>B.1 There is no cost for continuing a foreign intervention. However, the intervening stack may not be reinforced.</p> <p>B.2 Remember that it is always possible to withdraw from a foreign intervention and re-intervene next turn (while limited intervention may only be declared at the beginning of the war). This does cost 1 Stability and de facto allows to reinforce the stack.</p> <p><b>Example: Interventions.</b>— FRA is at war against HIS and enters a limited intervention against ANG. At the end of the turn, FRA loses 1 Stability for the war and 1 for the intervention, for a total of 2 Stability. At the next turn, FRA will lose 2 Stability for the war and 1 for the intervention.</p> <p>ANG is in intervention both against FRA and against AUS (in two separate wars). At the end of the turn, it loses 2 Stability, one for each intervention.</p> </div> </div> <div data-bbox="114 954 1117 1513"> <div data-bbox="114 954 1117 994"> <div>XI.4.3 Other cases</div> </div> <div data-bbox="114 994 1117 1513"> <p><b>A Some other rules or events cause loss of Stability at this point.</b></p> <p>A.1 Sometime, the loss is cumulative with others losses, sometimes it's not.</p> <p><b>B Turkey and the Knights</b></p> <p>B.1 If the IP of ORDO HOSPITALIS caused the loss of at least one Turkish TF level, TUR loses 1 Stability.</p> <p>B.2 This loss is not cumulative with any other. Thus it happens if and only if TUR did not lose Stability at this segment yet.</p> <p><b>C Włen</b></p> <p>C.1 If TUR took control of Włen this turn and still controls it at the end of the turn, each Catholic country among HIS, AUS, POL, FRA and ANG loses 1 Stability.</p> <p>C.2 If TUR controls Włen without owning the province (either from this turn or a previous one), AUS* loses 1 Stability.</p> <p>C.3 These losses are cumulative with other losses.</p> <p><b>D Roma</b></p> <p>D.1 If TUR took control of Roma this turn and still controls it at the end of the turn, each Catholic country loses 1 Stability.</p> <p>D.2 If TUR controls Roma without owning the province (either from this turn or a previous one), the Sole Defender of Catholic Faith (XIV.14.3.1) loses 1 Stability.</p> </div> </div>	<div data-bbox="1122 90 2121 124"> <div>Peaces— master – 2016-04-14</div> <div>[R]237</div> </div> <div data-bbox="1122 167 2121 199"> <p>D.3 These losses are cumulative with other losses.</p> </div> <div data-bbox="1122 220 2121 467"> <div data-bbox="1122 220 2121 268"> <div>XI.5 Inflation</div> </div> <div data-bbox="1122 268 2121 467"> <p><b>A Each turn, the RT of each country is decreased as a way to represent Inflation (increase of prices is equivalent to decrease of stockpiled money).</b></p> <p>A.1 Countries with negative RT still lose money from Inflation (as the debt owner adjust their requests).</p> <p><b>Design note:</b> Inflation increases quickly as the gold and silver flow from <b>AMERICA</b> becomes high and regular. Do not hope to go back to the good old days of low inflation. . .</p> </div> </div> <div data-bbox="1122 491 2121 946"> <div data-bbox="1122 491 2121 531"> <div>XI.5.1 Increase of Inflation</div> </div> <div data-bbox="1122 531 2121 946"> <p><b>A Inflation varies between 5% and 33%. The Inflation counter is placed on the bottom line of the Resources prices track (on the ROTW map) in the box corresponding to the current Inflation.</b></p> <p>A.1 Place the counter with the “≥ 3” side up if there is 100 ₪ or more of gold exploited in the ROTW this turn, and with its “≥ 7” side up otherwise.</p> <p>A.2 Count all the gold exploited in the ROTW, no matter who exploited it where (i.e Russian gold from <b>SIBERIA</b> counts) and no matter whether it was repatriated in Europe, kept in the ROTW or sunk.</p> <p>A.3 Also count gold exploited from new COL even those placed this turn.</p> <p><b>B Increase of Inflation</b> Roll 1d10. If it is larger than the threshold on the counter (≥ 3 or ≥ 7 depending on the side up), move the Inflation marker one box to the right.</p> <p>B.1 Exception: the counter may never go beyond the 33% box.</p> <p><b>C Other variations</b></p> <p>C.1 Economic situation may increase Inflation as per \$B (Inflation) of section III.4 (Economic situation).</p> <p>C.2 Economic events event E-32 (Inflation) or event E-45 (Deflation) may increase or decrease Inflation.</p> </div> </div> <div data-bbox="1122 962 2121 1513"> <div data-bbox="1122 962 2121 1002"> <div>XI.5.2 Inflation</div> </div> <div data-bbox="1122 1002 2121 1513"> <p><b>A Inflation value</b></p> <p>A.1 Countries that do exploit gold in <b>AMERICA</b> have an <i>Inflation value</i> equal to the percentage written in the box where the counter is located (between 5% and 33%).</p> <p>A.2 Other countries have an <i>Inflation value</i> equal to the percentage written on the box on the left of the marker (between 5% and 25%, also use 5% when the marker is on the leftmost box).</p> <p>A.3 Exception: TUR before its reform use Inflation as if it exploited gold in <b>AMERICA</b> (\$E (Corruption Cost of Pashas.) of section XIV.8.1.2 (Turkish Military system)).</p> <p>A.4 Countries that exploit gold in the ROTW out of <b>AMERICA</b> (usually RUS in <b>SIBERIA</b>) do not suffer from higher Inflation. Only gold from <b>AMERICA</b> counts.</p> <p><b>Design note: Gold flow</b> The Russian gold flow was way smaller than the Spanish Silver flow from America. Moreover, higher Inflation for RUS causes some non-historical gamey tactics.</p> <p><b>Playing tip: Spanish World</b> Due to the increased Inflation, exploiting only one mine in <b>AMERICA</b> is probably not worth the effort. That is, if you start going for gold, go and grab as much as possible. Usually, only HIS manage this due to its early arrival in the New World.</p> <p><b>B Minimal inflation</b></p> </div> </div>
--	---

# Inter-turns Phase

## Chapter XII

### XII.1 Overview

**A** This is the last phase of the turn and is played simultaneously. It mostly consists in some cleanup of the past turn and preparation for the next one: Moving Trade centres, rebuilding some military assets and giving some VPs to players.

**B Sequence.**

B.1 Trade centres (XII.2)

B.2 Monarchs, Natives, Militias and Fortresses (XII.3)

B.3 VPs per turn (XIII.2)

### XII.2 Trade centres

**A** The Trade Centres may be moved during the interphase.

**B Great Orient** As long as *ÆGYPTUS* exists, the CC Grand Orient stays in **Nil**. In the rare case where the province is ceded, the centre is relocated in any other province of *ÆGYPTUS*.

B.1 As soon as *ÆGYPTUS* is destroyed, the CC Grand orient is placed in **İzmir** (if owned by *TUR*) or any other Turkish national province bordering the *MEDITERRANEAN SEA* (otherwise).

B.2 If the centre is in *TUR*, the convoy of **İzmir** is available for next turn, appearing in the province of the centre.

**C Other centres** are attributed to a country (see below).

C.1 They must be placed in any coastal national province of the owner.

C.2 If this is not possible, they may be placed in any province of the owner.

C.3 There is no limit to the number of centres in any given province.

**D Attribution** Each centre is attributed to the country with the largest number of TF levels in a given set of STZ/CTZ (sum the levels of all these zones).

D.1 Count the **current** levels of the TF, not the **maximum** levels. Hence, piracy may temporarily change ownership of the centre.

D.2 In case of tie, if the current owner is amongst the tied countries, it keeps the centre.

D.3 In case of tie, if the current owner is not amongst the tied countries, the centre is attributed at random amongst the tied countries.

**E Mediterranean**

E.1 The CC Mediterranean is attributed to the country with the largest number of TF levels in STZ **Mer Caspienne**, STZ **Mer Noire occidentale**, STZ **Golfe du Lion**, STZ **Mer Ionienne**, CTZ **TURCIA** and CTZ **VENETIA**.

E.2 If possible, it must be placed in a province bordering *MEDITERRANEAN SEA*. National non-Mediterranean provinces still have higher priority than non-national Mediterranean provinces.

**F Indian** The CC Indian is attributed to the country with the largest number of TF levels in STZ **Cap des tempêtes**, STZ **Mer d'Arabie**, STZ **Océan Indien** and STZ **Mer de Chine**.

**G Atlantic** The CC Atlantic is attributed to the country with the largest number of TF levels in all other STZ and CTZ.

### XII.3 Monarchs, Natives, Militias and Fortresses

**A Natives** In each ROTW province, the number of natives is replenished to its maximum.

A.1 Exception: in **AMERICA** and **SIBERIA**, if a province was reduced to 0 natives, it does not replenish (in these areas, natives may be permanently exterminated). It replenishes if it was reduced but some natives are still alive.

A.2 Simply remove all temporary **BARBARIA** counters.

**B Appeasement** In each ROTW province, natives are appeased and are no more activated.

**C Militia** In each owned, controlled and unbesieged establishment, the number of militia is replenished to its maximum.

C.1 Besieged militias, as well as militia in occupied provinces are not replenished

C.2 Simply remove all temporary white militia counters.

**D Fortresses** Remove all white level 1 fortress counter in provinces of countries that are not at war (either at peace or in intervention).

D.1 Exception: Do not remove the counters in the ROTW on COL of level 6.

**E Return of the kings** Captured Monarchs return to their countries.

E.1 Major monarch can use their value again.

E.2 The military counter (whether Major or Minor) is placed together with the new leaders arriving next turn.

**F No lasting wounds** Leaders that were wounded but did not have time to recover during the turn are healed.

F.1 They are placed together with the new leaders arriving next turn.

### XII.4 VPs

**A** Some VPs are earned each turn and are tallied at the end of turn.

A.1 They are described together with all the VPs in the next Chapter. See section XIII.2 (VPs per turn) for details.

# Winning the game

## Chapter XIII

**Design note:** Even if the spirit of the game is mainly to simulate the whole modern history, a complete victory points (VPs) system is explained here. It allows to designate a winner of the campaign, and also to know who is doing well and who isn't.

The VPs system is currently unbalanced. It will only be balanced once sufficiently many test games with stable rules will have been played. Thus, it should not be taken too seriously. A 1 VP difference at the end of the game hardly qualifies as a "Victory". It is not only within the margin of error of the system but also within the margin of counting errors during the game (are you sure you did not forget a 1 VP discovery at some point in the game?) Of course, if you're playing an EU championship, a 1 VP difference is all it takes to be champion rather than vice-champion. . .

Thus, VPs should be considered more as a guideline at what actions should be attempted even if they seem silly. Many monarchs of the period took decisions that in retrospective are considered stupid and no gamer would make the same error of spending that many efforts toward a useless goal. VPs are an incentive to pursue some of those goals. This is especially true for some of the 'Mandatory' objectives that are often extremely hard to achieve but nonetheless were the main concern of historical monarchs (the Spanish "Conversion of a Protestant major" objective is a famous example of such a waste of efforts) .

So, any action that is rewarded (or punished) by 50 VPs should be considered as something extremely important and a huge goal to achieve for the players. A 10 VPs bonus is more of a secondary objective, or a penalty that may be payed once or twice.

**Design note:** All in all, players are expected to gain around 2000-2500 VPs along the game. The end of period check should be around 100-150 VPs per period, more for countries in their period of Glory, less for decaying countries. The period objectives should be around 100-200 VPs per period depending on your success on the field.

**Playing tip:** Some period objectives, as well as the end of game objectives, must be prepared in advance. Often, if one start trying a period objective only at the period it brings VPs, it is too late. The "Mediterranean Trade Center" objective for FRA is notorious for this. Thus, you should probably look your objectives in advance, as part of a long term strategy.

**Playing tip:** Get one player in charge of counting the VPs. Other players won't need to know the VPs per turn as well. That player should get a notebook and tally VPs along the game. Since there are VPs every turn, there is a lot of things to write.

End of period (and end of game) VPs are best checked with two players. One is reading the objectives and end of period checks while the VPs accountant note the result. Others players should be around ready to answer questions (typically for computing Wealth).

### XIII.1 How to win the game ?

**A** The VP system is composed of 3 parts.

**A.1 VPs per turn:** Those VPs are earned by players performing special actions and discoveries. This corresponds approximately to one sixth to one quarter of the final VPs.

**A.2 End of period VPs:** At the end of each period, players earn VPs corresponding to their Wealth and Prestige Expenses during the past turns and to the objectives they chose at the beginning of the period. This corresponds approximately to one half to two third of the final VPs.

**A.3 End of game VPs:** At the end of the game, after counting VPs of the end of seventh period, a check-up of the the situation of each country is made, and VPs are earned according to it. For players who change country mid-game, a Transfer check is also computed. This corresponds approximately to one sixth to one quarter of the final VPs.

### XIII.2 VPs per turn

**A** Players earn or lose VPs each turn for regular or particular situations, and also for particular discoveries.

**A.1** Even if these VPs are earned at different moments of the turn, it is often easier to count them all together at the end of the turn.

**B** Note that some other actions (e.g. some events, . . . ) may also give or take VPs during turn and are not all recalled here.

#### XIII.2.1 VPs earned during each phase

**A** During the Diplomacy phase:

- | -10 for each declaration of war without CB;
- | +? the income value of annexed provinces (Dowries);
- | -? twice the income value of lost provinces (Dowries).

**B** During the Administrative phase:

- | -5/15/30 for a Small/Major/Complete bankruptcy.

**C** During the Military phase:

- | +5 per major battle won.

**D** During the Peace phase:

- | +? the income value of annexed provinces;
- | -? twice the income value of lost provinces;
- | +2 per peace level of a war won against at least one major power;
- | +1 per peace level of a war won against only minor powers;
- | -2 per peace level of a lost war;
- | -20 for a forced religious conversion (unless another VPs penalty is already stated);

**E** During the Interphase:

- | +1 per partial *monopoly* of Exotic Resource
- | +3 per total *monopoly* of Exotic Resource

**F** Definitions of *monopolies* for exploitation of each exotics resources

[R]244

VPs per turn

F.1 For each resource, a country has a partial *monopoly* if it produces at least 6 units and at least half of the world production of this resource. Note that two countries may have a partial monopoly of the same resource in the rare case where both produce exactly one half of the total.

F.2 A country has a total *monopoly* of a given resource if it produces at least 6 units of that resource, and if no more than 2 units of that resource are produced by other countries.

F.3 Resources produced by minor countries are counted as usual when computing monopolies. Especially, resources exploited by a minor in AT are counted as if exploited by the major gaining the corresponding income.

F.4 If a ROTW minor country happen to have a monopoly in one resource, no VPs are gained (because ROTW minors do not have diplomatic patron).

**G VPs of minor powers** The players also earn (or lose) half of the VPs earned (or lost) by a minor country which they control.

G.1 This is both for allied minors and for Neutral minors controlled by the player (in order to avoid the players to voluntarily play poorly).

XIII.2.2 VPs earned for discovering the World

**A Discoveries**

+50 the 1st round-the-World trip (if it is completed in a single turn)  
+20 the 1st round-the-World trip (if it is completed in 2 turns)  
+20 the 2nd round-the-World trip  
+10 the **Cap Horn** sea zone  
+3 the **Baie d’Hudson** sea zone  
+3 the **QUÉBEC** area  
+2 the **GRANDS LACS** area  
+3 the **ROCHEUSES** area  
+3 the **ALASKA** area  
+5 the **PANAMÁ** area by the West  
+1 per province of the **AMAZONIA** area  
+1 per province bording Mississippi river

**B Discoveries** VPs are earned when the discovery is made (successful exploration roll), even if the stack is later destroyed before bringing it back home (that is, some rumours about it reach the home country and Europe anyway).

B.1 If several countries are able to claim VPs for the same discovery during the same round, they are considered as moving in order of initiative: the first country to do the discovery, and actually gain the VPs, is the one with the higher initiative.

B.2 Discoveries VPs of *Areas* are given to the first country who discovers at least one province in the *Area*.

B.3 Discoveries VPs of provinces and sea zones are given to the first country who discovers it. Each province of **AMAZONIA** as well as each province bordering the Mississippi river is worth 1VP individually.

B.4 List of provinces bordering the Mississippi: all provinces of **MISSISSIPPI**, the two central provinces of **ILLINOIS** and the two Eastern provinces of **KANSAS**.

**C The way is more important than the destination.**

C.1 Discovery of **PANAMÁ** by the West is landing one stack in **PANAMÁ** from the Pacific Ocean. Both the land stack and the naval stack carrying it must have cross the **Cap Horn** sea zone (or used the special movement of §A (Provinces with several coasts) of section VIII.4.1 (Special Movements) to avoid it).

Winning the game— master – 2016-04-14

[R]245

C.2 For this discovery, the VPs are earned once the condition on the way is met, even if the province is already known (including by the power doing the discovery).

Example: HIS first discovers **PANAMÁ** from the East (**Golfe du Mexique**) and build a COL there. Later HIS goes round America and lands in the same, already colonised province from **Golfe de Panama**. Since HIS already knows the province, no discovery roll is needed. HIS still gets the **“PANAMÁ by West”** VPs (unless another country already grabbed these VPs, of course).

**D Circumnavigation** Round-the-World trip are completed when one naval stack (possibly a single leader) goes from a port on the European map, back to a port on the European map (possibly the same) after going all the way around the World.

D.1 If you’re not sure about a circumnavigation, it is done by using an odd number of time the adjacency between the East and West edges of the ROTW map.

XIII.3 End of period VPs

**A** The end of period VPs are decomposed in 3 parts: Wealth and Prestige VPs; a check up of the situation of each country; and the verification of the objectives chosen at the beginning of the period.

XIII.3.1 Prestige

**A Wealth and Prestige VPs** for each country are a certain percentage of the average Wealth of the period. It is computed as follow.

A.1 The base Wealth is line **A28** (Period wealth) of *ERS*.

A.2 In case of transfer or end of game computation, modify the base Wealth as follow:

add the RT if positive (line **A33** (RT at end) of *ERS*);  
remove twice the RT if negative (line **A33** (RT at end) of *ERS*);  
remove twice the amount of ongoing loans (line **C10** (National loans at end) of *ERS* plus the amount of international loan not yet refunded).

A.3 Divide this result by the number of turns in the period (do not round yet). In case of transfer or end of game computation, only count the number of turns actually played.

A.4 Multiply this average Wealth by the percentage indicated in the table below and round down. This is the amount of Wealth and Prestige VPs gained by the country.

**B** Period percentage:

Percentages for Wealth and Prestige VPs									
	ANG	FRA	POL +PRU	POR +SUE	RUS	HIS	TUR	VEN +AUS	HOL
pI	25	25	100	40	100	25	30	25	na
pII	20	25	75	20	75	20	25	25	na
pIII	20	20	60	60	60	20	20	25	20
pIV	15	20	50	50	40	15	15	50	15
pV	10	15	50	30	40	10	15	40	10
pVI	10	10	50	25	30	10	15	25	10
pVII	10	10	50	25	30	10	15	25	15

<div data-bbox="114 90 1117 159"> <div>[R]246</div> <div>End of period VPs</div> </div> <div data-bbox="114 159 1117 343"> <p><b>Example:</b> At the end of period III, TUR managed to have a total Wealth of 6012 ₪ (line <b>A28</b> of ERS at turn 25). Period III is 11 turns long and TUR percentage is 20% in this period. Hence TUR scores <math>6012/11 \times 0.20 = 109.3</math> rounded down to 109 Wealth and Prestige VPs.</p> <p>At the same time, VEN has 5696 ₪ of Wealth, with 26 ₪ in RT but an ongoing national loan of 148 ₪. VEN percentage is 25% and this is a transfer computation as VEN switch to AUS in period IV. Thus, its Prestige and Wealth VPs are <math>(5696 + 26 - 2 \times 148)/11 \times 0.25 = 123.3</math> rounded down to 123VPs.</p> </div> <div data-bbox="114 343 1117 406"> <h3>XIII.3.2 End of period check up</h3> </div> <div data-bbox="114 406 1117 774"> <p><b>A</b> Some countries earn VPs at the end of each period according to their overall situation (colonial, territorial and diplomatic).</p> <p>A.1 Not all countries gain VPs this way and some countries have special modifiers representing the historical policies that were pursued.</p> <p><b>B Colonial situation.</b> The countries indicated below (and only these countries) gain 5 VPs for each COL or TP in the specified continents (or country) and periods (any time if no period specified).</p> <p>B.1 ANG: <b>INDIA</b> in periods IV to VII; <b>OCEANIA</b> in period VII.</p> <p>B.2 FRA: <b>AMERICA</b> always; <b>INDIA</b> in periods VI, VII; <b>OCEANIA</b> in period VII.</p> <p>B.3 POR: <b>AMERICA</b> only if there is 3 or more POR COL counters (whatever their side) in <b>BRAZIL</b>; in this case, each COL<math>\oplus</math> counts as 2 COL (and earns 10VPs).</p> <p>B.4 RUS: <b>CHINA</b>, <b>AMERICA</b>; each COL<math>\oplus</math> counts as 2 COL (and earns 10VPs).</p> <p>B.5 SUE: <b>AMERICA</b>.</p> </div> <div data-bbox="114 774 1117 1013"> <p><b>Design note:</b> If ANG or FRA has COL in <b>OCEANIA</b> in period V, they do not earn any VPs for these. They will only bring VPs in period VII. This represent the fact that most of this area was discovered by the expeditions of Cook, Bougainville or La Pérouse and thus were only known to Europeans in the very late game and colonised in the 19th Century.</p> <p>Similarly, French COL in <b>INDIA</b> only earns VPs in the end game while English COL there start earning VPs in period IV. This represents the different colonial policies (and power) of these countries and the early start of ANG in <b>INDIA</b> (with the East India Company) while FRA focused its efforts toward colonising Canada (especially during the reigns of Louis XIII and Louis XIV).</p> </div> <div data-bbox="114 1013 1117 1157"> <p><b>Example:</b> At the end of period I, POR as a COL<math>\oplus</math> in <b>RECIFE W.</b>, a COL<math>\ominus</math> in <b>BELÉM E.</b> and a COL<math>\ominus</math> in <b>AMAZONIA SE.</b> Since that's only 2 COL counters in <b>BRAZIL</b>, it does not earn VPs for Colonial situation.</p> <p>Suppose now that the third COL is in <b>RIO S.</b> instead of <b>AMAZONIA</b>. Now that's 3 counters in <b>BRAZIL</b> and since the COL<math>\oplus</math> counts as 2, that's a total of 4 COL and 20VPs.</p> </div> <div data-bbox="114 1157 1117 1513"> <p><b>C Territorial gains.</b> Each country gains VPs equal to the income value of each province annexed during the period with following modifiers. Note that these are in addition to the VPs gained when annexing the province.</p> <p>C.1 FRA: former provinces of BURGUNDIA<math>\times 0</math> during periods I and II, <math>\times 2</math> during periods V to VII; provinces in ITALY<math>\times 2</math> in periods I to III.</p> <p>C.2 HIS: provinces in ITALY<math>\times 2</math> in periods I to III.</p> <p>C.3 ANG: provinces bordering MEDITERRANEAN SEA<math>\times 5</math>; other continental provinces <math>\times 2</math>.</p> <p>C.4 TUR: provinces taken from PERSIA<math>\times 2</math>; provinces lost against PERSIA count negative; provinces bordering MEDITERRANEAN SEA<math>\times 2</math>.</p> <p>C.5 SUE: provinces bordering BALTIC SEA<math>\times 3</math>.</p> <p>C.6 RUS: provinces taken from POL or POLONIA<math>\times 2</math>; provinces lost against POL or POLONIA count negatively.</p> <p>C.7 POL: provinces taken from RUS, SUE or SUECIA<math>\times 2</math>.</p> <p>C.8 AUS: former provinces of HUNGARIA or MOLDAVIA, <b>Serbia</b><math>\times 3</math>.</p> </div>	<div data-bbox="1117 90 2125 159"> <div>Winning the game— master – 2016-04-14</div> <div>[R]247</div> </div> <div data-bbox="1117 159 2125 375"> <p>C.9 PRU: provinces of the HRE or provinces take from POLONIA<math>\times 2</math>.</p> <p>C.10 VEN: lost islands in MEDITERRANEAN SEA count negatively.</p> <p><b>D</b> Some countries have special modifiers for provinces taken from (or lost to) a specific country (e.g. RUS versus POL). For this modifier to apply, the province must be owned by the specified country just before being owned by the other.</p> <p>D.1 Thus, e.g., if RUS annexes a former Polish province which is currently owned by SUE, it does not trigger its special modifier.</p> <p>D.2 Other countries have special modifiers for specific provinces, whoever owned them prior to the annexation.</p> </div> <div data-bbox="1117 375 2125 478"> <p><b>Design note:</b> Here also, the variations along the game represent different policies of countries. For example, FRA focused its effort in Italy in the early game and only tried to grab parts of the Burgundian legacy after its Wars of Religion, with the policies of Richelieu and Louis XIV, or the “<i>pré carré</i>” of Vauban.</p> </div> <div data-bbox="1117 478 2125 734"> <p><b>E Diplomatic situation</b></p> <p>E.1 Each country earns <b>6 VPs</b> for each minor country in <b>VA</b>, <b>AN</b> or <b>AT</b>, as well as special EW (those with no diplomacy allowed), and <b>3 VPs</b> for each other controlled minor country, with following modifiers:</p> <p>E.2 HIS: minors in ITALY<math>\times 2</math>; ORDO HOSPITALIS<math>\times 2</math>; do not count autonomous Habsbourg states; do not count ORDO HOSPITALIS if they are still in <b>Rhodos</b>.</p> <p>E.3 TUR: Muslims: only 4 VPs for VA, AN or AT, 2VPs for other status; do not count Non-Muslims minors except TRANSILVANIA.</p> <p>E.4 FRA: minors in ITALY<math>\times 2</math> during periods I to III; minors of the HRE<math>\times 2</math> in periods IV to VII</p> </div> <div data-bbox="1117 734 2125 805"> <p><b>F Special</b></p> <p>F.1 If ORDO HOSPITALIS is still in <b>Rhodos</b> (whatever its diplomatic status), HIS gains 20VPs.</p> </div> <div data-bbox="1117 805 2125 869"> <h3>XIII.3.3 Period's objectives</h3> </div> <div data-bbox="1117 869 2125 1165"> <p><b>A Overview</b></p> <p>A.1 At the beginning of each period, each player chooses global orientations for its country by selecting 3 out of 5 possible objectives.</p> <p>A.2 Once the period ends, objectives that were successfully achieved earn VPs.</p> <p>A.3 The list of all objectives, per country, is given in section XIII.4 (Period objectives per country). A comprehensive table is also provided as a player's aid. Note that in case of ambiguity or contradiction, the long list in the rules is correct and the table is wrong.</p> <p>A.4 Each objective is associated with a VPs value. Sometimes it is a yes/no objective with a single value (e.g. ownership of a specific province) and sometimes it is a “for each” objective with a value for each item and a maximum value for the objective (e.g. some VPs for each TF counter of the country in play).</p> </div> <div data-bbox="1117 1165 2125 1356"> <p><b>B Choosing objectives</b></p> <p>B.1 At the beginning of each period (before the first turn of the period), each player must secretly pick 3 of the possible 5 objectives for its country.</p> <p>B.2 One of the 3 must be marked as <b>main objective</b>.</p> <p>B.3 Each player should write the 3 objectives on some paper, and then all these papers should be put together, e.g. in an envelop (sealed if you don't trust your fellow players. . . )</p> </div> <div data-bbox="1117 1356 2125 1513"> <p><b>C Scoring objectives</b></p> <p>C.1 At the end of each period (during the end-of-period VPs check), objectives are revealed and checked, and players earn VPs according to this.</p> <p>C.2 A VPs value is indicated for each objective. If a player chooses an objective and completes it, he earn its VPs value, if this is the <b>main objective</b>, he earns twice this value instead.</p> </div>
--	--

<div data-bbox="114 90 1117 132" data-label="Page-Header"> <div>[R]248</div> <div>Period objectives per country</div> </div> <div data-bbox="114 172 1117 1295" data-label="Text"> <p><b>D Mandatory objectives</b></p> <p>D.1 Some objectives are marked on the tables with <b>M</b> ('Malus, or 'Mandatory objectives), they are objectives with malus.</p> <p>D.2 If a player <b>both</b> does not choose this objective, <b>and</b> does not complete it, he loses the associated VPs.</p> <p>D.3 If this is a "for each" objective, having a single one of the required elements is enough to avoid the penalty. However, having none of them result in a penalty equal to the maximum potential value of the objective.</p> <p><b>E Event objectives</b></p> <p>E.1 Some objectives depend on the occurrence of an event.</p> <p>E.2 If the corresponding event has not finished when the period ends, the check for the success of the objective is postponed until the event terminates.</p> <p>E.3 If the event did not occur yet, even if it may occur later, then the objective is considered as being half realised, entitling the player to gain half the VPs value.</p> <div data-bbox="114 544 1117 662" data-label="Text"> <p><b>Design note:</b> The event may occur later (in the next period) without changing the VPs gained by the objective, whatever its outcome.</p> <p>In some case, it is also possible that the event occurred one period early and is already resolved when the choice of objective has to be made, resulting in a "free" objective that is already fulfilled and is guaranteed to bring VPs. Enjoy!</p> </div> <div data-bbox="114 687 1117 892" data-label="Text"> <p><b>Design note:</b> <b>M</b> objectives are usually hard goals that historical monarchs pursued with a lot of efforts but often did not succeed and resulted in a loss of these efforts. In retrospective, wargamers would like to ignore these and focus their efforts on goals more likely to succeed. The system forces the players to not completely ignore these. If they choose not to pick the <b>M</b> objective and ignore it, they will lose VPs. If they pick up the objective, since only three objectives can be picked, ignoring it is equivalent to picking only the two others thus forfeiting potential VPs for a third one. . . Since <b>M</b> objectives are usually among the ones with highest VPs value, it is normally best to choose it. Of course, the question of choosing it as <b>main objective</b> or not remains open.</p> </div> <div data-bbox="114 917 1117 1182" data-label="Text"> <p><b>Example:</b> At the start of period I, ANG chooses objectives "Calais" (as <b>main objective</b>), "Hundred years war" (the <b>M</b> objective, representing a policy of continuing the Hundred Years War) and "Pacified Ireland*".</p> <p>At the end of the period, ANG still owns a <b>Præsidio</b> in <b>Picardie</b> (representing Calais) but does not own <b>Guyenne</b>. Good revolt rolls resulted in <b>IRELAND</b> without revolt for 5 out of the 6 turns. During the same time, <b>SCOTIA</b> was <b>VA</b> for 2 turns of the period. Since Scotland was not an objective, ANG does not earn any VP for it. Since the maximum possible gain for the Irish objective is 40VPs, ANG only gains these 40VPs and not 50 as would be expected for 5 turns without revolt. Thus, the objective VPs for ANG are: <math>2 \times 45 + 40 = 130</math>VPs.</p> <p>Note that if ANG had chosen the Scottish objective instead of the Hundred Years War one, then it would have failed a not chosen <b>M</b> objective and lost the associated VPs, resulting in a total of <math>2 \times 45 + 40 + 20 - 50 = 100</math> VPs only.</p> <p>If Ireland was the <b>main objective</b>, then the maximum is computed before doubling, that is it would result in <math>2 \times 40 = 80</math> VPs.</p> </div> <div data-bbox="114 1208 1117 1286" data-label="Text"> <p><b>Example:</b> Still in period I, suppose that HIS does not choose its <b>M</b> objective "Barbary Coast". If HIS nonetheless manage to have at least one <b>Præsidio</b> on the Barbary Coast, the objective is considered successful and no VP is lost. If no <b>Præsidio</b> is there, then the objective is failed and HIS loses the full 50 VPs of it.</p> </div> <div data-bbox="114 1334 1117 1442" data-label="Section-Header"> <h3>XIII.4 Period objectives per country</h3> <h4>XIII.4.1 Explanation of some objectives</h4> </div> <div data-bbox="114 1457 1117 1513" data-label="Text"> <p><b>A Commercial Domination in the BALTIC SEA.</b> Each turn, one country may have Commercial Domination in the BALTIC SEA. Commercial Domination is attributed, in decreasing order of precedence, to the MAJ who</p> </div> </div>	<div data-bbox="1122 90 2121 132" data-label="Page-Header"> <div>Winning the game— master – 2016-04-14</div> <div>[R]249</div> </div> <div data-bbox="1122 172 2121 1513" data-label="Text"> <ul style="list-style-type: none"> <li>levy Sund taxes (section XIV.14.8.1 (Levies of the Sund));</li> <li>has diplomatic control of the minor with right to levy Sund taxes (whether there are taxes or free trade);</li> <li>has Commercial Monopoly in STZ <b>Baltique</b> (section V.4.3.2 (Monopolies)) and nobody is levying the Sund taxes.</li> </ul> <div data-bbox="1122 280 2121 432" data-label="Text"> <p><b>Design note:</b> Note that if the minor with right on the Sund is not Neutral, then the Domination is awarded to its Diplomatic patron whatever the status of the taxes. On the other hand, if it is Neutral, and does not levy the taxes, then having Commercial Monopoly is enough.</p> <p>Similarly, if the right on the Sund is owned by a MAJ and it's not levying taxes, then Commercial Domination is awarded to the country with Commercial Monopoly.</p> </div> <div data-bbox="1122 475 2121 593" data-label="Text"> <p><i>The taxes were initially in the hand of DANIA but the Swedish independence and conquest of Skåne switched this important source of income to other hands. HOL, having a large trade activity in STZ <b>Baltique</b>, wasn't happy with foreign taxes and preferred free trade. This resulted in several Dutch implications in the Northern wars, often using the Dutch fleet to reinforce the Danish one.</i></p> </div> <p><b>B Dominium Marii Baltici.</b> SUE has the DMB if all provinces bordering the BALTIC SEA are owned by either SUE, BRANDENBURGUM (or PRU) or DANIA.</p> <div data-bbox="1122 724 2121 786" data-label="Text"> <p><i>This represents the Swedish expansion towards the Southern shores of the sea. Including the frequent struggles with POL, the will to destroy HANSA and the ongoing conflict with RUS around Ingermanland.</i></p> </div> <p><b>C Orient Income</b> VEN has objectives depending on its <i>Orient Income</i>. Orient Income is computed over each period and is the sum of all income from any of the following source:</p> <p>C.1 CC Grand Orient or CC Indian;</p> <p>C.2 convoy of İzmir or East Indies convoy;</p> <p>C.3 resources exploited through an AT with ADEN, AYMAN or GUZARATE;</p> <p>C.4 total income of each COL/TP producing at least one unit of <i>PO</i>, <i>Spice</i> or <i>Silk</i>;</p> <p>C.5 TF in any STZ of the CC Indian.</p> <p><b>D TF and Trade Centres.</b> For period objectives only, consider that the Trade Centres are given according to the <i>maximum</i> levels of TF and not according to the <i>current</i> level as per normal rules.</p> <p>D.1 This does not move the counters nor changes the ownership of the Centres for any other purposes.</p> <p>D.2 Similarly, when counting the number of TF counters owned by a country (and their side), consider that the counters are here according to their <i>maximum level</i>, not to their <i>current level</i>. This does not change any TF level or counter.</p> <p>D.3 When counting Commercial Monopolies (section V.4.3.2 (Monopolies)) consider any TF of <i>maximum level</i> 6 as a total monopoly and any TF of <i>maximum level</i> 4 or 5 as a partial monopoly. This may result in several countries having monopoly in the same CTZ/STZ for objective purposes.</p> <p>D.4 All this <b>only</b> applies for period objectives. At any other times, use the <i>current level</i> for placing counters, counting monopolies, triggering automatic competition or placing Trade Centres.</p> <div data-bbox="1122 1457 2121 1513" data-label="Text"> <p><b>Design note:</b> This avoids last instant backstabs and lessens the "end of period" effect. Especially, IP can cause a lot of temporary losses in one turn and it would be unfair to bet a lot of objectives VPs on this.</p> </div> </div>
---	---

<div>[R]250</div> <div>Period objectives per country</div> <div> <p><b>Example:</b> <i>At the end of period III, after a long commercial struggle and several Barbaresque's raids, the situation in the Mediterranean is as follows (current level/maximum level):</i></p> <ul style="list-style-type: none"> <li>STZ <b>Golfe du Lion</b>: HOL (3), HIS (1/3), VEN (2/5), FRA (2/3).</li> <li>STZ <b>Mer Ionienne</b>: HOL (4/5), VEN (0/4).</li> <li>CTZ <b>VENETIA</b>: VEN (6).</li> <li>CTZ <b>TURCIA</b>: TUR (5), VEN (3), HOL (3).</li> <li>STZ <b>Mer Noire occidentale</b>: HOL (5), VEN (3), TUR (2), FRA (3)</li> <li>STZ <b>Mer Caspienne</b>: VEN (3), HOL (4).</li> </ul> <p>Thus, HOL as a total of 19 current levels and 20 maximum levels while VEN has a total of 17 current levels and 24 maximum levels. Hence, even if the CC Mediterranee is currently located in Holland with 19 levels, for objectives purpose (only), VEN is considered as having it, thus fulfilling its objective (while HOL fails it). That is, HOL should have planned its attack earlier.</p> <p>If the number of TF were needed for objectives purpose, then VEN is considered as having a TF⊕ both in STZ <b>Golfe du Lion</b> and STZ <b>Mer Ionienne</b> even if the first one is currently ⊖ and the second is not here. Similarly, still for objectives purposes, both HOL and VEN are considered as having a partial monopoly in STZ <b>Mer Ionienne</b>.</p> <p><b>E No province lost</b> objectives mean that the country did not loose ownership of any province it owned at the beginning of the period.</p> <p>E.1 If the country annexes new provinces during the period and looses them later during the same period, the objective is still successful. Only provinces that were owned at the beginning of the period are checked against this objective.</p> <div> <p><b>Design note:</b> Thus, countries with a “No provinces lost” objective may still pursue an aggressive policy. Any province annexed early is a province that can be relinquished later without penalty rather than one more province to defend at any cost.</p> </div> <p><b>F Commercial monopolies.</b> When objectives ask for Monopoly in STZ or CTZ or in production of resource without precision, any monopoly (partial or total) counts toward fulfilling the objective.</p> <p><b>G Independence wars</b> event VII-4 (War of Independence in the Colonies) may occur several times, resulting in several rebellions. The associated objective is checked as follows, in decreasing order of precedence:</p> <ul style="list-style-type: none"> <li>If at least one rebellion war occurred in the country's colonies and all independence wars in the country's colonies were crushed, full success.</li> <li>If at least one successful rebellion war occurred in the country's colonies, the objective is failed.</li> <li>If no rebellion war occurred at all, half-success.</li> <li>If at least one rebellion war occurred in another country's colonies, and the major helped the rebels in all rebellion wars, and the rebels were successful every time, full success.</li> <li>If at least one rebellion war occurred in another country's colonies and the major helped at least one successful rebellion, half-success.</li> <li>Otherwise, failure.</li> </ul> <p>G.1 Note that most of the time, the war occurs only once, thus the objective is simply to take part in the war and win it.</p> <p><b>H Duration.</b> Objectives for actions only concern what happens during the period just ended.</p> <p>H.1 For example, a “per turn” objective in period II can only be fulfilled with actions done during period II.</p> <p>H.2 Similarly, a “per province annexed” objective in period IV only scores VPs for provinces that were annexed during period IV.</p> <p>H.3 However, objectives for situation only check the current situation, no matter when it was settled.</p> <p>H.4 For example, a “per province owned” objective in period IV scores for each province owned at the end of period IV no matter whether it was annexed during period I or IV.</p> </div> <td data-bbox="1120 90 2121 1513"> <div>Winning the game— master – 2016-04-14</div> <div>[R]251</div> <div> <p><b>I Minor provinces.</b> When an objective refers to the provinces of a minor country (CRIMEA, GEORGIANI, HANSA, HUNGARIA, MOLDAVIA, PERSIA, SICILIAE, TERRÆ DEPRESSÆ, WALACHIA), it consists in all the provinces barring the corresponding solid or blurred shield, and owned by the country at some point in the game, whatever their current owner (especially if the country was destroyed).</p> <p>I.1 However, when an objective refers to provinces “taken from” a specific country, then the province must have been owned by that country just before it was transferred (either by peace treaty, diplomacy, . . . )</p> <p>I.2 List of Crimean provinces (🇹🇷): <b>Hacibey, Zaporozhye, Crimée, Azov</b>, and possibly <b>Caffa, Kuban</b>.</p> <p>I.3 List of Georgian provinces (🇧🇪): <b>Géorgie, Kuban</b>.</p> <p>I.4 List of Hanseatic provinces (🇩🇪): <b>Bremen, Lübeck, Holstein, Mecklenburg</b>.</p> <p>I.5 List of Hungarian provinces (🇭🇺): <b>Mureş, Erdély, Bukovina, Kárpátok, Szlovákia, Balaton, Carniola, Kapela, Croatie, Pécs, Magyarország, Banat</b>.</p> <p>I.6 List of Moldavian provinces (🇷🇴): <b>Moldova, Basarabia</b>.</p> <p>I.7 List of Neapolitan provinces (🇮🇹): <b>Abruzzo, Campania, Basilicata, Puglia, Calabria, Sicilia, Palermo, Saldigna</b>.</p> <p>I.8 List of Persian provinces (🇮🇷): <b>Pars, Meshhed, Bam, Isfahan, Kermānshāh, Azarbāyadjān, Kordistān, Van, Arménie, Shirvan, Dağestān</b>.</p> <p>I.9 List of provinces of the North-East (🇳🇱): <b>Friesland, Gelderland, Holland, Overijssel, Utrecht, Zeeland</b>.</p> <p>I.10 List of Walachian provinces (🇷🇴): <b>Valahia</b>.</p> <p>I.11 Note that <b>Kuban</b> may be both a Georgian and Crimean province and thus bring VPs for both reasons. It may, however, only count once for each objective.</p> <div> <p><b>Example:</b> <i>In period III, RUS has an objective for provinces taken from CRIMEA. Only provinces that were owned by CRIMEA just before being owned by RUS count. Other provinces with a 🇹🇷 shield that were owned by, say, UKRAINA before Russian annexation do not count.</i></p> <p><i>On the other hand, in period VII, RUS has an objective for provinces of GEORGIANI or PERSIA. Now, any province with either a 🇮🇷 or 🇹🇷 shield counts, even if it was annexed from, typically, TUR.</i></p> </div> <p><b>J Ownership and Control</b></p> <p>J.1 Most objectives requiring ownership of several provinces don't care about who is the controller of the province. That is, if a war is going on when objectives are checked, only the rightful owner of the province may claim it for these objectives.</p> <p>J.2 On the other hand, most objectives requiring ownership of a single province require both ownership and control when the objective is checked and only provide half success if owner and controller are different. Thus, a war may quickly change some VPs.</p> <div> <p><b>Design note:</b> This lessens an end-of-period effect where players tend to stay in lost wars one more turn to score the full VPs value of a specific province as an objective before signing a peace and relinquishing that province on the very next turn.</p> </div> <div> <p><b>TODO:</b> The English objectives of SCOTIA Vassal are incompatible with the idea of the Auld alliance forbidding a ANG-SCOTIA vassalship before Elisabeth.</p> <p>Anyway, objectives for ANG in the early game need to be seriously revamped into something more interesting and interactive. . .</p> </div> <p><b>XIII.4.2 Objectives of ANGLIA</b></p> <p><b>XIII.4.2.1 Period I</b></p> <p><b>A</b> SCOTIA Vassal: 10 per turn (max 30) — Each turn SCOTIA is VA of <b>ANGLIA</b>.</p> <p><b>B</b> Calais: 45 VPs — <b>ANGLIA</b> owns <b>Picardie</b> or a <i>Præsidio</i> in it.</p> </div> </td>	<div>Winning the game— master – 2016-04-14</div> <div>[R]251</div> <div> <p><b>I Minor provinces.</b> When an objective refers to the provinces of a minor country (CRIMEA, GEORGIANI, HANSA, HUNGARIA, MOLDAVIA, PERSIA, SICILIAE, TERRÆ DEPRESSÆ, WALACHIA), it consists in all the provinces barring the corresponding solid or blurred shield, and owned by the country at some point in the game, whatever their current owner (especially if the country was destroyed).</p> <p>I.1 However, when an objective refers to provinces “taken from” a specific country, then the province must have been owned by that country just before it was transferred (either by peace treaty, diplomacy, . . . )</p> <p>I.2 List of Crimean provinces (🇹🇷): <b>Hacibey, Zaporozhye, Crimée, Azov</b>, and possibly <b>Caffa, Kuban</b>.</p> <p>I.3 List of Georgian provinces (🇧🇪): <b>Géorgie, Kuban</b>.</p> <p>I.4 List of Hanseatic provinces (🇩🇪): <b>Bremen, Lübeck, Holstein, Mecklenburg</b>.</p> <p>I.5 List of Hungarian provinces (🇭🇺): <b>Mureş, Erdély, Bukovina, Kárpátok, Szlovákia, Balaton, Carniola, Kapela, Croatie, Pécs, Magyarország, Banat</b>.</p> <p>I.6 List of Moldavian provinces (🇷🇴): <b>Moldova, Basarabia</b>.</p> <p>I.7 List of Neapolitan provinces (🇮🇹): <b>Abruzzo, Campania, Basilicata, Puglia, Calabria, Sicilia, Palermo, Saldigna</b>.</p> <p>I.8 List of Persian provinces (🇮🇷): <b>Pars, Meshhed, Bam, Isfahan, Kermānshāh, Azarbāyadjān, Kordistān, Van, Arménie, Shirvan, Dağestān</b>.</p> <p>I.9 List of provinces of the North-East (🇳🇱): <b>Friesland, Gelderland, Holland, Overijssel, Utrecht, Zeeland</b>.</p> <p>I.10 List of Walachian provinces (🇷🇴): <b>Valahia</b>.</p> <p>I.11 Note that <b>Kuban</b> may be both a Georgian and Crimean province and thus bring VPs for both reasons. Now, any province with either a 🇮🇷 or 🇹🇷 shield counts, even if it was annexed from, typically, TUR.</i></p> </div> <p><b>J Ownership and Control</b></p> <p>J.1 Most objectives requiring ownership of several provinces don't care about who is the controller of the province. That is, if a war is going on when objectives are checked, only the rightful owner of the province may claim it for these objectives.</p> <p>J.2 On the other hand, most objectives requiring ownership of a single province require both ownership and control when the objective is checked and only provide half success if owner and controller are different. Thus, a war may quickly change some VPs.</p> <div> <p><b>Design note:</b> This lessens an end-of-period effect where players tend to stay in lost wars one more turn to score the full VPs value of a specific province as an objective before signing a peace and relinquishing that province on the very next turn.</p> </div> <div> <p><b>TODO:</b> The English objectives of SCOTIA Vassal are incompatible with the idea of the Auld alliance forbidding a ANG-SCOTIA vassalship before Elisabeth.</p> <p>Anyway, objectives for ANG in the early game need to be seriously revamped into something more interesting and interactive. . .</p> </div> <p><b>XIII.4.2 Objectives of ANGLIA</b></p> <p><b>XIII.4.2.1 Period I</b></p> <p><b>A</b> SCOTIA Vassal: 10 per turn (max 30) — Each turn SCOTIA is VA of <b>ANGLIA</b>.</p> <p><b>B</b> Calais: 45 VPs — <b>ANGLIA</b> owns <b>Picardie</b> or a <i>Præsidio</i> in it.</p> </div>

# Specific Rules

## Chapter XIV

### XIV.1 ANGLIA

#### XIV.1.1 English intervention in wars

**A** ANG has the possibility of signing offensive limited alliances in any war that is neither a Civil War nor a Religious War.

**B** ANG may use its IP counters in addition to its forces involved in limited intervention.

**C** ANG may use the forces of any minor country in VA position on its diplomatic track in a limited intervention. Those forces are dealt with as if in limited intervention of a minor country at the side of the alliance supported by ANG, excepted that they can not be fully involved in the war by the enemy unless the enemy alliance first declares war to ANG.

**D** During any War, ANG may announce that he will send forces of a minor country in VA position on its diplomatic track in the ROTW. This declaration costs 1 Stability for each vassal that will be used, and is valid for the rest of the period. The troops of the vassal are then used in limited or full intervention with the change that they can go in the ROTW (and be supplied there by English fleets or colonial settlements).

##### XIV.1.1.1 Military leaders

**A** Royal Marines appear as a general only during event V-4 (The War of Spanish Succession).

**B** *Marlborough* does not have the malus of -1 to its survival tests in battles (due normally to its '6' values).

**C** **Fleet in being** [BLP] ② ± numbered 6, 7, 8 and 9 are only available starting from period V (1660, turn 35).

#### XIV.1.2 Overseas and Colonial Policy

##### XIV.1.2.1 The Sea Hounds

**A** Leaders *Drake*, *Hawkins*, *Frobisher*, *Cavendish* are the *Sea Hounds*. They have a yellow symbol instead of a black one.

**A.1** *Drake* The first time *Drake* is reputed dead due to battle loss, attrition or exploration, he is in fact unavailable for the rest of the turn but returns back in play at the beginning of the following turn.

**B** **As Privateers** A IP led by *Sea Hounds* may attack Convoys or Commercial fleets and/or COL/TP of other players, or even Loot European provinces, without ANG having to declare war on that player. ANG can however attack only one such player per turn, and must announce the target country during the military rounds, at the end of the second round at the latest.

**B.1** *Privateer* If commanding a IP unit that was committed to the attack of commercial fleets not at war, a *Sea Hound* must stay the rest of the turn with this IP.

**B.2** There is no loss of Stability for England in doing so as there is no state of war between itself and the attacked country.

**B.3** Once the attack is declared the attacked country and its allies may react with Naval forces (or land forces in TP/COL or provinces) against the units led by the *Sea Hounds*.

**C** **Exploration with Sea Hounds** *Sea Hounds* with Admiral symbols may also be used as Explorers for any discoveries to be made by the English player, including while acting as Privateers.

#### XIV.1.2.2 English Missionaries and Missions

**A** See section XIV.14.7 (Use of Missions and Missionaries) for the general rules.

##### B Religion and availability.

**B.1** *Brewster* is always available. *Penn* and *Blair* are only available if ANG is Protestant/Anglican.

**B.2** Namely, if either *Penn* or *Blair* is alive and ANG is **not** Protestant/Anglican, this *Mis* is immediately removed from the game and may not come back later, including if ANG changes religion.

**B.3** Missions are not affected by religion.

**C** Bonuses given by English Missionaries to COL/TP attempts may be used even on ⊕ settlements.

**D** If ANG is *Protestant*, English Missions give a malus of -2 to COL/TP placement attempts of any other power in the same *Area*.

**E** ANG loses 5VP each time one of his Missions is destroyed.

#### XIV.1.2.3 English Sepoys

**A** **Availability.** *Sepoys* are Indian forces trained to fight alongside European armies. They can only be raised, and used, in *INDIA*, *INDOCHINA* and *INDONESIA*.

**A.1** It is not possible to raise *Sepoys* before the event event VI-17 (The Last of the Great Mughals).

**A.2** One LD of *Sepoys* may be raised in each TP⊕ or COL⊕ each turn. A MAJ having *Sepoys* may not have more than 5 LD of *Sepoys* in play.

**B** **Logistics.** A LD of *Sepoys* costs 5 ₤ and its Maintenance is 3/1 ₤ as Veterans/Conscripts (disregarding if the MAJ is at peace or at war).

**C** **Particularities.** *Sepoys* are LD of the MAJ, sharing its technology.

**C.1** *Sepoys* never cause reactions of Natives of or minor countries in the ROTW. They are not counted for checking the conditions of reactions.

**C.2** *Sepoys* cannot be Incorporated in A counters.

**D** *Clive* The conquistador *Clive* can use the table of conquistadors in *INDIA*. Forces stacked with *Clive* never cause Activation of Natives in *INDIA*.

**D.1** If *Clive* is not in play (lost for any reason), the minimum ☹ in period VII can then use the table of conquistadors in *INDIA* (or a named one if there is one; the leader is determined at the beginning of the turn and can not change).

#### XIV.1.2.4 Few acres of snow

**A** ANG may annex all establishments (COL and TP) of its enemies in an *Area* in *AMERICA*, North of *CHICHIMECA* (excluded) at peace.

**A.1** This count as 1 peace condition, plus 1 per establishment not controlled by ANG in the *Area* at the time of the peace.

##### B Gibraltar

**TODO:** En fait, on doit pouvoir lisser Gibraltar par :

- ANG a un arsenal-présidio "Méditerranée".
- Il ne peut être construit que sur un port présidiable qui touche la Méditerranée et que à partir de pVI.  
=> éventuellement rajouter la présidiabilité de Corse/Sardaigne/Palermo, vu ce que ces ports servent ça devrait pas changer le jeu mais ça semble pas idiot de laisser ANG s'y accrocher si il veut.
- Par exception, ANG peut le construire dans une province qu'il possède (présidio sur lui-même).
- Par exception, ANG peut l'augmenter en phase admin même sans contrôle de la ville.
- Si ANG doit céder la province, il garde le présidio ("je te laisse Majorque, mais je m'accroche à Minorque")
- WoSS ne donne plus Gibraltar, seulement les Baléares. L'anglais n'est plus achetable trivialement par HIS mais les Baléares sont quand même bien, et ANG doit aller choper Gibraltar si il le veut.
- Et pour que Gibraltar/Tanger soient quand même mieux que le reste, un truc à peaufiner un peu sur le thème de "une F+ en 74s guns dans un arsenal Méditerranée à Tanger ou Gibraltar a +2 à l'interception" (à comparer entre les tables d'interception et de détroit fortifié pour trouver la bonne condition/modificateur). Seulement en 74s guns car il faut la technologie adéquate et seulement avec une F+ car il faut les moyens nécessaires.

Du coup, il y a l'option historique, mais aussi d'autres possibilités. Tanger est risqué car le Maroc peut casser le présidio, mais ANG peut aussi jouer à Tanger + attaque du Maroc pour lui prendre une province et en cas de contre-attaque par event diplo, il perd la province au lieu de l'arsenal. Et il y a des possibilités plus loin en Méditerranée. Et pour symétriser les choses, il faut sans doute donner le même pion avec les mêmes règles à HOL qui n'a normalement plus la possibilité de se projeter aussi loin en pVI mais ça laisse plus de what if raisonnables si HOL réussit bien sa pV-VI. Voire aussi à SUE "colonial", parce qu'au point où on en est, c'est pas un pion de plus qui va changer quoi que ce soit. (FRA, TUR, HIS n'ont pas besoin de ça car sont déjà en Méditerranée et PRU, RUS, AUS n'ont pas de bateaux).

Et PVs de fin de jeu

- 30 PVs pour ANG/HOL/SUE si leur arsenal est placé.
- +20 PVs si c'est à Gibraltar ou Tanger.
- 25 PVs pour HIS/TUR si il n'y a pas d'arsenal chez eux ou leurs mineurs.
- 10 PVs pour FRA/AUS (si elle a hérité de l'Italie du Sud) si il n'y a pas d'arsenal chez eux ou leurs mineurs.
- -25 PVs pour HIS/TUR si il y a un arsenal sur leur territoire national.

### XIV.1.3 ANGLIA in play

#### XIV.1.3.1 English Kings, Queens and Ministers

**A Henry VII** reigns in 1492, with values 7/5/6, scheduled to die at the beginning of turn 5. His heir is **Henry VIII**.

**B Henry VIII** is the second English king, with values 6/7/7. His reign is 8 turns long, and he does not test survival during the first 5 turns. At the end of its reign, apply automatically Act of Supremacy (II-1 (1)) as one of the events of the turn.

**C Elisabeth I** arrives through conditions described in event event II-1 (1) (Act of Supremacy). She has values 8/8/6 and her reign will last 8 turns. She does not test survival during the 5 first turns. She cannot be used as a general. During her reign, ANG adds a free maintenance of a  $\mathbb{F}^{\oplus}$  and a  $\mathbb{P}^{\oplus}$ .

**D The Parliament (The English Parliament)**. Because of event IV-7 (1) (English Civil War), **Parliament** may rule in ANG. It has values 5/8/8 and makes no test of survival. It gives a bonus of **+2** to the rolls for all administrative actions (except exceptional taxes, section V.6.2 (Exceptional taxes)).

**E Cromwell (Oliver)** may replace the **Parliament** following event IV-7 (1) (English Civil War). He has values 8/8/9, is still a general  $\times$  A 4.4.4. His Reign is to last the number of turns remaining for the general (of the initial 5 turns). He must test for survival normally. As long as his reign continues, ANG gains a free maintenance of one  $\mathbb{A}^{\oplus}$ .

**F Willem III (van Oranje-Nassau) (William III)**. Event event V-3 (The Glorious Revolution in England) may put the ruler of HOL on the throne of ANG, if HOL is ruled by the House of Orange.

**F.1** A personal union exists between HOL and ANG: that is a mandatory defensive alliance, and a usual offensive alliance. They make an immediate mandatory white peace and can not be at war against each other as long as this lasts. The union ends when the Monarch dies.

**F.2** The Monarch from the House of Orange is controlled by ANG until the end of event V-3 (The Glorious Revolution in England) and by HOL after. HOL makes the survival tests.

**G Pitt (William, 1st Earl of Chatham)** may be named minister through event VII-20 (William Pitt). He has values 9/8/8 and remains a random number of turns; its values can be used for the next monarch's values determination if a succession takes place while he is still alive.

### XIV.1.4 Available counters

**A Military** 4A, 6F, 3P, 15LD/ND, 5LD, 4NTD, 10LDE/NDE, 2 fortresses 1/2, 4 fortresses 2/3, 4 fortresses 3/4, 2 fortresses 4/5, 11 forts, 2 Arsenals 2/3, 2 Arsenals 3/4, Arsenal *Gibraltar* 2/3, 2 Missions (1 only if not *Anglican*), 5 Sepoys LD (and 3 Sepoys LDE).

**B Economical** 14COL, 10TP, 14MNU, 18TF, 4ROTW treaty counters.

**C Royalists** 3A, 1F, 5LD/ND, 5LD, 2NTD, 5LDE/NDE. These counters are used for English civil wars; the FIDELIS REGI uses English fortresses counters.

## XIV.2 FRANCIA

### XIV.2.1 Military assets Overseas

#### XIV.2.1.1 French Privateers

**A** FRA can use only one  $\mathbb{P}$  counter if not using the following rules.

#### **B French Buccaneers.**

**B.1** From period II onward, a second  $\mathbb{P}$  counter can be raised  $\ominus$  and placed in STZ **Caraïbes**, and  $\oplus$  from period III onward. This  $\mathbb{P}$  may only be placed in discovered seas.

**B.2** This is not possible if FRA has a COL $\oplus$  on any sea in the STZ, or if event V-5 (Colbertian Mercantilism in France) already happened, or if **Louis XIV** is or was once king of FRA.

#### **C Licensed Privateers.**

**C.1** Beginning with the reign of **Louis XIV**, or event event V-5 (Colbertian Mercantilism in France), FRA can grant licenses to raise more than one  $\mathbb{P}$ .

**C.2** Each license gives right to raise one more  $\mathbb{P}$  counter, but lowers the number of ND that FRA can recruit this turn by 2 ND (instead of the usual one ND needed for a  $\mathbb{P}$ ) and uses one  $\mathbb{F}^{\ominus}$  of the *basic forces*. Up to 3 licenses can be given.

**C.3** Each license given allows FRA to draw one Privateer Admiral from those available at this turn. If none are, one unnamed Privateer Admiral (of hierarchical rank X) can be used (at most one, even if more than one License is accorded).

**C.4** Licensed privateers have a red symbol instead of a yellow one.

**C.5** List of licensed privateers: *d'Estrées, Bart, Forbin, Duguay-Trouin, Cassard, d'Estaing*.

#### XIV.2.1.2 French Missionaries and Missions

**A** See section XIV.14.7 (Use of Missions and Missionaries) for the general rules.

<p>[R]274</p> <p>Francia</p> <p><b>B Religion and availability.</b>  <i>B.1</i> French MIs and Missions are either <i>Catholic</i> or <i>Protestant</i>. <i>Catholic</i> counters have the usual French shield while <i>Protestant</i> counters have the HUGUENOTIS shield.  <i>B.2</i> If FRA is <i>Catholic</i>, any of its <i>Protestant</i> counters currently in play are immediately destroyed. Missions go back to the counters pool and MIs are permanently removed from the game.  <i>B.3</i> Similarly, if FRA is <i>Protestant</i>, any of its <i>Catholic</i> counters currently in play are immediately destroyed. Missions go back to the counters pool and MIs are permanently removed from the game.  <i>B.4</i> Note that the number of counters, as well as the turns of availability are very different for each religion.  <b>C</b> French Missions give a bonus of <b>+2</b> to the diplomacy on minor countries in the ROTW, or to raise French Indian allies (see below), when used as emissaries (thus the global bonus is <b>+5</b> instead of <b>+3</b>).</p> <p><b>XIV.2.1.3 French Cipayes</b></p> <p><b>A Availability.</b> <i>Cipayes</i> are Indian forces trained to fight alongside European armies. They can only be raised, and used, in <b>INDIA</b>, <b>INDOCHINA</b> and <b>INDONESIA</b>.  <i>A.1</i> It is not possible to raise <i>Cipayes</i> before the event event VI-17 (The Last of the Great Mughals).  <i>A.2</i> One LID of <i>Cipayes</i> may be raised in each TP⊕ or COL⊕ each turn. A MAJ having <i>Cipayes</i> may not have more than 5 LID of <i>Cipayes</i> in play.</p> <p><b>B Logistics.</b> A LID of <i>Cipayes</i> costs 5 ⌘ and its Maintenance is 3/1 ⌘ as Veterans/Conscripts (disregarding if the MAJ is at peace or at war).</p> <p><b>C Particularities.</b> <i>Cipayes</i> are LID of the MAJ, sharing its technology.  <i>C.1</i> <i>Cipayes</i> never cause reactions of Natives of or minor countries in the ROTW. They are not counted for checking the conditions of reactions.  <i>C.2</i> <i>Cipayes</i> cannot be Incorporated in A counters.</p> <p><b>D Dupleix and Bussy</b>  <i>D.1</i> Leaders <i>Dupleix</i> and <i>Bussy</i> can use the table of conquistadors (table IV (Conquistadors Effects)) in <b>INDIA</b>. Forces with those 2 leaders never cause Activation of Natives in <b>INDIA</b>.  <i>D.2</i> <i>Cipayes</i> raised or maintained in the province where <i>Dupleix</i> is are always Veterans (even if only 1 ⌘ is paid).  <i>D.3</i> If neither <i>Dupleix</i> nor <i>Bussy</i> is in game, the minimum ☹@ in period VII can then use the table of conquistadors in <b>INDIA</b> up to Turn 58 (included).</p> <p><b>XIV.2.1.4 French Indian allies</b></p> <p><b>A How to raise them</b> French Indian allies may be obtained only in <b>QUÉBEC</b> or <b>GRANDS LACS</b>. At the end of each administrative phase, FRA may roll 1d10 for each <i>Area</i>, add <b>+2</b> if there is a Mission therein, and <b>+ ?</b> the Manoeuvre of an emissary in the <i>Area</i> (☹, ✨, MIs or Mission), and subtract <b>-1</b> for each TP⊕ of COL (any level) of other powers in the <i>Area</i>. On a result of 7 or more, an Indian ally LID is placed in any TP or COL of the <i>Area</i>.  <i>A.1</i> If FRA did eliminate any Indian in the <i>Area</i>, it can raise no more Indian Ally therein (note that in case of Activation of Natives, it can choose not to defend itself, even with colonial militia).  <i>A.2</i> Indian allies can not go outside <b>QUÉBEC</b> or <b>GRANDS LACS</b> or adjacent regions. They can not be incorporated in army counters.  <i>A.3</i> Indian allies are always withdrawn at the end of the turn. They may come back on the following turn by the same mechanism.</p> <p><b>B Military advantages</b>  <i>B.1</i> They are LID of FRA, sharing its <i>Land Technology</i>. They never cause reactions of Natives or of minor countries in the ROTW. They are not counted for checking the conditions of reactions.  <i>B.2</i> Any stack in which they are have a Manoeuvre of 5 (or 6 if the leader already has 6).</p>	<p>Specific Rules— master – 2016-04-14</p> <p>[R]275</p> <p><i>B.3</i> If they are alone in attack, they are not adversely affected by terrain.  <i>B.4</i> After any battle, Indian allies are withdrawn from the map and replaced at the end of the next round in any french COL or TP in <b>QUÉBEC</b> or <b>GRANDS LACS</b> (their region) that is free of enemy.</p> <p><b>XIV.2.1.5 French Colonial Militia</b></p> <p><b>A</b> French colonial militia (one LDE for each 2 levels of COL– round up) are <i>Veteran</i>.</p> <p><b>XIV.2.1.6 At sea</b></p> <p><b>A Fleet in being</b> [BLP] ⑦ ± numbered 6, 7, 8 and 9 are only available starting from period V (1660, turn 35).</p> <p><b>XIV.2.1.7 Few acres of snow</b></p> <p><b>A</b> FRA may annex all establishments (COL and TP) of its enemies in an <i>Area</i> in <b>AMERICA</b>, North of <b>CHICHIMECA</b> (excluded) at peace.  <i>A.1</i> This count as 1 peace condition, plus 1 per establishment not controlled by FRA in the <i>Area</i> at the time of the peace.</p> <p><b>XIV.2.2 FRANCIA in play</b></p> <p><b>XIV.2.2.1 Monarchs of France</b></p> <p><b>A Charles VIII</b> is the monarch in 1492 is <b>Charles VIII</b>, with values 5/7/9, scheduled to die at the beginning of turn 4.</p> <p><b>B François I<sup>er</sup></b> is the first French Monarch after event I-3 (1) (Wars in Italy (Napoli)). He has values 5/8/9 and is a general whose military values are rolled as usual. His reign will last at least 4 turns (if less is rolled, consider it is 4 turns).</p> <p><b>C Henri IV.</b> At the end of event III-11 (Wars of Religion in France), the French Monarch will be either <b>Henri de Navarre</b>, <b>Henri IV</b> or <b>Henri de Guise</b>. See especially event part III-D (4).α (Designation of the Heir) for all details. The heir is either 6/9/7 or 9/9/9.</p> <p><b>D Louis XIV (le Roi Soleil)</b> is the first French king after event IV-15 (Richelieu) or event IV-16 (The Fronde). He has values 7/6/9 but he is a Baby at the beginning, with a length of reign of 12 turns. He will make no test of survival during the 5 first turns. He can not be used as a general. When he is adult, FRA adds a free maintenance of one A⊕ and one NID.</p> <p><b>E Revolution.</b> Event event VII-5 (The French Revolution) may overthrow the French king and replace him with a somewhat republican government. This government is represented by either <b>Convention</b> (values 3/6/7) or <b>Terror (Reign of Terror)</b> (values 5/6/9). None of them roll for survival, neither can they be used as generals.</p> <p><b>XIV.2.2.2 Ministers of France</b></p> <p><b>A Richelieu (Armand Jean du Plessis de)</b> may be named minister through event IV-15 (Richelieu). He has values 9/8/7 and remains a random number of turns; the successor of the current monarch will be <b>Louis XIV</b>.</p> <p><b>B Mazarin (Jules)</b> may be named minister through event IV-16 (The Fronde). He has values 7/8/7 and remains till <b>Louis XIV</b> becomes an adult.</p> <p><b>C Colbert (Jean-Baptiste)</b> may be named minister through event V-5 (Colbertian Mercantilism in France). He has values 8/9/8 and remains a random number of turns.</p> <p><b>XIV.2.2.3 Versailles</b></p> <p><b>A</b> During the adulthood of <b>Louis XIV</b>, all expenses put in Prestige are multiplied by 150% for the construction of Versailles</p>

Those forces are distinct.</p> <p>A.1 POL has distinct free maintenance for each country.</p> <p>A.2 POL can raise forces only in their national provinces, or at doubled cost in other provinces.</p> <p>A.3 POL has a no CB if some national territory of LITUANIA is owned by other countries. But for other effects, provinces of both countries of national provinces.</p> <p>A.4 Generals may depend from one of these countries, and can lead only forces of their country (or a multi-national stack). Other generals (with no country specified) are only constrained by the Hierarchy rules.</p> </div> <div data-bbox="1122 893 2121 1133"> <p><b>B Union of Lublin.</b> It is established by event II-13 (Union of Lublin).</p> <p>B.1 POL is now one country: every national provinces of POLONIA and LITUANIA are national provinces of POL.</p> <p>B.2 Units of POLONIA and LITUANIA are no more differentiated, and their <i>basic forces</i> and their leaders are associated.</p> <p>B.3 Add <b>+2</b> to the die-rolls for determining the length of reign of a new Monarch (this effectively cancels §A.1 of section XIV.3.1.1 (Elective Monarchy)).</p> <p>B.4 Some limits of POL are raised.</p> <p>B.5 The Union of Lublin can be broken if a MAJ imposes a peace of level 3 or higher against POL, and forfeits all conditions of peace in order to break the Union. It is also broken if POL is not Catholic.</p> </div> <div data-bbox="1122 1141 2121 1173"> <div>XIV.3.2.3 The two Polish Capitals</div> </div> <div data-bbox="1122 1181 2121 1444"> <p><b>A</b> The Polish capital is initially set to <i>Kraków</i> in <b>Małopolska</b>.</p> <p><b>B Mazowia</b> is owned by <b>POLONIA</b> in 1492 as a permanent Vassal but is not a national province of <b>POLONIA</b>.</p> <p><b>C</b> During the reign of <i>Zygmunt I</i>, POL can annex <b>Mazowia</b> by using one Diplomatic actions and spending 100 ⚡.</p> <p>C.1 Alternatively, POL can make a war against MAZOVIA (it has no CB). It annexes it by imposing an unconditional surrender on it. In both cases, the province then becomes a national province of POLONIA, and MAZOVIA disappears.</p> <p><b>D</b> At any point after annexation of <b>Mazowia</b>, during diplomacy phase, POL can decide that <i>Warszawa</i> is its new capital. POL gains <b>2</b> Stability immediately. From now on, <i>Warszawa</i> and <i>Kraków</i> are both capitals of POL for the rules of peace, except that <b>Małopolska</b> can be annexed as the result of Peace by another country, at which point it ceases to have a Capital in there.</p> </div> <div data-bbox="1122 1452 2121 1484"> <div>XIV.3.2.4 Liberum Veto or Absolutism</div> </div> <div data-bbox="1122 1492 2121 1513"> <p><b>A Liberum Veto.</b> Event event IV-10 (1) (Liberum Veto) has the following consequences:</p> </div>
---	--

<div>[R]278</div> <div>Polonia</div> <p>A.1 It nullifies the <b>+2</b> modifier to the die-roll for determining the length of reign of a new Monarch given by the Union of Lublin (the <b>-2</b> malus thus resumes).</p> <p>A.2 Declaration of war by POL costs <b>3</b> Stability without CB, and <b>2</b> Stability with a CB (and 0 with a free CB).</p> <p>A.3 POL has a malus of <b>-5</b> instead of <b>-3</b> to raise its Stability if at war against a MAJ at the end of a turn.</p> <p>A.4 POL can not maintain fortresses of level higher than 3 if at peace.</p> <p>A.5 If RUS is at war, and POL not, RUS can cross provinces in POL (no siege, no pillage, no supply into or through). If it does so, POL has a free CB against RUS the very next turn the trespassing happened.</p> <p><b>B War for Absolutism.</b> After event IV-10 (1) (Liberum Veto), each time there is a new Monarch in POL (before the events), POL can begin a war to establish Absolutism in the country. Event event IV-B (Civil War in Poland) occurs this turn as one of the 4 events.</p> <p>B.1 If the war is successful in establishing Absolutism, all the effects of the Liberum Veto are nullified.</p> <p>B.2 Absolutism can end as a result of a war against POL. If a MAJ imposes a peace of level 3 or higher against POL, and forfeits all conditions of peace, this ends Absolutism. It cannot be imposed anew.</p> <p><b>XIV.3.2.5 Polish Ukraine</b></p> <p><b>A</b> Provinces in UKRAINA are not national provinces of POL (neither LITUANIA nor POLONIA). They have their own army of Cossacks.</p> <p>A.1 One <b>A</b> and 4 <b>LID</b> can be used by POL and raised in UKRAINA as long as it owns at least one province in the country. Those forces are identical to Polish forces.</p> <p><b>B Agitations of Cossacks.</b></p> <p>B.1 When there is an Ukrainian <b>A</b> controlled by POL, it can let it cause some Agitations by its own in adjacent countries. This has to be decided at the beginning of the Military Phase. This is not possible if POL is at war against TUR or CRIMEA.</p> <p>B.2 The army is taken over from the map and POL chooses the target of the Agitations: RUS or TUR. It then rolls 1d10, and add <b>+2</b> if the <b>A</b> is <b>⊕</b>, and a further <b>+2</b> if the target is TUR. A result of 10 or higher causes a revolt that is rolled on the table of the target country. If this revolt is not north of <b>Alep</b>, <b>Kordistān</b> and <b>Azarbāyadjān</b> (not included), it does not happen. The army is unavailable for the whole turn and is replaced in UKRAINA at the end of the turn (if there is no province available, it is destroyed).</p> <p><b>C</b> Event event IV-17 (2) (Revolt of the Cossacks) separates UKRAINA from POL, and so its forces can no more be used by POL.</p> <p><b>D</b> Religious attitude regarding Orthodoxy may affect the use of the forces of UKRAINA by POL.</p> <p><b>XIV.3.2.6 Polish Annexations and Crusades</b></p> <p><b>A</b> POL may annexe completely the following countries: DON CASSACKIA, MOLDAVIA, WALACHIA and TRANSILVANIA. This is only possible if the country is adjacent to POL and POL is not Protestant.</p> <p><b>XIV.3.2.7 POLONIA as a minor country</b></p> <p><b>A</b> See §E (Poland-Prussia) of subevent XXVI.1.3.2 (Eight-players game) for the conditions of the transfer to <b>PRUSSIA</b>.</p> <p>A.1 The events event VI-11 (War of Polish Succession), event VI-13 (War of Austrian Succession) and event VII-1 (The Seven Years War) trigger the change to <b>PRUSSIA</b> if in period VI. If none of those happen, the transfer happens at the beginning of turn 51.</p> <p><b>B</b> POLONIA immediately becomes a MIN. The ongoing wars continue.</p> <p>B.1 POLONIA never uses the CB proposed by events unless if they are mandatory.</p> <p>B.2 If a dynastic union with SAXONIA is effective due to event V-12 (Augustus II, a Saxon king in Poland), the union is kept: the two MIN are as one for diplomacy purposes. The only way to propose a separate peace is through an unconditional peace. The union is kept as long as there is no change of dynasty (which can happen only by events such as event VI-11 (War of Polish Succession) or event VII-7 (First Partition of Poland)).</p>	<div>Specific Rules— master – 2016-04-14</div> <div>[R]279</div> <p><b>C</b> POLONIA never uses the CB offered by events, unless they are mandatory.</p> <p><b>D</b> There is a permanent malus of <b>-3</b> to have POLONIA enter a war (unless Absolutism was established, see below) and to diplomacy on it.</p> <p><b>E</b> <i>Land Technology</i> and <i>Naval Technology</i> of POLONIA is linked to <i>Orthodox</i> counters, and raises at the same time (but stays where it is if ahead of the <i>Orthodox</i> counter).</p> <p><b>F</b> If RUS is at war, and POL not, RUS can cross provinces in POL (no siege, no pillage, no supply into or through). If it does so, the Patron of POL has a CB against RUS the very next turn the trespassing happened, and if used, POL enters fully in the war with no test (and is place in EW).</p> <p><b>G</b> If Absolutism is established in POLONIA (because POL as a Major power did it, or because of events), neither the Russian trespassing nor the <b>-3</b> on Diplomacy or entry in war apply. Additionally, POLONIA has a bonus of <b>+2</b> to its reinforcements die-rolls.</p> <p><b>XIV.3.3 Religious attitudes</b></p> <p><b>XIV.3.3.1 Regarding Orthodoxy</b></p> <p><b>A</b> POL has to choose an attitude regarding Orthodoxy at the time of event event I-8 (1) (Reformation).</p> <p><b>B Conversion of Orthodoxes.</b> This is the historic choice. No changes.</p> <p><b>C Tolerance of Orthodoxes.</b></p> <p>C.1 POL can use no more forces of UKRAINA (and loses the associated free maintenance for these forces).</p> <p>C.2 The Cossacks won't revolt per event IV-17 (2) (Revolt of the Cossacks).</p> <p><b>D Support of Orthodoxy. Warning: this option is experimental, not tested and should be used with care.</b></p> <p>D.1 Main religion of POL is now Orthodoxy. It gains actions for colonisation and some conquistadors.</p> <p>D.2 POL can annexe and destroy any Khanate country for the remainder of the game, if the destroyed minor is adjacent to a province of POL.</p> <p>D.3 As long as POL owns a province in UKRAINA, it raises one free <b>LID</b> of UKRAINA each turn, and has 2 <b>LID</b> added to the free maintenance of the forces of UKRAINA.</p> <p>D.4 Forces of LITUANIA are not adversely affected by the restrictions of §B (Wasteland) of section VIII.4.1 (Special Movements) (as well as the forces of UKRAINA). This is not true for forces of POLONIA.</p> <p>D.5 Many events are modified. The Union of Lublin and the Absolutism in POL will not be possible. POL is Conciliatory when the second Reformation occurs.</p> <p><b>XIV.3.3.2 Regarding Protestantism</b></p> <p><b>A</b> POL has to choose an attitude regarding Protestantism at the time of event I-8 (2) (Growth of the Reformation).</p> <p><b>B Catholic/Conciliatory.</b> This is the historic choice. No changes.</p> <p><b>C Catholic/Counter-Reformation.</b></p> <p>C.1 Provinces in the <i>DUCHY OF PRUSSIA</i> quit POL and are annexed by BRANDENBURGUM.</p> <p>C.2 POL has a CB against any Protestant country until the end of period IV.</p> <p>C.3 It can abandon all peace conditions when obtaining a unconditional surrender over a Protestant country and ask restoration of Catholicism in this country. It gains 20 VP if it as a MAJ, and 10VP if it is a MIN power.</p> <p><b>D Protestantism.</b> POL becomes Protestant.</p> <p>D.1 The Union of Lublin is broken and will not be possible.</p> <p>D.2 Various limits per turn/period are modified. POL gains actions for TP/COL and increased commercial capacities.</p> <p>D.3 The free maintenance of the Ukrainian army is reduced to <b>LID</b> in periods II and III, and none afterwards.</p> <p>D.4 POL can annexe any capital province of HANSA (and possibly destroy this country) if the province is adjacent to POL.</p>

First, there was the Great Elector Frederick-William, that managed to pull his territories out of the Thirty Years War in a good state. Then Frederick I that obtained the royal dignity and then Frederick-William I, the Soldier-King, that built a modern army for Prussia. And finally Frederick II, that led the country to brilliant victories but also to the verge of destruction.</i></p> </div> <div data-bbox="1122 1423 2123 1511"> <p><b>A Friedrich-Wilhelm (The Soldier King).</b> If PRU becomes a MAJ, before turn 51, the monarch is <b>Friedrich-Wilhelm</b>, with values 8/5/9. He is scheduled to survive until the beginning of turn 51. He is not a general (the <i>Friedrich-Wilhelm</i> general is the Great Elector).</p> </div>
---	---

<div>[R]284</div> <div>Russia</div> <p><b>B Friedrich II.</b> At the end of the reign of <b>Friedrich-Wilhelm (The Soldier King)</b> (usually beginning of turn 51), or immediately if the event VII-1 (The Seven Years War) is rolled for and activated, <b>Friedrich II</b> takes the throne of <b>PRUSSIA</b>. He has values 9/9/9, is a general <b>Friedrich II</b> (♣ &lt;♥&gt; A 6.6.6 -1 [T51–T59]). He is scheduled to last 9 turns, and does not roll for survival for the first 6 turns.</p> <p><b>B.1</b> He makes survival tests at the end of battles normally (no -1 due to his 6 characteristics).</p> <p><b>B.2 The hay stack escape</b> The first time <b>Friedrich II</b> should die in battle, he escapes unharmed.</p> <p><b>B.3</b> During his Reign, <b>PRUSSIA</b> may break any Alliance for the cost of 1 Stability (instead of the usual 2).</p> <p><b>B.4</b> During his reign, PRU has a Military revolution each turn.</p> <p><b>XIV.5.2.2 Available counters</b></p> <p><b>A Military</b> 4A, 2LD/ND, 8LD, 2NTD, 3LDE/NDE, 2 fortresses 1/2, 4 fortresses 2/3, 4 fortresses 3/4, 1 fortresses 4/5, 2 forts.</p> <p><b>B Economical</b> 2COL, 2TP, 5MNU, 1 special MNU, 2TF counters.</p> <p><b>XIV.6 RUSSIA</b> </p> <p><b>XIV.6.1 Russian under-development</b></p> <p><b>A Economic weakness.</b> RUS has a malus of -1 to die-rolls when attempting to raise its DTI, FTI or to place MNU. This malus ends when S<sup>1</sup>-Petersburg is finished building.</p> <p><b>B</b> National provinces of RUS are wasteland provinces, see §B (Wasteland) of section VIII.4.1 (Special Movements) and §G (Wasteland) of section VII.3.2 (Purchasing fortresses). Both effects end when S<sup>1</sup>-Petersburg is finished building, or at the end of event VI-1 (The Great Northern War), whichever is first.</p> <p><b>C Construction of S<sup>1</sup>-Petersburg (Санкт-Петербург)</b></p> <p><b>C.1</b> A new major Russian city can be built on the Baltic sea, beginning with period V. The Russian player decides of a province whose city he controls among <b>Karelen</b>, <b>Ingermanland</b>, <b>Estland</b>, <b>Livonija</b> and <b>Kurland</b>.</p> <p><b>C.2</b> RUS has to spend 100 ₤ per turn during 3 turns (consecutive or not). Such an expense can not be made if the city is besieged or the province is pillaged. If ever the RUS loses the military control of the province, the process will have to be renewed from the start.</p> <p><b>C.3</b> On the first spending, put the <b>S<sup>1</sup>-Petersburg (Санкт-Петербург)</b> fortress counter on level 0. Increase it by one level for each turn the spending is done. If besieged, the city has a fortress level that is the maximum of the intrinsic or regular fortress of the province and the current <b>S<sup>1</sup>-Petersburg</b> fortress.</p> <p><b>C.4</b> If RUS controls the city at the end of a turn following the third expense, and the city is not besieged, then he annexes the province immediately (with no need of peace treaty) and puts here a fortress of level 3, using the <b>S<sup>1</sup>-Petersburg</b> counter. The intrinsic minimal fortification of the city is now the level 3 if RUS controls it, and 2 if conquered by another power. Note that the maximum level is the one authorised by the land technology of RUS. The level of the fortress can then be raised using usual rules.</p> <p><b>C.5</b> The former fortresses and cities in the province do not exist any more, for the remainder of the game.</p> <p><b>C.6</b> The income of the province for the RUS equals the normal income multiplied by the level of the fortress in the province, with a maximum of 20 ₤.</p> <p><b>C.7</b> If another player pillages the province, its uses the Russian income. If the province is ceded to another player, the previous (unmodified) income is used by this player; the fortification is of level 3 and can not be raised. The city remains S<sup>1</sup>-Petersburg.</p> <p><b>C.8 Naval Shipbuilding.</b> The construction limit of NID per turn of RUS is raised by 2 when RUS controls S<sup>1</sup>-Petersburg. It also gains one action of Concurrence, its limits of DTI is increased by one, and the limit of FTI is increased by one in period VII.</p>	<div>Specific Rules— master – 2016-04-14</div> <div>[R]285</div> <p><b>C.9 A new capital.</b> If <b>Peter the Great</b> is the Russian Monarch, or if its reign has ended, S<sup>1</sup>-Petersburg becomes a new capital of Russia (who has from now on 2 capitals).</p> <p><b>D Arkhangelsk and the Russia CTZ.</b> Arkhangelsk is a Russian port on the White Sea, located in Europe, but effectively out of the European map. It cannot be attacked, blockaded or conquered.</p> <p><b>D.1 Creation of the Port of Arkhangelsk.</b> Arkhangelsk is created by the event III-17 (Arkhangelsk and the Muscovy Trade Company), or automatically in 1615 (turn 26) if the event did not occur. As long as the port is not created, the Russian player cannot build any commercial fleets.</p> <p><b>D.2</b> If Arkhangelsk is created only in 1615 (and not by event) the advantages of the Muscovy Trade companies to England (see event description) are not applied.</p> <p><b>D.3 Russia CTZ.</b> The Russia CTZ does not exist before the creation of Arkhangelsk. Once that port is created, the CTZ brings a monopoly income of 5 ₤. This income is increased to 10 ₤ once S<sup>1</sup>-Petersburg is created.</p> <p><b>E Colonial expansion</b> The COL and TP built by RUS must be at supply distance by land from either European provinces of RUS or from another COL or TP.</p> <p><b>E.1</b> For this rule only, the <b>KAMCHATKA</b> is considered “at supply distance by land” to the provinces touching the impassable area north of the <b>Mer d’Okhotsk</b>, to the coastal provinces of <b>AMOUR</b> and to the provinces of <b>ALASKA</b> (see also §H (Reaching the Bering Strait.) of section I.1.2 (Provinces and Sea Zones)).</p> <p><b>E.2</b> Similarly, all the provinces of <b>ALASKA</b> are “at supply distance by land” to the provinces of <b>OREGON</b> (but a COL or TP has to be put in <b>OREGON</b> before reaching <b>CALIFORNIA</b>).</p> <p><b>F Yermak [BLP]</b> <b>Yermak</b> may use the table of conquistadors in <b>SIBERIA</b>.</p> <p><b>G Foreign trade index</b> RUS has a specific FTI for COL and TP operations, that is different from its FTI (see §B (Other Trade Indexes) of section VI.6.2 (Trade index improvement)).</p> <p><b>H Sebastopol (Севастополь)</b></p> <p><b>XIV.6.2 The Russian military system</b></p> <p><b>A Russian conquests.</b> When the Russian player wins a war and receives provinces, he can annex the province containing the minor country capital. In this case, the minor has a new capital in another province (chosen by its controlling player). If the MIN has no province left, it is destroyed.</p> <p><b>A.1 Validity.</b> This is valid only if the conquered province is adjacent to a Russian province, connex by land to a Russian National province, and occupied by a Russian military unit (not by a Russian minor ally or vassal).</p> <p><b>B Russian Boyars Army.</b> Markers of both the land and naval technology of Russia can never be higher than the boxes where the “Orthodox” minor entities technology markers are. This is enforced at the end of the administrative phase (after possible moves of minors and mobile markers).</p> <p><b>B.1</b> The Russian player can use no more than 5 army counters and 1 fleet counter before a reform. The number and types of detachments are not limited.</p> <p><b>B.2 Pugnacity.</b> RUS will be forced to sue for peace only if it stands for 3 consecutive turns at -3 Stability level (instead of the regular 2 turns).</p> <p><b>C Russian army reform.</b> RUS can reform its army using one of the two following possibilities:</p> <p><b>C.1</b> It is the reign of <b>Peter the Great</b>; roll for 1 revolt in RUS.</p> <p><b>C.2</b> It is in period VI or VII; roll for 3 revolts in RUS and RUS loses 1 Stability.</p> <p><b>D The New Russian Army.</b></p> <p><b>D.1</b> The number of counters increased to 6 A and 3 F.</p>
---	--

<div>[R]286</div> <div>Russia</div> <p>D.2 The number of artillery in each A is increased.</p> <p>D.3 RUS is not limited in Technology levels. RUS is now both a “Latin” and “Orthodox” MAJ: the “Orthodox” Land Technology will still be dragged by the progression of RUS but RUS may use the “Latin” markers for technological lateness bonuses.</p> <p>D.4 Diminish by 1 LD the limit per turn of land force building.</p> <p>D.5 The rules of §B (Russian Boyars Army.) of this section are not applied anymore.</p> <p><b>E The Cossacks.</b> If the Russian power controls one or more of the provinces of UKRAINA (as Vassals or by annexation): <b>Ukrainya, Poltava, Podolie, Zaporozhye, Don, Donets</b>; or if RUS owns all provinces in CAZAN or ASTRACAN, it receives the following advantages.</p> <p>E.1 It may use the 4 Cossack LD as its own forces. They may be incorporated in armies. By exception, these LD are always <i>Conscripts</i>.</p> <p>E.2 He raises one free Cossack LD each turn in one of these provinces, and has 2 LD added to its basic forces (by exception, these LD are maintained as <i>Conscripts</i>).</p> <p>E.3 In period III and IV, it has each turn a free simple campaign to move a force in <b>SIBÉRIE</b>, and attack. This campaign may be added to a regular campaign during any round.</p> <p><b>F Fluvial Port.</b> Beginning with <b>Peter the Great</b>, Russia can use the rivers in Ukraynia as a fluvial ports. One F can be built then stored on one of the following rivers, in specified provinces:</p> <p>F.1 on the Don river (in <b>Don</b>) or the Donets river (in <b>Donets</b>) acting as a port on <b>Mer Noire occidentale</b> only, and having the possibility to blockade Azov only;</p> <p>F.2 on the Dniepr river (in <b>Zaporozhye</b>) acting as a port on <b>Mer Noire orientale</b> only, to put blockade on Odeśsa;</p> <p>F.3 on the Volga river (in <b>Samara</b>) acting as a port on <b>Mer Caspienne</b> only, to put blockade on Aŝtragan.</p> <p>F.4 There can be at most one such F at the same time (but it can be destroyed and built anew on the same or another river). Until it gains a proper port, it can only operates for a blockade on the specified fortress, or for naval interceptions and battles in the specified sea zone. It has to go back at part at the end of each turn.</p> <p>F.5 The F can be blockaded (at the mouth of the river) as if it was in a port bordering the sea. If its port province is not available at the end of a turn, the F is destroyed.</p> <div>XIV.6.3 Religious Attitude of Russia</div> <p><b>A</b> In 1492, RUS is seen as the Champion of the Orthodox religion. When event I-8 (1) (Reformation) occurs, it may change this attitude to <i>Religious Tolerance</i>, or remain with attitude <i>Championship of Orthodoxy</i>.</p> <p><b>B Religious Tolerance.</b> Add one diplomatic action to RUS in periods I to IV. RUS has no malus to diplomacy because of religious troubles between Christians. RUS loses the free maintenance of one A⊖ for the rest of the game, and can not benefit of the rules about Cossacks (see §E (The Cossacks.) of section XIV.6.2 (The Russian military system)).</p> <p><b>C Championship of Orthodoxy.</b> This is the historical option. No change has to be made.</p> <div>XIV.6.4 RUSSIA in play</div> <div>XIV.6.4.1 Great Russian Monarchs</div> <p><b>A Ivan III (Ивана III Васильевич)</b> is the monarch in 1492, with values 6/7/8, that dies at the beginning of turn 4.</p> <p><b>B Ivan IV (Иоанн IV Васильевич Грозный)</b> is the first monarch to begin its reign after period I (turn 7 or later). Ivan the terrible begins his reign as a child and will last 11 turns. His values are 6/9/8 (remember to lower them by 2, then 1, during the first 2 turns). He does not test for survival during the first seven turns of his reign.</p> <p>B.1 He is a general <i>Ivan the terrible</i> (A 5.2.2 -1 [Event II-?]) from the third turn of his reign on.</p> <p>B.2 RUS gains one A⊕ of <i>basic forces</i> during his reign, beginning with the third turn.</p>	<div>Specific Rules— master – 2016-04-14</div> <div>[R]287</div> <p>B.3 Event event III-15 (1) (Oprichnina) depends on <b>Ivan IV</b>.</p> <p><b>C The Time of Troubles</b> Due to event event IV-17 (1) (The Times of Troubles in Russia), <b>Boris Godunov (Борис Фёдорович Годунов)</b> of values 5/8/4 (and general <i>Godunov</i> (X A 2.3.2 [Event IV-17])) may rule in RUS, and be followed by either <b>Romanov (Михаил Фёдорович Романов)</b> (values 6/5/6) or <b>Dmitry (Дмитрий Иванович)</b> (values 4/7/5 and general <i>Dmitry</i> (X A 4.2.2 [Event IV-17])). See the conditions in the event.</p> <p><b>D Peter the Great (Пётр I Алексеевич Великий)</b> is a special Russian monarch who arrives by one of the 2 following conditions:</p> <p>D.1 event event V-11 (Peter the Great) happens;</p> <p>D.2 it is period V or after and the Russian monarch is adult, has at least 8 in ADM and 18 in the sum of his characteristics.</p> <p>D.3 This monarch is then <b>Peter the Great</b>. It may enter only once per game. <b>Peter the Great</b> has the values 9/9/9 as a monarch (regardless of what could have been obtained), is also a general <i>Peter the Great</i> and an admiral. He reigns 7 turns, with no survival test during the first 5 turns.</p> <p>D.4 The <i>basic forces</i> of RUS is raised by one A⊕ during his whole reign.</p> <p>D.5 At the moment when the Monarch is known as <b>Peter the Great</b>, the Stability of RUS increases of 2.</p> <p><b>E Peter II (Пётр II)</b> is the first sovereign whose reign begins in period VII. He has values 3/3/3 and his reign last 1 turn. At the time he takes power, RUS makes a mandatory white peace with all its enemies. His successor is <b>Catherine II</b>.</p> <p><b>F Catherine II (Екатерина II Великая)</b> has values 7/9/8, and her reign last 5 turns. She does no test for survival during the first 3 turns. She cannot be used as general. The <i>basic forces</i> of RUS is raised by one A⊕ during her whole reign.</p> <p><b>G Potemkin (Григорий Александрович Потёмкин-Таврический)</b> may be named minister through event VII-14 (Potemkin). He has values 9/8/8 and remains a random number of turns; its values can be used for the next monarch's values determination if a succession takes place while he is still alive.</p> <div>XIV.6.4.2 Available counters</div> <p><b>A Military</b> 6 A (5 usable at start), 3 F (1 usable at start), 1P, 10LD/NID, 10LD, 2NTID, 8LDE/NIDE, 4 fortresses 1/2, 4 fortresses 2/3, 2 fortresses 3/4, 1 fortresses 4/5, special S:Petersburg counters, Arsenal 2/3 Şeḫaṣṣṭopol, 10 forts.</p> <p><b>B Economical</b> 11COL, 5TP, 8MNU, 7TF, 2 ROTW treaty counters.</p> <div>XIV.7 SUECIA</div> <div>XIV.7.1 SUECIA as a Minor Country</div> <p><b>A SUECIA</b> has commercial fleets and a base FTI of 3, or 4 in periods IV to VII. It has neither commercial fleet action nor COL/TP colonial.</p> <p><b>B Union of Kalmar</b> SUECIA is linked to DANIA in 1492 by the <i>Union of Kalmar</i>. No independent diplomacy is possible on SUECIA (no counter available).</p> <p>B.1 If a war is declared upon DANIA, SUECIA is called as an ally of DANIA ; if DANIA declares a war, SUECIA makes a limited intervention on the side of DANIA, and the converse is true also (DANIA helps SUECIA).</p> <p>B.2 Peace is made normally, the two countries being allies.</p> <p>B.3 POR always play SUECIA when activated in a war, excepted if POR is with the enemy side.</p> <p><b>C End of the Union of Kalmar</b></p> <p>C.1 This alliance is broken when event event II-4 (End of the Union of Kalmar) occurs.</p>
--	--

<div>[R]288</div> <div>Suecia</div> <p>C.2 SUECIA is Neutral when the Union breaks, and is now subject to normal diplomacy.</p> <p>C.3 SUECIA as a MIN power receives all its reinforcements as <i>Veteran</i>.</p> <p><b>D Transfers.</b></p> <p>D.1 For the transfer from <b>PORTUGALLIA</b>, see §B (Portugal-Sweden) of subevent XXVI.1.3.2 (Eight-players game)</p> <p>D.2 For the possible transfer to <b>AUSTRIA</b>, see §D.4 (Sweden-Austria) of subevent XXVI.1.3.2 (Eight-players game)</p> <p><b>XIV.7.2 The Swedish Crown</b></p> <p><b>XIV.7.2.1 Relations with DANIA</b></p> <p><b>A Claims of DANIA</b> At the time of the transfer, DANIA claims the Swedish Crown. As long as it has not abandoned its claims, SUE can attempt no diplomacy on DANIA and has an additional malus of -2 to make peace with it.</p> <p><b>B</b> DANIA will abandon its claim to the Swedish Crown by signing a unfavourable peace with SUE. This will count as one condition of the peace won by SUE.</p> <p>B.1 When DANIA pretends no more to the Swedish Crown, SUE can do diplomacy on DANIA.</p> <p>B.2 SUE cannot annex any longer any national province of DANIA. However, DANIA is considered to have diplomatic status of AN achievable by SUE (value of 10) by normal rules.</p> <p><b>Design note:</b> This leaves the possibility for a union between the two crowns, be it from a hazardous dynastics marriage or, more probably, a military imposed solution – however a fragile one has any other player is entitled to break it through diplomacy.</p> <p><b>XIV.7.2.2 General policy of SUECIA</b></p> <p><b>A</b> SUE may annex any province bordering the <b>Baltique</b>, even if there is a capital city. This may destroy a minor country.</p> <p>A.1 By exception to the preceding rule, <i>København</i> may not be annexed if DANIA has at least another province left that is not in <i>NORWAY</i>. When <i>København</i> is annexed, any remaining provinces of DANIA are associated in a newly created NORVEGIA, which is placed as a VA of SUE.</p> <p><b>B</b> At any time during the game, the player of SUE may announce his general orientation of the policy of SUE: either a policy of Domination of the Baltic sea (<i>Dominum Maris Baltici</i>), or a policy of <i>Overseas Expansion</i>. They are exclusive. A declaration is optional and SUE can choose to never make one (Note that this would be almost pointless in periods VI or VII).</p> <p>B.1 [BLP] SUE may not use Occupation marker unless it declares a policy of Overseas expansion.</p> <p><b>C Domination of the Baltic Sea</b></p> <p>C.1 SUE gains a third ♠ counter in periods III, IV and V. It loses the minimum ♠ of period III.</p> <p>C.2 It may annex any province bordering the <b>Baltique</b>, even if there is a capital city. This may destroy a minor country.</p> <p>C.3 By exception to the preceding rule, <i>København</i> may not be annexed if DANIA has at least another province left that is not in <i>NORWAY</i>. When <i>København</i> is annexed, any remaining provinces of DANIA are associated in a newly created NORVEGIA, which is placed as a VA of SUE.</p> <p>C.4 It has a maximum of 2 TP counters and 2 COL counters in period IV and afterwards.</p> <p>C.5 It has a reduced number of TP/COL attempts (see tables).</p> <p><b>D Overseas Expansion</b></p> <p>D.1 SUE has a maximum of 4 TP counters and 4 COL counters in periods IV and afterwards.</p> <p>D.2 SUE has an increased number of TP/COL attempts (see tables).</p> <p>D.3 SUE gains a third ♠ counter to be used only in ROTW. It also gains the use of a 3/4 Arsenal counter.</p> <p>D.4 SUE gains a minimum Explorator in pIII, and a minimum Gouvernor in pV to pVII.</p> <p>D.5 SUE ignores restrictions of section VI.7.4.2 (Pioneering [TBD]).</p>	<div>Specific Rules— master – 2016-04-14</div> <div>[R]289</div> <p>D.6 [BLP] SUE may use its two Occupation markers.</p> <p><b>XIV.7.2.3 Few acres of snow</b></p> <p><b>A</b> With a politics of Overseas Expansion, SUE may annex all establishments (COL and TP) of its enemies in an Area in <b>AMERICA</b>, North of <b>CHICHIMECA</b> (excluded) at peace.</p> <p>A.1 This count as 1 peace condition, plus 1 per establishment not controlled by SUE in the Area at the time of the peace.</p> <p><b>XIV.7.2.4 Insufficient demography</b></p> <p><b>A</b> During periods VI and VII, SUE has 2 ♠ counters unless it owns at least 5 provinces that are neither in <i>SWEDEN</i>, in <i>FINLAND</i> nor in DANIA, in which case it can use 3 ♠ counters.</p> <p>A.1 event VI-1 (The Great Northern War) may modify this and give SUE permanently 3 ♠ counters.</p> <p>A.2 If Overseas expansion was chosen, the third ♠ can always be used in ROTW.</p> <p><b>B</b> During periods VI and VII, SUE can not create new COL or TP by administrative attempts. Its actions can only raise the level of existing COL/TP, and it can gain new TP/COL only by conquest or Dowry.</p> <p><b>C</b> SUE has no CTZ of its own. It may use up to 6 Commercial Fleet counters (exception: 10 if strictly Protestant).</p> <p><b>XIV.7.3 Swedish Conscription and Military</b></p> <p><b>A</b> All reinforcements purchased under the limit of construction by SUE are <i>Veteran</i>.</p> <p><b>B</b> The <i>recruitment area</i> of SUE comprises <b>Livonija</b>, <b>Kurland</b> and <i>FINLAND</i> as well as its national provinces.</p> <p><b>C</b> SUE has an added ♠ in its <i>basic forces</i> when it is at war. This is increased to an added ♠ if its current Monarch has a MIL of 7 or more.</p> <p><b>D</b> SUE can proceed to exceptional levies (see section VII.3.4 (Exceptional Levies [should be moved in chMilitary])) with no loss of Stability or with a loss in Stability after a normal (not major) defeat in a land battle.</p> <p><b>E</b> SUE has each turn a free major campaign. It is upgraded to 2 free major campaigns (or one free multiple campaign, player's choice) if its current Monarch has a MIL of 7 or more.</p> <p><b>F Transport Convoy</b> SUE has a transport convoy in its <i>basic forces</i>. It can contains up to 4 NTID (or 2 NTID if ☹), is freely maintained but SUE has to pay to recover any previously lost NTID. This convoy cannot leave <i>BALTIC SEA</i>. It is not a ♠ for attrition, stacking, and so on, but a Convoy.</p> <p><b>G Movements to and from Finland.</b> SUE units can move from <b>Jämtland</b> or <b>Gästrikland</b> to <b>Finland</b> or <b>Tavastland</b> at the cost of 12 MP (and conversely). It can use this road for retreat or redeployment.</p> <p><b>XIV.7.3.1 Religious Attitude</b></p> <p><i>The kingdom of Sweden was somewhat affected by religious troubles, because, even though the population quickly converted to the Reformation principles, the Swedish nobility did not follow this path. Queen Christina, daughter of Gustav Adolf, was a catholic that created a sustained cultural and religious activity in her kingdom while Oxenstierna was leading the foreign policy. She finally had to step down from her throne due to her religion. She hid her faith until her abdication.</i></p> <p><i>The catholic battle against protestantism is an important part of the failed union between Poland and Sweden.</i></p> <p><b>A</b> SUE has to choose its religious stand at the beginning of period III. It can change afterwards only because of a forced conversion to Catholicism by a Counter-Reformation MAJ, or because of some events.</p> <p><b>B Strictly Protestant</b></p> <p>B.1 POL, if <i>Catholic</i>, has a permanent CB against SUE in periods III and IV.</p> <p>B.2 At the beginning of each war against a Catholic country (such as POL but also minor countries) in period III and IV, roll for one Revolt in SUE.</p>
--	--

<p>[R]290</p> <p>Suecia</p> <p>B.3 SUE gains a TFI action each turn, in periods III and IV, and may use up to 10 TF (instead of 6).</p> <p>B.4 Some events are affected (TODO: put list here).</p> <p><b>C Tolerant</b> SUE is <i>Protestant</i> (historical choice).</p> <p><b>D Catholic</b> SUE has a CB against all non-Catholic countries in periods III and IV.</p> <p>D.1 Some events are affected (TODO: put list here).</p> <p><b>XIV.7.3.2 Union between Poland and Sweden</b></p> <p><b>A</b> As a consequence of event III-13 (Union between Polonia and Suecia), SUE and POL can share the same ruler. As long as this is the case:</p> <p>A.1 SUE uses the values of the Monarch of POL. SUE is considered <i>Catholic</i> during the Union (in every aspect).</p> <p>A.2 SUE has a mandatory offensive alliance with POL in which it is complied to answer any call.</p> <p>A.3 SUE cannot declare war without a CB or the agreement of POL. It cannot declare war against POL (even with a CB).</p> <p>A.4 POL cannot declare a war against SUE, except if it has a valid CB against it.</p> <p><b>B</b> The alliance is contested when the Monarch of POL dies or if POL refuses to answer a call for defensive war (not offensive war), or if POL declares a war against SUE.</p> <p>B.1 A new monarch is then rolled for SUE.</p> <p>B.2 POL, having still <i>dynastic claims</i> over Sweden, can renew the war to impose its ruler. POL renews the Union if it wins a peace of any level against SUE. As long as the war continues, the Union exists for matters related to VP, if not in its consequences.</p> <p><b>C Dynastic Claims.</b> Even if event III-13 (Union between Polonia and Suecia) does not result in the Union, POL may keep <i>dynastic claims</i> over SUE, at the conditions of the event.</p> <p>C.1 POL can renounce these <i>dynastic claims</i> by an announcement at any diplomatic phase, or as a condition for peace in a losing war against SUE.</p> <p>C.2 Each time there is a new monarch in SUE, POL has a CB against SUE at this turn to claim its inheritance (see the event).</p> <p>C.3 In case of <i>Dynastic Crisis</i> in SUE, POL is a valid pretender as long as it has <i>dynastic claims</i> over Sweden.</p> <p><b>XIV.7.4 SUECIA in play</b></p> <p><b>XIV.7.4.1 Monarchs of Sweden</b></p> <p><b>A Military skills.</b> Add +1 to the die rolls to determine the values of Fire and Shock of the Swedish Monarch as general.</p> <p><b>B Gustav I (Vasa).</b> If event II-4 (End of the Union of Kalmar) occurs at the first turn of period III, SUE has the Monarch <i>Gustav I</i>, of values 8/6/7. The length of his reign is rolled for as usual.</p> <p><b>C Erik XIV.</b> Else, if event II-4 (End of the Union of Kalmar) happened before, SUE has the Monarch <i>Erik XIV</i> whose values are 5/5/7 and should last until the beginning of turn 19. He has to roll for survival beginning with turn 17; he has a malus of +2 to his survival test. When he dies, roll for his successor on the 7+ columns (except if there is a <i>Dynastic Crisis</i> – use then usual rules).</p> <p><b>D Karl IX</b> may be put on the throne of SUE by event III-13 (Union between Polonia and Suecia). He has values 8/6/6 and the length of his reign is rolled for as usual. He can not be used as a general (see section XIV.7.3.2 (Union between Poland and Sweden)).</p> <p><b>E Gustav Adolf</b> enters in play during event event IV-A (Thirty Years' War), or as the first Swedish monarch after period IV (turn 35 or later) if it did not happen. He has values 9/9/9 and is also a general <i>Gustav Adolf</i> (A 6.6.6 [Event IV-A]). He will stay for 7 turns (but a death in battle is possible). As soon as possible, SUE benefits from a Military Revolution (see section VI.8.1.6 (Military Revolutions)) when he enters.</p>	<p>Specific Rules— master – 2016-04-14</p> <p>[R]291</p> <p><b>F Karl XII</b></p> <p>F.1 The first Monarch of SUE after the death of the heir of <i>Gustav Adolf</i> who has at least 8 or 9 in MIL is considered to be <i>Karl XII</i>.</p> <p>F.2 Alternatively, after the death of the heir of <i>Gustav Adolf</i>, 1d10 is rolled at the end of each administrative phase if SUE is at war against any MAJ. On a roll of 1–3, <i>Karl XII</i> is the heir of the current Monarch. He will last for a length determined randomly as for a Monarch, plus 2 turns (ignore results baby or child and re-roll).</p> <p>F.3 The MIL value of <i>Karl XII</i> is changed to 9. He is a general <i>Carl XII</i> (A 5.6.6 -1). Other values as a Monarch are rolled for normally when he becomes King.</p> <p>F.4 <i>Karl XII</i> makes survival tests only if he is King.</p> <p>F.5 The first time <i>Karl XII</i> should be killed or captured in battle, he escapes but comes back only at the very end of the next turn. During his absence, his values as a ruler are diminished by 2 (minimum of 3).</p> <p><b>G Oxenstierna (Axel)</b> may be named minister through event III-4 (2) (Oxenstierna) or event IV-12 (1) (Oxenstierna). He has values 6/8/8 and remains a random number of turns (three turns more than usual); its values can be used for the next monarch's values determination if a succession takes place while he is still alive.</p> <p><b>XIV.7.4.2 Available counters</b></p> <p><b>A Military</b> 3A, 2F, 1 Transport IF, 1P, 10LD/ND, 5LD, 2NTD, 6LDE/NDE, 2 fortresses 1/2, 4 fortresses 2/3, 4 fortresses 3/4, 1 fortress 4/5, 4 forts, 2 Arsenals 2/3, a special Pugatchev A.</p> <p><b>B Economical</b> 5COL, 5TP, 8MNU, 10TF (6 normally usable), 2ROTW treaty counters.</p> <p><b>XIV.8 TURCIA</b></p> <p><b>XIV.8.1 Internal affairs</b></p> <p><b>XIV.8.1.1 The Policy of Grand Orient</b></p> <p><b>A Trade of Grand Orient.</b> In 1492, the CC Grand Orient is in al-Āṣḳandarīyah. As long as it is the case:</p> <p>A.1 TUR receives half of its income if it owns Dimaşq, or if it has SYRIA on its diplomatic track.</p> <p>A.2 See section XIV.13.1.4 (The Mamluks: Ægyptus and Syria) for the fall of SYRIA and ÆGYPTUS and the beginning of the convoy of İzzmîr.</p> <p>A.3 See §B (Levant Convoy) of section VI.12.2.1 (The convoys) about the specific rules for the convoy of İzzmîr.</p> <p><b>B Colonial Expansion.</b> TUR may only place COL by land contacts, i.e., in a province (not an Area) adjacent to its territory in Europe or to an existing COL, or through <i>Mer Caspienne</i>.</p> <p>B.1 TUR ignores restrictions of section VI.7.4.2 (Pioneering [TBD]) in Area belonging to Muslim minors (<b>ADEN, OMAN, SOUDAN</b> and, if they still belong to GUZARATE, <b>GUJARAT</b> and <b>MALACCA</b>).</p> <p>B.2 TUR has no such restrictions regarding TP placements.</p> <p><b>C</b> If TUR has a TP in the ROTW or an AT with a minor having a TP and it has no ٱ allowed to go in Asia ('R' or '@'), then its lowest ranking ٱ which is not restricted to the Mediterranean gain the ability to go in Asia ('@').</p> <p><b>D Mecca (مكة) and the Ka'aba (الكعبة)</b></p> <p>D.1 <i>Ka'aba</i> is placed in <b>W. Nedj</b> at the beginning of the game.</p> <p>D.2 For all game purposes, it acts as a Turkish mission.</p>
--	---

<div data-bbox="114 90 1115 127"> <div>[R]292</div> <div>Turcia</div> </div> <div data-bbox="114 172 1115 228"> <p>D.3 Exceptionally, this mission may not be destroyed by any mean. If it should be destroyed (e.g. the fort is taken by a non-Muslim), simply leave it in place. This effectively prevents any other country from building a mission there.</p> </div> <div data-bbox="114 240 1115 363"> <p>The <b>Ka'aba</b> is a building at the heart of Muslim most sacred mosque of Al-Masjid al-Haram (المسجد الحرام) in Mecca. Its cornerstone is the Black Stone (الحجر الأسود), supposed to have fallen from Heaven to show Adam and Eve where to build an altar, and embedded in the building by Muhammad. Muslim prayers all around the World are done facing toward the <b>Ka'aba</b>.</p> </div> <div data-bbox="114 376 1115 475"> <p><b>Design note:</b> Although it has obviously little in common with Christian missions and the attempts to convert local people, the <b>Ka'aba</b> has the same in-game effects to represent the religious fervour that created great centres of population in a rather desertic area.</p> </div> <div data-bbox="114 488 1115 523"> <p><b>XIV.8.1.2 Turkish Military system</b></p> </div> <div data-bbox="114 536 1115 587"> <p><b>A The initial system of <i>Timarlar</i>.</b> Land counters if the Turkish forces are of two different kinds: <i>Yeniçeriler</i> (or equivalent professional forces) and <i>Timarlar</i>.</p> </div> <div data-bbox="114 600 1115 683"> <p>A.1 <i>Janissaries Yeniçeriler</i> are the normal forces of TUR (same color, name). They function like the forces of any other power. Initially, TUR uses at most 2 <i>Yeniçeriler</i> ⚠ counters. Note that these armies have augmented artillery, and increase the losses in siege assaults (add <sup>2</sup>/<sub>3</sub> if there is such an ⚠ involved, during periods I–III only).</p> </div> <div data-bbox="114 695 1115 834"> <p>A.2 <i>Timars</i> Other forces are <i>Timarlar</i>: counters with the <i>Timarlar</i> mention (different color) and <i>Pashas</i> units. <i>Timarlar</i> are limited initially to the <i>Arquebus</i> Technology, and are considered so if TUR has a higher level. <i>Timarlar</i> are always <i>Conscripts</i> (even those maintained in the <i>basic forces</i>). If <i>Timarlar</i> units are stacked in battle with other units of a higher Technology, the morale of the stack is always that of the <i>Timarlar</i> (i.e., has the morale of conscript from the <i>Timarlar</i> Technology). Finally, <i>Timarlar</i> units may never be moved by sea transport.</p> </div> <div data-bbox="114 847 1115 890"> <p>A.3 <i>Yeniçeriler</i> and <i>Timarlar</i> are not the same kind of forces. Basic Maintenance is separated between <i>Yeniçeriler</i> and <i>Timarlar</i>. Also they can not absorb LID from the other kind.</p> </div> <div data-bbox="114 903 1115 986"> <p>A.4 <i>Technology limitation</i> TUR can not go beyond <i>Land Technology Muskets</i>, and <i>Naval Technology Battery</i>. Its markers must stop before entering a higher Technology Level. It has malus of -1 to the die to raise its <i>Naval Technology</i>, and -1 to the die to raise its <i>Land Technology</i> unless if it is currently less than <i>Arquebus</i>.</p> </div> <div data-bbox="114 999 1115 1058"> <p><b>B Yearly Campaigning.</b> At the passing of each Winter box (end of it, or if bypassing), there is a specific attrition test on all stacks containing <i>Timarlar</i>.</p> </div> <div data-bbox="114 1061 1115 1114"> <p>B.1 Roll 1d10+ 2 times the distance in provinces to the National Territory of TUR (Note: count through provinces controlled or owned, ÆGYPTUS and SYRIA counts as National Territory here once owned).</p> </div> <div data-bbox="114 1117 1115 1169"> <p>B.2 Read the result on the Attrition table, crossed with the number of <i>Timarlar</i> detachments (only) and ignore the P results.</p> </div> <div data-bbox="114 1173 1115 1257"> <p>B.3 Each loss is a LID of <i>Timarlar</i> that goes home. Regular <i>Timarlar</i> LID that go home are given back freely (above all construction limits) at the beginning of next turn, or can be raised at a following round at half cost (not counting in the limits). <i>Pasha</i> units that go home will be raised in addition to usual reinforcements at the beginning of next turn.</p> </div> <div data-bbox="114 1270 1115 1337"> <p><b>Design note:</b> The preceding rule simulates the limit in supply of their kind-of-feudal forces that were to withdraw almost every winter.</p> </div> <div data-bbox="114 1350 1115 1441"> <p><b>C Pashas</b> TUR has a certain number of <i>Pasha</i> units at his disposal. Each one is similar to a general, with military values and a hierarchical rank, that is accompanied by their own intrinsic troops. A <i>Pasha</i> has a standard military force of one <i>Timarlar</i> LID for each number of force increment.</p> </div> <div data-bbox="114 1453 1115 1513"> <p><b>D New Pashas.</b> TUR has a maximal number of <i>Pashas</i> in play equals to its number of owned provinces divided by 3 (rounded down). Each turn, it receives new <i>Pashas</i> up to this limit.</p> </div>	<div data-bbox="1124 90 2121 127"> <div>Specific Rules— master – 2016-04-14</div> <div>[R]293</div> </div> <div data-bbox="1124 172 2121 255"> <p>D.1 During the administrative phase of each turn, TUR receives a number of new <i>Pasha</i> units equal at most to its Stability, plus 1 if HUNGARIA has fallen according to event I-E (Downfall of Hungary), plus 1 if ÆGYPTUS has been conquered. If this number is negative, no new <i>Pasha</i> is received (but none lost).</p> </div> <div data-bbox="1124 258 2121 284"> <p>D.2 <i>Pasha</i> counters are taken randomly among those not yet placed on the map.</p> </div> <div data-bbox="1124 287 2121 312"> <p>D.3 If TUR controls more provinces than he has available <i>Pashas</i> to rule them, the extra is lost and placement cancelled.</p> </div> <div data-bbox="1124 316 2121 435"> <p>D.4 <i>Placement of Pashas.</i> New <i>Pashas</i> can only be placed in owned provinces where there is no <i>Pasha</i> nor in any adjacent province, and that is not TUR capital. They must be placed in TUR national provinces, except that one at most can be placed directly in former provinces of SYRIA or MESOPOTAMIA, and one can be placed in <i>BALKANS</i> or former provinces of HUNGARIA.</p> </div> <div data-bbox="1124 448 2121 478"> <p><b>E Corruption Cost of Pashas.</b></p> </div> <div data-bbox="1124 481 2121 507"> <p>E.1 TUR always uses the inflation as if it was exploiting gold in <b>AMERICA</b>.</p> </div> <div data-bbox="1124 510 2121 593"> <p>E.2 Some <i>Pashas</i> may become corrupted. They are flipped on their corrupted side. On this side, a <i>Pasha</i> cannot move, it has no intrinsic force, it is not a military leader. Its only effect is to nullify all the incomes coming from the province it is in.</p> </div> <div data-bbox="1124 606 2121 632"> <p><b>F Decadence.</b> One <i>Pasha</i> becomes corrupted when one or more of the following situations occur:</p> </div> <div data-bbox="1124 635 2121 718"> <ol style="list-style-type: none"> <li>1. TUR raises exceptional taxes (see section V.6.2 (Exceptional taxes))</li> <li>2. TUR exceeds its MNU limits (see section II.4.3.2 (Exceeding Limits in MNU))</li> <li>3. [BLP] On a modified roll of 6 at the survival test.</li> </ol> </div> <div data-bbox="1124 721 2121 893"> <p>F.1 The newly corrupted <i>Pashas</i> are chosen randomly among those that are not. The Sole Defender of Catholic Faith (XIV.14.3.1) places each of them in the province it is in, or any adjacent province where there is no <i>Pasha</i>; or, if the <i>Pasha</i> is not in a Turkish owned province, it has to be placed in any Turkish owned province where there is no <i>Pasha</i> in, and which is not adjacent to another <i>Pasha</i> unit. Once placed, a corrupted <i>Pasha</i> can be moved in only two instances: the <i>Pasha</i> is dismissed, or the ownership of the province is lost by TUR (in which case the corrupted <i>Pasha</i> is replaced as above).</p> </div> <div data-bbox="1124 906 2121 932"> <p><b>G Death of a Pasha</b> [BLP] This effect occurs on a modified roll of 5 or 7 at the survival test.</p> </div> <div data-bbox="1124 935 2121 994"> <p>G.1 The <i>Sole Defender of the Catholic Faith</i> may choose one <i>Pasha</i> (corrupted or not). This <i>Pasha</i> is removed from play and replaced by a new random (uncorrupted) <i>Pasha</i>.</p> </div> <div data-bbox="1124 997 2121 1023"> <p>G.2 If one <i>Pasha</i> was removed this way, then TUR may also choose one and replace it.</p> </div> <div data-bbox="1124 1026 2121 1077"> <p>G.3 The <i>Sole Defender of the Catholic Faith</i> and TUR take turns replacing <i>Pashas</i> that way until one of them decides to stop.</p> </div> <div data-bbox="1124 1090 2121 1209"> <p><b>H Dismissal of Pashas.</b> The Turkish player can dismiss (or impale...!) a <i>Pasha</i> at any given time during the Redeployment phase (replace the removed <i>Pasha</i> among those not yet in play). It is not possible if TUR is at war or has a negative Stability. Every time a <i>Pasha</i> is removed, the Turkish player loses 1 Stability level for each <i>Pasha</i> that is dismissed.</p> </div> <div data-bbox="1124 1222 2121 1248"> <p><b>I Pashas as military units.</b></p> </div> <div data-bbox="1124 1251 2121 1303"> <p>I.1 When at peace, TUR must move its <i>Pashas</i> so that there is a maximum of one <i>Pasha</i> per province at the end of the turn. In addition, no <i>Pasha</i> may ever finish its move in the Turkish capital province.</p> </div> <div data-bbox="1124 1307 2121 1359"> <p>I.2 When at war, the <i>Pashas</i> can be moved without any constraint of placement but must respect hierarchical rank constraints. They can not go in ROTW.</p> </div> <div data-bbox="1124 1362 2121 1422"> <p>I.3 Being <i>Timarlar</i> units, <i>Pashas</i> are always <i>conscripts</i> (and their stack also, disregarding the presence of other <i>Veteran</i> units), are limited initially to <i>Arquebus</i>, and can not move by sea.</p> </div> <div data-bbox="1124 1425 2121 1513"> <p>I.4 <i>Stacking of Pashas</i> The Turkish player can stack up to 2 <i>Pashas</i> in addition to the other military units in a stack. This is an exception to the rule that limits to 3 the number of units in a stack. They are counted as their value in LID for attrition and battle purpose (but not for activation and hierarchy).</p> </div>
---	---

<div>[R]294</div> <div>Turcia</div> <p><b>J Pashas and Hierarchy</b> Even if <i>Pashas</i> can be used as generals, they are disregarded as generals to enforce the hierarchy. They can only command if there is no regular general.</p> <p><i>J.1</i> [BLP] <i>Pashas</i> may not lead other <i>Pashas</i> or more than 5LD of troops (plus their owns).</p> <p><b>K Pashas troops</b> The force content in LD of a <i>Pasha</i> cannot be incorporated in any other military unit (and conversely).</p> <p><i>K.1</i> Losses undergone during combat or attrition can be attributed to an engaged <i>Pasha</i>, up to the number of LD part of that <i>Pasha</i> counter, using the normal rules of assignation of losses. In this case, whatever is the supported loss, the <i>Pasha</i> is lost.</p> <div>XIV.8.1.3 Turkish Reformation</div> <p><b>A Attempts of Turkish Reformation.</b> TUR may attempt to reform the government and the military system during the play. The 7 steps of the reformation are divided in two groups: government and military, and in three levels of progression. Each level of progression (both groups) has to be finished for any attempts on a higher level to be allowed.</p> <p><i>A.1</i> This is an Administrative Domestic operation (and takes the place of the allowed Domestic operation of the turn, see §C (Administrative limits) of section VI.2.1 (General mechanism and list of actions)) that has a fixed cost of 100 ₪.</p> <p><i>A.2</i> A given Sultan can make only one attempt of reform during his whole reign.</p> <p><i>A.3</i> No reformation attempt can be made before the death of <i>I. Süleyman</i>. That is, the first sultan allowed to attempt a reform is the heir of <i>I. Süleyman</i>.</p> <p><i>A.4</i> A its last scheduled turn of life, no Sultan may attempt an Administrative Reform.</p> <p><b>B</b> A test is made on table VI.1 (Administrative Actions), using the column (MIL or ADM)+DTI-9, with the following die modifiers:</p> <ul style="list-style-type: none"> <li>±? Stability of country</li> <li>-? the Level of the attempted reformation</li> <li>-? the number of corrupted <i>Pashas</i></li> </ul> <p><i>B.1</i> A "S" result is a success: the attempted reform is activated, -1 in Stability, roll for one revolt in TUR and the Turkish monarch has a malus of +2 to its Survival die roll next turn.</p> <p><i>B.2</i> A "½" result is a failure, -1 in Stability and roll 1d10 against FTI:</p> <ul style="list-style-type: none"> <li>• if higher than FTI, the monarch is killed, 1 <i>Pasha</i> is corrupted and the next monarch will not be allowed to attempt a reform of the same group,</li> <li>• else roll for one revolt in TUR and the Turkish monarch has a malus of +2 to its Survival die roll next turn.</li> </ul> <p><i>B.3</i> A "F" result is a complete failure: death of the monarch and dynastic crisis, 2 <i>Pashas</i> are corrupted and the next monarch will not allowed to attempt any reform.</p> <p><b>C Government Reformation</b></p> <p><i>C.1 Level 1: Elder Succession</i> The effect of dynastic crisis (§C (Dynastic Crisis) of section III.2.1 (New monarchs)) for TUR is reduced from now on: the only effect is a -1 in Stability. When rolling for a new Sovereign in table III.1 (Reign), DC and <i>Fragile Health</i> are always ignored and the length of reign of new monarchs is changed : for die results 1 to 7, the result is divided by 2 (rounded down), and results 8, 9 and 10 are for (respectively) teen, child and baby monarch lasting 6, 7 or 7 turns.</p> <p><i>C.2 Level 1: Reforms against corruption.</i> Exceptional taxes are no more causes for corruption of <i>Pasha</i> anymore. When this reform is achieved, the Turkish player may remove up to 4 corrupted <i>Pasha</i> units at no cost.</p> <p><i>C.3 Level 2: End of feudality</i> All corrupted <i>Pashas</i> are removed and there can be no new corruption of <i>Pasha</i> anymore. From now, TUR uses normal inflation. Gives a bonus of +1 to all further attempts of Reformation.</p> <p><b>D Military Reforms</b> The effects are summarized on a table on the Turkish aid of play.</p>	<div>Specific Rules— master – 2016-04-14</div> <div>[R]295</div> <p><i>D.1 Level 1: Development of the Yeniçeriler Corps</i> The number of <i>Yeniçeriler</i> ♠ available is now 4, and the number of <i>Timarlar</i> ♠ decreases to 2. The troop purchase limit is reduced by one LD. Basic Maintenance changes: add ♠ to <i>Yeniçeriler</i> and remove ♠ to <i>Timarlar</i>. The <i>Yeniçeriler</i> forces lose their increased casualty in assault and their size is now of the smaller reformed type.</p> <p>Regarding Technology, the new limit is <i>Baroque</i> and the malus to improve it is applied only if <i>Land Technology</i> is <i>Muskets</i> or better.</p> <p><i>D.2 Level 1: Reforms of the Sipahi and of the Navy</i> Basic Maintenance changes: remove ♠ to <i>Timarlar</i>.</p> <p>Regarding Technology, the new limit is <i>Muskets</i> and <i>Timarlar</i> forces can now be <i>Muskets</i>. The malus to improve <i>Land Technology</i> is applied only if it is <i>Muskets</i> or better. The <i>Naval Technology Battery</i> is now accessible.</p> <p><i>D.3 Level 2: Reduction of Timarlar</i> All Turkish forces are now <i>Yeniçeriler</i> forces. Counters of <i>Timarlar</i> ♠ are no longer in use, <i>Timarlar</i> LD are considered as regular <i>Yeniçeriler</i> and there are 6 <i>Yeniçeriler</i> ♠ available. Note that the basic maintenance of <i>Timarlar</i> is now irrelevant as it cannot be used. All forces are of smaller reformed size, and Turkish forces lose their cavalry bonus. In addition, <i>Pasha</i> counters are no more military units (nor Leaders). They still may be corrupted.</p> <p>Regarding Technology, <i>Manoeuvre</i> and <i>Three-decker</i> are now accessible. The malus to improve it is applied to <i>Land Technology</i> if currently <i>Baroque</i> or better, and to <i>Naval Technology</i> if currently <i>Battery</i> or better.</p> <p>[BLP] Add 2X to the limit for TUR.</p> <p><i>D.4 Level 3: Modernisation of the Army</i> All technologies are now accessible, and the malus to increase Technology is cancelled.</p> <p><b>E</b> The effects of all these reforms are cumulative.</p> <div>XIV.8.2 Turkish navy [BLP]</div> <p><b>A</b> Galleys of TUR may become Veteran. Galleys of Turkish VA are always Conscript.</p> <p><i>A.1</i> Any NGD that is maintained from a previous turn (including those in ♠) is automatically Veteran with no extra cost.</p> <p><i>A.2</i> Newly raised NGD are Conscript.</p> <p><b>B Barbary Coast privateers</b> Privateers ± (not privateer ⚔) of TUR may lead ♠ of Turkish minors.</p> <p><i>B.1</i> The choice is made for the whole turn, at the segment of placement of new leaders. The choice may be different for each admiral.</p> <p><i>B.2</i> They still count for limits as Turkish leaders. Thus, de facto reducing the limit of ± by one.</p> <p><i>B.3</i> List of Barbary coast privateers: <i>Kemal Reis</i>, <i>Kurtoğlu M.</i>, <i>Salih Reis</i>, <i>Siroco</i>, <i>Murat Reis</i>, <i>Uluç Ali</i>, <i>Mezzomorto</i>. They have a red symbol instead of a black one.</p> <div>XIV.8.3 Relations with foreigners</div> <div>XIV.8.3.1 Diplomacy</div> <p><b>A</b> TUR has a CB against all Christian countries, and against PERSIA, in period I to V.</p> <p><b>B</b> TUR is prohibited to make offensive alliances in period I to V.</p> <p><b>C Turkish Conquests.</b> The Turkish player can annex the capital province of a conquered country. This is valid only if the conquered province is an island or if it is adjacent to a Turkish province and the province is occupied by a Turkish military unit (and not by a Turkish minor ally or vassal). This may destroy the country.</p> <p><b>D Relations with the Knights.</b> The ORDO HOSPITALIS are in permanent semi-Overseas war against TUR. The reverse is true. This war allow for naval battles, and attack by and against Privateers. It does not cause automatic Stability loss at the end of turn.</p> <p><i>D.1</i> Each turn that the pirate of The Knights inflicts losses on Turkish commercial fleets, TUR loses 1 Stability level if at peace.</p>

The dynastic bonds were woven bit by bit through weddings and inheritance. This rule allows to recreate the formation of this European Empire.</i></p> </div> <div data-bbox="1122 1050 2121 1088"> <p><b>XIV.10.1.1 The nature of dynastic actions</b></p> </div> <div data-bbox="1122 1093 2121 1133"> <p><b>A</b> Each turn, HIS can use one (and only one) diplomatic action to do a Habsburg diplomatic action. Each action has a difficulty, and a score of at least this difficulty must be reached with 2d10 to have a success.</p> </div> <div data-bbox="1122 1137 2121 1161"> <p><b>B</b> The cost of the Habsburg diplomatic action is the one of a usual diplomatic action</p> </div> <div data-bbox="1122 1166 2121 1190"> <p>B.1 The usual modifiers due to investment (0, +2, +5) do apply to the dice.</p> </div> <div data-bbox="1122 1195 2121 1219"> <p>B.2 No other modifiers is possible, and no diplomatic support may take place.</p> </div> <div data-bbox="1122 1224 2121 1279"> <p><b>C</b> The actions are split in three classes (A, B and C). All the actions of class A must have been successful to try an action of class B. All the actions of class B must have been successful to try an action of class C.</p> </div> <div data-bbox="1122 1284 2121 1340"> <p><b>D</b> It is not possible to attempt a Dynastic Action at the turn following a successful one (be it because of events or of diplomatic action). Exception: there is no limit to attempt a diplomatic annexion of a province of <i>TERRÆ DEPRESSÆ</i>.</p> </div> <div data-bbox="1122 1345 2121 1401"> <p><b>E</b> It is no more possible to do diplomatic actions if the Habsburg of Austria and Spain are dissociated (as per event V-4 (The War of Spanish Succession)).</p> </div> <div data-bbox="1122 1406 2121 1461"> <p><b>F</b> Some events have as a consequence the success of a Habsburg dynastic action. These actions do not cost anything to HIS and are always successful.</p> </div> <div data-bbox="1122 1466 2121 1506"> <p>F.1 The effect of some of those actions is usually to activate certain events (some of those events cannot take place without them).</p> </div>
--	---

F.2 A dynastic action may also allow be used to annex a province of TERRÆ DEPRESSÆ, in which case this dynastic action is not counted for the sake of Habsburg endogamy (see §B.1 of section XIV.13.3.1 (The Low Countries: Terræ Depressæ)).

#### XIV.10.1.2 List of dynastic actions

**A** Class A of dynastic actions:

A.1 *Habsburg wedding* Difficulty 7. Activates event I-A (Dynastic Alliance of the Habsburg).

A.2 *Burgundy inheritance* Difficulty 7. Activates event I-B (Burgundy Inheritance).

A.3 *Neapolitan inheritance* Difficulty 8. Activates event I-I (Spanish Naples).

**B** Class B of dynastic actions:

B.1 *Bohemian wedding* Difficulty 8. Activates event I-C (Habsburg Bohemia).

B.2 *Milanese wedding* Difficulty 9. Activates event I-F (Habsburg Control of Milano).

**C** Class C of dynastic actions:

C.1 *Hungarian wedding* Difficulty 12. Activates event I-D (Habsburg Inheritance of Hungary).

C.2 *Cession of Lombardia to Spain* Difficulty 10. Activates event I-G (Spanish Milano).

C.3 *Portuguese wedding* Difficulty 11. When event event III-6 (Portuguese Disaster in Africa) happens, event event III-7 (Annexation of Portugal by Spain) is also applied immediately.

C.4 *Bavarian Wedding* Difficulty 9. AUS\* (or HIS as long as HIS and AUS\* are not dissociated) has a diplomatic bonus of +1 on BAVARIA.

#### XIV.10.1.3 Habsburg endogamy

*The Habsburg family often practised intra-familial weddings. Combined with the frequent violent deaths, this reduced the number of family members of high rank and increased the risk of congenital illnesses. Only a large crisis such as the Spanish War of Succession managed to inject some new blood in the royal family of Spain.*

**A** Each dynastic action increases the problems related to the Habsburg endogamy for the Spanish sovereigns.

A.1 A special malus is applied to the dice throw of reign duration. The malus does apply only to know if there is a dynastic crisis. If there is no dynastic crisis (net result larger than 1), the malus does not apply to determine the length of the reign.

A.2 The same malus is subtracted from 6 to determine the column under which are read the characteristics of the new sovereign.

#DynA	1–2	3	4	5	6	7	8	9
p. I	.	.	.	.	.	-1	-2	-3
p. II–IV	.	.	.	-1	-1	-2	-3	-3
p. V	.	.	-1	-1	-2	-3	-3	-3
p. VI–VII	.	-1	-2	-2	-3	-3	-3	-3

Table XIV.1: Habsburg endogamy

**B War of Spanish Succession** Any dynastic crisis in period V starts immediately event V-4 (The War of Spanish Succession) as one of the events of this turn.

B.1 The endogamy malus is no more applied if HIS and AUS\* are dissociated due to event V-4 (The War of Spanish Succession).

#### XIV.10.1.4 Spanish Annexations

**A** The annexations that increased the Habsburg territory or Spanish territory are set by events (such as event III-7 (Annexation of Portugal by Spain) or dynastic actions that themselves trigger events.

**B Italy** The annexation of SICILIÆ is made after event I-I (Spanish Naples) either by conquest or diplomatic annexation. The annexation of **Lombardia** is made after event I-F (Habsburg Control of Milano) and event I-G (Spanish Milano).

**C Bohemia** The annexation of BOHEMIA is made through event I-C (Habsburg Bohemia).

**D Hungary** The HUNGARIA is quite sensitive to the instability of the *BALKANS* (section XIV.14.1 (Instability of the Balkans)). Then several events lead to event I-E (Downfall of Hungary), which splits the Hungarian kingdom among POL, TUR and AUS\*.

**E Low countries** The Dutch provinces have to be either conquered or annexed through dynastic actions. The remainder of the Burgundy inheritance is given through event I-B (Burgundy Inheritance). See also section XIV.13.3.1 (The Low Countries: Terræ Depressæ).

E.1 If AUS\* does not control all the provinces of TERRÆ DEPRESSÆ and HOLLANDIA when event III-1 (1) (Revolt of the United Provinces) occurs, AUS\* loses 5VP per uncontrolled revolted province.

#### XIV.10.2 Autonomous Habsburg States

**Design note:** AUS and HIS may choose to grant a greater autonomy to the cadet branches of their estates, losing the income provided by those lands in exchange for free *basic forces* maintained by those states.

##### XIV.10.2.1 General Conditions of Autonomy

**A** The autonomy is declared during the diplomatic announces phase. The Habsburg country doing the declaration (HIS or AUS— the “owner” hereafter) loses 1 Stability.

**B** The autonomy is granted to a whole group of provinces, none of them can be retained.

B.1 Any revolt in the newly-autonomous country is automatically removed.

B.2 The group must have at least three provinces to be declared autonomous, except for HABSBURGENSIS LOMBARDIA (one province only).

**C** The income of the autonomous kingdom is no more perceived, but the country granting autonomy keeps the ownership of the provinces.

C.1 The sum of the land income of the autonomous kingdom is neither added to the *Blocked Trade*, nor to the Vassal or main land income.

**D** No military forces can be raised in an autonomous kingdom but the ones of the autonomous kingdom itself.

D.1 The autonomous kingdom has *basic forces* freely maintained, but does not receive any reinforcements. His armies have the characteristics mentioned in the appendix (section XXIV.7 (Habsburg vassal kingdoms)).

D.2 Their owner may rebuild forces if they were destroyed.

D.3 In some provinces, a fortress can be built (at the expense of the owner), that is then maintained for free by the autonomous kingdom.

D.4 The forces of the autonomous kingdom have a limited range.

D.5 The military campaigns are included in those of the AUS\* having granted Autonomy, and paid by him.

**E** The autonomous kingdom is not subject to diplomacy. It is in automatic EW of the owner, never makes any separate peace and has its provinces subjected to the peace agreements of its owner.

E.1 HABSBURGENSIS BOHEMIA and HABSBURGENSIS HUNGARIA are automatically put on the AUS diplomatic track; HABSBURGENSIS SICILIÆ is automatically put on the HIS diplomatic track; HABSBURGENSIS LOMBARDIA is put on the track of its owner (depending on whether event I-G (Spanish Milano) has been played or not).

<div>[R]302</div> <div>Hispania</div> <p>E.2 For all other countries, the provinces of these autonomous kingdoms are still assimilated to provinces of their owner (for peace levels, etc.).</p> <p><b>XIV.10.2.2 HASBURGENSIS SICILIÆ</b></p> <p><b>A</b> HASBURGENSIS SICILIÆ is constituted by the provinces of <b>Campania, Basilicata, Abruzzo, Puglia, Calabria</b>. If activated by AUS or minor HABSURGUM only, add the three following provinces: <b>Sicilia, Palermo, Saldigna</b></p> <p><b>B</b> HASBURGENSIS SICILIÆ has an <math>\text{A}\ominus</math> (III, Latin, <i>Tercios</i> if HIS is) and a <math>\text{F}\ominus</math> (choose between galleys or warships).</p> <p>B.1 A fortress may be maintained for free in <b>Campania</b>.</p> <p>B.2 The <math>\text{A}</math> may act in the whole kingdom and in <i>ITALY</i>, the <math>\text{F}</math> may act in Mediterranean.</p> <p><b>XIV.10.2.3 HABSURGENSIS LOMBARDIA</b></p> <p><b>A</b> HABSURGENSIS LOMBARDIA is constituted by the sole province of <b>Lombardia</b>. HIS may grant autonomy only after event I-G (Spanish Milano) has been played.</p> <p><b>B</b> HASBURGENSIS SICILIÆ has an <math>\text{A}\oplus</math> (III, Latin, <i>Tercios</i> if HIS is).</p> <p>B.1 A fortress may be maintained for free in <b>Lombardia</b>.</p> <p>B.2 The <math>\text{A}</math> may act in <b>HISPANIA</b>, in <i>ITALY</i>, in <b>AUSTRIA</b>.</p> <p><b>XIV.10.2.4 HABSURGENSIS BOHEMIA</b></p> <p><b>A</b> HABSURGENSIS BOHEMIA is constituted by the provinces of <b>Bohème, Lausitz, Silésie, Morava</b>, and is part of the HRE.</p> <p><b>B</b> HASBURGENSIS BOHEMIA has an <math>\text{A}\oplus</math> (III, Latin).</p> <p>B.1 A fortress may be maintained for free in <b>Bohème</b>.</p> <p>B.2 The <math>\text{A}</math> may act in the whole HRE, in <b>POLONIA</b>, HUNGARIA, <b>AUSTRIA</b> (or minor HABSURGUM).</p> <p><b>XIV.10.2.5 HABSURGENSIS HUNGARIA</b></p> <p><b>A</b> HASBURGENSIS HUNGARIA is constituted by the provinces of <b>Szlovákia, Kárpátok, Bukovina, Balaton, Pécs, Erdély, Mureş, Carniola, Croatie, Banat, Kapela, Magyarország</b>.</p> <p>A.1 It may be granted autonomy by HIS only if event I-D (Habsburg Inheritance of Hungary) was played (not event I-E (Downfall of Hungary)).</p> <p>A.2 If autonomy is granted by AUS, AUS may no more use the military counters given by event I-D or event I-E, nor the augmentation of <i>basic forces</i> due to HUNGARIA.</p> <p><b>B</b> HASBURGENSIS HUNGARIA has an <math>2\text{A}\oplus</math> (IIM, Latin).</p> <p>B.1 If HASBURGENSIS HUNGARIA is reduced to 4 provinces or less, the forces are reduced to <math>1\text{A}\oplus</math>.</p> <p>B.2 Fortresses may be maintained for free in any province.</p> <p>B.3 The <math>\text{A}</math> may act in any potential province of HASBURGENSIS HUNGARIA, in <b>POLONIA, TURCIA</b>, HASBURGENSIS BOHEMIA, HUNGARIA, <b>AUSTRIA</b> (or minor HABSURGUM) and provinces of the Balkans (listed in section XIV.14.1 (Instability of the Balkans)).</p> <p><b>XIV.10.2.6 Autonomous States and Events</b></p> <p><b>A</b> Like in any minor country, the revolts in an autonomous state at peace are automatically subdued.</p> <p><b>B</b> During event IV-1 (1) (Bohemian Revolt), the Kingdom of Bohemia may revolt, and thus HASBURGENSIS BOHEMIA ceases to be an autonomous state. AUS may redeclare autonomy (if desired) after the end of the event.</p> <p><b>C</b> At the time of dissociation, AUS* may decide to take anew the control of HASBURGENSIS BOHEMIA or HASBURGENSIS HUNGARIA. It is made by a simple announce. It is complied to give the autonomy to HASBURGENSIS SICILIÆ when it is in its control, at the first diplomacy phase where AUS is at peace. This autonomy cannot be deactivated.</p> <p>C.1 The same does apply to HASBURGENSIS LOMBARDIA if AUS obtains this territory at the end of event V-4 (The War of Spanish Succession).</p>	<div>Specific Rules— master – 2016-04-14</div> <div>[R]303</div> <p><b>XIV.10.3 Spanish economy</b></p> <p><b>XIV.10.3.1 Spanish Colonial Policy</b></p> <p><b>A Viceroy</b> The Spanish player is allowed one extra colonisation action (as compared to the turn limit), free of charge and of investment low, each turn and for a specific Area, provided that HIS has named a Viceroy in the Area.</p> <p>A.1 A Viceroy is a Spanish Conquistador that is publicly announced to be a Viceroy during the Administrative phase. This Conquistador is not allowed to leave the Area anymore.</p> <p>A.2 When a Spanish Conquistador captures the AZTECA capital city of <i>Tenochtitlan</i>, or the INCA capital city of <i>Çușco</i>, this Conquistador is named viceroy of those respective Areas (as well as the adjacent Area of <b>CHICHIMECA</b> in the case of the AZTECA Area conqueror) and is not allowed to leave them anymore until removed from play.</p> <p>A.3 A Viceroy acts as a Governor for the bonuses in COL attempts. It is a Conquistador for discoveries and the use of the table of Conquistadors.</p> <p>A.4 If more than one Area has a Viceroy, only one each turn gains the free colonisation action (player's choice).</p> <p><b>B El Dorado</b> The Spanish player may only attempt to place COL in Areas in <b>AMERICA</b> that contain at least one gold mine site, or in Areas adjacent to such gold mine Areas, or also in <b>CARIBBEAN</b>.</p> <p>B.1 This restriction is lifted from 1615 (turn 26, period IV) onward.</p> <p>B.2 <b>Exception:</b> Starting from 1560 (turn 15, period III), HIS may also attempt to place COL in <b>PHILIPPINES</b>.</p> <p><b>C Foreign trade index</b> HIS has a specific FTI for COL operations, that is different from its FTI (see §B (Other Trade Indexes) of section VI.6.2 (Trade index improvement)).</p> <p>C.1 This FTI is also used for Portuguese COL operations while PORTUGALLIA is in annexation.</p> <p><b>XIV.10.3.2 New Spain</b></p> <p><b>A</b> HIS may annex all establishments (COL and TP) of its enemies in an Area in the El dorado (as defined above).</p> <p>A.1 This count as 1 peace condition, plus 1 per establishment not controlled by HIS in the Area at the time of the peace.</p> <p><b>XIV.10.3.3 Spanish Missionaries</b></p> <p><b>A</b> See section XIV.14.7 (Use of Missions and Missionaries) for the general rules.</p> <p><b>B Unnamed Mis</b></p> <p>B.1 HIS has four unnamed Mis: two <i>Dominicos</i> and two <i>Franciscanos</i>.</p> <p>B.2 Between turn 2 and 25 included (periods I to III), if there is no new named Spanish Mis scheduled this turn, HIS receives an anonymous Mis (if one is available).</p> <p>B.3 From period IV onward, HIS only receives an anonymous Mis on even-numbered turns (they have a <math>\dagger</math> symbol on the turn track).</p> <p>B.4 If an anonymous Mis dies (battle, exploration, attrition, . . . ), he is returned to the counter pool.</p> <p>B.5 However, if a Mis is used to build a mission, its counter is permanently removed from game as with regular Mis.</p> <p><b>C</b> Spanish missions add 1LDE of colonial militia and give the <i>Veteran</i> status to the Colonial Militia in the same province.</p> <p><b>D</b> HIS loses 5VP each time one of its Mission is destroyed.</p> <p><b>E</b> HIS should place one Mission in each Area where it has a COL (nor necessarily for TP). For each colonised Area without such a Mission HIS loses 5VP at the end of the period.</p> <p>E.1 Only one Mission is needed for <b>CARIBBEAN</b> (in any one Area).</p> <p><b>XIV.10.3.4 The Gold Flow</b></p> <p><b>A</b> As soon as the gold mines bring at least 40 <math>\text{₞}</math> per turn to HIS, there is a permanent malus of <b>-2</b> for MNU construction and FTI or DTI augmentation.</p>
--	---

<p>[R]304</p> <p>Hispania</p> <p><b>XIV.10.3.5 The American Empire</b></p> <p><b>A</b> On turns 21 and 22, <i>Antonelli</i> allows the free building of one level of <i>arsenal</i> or of <i>fortress</i> in the ROTW province where he is during the <i>expense phase</i>.</p> <p><b>XIV.10.3.6 The Flota de Oro</b></p> <p><b>A</b> HIS can use each turn two convoys: the Flota de Oro and the Flota del Peru. They are transports fleets each containing 5 NTID and allowed to carry gold only (thus up to 75 ₮).</p> <p>A.1 Those fleets can be placed automatically full and back on the ROTW map, in a COL port belonging to HIS, at the beginning of each military round upon reaching Europe or being destroyed (sunk or captured).</p> <p>A.2 The Flota de Oro is placed in any Spanish port in <b>AMERICA</b> on the Atlantic Ocean, and the Flota del Peru in any port in <b>AMERICA</b> on the Pacific Ocean.</p> <p><b>B</b> The counters are considered to be naval units but count in the stacking limit as a small counter (a LID, and not a fleet).</p> <p>B.1 Therefore it must roll for attrition as any other naval unit. If this unit is intercepted while alone (not escorted), all the gold it currently carries is captured.</p> <p>B.2 If attacked when escorted and if the escort loses the battle, the attacking player receives any gold transported on Transport that would be captured during a pursuit.</p> <p>B.3 Losses due to attrition are of 15 ₮ per sunken NTID.</p> <p><b>C</b> [BLP] During periods II to VI included, HIS gains an extra ② ± out of limit each turn.</p> <p>C.1 This ② ± is always stacked with the Flota de oro. It gains the capacity to go in the ROTW if the counter does not have it.</p> <p>C.2 Every time the Flota de Oro is moved back to <b>AMERICA</b> (after reaching Europe or being sunk), its admiral is changed (discard the previous ② ± and draw a new one at random among the Spanish ones).</p> <p><b>XIV.10.3.7 The Spanish Holland</b></p> <p><b>A</b> See also section XIV.13.3.1 (The Low Countries: Terræ Depressæ) for the state of Holland before annexation by HIS, and section XIV.11.2 (Revolt of the United provinces) for what happens after event III-1 (1) (Revolt of the United Provinces).</p> <p><b>B The Spanish Tax</b> The Spanish Holland is the set of all provinces belonging to HIS in the limits of the national territory of <b>HOLLANDIA</b> ( <b>Friesland, Gelderland, Holland, Overijssel, Utrecht, Zeeland</b>). HIS does not raise directly income from these provinces, but may choose to tax those after event I-A (Dynastic Alliance of the Habsburg).</p> <p>B.1 The income is of 40 ₮, plus 10 ₮ per province owned, for a maximum of 100 ₮, to be added in line <b>B22</b> (Special income) of <i>ERS</i>.</p> <p>B.2 These provinces are counted as foreign for section V.4 (Trade income).</p> <p><b>C Trade implantation</b> See rule §D (Dutch Trading Fleets) of section XIV.11.1 (Holland as a minor country).</p> <p>C.1 The Dutch TF are counted as Spanish for section V.4.4.3 (Atlantic, Mediterranean and Indian Ocean centres) after event I-A (Dynastic Alliance of the Habsburg) and event I-B (Burgundy Inheritance) have been both played. The Atlantic <i>Trade Centre</i> is initially set in <b>Vlaanderen</b> (and counts for TERRÆ DEPRESSÆ and BURGUNDIA).</p> <p><b>D</b> All the preceding rules do not apply any more if PRIMA HOLLANDIA comes into existence (through section XIV.14.9 (Independence of Revolted Principalities)). This may lead to applying the effects of event III-1 (1) (Revolt of the United Provinces) before period III.</p> <p><b>XIV.10.3.8 The Flanders Factories</b></p> <p><b>A</b> The Cloth MNU that is available following event I-B (Burgundy Inheritance) must remain in <b>Vlaanderen</b>. It is destroyed if <b>Vlaanderen</b> ceases to be Spanish.</p>	<p>Specific Rules— master – 2016-04-14</p> <p>[R]305</p> <p>A.1 It is also destroyed also the first time that ANG, HOL and FRA each have a Cloth MNU and if HIS is <i>Counter-Reformation</i>.</p> <p>A.2 Before event IV-2 (1) (Olivares), this Cloth MNU can only be re-built in provinces of Flanders and Holland.</p> <p><b>XIV.10.3.9 Expulsion of the Jews and the Moriscos</b></p> <p><i>The Alhambra Decree was issued in 1492 by the Monarchs of Spain, following the final triumph over the Moors after the fall of Granada. The decree ordered the expulsion of all Jews from Spain. After the fall of Granada in 1492, the Muslim population was promised religious freedom by the Treaty of Granada, but that promise was short-lived. The persecutions led to an uprising in 1500. This was suppressed, and the Spanish authorities took that as a pretext to void the rights and obligations in the surrender treaty. The Moriscos, or converted Muslims, still lived in Spain, especially in the Granada and Valence areas. They were, however, persecuted by the inquisition and the population, leading to the uprising of Granada in 1568. Several edicts of expulsion were tried in various part of Spain until the final expulsion of the Moriscos from all the kingdom in 1614.</i></p> <p><b>A</b> Nouvelle règle d'expulsion des Juifs et des Moresques de l'Espagne :</p> <ul style="list-style-type: none"> <li>- choix au moment de I-8 (1) : Politique d'expulsion ou non</li> <li>- si CR : pas d'expulsion = -50 PV</li> <li>- si Conc. : pas de pénalité</li> </ul> <ul style="list-style-type: none"> <li>- Politique d'expulsion : <ul style="list-style-type: none"> <li>a- limite en FTI/DTI</li> <li>b- ajoute 10% à la capacité d'emprunt national</li> <li>c- bonus +1 aux tests de banqueroute</li> </ul> </li> <li>- Ces effets se terminent d'un manière ou de l'autre : <ol style="list-style-type: none"> <li>1) Expulsion finale après III-10 : annule les effets b et c</li> <li>2) Revenir sur la politique d'expulsions : annule tous les effets, coûte 25 PVs ou gratuit lors de IV-2 (1) Olivares</li> </ol> </li> </ul> <p>A.1 This effect is cancelled if HIS chooses to be conciliatory.</p> <p><b>XIV.10.3.10 Asiento and Exclusivity</b></p> <p><b>A</b> HIS applies a commercial policy of exclusivity, conceding the right to trade with the Spanish colonies (the <i>Asiento</i>) to a very limited number of merchants. There are three different possible statuses:</p> <p>A.1 Exclusive Asiento to Spain;</p> <p>A.2 Weakened Asiento (allows for some contraband and partial trade with foreigners);</p> <p>A.3 Asiento conceded to another MAJ.</p> <p><b>B Exclusive Asiento.</b></p> <p>B.1 HIS cannot grant the right to trade for STZ where it has COL to other countries.</p> <p>B.2 HIS cannot use Slaves from any other establishment than its own and those of its vassals.</p> <p>B.3 If PORTUGALLIA is in annexation, the same policy applies to the COL of PORTUGALLIA.</p> <p>B.4 HIS has a free Concurrence of high investment against a TF in a STZ bordering a Spanish (or Portuguese if annexed) COL.</p> <p><b>C Weakened Asiento</b></p> <p>C.1 From 1615 (turn 26, period IV) onward, HIS may choose each turn to redefine its commercial policy. The first time it goes to <i>Weakened Asiento</i>, HIS loses 20VP and 1Stability. Changing later does not cost anything.</p>
---	---

<div>[R]306</div> <div>Hispania</div> <p>C.2 HIS can now use Slaves from the contraband, or buy Slaves to a MAJ having a TF in a STZ bordering a Spanish COL.</p> <p>C.3 HIS can grant the right to put a TF in a STZ bordering a Spanish COL, paying 10VP per country and per STZ.</p> <p>C.4 When HIS returns to <i>Exclusive Asiento</i>, all the countries with a TF in a STZ bordering a Spanish COL have an Overseas CB for this turn only.</p> <p><b>D Asiento conceded to a country</b> The Asiento is a right that can be conceded to someone else due to wars after 1665 (turn 36, period V) (Asiento is equivalent to one province in terms of peace condition and can be taken also by an oversea war). The former owner of the <i>Asiento</i> (if not HIS) gains an Overseas or normal CB this turn or the next one (to be chosen by the victim).</p> <p>D.1 A country imposing a peace to HIS can ask for the <i>Asiento</i> instead of a province. HIS cannot oppose this. HIS has then a permanent Overseas CB to retake the <i>Asiento</i> right.</p> <p>D.2 If the <i>Asiento</i> is given, the <i>Weakened Asiento</i> effects are applied (with losses of VP and Stability for the first time).</p> <p>D.3 HIS must use the Slaves of only the owner of the <i>Asiento</i>. HIS may request between 0 and 4 Slaves each turn, to be given for free. More may be sold, but there is no obligation. As long as the <i>Asiento</i> owner can give the requested Slaves that HIS requests, he keeps the <i>Asiento</i>. He loses the <i>Asiento</i> after 3 consecutive turns of not providing the requested Slaves.</p> <p>D.4 HIS may use the Slaves contraband.</p> <p>D.5 VP of the <i>Asiento</i> A MAJ with the <i>Asiento</i> accumulates 20VP, plus 1 per turn where he can meet the Slaves request. Those VP are stored, and received at the end of the game or if <i>Asiento</i> is retaken following a war. The VP are lost if the <i>Asiento</i> is lost due to not giving the requested Slaves 3 consecutive turns.</p> <div>XIV.10.4 Military means of an empire</div> <div>XIV.10.4.1 The Tercios</div> <p><b>A Tercios</b> is a technology specific to the Spanish forces, obtained when HIS Land technology marker reaches the <i>Tercios</i> box.</p> <p>A.1 The autonomous kingdoms of HASBURGENSIS SICILIÆ and HASBURGENSIS LOMBARDIA are also <i>Tercios</i> during periods I and II if HIS is <i>Tercios</i>.</p> <p>A.2 The technology <i>Tercios</i> cannot be obtained before 1530. If this happens, HIS will get the <i>Tercios</i> technology in 1530 (turn 9).</p> <p>A.3 <i>Tercios</i> units have a basic morale of 3 during <i>Renaissance</i> and <i>Arquebus</i> (contrarily to other units, that have only 2).</p> <p>A.4 The units opposed to <i>Tercios</i> units receive a malus of -1 to Shock unless in classes I, IM, II, IIM during periods I to V.</p> <p><b>B The Tercios status</b> is lost as soon as a major battle is lost by a stack containing at least one A⊕ with the <i>Tercios</i> advantage against a stack with technology <i>Baroque</i>.</p> <p>B.1 It is also lost as soon as a power obtains the <i>Manoeuvre</i> technology.</p> <div>XIV.10.4.2 Spanish Recruitment Area</div> <p><b>A Reluctant Catalogne</b> Recruitment of HIS inside provinces of Catalogne in its National territory (<b>Catalunya, Pirineos</b>) costs double the normal price.</p> <p><b>B Spanish Lombardia</b> After event I-G (Spanish Milano), <b>Lombardia</b> is added to HIS's <i>Recruitment Area</i>.</p> <p><b>C Spanish Road</b> If HIS controls minor countries or provinces forming a continuous road from <b>Lombardia</b> to any province of TERRÆ DEPRESSÆ or HOLLANDIA, all the provinces of the Low Countries (TERRÆ DEPRESSÆ, HOLLANDIA and BURGUNDIA) are added to its <i>Recruitment Area</i>. It can raise forces there at normal cost. The control can be any diplomatic status (starting at RM).</p>	<div>Specific Rules— master – 2016-04-14</div> <div>[R]307</div> <div>The cortes (assembly) of Catalogne was usually reluctant to the rising of new troops ordered by the central power in Castille.</div> <div>The historic "Spanish Road" went through Savoy, Franche-Comté, Lorraine and Alsace, Luxembourg and shifted toward Switzerland when the Bresse became French.</div> <div>XIV.10.4.3 The Italian Fleet</div> <p>In periods II, III and IV, HIS adds <math>\mathbb{F}\ominus</math> to its <i>basic forces</i> if it owns <b>Campania</b> (without having given its autonomy to HASBURGENSIS SICILIÆ).</p> <div>XIV.10.4.4 Flemish sailors</div> <p><b>A</b> HIS may raise a <math>\mathbb{P}</math> in any of the following provinces: <b>Calais, Flandre, Vlaanderen, Zeeland</b> if it owns the province in question.</p> <p>A.1 This <math>\mathbb{P}</math> may only be used on the European map and not in the Mediterranean Sea.</p> <p><b>B</b> The second <math>\mathbb{P}</math> can only be raised after <i>Olivares</i> or <i>Alberoni</i> and cannot go in STZ of the CC Mediterranean.</p> <div>XIV.10.4.5 At sea</div> <p><b>A Fleet in being</b> [BLP] ⊕ ± numbered 6, 7, 8 and 9 are only available starting from period V (1660, turn 35).</p> <div>XIV.10.5 Other political rules for Spain</div> <div>XIV.10.5.1 Grouped annexions in Italy</div> <p><b>A</b> HIS may consider <b>Palermo</b> and <b>Sicilia</b> as one province when signing a winning peace, so as to take them as one Peace condition.</p> <p><b>B</b> HIS may consider 2 provinces among <b>Campania, Basilicata, Abruzzo, Puglia, Calabria</b> as one province when signing a winning peace, so as to take them as one Peace condition.</p> <p><b>C</b> HIS may consider all the provinces <b>Campania, Basilicata, Abruzzo, Puglia, Calabria</b> as being two provinces when signing a winning peace, so as to take them as two Peace conditions.</p> <div>XIV.10.5.2 Minor countries dependent on Spain</div> <p><b>A Knights</b> HIS is interested in the rules about ORDO HOSPITALIS (section XIV.13.1.2 (Ordo Hospitalis)), especially by §C (Transfer to Malta) of section XIV.13.1.2 (Ordo Hospitalis).</p> <p><b>B Low Countries</b> HIS is interested in the rules about TERRÆ DEPRESSÆ and HOLLANDIA (section XIV.13.3.1 (The Low Countries: Terræ Depressæ))</p> <p><b>C Burgundy</b> HIS is interested in the rules about BURGUNDIA (section XIV.13.3.2 (Burgundia)) and LEODIUM (section XIV.13.3.3 (Leodium)).</p> <p><b>D Austria</b> Finally, HIS should read the rules about Austria and Habsburg (section XIV.12 (Austria and Habsburg Empire)).</p> <div>XIV.10.5.3 The Defence of the Catholic Faith</div> <p><b>A Catholic Faith</b> HIS is interested in section XIV.14.3.1 (Sole Defender of Catholic Faith), section XIV.14.4.1 (Crusades) and section XIV.14.4.2 (Turkish Capture of Wien).</p> <p>A.1 See also the rules about section XIV.13.1.1 (Sancta Sedes).</p> <div>XIV.10.6 HISPANIA in play</div> <div>XIV.10.6.1 Spanish Monarchs and Ministers</div> <p><b>A Isabel and Fernando (Isabel I de Castilla y Fernando II de Aragón)</b> are the monarchs in 1492, with values 6/7/6, scheduled to die at the beginning of turn 6.</p>

---	---

**XIV.11.5 HOLLANDIA in play****XIV.11.5.1 Dutch Leaders**

**A Willem I (van Oranje-Nassau)** is the first *Stadhouder* of HOL. He is scheduled to last 7 turns, and counting from event III-1 (1) (Revolt of the United Provinces), he does not roll for death for 3 turns. He is a monarch 7/9/9. He is also a general *Willem I* (👑 A 3.3.2 -1 [Event III-1]).

**B Oldenbarnevelt (Johan van)** (Land's Advocate of Holland) is available as Monarch to a *Parliament* government for turns 19-26 (included). *Oldenbarnevelt* is a monarch 9/7/7.

**C Maurits (van Nassau)** (Prince of Orange) is available as general *M. Nassau* (👑 A 4.5.5 -1 [T20–T27]) during turns 20 to 27. He is available as Monarch (*Stadhouder* of Holland mainly) for a *Stadhouder* government, with values 7/7/9.

**D Frederik Hendrik (van Nassau)** (Prince of Orange) is available as general *Frederik Hendrik* (👑 A 4.4.3 -1 [T27–T32]) during turns 27 to 32. He is available as Monarch (*Stadhouder* of Holland mainly) for *Stadhouder* government, with values 8/7/7.

**E de Witt (Johann)** (Grand Pensionary of Holland) arrives via event event V-10 (de Witt). He is available as Monarch to a *Parliament* government, with values 9/7/9. However, he may serve as an Excellent Minister in a *Stadhouder* government. (Historical dates: turns 33 to 37).

*E. 1* HOL adds to its *basic forces*  $\text{F} \ominus$  and  $\text{A} \oplus$  during every turn if is engaged in a war (Overseas, limited or full-fledged) during his reign (or Ministry)

*E. 2* During the last two turns of *de Witt*'s term in office (be it Monarch or Minister), add **+1** to the monarch survival test. If the monarch dies during these two turns, *de Witt* is also removed and this ends the event before the new monarch is chosen.

**F Willem III (van Oranje-Nassau)** (of Orange-Nassau and England) is a general *Willem III* (👑 A 3.3.3 [T37–T43]), available from Turn 37 to 43. He can be Monarch of a *Stadhouder* government, with values 7/9/7.

*F. 1* HOL receives a free  $\text{A} \oplus$  added to its *basic forces* when he reigns.

**G Personal Union between Holland and England.** Event event V-3 puts the Orange dynasty on the throne of England. If there is *Stadhouder* of HOL, reputed to be from Orange Dynasty, the two powers share the same Monarch and will be associated by a Dynastic Alliance.

*G. 1* At the instant of the event event V-3 (The Glorious Revolution in England), if the government is *Stadhouder* (e.g., with *Willem III*), HOL is associated to ANG unless HOL declines the offer. In this later case, it immediately reverts to a *Parliament* government (with a new Monarch) and loses 2 in Stability.

*G. 2* If the government is *Parliament*, HOL may elect to change to a *Stadhouder* government (with a new Monarch) and in this case is associated to ANG.

**H Heinsius (Anthonie)** may be named minister through event VI-10 (Heinsius). He has values 9/8/7 and remains a random number of turns; its values can be used for the next monarch's values determination if a succession takes place while he is still alive.

**XIV.11.5.2 Available counters**

**A Military** 3A, 5F, 2P, 15LD/ND, LD, 4NTD, 8LDE/NDE, 2 fortresses 1/2, 4 fortresses 2/3, 5 fortresses 3/4, 2 fortresses 4/5, 5 forts, 2 Arsenal 2/3, 2 Arsenal 3/4 and 4 *Indiërs* LD (and 2 *Indiërs* LDE).

**B Economical** 10COL, 12TP, 8MNU, 20TF, 4 ROTW treaty counters.

**XIV.12 AUSTRIA and Habsburg Empire****XIV.12.1 The Habsburg Empire**

**TODO:** check denominations in all the rules !!!! [AUS/HIS] = AUS sinon HIS; AUS = le majeur ; minor HABSBURGUM ou HABSBURGUM = le mineur ; AUS\* = regroupe les deux (majeur ou mineur)...

**A** There are several designations for the Habsburg Empire in these rules: AUS\* is the generic denomination. HABSBURGUM is the minor country, often written minor HABSBURGUM if an independent minor country (after dissociation from Spain).

**AUSTRIA** and **AUS** are used for AUS\* if the rule only applies to an independent major country. When player actions are done for [AUS/HIS], [AUS/HIS] indicates AUS if possible and HIS otherwise.

**B** AUS\* is Emperor of the HRE, unless specific events say the contrary (especially event I-2 (Election of the HRE Emperor) and event II-2 (1) (Election of the HRE Emperor)).

**XIV.12.2 Austria as a minor country****XIV.12.2.1 The Habsburg Dynastic Alliance**

**A** Until event V-4 (The War of Spanish Succession) takes place, HIS and HABSBURGUM share a special relationship. As such, no country may till then make diplomacy on HABSBURGUM.

*A. 1* Before event I-A (Dynastic Alliance of the Habsburg), AUS\* is considered to be in EW of HIS. It reacts like a normal minor country.

*A. 2* Between those two events, HABSBURGUM is a special ally of HIS: the Spanish Habsburg Dynastic Alliance.

*A. 3* At the beginning of event V-4 (The War of Spanish Succession), the Habsburg Dissociation happens. There isn't anymore a Dynastic Alliance and HABSBURGUM (if it happens to be played as a minor power) is now a regular power.

**B Effects of the Habsburg Dynastic Alliance** The general principle is that HIS and HABSBURGUM are involved in a permanent Defensive and Offensive Alliance. Moreover, it gives a free CB to HIS when HABSBURGUM is calling for its Defensive ally (but only in this case).

*B. 1* When a declaration of war is made against HABSBURGUM, HIS may announce that this is also a declaration of war against HIS (at no extra cost), and thus be fully involved in the war. This is not mandatory, in which case HIS may not be fully involved in the war.

*B. 2* The reverse is not true in principle (some events may overrule this), and HIS must pay in Stability to have HABSBURGUM enter a war declared against or by HIS.

*B. 3* HABSBURGUM has the right to declare war, at no cost in Stability to HIS, on any country declaring war on a minor member of the HRE. This may be changed after event IV-A (Thirty Years' War).

*B. 4* HABSBURGUM may make limited or foreign interventions in other wars, decided by HIS.

*B. 5* When HIS asks for full involvement of HABSBURGUM, however, the roll automatically succeeds (as if HABSBURGUM was VA of HIS).

**C Separate peace** HABSBURGUM may however accept to negotiate separate peace, as any other minor, unless events say so.

**D Access to AUS\*** When HIS is the Emperor:

*D. 1* It gains free access to all HABSBURGUM territories even in peace.

*D. 2* Its monarch may lead troop of AUS.

<div data-bbox="114 90 1117 167"> <div>[R]314</div> <div>Austria and Habsburg Empire</div> </div> <div data-bbox="114 167 1117 598"> <div>XIV.12.2.2 Conduct of the minor HABSURGUM country</div> <p><b>A</b> As a minor country, HABSURGUM always uses the CB offered by political events. When declaring war, it always calls upon any country that would have developed diplomatic relations at least in EW, like if it was a MAJ offensive alliance. If attacked, it calls upon any country like if it was a defensive alliance between MAJ. The penalty for not honouring the alliance is the loss of the diplomatic position.</p> <p><b>B</b> HABSURGUM always takes back the control of the autonomous Habsburg states, except for HASBURGENSIS SICILIAE.</p> <p><b>C</b> A few events may place countries on the diplomatic track of AUS* even when it is only a MIN. They are managed (until the dissociation) — giving their incomes or entering in war — as if they were on HIS diplomatic track.</p> <p>C.1 Before the dissociation, if HIS does not defend their position on the track, they are automatically defended by HABSURGUM (with the DIP of HIS and a small investment).</p> <p>C.2 After the dissociation, they are defended by AUS* as if AUS* was an abandoned MAJ (see §B (Diplomatic track of minor countries) of subevent XXVI.1.2.5 (Position of the now Minor country)).</p> <p><b>D</b> After Dissociation due event V-4 (The War of Spanish Succession), the <i>basic forces</i> of HABSURGUM are increased by <math>\Delta\oplus</math> and 2 levels of fortification.</p> </div> <div data-bbox="114 598 1117 686"> <div>XIV.12.3 Specific affairs of AUS*</div> <p>This section applies to both major and minor AUS*.</p> </div> <div data-bbox="114 686 1117 1236"> <div>XIV.12.3.1 Crusades against the Ottomans</div> <p><b>A Catholicism and Crusades</b> The religion of HABSURGUM is always Catholic, and Catholic/Counter-Reformation as soon as possible (from event I-8 (2) (Growth of the Reformation)).</p> <p>A.1 AUS* has a free CB against TUR if a <i>Crusade</i> is called for. If Emperor, HABSURGUM will always use it. Else, a test must be made (section XIV.14.4.1 (Crusades)).</p> <p><b>B Reconquest of Hungary</b> After event I-D or event I-E, apply the following.</p> <p>B.1 AUS* has a permanent CB against TUR as long as TUR own a province initially in HUNGARIA.</p> <p>B.2 If both HABSURGUM (under this provision) and HIS declares a war against TUR at the same turn, it costs the penalty (in Stability and VP) according only to the CB that HIS has.</p> <p>B.3 The <i>basic forces</i> of AUS* are increased by <math>\Delta\ominus</math> if HUNGARIA was split due to event I-E (Downfall of Hungary) and <math>\Delta\oplus</math> if due to event I-D (Habsburg Inheritance of Hungary), or <math>\Delta\oplus</math> if AUS* owns at least 10 provinces of HUNGARIA (the best applies).</p> <p>B.4 AUS* uses the leaders of HUNGARIA as if its own. AUS* may use the counters of HUNGARIA if it owns at least 7 provinces of HUNGARIA, and only one <math>\Delta</math> and half of the LID if it owns between 4 and 6 provinces.</p> <p><b>C Technology</b> HABSURGUM begins the game as III, Latin technology, until its army class is changed from III to IV in period V or by either event V-9 (From Montecuccoli to Prinz Eugen) or the Habsbourg Dissociation.</p> <p>C.1 HABSURGUM troops never use <i>Tercios</i> technology.</p> </div> <div data-bbox="114 1236 1117 1284"> <div>XIV.12.4 Austria as a major country</div> </div> <div data-bbox="114 1284 1117 1513"> <div>XIV.12.4.1 Diplomacy of Austria</div> <p><b>A</b> See the §D (Hollandia-Austria) of subevent XXVI.1.3.2 (Eight-players game) (or §D.4 (Sweden-Austria) of subevent XXVI (Eight-players game)) for the conditions of the transfer of a player to AUS.</p> <p><b>B The Habsburg Dynastic Alliance</b></p> <p>B.1 At the beginning, HIS and AUS are always linked by a mandatory alliance, even if they fail to answer it or even at war against one another (so that they still may answer the alliance against other powers). They can do full or limited intervention, both in offensive or defensive stance.</p> </div>	<div data-bbox="1117 90 2123 167"> <div>Specific Rules— master – 2016-04-14</div> <div>[R]315</div> </div> <div data-bbox="1117 167 2123 566"> <p>B.2 During that time, HIS does not lose Stability to use the defensive alliance to help AUS.</p> <p>B.3 However, they are not mandatorily allied if they are not using CB given by this Alliance, except if they announce it (and could so make separate peace at no cost, and so on).</p> <p>B.4 They may be at war against one another, but only if using a legitimate CB to do so.</p> <p>B.5 They are no limit to money transfer between them.</p> <p>B.6 At the end of event IV-A (Thirty Years' War), if both HIS and AUS has achieved Neutral or Losing positions, the mandatory alliance becomes defensive only and is weakened in the sense that a limited intervention is sufficient to fulfill it. The mandatory alliance is not offensive anymore.</p> <p>B.7 At the beginning of event V-4 (The War of Spanish Succession), there isn't anymore a Dynastic Alliance. Note however that, depending on the choice of the Heir, there might be different kinds of Dynastic Ties as described in this event.</p> <p><b>C HRE</b> If AUS is Emperor of the HRE, it gains a free CB in reaction on any country declaring war on a minor member of the HRE. This may be changed after event IV-A (Thirty Years' War).</p> </div> <div data-bbox="1117 566 2123 614"> <div>XIV.12.4.2 Baltic Fleet</div> </div> <div data-bbox="1117 614 2123 766"> <p><b>A</b> The ownership of at least one province that did belong to the HANSA minor country increases the construction limits and <i>basic forces</i> of AUS.</p> <p>A.1 The AUS <math>\mathbb{F}</math> counter can then also be used (anywhere).</p> <p>A.2 In this case, AUS may use TF, but only in periods VI and VII</p> <p><b>B</b> AUS has no CTZ</p> </div> <div data-bbox="1117 766 2123 805"> <div>XIV.12.4.3 Autonomous Habsburg States</div> </div> <div data-bbox="1117 805 2123 1037"> <p><b>A</b> See section XIV.10.2 (Autonomous Habsburg States) for the rules about the autonomy that can be given to cadet branches.</p> <p><b>B</b> At the time of the dissociation, AUS* may decide to remove the autonomy given to the autonomous kingdoms of HASBURGENSIS HUNGARIA and HASBURGENSIS BOHEMIA. The same applies to HASBURGENSIS LOMBARDIA if AUS* gets the province of <b>Lombardia</b> in the resolution of event V-4 (The War of Spanish Succession).</p> <p><b>C Sicilia</b> HASBURGENSIS SICILIAE must be given its autonomy if owned by AUS*, and <b>Sicilia, Palermo, Saldigna</b> are in this case part of it.</p> </div> <div data-bbox="1117 1037 2123 1109"> <p><b>D Hungary</b> Increase of Basic force and usage of Hungarian counters are cancelled if HASBURGENSIS HUNGARIA is granted autonomy.</p> </div> <div data-bbox="1117 1109 2123 1149"> <div>XIV.12.4.4 Inheritance of the Hasburg Empire</div> </div> <div data-bbox="1117 1149 2123 1356"> <p><b>A</b> If event I-A (Dynastic Alliance of the Habsburg) had been contracted, AUS* always consider all provinces of TERRÆ DEPRESSÆ, event I-B (Burgundy Inheritance), event I-I (Spanish Naples) and event I-F (Habsburg Control of Milano) as former provinces, for the sake of section XI.3.5 (Transfers of Provinces by Peaces).</p> <p><b>B</b> AUS* always consider all provinces of event I-D (Habsburg Inheritance of Hungary) and event I-C (Habsburg Bohemia) as former provinces, for the sake of the same rule.</p> <p><b>C</b> AUS* may, under the same conditions, annexe the capital province of those minor powers, even if it has been recreated.</p> </div> <div data-bbox="1117 1356 2123 1396"> <div>XIV.12.4.5 Grouped annexions in Italy</div> </div> <div data-bbox="1117 1396 2123 1513"> <p><b>A</b> AUS* may consider <b>Palermo</b> and <b>Sicilia</b> as one province when signing a winning peace, so as to take them as one Peace condition.</p> <p><b>B</b> AUS* may consider 2 provinces among <b>Campania, Basilicata, Abruzzo, Puglia, Calabria</b> as one province when signing a winning peace, so as to take them as one Peace condition.</p> </div>
--	---

**C AUS\*** may consider all the provinces **Campania, Basilicata, Abruzzo, Puglia, Calabria** as being two provinces when signing a winning peace, so as to take them as two Peace conditions.

### XIV.12.5 AUSTRIA in play

#### XIV.12.5.1 The Austrian monarchs

**A Ferdinand II** is the monarch at the beginning of pIV or of event IV-A (Thirty Years' War) if it happens in pIII in the nine-players version. His values and length are obtained at random (Dynastic Crisis are not possible).

**B Ferdinand III** is the monarch at the time of the dissociation of the Habsburgs (caused by event V-4 (The War of Spanish Succession)), for the eight-players version. He has values 6/8/7, whose reign length should be rolled for (further Dynastic Crisis are not possible!).

**C Maria Theresia** becomes the Archduchess of Austria at the beginning of event VI-13 (War of Austrian Succession). She has values 8/8/7 and lasts 8 turns. She does not roll for survival for the first 5 turns of her reign. She cannot be used as general. AUS gains  $\Delta\oplus$  of *basic forces* during her reign.

**D Kaunitz (Wenzel Anton)** may be named minister through event VII-21 (Kaunitz). He has values 9/8/7 and remains a random number of turns; its values can be used for the next monarch's values determination if a succession takes place while he is still alive.

#### XIV.12.5.2 Available counters

**A Military** 4 $\Delta$ , 1F (see section XIV.12.4.2 (Baltic Fleet)), 2LD/ND, 6LD, 2NTD, 3LDE/NDE, 2 fortresses 1/2, 4 fortresses 2/3, 4 fortresses 3/4, 3 fortresses 4/5.

**B Economical** 7MNU, 2TF (see section XIV.12.4.2 (Baltic Fleet)).

## XIV.13 On Specific Minor Powers

The minor powers that can also be major powers are mentioned in their own chapters (**AUSTRIA**, **HOLLANDIA**, **PRUSSIA**, **SUECIA**, **VENETIA**).

### XIV.13.1 Italian and Mediterranean countries

#### XIV.13.1.1 SANCTA SEDES

**A** If any power has a control of a province of SANCTA SEDES, the Sole Defender of Catholic Faith (XIV.14.3.1) and the power that has the SANCTA SEDES on its diplomatic track both have a CB against the controller of the province as long as it has one.

**A.1** Remark that this is modified in case of *Crusade* (until the end of period III).

**A.2** If **Lazio** is under control of TUR at any time, all Catholic players have a permanent free CB against TUR (until **Roma** is released).

#### **B Diplomacy**

**B.1** A Catholic country has a bonus due to having the same religion on SANCTA SEDES only if it is Counter-Reformation.

**B.2 The Papal treasury** The Holy See provides a financial help of 50  $\text{⌚}$  to its controller if it is a Catholic and at least in MA (to be recorded in line **A7** of ERS).

**B.3** TUR may make no diplomacy on SANCTA SEDES.

**B.4** Any Catholic player that declares war to SANCTA SEDES has to spend double the usual cost of Stability.

**C The Pope in Venice.** If **Roma** is conquered by TUR, or if SANCTA SEDES is annexed by VEN, the Pope is taken in **Venezia**. VEN gains a bonus of +1 to diplomacy attempts on all catholic minor countries.

### XIV.13.1.2 ORDO HOSPITALIS

The ORDO HOSPITALIS minor country represents the Knights of the Order Of Saint-John of Jerusalem. This minor country starts in the province of **Rhodos** at the beginning of game in AD 1492.

**A Diplomacy** Any Christian player declaring war to the ORDO HOSPITALIS loses immediately 4 Stability levels.

**A.1** TUR can make no Diplomacy on the ORDO HOSPITALIS.

**B Relations with Turkey** The ORDO HOSPITALIS are always in a state of restricted Overseas War against TUR.

**B.1** It allows them to use their Privateer and naval forces (no land forces) to attack TUR. TUR can use its own naval forces to fight against them.

**B.2** The diplomatic patron of the ORDO HOSPITALIS play this forces, or HIS if they are neutral.

**B.3** The annexes specify the reinforcements gained by the ORDO HOSPITALIS each turn: a  $\text{P}\ominus$  (or  $\oplus$  if in **Rhodos**), and a NGID or a NIDE.

**B.4** This state of war does not cause automatic Stability loss at the end of turn. But, each turn that the pirate of The Knights inflicts losses on Turkish commercial fleets, TUR loses 1 Stability level if at peace and not anti-prosperous.

**C Transfer to Malta** Whenever **Rhodos** is conquered by the Turkish player, the Spanish player may cede the province of **Malta** to The ORDO HOSPITALIS (if this province is still Spanish).

**C.1** If **Malta** is not owned by HIS when this happens, the Sole Defender of Catholic Faith (XIV.14.3.1) may ask to the owner of **Corfou** or **Kreta** (if Catholic) to transfer the ORDO HOSPITALIS on one of these islands. The province is ceded in the same way and the Sole Defender of Catholic Faith (XIV.14.3.1) receives the benefits of the operation (instead of HIS). If no MAJ accepts a transferal, the ORDO HOSPITALIS is definitively destroyed.

**C.2** In counterpart of the cession, HIS receives the diplomatic marker of the ORDO HOSPITALIS, placed directly in his VA box. It will remain there until the disappearance of the ORDO HOSPITALIS. No diplomacy is then allowed anymore on this minor, except for HIS (for possible diplomatic annexation).

**C.3** Units of the ORDO HOSPITALIS are transferred and refilled automatically to their new province upon ceding of this province by HIS.

**C.4** If it is conquered by the Turkish player after this transfer, all ORDO HOSPITALIS units are destroyed definitively, even if the province is subsequently recaptured by a Christian player.

#### **D Military forces of the Knights**

**D.1** Units of the ORDO HOSPITALIS are always *Veteran*. Their maintenance is free, including that of all reinforcements received.

**D.2** Their  $\text{P}$  may not go out of *MEDITERRANEAN SEA*. If there is a port under Christian control (it doesn't matter which Christian nation, player or minor country) touching sea zones in the **Bassin Levantin** or **Mer Égée**, the privateer's dice rolls are modified by -2.

**D.3** The rest of their forces can only be used against Turkish forces, or forces of countries allied to TUR in a current war.

**D.4 The Grand Master** The Knights have a permanent military leader named *Grand Maître*. It is never eliminated (a new *Grand Maître* is automatically and immediately elected if it is killed, injured or captured). He may be used either as an Admiral (privateer Admiral included) or a General, at the discretion of the player controlling that minor.

**D.5 La Valette** The *Grand Maître* is replaced by *La Valette* if, beginning with period III or the transfer of the ORDO HOSPITALIS outside of **Rhodos**, a roll of 4 or more is obtained on 1d10. This roll is made in the first battle or siege where the *Grand Maître* is used (except in naval combats because of the limited Overseas War against TUR). *La Valette* remains for 4 turns in the game (including the current turn), and will be replaced back by the usual *Grand Maître* at the end of this time (or if killed or captured, or temporarily if injured). He may enter the game only once.

### XIV.13.1.3 Barbaresque countries

**A The Barbaresques.** Barbaresque countries are CYRENAICA, TRIPOLIS, TUNESIA, ALGERIA and MAURETANIA. They are always in a state of restricted Overseas War against every Christian countries.

A.1 It allows them to use IP and naval forces (no land forces) to attack Christian countries. Christian countries can use their own naval forces or *Præsidios* to fight against the Barbaresques.

A.2 As an exception, IP of the Barbaresques may loot European provinces adjacent to the STZ they attack, even if they are European provinces usually outside the scope of Overseas Wars.

A.3 TUR plays the Barbaresques that are neutral, and the diplomatic patrons play those that are not.

A.4 This state of war causes no loss of Stability.

A.5 *Reinforcements* They receive some reinforcements each turn: ALGERIA gains a IP⊖ each turn; in periods I to III it receives also a ND or 2 NGID (player's choice) and in periods IV and after, only one NGID or a NDE. Other countries gain only a IP⊖ 2 turns after their Privateer has been destroyed.

A.6 *Exception.* Whenever *Dragut* is in play and if it used in its Privateer leader role, a IP⊖ of TUNESIA is raised (even if eliminated at previous turn).

A.7 *Mandatory Sea Sortie* The Privateers usually have to go out at sea each turn, except if their Patron decides against it: a test is made at the beginning of the 2nd round if the Privateer is not at sea, by rolling 1d10 for each country the Patron wants to keep the Privateer at port. This is permitted if the result is lower or equal to the number of the current period plus the Diplomatic status bonus and the geopolitical and bonus/malus (but not the religious one).

### B Which seas are attacked

B.1 ALGERIA may send its Privateer in the **Mer d'Alboran**, to attack both CTZ **HISPANIA** and STZ **Golfe du Lion**, or in STZ **Golfe du Lion**.

B.2 TUNESIA may send its Privateer in STZ **Golfe du Lion** or STZ **Mer Ionienne**.

B.3 TRIPOLIS and CYRENAICA send their Privateer in STZ **Mer Ionienne** or CTZ **VENETIA**.

C All Christian countries have a permanent Overseas CB against the Barbaresque countries.

D *Præsidios* may be installed in coastal provinces of Barbaresque countries.

**E Relations between TUR and the Barbaresques** Depending on several events, TUR may have geopolitical malus to all diplomacy attempts against all Barbaresque countries.

E.1 Initially (before event event II-6 (2) (Alignment of Barbaresques), or event II-6 (1) (Turkish Vassalisation of Algeria) at the end of *Barbaros*), TUR has a -3 malus to all diplomacy attempts against all Barbaresque countries. This malus is cancelled afterwards.

E.2 Event event IV-4 (2) (Alaouite dynasty in Mauretania) puts back a -3 malus to all diplomacy attempts against MAURETANIA.

E.3 Event event VI-z (End of the Ottoman rule in North Africa) sets a uniform -3 malus to all diplomacy attempts against all Barbaresque countries (including MAURETANIA).

PD 07/20078: MORE TO DO

**Design note:** These rules simulate both the clear trend toward independence of those regions, the occasional in-fighting that are not expliciteley dealt with, but also leave open the historical window of Turkish domination over those countries.

**F Pirates and Ottoman admirals** *Barbaros* and *Dragut* may be used as Turkish leader if their country is a VA of TUR. They can then lead both Turkish units and units from their own country.

F.1 *Barbaros* The first time *Barbaros* is reputed dead due to battle loss or attrition, he is in fact unavailable for the rest of the turn but returns back in play at the beginning of the following turn.

### XIV.13.1.4 The Mamluks: ÆGYPTUS and SYRIA

**A** The two countries ÆGYPTUS and SYRIA are ruled by the Mamluks. They are allied in all wars and will do a limited intervention on the behalf of the other if involved in war.

A.1 In full war, ÆGYPTUS in naval or defensive still send its forces freely in SYRIA. The converse is not true.

**B Trade of Grand Orient.** In 1492, the CC Grand Orient is in al-Āskandariyah. As long as it is the case:

B.1 VEN earns half of the income of the CC Grand Orient if ÆGYPTUS is not at war.

B.2 TUR receives half of its income if it owns Dimaşq, or if it has SYRIA its diplomatic chart.

B.3 In 1492, ÆGYPTUS knows **Mer rouge**. subevent I-13.α (War in Indian Sea) gives more discoveries.

**C Conquest by Turkey.** If, at a phase of peace, one Mamluk state has no A counter left in any of its provinces and its capital is controlled by TUR, then the MIN is destroyed and all its provinces are annexed by TUR.

C.1 When ÆGYPTUS disappears, the CC Grand Orient is permanently displaced to İzmir and TUR receives from now on its full income. From now on, the convoy of İzmir is available. TUR gains all the discoveries of ÆGYPTUS (thanks to Piri Reis).

### XIV.13.1.5 GENUA

**A Enmity with Venice** VEN can make no regular diplomacy upon GENUA.

B GENUA has a commercial fleet and a base FTI of 3, or 4 in periods IV to VII.

C As long as GENUA as a commercial fleet in CTZ **HISPANIA**, HIS has a diplomatic bonus of +2 on GENUA.

**D Andrea Doria** The first time *A. Doria* is reputed dead due to battle loss or attrition, he is in fact unavailable for the rest of the turn but returns back in play at the beginning of the following turn.

## XIV.13.2 German countries

### XIV.13.2.1 The Holy Roman Empire (SRI)

**A** SRI is a political entity regrouping the German minor countries of the HRE: ALSATIA, BAVARIA, BOHEMIA, BRANDENBURGUM, BRUNSVICUM, CLIVIA, COLONIA, FRIBURGUM, HABSBURGUM, HANOVERE, HANSA, HASSIA, LEODIUM, LOTHARINGIA, MOGENTIUM, PALATINATUS, SAXONIA, TREVORUM, TURINGIA, WESTFALLIA, WIRTEMBERGA, HABSBURGUM BOHEMIA. The Emperor (usually AUS\*) has the following advantages.

A.1 The Emperor receives 50 ₧ as subsidies each turn.

A.2 The Emperor has a free CB if any country of the HRE is attacked. This may change after event IV-A (Thirty Years' War).

A.3 The Emperor may not be AUS\* (or HIS) due to event I-2 (Election of the HRE Emperor) or event II-2 (1) (Election of the HRE Emperor).

**B Imperial Army** The Emperor may use the counters of SRI under some conditions. If the Emperor declares war following the previous CB, or due to some events, he may use the counters of the SRI. The Emperor has at its disposal 1A and 2LD counters. The maintenance of the imperial units is free.

B.1 1 *Veteran* LD is obtained for free on the first turn.

B.2 Forces brought by the HRE allies that are at least in EW of the Emperor can also be put directly in the imperial units.

B.3 *Placement of the units* The initial imperial units may be placed in **Franken**, in the Emperor's own capital, or in the country of the HRE that triggered the intervention of the Emperor.

B.4 If the imperial units are placed in the Emperor's capital, some of the Emperor's own units may also be transformed in imperial units. However, they will not be returned at the end of the war.

**C Reinforcements** During each Logistics phase of the intervention (including the first), the Emperor may pay 50  to roll a reinforcement die (no modifiers, under the *Defensive* attitude). The units obtained there are imperial units (but *Conscripts*).

C.1 Reinforcements may be placed in any province of the HRE.

C.2 Fortresses levels may be put in either the attacked HRE member, or in the Emperor's territory if not possible.

C.3 Campaigns obtained there may only serve to move imperial units, or units of a HRE minor country (not HABSBURGUM).

**D Geographic limits** Imperial units may only be used in the HRE, in *ITALY* or in any province of the Emperor (including Habsburg autonomous states if AUS\* or HIS is Emperor, see section XIV.10.2 (Autonomous Habsburg States)).

D.1 The provinces annexed by FRA are no longer part of the HRE after their annexation.

**E End of intervention** When the war that triggered the intervention stops, the imperial units disappear (even if other wars are ongoing).

**F Capital of the HRE** *Frankfurt* is the capital of the HRE (in **Franken**). It may be annexed normally, but the Emperor has a free CB against the MAJ that owns it.

#### XIV.13.2.2 Alliances in the HRE

**A** Some alliances in the HRE may lead to the appearance of some local alliances of minor countries with special rules: see event II-9 (War of the Schmalkaldic League), event III-1 (3) (League of Nassau), event part IV-A.κ (Northern HRE Alliance), event part IV-A.λ (Southern HRE Alliance) or even event part IV-A.μ (German Empire).

#### XIV.13.2.3 The OberPfalz: BAVARIA and PALATINATUS

**A** In 1492, PALATINATUS has 2  counters and BAVARIA 1  counter. This changes during event IV-A (Thirty Years' War), and may change permanently following event part IV-A.η (Peace of Prague).

A.1 BAVARIA may obtain a permanent bonus of +1 in reinforcements following event part IV-A.η (Peace of Prague) or event VII-2 (The War of Bavarian Succession).

#### XIV.13.2.4 HELVETIA

##### A Restriction of Intervention

A.1 A limited intervention by HELVETIA is restricted to one  , that can only go in *ITALY*.

A.2 Its is not possible to involve fully HELVETIA in a war except by declaring a new war against it. Thus full implication because the country is in EW or doing a limited intervention is not allowed.

**B Military Specifics** The forces of HELVETIA before *Baroque* are always *Veteran* and cancel the cavalry modifier of enemies.

**C The Perpetual Peace** During periods I to III, if the HELVETIA army suffers a major defeat during a battle (even if they were not alone), it may sign a *Perpetual Peace* with the winning player's country at the conclusion of the upcoming Peace phase (player's choice).

C.1 When the peace is signed, HELVETIA may no longer attack (or have its units used by a player to attack) the winning country and reciprocally.

C.2 This peace brings 10 additional VP to the player that obtains it, and a gain of 1 additional level in Stability.

C.3 If HELVETIA signs a perpetual peace, its diplomatic counter can no longer ever exceed the MA box of any player, including the victorious player. The military specifics of HELVETIA are cancelled and HELVETIA is now forbidden to make limited intervention in wars: it can only be in wars if attacked.

C.4 The player receiving the benefit of the perpetual peace may, until the end of period V, buy at the normal cost one *Veteran*  per turn that is not counted in his turn limit.

### XIV.13.3 Northern and Western countries

#### XIV.13.3.1 The Low Countries: TERRÆ DEPRESSÆ

**Design note:** The trading countries of the North-East were only step by step integrated in the empire of Charles V, between 1520 and 1543, either by military action or diplomatic weddings. They are assembled in a minor country called TERRÆ DEPRESSÆ (Low Countries).

**A** The provinces **Holland, Utrecht, Gelderland, Overijssel, Friesland and Zeeland** are assembled in 1492 in the TERRÆ DEPRESSÆ minor country. See also section XIV.10.3.7 (The Spanish Holland).

**B Disappearance** After event I-A (Dynastic Alliance of the Habsburg), HIS may annexe these provinces, either by military action (in which case a special exception is granted to allow the capital to be taken as a normal province) or through dynastic actions.

B.1 A dynastic action may be made to attempt to annex a province through diplomacy if HIS and TERRÆ DEPRESSÆ are not at war. The difficulty of this action is the income value of the province, divided by two and rounded down. **Gelderland** may not be annexed in this way.

B.2 When event I-B (Burgundy Inheritance) happens, **Zeeland**, if still owned by TERRÆ DEPRESSÆ, is immediately annexed by HIS.

#### XIV.13.3.2 BURGUNDIA

**A The status of Burgundy in 1492** There is a minor BURGUNDIA in 1492. It is placed in EW of AUS\*. No diplomacy can be attempted on it.

A.1 A declaration of war on BURGUNDIA is in fact a declaration of war against AUS\*.

A.2 AUS\* may test normally for entry in war of BURGUNDIA.

**B Spanish Low Countries** These are the provinces of **Vlaanderen, Flandre, Hainaut, Brabant, Limburg, Luxemburg and Artois**. They are annexed by HIS as soon as dynastic action A-2 (and thus event I-B (Burgundy Inheritance)) is played. They form the *Spanish Low Countries*, who can be annexed in one block (the parts that HIS still owns) during event V-4 (The War of Spanish Succession) by either AUS, ANG, FRA or HIS.

B.1 **Franche-Comté** is also inherited by HIS, but is not part of the *Spanish Low Countries*.

B.2 The CC Atlantic is initially both in BURGUNDIA and HOLLANDIA. It gives its incomes to HIS after either event I-A (Dynastic Alliance of the Habsburg) or event I-B (Burgundy Inheritance).

#### XIV.13.3.3 LEODIUM

**A LEODIUM** It can only be a vassal or annexed by the owner of the provinces of the *Spanish Low Countries*, HIS, AUS, ANG or FRA (initially, it would be HIS but that owner may change depending on the consequences of event V-4 (The War of Spanish Succession)).

#### XIV.13.3.4 DANIA

**A DANIA** may be played as a major country in some setting.

**B DANIA** has a commercial fleet and a base FTI of 3, or 4 in periods IV to VII.

##### C The Sund and Danemark

C.1 In 1492, DANIA has the Rights on the Levies on the Sund (see section XIV.14.8.1 (Levies of the Sund)).

C.2 If DANIA levies the taxes, it adds one  to its reinforcements this turn. If it has the Rights on the Levies on the Sund, DANIA will take them if it is fully at war. It may take them if it makes a limited intervention (controller's choice).

C.3 Whenever DANIA signs a victorious peace, it takes back the Rights on the Sund, even if this condition is not part of the Peace Treaty. In this case, the previous owner of those Rights has a free CB against DANIA on the following turn if it was not on the losing side of the peace.

<div>[R]322</div> <div>On Specific Minor Powers</div> <p>C.4 The country having the Rights on the Sund can give them back to DANIA as a diplomatic announcement. The country gains a +2 on diplomatic actions on DANIA this turn.</p> <p>C.5 DANIA is the only minor country that considers taking the Rights on the Sund as a valid condition of peace.</p> <p><b>D Relations with SUECIA</b></p> <p>D.1 SUE can not achieve a status better than MA. See also section XIV.7.2.1 (Relations with Dania) for the claim of DANIA to the Swedish Crown.</p> <p>D.2 Lower the European Market by 75  when SUE (or SUECIA) and DANIA are at war against each other. This effect is not applied to any country that is involved in this war.</p> <p><b>XIV.13.3.5 The Hansa</b> </p> <p><b>A</b> The HANSA has many capital cities in its provinces (the country is an union of independent cities). It may be destroyed due to event event IV-A (Thirty Years' War).</p> <p><b>B</b> The HANSA has commercial fleets and a base FTI of 2, or 3 in periods IV to VII.</p> <p><b>XIV.13.3.6 The United States of America</b> </p> <p><b>A</b> The United States of America (UNITED STATES) is a new minor country created by a defeat of the Colonial power during the event event VII-4 (War of Independence in the Colonies).</p> <p><b>B Forces of the USA</b> The UNITED STATES have a basic force made of one . This army is of class IV.</p> <p><b>C</b> The UNITED STATES controls all rebel Colonies that have victoriously seceded from the MAJ.</p> <p><b>D</b> Any player and minor countries can now place commercial fleets in STZ located on sea zones adjacent to UNITED STATES territories, without restriction.</p> <p><b>E</b> The basic value of the European foreign market increases after the creation of the UNITED STATES: read this income one line above the usual line (except if at war against the UNITED STATES).</p> <p><b>F</b> The UNITED STATES is a stoutly neutral country. Therefore, no diplomacy is possible with the UNITED STATES.</p> <p><b>G UNITED STATES and War</b> In case of declaration of war on the UNITED STATES, this minor rolls on table VII.6 (Reinforcements of Minor countries Fully at War) both during the Logistic purchase sub-phase and at the end of every winter round in the Military phase.</p> <p>G.1 Also consider that American colonies of UNITED STATES have 6 levels each for militia and fortification, and for movement and supply purposes of their own units (not applicable to foreign units).</p> <p><b>H Québec and South America</b> Because the event may happen more than one time, there may exists more than one country sharing the same characteristics of the UNITED STATES.</p> <p><b>XIV.13.4 Eastern countries</b></p> <p><b>XIV.13.4.1 The Khanates and Cossacks</b></p> <p><i>In 1492, the khanate of the Golden Horde, heir of the mongol conquests, is but a shadow of its former glory. It still exists, however, and claims sovereignty over the other khanates. It is only in 1502 that the khanate of Crimea destroyed the Golden Horde.</i></p> <p><b>A The Golden Horde</b> </p> <p>A.1 In 1492, the TARTARIA is the khanate of the Golden Horde. Its basic forces is  and LID.</p> <p>A.2 If a country declares war to either CAZAN, ASTRACAN or DON CASSACKIA, the Golden Horde makes a full intervention in war at the side of the MIN. This does not apply if the MIN declares the war.</p>	<div>Specific Rules— master – 2016-04-14</div> <div>[R]323</div> <p>A.3 event I-11 (1) (The End of the Golden Horde) destroys the Golden Horde. Henceforth, TARTARIA can no more use the  counter, and its basic forces are reduced to LID (and the basic reinforcements to nothing). The defensive alliance is also broken and does not apply any more.</p> <p><b>B The Wastelands of the Khanates</b> The territories of the Khanates are subject to section I.1.3.1 (Wasteland area).</p> <p><b>C Cossacks of UKRAINA</b> This MIN can be created by event IV-17 (2) (Revolt of the Cossacks), where the specifics are described.</p> <p><b>XIV.13.4.2 The Nordic Orders, PSKOVE, REZANE, SIBERIA</b></p> <p><b>A Nordic Orders</b> </p> <p>A.1 FRATRES MILITIAE CHRISTI and D.S.M. THEUTONICORUM may be destroyed by event I-H (Secularisation of D.S.M. Theutonicorum) and event III-8 (Secularisation of Fratres Militiae Christi).</p> <p><b>B Russian Principalities</b> </p> <p>B.1 PSKOVE or REZANE may be destroyed by event I-11 (2) (Russian Annexation of Pskov and Ryazan).</p> <p><b>C SIBERIA</b> </p> <p>C.1 Settlements of TP/COL are not allowed east of <b>SIBÉRIE</b> as long as SIBERIA exists. TP and COL can be placed in <b>SIBÉRIE</b> though.</p> <p>C.2 SIBERIA is destroyed when there is at least 10 levels of COL (not TP) in its territory, or when it is defeated in unconditional surrender by any power.</p> <p><b>XIV.13.4.3 BOHEMIA, HUNGARIA and TRANSILVANIA</b></p> <p><b>A HUNGARIA</b> </p> <p>A.1 During Periods I to III [BLP], as soon as one of the following conditions apply:  TUR wins a major battle against a stack containing at least one  counter of HUNGARIA and decides to activate the downfall;  OR TUR controls <b>BUĐA</b> (automatic);  OR [BLP] TUR controls at least 5 provinces owned by HUNGARIA (automatic);  HUNGARIA collapse with the three following effects.</p> <p>A.2 POL may make a limited intervention at the side of HUNGARIA. AUS* may immediately make a limited intervention or enter war against TUR, allied with the collapsing HUNGARIA. These are not declarations of war, no Stability is lost and no reinforcements are rolled.</p> <p>A.3 TUR may not sign peace with HUNGARIA this turn.</p> <p>A.4 AND the first event rolled next turn is automatically event I-E (Downfall of Hungary). «««&lt; HEAD =====&gt;»»»&gt; BLP</p> <p>A.5 Alternatively, HUNGARIA may be annexed by the minor HABSBURGUM at the conditions described in event I-D (Habsburg Inheritance of Hungary).</p> <p>A.6 [BLP] AUS may diplomatically annex HUNGARIA with a threshold of 10. In this case, the country is destroyed and all its provinces are annexed by AUS without gaining any VPs. This may be done only by major AUS (not by AUS*) and thus may not happen before Period IV.</p> <p><b>B The Little war and The Long war [BLP]</b> </p> <p>B.1 These rules start with event I-E (Downfall of Hungary) and end with either a formal peace treaty between TUR and AUS* or event V-z (The Great Kuruc Uprising). They may be partially reactivated during event IV-A (Thirty Years' War).</p> <p>B.2 AUS*, POL and TUR (possibly with allied CRIMEA) may each send 1 stack in non controlled former provinces of HUNGARIA.</p>
---	--

B.3 These stacks may battle, lay siege, and occupy provinces. Note that since the countries are officially at peace, they may not keep control markers and hence must place occupation. Note that once a province is occupied, this is no more a non controlled province, hence it is possible to go on and fight further.

B.4 Troops of CRIMEA may only act if this country is at least in EW of TUR. In that case, they do count as Turkish troops for this rule. CRIMEA gets its basic reinforcements each turn if it has less than its basic forces.

B.5 Each country that either (i) occupy a non-owned province ; (ii) owns an occupied province or (iii) has send a stack in non-controlled territory at least once this turn ; loses 1 Stability at the end of the turn if there is no other Stability lost (that is, the minimum loss is 1 Stability this turn). HIS loses Stability instead of AUS\* if still a minor. TUR loses Stability instead of CRIMEA as Crimean troops count as Turkish ones for this rule.

#### C TRANSILVANIA

C.1 This minor country is created after event I-E (Downfall of Hungary). When it does not exist, military leaders of TRANSILVANIA are leaders of HUNGARIA.

C.2 [BLP] It is a special VA of the owner of **Magyarország** with no diplomacy allowed. Its patron may not declare war upon it.

#### D BOHEMIA

D.1 BOHEMIA may disappear because of event event I-C (Habsburg Bohemia), and be recreated (and destroyed also) in event IV-1 (1) (Bohemian Revolt).

E BOHEMIA and HUNGARIA can be recreated as a Habsburg autonomous state (see section XIV.10.2 (Autonomous Habsburg States)).

F MAZOVIA This minor country with no military forces is a vassal of POL and may be annexed by POL under certain conditions (see section XIV.3.2.3 (The two Polish Capitals)). A declaration of war against MAZOVIA by anyone but POL is a declaration of war against POL.

#### XIV.13.4.4 PERSIA

##### A PERSIA in the ROTW

A.1 See section IV.4.4.8 (Ormus, part of Persia) for the rules about ORMUS and its interactions with PERSIA. In the absence of TP in ORMUS, the resources in PERSIA are not exploited.

A.2 Because of some events, PERSIA may annex **AFGHANISTAN**, and its units gain the right to go in the ROTW (as a country from the ROTW, spending 4 MP in rough terrain).

##### B Persian Uprising

B.1 If PERSIA does not own all the provinces of the *PERSIAN CORE* and a revolt happens in a country owning such a province (usually TUR, sometimes RUS) an uprising may occur.

B.2 If the modified die roll to determine the revolted province is 0 or less, the uprising occurs.

B.3 Otherwise, roll 1d10, add 1 for each province of the *PERSIAN CORE* currently owned by the country in which the revolt occurred. The uprising occurs on a result of 11 or more.

C Choose at random one province of the *PERSIAN CORE* owned by the country in which the revolt occurred and place a Revolt⊕ there. This is the initial province of the uprising.

C.1 Place a Revolt⊖ in all other provinces of the *PERSIAN CORE* not owned by PERSIA (even if these are not owned by the same country as the initial province).

C.2 These revolts are friendly to PERSIA.

D If existing, PERSIA declares a war against the owner of the initial province of the uprising, taking reinforcements in offensive status ;

D.1 at the beginning of the war, PERSIA takes control of all the fortresses in the provinces of the *PERSIAN CORE* currently owned by its opponent.

E If it does not exist, PERSIA is re-created immediately and declares war against the owner of the initial province of the uprising, taking reinforcements in defensive status ;

E.1 it owns all the provinces of the *PERSIAN CORE* that were owned by its opponent before the uprising.

#### XIV.13.4.5 GUJARATE

*After the naval victory in 1509 of Almeida before Diu, the city was finally taken only in 1534 (and conceded to Portugal in 1535) by the local sultan, which signed the end of Arab dominance in the area.*

**A Arab trade in India** GUJARATE has TP in various areas of the ROTW.

A.1 In the areas owned by itself, the natives do react to foreign presence.

A.2 A TP is protected by the intrinsic fort if there is no city in the province.

A.3 If there is a city in the province, it has to be taken. In the case of **Mumbaī**, **Goa** and **Kolīkoṭ**, this means an Overseas War must be declared upon BISINAGAR.

A.4 §E (The Goa colony.) of section XIV.4.1.1 (Viceroys of the India) may apply.

A.5 The TP in **AFRICA** have 1LD stacked with them.

### XIV.14 General Political Rules

#### XIV.14.1 Instability of the BALKANS

**A** The following provinces are affected by specific rules: **Alabania**, **Hellas**, **Moreas** (controlled by TUR in 1492), **Dalmacija**, **Corfou** (controlled by VEN in 1492) **Bosna**, **Serbia**, **Montenegro** (Raguša) (independent in 1492).

**B** The ownership of each province is given at the beginning of the phase of Peace to the Major Power that controls it.

**C** Those provinces are a zone of permanent war. Any Major Power can send troops herein and attack armies and cities, build *Præsidios*, etc. without declaration of war.

C.1 Sieges cannot be continued from one turn to the other (excepted if there is a regular war). Besieging forces has to retreat (but may pillage, and build *Præsidios*).

C.2 The minor HABSURGUM may also campaign in this zone, even if active elsewhere.

C.3 HUNGARIA, if currently inactive, can make a limited intervention with up to one ⒶⓈ in the zone. The intervention is decided and resolved by its diplomatic controller. Its forces has to retreat at the end of the turn and if it controls a province of the *BALKANS* at that moment, the province becomes independent.

**D** TUR may use Privateers in STZ **Mer Ionienne**, STZ **Mer Égée** and CTZ **VENETIA** against any Christian countries without declaring war. Conversely, Christian countries may fight against those Privateers.

**E** The provinces of the *BALKANS* are in the zone allowed to prosecute Overseas Wars.

#### F End of the Specific Status

F.1 This rule ends when the period II ends or if HUNGARIA falls apart according to event I-E (Downfall of Hungary) (but not if only event I-D (Habsburg Inheritance of Hungary) has happened).

F.2 At that time, the regular ownership of each province is given to the power that controls it. Independent provinces are given to HUNGARIA, or TRANSILVANIA if it is no more, or to AUS\* if only event I-D (Habsburg Inheritance of Hungary) happened.

#### XIV.14.2 Nordic wars [BLP]

**A** If two countries among POL, RUS and SUE are continuing a war from the previous turn, then the third has a free CB against each of them.

A.1 If the CB is used against one of them only, then the new belligerent is automatically allied with the former.

<div>[R]326</div> <div>General Political Rules</div> <div>A.2 This include change of alliances in 2v1 wars.</div> <div>Design note: Alliances around the Baltic were often fragile and opportunistic attack happened more than often.</div> <div>XIV.14.3 The Religious Struggles</div> <div>The religious aspect of most conflict is important, in particular in terms of victory objectives for the players. The following rules give explanations to that part of the game.</div> <div>XIV.14.3.1 Sole Defender of Catholic Faith</div> <div>A That title is also a period objective for some Catholic countries and is defined as follows.</div> <div>B If FRA, HIS, ANG or POL is the only Catholic major country (do not count POR or VEN), it is automatically the Sole Defender of the Catholic faith.</div> <div>B.1 Alternatively, if there is only one Catholic MAJ that is Counter-Reformation, it is automatically the Sole Defender of the Catholic Faith.</div> <div>C Else, if more than one country is Catholic, a Catholic MAJ becomes the Sole Defender of the Catholic Faith when the conditions below are fulfilled:</div> <div>C.1 Control of the SANCTA SEDES diplomatic marker for at least 3 turns in the last 5 turns just elapsed.</div> <div>C.2 Participated in all <i>Crusades</i> that happened in the last 5 turns, with at least one Simple Campaign per round and no separate peace with TUR.</div> <div>D Restoration of Catholicism after the Reform Each time a player (either HIS (if Counter-Reformation) or the Sole Defender of the Catholic Faith) declares war on a Protestant country and obtains an unconditional peace from this country, the player may decide to abandon all province(s) transfer and ask as sole peace condition the restoration of Catholicism (of the same attitude of the power imposing Catholicism) in this country.</div> <div>D.1 This clause is mandatory if the power is Counter-Reformation.</div> <div>D.2 Gain on Conversions For each Protestant country thus forcibly converted, the victorious Catholic player receives 10VP if the loser is a minor country and 20VP if it is a player (or the value indicated in the period objective, if any, which takes precedence). Also, if an event gives different values, apply them and ignore the above.</div> <div>E Effect of the Reconversion All reciprocal permanent CB between these players and/or minors are cancelled following the restoration of Catholicism. A major country (i.e. a player) who is reconverted more than two turns after its initial change of religion suffers from the following side effects, each turn during the next 10 turns, if it maintains the new (forcibly imposed) religion:</div> <div>E.1 The country loses 1 additional level of Stability each turn.</div> <div>E.2 Every even-numbered turn, the player must roll on the revolt table, in addition to any revolt mandated by events or the rules.</div> <div>F Revert to the Reformation</div> <div>F.1 If a major country reverts to its religion as it was before the reconversion, it loses 1 Stability level and grants a temporary CB to the country that imposed the change of religion on it. In such a case, side effects as per above are cancelled.</div> <div>F.2 On the other hand, a forcibly reconverted minor country returns to the Protestant faith at the start of the turn following its reconversion without any side effect.</div> <div>XIV.14.3.2 End of Religious Struggles</div> <div>A The Religious Struggles between Protestant and Catholic end in 1664 (Interphase of turn 35 and 36, beginning of period V), or when event IV-A (Thirty Years' War) is ended and the year is 1615 or after (turn 26, period IV). This time is name <i>End of Religious Enmities</i> in the rules and tables.</div>	<div>Specific Rules— master – 2016-04-14</div> <div>[R]327</div> <div>B The Religious Struggles between other religions (Catholics, Protestants, Orthodoxes, and Islam) end in 1614 (Interphase of turn 25 and 66, beginning of period IV), excepted between Shiites and Sunnites.</div> <div>C All the above rules no longer apply from this time onwards, as well as some other rules or modifiers.</div> <div>XIV.14.3.3 The Islamic Schism</div> <div>A As Defender of the Sunni Islam, TUR has a permanent CB against PERSIA, ÆGYPTUS and SYRIA which are Shiite Muslim countries.</div> <div>B TUR can make no diplomacy on PERSIA or ORMUS until 1615 (turn 26, period III).</div> <div>XIV.14.4 The Ottoman advance</div> <div>XIV.14.4.1 Crusades</div> <div>A During periods I-III, each turn TUR annexes a Christian province, a test for Crusade occurs at the end of the turn.</div> <div>A.1 See section XI.6 (Test for crusade) for the details.</div> <div>XIV.14.4.2 Turkish Capture of W̄ien</div> <div>A If the Turks capture W̄ien, the following effects are activated:</div> <div>A.1 AUS* loses 1 Stability immediately. TUR receives 25 VP for the capture of W̄ien, but only once in a game.</div> <div>A.2 Any Catholic power may do an immediate limited intervention in the war on the side of AUS* if not at war against them, on no Stability loss.</div> <div>A.3 If the Turks still hold the city at the end of the turn, VEN, FRA, ANG, HIS, AUS and POL (if Catholic) lose 1 Stability level each. Other countries are not affected. TUR receives 25 VP more for the capture and holding of W̄ien, but only once in a game and AUS* loses 25 VP because of the same event.</div> <div>B W̄ien and the Crusade The capture of W̄ien gives a bonus of +5 to the Crusade die-roll.</div> <div>C Turkish Control of W̄ien Each turn where W̄ien stays under Turkish control, AUS* loses 1 Stability level per turn in addition to all other losses of turn-end.</div> <div>C.1 [AUS/HIS] receives a bonus of +3 for all its diplomatic actions (and Entry in War tests) with minor countries that have a common frontier with AUS*. This effect remains even if W̄ien is ceded to Turkey during a peace, and this until W̄ien is Habsburg/Austrian again.</div> <div>D Transfer of the Austrian Capital If the province Österreich is ceded to Turkey, the capital of the HABSBURGUM minor country is transferred to any other city in a HABSBURGUM province, at the choice of the AUS* player.</div> <div>D.1 If so, AUS* ceases to lose 1 Stability level per turn.</div> <div>D.2 The new capital can be again conquered by the Turkish player, but in that case its capture brings no special VP bonus to the Turkish player. It also does not cost any special VP to AUS*/AUS.</div> <div>D.3 W̄ien become automatically and immediately the capital of the HABSBURGUM again if the province of Österreich is re-conquered by the AUS* player. The province is immediately annexed without need for Peace.</div> <div>XIV.14.4.3 Turkish Capture of Rōma</div> <div>A If the Turks capture Rōma, the following effects are activated:</div> <div>A.1 Any Catholic power may do an immediate limited intervention in the war against TUR if not at war allied to them, on no Stability loss.</div> <div>A.2 If the Turks still hold the city at the end of the turn, each Catholic power loses 1 Stability level.</div> <div>B Rōma and the Crusade The capture of Rōma creates an immediate call for Crusade in periods I and II and gives a bonus of +5 to the Crusade die-roll afterwards.</div> <div>C Turkish Control of Rōma Each turn where Rōma stays under Turkish control, the Sole Defender of Catholic Faith (XIV.14.3.1) loses 1 Stability level per turn in addition to all other losses of turn-end.</div>
---	---

**D Transfer of the pope** If the province **Lazio** is ceded to TUR, the pope is transferred to VEN\*, see §B (The Pope in Venice.) of section XIV.9.1 (Italia e San Marco).

D.1 If so, the Sole Defender of Catholic Faith (XIV.14.3.1) ceases to lose 1 Stability level per turn.

D.2 **Roma** become automatically and immediately the capital of SANCTA SEDES again if the province of **Lazio** is re-conquered by any Catholic power. The province is immediately annexed without need for Peace.

#### XIV.14.5 The Wars of Succession

##### XIV.14.5.1 Conditions

**A** Wars of Succession may occur whenever a country suffers from a dynastic crisis. The country suffering from the crisis (and, potentially, from the War) is called here the victim.

**B** If the victim is christian and at war against at least one other christian major country, then its enemies can decide to turn the on going war into a war of succession (thus supporting a dissident monarch).

B.1 In that case, one of the christian enemies of the victim is designed (by its alliance) as the pretending power.

B.2 In the case when several separate alliances are at war against the victim, each can decide to support a separate pretending power (several people are pretending to the throne, supported by different powers).

**C** Any country (any religion) that gave a dowry to the victim in a Dynastic Alliance signed less than 8 turns ago has, in reaction, a free CB against any alliance that turned the war into a war of succession. If it is used, this country is called the supporting power.

C.1 The supporting power is automatically allied to the victim country for the current wars of succession.

C.2 If the supporting power is part of an opposing alliance, it can still choose to support the new monarch of the victim by breaking its alliance (and paying the usual cost in Stability).

C.3 There can be at most one supporting country. If several meet the conditions, the victim country can ask one (and only one) to support its new monarch.

**D** If the victim received a dowry in a Dynastic Alliance signed less than 8 turns ago then any christian country that gave the dowry has a normal CB to declare a war of succession on the victim this turn and become a pretending power.

D.1 If one (or more) other countries also choose to declare a war of succession, this may lead to several different pretending powers.

##### XIV.14.5.2 Results

**A** In addition to any other peace conditions, dynastic ties with the victim are added has a possible compensation for the war of succession.

**B Dynastic ties** If a country obtains dynastic ties with the victim, the following apply immediately:

B.1 Both countries sign a defensive alliance. The victim must answer to this alliance whenever called for. The country that has the ties can refuse to answer the defensive alliance, but this voids the ties.

B.2 The victim may not declare war to the country obtaining dynastic ties, unless with a CB given by event, for the next 5 turns.

B.3 If the country having the ties declares war to the victim, this voids the ties.

**C Claiming dynastic ties** Dynastic ties may be granted either to pretending or supporting country.

C.1 The pretending country (only) can ask for dynastic ties as a peace condition. This cancel any status of supporting country of the victim that may exist.

C.2 If the victim country wins the war of succession (peace of level 1 minimum), then the supporting country (if still at war) automatically gains dynastic ties.

**D Multiple pretending countries** If there are several pretending countries, then when claiming Dynastic ties, the following conditions are added:

D.1 The country claiming the ties becomes the new supporting power and gains a free CB against all alliances currently at war of succession against the victim.

D.2 Refusing to use this CB voids the Dynastic ties.

#### XIV.14.6 Using mercenaries

*Condottieri In the thirteenth and fourteenth centuries Italian city-states were becoming enriched by their trade with the Orient. These cities, such as Venice, Florence, and Genoa, had woefully small armies and were increasingly becoming targets of attack by foreign powers as well as envious neighbours. The noblemen ruling the cities soon resorted to hiring companies of mercenaries known as condotta ("contract") to defend their territories. Each condotta was led by a condottiere, a term which soon became synonymous with "captain". The condottieri were the key forces in the Italian wars. Later, they were overwhelmed with other forces such as the Swiss pikemen, German Landsknechts, English musketeers, French cavalry or Spanish tercios, but the use of mercenary forces remained in strong use.*

*This term is used there for all the mercenary leaders that can be recruited by larger powers during the games.*

**A** It is possible to buy mercenary generals, . This has to be done in the logistics segment.

A.1 All the countries willing to buy mercenaries announce their intention of doing so.

A.2 A die roll is made on table XIV.2 (Condottieri) to see how many mercenary generals are available for sale.

A.3 The mercenaries are drawn randomly and kept hidden in the pool of mercenary generals. Each one is sold before the next one is drawn.

A.4 Each interested country makes a hidden bid for the mercenary. All the bids are revealed simultaneously.

A.5 The highest bidder gains the mercenary general for his service and pays the corresponding price. In case of equality, a second round of bids is made among the highest bidders. In case of a second equality, the mercenary is no more available.

A.6 The mercenaries are revealed only after all mercenaries have been sold.

**B** It is also possible to recruit a mercenary explorer or conquistador. For each of both, all the interested countries have to follow the same procedure as for the generals.

B.1 However, the number of explorer or conquistador is at most 1 (see table XIV.2 (Condottieri)).

1d10	Generals	Explorer	Conquistador	Blind bid for each in turn, at least 10 ₮.
1-4	0	0	0	
5-6	1	0	0	
7-8	2	1	1	
9-10	3	1	1	

Table XIV.2: Condottieri

**C** [BLP] Named mercenaries (*J Cabot* and *S Cabot*) are added to the pool of mercenaries during their lifetime. Thus, if no mercenary is available this turn, they are absent.

#### XIV.14.7 Use of Missions and Missionaries

##### XIV.14.7.1 Availability

**A** HIS, POR, FRA and ANG receive *Mis* and *Missions* that help them in colonial activities. See the specific rules of each power for the number of *Mis* and *Missions* available.

A.1 Most *Mis* have turns of life like regular leaders. They appear and disappear following the normal rules.

A.2 HIS has four unnamed *Mis* with no turns of availability. See the specific Spanish rules for details.

**XIV.14.7.2 Missionaries**

**A Missionaries as leaders.** Each Mis is a leader with values and a bonus (from +1 to +3). Mis have no stacking limits but their bonuses are not cumulative.

A.1 A Mis has no Hierarchic rank and may never lead a stack.

A.2 However, a stack with a Mis may choose to use its Manoeuvre for either movement or exploration in the ROTW, even if there is another leader commanding the stack.

A.3 If a stack with Mis fight, each Mis in the stack must test for death at the end of the battle (with the usual modifiers, as if the Mis was actually commanding).

**B Colonisation.** A Mis gives a modifier equal to his bonus (+1 to +3) to any TP/COL placement attempt in the province he is if the settlement is not ⊕ (either no settlement or a ⊖ one).

B.1 This bonus is not cumulative with the effects of Conquistadors, Governors or Missions.

**C Conquistadors.** A stack with a Mis has a bonus of -1 when rolling on the Conquistador table against Natives.

**XIV.14.7.3 Missions**

**A** A Mis can set a Mission at the phase of Redeployment. The Mis is remove from game (even if it's one of the unnamed HIS Mis) and a Mission is put in the province.

A.1 There can only be one Mission in each province. A Mission can not be set in a province where there are enemy COL, TP, forts or Missions. If a Mission is set in a province where there is a friendly fort, this fort is removed.

**B** A Mission is a fort with inherent colonial militia, and cannot move. As it is a fort, a Mission cost 1 ⚔ to be maintained each turn.

B.1 In COL, a Mission gives a LDE added to the colonial militia.

B.2 If there is no other kind of fortification in the settlement, the fort of the Mission has to be conquered in order to control the settlement.

B.3 As a fort, a mission is a port for NID and a supply source for LID.

**C** A Mission gives a bonus of +1 to every TP/COL placement attempt in its Area.

C.1 This bonus is not cumulative with the effects of Conquistadors, Governors or Missionaries.

**D** A Mission gives a bonus of +1 when testing for a possible reaction of Natives of Minor countries in the Area.

**E** A TP with a Mission may be transform in a COL (even if there is no city), according to section VI.7.2.2 (Transforming a trading-post in a colony).

**F** A Mission that is not deployed on a COL may be destroyed voluntarily by its owner at the Phase of Redeployment.

F.1 A Mission may also be destroyed when conquered by a country of a different religion. Contrary to regular forts, destruction of a Mission is not automatic upon conquest.

F.2 If a colonial settlement is destroyed by natives or minor countries, a Mission therein is destroyed.

F.3 If a colonial settlement is annexed by another power of the same religion, any Mission may be replaced by one of its own. If by a power with a different religion, the Mission is destroyed.

F.4 Exception: **Ka'aba** stays in place at all time and may even co-exist with an establishment of another country.

**G** If a mission is destroyed, it is returned to the force pool of its country and may be used again.

G.1 Exception: **Kongo** is removed from game if destroyed.

**XIV.14.8 Commercial specificities****XIV.14.8.1 Levies of the Sund**

**Design note:** The fight for the commercial levies collected on trade fleets crossing the Sund, the København strait, nourished the conflict between Denmark, Sweden and the commercial nations such as England and Holland that dominated the trade of the area.

**A** One country has the Rights to make Levies on the trade passing through the Sund; the effect is explained here.

A.1 At the phase of Diplomacy, the country has to announce whether it will take those Levies or will let trade free.

A.2 If a MAJ was taking the levies and chose to let them, it immediately lose one Stability.

A.3 The country can only take the Levies if, added to the Rights, it military controls one province among **Skåne**, **Västergötland** or **Sjælland**.

A.4 A minor country that has the Rights on the Levies on the Sund, will take them if it is fully at war. It may take them at controller's choice in others cases.

**B Effects of the Levies**

B.1 A MAJ earns 5 ⚔ plus 1 ⚔ for each level of Commercial Fleet in STZ **Baltique**.

B.2 Only the MAJ raising taxes, or the diplomatic patron of a MIN raising the taxes, may receive the income and VP for a monopoly in STZ **Baltique**. If the Monopole belongs to another MAJ, this MAJ has a Commercial or normal CB (his choice) against the country levying the taxes this turn.

B.3 If DANIA levies the taxes, it adds one LID to its reinforcements this turn, and has a second A counter at its disposal.

B.4 If another MIN levies the taxes, it gains nothing.

**C Taking the Rights on the Sund**

C.1 The Rights to do levies on the Sund are obtained as one condition of Peace (in place of a province), or as equivalent to one province in Dynastic Ties.

C.2 In Peace, the Rights count as 2 Peace Conditions excepted if the winner of the Peace will own at least one province among **Skåne**, **Västergötland** or **Sjælland** at the conclusion of the war, or has monopoly in STZ **Baltique** – in that case it counts as 1 Peace Condition.

**D The Sund and DANIA**

D.1 In 1492, DANIA has the Rights on the Levies on the Sund.

D.2 Whenever DANIA signs a victorious peace, it takes back the Rights on the Sund, even though if this condition is not part of the Peace Treaty. In this case, the previous owner of those Rights has a free CB against DANIA on the following turn if it was not on the losing side of the Peace.

D.3 The country having the Rights on the Sund can give them back to DANIA as a diplomatic announcement. The country gains a +2 on diplomatic actions on DANIA this turn.

D.4 DANIA is the only minor country that consider taking the Rights on the Sund as a valid condition of peace.

**XIV.14.8.2 Commerce and Wars in the Baltic Sea**

**A** Raise the *Blocked trade* (section V.4.2 (Foreign trade)) by 75 ⚔ when SUE (or SUECIA) and DANIA are at war against each other.

**B** This effect is not applied to any country that is involved in this war (because this is then already accounted for).

**XIV.14.8.3 Control of the Scheldt (L'Escaut)**

**A** If a MAJ owns and controls militarily **Vlaanderen** and **Brabant**, the CTZ **HOLLANDIA** is considered as a CTZ for him.

A.1 He also gains each turn one fleet or concurrence action in either STZ **Mer du Nord**, CTZ **HOLLANDIA**, CTZ **FRANCIA** or CTZ **ANGLIA** (at the player's choice).

A.2 The CTZ and STZ concerned by this rule are marked on the map by a mark that is also in the **Vlaanderen** and **Brabant** provinces.

**Design note:** Historically, HIS and HOL reached an agreement during the Utrecht Treaty so that HIS would not use this possibility, but would be helped by HOL to defend those provinces.

<div data-bbox="114 90 1117 124"> <div>[R]332</div> <div>General Political Rules</div> </div> <div data-bbox="114 167 1117 201"> <div>XIV.14.8.4 Ragusa</div> <div></div> </div> <div data-bbox="114 209 1117 293"> <p>A Until the end of period III, the owner of <b>Montenegro</b> (or controller before the End of section XIV.14.1 (Instability of the Balkans)), has one of the following advantages due to the commercial fleet of <b>Raġuṣa</b> (player's choice at the Administrative Phase):</p> </div> <div data-bbox="114 296 1117 352"> <p>A.1 He receives a free IP⊖ to be used as its own (using the Ragusa counter), only in <b>Adriatique</b> (to attack trade in CTZ <b>VENETIA</b> or STZ <b>Mer Ionienne</b>);</p> </div> <div data-bbox="114 355 1117 411"> <p>A.2 He receives an additional <i>Commercial Fleet Implantation</i> action (<i>Basic investment</i> only) in any STZ or CTZ of the Mediterranean Sea.</p> </div> <div data-bbox="114 419 1117 453"> <div>XIV.14.8.5 Occupation of the Caribbean</div> <div></div> </div> <div data-bbox="114 461 1117 486"> <p>A [BLP] Any power may place occupation markers in <b>CARIBBEAN</b>.</p> </div> <div data-bbox="114 494 1117 528"> <div>XIV.14.8.6 The Manila Galleon</div> <div></div> </div> <div data-bbox="114 536 1117 563"> <p>A In order to benefit from the <i>Manila Galleon</i>, a MAJ must fulfil all five following conditions:</p> </div> <div data-bbox="114 566 1117 593"> <p>A.1 Event subevent III-22 (1).α (Closure of China) has been played.</p> </div> <div data-bbox="114 596 1117 624"> <p>A.2 The MAJ has a COL in <b>PHILIPPINES</b>.</p> </div> <div data-bbox="114 627 1117 652"> <p>A.3 The MAJ has a COL exploiting gold in <b>AMERICA</b>.</p> </div> <div data-bbox="114 655 1117 711"> <p>A.4 The MAJ knows a path between these two COL through <b>Grand océan pacifique</b> and no enemy-controlled provinces.</p> </div> <div data-bbox="114 715 1117 742"> <p>A.5 The STZ <b>Mer de Chine</b> must contain a TF (any level) of either the MAJ or <b>CHINA</b>.</p> </div> <div data-bbox="114 745 1117 801"> <p>B Only one power can have the Galleon. ### XV.2 Description of Economical Events

#### E-1 CRISIS OF MADNESS Orig

Reduce all values of the monarch's characteristics by half for this turn (rounded down). Modify next-turn survival die-roll by +1.

#### E-2 EXCELLENT MINISTERS (×3) PBmod

##### A Event Phase

**A.1** A Minister is appointed per §K (Excellent Ministers) of section III.2.1 (New monarchs). His characteristics as ruler are rolled for the three values by 1d10 modified: a die-roll of 1 becomes 7, of 2 becomes 8, 10 becomes 9. Another die roll sets the length of the Ministry:

1d10	1	2	3	4	5	6	7	8	9	10
Duration	3	3	3	4	4	5	5	6	6	6
Value	7	8	3	4	5	6	7	8	9	9

Table XV.2: Excellent Ministers

**A.2** The office of the Minister include the current turn, and ends just before the “economical events” segment of the events phase following the last full turn of office.

**A.3** A value of the Minister is used only if it is strictly superior to the monarch's own characteristic.

**A.4** If the Monarch dies when the Minister is still in office, a malus of −2 is applied to the characteristics determination die-rolls for the monarch's successor, but only for a characteristic that was increased due to the Minister by at least 2 above the Monarch value.

#### E-3 SERIOUS SICKNESS Orig

Reduce all characteristics of the monarch by 3 for this turn only, 1 being the minimum value. In addition, roll a die. If the result is 10, the monarch deceases immediately. Else, modify next-turn survival die-roll by +1.

If the current monarch did benefit from §K (Excellent Ministers) of section III.2.1 (New monarchs), the characteristics are only reduced by 1.

The monarch cannot lead armies or fleets during the turn except if he must do so due to a political event.

#### E-4 AGRICULTURAL CRISIS (×4) Orig

The country has seen real trouble in crops and farming. The loss is of 50% (lowered by 10% per unit of Cereals MNU already owned by the country) of its income of provinces this turn (line **B1** of ERS). The loss is registered in line **B4** of ERS.

Other countries that possess Cereals MNU gain immediately 10  $\text{MNU}$  per unit in their RT, to be added from line **A1** of ERS to line **A2** of ERS.

#### E-5 NAVAL LOSSES (×2) Orig

Fires, storms and disasters spread at sea. Roll 2d10, and add +2 if the MAJ has at least 3  $\text{IF}$  counters deployed at that time, or subtract −2 if it has only one (or none). The number of  $\text{NID}$  lost is given by the result:

≤4	5–10	11–15	16–19	≥20
0	1	2	3	4

The  $\text{NID}$  can come from anywhere.  $\text{NGID}$  count for half a loss only;  $\text{NTID}$  can be lost only if there are no warships or galleys left.

[E]338

Description of Economical Events

E-6

LOOTING AND INSECURITY (×3)

JCMod

The country loses 10% (rounded up) of its income of provinces this turn (line **B1** of *ERS*). The loss is registered in line **B4** of *ERS*.

Place a *Pirate* in the player's CTZ (if any); in STZ **Baltique** if the player has a port on this STZ (and no CTZ); in STZ **Adriatique** if the player has a port on this STZ (and no CTZ). There may be no *Pirate* if there are no such ports.

E-7

FISCAL EVASION (×5)

Orig

A Event Phase

Reduce the Royal treasury by 20% of its absolute value (min. is 20 ₮) this turn (from line **A1** of *ERS* to line **A2** of *ERS*). Furthermore, if TUR receives this event, he has to check for Pashas' corruption.

α

CORRUPTION OF PASHAS

α-B Event Phase

**α-B.1** One Pashas (§C of XIV.8.1.2) becomes corrupted (turn the counters on their corrupted side). This Pasha is chosen by the Sole Defender of Catholic Faith (XIV.14.3.1) (or [AUS/HIS] is there is none). This pasha must be in owned Turkish provinces; if none are available, displace the newly corrupted pashas in any province (except the capital).

E-8

CORRUPTION (×3)

Orig

A Administrative Phase

All costs of purchase double this turn (reinforcements and campaigns). Costs of maintenance increase by 10% (rounded up). In addition, TUR suffers the effects described in event part E-7.α (Corruption of Pashas).

E-9

TECHNOLOGICAL ADVANCE (×4)

Orig

The player can move one of his two technology marker (naval or land) a number of boxes forward on the technology track determined by the roll of a die (choice of the technology must be made before rolling the die):

≤1-5	6-8	9-10
1 box	2 boxes	3 boxes

E-10

DISCOVERY OF MINES (×2)

JCMod

A Event Phase

**A.1** Place a *Gold Mine* counter in one national province of the player (still controlled) in mountain terrain (or non-clear terrain if none available, or clear terrain as a last resort), where there is not already such a counter, and provided the country (not the player) did not benefit from this event two times.

**A.1.a** If the country had already benefited from this event two times, test for event part E-26.α (Depletion of mines in America) instead.

If no controlled terrain is available, re-roll.

E-11

WAVE OF OBSCURANTISM (×2)

Orig

Reduce the Stability by **1** level if player is Protestant, and **2** levels in all other cases.

E-12

PIRATES (×2)

JymMod

TODO: TBD

Replace the two Pirates events by minor country colonisation.

A Event Phase

**A.1** This event is only resolved during the economic situation segment of the event phase.

Economical events— master – 2016-04-14

[E]339

E-13

DEVELOPMENT OF WARSHIPS (×2)

Orig

The player advances his naval technology by 1 box.

E-14

MILITARY LEADER (×3)

Orig

Roll one die. If the result is even, draw a general, else draw an admiral. The leader will be drawn from the anonymous pool of the player, and will not be included in the minimum leaders limit for the period that the leader is entitled to. The leader is available for 1 turn if the result is between 1 and 5, 2 turns (current and following) if it is between 6 and 10.

E-15

DROUGHT (×2)

Orig

The country loses 30% (rounded up) of its income of provinces this turn (line **B1** of *ERS*). The loss is registered in line **B4** of *ERS*.

E-16

EXCEPTIONAL YEAR (×5)

Orig

The country gains 10% (rounded up) of its income this turn (line **B23** (Income) of *ERS*). The gain is registered in line **B24** of *ERS*.

E-17

SALES OF HONORARY TITLES (×3)

Orig

The Major Power may opt to sell honorary titles. If it chooses so, roll 1d100. The result gives the product of these sales in ₮, added immediately to line **A1** of *ERS* in line **A2** of *ERS*. Then the minimum number of generals of the power is lowered by one this turn (only). If may opt to have none of these effects (before rolling the dies).

E-18

EPIDEMICS (×3)

Orig

The country loses 20% (rounded up) of its income this turn (line of *ERS*). The loss is registered in line **B24** of *ERS*.

E-19

RUSH OF COLONISTS (×3)

JymMod

If the country has no COL placement or TP placement, it may elect to ignore this event and re-roll another one (to be decided immediately).

This event gives a bonus of **+3** to the die-roll of COL placement, as well as a supplementary and free COL placement with small investment (30 ₮), usable this turn or any other turn of the current period (lost if not used before the end of the current period). Moreover, the country may ignore restrictions of section VI.7.4.2 (Pioneering [TBD]) for this turn. If this is not period I also apply event part §a (Minor country colonisation).

α

MINOR COUNTRY COLONISATION

If this is not period I, roll on the following table; subtract **3** in periods II and III and add **3** in periods VI and VII.

-2	Destruction of a Minor establishment.
-1	Creation of a Minor establishment in <b>BRAZIL</b> .
0	Creation of a Minor establishment in <b>ECUADOR/YUCATÁN/PANAMÁ</b> .
1-2	Creation of a Minor establishment in <b>CARIBBEAN</b> .
3-4	Loss one side of a Minor establishment.
5	Creation of a Pirate Haven in <b>CARIBBEAN</b> .
6-7	Creation of a Minor establishment in a coastal province in the American zoom.
8	Increase one Minor establishment.
9	Creation of a Minor establishment in a coastal province in <b>INDIA</b> .
10	Creation of a Pirate Haven in <b>MADAGASCAR</b> .
11	Creation of a Minor establishment in a coastal province in <b>INDIA</b> .
12-13	Creation of a Minor establishment in <b>CARIBBEAN</b> .

[E]340

Description of Economical Events

**α-1 Creation of a Minor establishment.** Select one empty province at random within the specified ones and put a Minor establishment ⊖ in it.

α-1.a If there are no empty provinces in the specified ones or there are no unused Minor establishment, turn this into a *Increase of one Minor establishment* instead.

**α-2 Creation of a Pirate haven.** If one already exists in the specified provinces, it is turned on level 2 (nothing happens if it is already level 2).

α-2.a If there is no Pirate haven in the specified provinces, select an empty one at random and put a Pirate haven of level 1 in it.

α-2.b For **MADAGASCAR**, do not select the province at random. Use **N. Madagascar** if empty and **S. Madagascar** otherwise.

**α-3 Destruction of a Minor establishment.** Select a Minor establishment at random and remove it from the map.

**α-4 Loss of one side.** Select a Minor establishment at random.

α-4.a If it is ⊖, remove it from the map.

α-4.b If it is ⊕, turn it ⊖ and select one of its exploited resources at random which is no longer exploited.

**α-5 Increase of one Minor establishment.** Select one Minor establishment ⊖ at random and turn it ⊕.

**α-6 Creation/Increase of establishments.** Whenever a new side of Minor establishment is created:

α-6.a If there is at least one unexploited resource in the *Area*, it exploits one at random.

α-6.b Otherwise, it exploits one of the existing resource at random, stealing it from whoever exploits it.

E-20

REFUGEES (×2)

JCMod

If the country has no COL placement or TP placement, it may elect to ignore this event and re-roll another one (to be decided immediately).

The player receives a free of charge strong investment that can be used for a TFI (but cannot be cumulative with another investment on the same STZ/CTZ).

This also gives in addition the same effect as event E-19 (Rush of colonists), but with a bonus of +2 only.

E-21

GIFT TO THE STATE

Orig

The people make a gift of 1d100 ₮ added immediately to line **A1** of *ERS* in line **A2** of *ERS*.

E-22

SCANDAL AT THE COURT (×2)

JCMod

The player's monarch's Diplomatic value is reduced by 3 for this turn (to a minimum of 1). The player also immediately loses 50 ₮, taken from line **A1** of *ERS* into line **A2** of *ERS*.

E-23

PLOTS AT THE COURT (×2)

Orig

The player's monarch's Diplomatic value is reduced to 1 for this turn. In addition, he will add a modifier of +2 to next turn's survival die-roll for his monarch.

E-24

POOR WEATHER (×3)

JymMod

A Military Phase

**A.1** This turn, add +2 to each season continuation die roll. All Winter round will be in bad weather.

Economical events— master – 2016-04-14

[E]341

**A.2 Frozen Sea** Moreover, if a Winter round happen after a die roll of 1 (before modifications), **Øresund** is frozen. No fleet can go through, in or out of it (fleets in it at the beginning of the round stay there but suffer no damage). Armies can cross it (it's an unfriendly rough terrain with no effect on combat) but not stop in it. No battle or interception of any kind may happen here. If retreat into **Øresund** is forced after a land battle, the stack retreats one province further into solid ground but has a malus of +2 to it retreat die roll.

E-25

DEATH OF THE HEIR TO THE THRONE

Orig

The player will receive a -1 malus to his die-roll for each one of the future characteristics of his next monarch. This event may be drawn several times but the malus will apply only once on the next monarch. This event has no effect if the next monarch is a named monarch, including one whose characteristics are not fixed but must be rolled.

E-26

DEPLETION OF A MINE

Orig

Place a marker *Exhausted Mine* on a mine currently exploited by the player (either in Europe or in the ROTW), drawn at random, and check for event part §α (Depletion of mines in America). If no mine qualifies, just do the check.

α

DEPLETION OF MINES IN AMERICA

α-A Event Phase

**α-A.1** Each time this is called for, all exploited mines in **AMERICA** will be tested for depletion. This test is made at most once each turn.

α-A.1.a The mines are tested in the following order: the Potosi mine (value 50), the Tenochtitlan mine (value 40), then the mines of the player exploiting the largest number of mines in **AMERICA** (in an order chosen by the player itself), then the next player, and so on.

α-A.1.b A mine is depleted if a die-roll gives 1, or 1 or 2 in period V or later.

**α-A.2** Only one mine per turn may be depleted this way. As soon as one as been depleted this way, there is no further need to check the others.

E-27

NEW ALLY

Orig

The player receives a modifier of +3 in diplomacy on a minor of his choice, valid for this turn. The choice of the minor has to be made immediately and secretly. It will be revealed during the next Diplomacy phase.

E-28

DEFECTION OF AN ALLY (×2)

PBMod

One country in VA position that is not a special vassal (i.e. on which diplomacy is possible) of the power, if any (chosen at random), is lowered by 3 boxes on the Diplomatic track. If none qualifies, another country determined at random among all the countries on Diplomatic track of the power is lowered by 2 boxes.

E-29

DESERTIONS

Orig

Desertions occur in the army. Roll 2d10, and add +2 if the MAJ has at least 4 ♠ counters deployed at that time, or subtract -2 if it has only one. The number of LID lost is given by the result:

≤4	5–10	11–15	16–19	≥20
0	1	2	3	4

E-30

DEATH OF A MILITARY LEADER

Orig

Draw one leader at random in all military leaders of the player on the map. The leader is removed from the game if it is a named one, returned to the pool if it is an ② one. The period limit is diminished by one for the turn.

<div>[E]342</div> <div>Description of Economical Events</div> <div>E-31 DYNASTIC INHERITANCE Orig</div> <div>The player receives a <b>+5</b> bonus in his next diplomacy phase for a minor country that may become a vassal. This minor must currently be located in the RM box or above on the player's diplomatic track. This minor has to be nearest to the national territory of the player in term of number of provinces (in case of tie, leave it to the player's choice).</div> <div>E-32 INFLATION JymMod</div> <div>Increase the level of inflation by 1, that is move the marker one box to the right (without exceeding the maximum level). At most one event among this event and Deflation (E-45) can take place in a single turn (treat as no event if a second one is rolled).</div> <div>E-33 OFFER OF ALLIANCE Orig</div> <div>The player receives a <b>+3</b> bonus in diplomacy to his die-roll for a minor of his choice (to be decided immediately).</div> <div>E-34 INDEPENDENCE OF A VASSAL Orig</div> <div>A minor vassal that is not a special vassal (i.e. on which diplomacy is possible) breaks its vassalisation and remains only an ally. The player has a temporary CB against this minor. Move the marker of the minor from the VA box to the RM box.</div> <div>E-35 ENTHUSIASM FOR THE ARMY (×2) Orig</div> <div>The player may either receive 2 LID free of charge, or increase his land technology by 1 box.</div> <div>E-36 RENEWAL OF POPULARITY (×2) Orig</div> <div>The player receives 20 ₪ in his royal treasury (added immediately to line <b>A1</b> of <i>ERS</i> in line <b>A2</b> of <i>ERS</i>). All the following administrative operations: TFI, TP placement, COL placement, MNU placement attempts, DTI/FTI improvement also receive an exceptional bonus of <b>+2</b> to the die-roll for this turn. On the other hand, a malus of <b>−10</b> to the die-roll is applied on the <i>Exceptional taxes raising</i> operation.</div> <div>E-37 ENTHUSIASM FOR THE NAVY (×2) Orig</div> <div>The player may either receive 2 NWID (or 4 NGID) free of charge, or increase his naval technology by 1 box.</div> <div>E-38 AGRICULTURAL TECHNIQUE DEVELOPMENT (×5) Orig</div> <div>Increase the country's income by 2 ₪ per controlled and owned province (i.e. not including occupied, looted, controlled but still belonging to the enemy, belonging to a vassal provinces) for this turn only. The gain is registered in line <b>B4</b> of <i>ERS</i>. In addition, for this turn only, the country receives a bonus of <b>+3</b> to the die-roll for the <i>improvement of DTI</i>, as well as all attempts to create a Cereals or Wine manufacture.</div> <div>E-39 REORGANISATION OF THE ARMY OR THE FLEET Orig</div> <div>Gives a bonus of <b>+2</b> to the die-roll of either land or naval technology improvement (the choice must be written down immediately). Also gives a 50% bonus discount to the unit reorganisation due to a new technology being discovered.</div> <div>E-40 CONQUISTADOR Orig</div> <div>If the country has no ⑦ ☹, it may elect to ignore this event and re-roll another one (to be decided immediately). The player receives a conquistador among the ⑦ ☹ markers still available. It remains in play for this turn only.</div>	<div>Economical events— master – 2016-04-14</div> <div>[E]343</div> <div>E-41 EXPLORER Orig</div> <div>If the country has no ⑦ ⚡, it may elect to ignore this event and re-roll another one (to be decided immediately). The player receives an explorer among the ⑦ ⚡ markers still available. It remains in play for this turn only.</div> <div>E-42 GOVERNOR JCMoD</div> <div>If the country has no ⑦ ⚡, it may elect to ignore this event and re-roll another one (to be decided immediately). The player receives a governor among the ⑦ ✕ markers still available, to be placed in a TP or a COL of the player. It remains in play for this turn only.</div> <div>E-43 DIPLOMATIC PREEMINENCE (×2) Orig</div> <div>Gives the player a bonus of <b>+1</b> to the die-roll to all his diplomatics actions on minors (either European or ROTW), and a bonus of <b>+1</b> column in his favour for all of his attempts of TP and COL placement for this turn only.</div> <div>E-44 CULTURAL EXPANSION (×2) Orig</div> <div>This gives a bonus of 20 ₪ to any subsidies obtained by a minor vassal reaching the SUB diplomatic level. Any subsidies will yield at least 20 ₪, whatever the modifiers. In addition, it has the same effect as event E-43 (Diplomatic preeminence) above.</div> <div>E-45 DEFLATION (×4) Orig</div> <div>Reduce the level of inflation by 1, that is move the marker one box to the left (without exceeding the minimum level). At most one event among Inflation (E-32) and this event can take place in a single turn (treat as no event if a second one is rolled).</div> <div>E-46 ECONOMIC CRISIS JCMoD</div> <div>Demand for exotic resources decreases in Europe and prices fall. Adjust prices as follows (without exceeding any normal limits, and only for already available resources):</div> <div> <ul style="list-style-type: none"> <li>• Fish, Salt: no modification</li> <li>• Sugar, Cotton, Furs: <b>−1</b> box</li> <li>• Slaves, Spices, Products of America: <b>−2</b> boxes</li> <li>• Products of Orient, Silk: <b>−3</b> boxes</li> </ul> </div> <div>At most one event among this event and Economic boom (E-47) will take effect this turn. Re-roll if one was already used.</div> <div>E-47 ECONOMIC BOOM JCMoD</div> <div>Demand for exotic resources increases in Europe and prices rise. Adjust prices as follows (without exceeding any normal limits, and only for already available resources):</div> <div> <ul style="list-style-type: none"> <li>• Fish, Salt: no modification</li> <li>• Sugar, Cotton, Furs: <b>+1</b> box</li> <li>• Slaves, Spices, Products of America: <b>+2</b> boxes</li> <li>• Products of Orient, Silk: <b>+3</b> boxes</li> </ul> </div> <div>At most one event among Economic crisis (E-46) and this event will take effect this turn. Re-roll if one was already used.</div>
---	---

**E-48 RECTIFICATION** PMod

The monarch yields to pressures yielding to straighten the domestic and foreign situation. The player can choose one option exactly among the three following bonuses:

- Pay without overcosts all his land forces up to the triple of the normal limit.
- Increase his construction limit for ships by 50% (rounded up).
- Obtain a bonus of **+5** to his die-roll concerning the action of *improvement of Stability*.
- Refund for free National Loans up to 200 ₮.

Choice must be written down immediately to be valid.

**E-49 TREACHERY** PMod

The player benefits from a treachery against one of his opponents with whom he is *already* at war (either a player or a minor country). The player can choose one option immediately among the three following bonuses:

- Capture immediately an enemy fortress that he currently besieges, or obtain a one time bonus of **+4** to a *siege works* action die-roll in the current turn (if he establishes a siege this turn).
- Move himself one land stack of his opponent one time during his opponent's movement phase this turn, instead of his opponent. The player will pick the exact round. However, he cannot make this stack attack any units except a stack commanded by him, nor can he exceed 5 MP on land, or make a naval move with a modifier higher than +8 for attrition on sea.
- Obtain a bonus of **+5** to one his diplomatic operations against a minor country whose marker is on his opponents diplomatic track, this turn only (the choice is announced along the diplomatic actions).

# Diplomacy and Revolts events

## Chapter XVI

**XVI.1 Diplomatic event tables**

Roll	Result
1,4,7	Also test for Uprising of a conquered minor province (§D of III.8)
1–3	Catholics † (Christians †† before the Reform)
4–6	Protestants †† (Christians †† before the Reform)
7–9	Muslims ☞
10	Other ☹ and a minor will possibly declare a war.

Table XVI.1: Troubled Religion table

- Northern Italy:** 1-GENUA (17) 2-MONTE FERRATO (12) 3-MUTINA (8) 4-LUCA (9) 5-LOMBARDIA (10).  
**Balkans:** 6-HUNGARIA (17) 7-MOLDAVIA (10) 8-WALACHIA (16) 9-MAZOVIA (16)
- Southern Italy:** 1-SANCTA SEDES (8) 2-ORDO HOSPITALIS (18) 3-TOSCANA (14) 4-PARMA (9) 5-VENETIA (16) 6-CORSICA (6).  
**Middle East:** 7-ARABIA (17) 8-MESOPOTAMIA (6) 9-GEORGIANI (14) 10-ÆGYPTUS (8) 11-SYRIA (8).
- Spanish road:** 1-HELVETIA (9) 2-WIRTEMBERGA (14) 3-SABAUDIA (9) 4-TREVORUM (14) 5-COLONIA (12) 6-LOTHARINGIA (16) 7-MOSENTIUM (10) 8-LEODIUM (16).
- Northern HRE:** 1-HOLLANDIA (12) 2-HANOVERE (15) 3-HASSIA (14) 4-PALATINATUS (9) 5-CLIVIA (14) 6-WESTFALLIA (12).  
**America:** 7-IROQUOIS (11) 8-INCA (16) 9-AZTECA (16).
- Southern HRE:** 1-BAVARIA (16) 2-WIRTEMBERGA (14) 3-ALSATIA (16) 4-FRIBURGENSIS (14) 5-TURINGIA (14) 6-HABSBURGUM (18).
- Eastern HRE:** 1-BOHEMIA (15) 2-BRANDENBURGUM (16) 3-SAXONIA (11) 4-BRUNSVICUM (14) 5-POLONIA (12) 6-LITUANIA (10) 7-POMMERANIA (10).  
**Asia:** 8-CHINA (10) 9-IAPONIA (11).
- Baltic shores:** 1-FRATRES MILITIAE CHRISTI (14) 2-HANSA (14) 3-DANIA (10) 4-SUECIA (15) 5-NORVEGIA (10) 6-FINLANDIA (10) 7-LIVONIA (10) 8-EASTERN PRUSSIA (10) 9-CURLANDIA (6) 10-POLONIA (12).  
**Atlantic shores:** 11-PORTUGALLIA (16) 12-HOLLANDIA (12) 13-SCOTIA (16) 14-HIBERNIA (10) 15-BELGICA (10).
- Khanates:** 1-REZANE (14) 2-PSKOVE (14) 3-TARTARIA (10) 4-DON CASSACKIA (14) 5-CAZAN (12) 6-ASTRACAN (14) 7-CRIMEA (10) 8-UKRAINA (14).  
**India:** 9-GUZARATE (11) 10-BISINAGAR (14) 11-MYSURIA (9) 12-HYDERABADA (11).
- North Africa:** 1-MAURETANIA (15) or (10) 2-ALGERIA (15) 3-TUNESIA (8) 4-TRIPOLIS (8) 5-CYRENAICA (16).  
**Semi-major countries:** 6-SUECIA (15) 7-BRANDENBURGUM (16) 8-DANIA (10) 9-PERSIA+ORMUS (5) 10-PORTUGALLIA (16) 11-POLONIA (12).
- Eastern Muslims:** 1-PERSIA+ORMUS (5) 2-ADEN (14) 3-AYMAN (14) 4-SUDANIA (11) 5-MOGOLIS IMP. (11) 6-DURRANIS IMP. (14) 7-MAURETANIA (15) or (10) 8-ALGERIA (15) 9-TUNESIA (8).

Table XVI.2: Diplomatic table

## XVI.2 Revolts tables

### XVI.2.1 Summary of the procedure

**A** Roll 2d10 and read the revolted country in the column of the current period. The target country may be a MIN or other abstract entity in which case a pseudo-stability is provided in brackets.

**A.1** Decrease this pseudo-stability of minors in the table by -1 if:

- This is HOL\* and HIS perceived the taxes at the preceding turn;
- This is POR\* at the turn of event III-6 (Portuguese Disaster in Africa) or after.

**B** Roll 1d10+the Stability (or modified pseudo-stability) on the target country's table. Reroll in the description of groups below if needed.

**C** Lastly, roll 2d10 in the last column of the table below to find the strength of the revolt.

**Design note:** The COLrevolt area is mutually exclusive with both event IV-20 (Revolts in Singala/Formose), event V-17 (Slave Revolts in the West Indies), event VI-15 (Slave Revolts in the West Indies) and event VII-11 (Revolt in Indonesia). If using the COLrevolt area, consider these events as R/D. If not, reroll the revolt area whenever COL occurs.

### XVI.2.2 Global revolt table

	I	II	III	IV	V	VI	VII	Strength
2	SUE [0]	POR	FRA	FRA	PRU [0]	PRU [0]	ANG	LD
3	SUE [0]	POR	FRA	AUS [-1]	POR	ANG	POL [-2]	LD
4	AUS [-1]	SUE [-1]	ANG	PRU	VEN	VEN	PRU	Δ⊖
5	AUS [-1]	SUE [-1]	SUE	POR	PRU	PRU	ANG	Δ⊖
6	POR	PRU [+3]	PRU [+3]	HOL	SUE	SUE	AUS	Revolt ⊖

9	Western England	Western England	Inner Ireland	ROTW	America
10	French Soil	Low Scotland	Outer Ireland	Europe	Europe
11	Outer Ireland	French Soil	High Scotland	Asia	Europe
12	Low Scotland	Northern England	ROTW	America	Outer Ireland
13	<b>Cornwall</b>	Outer Ireland	Outer Ireland	Outer Ireland	Outer Ireland

**America** A random COL/TP (of any nationality) in the following area: 1–2. **AMERICA**, 3–4. **VIRGINIA**, 5–6. **CAROLINA**,

7–8. **ANTILLES**, 9–10. **TERRE-NEUVE** or **HUDSON**

**Asia** A random TP/COL of ANG not in continent **AMERICA**

**Central England** 1. **Kent**, 2–3. **Lincolnshire**, 4. **Wessex**, 5–6. **Gloucester**, 7–10. **East Anglia**

**English Provinces** 1. **Lincolnshire**, 2. **Wessex**, 3. **Gloucester**, 4. **Cornwall**, 5. **Cymru**, 6. **Midlands**,

7. **Yorkshire**, 8. **Cumberland**, 9. **Durham**, 10. **Lancashire**

**Europe** A random English European province not in Great-Britain/Ireland (possibly including **HANOVERE**); if none,

CTZ **ANGLIA**

**French Soil** 1. **Guyenne**, 2–4. **Finistère**, 5–7. **Armor**, 8–10. **Picardie**

**High Scotland** 1–4. **Highlands**, 5–7. **Alba**, 8–10. **Moray**

**Inner Ireland** 1–5. **Brega**, 6–10. **Laighean**

**Low Scotland** 1–4. **Ayr**, 5–7. **Lothian**, 8–10. **Galloway**

**Northern England** 1–3. **Yorkshire**, 4–6. **Cumberland**, 7–9. **Durham**, 10. **Lancashire**

**Outer Ireland** 1–3. **Mumhan**, 4–6. **Connacht**, 7–10. **Uladh**

**ROTW** A random TP/COL of ANG; if none, CTZ **ANGLIA**

**Scotland** 1–3. **Ayr**, 4–5. **Lothian**, 6. **Galloway**, 7–8. **Highlands**, 9. **Alba**, 10. **Moray**

**Western England** 1–4. **Cornwall**, 5–8. **Cymru**, 9–10. **Midlands**

Table XVI.4: Revolt table for ANG

**XVI.2.4 Revolt table for FRA**

**A** When a **Revolt** occurs in FRA, roll on this table, in the column of the current period.

**B** For the roundly revolts caused by event III-11 (Wars of Religion in France), always use the column for period III (even if it occurs during another period).

**B.1** Moreover, if FRA is catholic, **subtract** its Stability rather than adding it to find the localisation of the revolts caused by this event.

Result	pI,pII	pIII	pIV	pV	pVI	pVII

Otherwise it is marked off, but can occur again.</p> <p><b>B Event Phase</b></p> <p><b>B.1</b> FRA and ANG receive a temporary CB for this turn to declare war against both HIS and POR.</p> <p><b>B.2</b> HIS and POR receive each 50 ₮.</p> <p><b>C Lasting Effects</b></p> <p><b>C.1</b> From now on HIS and POR have specific areas for overseas expansions:</p> <p><i>C.1.a</i> The exclusive area of POR contains <b>MIDDLE EAST</b>, <b>SIBERIA</b>, <b>ASIA</b> (except <b>PHILIPPINES</b>, <b>EXTREME ORIENT</b>), <b>AFRICA</b>, <b>BRAZIL</b>.</p> <p><i>C.1.b</i> The exclusive area of HIS contains <b>AMERICA</b> except <b>BRAZIL</b>, <b>AMAZONIA</b>, and <b>MINAS GERAIS</b>.</p> <p><i>C.1.c</i> The regions <b>AMAZONIA</b>, <b>MINAS GERAIS</b>, <b>PHILIPPINES</b>, and <b>EXTREME ORIENT</b> are shared.</p> <p><b>C.2 Effects on HIS and POR</b></p> <p><i>C.2.a</i> All markers of HIS or POR currently on map in the exclusive area of the other MAJ are immediately destroyed, or may be replaced by the other MAJ by equivalent markers of its own if there are some available, and the MAJ fulfils the conditions to place such a marker here (especially discoveries).</p> <p><i>C.2.b</i> Their movements are limited to their areas, the sea zones bordering them, and sea zones that borders only islands. POR may also go in sea zones <b>Cap Horn</b> and <b>Côte du Chili</b>. HIS may also go in <b>Cap de Bonne-Espérance</b> and <b>Cap des tempêtes</b>.</p> <p><i>C.2.c</i> For each stack of the country violating this restriction, this country loses 1 Stability per restricted province or sea zone trespassed in. All units of HIS or POR in prohibited zones when the Treaty is signed must immediately return home as per normal peace procedure.</p> <p><i>C.2.d</i> Until the end of period II, HIS and POR have free overseas CB against any Minor country in his area, and against any European country (Catholic or not) trespassing their area. The free overseas CB might be used in reaction at the end of a round where a trespassing occurs, or at the beginning of the next turn.</p> <p><i>C.2.e</i> Until the end of period III, HIS and POR may attack <i>Minor establishments</i> in their area at no cost in Stability.</p> <p><i>C.2.f</i> Until the end of period III, HIS and POR have the capability to burn down European COL installed in their area (same condition as for burning TP).</p> <p><i>C.2.g</i> Spanish Missionaries and Missions can only go in the exclusive area of HIS until the end of the Treaty (not in the shared area).</p> <p><b>C.3 Shared Area</b></p> <p><i>C.3.a</i> The regions that can be disputed between POR and HIS can be explored by both countries and they can settle COL and TP without penalty.</p> <p><i>C.3.b</i> If POR has a TP or COL in <b>PHILIPPINES</b>, <b>AMAZONIA</b> or <b>MINAS GERAIS</b>, HIS gains an Overseas CB against POR.</p> <p><i>C.3.c</i> If HIS has a TP or COL in <b>PHILIPPINES</b> or <b>EXTREME ORIENT</b>, POR has an Overseas CB against HIS.</p> <p><b>C.4 Effects on other countries</b> Until the end of period II all COL/TP placement attempts (successful or not), and any movement of units from the European Map into ROTW (not in the other way) by Catholic players other than HIS or POR entail to this MAJ a malus of -2 to Stability improvement action and the loss of control of SANCTA SEDES. This malus is applied at most once per turn.</p> </div>	<div data-bbox="1120 90 2121 124"> <div>Political Events of Period I— master – 2016-04-14</div> <div>[E]359</div> </div> <div data-bbox="1120 167 2121 256"> <p><b>C.5</b> The <i>Treaty of Tordesillas</i> can be declared void by POR or HIS as a Diplomatic Announcement. The Treaty is at an end, the other power gains an immediate free CB against the announcer; the announcer loses diplomatic control of SANCTA SEDES.</p> </div> <div data-bbox="1120 276 2121 312"> <div>I-2</div> <div>ELECTION OF THE HRE EMPEROR</div> <div>RistoMod</div> </div> <div data-bbox="1120 333 2121 1513"> <p><i>Date:</i> 1519.</p> <p><i>Duration:</i> until the Emperor is Habsburg.</p> <p><b>A Event Phase</b></p> <p><b>A.1</b> Election of the new Emperor has to be conducted. The pretenders are the monarchs of HIS, FRA, ANG, and POL if they are Catholic. Each Pretender makes a secret bid of Ducats (a multiple of 10 ₮) for the title, and the country with the highest bid will win. In case of draw, those Pretenders bid again secretly an additional bid. All bids are lost.</p> <p><b>A.2</b> A candidate from one (unspecified) minor country makes a bid of <math>(1d10 \times 10)+30</math> ₮ (rolled for after the initial bids of the players ; in case of ties, this candidate bids in addition of 1d10 times 10 ₮). If the winner of the bid, and so the Emperor is a from a Minor Power, he will live 1d10 turns before a new election takes place. The event is still marked.</p> <p><b>A.3</b> Each Minor Country that has the Electoral Dignity: COLONIA, PALATINATUS, SAXONIA, TREVORUM, MOGENTIUM, BRANDENBURGUM, BOHEMIA gives a free bid of 10 ₮ to the Pretender secretly decided at the bidding time by the Major Country having Diplomatic alliance with the Electorate. If they are Neutral, they give their bid to the pretender of the minor country</p> <p><b>A.4</b> At the first election, the House of Fugger may provide an immediate international loan of 50 ₮ for this election to HIS, or 100 ₮ if the monarch of HIS is <b>Carlos V</b>, that are directly put in the RT.</p> <p><b>A.5</b> The winner of the Crown gains 75 ₮ and 10 VP.</p> <p><b>A.6</b> The new Emperor has now the benefice pertaining to the HRE, see section XIV.13.2.1 (The Holy Roman Empire (SRI)).</p> <p><b>A.7</b> If the Emperor is Spanish and event I-A (Dynastic Alliance of the Habsburg) is in effect, HIS gains the possibility to involve AUS* in all wars in which HIS is currently involved (both as attacker and defender), but not conversely. This is made with a free CB.</p> <p><b>A.8</b> If the Emperor is FRA, ANG or POL, HIS may declare a war (with no CB) against the new Emperor and AUS* will help in a offensive alliance. A valid victory condition for HIS is to cause immediately a new election where the losing power can not be a candidate.</p> <p><b>B Lasting Effects</b></p> <p><b>B.1</b> When the elected emperor dies or converts to another religion, a new election occurs with the same system during the very next Event Phase.</p> <p><b>B.2</b> However, if the dying Emperor is Spanish, the event terminates permanently and no elections are held. The title of emperor reverts back to AUS* and all effects of the event are cancelled. Furthermore, the dynastic action <u>C-2</u> is activated now if possible.</p> <p><i>B.2.a</i> Exception: If <b>Carlos V</b> has not been reigning yet, then the emperor stay HIS.</p> <div data-bbox="1120 1299 2121 1335"> <div>I-3 (1)</div> <div>WARS IN ITALY (NAPOLI)</div> <div>RistoMod</div> </div> <p><i>Date:</i> 1494-1504, 1508.</p> <p><b>A Condition:</b></p> <p>Mandatory War.</p> <p><b>A.1</b> If FRA is Protestant, mark off the event but apply R/D with the <i>Revolt</i> in FRA.</p> <p><b>A.2</b> If SICILIÆ exists no more, mark off the event, then apply and mark off the second event.</p> </div>
--	--

<p>[E]360</p> <p>Political Events of Period I</p> <p><b>A.3</b> The second event can not take place if the first one is not finished. In that case re-roll and do not mark off.</p> <p><b>B Event Phase</b></p> <p><b>B.1</b> FRA has a Mandatory CB against SICILIAE. This CB has to be used this turn or the next, at the phase of Declaration of War. If the CB is used, the controller of SICILIAE may abandon the minor country with no cost, even if it is own VA (because of valid Dynastic Claims of the French King).</p> <p><b>B.2</b> If FRA is already at war against this country, the war is linked to this event at this turn and that fulfils the Mandatory CB.</p> <p><b>C Diplomatic Phase</b></p> <p><b>C.1 Refusing the event</b></p> <p>C.1.a At the very beginning of the Declarations Phase, FRA may refuse the event.</p> <p>C.1.b If FRA refuses the event, it loses <b>2</b> Stability and the rest of the event is ignored.</p> <p><b>C.2 Entry in War of the Italian countries</b></p> <p>C.2.a The following countries may be involved by themselves in the war: GENUA, LOMBARDIA, SANCTA SEDES, SABAUDIA, The following tests are made each turn of the war (excepted if the MIN was already forced out of the war by a separate peace).</p> <p>C.2.b Those countries in the list that are allied to a MAJ involved in the war, make a mandatory test of Entry in the War as per the usual rules §D (Full involvement in wars.) of section IV.3.3.5 (Entry in war), excepted that the MAJ has no choice here and this test is made even if the MIN is not in EW; if the MIN is not in EW at least, use <b>-2</b> to the die roll in the test and a failure does not change the diplomatic status of the MIN.</p> <p>C.2.c Those countries in the list that are Neutral, may join the following MAJ according to the roll of 1d10: 1 FRA, 2-3 AUS*, 4 VEN, 5-6 enters war by itself, 7-10 stays Neutral. A country joins a MAJ only if it is involved in the war ; it is then put in EW of this MAJ, and declares war of the enemies of this MAJ. If the MAJ is not involved in the war, the MIN stays Neutral.</p> <p>C.2.d If a MIN enters war by itself, it declares war to all involved countries then it asks help of the preferred country in its list that is not one of its enemies.</p> <p><b>C.3 Diplomatic effects of the wars</b> FRA has a bonus of <b>+2</b> for its diplomacy on TOSCANA and <b>-1</b> for SANCTA SEDES and PARMA during the event.</p> <p><b>C.4 The Serenissima in the Wars in Italy</b></p> <p>C.4.a VEN has a CB against FRA and/or SICILIAE, as long as the war is not finished.</p> <p>C.4.b During this war also, VEN may make limited intervention at the side of any involved alliance each turn. Such limited intervention can begin at any turn (not only the first) and VEN can change side between turns. VEN may force any Italian MIN in limited intervention for the enemy alliance, to be fully involved in the war at no cost.</p> <p>C.4.c Conversely, FRA and AUS* both have a free CB against VEN, to be used at any turn of the war or on the turn following its conclusion.</p> <p><b>D Military Phase</b></p> <p><b>D.1 First turn of the war</b> FRA has the right of free access and supply in all Italian minor countries not engaged in this war. Supply is not given by a province if its city is besieged by country hostile to this city.</p> <p><b>D.2 Restricted War Field</b></p> <p>D.2.a The war is restricted to ITALY if no side broadens the zone of war.</p> <p>D.2.b The war is no more restricted if the side of FRA invades a province outside ITALY of the other side. FRA loses immediately <b>1</b> Stability and 20 VP, and if the invasion was not due to FRA, the Major Power responsible for it loses also <b>1</b> Stability and 20 VP. However, if dynastic actions A-1 and A-2 have both been played, the penalty in VP is void.</p> <p>D.2.c The war is also no more restricted if the side enemy of FRA invades a province of the side of FRA outside ITALY and that stack does not draw its supply from ITALY.</p>	<p>Political Events of Period I— master – 2016-04-14</p> <p>[E]361</p> <p><b>D.3</b> At the time a stack of FRA invades <b>Campania</b>, FRA, HIS and AUS* gain free access in, but only supply across, Italian minor countries not engaged in this war. Supply across a province is impossible if its city is under siege by an enemy of this city.</p> <p><b>E Peace Phase</b></p> <p><b>E.1</b> During this war, FRA may annex <b>Campania</b> as a regular province, even if it's a capital.</p> <p><b>F Interphase</b></p> <p><b>F.1</b> If FRA does not manage the military conquest of <b>Ṅapōlī</b> at any time of this war, it loses 10 VP at the end of the event.</p> <p><b>F.2</b> If, on the contrary, FRA annexes <b>Campania</b>, it gains 10VP.</p> <p><b>F.3 Spanish reaction</b> HIS has to choose to do dynastic action A-3 as one of its diplomatic action on the turn following the beginning of the war (this will use a Diplomatic action, with no cost and automatic success, but HIS is allowed another Dynastic Action this turn), thus activating event event I-I (Spanish Naples) or renounces to its Inheritance: it then loses <b>3</b> Stability, and dynastic action A-3 is considered played for no effect.</p> <p><b>G Lasting Effects</b></p> <p><b>G.1</b> If at any time of this war FRA manages the military conquest of <b>Ṅapōlī</b>, it gains a CB against TUR for the rest of the period. Moreover, FRA may now annex <b>Trakya</b> until the end of the period.</p> <p><b>G.2</b> Until the end of the current period, FRA has a permanent CB against the owner of <b>Campania</b>.</p> <p><b>I-3 (2) WARS IN ITALY (MILANO)</b> RistoMod</p> <p><i>Date:</i> 1510-1511 / 1513-1515.</p> <p><i>Duration:</i> Until the end of the war caused by this event.</p> <p><b>A Condition:</b></p> <p>Mandatory War.</p> <p><b>A.1</b> If FRA is Protestant, marked off the event but apply R/D with the <i>Revolt</i> in FRA.</p> <p><b>A.2</b> The second event can not take place if the first one is not finished. In that case re-roll and do not mark off.</p> <p><b>B Event Phase</b></p> <p><b>B.1</b> FRA has a Mandatory CB against the owner of <b>Lombardia</b>. This CB has to be used this turn or the next, at the phase of Declaration of War. If FRA is Catholic/Counter-Reformation after event I-8 (1) (Reformation), the CB is free.</p> <p><b>B.2</b> If FRA is already at war against this country, the war has to become the war linked to this event at this turn or the following (the choice is made by FRA during the Declarations of War) and that fulfils the Mandatory CB.</p> <p><b>B.3</b> If FRA owns <b>Lombardia</b>, any former owner of this province has a free CB against FRA.</p> <p><b>C Diplomatic Phase</b></p> <p><b>C.1 Refusing the event</b></p> <p>C.1.a At the very beginning of the Declarations Phase, FRA or the owner of <b>Lombardia</b> may refuse the event.</p> <p>C.1.b If FRA refuses the event, it loses <b>2</b> Stability and the rest of the event is ignored.</p> <p>C.1.c If the owner of <b>Lombardia</b> refuses the event, it loses <b>3</b> Stability and gives <b>Lombardia</b> to FRA (or its former controller if it was FRA that refused the event). Then the rest of the event is ignored. If this province is owned by the AUS*, HIS may refuse the event (and lose the Stability).</p> <p><b>C.2 Milan as a Minor country</b> If <b>Lombardia</b> is owned by the Minor country LOMBARDIA, AUS* have a free CB in reaction to a Declaration of War of FRA against this country. LOMBARDIA is moved up to EW on the diplomacy track of AUS* if it was not already on a higher position.</p>
--	---

<div>[E]362</div> <div>Political Events of Period I</div> <p><b>C.3 The Papacy and the war</b> If SANCTA SEDES is allied to a MAJ involved in the war, each turn make a mandatory test of Entry in the War is made as per the usual rules section IV.3.3.5 (Entry in war), excepted that the MAJ has no choice here and this test is made even if the MIN is not in EW; if the SANCTA SEDES is not in EW at least, use <b>-2</b> to the die roll in the test and a failure does not change its diplomatic status. Exception: if SANCTA SEDES was forced out of this war, it does not enter back in it.</p> <p><b>C.4 Diplomatic effects of the wars</b> FRA has a bonus of <b>+2</b> for its diplomacy on TOSCANA and <b>-1</b> for SANCTA SEDES and PARMA during the event.</p> <p><b>C.5 The Serenissima in the Wars in Italy</b>  C.5.a VEN has a CB against FRA and/or the owner of <b>Lombardia</b>, as long as the war is not finished.  C.5.b During this war, VEN may make limited intervention at the side of any involved alliance each turn. Such limited intervention can begin at any turn (not only the first) and VEN can change side between turns. VEN may force any Italian MIN in limited intervention for the enemy alliance, to be fully involved in the war at no cost.  C.5.c Conversely, FRA and AUS* both have a (normal) CB against VEN, to be used at any turn of the war.</p> <p><b>C.6 Swiss Mercenaries</b> If LOMBARDIA is (or was) a vassal of AUS* (according to event I-F (Habsburg Control of Milano)), AUS* may spend one Diplomatic action to automatically gain HELVETIA in EC (no money is spent).</p> <div>D Military Phase</div> <p><b>D.1 Restricted War Field</b>  D.1.a The war is restricted to <i>ITALY</i> if no side broadens the zone of war.  D.1.b The war is no more restricted if the side of FRA invades a province outside <i>ITALY</i> of the other side. FRA loses immediately <b>1</b> Stability and 20 VP and if the invasion was not due to FRA, the Major Power responsible for it loses also <b>1</b> Stability and 20 VP. However, if dynastic actions <b>A-1</b> and <b>A-2</b> have both been played, the penalty in VP is void.  D.1.c The war is also no more restricted if the side enemy of FRA invades a province of the side of FRA outside <i>ITALY</i> and that stack does not draw its supply from <i>ITALY</i>.</p> <p><b>D.2 SABAUDIA</b> gives free access and supply in its province to FRA during the first turn of the war, if it stays neutral in this war. Supply from or across a province is impossible if its city is under siege by an enemy of this city.</p> <p><b>D.3</b> If event I-F (Habsburg Control of Milano) was not played and FRA besieges the city of <b>Lombardia</b> with at least one Ⓐ⊕, it takes the city without resolving the siege and annexes immediately the province; FRA may destroy the Minor country LOMBARDIA by this way.</p> <div>E Lasting Effects</div> <p><b>E.1 Passing through SABAUDIA</b>  E.1.a At the instant FRA annexes <b>Lombardia</b> during the war, it gains from SABAUDIA free access and supply through its provinces (but no stopping in, or supply from) when at peace with FRA. Supply across a province is impossible if its city is under siege by an enemy of this city.  E.1.b This right is void if/when FRA is at war against SABAUDIA, and is permanently lost if FRA loses <b>Lombardia</b>.  E.1.c Enemies of FRA gain the same right when at war with FRA.</p> <p><b>E.2</b> At the end of this event, if the Minor country LOMBARDIA still exists, dynastic action <b>B-2</b> is played then AUS* annexe all its provinces and the minor country disappears.</p> <p><b>E.3</b> Until the end of the current period, FRA has a CB against the owner of <b>Lombardia</b>.</p> <div>I-4 (1) DECLARATION OF HUNGARIAN FREEDOM RistoMod</div> <p><i>Date: 1505.</i>  <b>A Condition:</b>  If event I-D (Habsburg Inheritance of Hungary) or event I-E (Downfall of Hungary) has already been activated, mark off but play R/D.</p>	<div>[E]363</div> <div>Political Events of Period I— master – 2016-04-14</div> <div>B Event Phase</div> <p><b>B.1</b> The Hungarian Inheritance (event I-D (Habsburg Inheritance of Hungary)) that might be pending is now impossible.  <b>B.2</b> POL has the immediate choice of supporting a Jagiellon dynasty in HUNGARIA. If it does, it gains HUNGARIA in RM at once, makes a white peace with it if necessary, and gains a temporary CB against any countries at war against HUNGARIA.  B.2.a Else, HUNGARIA becomes Neutral.  <b>B.3</b> AUS* has a temporary CB against HUNGARIA. See also event I-E (Downfall of Hungary) that might happen.</p> <div>C Lasting Effects</div> <p>The dynastic action <b>C-1</b>, the events I-5 (Dynastic Alliance with Hungary) and I-D (Habsburg Inheritance of Hungary) are no more possible and will be ignored.</p> <div>I-4 (2) DYNASTIC ALLIANCE WITH BOHEMIA RistoMod</div> <p><i>Date: 1526.</i>  <b>A Condition:</b>  If event I-C (Habsburg Bohemia) has already been played, mark off and play R/D.</p> <div>B Event Phase</div> <p><b>B.1</b> The dynastic action <b>B-1</b> is played, and it activates event I-C (Habsburg Bohemia).</p> <div>I-5 DYNASTIC ALLIANCE WITH HUNGARIA RistoMod</div> <p><i>Date: 1491, not activated.</i>  <i>Duration:</i> until the activation of event I-D (Habsburg Inheritance of Hungary) or event I-C (Habsburg Bohemia), or the event I-4 (1) (Declaration of Hungarian Freedom)  <b>A Condition:</b>  If <b>C-1</b> or event I-4 (1) (Declaration of Hungarian Freedom) has already been played, mark off and play R/D.</p> <div>B Event Phase</div> <p><b>B.1</b> The dynastic action <b>C-1</b> is played, and consequently event I-D (Habsburg Inheritance of Hungary) is pending.  <b>B.2</b> POL gains a temporary CB against HUNGARIA.</p> <div>C Diplomatic Phase</div> <p><b>C.1</b> At the beginning of each diplomatic phase, the diplomatic status of HUNGARIA moves one level toward the track of AUS*, up to EW. This ends if event I-E (Downfall of Hungary), event I-4 (1) (Declaration of Hungarian Freedom) or event I-D (Habsburg Inheritance of Hungary) happens.</p> <div>I-6 DYNASTIC ALLIANCE WITH MILANO Risto</div> <div>TODO: Remove (happens to early). Replace with something else. Maybe something for DAN? In the meantime, mark off and reroll.</div> <p><b>A Condition:</b>  If <b>C-1</b> or event I-4 (1) (Declaration of Hungarian Freedom) has already been played, mark off and re-roll.  <b>A.1</b> The dynastic action <b>B-2</b> is played, and it activates event I-F (Habsburg Control of Milano).</p> <div>I-7 (1) HABSURG DYNASTIC ACTION (×2) PBNew</div> <div>A Event Phase</div> <p><b>A.1</b> HIS may immediately play one dynastic action of its choice, without test nor cost.  A.1.a This action may be an annexation of one of the Provinces of the North-East, if applicable.</p>
---	---

**I-7 (2) REVOLT OF THE COMUNEROS** PBNew

Date: 1520-1522.

**A Event Phase**

**A.1** Place one *Revolt* in **Toledo**, one Rebel  $\Delta\ominus$ , LID with a minor  $\times$ . The rebels control the fortress (reduced to level 2 max if need be).

**A.2** Draw at random 2 other provinces where a *Revolt* is placed, by rolling 1d10: 1-2 **La Mancha**, 3-4 **Castilla La Nueva**, 5-6 **Salamanca**, 7-8 **León**, 9-10 **Castilla La Vieja**

**A.3** The Rebels are controlled by RUS (the most remote player designers could think of). They will receive no reinforcement (excepted through *Revolt* extension).

**I-8 (1) REFORMATION** RistoMod

Date: 1517-1560.

Turn 1

**A Event Phase**

**A.1 Luther's 95 Thesis** DANIA, SUECIA, CLIVIA, HELVETIA, HANSA, TERRÆ DEPRESSÆ, HASSIA, SAXONIA, HANOVERE, WESTFALLIA, BRUNSVICUM, and BOHEMIA become Protestant.

**A.2 Religious enmities** begin between Protestant and Catholic countries. They will end when event IV-A (Thirty Years' War) is terminated, or at the beginning of period IV if this event ended before, or at the end of period IV if the event is not yet finished.

**A.3 Orthodoxes in Poland** POL has to decide of its attitude regarding Orthodoxy: Conversion, Tolerance or Support.

**A.3.a** The lasting effects are mainly described in section XIV.3.3.1 (Regarding Orthodoxy).

**A.3.b** If POL chooses Support of Orthodoxes, it loses **2** Stability and rolls for 2 *Revolt* on its table.

**A.3.c** If POL chooses Tolerance of Orthodoxes, it loses **1** Stability and rolls for 1 *Revolt* on its table.

**A.4 Russian Religious Attitude** RUS has to decide its behaviour regarding Religions: Championship of Orthodoxy or Religious Tolerance.

**A.4.a** The lasting effects are mainly described in section XIV.6.3 (Religious Attitude of Russia).

**A.4.b** If RUS chooses Religious Tolerance, it loses **2** Stability and rolls for 1 *Revolt* on its table.

Turn 2

**B Event Phase**

**B.1** BRANDENBURGUM becomes Protestant. Play event I-H (Secularisation of D.S.M. Theutonicorum) as a supplementary event this turn.

**I-8 (2) GROWTH OF THE REFORMATION** RistoMod

Date: 1517-1560.

**A Event Phase**

**A.1** FRA, HIS, ANG and POL must choose between Catholic/Counter-Reformation, Catholic/Conciliatory or Protestantism (forbidden to HIS). The choice is made simultaneously and secretly at the beginning of the Phase of Declarations. It cannot be voluntarily changed later except by events. If POL has chosen Support of Orthodoxes, he is compelled to choose Catholic/Conciliatory now.

**B Consequence:**

Each country is affected by the following general consequences, added to specific effects for each country, described afterwards.

**B.1 Catholic/Counter-Reformation**

**B.1.a** If only one of the eligible players chooses Catholic/Counter-Reformation, he is permanent Sole Defender of Catholic Faith (XIV.14.3.1) and receives 20 VP.

**B.1.b** If several players choose Catholic/Counter-Reformation, the Sole Defender of Catholic Faith (XIV.14.3.1) is determined according normal procedure but between them only.

**B.1.c** If none of the eligible players chooses Catholic/Counter-Reformation, all of them lose **1** additional Stability.

**B.1.d** A bonus of **+1** is received for diplomacy on all Catholic countries until the end of *Religious Enmities*.

**B.2 Catholic/Conciliatory**

**B.2.a** **1** Stability is lost.

**B.2.b** One *Revolt* is rolled in the player country.

**B.2.c** An additional Diplomatic Action is gained and a **+2** bonus is received for diplomacy on all Protestant countries until the end of *Religious Enmities*.

**B.3 Protestantism**

**B.3.a** No Diplomacy (support included) with SANCTA SEDES until the end of the current period. Control of SANCTA SEDES is lost.

**B.3.b** **2** Stability are lost.

**B.3.c** Two *Revolt* are rolled in the player country.

**Specific effects****α FRANCE**

**α-B.1 Independent** PRIMA HOLLANDIA If PRIMA HOLLANDIA is or comes into play before the The War of Spanish Succession (V-4), immediately apply event III-1 (1) (Revolt of the United Provinces).

**α-B.2 Catholic/Counter-Reformation**

**α-B.2.a** Some events (especially Wars of Religion in France (III-11), Expulsion of the French Protestants (V-6)) are modified.

**α-B.3 Catholic/Conciliatory**

**α-B.3.a** **+1** bonus to Stability improvement attempts this turn and the two following ones.

**α-B.4 Protestantism**

**α-B.4.a** No Diplomacy (support included) with SANCTA SEDES until the end of period III.

**α-B.4.b** Some events (Wars in Italy (Napoli) (I-3 (1)), Wars in Italy (Milano) (I-3 (2)), War in Italy (II-3), Revolt of La Rochelle (IV-14), Wars of Religion in France (III-11) Expulsion of the French Protestants (V-6), Colbertian Mercantilism in France (V-5)) are modified.

**α-B.4.c** The turn and period limits of FRA are changed. FRA receives an explorer for one turn as per event E-41 (Explorer).

**β SPAIN****β-B.1 Catholic/Counter-Reformation**

**β-B.1.a** Permanent bonus **+2** for diplomacy on SANCTA SEDES.

**β-B.1.b** HIS gains the possibility of forcing Restoration of Catholicism in Protestant countries, with the relevant bonuses.

**β-B.2 Catholic/Conciliatory**

**β-B.2.a** A further **-1** in Stability is applied.

**β-B.2.b** A malus of **-2** to Stability improvement attempts for the rest of the period and the following one

**β-B.2.c** Restoration of Catholicism in Protestant countries gives no bonuses.

<div>[E]366</div> <div>Political Events of Period I</div> <p><i>β-B.2.d</i> Dynastic actions are no more allowed, except when permitted or required by an event.</p> <div> <div>Design note:</div> <div>Future option: modifications of some events: [temporary list II-9, III-1, III-7, III-8, III-11, IV-1 and V-8]. As this choice might largely change the course of the game, especially for the player of VEN, it is good policy to have part of an agreement with this player before choosing this attitude.</div> </div> <div> <div>γ</div> <div>ENGLAND</div> </div> <div> <div>γ-B.1 Catholic/Counter-Reformation</div> <div>γ-B.1.a The turn and period limits of ANG are changed.</div> <div>γ-B.2 Catholic/Conciliatory</div> <div>γ-B.2.a +1 bonus to Stability improvement attempts this period and the following one.</div> <div>γ-B.3 Protestantism</div> <div>γ-B.3.a ANG is automatically Protestant/Puritan.</div> <div>γ-B.3.b The turn and period limits of ANG are changed. ANG receives an explorer for one turn as per event E-41 (Explorer).</div> <div>γ-B.3.c Each time ANG is rolled-for in the Revolt Country chart, the number of <i>Revolt</i> is doubled. This continues until the end of period III.</div> <div>γ-B.4 The Religious and Civil Wars of ANG (Act of Supremacy (II-1 (1)), English Civil War (IV-7 (1)), The Glorious Revolution in England (V-3) and Jacobite Rebellion (VI-4)) depend on its Religious choice.</div> </div> <div> <div>δ</div> <div>POLAND</div> </div> <div> <div>δ-B.1 Catholic/Counter-Reformation</div> <div>δ-B.1.a Some events (Secularisation of D.S.M. Theutonicorum (I-H), Union between Polonia and Suecia (III-13), Thirty Years' War (IV-A), Augustus II, a Saxon king in Poland (V-12)) are modified.</div> <div>δ-B.1.b POL gain a CB against all Protestant countries until the end of period III, and the right to convert them to Catholicism.</div> <div>δ-B.2 Catholic/Conciliatory</div> <div>δ-B.2.a +1 bonus to Stability improvement attempts this turn and the two following ones.</div> <div>δ-B.3 Protestantism</div> <div>δ-B.3.a The Union of Lublin (see Union of Lublin (II-13) or Union of Lublin (III-14)) is broken and will not be possible. Some other events (Bohemian Revolt (IV-1 (1))) are modified.</div> <div>δ-B.3.b The turn and period limits of POL are changed.</div> </div> <div> <div>end of specific effects</div> </div> <div> <div>I-8 (3) INTENSIFICATION OF THE REFORMATION</div> <div>RistoMod</div> </div> <div> <div>Date: 1517-1560.</div> <div>A Event Phase</div> <div>A.1 Calvin PALATINATUS, TURINGIA and SCOTIA become Protestant.</div> </div> <div> <div>I-9 TURKISH DYNAMISM (×*)</div> <div>RistoMod/PBnew/Jym [BLP]</div> </div> <div> <div>A Event Phase</div> <div>A.1 TUR chooses, when all events of this turn have been rolled, to apply one of the following cases:</div> <div>A.1.a If <i>Oruç Reis</i> is alive, TUR may choose subevent §α (Barbaross brothers). This may only occur once per game.</div> <div>A.1.b If <i>Barbarossa</i> is alive, TUR may choose subevent §β (Vassalisation of Algeria). This may only occur once per game.</div> </div>	<div>Political Events of Period I— master – 2016-04-14</div> <div>[E]367</div> <div>A.1.c If This is period II or later, TUR may choose subevent §γ (Alignment of the Barbaresques). This may only occur once per game.</div> <div>A.1.d TUR may always choose subevent §δ (Turkish Diplomatic Pressures). This may happens any number of time.</div> <div> <div>α Barbaross brothers</div> </div> <div> <div>Date: Capture of Algiers by Aruj and Hayreddin Barbarossa: 1516.</div> <div>α-B Event Phase</div> <div>α-B.1 TUR immediately chooses one <i>Præsidio</i> in ALGERIA which is destroyed.</div> <div>α-B.2 If not controlled by TUR, ALGERIA becomes immediately Neutral.</div> <div>α-B.3 On this turn, the Algerian IP is raised⊕ (even if it was not in play).</div> </div> <div> <div>β Vassalisation of Algeria</div> </div> <div> <div>Date: Recapture of Algiers by Hayreddin Barbarossa, and formal sovereignty of Soliman: 1529.</div> <div>β-C Event Phase</div> <div>β-C.1 ALGERIA is immediately placed on VA of TUR.</div> <div>β-C.2 <i>Barbaros</i> is now also a Turkish leader, and as long as he is alive, ALGERIA is permanent Vassal of TUR not subject to diplomacy.</div> <div>β-C.3 At the death of <i>Barbaros</i>, the -3 malus for TUR to all diplomacy attempts against all <i>Barbaresque</i> countries is cancelled.</div> </div> <div> <div>γ Alignment of the Barbaresques</div> </div> <div> <div>Date: Ottoman conquest of Tunis: 1534, alignment: around 1540.</div> <div>γ-D Event Phase</div> <div>γ-D.1 From now on, the -3 malus for TUR to all diplomacy attempts against all <i>Barbaresque</i> countries is cancelled.</div> <div>γ-D.2 TUNESIA is immediately placed on VA of TUR if <i>Dragut</i> is alive.</div> </div> <div> <div>δ Turkish Diplomatic Pressures</div> </div> <div> <div>Date: No precise date.</div> <div>δ-E Diplomatic Phase</div> <div>δ-E.1 TUR receives a bonus of +3 for a Muslim minor of its choice. --	--

<div>[E]372</div> <div>Political Events of Period I</div> <p><b>C.2</b> If HUNGARIA was at war, AUS* is substituted to this country for the on-going war. AUS* offers its enemies the immediate possibility to sign a White Peace.</p> <p><b>C.3</b> Event I-C (Habsburg Bohemia) is activated at this turn.</p> <div>D Lasting Effects</div> <p><b>D.1</b> The basic forces of AUS* are increased by an <math>\Delta\oplus</math>.</p> <p><b>D.2</b> HUNGARIA may reappear as a "liege" country of AUS* or HIS (see section XIV.10.2 (Autonomous Habsburg States)).</p> <p><b>D.3</b> If AUS* controls at least 5 provinces of HUNGARIA, it may use the counters of HUNGARIA.</p> <p><b>D.4</b> All future Hungarian leaders are now given to AUS*.</p> <p><b>D.5</b> If TUR annexes <b>Buda</b> before the end of period II, lasting effects of event I-E (Downfall of Hungary) are applied instead, and this event is supposed to have happened for the rest of the rules (Victory conditions and so on).</p> <div>I-E DOWNFALL OF HUNGARY PB/Jym [BLP]</div> <p><i>Date: 1526.</i></p> <div>A Activation:</div> <p><b>A.1</b> Activated by <math>\S A</math> (Hungaria) of section XIV.13.4.3 (Bohemia, Hungaria and Transilvania) on the turn following either a major victory of TUR against a stack with a least one <math>\Delta</math> counter of HUNGARIA, if TUR chooses to activate it; OR occupation of <b>Buda</b> by TUR;</p> <p>OR Turkish control of at least 5 provinces owned by HUNGARIA.</p> <p><b>A.1.a</b> The moment the condition is met, POL can make a limited intervention at the side of HUNGARIA and AUS* may make a limited intervention or enter war at the side of HUNGARIA. These are not declarations of war, no Stability is lost and no reinforcements are rolled.</p> <p><b>A.1.b</b> Once the condition is met, TUR may not sign peace with HUNGARIA this turn.</p> <p><b>A.1.c</b> On the next turn, this event is considered to be the first event rolled.</p> <div>B Peace Phase</div> <p><b>B.1</b> Note that this happens the turn the event is resolved, <i>i.e.</i> one turn after TUR causes the Downfall. Thus, there is always at least one full turn during witch AUS* and POL may try and defend HUNGARIA.</p> <p><b>B.2</b> HUNGARIA is destroyed. Its remaining provinces are given as follows:</p> <p><b>B.2.a</b> <b>Pécs, Croatie, Magyarország, Kárpátok, Bukovina</b> are annexed by whoever controls militarily the province among TUR, AUS* and POL (the presence of stack with <math>\Delta\oplus</math> in a province with fortresses of an allied collapsing HUNGARIA gives control to the leader of this stack). Those controlled by HUNGARIA at the end are annexed by AUS*. (These provinces have no extra shield)</p> <p><b>B.2.b</b> <b>Szlovákia, Balaton, Carniola and Kapela</b> are annexed by AUS* (and nobody gains the VP). (These provinces have a blurred Austrian shield reminder)</p> <p><b>B.2.c</b> <b>Banat, Serbia and Bosna</b> (if owned by HUNGARIA or Neutral) are annexed by TUR. (These provinces have a blurred Turkish shield reminder)</p> <p><b>B.2.d</b> A minor country TRANSILVANIA is created, composed from the remaining provinces of HUNGARIA: likely, <b>Erdély</b> and <b>Mures</b> (These provinces have a blurred Transylvanian shield) plus any province that HUNGARIA may have annexed since the beginning of the game. This country is created as a special VA of whoever got <b>Magyarország</b> during the partition.</p> <p><b>B.2.e</b> Excepted for some provinces annexed by AUS*, the usual VP are given.</p> <p><b>B.3</b> If a power controls provinces given to another power, it may declare now a war with a CB, or its troops withdraw (as per peace evacuation).</p> <p><b>B.4</b> TRANSILVANIA [BLP] For the rest of the game, TRANSILVANIA is a special VA of the owner of <b>Magyarország</b>.</p> <p><b>B.4.a</b> As soon as this province changes owner, the new owner immediately becomes the Diplomatic patron of TRANSILVANIA.</p>	<div>[E]373</div> <div>Political Events of Period I— master – 2016-04-14</div> <p><b>B.4.b</b> No diplomacy is allowed on TRANSILVANIA. It is not subject to Diplomatic events.</p> <p><b>B.5</b> The limited interventions of AUS* and POL (if any) end immediately.</p> <p><b>B.5.a</b> However, if AUS* chose to enter war, a formal peace treaty must be obtained at this turn or another one, as usual.</p> <div>C Lasting Effects</div> <p><b>C.1</b> The basic forces of AUS* are increased by an <math>\Delta\ominus</math>.</p> <p><b>C.2</b> HUNGARIA may reappear as a "liege" country of AUS* or HIS (see section XIV.10.2 (Autonomous Habsburg States)).</p> <p><b>C.3</b> If AUS* controls at least 7 provinces of HUNGARIA, it may use the counters of HUNGARIA.</p> <p><b>C.4</b> All future Hungarian leaders are now given to AUS*.</p> <p><b>C.5</b> [BLP] <math>\S B</math> (The Little war and The Long war) of section XIV.13.4.3 (Bohemia, Hungaria and Transilvania) is now active.</p> <div>I-F HABSBURG CONTROL OF MILANO RistoMod</div> <p><i>Date: around 1520.</i></p> <div>A Activation:</div> <p>Activated by event I-7 (1) (Habsburg Dynastic Action) or dynastic action <b>B-2</b></p> <p><b>A.1</b> If LOMBARDIA is now at war, AUS* have a free CB to join the war on the side of LOMBARDIA. The rest of the event is activated when the CB is used.</p> <p><b>A.2</b> If AUS* is not allied yet to HIS, it uses the CB of the event as soon as it is not active elsewhere.</p> <div>B Event Phase</div> <p><b>B.1</b> LOMBARDIA becomes a permanent VA of AUS*. LOMBARDIA and AUS* are from now on one entity for wars and peaces.</p> <p><b>B.2</b> If the province <b>Lombardia</b> is french, a <b>Revolt</b><math>\ominus</math> is placed herein and AUS* have a free CB this or the following turn against FRA.</p> <div>C Lasting Effects</div> <p><b>C.1</b> dynastic action <b>C-2</b> is now possible.</p> <div>I-G SPANISH MILANO RistoMod</div> <p><i>Date: around 1560.</i></p> <div>A Activation:</div> <p>Activated by dynastic action <b>C-2</b></p> <div>B Event Phase</div> <p><b>B.1</b> HIS annexes <b>Lombardia</b> if this province is in LOMBARDIA (whether a permanent VA of AUS* or not) or owned by AUS*. The minor country LOMBARDIA exists no more.</p> <p><b>B.2</b> If <b>Lombardia</b> is owned by another country, a <b>Revolt</b><math>\ominus</math> is placed herein and HIS and AUS* have free CB this or the following turn against this country.</p> <div>C Lasting Effects</div> <p><b>C.1</b> HIS can now raise troops in <b>Lombardia</b> if it controls it, with normal cost.</p> <p><b>C.2</b> HIS can recreate LOMBARDIA as a "liege" country (see section XIV.10.2 (Autonomous Habsburg States)).</p> <div>I-H SECULARISATION OF D.S.M. THEUTONICORUM PB</div> <p><i>Date: 1525.</i></p> <div>A Activation:</div> <p>Activated by event I-8 (2) (Growth of the Reformation) or event III-8 (Secularisation of Fratres Militiae Christi), whichever occurs first</p>
---	--

**B Event Phase**

**B.1** D.S.M. THEUTONICORUM, part of minor country FRATRES MILITIAE CHRISTI become Protestant. All units from any country in **Preußen**, **Hinterpommern** and **Vorpommern** have to retreat when those provinces are annexed by another country.

**B.2** The province **Preußen** become part of *DUCHY OF PRUSSIA*.

**B.2.a** If POL is Catholic/Conciliatory, it annexes the province if owned by FRATRES MILITIAE CHRISTI, or has a CB against its owner until the end of the Period.

**B.2.b** Else, *DUCHY OF PRUSSIA* is annexed by BRANDENBURGUM, and **Preußen** become part of BRANDENBURGUM. If this province is owned by any other country than FRATRES MILITIAE CHRISTI, this country has a CB against BRANDENBURGUM.

**B.3** The provinces **Hinterpommern** and **Vorpommern** are annexed by HANSA if owned by FRATRES MILITIAE CHRISTI.

**B.3.a** If one or the two provinces are owned by any country except POL, HANSA declares war to this country. POL may (his choice) have HANSA placed in MA before usual calls for help is made, in which case HANSA calls it to his help. Else, usual rules are used.

**B.3.b** Else, if one or the two provinces are owned by POL, HANSA declares war to POL and BRANDENBURGUM too, allied with HANSA.

**B.3.c** If a war results of this event, only HANSA can annex the 2 provinces.

**B.4** The minor country FRATRES MILITIAE CHRISTI (now Livonian Brothers of the sword) loses one Ⓐ counter, and its basic forces are diminished by one Ⓐ⊕.

**C Peace Phase**

**C.1** If a war is prosecuted between minor countries only, it lasts one turn and the side of BRANDENBURGUM wins (gaining the provinces).

**I-I SPANISH NAPLES PB**

*Date: 1497 – The Spanish rulers decide to take direct control of the kingdom of Naples.*

**A Activation:**

Activated by dynastic action A-3, or at the turn following event I-3 (1) (Wars in Italy (Napoli)), whichever occurs first.

**B Event Phase**

**B.1** HIS gains a permanent CB against SICILIAE (even if on his own diplomatic track), and also against any owner of a national province of SICILIAE.

**C Diplomatic Phase**

**C.1** When HIS declares a war against SICILIAE, FRA has a CB at this turn only in a reaction to declare a war jointly to HIS and SICILIAE.

**C.2** HIS may also annex the country by diplomatic means.

**D Peace Phase**

**D.1** Any province of SICILIAE controlled by HIS at the end of a turn is immediately annexed without need for peace. If it was the last province of SICILIAE, the country is destroyed. When Napoli is annexed by HIS, remaining provinces of SICILIAE surrender now, are annexed by HIS and the country is destroyed.

**D.2** In period II, if HIS has SICILIAE in diplomatic AN, the minor country is destroyed and permanently annexed by HIS.

**D.3** HIS loses the CB given by this event as soon as it owns every national province of SICILIAE.

**E Lasting Effects**

**E.1** As long as HIS owns **Campania**, it gains a free maintenance of one Ⓕ⊖, in period II, III and IV.

**E.2** HIS can recreate SICILIAE as a "liege" country (see section XIV.10.2 (Autonomous Habsburg States)).

# Political Events of Period II

## Chapter XVIII

**Event Table of Period II**

- A** Mogolis Imp. Expansions ..... many times  
**B** Call for Crusade ..... many times

<div data-bbox="114 90 1117 167"> <div>[E]376</div> <div>Political Events of Period II</div> </div> <div data-bbox="114 167 1117 1380"> <div> <div>II-1 (1) ACT OF SUPREMACY</div> <div>Risto</div> </div> <div>Date: 1534, 1539.</div> <div>A Condition:</div> <p>Takes place when rolled for, or when <b>Henry VIII</b> dies. May not happen before <b>Henry VIII</b>.</p> <div>B Event Phase</div> <p><b>B.1</b> [BLP] ANG may not place occupations in France anymore. If ANG and FRA are at war, replace any English occupation on French territory by control. If they are at peace, remove these.</p> <p><b>B.2</b> ANG has to choose its Heir, in accordance with its current religion.</p> <p><i>B.2.a Catholic/No Reform</i> Mary I Tudor, or Edward VI</p> <p><i>B.2.b Catholic/Counter-Reformation</i> Mary I Tudor, or Edward VI</p> <p><i>B.2.c Catholic/Conciliatory</i> Edward VI or Jane Grey</p> <p><i>B.2.d Protestant/Puritan</i> Jane Grey</p> <p><b>B.3</b> When the chosen heir ascend throne, apply the following effects, depending on the heir.</p> <p><b>B.4 Marie I Tudor</b> ANG is forced to be Catholic/Counter-Reformation. If it has changed, both general and particular effects of event I-8 (2) (Growth of the Reformation) are applied immediately.</p> <p><i>B.4.a</i> ANG has a mandatory Dynastic (Defensive and Offensive) Alliance with HIS for 3 turns. If at war, HIS and ANG make an immediate white peace.</p> <p><i>B.4.b</i> Roll for 2 <b>Revolt</b> in ANG in the table, using 1d10-2 for localisation.</p> <p><b>B.5 Lady Jane Grey</b> ANG is forced to be Protestant/Puritan. If it has changed, both general and particular effects of event I-8 (2) (Growth of the Reformation) are applied immediately.</p> <p><i>B.5.a</i> Alliance between ANG and HIS are forbidden for 3 turns.</p> <p><i>B.5.b</i> All Catholic/Counter-Reformation MAJ and also POR and VEN receive a temporary CB against ANG.</p> <p><i>B.5.c</i> Roll for 2 <b>Revolt</b> in ANG in the table, using 1d10+3 for localisation.</p> <p><b>B.6 Edward VI</b> ANG must choose freely its Religious Attitude. If it has changed, both general and particular effects of event I-8 (2) (Growth of the Reformation) are applied immediately. If it is now Catholic/Conciliatory, Edward VI (and truly also Mary I) will reign at most 2 turns. (Note: determine values at random, Edward VI may also die, but its successor will last only the second turn).</p> <p><i>B.6.a</i> At the beginning of the second turn, roll for 2 <b>Revolt</b> in ANG in the table, using 1d10-2 for localisation.</p> <p><b>B.7 After Edward VI: Elizabeth or Mary</b> At the beginning of the third turn, ANG may opt immediately to choose between two possibilities:</p> <p><i>B.7.a Mary Stuart</i> ANG chooses to remain Catholic/Conciliatory, in which case none of the effects described underneath are applied. Instead, ANG loses 1 in Stability (for having to face humiliation from the Pope).</p> <p><i>B.7.b "Elizabethan Settlement"</i> ANG becomes Protestant/Anglican, that is Protestant as defined in event I-8 (2) (Growth of the Reformation). Both general and particular effects of the event are applied immediately. The only difference between Anglicanism and Protestantism is relative to the Religious and Civil Wars of ANG.</p> <p><i>B.7.c</i> The Monarch of ANG is now <b>Elisabeth I</b>.</p> <p><i>B.7.d</i> ANG receives 250 ₧ in its Treasury.</p> <p><i>B.7.e</i> All Catholic/Counter-Reformation MAJ and also POR and VEN receive a temporary CB against ANG.</p> </div> <div> <div>II-1 (2) WAR WITH SCOTLAND</div> <div>PBNew</div> </div> <div>Date: 1542.</div> <div>A Condition:</div> <p><b>A.1</b> Occurs only if SCOTIA is at present inactive. Otherwise re-roll.</p>
--

<div>[E]378</div> <div>Political Events of Period II</div> <p>C.1.b If FRA refuses the event, it loses <b>2</b> Stability (or none if the current period is III or after) and the rest of the event is ignored.</p> <p>C.1.c If the owner of <b>Lombardia</b> refuses the event, it loses <b>3</b> Stability and gives <b>Lombardia</b> to FRA. Then the rest of the event is ignored. If this province is owned by the AUS*, HIS may refuse the event (and lose the Stability).</p> <p><b>C.2 Milan as a Minor country</b> If <b>Lombardia</b> is owned by the Minor country LOMBARDIA, AUS* have a free CB in reaction to a Declaration of War of FRA against this country. LOMBARDIA is moved up to EW on the diplomacy track of AUS* if it was not already on a higher position.</p> <p><b>C.3 Diplomatic effects of the wars</b> FRA has a bonus of <b>+2</b> for its diplomacy on TOSCANA and <b>-1</b> for SANCTA SEDES and PARMA during the event.</p> <p><b>C.4 The Serenissima in the Wars in Italy</b> This rule is applied only if VEN has announced a <i>Policy of Italian dominance</i>.</p> <p>C.4.a VEN has a CB against FRA and/or the owner of <b>Lombardia</b>, as long as the war is not finished.</p> <p>C.4.b During this war, VEN may make limited intervention at the side of any involved alliance each turn. Such limited intervention can begin at any turn (not only the first) and VEN can change side between turns. VEN may force any Italian MIN in limited intervention for the enemy alliance, to be fully involved in the war.</p> <p>C.4.c Conversely, FRA and AUS* both have a (normal) CB against VEN, to be used at any turn of the war.</p> <p><b>C.5 Swiss Mercenaries</b> If LOMBARDIA is a vassal or a possession of AUS* (according to event I-F (Habsburg Control of Milano)), AUS* gain HELVETIA in EC.</p> <div>D Movement Phases</div> <p><b>D.1</b> SABAUDIA gives free access and supply in its province to FRA during the first turn of the war, if it stays neutral in this war. Supply from or across a province is impossible if its city is under siege by an enemy of this city.</p> <div>E Lasting Effects</div> <p><b>E.1</b> Until the end of the current period, FRA has a CB against the owner of <b>Lombardia</b>.</p> <div>II-4 END OF THE UNION OF KALMAR Risto</div> <p><i>Date: 1523.</i></p> <div>A Event Phase</div> <p><b>A.1</b> The effect of specific §B (Union of Kalmar) of section XIV.7.1 (Suecia as a Minor Country) is terminated.</p> <p><b>A.2</b> Because of troubles between DANIA and SUECIA, both countries make mandatory white peaces, lowers the European market by 75 <math>\text{⌘}</math> this turn for everyone.</p> <p><b>A.3</b> If SUE is a MAJ, roll for 2 <i>Revolt</i> in SUE and SUE loses <b>1</b> Stability.</p> <div>II-5 WAR BETWEEN PERSIA AND TURKEY (×2) Risto</div> <p><i>Date: 1526-1555.</i></p> <div>A Condition:</div> <p>Takes place only if PERSIA is inactive. Otherwise re-roll.</p> <div>B Event Phase</div> <p><b>B.1</b> PERSIA declares war against TUR.</p> <p><b>B.2</b> PERSIA and TUR can immediately call allies as per normal rules.</p> <p><b>B.3</b> If PERSIA is neutral, it does not call any ally and is played by HIS.</p> <div>C Administrative Phase</div> <p><b>C.1</b> PERSIA receives reinforcements on offensive status for the duration of this war.</p>	<div>Political Events of Period II— master – 2016-04-14</div> <div>[E]379</div> <div>II-6 (1) TURKISH VASSALISATION OF ALGERIA Risto</div> <div>A Condition:</div> <p>[BLP] Apply event I-9 (Turkish Dynamism)</p> <div>II-6 (2) ALIGNMENT OF BARBARESQUES Risto</div> <div>A Condition:</div> <p>[BLP] Apply event I-9 (Turkish Dynamism)</p> <div>II-7 WAR BETWEEN POLAND AND TURKEY PB</div> <p><i>Date: 1526-1535 – it was not a formal war.</i></p> <div>A Condition:</div> <p>Turkey may refuse the event, in which case it is not marked and no event is re-rolled for. If the event is not refused, apply the following</p> <div>B Diplomatic Phase</div> <p><b>B.1</b> TUR has a bonus of <b>+2</b> on diplomatic actions on minor countries MOLDAVIA, WALACHIA and TRANSILVANIA.</p> <p><b>B.2</b> TUR has a free CB to be used at this turn of the following one against POL if it has a province adjacent to this country, or a minor country in MA at least, that is adjacent to POL.</p> <p><b>B.3</b> If TUR is at war with POL, any minor country adjacent to POL that is in MA or higher of TUR will join full war against POL without test, and so is placed in EW.</p> <div>C Administrative Phase</div> <p><b>C.1</b> If there is a Polish UKRAINA, POL gains a free <math>\text{⌘}</math> to fill the Ukrainian army at each turn of the war.</p> <div>II-8 REFORMATION (×3) Risto</div> <p><i>Date: 1522-1560.</i></p> <div>A Condition:</div> <p>This event is the same as in period I and continues the effects, provoking either event I-8 (1) (Reformation), event I-8 (2) (Growth of the Reformation) or event I-8 (3) (Intensification of the Reformation).</p> <div>II-9 WAR OF THE SCHMALKALDIC LEAGUE RistoMod</div> <p><i>Date: 1546-1547.</i></p> <div>A Condition:</div> <p><b>A.1</b> If event I-8 (1) (Reformation) has not yet occurred once, do not mark off and re-roll.</p> <p><b>A.2</b> This event cease with the breaking of the League as described in the event or in event IV-A (Thirty Years' War).</p> <div>B Event Phase</div> <p><b>B.1</b> The following countries form a defensive league: HASSIA, SAXONIA, TURINGIA and WIRTENBERGA. They are considered as one country for declaration of wars, and one alliance for peace terms.</p> <p><b>B.2</b> The Emperor loses diplomatic control of all countries of the League and can no longer make diplomatic actions on them. Those countries leaves GE if there is one.</p> <div>C Diplomatic Phase</div> <p><b>C.1</b> The Emperor has a permanent CB against the League. This CB is free if the Emperor is the Sole Defender of Catholic Faith (XIV.14.3.1) (free CB also if the AUS* are Emperors for the Austrian branch and Sole Defender of Catholic Faith (XIV.14.3.1) for the Spanish branch). A war against any country of the League is called a war against the League; it is a <i>war of Religion</i> (so external intervention is constrained).</p> <p>C.1.a HIS may ask for limited or full intervention of the AUS* in this war.</p>
---	---

<div>[E]380</div> <div>Political Events of Period II</div> <p><b>C.2</b> The Emperor may grant the <i>Truce of Augsburg</i> regarding the liberty of belief in the HRE. Such a decision costs <b>1</b> Stability and 20 VP.</p> <p><b>C.3</b> When a war against the League occurs, the minor countries are allied for any purposes and are played by the first major player in the list that is not at war against any country of the League: HOL, ANG if Protestant, FRA if Protestant, POL if Protestant, SUE (if Protestant and period III+), HIS, ANG, FRA, POL if not. This power is called for as an ally of the League, but may refuse at no cost. The League plays at the same round of the player who plays it (whether involved in the war or not).</p> <p><b>C.4</b> Any Major Country having one of the minor countries in the League on its diplomatic chart can make a limited intervention against the Emperor, as an ally of the League.</p> <div>D Peace Phase</div> <p><b>D.1</b> If the Emperor is Spanish or Habsburg, a test to begin the event IV-A (Thirty Years' War) is made at the end of each turn of any war between the League and the Emperor. This test is modified by <b>+4</b>. See event IV-A (Thirty Years' War) for the result of the test and the possibility of this Religious War. If no such war occurs, peace can be made on the following conditions.</p> <p><b>D.2</b> Each minor country obeys to the usual rules for peace (except that it is not possible to annex provinces of minors during this war). As they are allied, a peace against only one country is a separate peace.</p> <p><b>D.3</b> A minor country forced to sign an unconditional surrender breaks from the League for ever. This replace all the peace conditions.</p> <p><b>D.4</b> The League may be dissolved under the following conditions:</p> <p><i>D.4.a</i> the last country in the League is forced out, or</p> <p><i>D.4.b</i> HASSIA or SAXONIA has been forced out of the League and the Emperor has granted, or grants immediately the Truce of Augsburg (at the cost of <b>1</b> Stability and 20 VP).</p> <p><b>D.5</b> If the League is dissolved without the Truce of Augsburg, HIS keeps the title of Emperor for one more monarch.</p> <p><i>D.5.a</i> If the Emperor is from HIS or AUS*, and has made a war against the League and suffered a Major Defeat against land forces of the League, it can decide at the phase of peace to become Catholic/Conciliatory as in event I-8 (2) (Growth of the Reformation). The war ends immediately in a white peace and the application of the Truce of Augsburg in the HRE. Both general and specific events of event I-8 (2) will be applied to HIS at the following event phase.</p> <div>E Lasting Effects</div> <p><b>E.1</b> The countries of the Schmalkaldic League will join some wars caused by events: IV-A (Thirty Years' War), IV-1 (2) (Revocation of the Truce of Augsburg), and IV-2 (2) (War for the Unity of the HRE). The League may reinforce the intervention of PALATINATUS in event III-11 (Wars of Religion in France). The League exists no more when involved in the event IV-A (Thirty Years' War).</p> <div>II-10 WAR IN THE INDIAN OCEAN PB</div> <p><i>Date: 1536-1538 / 1546.</i></p> <div>A Condition:</div> <p><b>A.1</b> If a Treaty is militarily enforced between POR and AYMAN or/and ADEN, apply Revolt of Oman/Aden (§α) for this (or these) countries.</p> <p><b>A.2</b> If no Treaty is enforced, apply War with Oman/Aden (§β) against this (or these) MIN. Both a Revolt and a War can occur (against different countries).</p> <div>α Revolt of Oman/Aden</div> <div>α-B Diplomatic Phase</div> <p><b>α-B.1</b> TUR has an overseas CB against POR at this turn. TUR gains the discoveries of <b>Côte de Mascate</b> and <b>Golfe de Kutch</b></p> <div>α-C Administrative Phase</div>	<div>Political Events of Period II— master – 2016-04-14</div> <div>[E]381</div> <p>POR does not get the incomes (exotic resources) from the revolted countries.</p> <div>α-D Military Phase</div> <p><b>α-D.1</b> The Natives of the region <b>OMAN</b> or <b>ADEN</b> are activated and will attack units of POR at this turn. They will not attack Turkish forces this turn.</p> <div>α-E Interphase</div> <p><b>α-E.1</b> If the attack of the colony by the Natives at the end of turn result in at least 1 level of COL that should be lost, those levels are not applied to the COL of AYMAN or/and ADEN but break the Treaty status of the country with POR (they now have No Relation and Portuguese forces are redeployed immediately).</p> <p><b>α-E.2</b> If AYMAN or/and ADEN breaks free from a Treaty with POR and TUR is at war with POR, TUR gains a Treaty with this (these) MIN.</p> <div>β War with Oman/Aden</div> <div>β-F Event Phase</div> <p><b>β-F.1</b> AYMAN or/and ADEN declare(s) an oversea war to POR. If both are at war, they are allied.</p> <p><b>β-F.2</b> TUR has an oversea CB against POR at this turn, to enter the war as an ally of AYMAN or/and ADEN and it gains the discoveries of <b>Côte de Mascate</b> and <b>Golfe de Kutch</b>. If the CB is used, TUR gains a Treaty with AYMAN or/and ADEN.</p> <div>β-G Administrative Phase</div> <p><b>β-G.1</b> AYMAN or/and ADEN at war receive(s) Naval Reinforcement at the first turn of the war.</p> <div>β-H Interphase</div> <p><b>β-H.1</b> If AYMAN or/and ADEN occupy a TP of POR at the end of the turn, they do not burn it if they have a TP counter available and this TP is transformed in a TP of the minor country. If there is no counter available, the TP is burnt down. The choice of the TP converted is random.</p> <div>II-11 PORTUGUESE COLONIAL DYNAMISM (×3) Risto</div> <div>A Diplomatic Phase</div> <p><b>A.1</b> POR gains a bonus of <b>+3</b> for any diplomatic action on non-European minor countries at this turn.</p> <div>B Administrative Phase</div> <p><b>B.1</b> POR receives one additional and free strong investment TP placement action.</p> <p><b>B.2</b> POR receives a shift of one column to its favour in the actions results table for all its COL/TP placement attempts this turn.</p> <p><b>B.3</b> POR may ignore restriction of section VI.7.4.2 (Pioneering [TBD]) for this turn.</p> <div>II-12 SPANISH COLONIAL DYNAMISM (×3) Risto</div> <div>A Diplomatic Phase</div> <p><b>A.1</b> HIS gains a bonus of <b>+3</b> for any diplomatic action on non-European minor countries at this turn.</p> <div>B Administrative Phase</div> <p><b>B.1</b> HIS receives one additional and free strong investment COL placement action.</p> <p><b>B.2</b> HIS receives a shift of one column in its favour in the actions results table for all its COL/TP placement attempts this turn.</p> <p><b>B.3</b> HIS may ignore restriction of section VI.7.4.2 (Pioneering [TBD]) for this turn.</p> <div>II-13 UNION OF LUBLIN PB</div> <p><i>Date: 1568.</i></p> <div>A Condition:</div>
--	--

If POL is Protestant or has chosen Support of Orthodoxes, the union is impossible. Mark off the case and play R/D instead, with the *Revolt* in POL.

**B Activation:**

**B.1** The rest of the event is activated when POL decides to sign the Union. That is to be announced at any current or following phase of declaration.

**C Diplomatic Phase**

**C.1** Both countries in POL are linked by an Union. All effects described in §A of section XIV.3.2.2 (The Union of Lublin) are applied no more and the new conditions are described in §B (Union of Lublin.) of section XIV.3.2.2 (The Union of Lublin).

**C.2** If POL is not at war against any Major Power at the time of the Union, play two *Revolt* in POL. If it is at war against a Major Power, do not draw any *Revolt*.

**C.3** RUS and SUE has a CB against POL at the turn of declaration of the Union.

**D Lasting Effects**

**D.1** The Union of Lublin can be broken if someone imposes a peace of level at least 3 on POL, and this counts as the gain of 2 provinces (or their equivalent in War Reparation) for the terms of peace.

**II-14 RUSSIAN CONQUEST OF THE KHANATES PB**

*Date: Kazan 1547-1552.*

**A Activation:**

RUS may refuse this event, in which case it is not marked but no other event is rolled for.

**B Event Phase**

**B.1** If event I-11 (2) (Russian Annexation of Pskov and Ryazan) has not been played, it is played as an additional event this turn.

**B.2** Else, or on a second occurrence of the event, apply the following effect.

**C Diplomatic Phase**

**C.1** RUS has a free CB against a Khanate of its choice at this turn only.

**D Peace Phase**

**D.1** This Khanate will surrender unconditionally and will be entirely annexed by RUS if RUS controls its capital and half of the provinces of the Khanate.

**II-15 RUSSIAN SUPERIORITY OVER THE KHANATES PB**

*Date: Astrakhan 1554-1556.*

**A Activation:**

RUS may refuse this event, in which case it is not marked but no other event is rolled for.

**B Event Phase**

**B.1** RUS advances its *Land Technology* marker of 3 boxes. This event might place the Land Technology of RUS higher than *Orthodox Land Technology*. This is allowed and the marker stays in place until the *Orthodox Land Technology* becomes higher than the one of RUS, in which case RUS can resume its progression.

**C Diplomatic Phase**

**C.1** RUS has a free CB against a Khanate of its choice at this turn only.

**D Peace Phase**

**D.1** This Khanate will surrender unconditionally and will be entirely annexed by RUS if RUS controls its capital and half of the provinces of the Khanate.

**II-16 WAR BETWEEN RUSSIA AND POLAND PB**

*Date: 1507-1522 / 1534-1537.*

**A Condition:**

If RUS and POL are already at war against each other, mark off the case and play R/D instead.

**B Event Phase**

**B.1** RUS has a temporary CB against POL and POL has a temporary CB against RUS. Those CB may be used this turn or the following turn. If a power does not use, it loses 1 Stability on the second turn.

**II-17 WAR BETWEEN RUSSIA AND TURKEY PB**

*Date: Crimea 1521-1523, 1559, 1572.*

**A Activation:**

RUS has the control of this event.

**B Diplomatic Phase**

**B.1** RUS has a free CB against a Khanate of its choice at this turn only.

**B.2** If this CB is used, the attacked country is placed at least in MA of TUR that has now the opportunity to enter war to support the minor country or not.

**C Peace Phase**

**C.1** This Khanate will surrender unconditionally and will be entirely annexed by RUS if RUS controls its capital and half of the provinces of the Khanate.

**C.2** If TUR did not enter the war to support the Khanate and it is destroyed as a result of this war, TUR has a free CB against RUS the turn following the conquest.

**II-18 FORWARD TO THE BALTIC SEA PB**

*Date: 1558-1561.*

**A Condition:**

**A.1** If the FRATRES MILITIAE CHRISTI do not exist any more (either by conquest or by event event III-8 (Secularisation of Fratres Militiae Christi)), mark off and play R/D instead.

**A.2** If RUS has no province adjacent to the FRATRES MILITIAE CHRISTI, do not mark off and roll for another event.

**B Event Phase**

**B.1** RUS has a free CB against the FRATRES MILITIAE CHRISTI.

**C Administrative Phase**

**C.1** The FRATRES MILITIAE CHRISTI take their reinforcements in offensive attitude during the first turn of the conflict.

**D Peace Phase**

**D.1** Before testing for any peace, 1d10 is rolled, modified by the peace differential of RUS against the FRATRES MILITIAE CHRISTI. If the result is 6 or more, the FRATRES MILITIAE CHRISTI collapse and no peace occurs now. At the following event phase, the first event considered rolled for is automatically event III-8 (Secularisation of Fratres Militiae Christi).

**II-19 RESISTANCE OF THE AMERICAN EMPIRES (×2) PB**

*Date: not historic.*

**A Condition:**

**A.1** If there is no COL in *AMERICA* (excepted the islands) do not mark off and re-roll.

**A.2** If both empire have already collapsed, play R/D instead of this event and mark off.

**A.3** Else, INCA or AZTECA (decide randomly, or take the one that did not collapse), is affected by the following event.

### B Event Phase

**B.1** The permanent Treaty of this empire with European countries is nullified. From now on, it is dealt with as a normal non-European country.

**B.2** The technology of both INCA and AZTECA raise to the technology of CHINA and other countries of ROTW.

**B.3** Both empires can still be destroyed by capturing their capital city if the invading forces survive an attack by Natives at the end of turn. The normal rules are then applied: creation of a COL of level 3, destruction of the minor country, reduction to 2 LD of the force of Natives in every province of the region; if the conqueror is HIS, a Mission is installed in the new COL and the highest rank Conquistador present in the region is nominated as Vice-Roy.

## II-20 CHINESE OVERSEA EXPANSION PBNew

*Date: abandoned before 1492.*

### A Condition:

**A.1** If event I-15 (Chinese Expeditions) was not played, play this event and mark off the present one.

**A.2** If event I-15 (Chinese Expeditions) has been played, play the remaining of this event.

### B Event Phase

**B.1** CHINA installs one new TP of level 1 in **FORMOSE** and one in **PHILIPPINES** if there is any province still empty, with 1 LD on each one. It takes the exploitation of one Products of Orient (without concurrence; a Major Power will have to make proper Concurrence to take them back).

**B.2** If CHINA has lost some TP since event I-15 (Chinese Expeditions), it declares an overseas war to any European country having a TP or COL in the same region as any lost TP. If it has lost none, it declares an Overseas War to any European power having a TP in **FORMOSE** or **PHILIPPINES**.

### C Military Phase

**C.1** If CHINA is at war due to this event, it adds one  $\Delta\oplus$  to its basic forces, as an invasion force with a general from the minor pool. Its reinforcements are increased in this war by LD and ND. It can of course use its usual basic forces and reinforcements, and the Natives in CHINA.

### D Peace Phase

**D.1** If CHINA controls a foreign TP at the end of the military turn, they do not burn it if they have a TP counter available and this TP is transformed in a Chinese TP. If there is no counter available, the TP is burnt down. The choice of the TP that are converted is random if there is not enough counters.

**D.2** On the first turn of this war (only), CHINA does not accept automatically a white peace. A formal peace should be obtained.

## II-21 APPARITION OF THE MUGHAL EMPIRE ( $\times 2$ ) PBNew

*Date: 1526-1555.*

### A Event Phase

**A.1** On the first event, the non-European minor country MOGOLIS IMP. is created. It has 2  $\Delta\oplus$  and the leader *Great Mughal* (until replaced by a further event).

**A.2** The MOGOLIS IMP. will try to invade 2 regions during the turn, following the procedure event II-A (Mogolis Imp. Expansions) described underneath.

**A.3** Even if the country does gain no region, it still exists (and can gain provinces with new events).

## II-A MOGOLIS IMP. EXPANSIONS ( $\times *$ ) PBNew

### A Activation:

When a this event is called for by an event.

### B Event Phase

**B.1** The MOGOLIS IMP. will try to invade the regions in (or near) India in the following order: **DELLĪ**, **AFGHANISTAN**, **AYODHYĀ**, **BĀNGLĀ**, **GUJARAT**, **PĀJĀB**, **INDUS**, **BALOUCHISTAN**, **ORISSĀ**, **GONḌĀNĀ**, **MUMBAĪ**, **HYDĀRABAD**, **MALABĀR**, **KARNĀṬAKA**. A circled number on the map shows this order.

**B.2** Each event will call for a varying number of invasions (between 1 and 4). The province invaded are determined and the invasion resolved in parallel. The provinces are aimed in the following order.

**B.2.a** The regions with the lowest number and no MOGOLIS IMP. **Area** counter in it (so it is not “conquered” or “lost” due to failed invasion or a rebellion) are the first aimed, by an invasion. Note that a failed invasion during one event will force the MOGOLIS IMP. to invade again the same region during the next expansion.

**B.2.b** Then if needed, the regions having a MOGOLIS IMP. **Lost Area** counter and with the lowest number are second to be aimed at, for a new invasion that will have a malus of  $-1$ .

**B.2.c** If there is not enough uncontrolled regions to make all the attempts called for by an event, a test of Rebellion is made in replacement for the remaining actions called for. The regions aimed are those that are conquered and have the highest number. A Rebellion is resolved as a invasion but with  $-1$ .

**B.3** The list of regions invaded is defined globally during the event, and the resolution will wait the end of the turn. The MOGOLIS IMP. is not (technically speaking) at war with countries having TP/COL or regions in the aimed regions. The invasion attempt will be resolved at the end of the military phases. Thus, the expansion does not interfere with other kinds of war that can take place and involve the MOGOLIS IMP..

### C Interphase

#### C.1 European resistance to invasion

**C.1.a** Each country having a TP/COL in a province of an invaded region can choose to oppose or not the Mughal invasion at the end of the military rounds. The Major Powers decide simultaneously. This decision is taken province by province (one can resist somewhere and do nothing somewhere else) and one needs a land stack to resist in a given province. An opposition does not affect the diplomatic status of any power with the MOGOLIS IMP.

**C.1.b** Non-European minor countries do not oppose invasion. European minor countries may oppose if their diplomatic patron decides it. They can use their non-European basic forces for this.

**C.1.c** In each province where invasion is resisted, a land battle is fought between the forces of the European country and the 2  $\Delta\oplus$  of the MOGOLIS IMP. This complete force is used in each battle (assuming that they have plenty of time to muster reserves).

**C.1.d** If the region is not invaded but in Rebellion, the MOGOLIS IMP. use only one  $\Delta\oplus$ .

**C.1.e** The current leader of the MOGOLIS IMP. is used in each battle.

**C.1.f** Depending on the winner of the battle, the invasion test will be modified to improve or lower the chance of conquest by the MOGOLIS IMP.. Note that no resistance is not as bad as a failed resistance.

**C.2 Invasion tests** For each invaded region, a test is made on the following table, by rolling 1d10 added to modifiers.

1d10+mod.	Result	TP/COL Loss
$\leq 1$	1 adjacent province is lost	0
2–4	failed conquest	1
5	failed conquest	2
6–7	conquest	3
8–9	conquest	4
10–11	conquest	4
$\geq 12$	conquest	6

+3 if *Akbar* leads the invasion  
+2 per battle gained in resistance in the region  
-2 per battle lost in resistance in the region  
-1 if the region belongs to a minor country or has a TP of a non-European minor country in it.  
-1 if the region was lost once, or is in Rebellion  
 $\pm?$  modifier called by some events.

Table XVIII.2: Mughal Invasions

<div data-bbox="114 90 1117 124"> <div>[E]386</div> <div>Political Events of Period II</div> </div> <div data-bbox="114 172 1117 544"> <p><b>C.3 Invasion results</b></p> <p>C.3.a <b>Conquest</b> means a successful invasion. Put a counter in the region showing that is now belongs to the MOGOLIS IMP. The first time region <b>BĀNGLĀ</b> is conquered, its resources raise to 2 for each type.</p> <p>C.3.b <b>Failure</b> is just what it means ; the regions is left to its current owner (even in case of a Rebellion).</p> <p>C.3.c On a <b>result of 1 or less</b>, the conquest is failed (or the Revolt successful). One region is lost to the MOGOLIS IMP.; put a MOGOLIS IMP. <b>Lost Area</b> counter in the region (or flip over the counter already therein). The region affected is the first one in the list that is not already lost by MOGOLIS IMP. (we give here only the numbers): 2, 11, 14, 13, 12, 10, 9, 8, 7, 6, 5, 4, 3.</p> <p>C.3.d The <b>Losses</b> for TP/COL are the level lost by each colonial settlement in the conquered province. Each level of fortification in the TP/COL forfeited counts for one of those loses (including permanent fortresses given by cities if there is a COL; the level may be lost, and comes back automatically for the next turn).</p> <p>C.3.e If a minor country (GUZARATE, BISINAGAR, or DURRANIS IMP., MYSURIA, HYDERABADA) loses its last region due to an invasion, it is destroyed immediately. It may reappear later due to new events.</p> </div> <div data-bbox="114 560 1117 600"> <div>II-B CALL FOR CRUSADE (✕*)</div> <div>JymMod</div> </div> <div data-bbox="114 616 1117 667"> <p><i>Date:</i> Did not happen.</p> <p><i>Duration:</i> Until the end of the war.</p> </div> <div data-bbox="114 671 1117 727"> <div>A Condition:</div> <p>May be triggered by TUR conquest of christian provinces.</p> </div> <div data-bbox="114 732 1117 759"> <div>B Event Phase</div> </div> <div data-bbox="114 764 1117 876"> <p><b>B.1 Call to crusade</b> Each Catholic country has a mandatory free CB against TUR to be used immediately.</p> <p>B.1.a As an exception, the Sole Defender of Catholic Faith (XIV.14.3.1) must decide first to use it or not. Then, these CB are resolved in initiative order.</p> <p>B.1.b All countries that use this CB are call crusaders and are automatically allied against TUR.</p> </div> <div data-bbox="114 892 1117 1123"> <p><b>B.2 Mediation of the Pope</b> Any Catholic country can immediately propose a white peace to any or all of its current Christian enemies.</p> <p>B.2.a If one or more of these peaces is refused, the free crusade CB is consider to be fulfilled (for the country that asked for the mediation). The would-be crusader is not forced to declare war on TUR or loss Stability.</p> <p>B.2.b Catholic minors always accept this peace. Other minors never accept it (and thus give an “excuse” for not participating).</p> <p>B.2.c If a country does not ask the mediation of the Pope, the fact that it is at war is not an excuse for avoiding the Crusade.</p> </div> <div data-bbox="114 1139 1117 1315"> <p><b>B.3 Refusing to participate</b> Any Catholic country that either refused to participate or rejected the mediation of the Pope suffers from the following effects:</p> <p>B.3.a Loss of 1Stability (2Stability for the Sole Defender of Catholic Faith (XIV.14.3.1)).</p> <p>B.3.b Loss of the diplomatic control of SANCTA SEDES.</p> <p>B.3.c All other Catholic majors have a normal CB against this country this turn.</p> <p><b>B.4</b> If no major country participates in a Crusade, no minor participates either and the rest of the event is ignored.</p> </div> <div data-bbox="114 1319 1117 1347"> <div>C Diplomatic Phase</div> </div> <div data-bbox="114 1351 1117 1511"> <p><b>C.1 Minor Countries and Crusades</b> The following minor countries only: AUS* (if Emperor or HUNGARIA has been inherited), HUNGARIA, SANCTA SEDES, GENUA, ORDO HOSPITALIS, TOSCANA and PARMA always participate in a Crusade.</p> <p>C.1.a If they are on the diplomatic track of a crusader, they are immediately raised in EW (if not already higher).</p> <p>C.1.b Otherwise, they are temporarily put in EW of the first crusader (the first country that declared war on TUR, either the Sole Defender of Catholic Faith (XIV.14.3.1) or the one with higher initiative). They will return back to the Neutral box at the end of the crusade.</p> </div>	<div data-bbox="1122 90 2123 124"> <div>Political Events of Period II— master – 2016-04-14</div> <div>[E]387</div> </div> <div data-bbox="1122 172 2123 228"> <p><b>C.2</b> Other Catholic minors may participate if controlled by the crusader, using the normal rules.</p> <p><b>C.3</b> Protestant, Orthodox and Muslims minors may not participate in a Crusade (even if controlled by a crusader).</p> </div> <div data-bbox="1122 248 2123 392"> <p><b>C.4 HUNGARIA, HABSBURGUM, the HRE.</b></p> <p>C.4.a If the minor HABSBURGUM is the Emperor of the HRE, it participates automatically in the Crusade if at least one provinces of either HABSBURGUM, HRE or HUNGARIA is owned by TUR.</p> <p>C.4.b HUNGARIA automatically participates in the Crusade on a die roll of 8 or more. This roll is modified by <b>+1</b> for each province of HUNGARIA owned by TUR.</p> </div> <div data-bbox="1122 413 2123 580"> <p><b>C.5 Endorsement of SANCTA SEDES</b> Crusaders receive at the end of each Diplomatic phase a global diplomatic income of 150 ₮, shared equitably between them in divisions of 25 ₮ (the surplus going on the first participant).</p> <p>C.5.a This money is coming from the SANCTA SEDES, so the usual 50 ₮ gift (see §B.2 (The Papal treasury) of section XIV.13.1.1 (Sancta Sedes)) that SANCTA SEDES gives for a MA status is not perceived anymore.</p> <p>C.5.b This is valid during all the length of the current Crusade. At the same time, the modifier value for SUB on SANCTA SEDES becomes -150.</p> </div> <div data-bbox="1122 585 2123 612"> <div>D Administrative Phase</div> </div> <div data-bbox="1122 617 2123 817"> <p><b>D.1 Crusader army</b> The crusaders, whether major or minor, may used the Crusader ⚠ counters to hold troops of any crusader country.</p> <p>D.1.a Whatever the actual content of these counters, they are considered to be of class III and have all the features of this class.</p> <p>D.1.b Track the nationalities of the LD in these ⚠ in order to give them back to their owner.</p> <p>D.1.c Crusader ⚠ may be lead by ✕ of any crusader country, even if it has no LD inside.</p> <p>D.1.d Note that he may well “pick up” troops from other crusaders without their agreement.</p> </div> <div data-bbox="1122 837 2123 949"> <p><b>D.2 Military Leader of the Crusade</b> A ✕ or ⚠ of the first participant player is chosen as leader of the Crusade. For the duration of the Crusade, he is considered to possess the highest hierarchical rank (even above monarchs).</p> <p>D.2.a He is allowed to lead any troops of crusaders countries. He may thus lead a stack with no troops of his own nationality.</p> </div> <div data-bbox="1122 954 2123 981"> <div>E Military Phase</div> </div> <div data-bbox="1122 986 2123 1153"> <p><b>E.1 The way to Crusade</b> crusaders countries automatically give free access to their territory and supply to other crusaders.</p> <p>E.1.a In the rare case where two crusaders are still at war elsewhere, they must choose upon entering enemy territory whether the stack is crusading (and allied) or not. The status of a stack may not change before it exits enemy territory. Crusader stacks still in enemy territory at the end of the Crusade are immediately moved into friendly territory per the peace redeployment procedure.</p> </div> <div data-bbox="1122 1169 2123 1321"> <div>Design note: The following points are meant to force crusaders to really “wage crusade” and not sit and watch. There are undoubtedly loopholes in them that tricky players will find and use to circumvent the Crusade rules. Remember here what the spirit of the rule is: if you’re part of the Crusade, you must really participate in the Crusade. Use good sense and fair play. Do not let a player that really participated in the Crusade be punished by this. Do not let a player that found a loophole to abuse it. Make an homerule if you don’t think this correct.</div> </div> <div data-bbox="1122 1342 2123 1511"> <p><b>E.2 Participating to the crusade</b> At the end of the first military round of each turn of the Crusade, each major crusader country must design one of its stack with at least 3LD or NID (or 6NGID) belonging to it as a “main crusading stack”.</p> <p><b>E.3</b> At the end of each following round, each crusader major country loss 1Stability unless at least one of the following conditions is true.</p> <p>E.3.a All his troops initially in his main crusading stack (they may split) have been destroyed (reinforcing the crusading stack does not prevent the destruction of the initial troops).</p> </div>
---	--

*E.3.b* All his troops initially in the crusading stack moved this round and end up closer to the territory of TUR or its allies.  
*E.3.c* Troops of this country (any troops) have participated this round in at least one battle (land or sea) or siege (besieger or besieged) against TUR or its allies.

*E.3.d* Troops of this country (any troops) are in a province owned by TUR (not its allies).

#### **F Peace Phase**

**F.1 Crusades and Separate Peace** A crusader major country that makes separate peace with TUR undergoes a loss of 3 Stability (instead of the usual 2 for breaking an alliance). This separate peace also gives, in addition, a temporary CB to all the other crusading players against him, valid until the end of the Crusade (instead of the usual next turn only).

*F.1.a* No MIN participating in a Crusade may be tested by the Turkish player for separate peace attempts, except if a MAJ has signed a separate peace with Turkey (including the same turn).

**F.2 Peace conditions** If TUR cedes territory to the crusaders, it must be chosen among the following provinces, in order:

*F.2.a* Any province that were christian in 1492, in reverse order of conquest by TUR (the most recent conquest first) ;

**Moreas, Hellas, Terra Sancta, Lubnān, Alep.**

*F.2.b* Only provinces controlled by crusaders may be chosen.

*F.2.c* These provinces are given back to their 1492 owner (if Christian), even if he did not participate in the Crusade and recreating it if it was destroyed. Provinces initially belonging to a non-Christian country are given to ORDO HOSPITALIS.

*F.2.d* Provinces of the *BALKANS* that are automatically annexed by Christians during a Crusade are also given to ORDO HOSPITALIS.

*F.2.e* Each province that TUR loses during a Crusade give 10VPs to each crusader still at war against TUR.

# Political Events of Period III

## Chapter XIX

### Event Table of Period III

Table XIX.1: Period III events table

- 1 (1) Revolt of the United Provinces
- (2) Vereenigde Oostindische Compagnie
- (3) League of Nassau
- 2 Amsterdam Stock Exchange
- 3 (1) East Indian Company
- (2) End of the Auld Alliance
- 4 (1) Northern Seven Years War
- (2) Oxenstierna
- 5 War between England and Scotland
- 6 Portuguese Disaster in Africa
- 7 Annexation of Portugal by Spain
- 8 Secularisation of Fratres Militiæ Christi
- 9 War between Persia and Turkey ..... α β
- 10 Revolt in Sierra Nevada
- 11 Wars of Religion in France ..... D (1) (2) (3) (4) (5)
- 12 Revolt in Corsica
- 13 Union between Polonia and Suecia
- 14 Union of Lublin
- 15 (1) Oprichnina
- (2) The Time of Troubles in Russia ..... →IV-17 (1)
- 16 War in Siberia

#### General modifiers for the period

For each 4 (complete) turns during which HIS has taxed HOLLANDIA since the beginning of the game (as per §B (The Spanish Tax) of section XIV.10.3.7 (The Spanish Holland)), the second die-roll is modified by -1 until event III-1 (1) (Revolt of the United Provinces) occurs.

- 17 Arkhangelsk and the Muscovy Trade Company
- 18 Persian Safavids ..... E →III-22 (2)
- 19 Revolts in Singala
- 20 The Great Moghol Akbar ..... E E →III-22 (2)
- 21 Wars in India ..... E E
- 22 (1) China colonial attitude ..... E →III-22 (2)
- (2) Sultanate of Aceh
- 23 Japanese Expedition in Chosŏn

#### Out of table events

- A Union between Polonia and Russia .....alt. hist.
- B Religious War in Sweden .....alt. hist.
- C Religious War in Poland .....alt. hist.
- D Religious Wars in France
- D (1) The first 3 Wars of Religion
- (2) The Saint-Barthelemy
- (3) The Rise and Fall of the League
- (4) War of Succession
- (5) Last Stand of the Heretics
- (Final) End of the Wars of Religion

<div>[E]390</div> <div>Political Events of Period III</div> <div>III-1 (1) REVOLT OF THE UNITED PROVINCES RistoMod</div> <div>Date: 1568-1609.</div> <div>A Condition:</div> <div>For each occurrence of this event, check the effect here.</div> <div>A.1 Can only occur after the beginning of period III, unless PRIMA HOLLANDIA exists. Otherwise re-roll and do not mark off.</div> <div>A.1.a This event triggers the Growth of the Reformation (I-8 (2)) if it has not yet occurred or the Intensification of the Reformation (I-8 (3)) if the second Reformation event had occurred and not the third.</div> <div>A.1.b If PRIMA HOLLANDIA exists, the Revolt is triggered immediately (either First Revolt against the Spanish Crown (§α) or Subsequent Revolts (§γ)).</div> <div>A.1.c If HOL is a major country, apply event III-1 (2) (Vereenigde Oostindische Compagnie) the second time, and event III-1 (3) (League of Nassau) the third time.</div> <div>A.1.d If minor HOLLANDIA exists and is not on Spanish diplomatic track, apply event III-1 (3) (League of Nassau) instead, then event III-1 (2) (Vereenigde Oostindische Compagnie) the third time.</div> <div>A.1.e In all other cases, the Revolt of HOL occurs (possibly again). Keep reading.</div> <div>A.2 Revolt and Spanish religious choice</div> <div>A.2.a If HIS is Catholic/Counter-Reformation, the Revolt is triggered immediately (either First Revolt against the Spanish Crown (§α) or Subsequent Revolts (§γ)).</div> <div>A.2.b If HIS is Catholic/Conciliatory, HIS must refuse or grant <i>Commercial Liberties</i> to HOLLANDIA. A refusal triggers the Revolt as above.</div> <div>A.2.c If HIS gives <i>Commercial Liberties</i> to HOLLANDIA, HIS gains 1 Stability then 1d10 is rolled, added to the following modifiers:</div> <div> <div> <div>+1 for each turn of taxes on HOLLANDIA</div> <div>-2 if the Truce of Augsburg is in effect</div> <div>-1 if ANG is Catholic</div> <div>-1 if Wars of Religion in France (III-11) has occurred at least once and the HUGUENOTIS never had a favourable truce.</div> </div> <div>The result is:</div> <div> <div>≤0 HOLLANDIA becomes a Special VA of HIS</div> <div>1-2 HOLLANDIA becomes a normal minor, initially vassal of HIS</div> <div>3-5 HOLLANDIA becomes a neutral minor</div> <div>≥6 Revolt (either First Revolt against the Spanish Crown (§α) or Subsequent Revolts (§γ)). The War between Holland and Portugal (§β) may also be activated.</div> </div> <div>See §δ (Independence without Revolt)</div> </div> <div>α First Revolt against the Spanish Crown</div> <div>α-B Event Phase</div> <div>α-B.1 The Major country <b>HOLLANDIA</b> (or HOL) is created and [VEN/DAN] changes to this new power according to the rules for the Grand Campaign.</div> <div>α-B.2 HOL owns its national territory: <b>Friesland, Gelderland, Holland, Overijssel, Utrecht, Zeeland</b>, regardless of their last owner. HIS loses 10 VP for each of the provinces now of HOL that were not his just before the event. TERRÆ DEPRESSÆ is dissolved and does not exist anymore.</div> <div>α-B.2.a Former (non-Spanish) owners of those provinces can declare a war against HOL but have no CB.</div> <div>α-B.3 <b>Brabant</b> and <b>Limburg</b> are militarily controlled by HOL, regardless of their owner at the time of event.</div> <div>α-B.3.a If this owner is not HIS, he has the choice to give them to HOL or has to declare a limited intervention immediately, as an ally of HIS in the Religious War; HOL may then freely involve fully this power in the war. Both provinces are valid ground for the war even if the intervention is limited.</div>	<div>Political Events of Period III— master – 2016-04-14</div> <div>[E]391</div> <div>α-B.3.b If the owner was HIS and HIS conceded <i>Commercial Liberties</i> at the beginning of the event, both provinces are now owned by HOL; else they remain Spanish.</div> <div>α-B.4 HIS owns a <i>Præsidio</i> of level 3 in <b>Zeeland</b>.</div> <div>α-B.5 HOL has a Stability of +2, a DTI and a FTI of 3; the technological markers of HOL are placed 1d6 boxes in front of the Latin technology, and 7-1d6 for Naval technology (same roll!) Its initial Royal Treasury is 400 ₧.</div> <div>α-B.6 HOL deploys the following counters: MNU of Instruments in <b>Zeeland</b>, of Cloth in <b>Utrecht</b>, of Metal in <b>Gelderland</b> (all of level 1, level 2 if <i>Commercial Liberties</i> were granted); 1 ⚔, 1 ⚔, 2 LD, and 4 levels of fortification anywhere in owned provinces.</div> <div>α-B.7 The current HOL monarch is <b>Willem I</b> with values 7/9/9. He lasts seven turns and does not check for survival during the first three. He is also a general <i>Willem I</i> (👑 A 3.3.2 -1 [Event III-1]). The government is <i>Stadhouder</i>.</div> <div>α-B.8 HOL knows <b>Mer des Açores</b>, <b>Mer des Canaries</b> and 8 other zones of its choice. Sea zones with malus count as 1+malus zones in this count.</div> <div>α-B.9 All non-Dutch units inside territories held by HOL are removed as per normal peace procedure.</div> <div>α-B.10 HOL is at war with HIS and HIS is considered to be victim of a declaration of war at this turn. No calls for allies are made. This is a Religious Civil War between HOL and HIS (see section IV.5.5.5 (Religious Wars, Civil Wars)).</div> <div>α-B.11 Place a Dutch controlled <i>Revolt</i> in <b>Vlaanderen</b> and <i>Revolt</i> in <b>Flandre</b> and <b>Hainaut</b>.</div> <div>α-C Diplomatic Phase</div> <div>α-C.1 An Armistice will be possible, after the first turn of revolt (this is an exception to the rules on Religious Wars).</div> <div>α-C.2 Usual foreign interventions are permitted. if FRA is involved in event III-11 (Wars of Religion in France), its intervention is restricted as follows.</div> <div>α-C.2.a If FRA is Catholic/Counter-Reformation or Protestant, FRA may only use its own forces (and not those of the heretic minor) to help the side sharing its religion. The French heretic minor country may make a foreign intervention by its own to help the side sharing its religions; this is decided by the MAJ that controls this country when it rebels.</div> <div>α-C.2.b If FRA is Catholic/Conciliatory, it can make a foreign intervention with any side (not both at the same time).</div> <div>α-D Administrative Phase</div> <div>α-D.1 During the first turn of war, HOL can exceed the purchase limits for naval units and buy land forces without any double or triple price multipliers for exceeding the basic allowance.</div> <div>α-D.2 All units bought during the first turn of the war and placed under <b>Willem I</b> become automatically <i>Veterans</i>.</div> <div>α-E Peace Phase</div> <div>α-E.1 This event can terminate in two ways:</div> <div>α-E.1.a HIS conquers all HOL national provinces. In this case HIS has won the war and HOL is no more. [HOL/VEN/DAN] player has to wait for another opportunity to play a Major country (according to the rules of the Grand Campaign). All the rules for HOLLANDIA possessed by HIS are applied again. The COL or TP of HOLLANDIA remain and are part of HIS for military aspects, but they can not be improved. The commercial fleets are managed as before the war. The Taxation of Holland is possible anew.</div> <div>α-E.1.b A peace of any kind is made between HIS and HOL. Exceptionally, a peace of level 5 allows the transfer of any number of provinces (3 if the powers do not agree). As an additional condition to normal peace conditions HIS must recognise the independence of HOL after which all normal rules apply and HOL has become an ordinary player country.</div> <div>α-E.2 A peace treaty between HIS and HOL cannot be made during the same turn the revolt event occurred. White peace is not allowed to end this war.</div> <div>α-E.3 Any peace treaty between HIS and HOL entails an enforced peace of 3 consecutive turns between those two countries, that can only be broken by using a CB given by an event. During this period, neither of them can declare war to the other, nor to their respective vassals.</div> <div>α-E.4 After peace has been made between HOL and HIS, HOL can continue harassing Spanish annexed Portugal (see subevent §β (War between Holland and Portugal)) until the end of period IV.</div>
---	---

<div>[E]392</div> <div>Political Events of Period III</div> <p><b>α-E.5</b> During the war between HOL and HIS neither side loses Stability due to the number of turns engaged in war as per normal rules. Instead, for being at war with each other, or with the allies of each other, they lose the following fixed amounts:</p> <p>Period III HIS1 Stability, HOL1 Stability.  Period IV HIS2 Stability, HOL1 Stability.  Period V+ HIS3 Stability, HOL2 Stability.</p> <p><b>α-E.6</b> This applies only to the war between HOL and HIS due to this event and only to HIS and HOL. Other allies involved in this war lose Stability in the usual manner as well as HOL and HIS for non-connected wars.</p> <div>α-F Interphase</div> <p><b>α-F.1</b> HIS receives 5VP each turn that the Independence of HOL is not recognised (the war of Revolt goes on or the Revolt has failed) in period III. This bonus is reduced to 2VP during period IV and terminates in period V. The bonus is given even if the turn was spent in Armistice.</p> <div>β War between Holland and Portugal</div> <div>β-G Condition:</div> <p>If HOL is in Revolt against HIS and PORTUGALLIA has been annexed by HIS according to event III-7 (Annexation of Portugal by Spain), add the following event to a Revolt (first and subsequent ones).</p> <div>β-H Event Phase</div> <p><b>β-H.1</b> PORTUGALLIA and HOL are involved in an Overseas War, as long as the War of Revolt continues between HIS and HOL.</p> <p><b>β-H.2</b> PORTUGALLIA uses its forces as defined in event part III-7.α (Portugal in Annexation) and HIS can help it as they are allied.</p> <div>β-I Diplomatic Phase</div> <p><b>β-I.1</b> An Armistice in the war between HIS and HOL does not imply an Armistice between minor PORTUGALLIA and HOL.</p> <div>β-J Administrative Phase</div> <p><b>β-J.1</b> All COL and TP of POR occupied by HOL give all their revenue to HOL (and none to HIS) as if owned.</p> <div>β-K Interphase</div> <p><b>β-K.1</b> All TP⊖ of POR occupied by HOL can be replaced by HOL TP with 1 level less.</p> <p><b>β-K.2</b> Portuguese TP may not be annexed in this way or burnt by HOL at the turn where HIS recognises the Independence of HOL (but see afterwards).</p> <div>β-L Peace Phase</div> <p><b>β-L.1</b> This war terminates at the end of period IV, or if HOL is conquered or recognised by HIS or if minor PORTUGALLIA breaks free from HIS. In the latter case, HOL has a free Overseas CB against PORTUGALLIA to be used immediately. Else, HOL has to leave Portuguese territory at the end of the turn.</p> <p><b>β-L.2</b> When the Independence of HOL is recognised, HOL can immediately annexe two COL or TP of PORTUGALLIA, or only one COL or TP if the peace is unfavourable. In both cases, the level of the COL/TP remains the same. HOL must have military control of these settlements, but the agreement of HIS about which TP/COL are gained is not needed.</p> <p><i>β-L.2.a</i> Instead of one TP/COL, HOL may obtain the right of implantation of fleets in STZ bordering Portuguese COL/TP.</p> <p><b>β-L.3</b> Until the end of Period IV, HOL having won the Revolt gains an Overseas CB against PORTUGALLIA as long as this country is annexed by HIS.</p> <div>γ Subsequent Revolts</div> <div>γ-M Event Phase</div> <p><b>γ-M.1</b> If the Revolt occurs again after a failed Revolt, the rules are the same as in First Revolt against the Spanish Crown (§α) except for the following points.</p>	<div>Political Events of Period III— master – 2016-04-14</div> <div>[E]393</div> <p><b>γ-M.2</b> Points §α-B.3, §α-B.7, §α-B.8, §α-B.11 and §α-D.2 of subevent III-1 (1).α (First Revolt against the Spanish Crown) above are ignored.</p> <p><b>γ-M.3</b> Technological markers are where they were left at the end of the previous Revolt, or at the box of Latin technology (the better). The Treasury of HOL is 200 ⌚. The monarch is determined at random; <i>Willem I</i> is not available, neither as a Monarch nor as a General.</p> <div>δ Independence without Revolt</div> <div>δ-N Event Phase</div> <p><b>δ-N.1</b> <i>This option is experimental...</i> HOLLANDIA becomes a minor country composed of all its national territory: <b>Friesland, Gelderland, Holland, Overijssel, Utrecht, Zeeland</b>, regardless of their last owner. HIS loses 5 VP for each of the provinces now in HOL that were not his own just before the event. TERRÆ DEPRESSÆ is dissolved and does not exist anymore.</p> <p><i>δ-N.1.a</i> Former (non-Spanish) owners of those provinces can declare a war against HOL but have no CB.</p> <p><b>δ-N.2</b> The characteristics of HOLLANDIA are as defined in the Annexes. It has one action of TP, one action of COL, one action of Concurrency all with medium investment. It places its TF as in period I or II until the end of period V; afterwards it has one action for commercial fleet.</p> <p><b>δ-N.3</b> If HOLLANDIA is not a special VA of HIS:</p> <p><i>δ-N.3.a</i> Any war engaged in period III between HIS and this country becomes a Revolt, as per First Revolt against the Spanish Crown (§α) (keeping existing COL or TP and all discoveries of sea zones made by HIS (and POR if annexed by HIS) and all its own land discoveries);</p> <p><i>δ-N.3.b</i> The player formerly in charge of the TF of HOLLANDIA has the mandatory task of resolving administrative actions of HOL and will resolve its discoveries;</p> <p><i>δ-N.3.c</i> This player earns VP for any monopolies of HOLLANDIA.</p> <p><i>δ-N.3.d</i> HOLLANDIA is subject to normal diplomacy;</p> <p><b>δ-N.4</b> If HOLLANDIA is a special VA of HIS, this country has the task of resolving the administrative actions (which are mandatory). HOLLANDIA is not subject to diplomacy.</p> <p><b>δ-N.5</b> HOLLANDIA may be involved in Overseas Wars, and may declare one (controller's choice).</p> <div>δ-O Administrative Phase</div> <p><b>δ-O.1</b> If HOLLANDIA is a special VA of HIS, HIS gains 50 ⌚ per turn plus 2 ⌚ for each face of COL/TP of HOLLANDIA (funds raised from HOLLANDIA), instead of the usual income of the provinces for a vassal.</p> <p><b>δ-O.2</b> Until the end of period V, if at peace or doing limited intervention only, HOLLANDIA raises one ₣⊕ and one Ⓐ⊕ to be used overseas each turn, in discoveries and battles against Natives; it also has one simple campaign at each round. The named ⚡ and ⚡ of HOL are used, with a minimum of one ⚡ and one ⚡ to be taken in unnamed counters. The discoveries or wars are resolved by the player in charge of the administrative actions.</p> <p><b>δ-O.3</b> If at war, it uses its full forces and reinforcements.</p> <div>δ-P Lasting Effects</div> <p><b>δ-P.1</b> HOLLANDIA may Revolt against HIS because of some war between these two countries in period III.</p> <p><b>δ-P.2</b> Or HOLLANDIA may break free or/and become a Major Power because of event IV-A (Thirty Years' War).</p> <p><b>δ-P.3</b> Finally, a peace of level 5 against HIS breaks the special status of VA and HOLLANDIA becomes a neutral minor country; the player waiting to play HOL according to the rules of the Grand Campaign has the choice to immediately become HOL.</p> <p><b>δ-P.4</b> In all those cases, the event and the rules described here terminate.</p> <div>III-1 (2) VEREENIGDE OOSTINDISCHE COMPAGNIE RistoMod</div> <p><i>Date: Vereenigde Oostindische Compagnie was created in 1602.</i></p> <div>A Condition:</div> <p><b>A.1</b> If this event already happened because of event IV-9 (Dutch Colonial Dynamism), reapply IV-9 instead.</p>
---	---

<p>[E]394</p> <p>Political Events of Period III</p> <p><b>A.2</b> If HOL does not satisfy 2 conditions over 3 re-roll and do not mark off: having at least 3 TP in <b>ASIA</b>; this is turn 20 or after; Dutch government is <i>Parliament</i>.</p> <p><b>B Event Phase</b></p> <p><b>B.1</b> HOL may create the VOC at any event phase, as soon as it wants. It costs 100 ₪ and causes the rest of the event.</p> <p><b>B.2</b> At the moment the VOC is created:</p> <p><i>B.2.a</i> HOL receives 3 levels of commercial fleets to be placed in any eligible STZ bordering <b>ASIA</b>.</p> <p><i>B.2.b</i> FTI for HOL is immediately raised by one level.</p> <p><b>C Administrative Phase</b></p> <p><b>C.1</b> The turn the VOC is created, HOL may ignore restriction of section VI.7.4.2 (Pioneering [TBD]).</p> <p><b>D Lasting Effects</b></p> <p><b>D.1</b> HOL gains an Overseas CB against any Catholic country having TP or COL in <b>ASIA</b>, valid during periods III and IV.</p> <p><b>D.2</b> Periods limits of HOL change once the VOC is created.</p>	<p>Political Events of Period III— master – 2016-04-14</p> <p>[E]395</p> <p><b>C.2</b> The countries in the League of Nassau take their first turn reinforcements in offensive mode, except HANSA which has Offensive or Naval reinforcements (controller's choice).</p> <p><b>D Military Phase</b></p> <p><b>D.1</b> The minor countries of the HRE that are at war can pass through and stop in every province of the HRE. They can not siege or pillage provinces belonging to minor countries not involved in this war.</p> <p><b>D.2</b> The troops of the Emperor have the same right of passing through and stopping in the HRE, as well as the forces in limited intervention of other Major countries.</p> <p><b>E Peace Phase</b></p> <p><b>E.1</b> A test to begin a Religious War in HRE is made at the end of the first turn of this war started by the League of Nassau. This test is modified by <b>+2</b> if HIS is Catholic/Counter-Reformation and <b>0</b> if it is Catholic/Conciliatory. See event IV-A (Thirty Years' War) for the result of the test and the possibility of this Religious War, and the renewal or not of the test on following turns. If no such war occurs, peace can be made on the following conditions.</p> <p><b>E.2</b> Each minor country obeys to the usual rules for peace. Those in the League are allied so a peace against only one country is a separate peace.</p> <p><b>E.3</b> A minor country forced to sign an unconditional surrender breaks from the League for ever. The League ceases to exist when only one country remains in it, or at the time of event IV-A.</p> <p><b>E.4</b> If the three Archdioceses are not supported by the Emperor, the League tries to obtain peace using the system for minor countries as if it was one major country (the controller of the League of Nassau decides of the terms of peace).</p> <p><b>E.5</b> The controlling player of both sides gain 5 VP for each level of favourable peace signed at the end of the war, and 10 VP for each enemy minor country that had to sign an unconditional surrender; they lose 10 VP for each minor country of their side that had to sign an unconditional surrender. Those VP are not awarded if the war triggers event IV-A.</p> <p><b>F Lasting Effects</b></p> <p><b>F.1</b> If the League of Nassau exists when event IV-A occurs, it will join the Protestant side. The League ceases existence when there is only one minor country left in the League at the end of a war.</p>
<p><b>III-1 (3) LEAGUE OF NASSAU</b> PBNew</p> <p><i>Date: Alternative history.</i></p> <p><b>A Condition:</b></p> <p><b>A.1</b> If HOL is a Major country and HIS did not recognise it, apply R/D with a <i>Revolt</i> in the following table instead of this event and mark off.</p> <p><i>A.1.a</i> 1. <b>Zeeland</b>, 2. <b>Holland</b>, 3. <b>Utrecht</b>, 4. <b>Limburg</b>, 5. <b>Liège</b>, 6. <b>Luxemburg</b>, 7. <b>Hainaut</b>, 8. <b>Flandre</b>, 9. <b>Vlaanderen</b>, 10. <b>Brabant</b>.</p> <p><b>A.2</b> If the Independence of HOL was recognised or if HOLLANDIA is minor country, apply the rest of the event.</p> <p><b>B Event Phase</b></p> <p><b>B.1</b> HOLLANDIA breaks any diplomatic status with HIS, whether special VA or regular diplomatic status and becomes neutral.</p> <p><b>B.2</b> The countries WESTFALLIA, HANOVERE, HANSA and CLIVIA form an offensive alliance, called the League of Nassau. They leave an existing GE. They are considered as one country for declarations of war and for peace terms (excepted for separate peaces).</p> <p><b>B.3</b> The League of Nassau declares a war to TREVORUM, COLONIA and MOGENTUM. The Emperor of the HRE has a free CB to declare war to the League of Nassau and be allied to the three Archdioceses; in this case it controls these countries. If the Emperor does not involve himself in the war, the Sole Defender of Catholic Faith (XIV.14.3.1) will have control of those Archdioceses during the war, or HIS is nobody has this responsibility.</p> <p><b>B.4</b> Any country having diplomatic status with one of these minor countries can do a limited intervention to support this side (and then has to break diplomatic relations with minor countries of the enemy side), except the Emperor who can only enter war with the Archdioceses (and can do this in a limited way or full war).</p> <p><i>B.4.a</i> Note that if the Emperor is minor HABSBURGUM, HIS can make a limited intervention on the side of minor HABSBURGUM as well.</p> <p><b>B.5</b> If HOL exists, it can do a limited intervention as an ally of the League of Nassau.</p> <p><b>B.6</b> The League of Nassau is controlled by the following Major existing power: HOL, the player responsible for the administrative actions of HOLLANDIA (if not HIS), ANG if Protestant, FRA if Protestant, SUE (regardless of religion).</p> <p><b>C Administrative Phase</b></p> <p><b>C.1</b> The three Archdioceses can use the counter of the HRE for their troops even if the Emperor is not at war along them. They take their reinforcements in defensive mode during the first turn of the war.</p>	<p><b>III-2 AMSTERDAM STOCK EXCHANGE</b> Risto</p> <p><i>Date: 1608.</i></p> <p><b>A Lasting Effects</b></p> <p><b>A.1</b> HOL can from now on lend 150 ₪ in the Diplomacy phase, plus 100 ₪ during the turn (instead of 100 ₪ plus 50 ₪).</p> <p><b>A.2</b> HOL has more money available for international loans.</p> <p><b>Accounting v1:</b></p> <p><b>A.3</b> From now on HOL receives a bonus equal to its DTI to all die-rolls on international loan amount and interest (not length) in the loans table</p> <p><b>A.4</b> HOL is also more resistant to Bankrupt and more tolerant to trespassing of commercial limits.</p> <p><b>III-3 (1) EAST INDIAN COMPANY</b> Risto</p> <p><i>Date: 1600.</i></p> <p><b>A Condition:</b></p> <p><b>A.1</b> If both following conditions are not satisfied: this is turn 20+ and ANG has at least 2 TP in <b>ASIA</b>, apply first event III-3 (2) (End of the Auld Alliance), or re-roll if already played.</p> <p><b>B Event Phase</b></p> <p><b>B.1</b> ANG may create the EIC at any event phase, as soon as it wants. It costs 100 ₪ and causes the rest of the event.</p> <p><b>B.2</b> ANG receives 2 levels of commercial fleets to be placed in any eligible STZ bordering <b>ASIA</b>.</p> <p><b>C Lasting Effects</b></p> <p><b>C.1</b> FTI for ANG is immediately raised by one level and its maximum level is permanently raised as written in the tables.</p>

<div>[E]396</div> <div>Political Events of Period III</div> <div>C.2 Turn limits for ANG change.</div> <div>III-3 (2) END OF THE AULD ALLIANCE PBNew</div> <div>Date: 1560 - Treaty of Edinburgh.</div> <div>A Condition:</div> <div>A.1 Occurs only if SCOTIA is at present inactive. Otherwise re-roll.</div> <div>A.2 If ANG has chosen the "Mary Stuart" option in event II-1 (1) (Act of Supremacy), this event is void of any effect.</div> <div>A.3 ANG can refuse this event (mark as played) by losing 2 Stability and 20 VP. It also loses the control of SCOTIA and can then make no diplomacy on it until the end of period.</div> <div>B Event Phase</div> <div>B.1 Apply event I-8 (3) (Intensification of the Reformation) (John Knox in Scotland!).</div> <div>B.2 SCOTIA wants to declare itself liege of FRA. ANG has the choice to contest this declaration, by using a free CB against SCOTIA. In this case, SCOTIA stays Neutral and Allies can be called for this war as per normal rules. Else, SCOTIA becomes VA of FRA.</div> <div>C Administrative Phase</div> <div>C.1 For the duration of the event, SCOTIA receives reinforcements in defensive attitude.</div> <div>III-4 (1) NORTHERN SEVEN YEARS WAR PB</div> <div>Date: 1563-1570.</div> <div>A Condition:</div> <div>This event can not occur if SUE is not a Major Power; do not mark off and re-roll if it is not the case.</div> <div>B Event Phase</div> <div>B.1 DANIA declares a war to SUE. If SUE was at peace, DANIA is controlled according to the normal rules. If it was not, the controller is chosen in priority among the countries at war against SUE.</div> <div>C Administrative Phase</div> <div>C.1 During the first turn DANIA will take its reinforcements in offensive status with an added bonus of +2. For the following turns, the attitude is free but DANIA keeps the +2 to reinforcements during all this war.</div> <div>III-5 WAR BETWEEN ENGLAND AND SCOTLAND Risto</div> <div>Date: 1542-1548.</div> <div>A Condition:</div> <div>A.1 Occurs only if SCOTIA is at present inactive. Otherwise re-roll.</div> <div>A.2 Cannot take place if event IV-6 (Personal Union between England and Scotland) has already occurred. In that case mark-off and re-roll. May cancel event IV-6 if the latter occurs while the present event is still active.</div>	<div>Political Events of Period III— master – 2016-04-14</div> <div>[E]397</div> <div>A.3 ANG can refuse this event (mark as played) by losing 3 Stability and 20 VP. It also loses the control of SCOTIA and can then make no diplomacy on it until the end of period.</div> <div>B Event Phase</div> <div>B.1 SCOTIA declares war against ANG, which loses the control of Scotland.</div> <div>B.2 ANG can immediately call allies as per normal rules.</div> <div>B.3 If this leads to declarations of war against SCOTIA, the controller of SCOTIA may come to its help as per normal rules, and so on.</div> <div>B.4 If SCOTIA is neutral, its control is decided randomly between HIS and FRA unless one of them is already at war with ANG (and the other not), in which case that country takes precedence and receives SCOTIA in EW. Control cannot be refused.</div> <div>C Administrative Phase</div> <div>C.1 For the duration of the event SCOTIA receives reinforcements in offensive attitude.</div> <div>III-6 PORTUGUESE DISASTER IN AFRICA Risto</div> <div>Date: 1578.</div> <div>A Condition:</div> <div>A.1 Can occur only if PORTUGALLIA exists as a minor country, otherwise re-roll.</div> <div>A.2 If event III-7 (Annexation of Portugal by Spain) is in effect, apply R/D with a <i>Revolt</i> in HIS.</div> <div>A.3 Else if dynastic action C-3 was played, activate event III-7 just after the effects of this event.</div> <div>B Event Phase</div> <div>B.1 If PORTUGALLIA is currently activated in a war, it immediately offers a mandatory white peace to all its enemies.</div> <div>B.2 PORTUGALLIA loses all its non-national provinces (excepted <i>Tânger</i> and <i>Açores</i>); they are given back to their owner of 1492.</div> <div>B.3 Whatever the current status of PORTUGALLIA, the reference level of each Portuguese TF in the ROTW map is reduced by one (even if being thus eliminated).</div> <div>B.4 All Portuguese fortifications in the ROTW map outside <i>ASIA</i> and <i>BRAZIL</i> lose 1 level. Remaining fortifications are added to the basic forces maintained by PORTUGALLIA (but will not be rebuilt once destroyed).</div> <div>B.5 From now on, PORTUGALLIA has only one action of TP/COL each turn, and no fleet action.</div> <div>III-7 ANNEXATION OF PORTUGAL BY SPAIN RistoMod</div> <div>Date: 1580-1640.</div> <div>A Condition:</div> <div>Can occur only if PORTUGALLIA is a minor power.</div> <div>B Event Phase</div> <div>B.1 HIS receives a free CB against PORTUGALLIA until the end of current period. If HIS is Catholic/Counter-Reformation, then during the first turn of a war caused by this event, PORTUGALLIA receives no reinforcements.</div> <div>B.2 In addition to the usual involvement of a MAJ to help an attacked minor country, ANG and FRA can make a limited intervention to help PORTUGALLIA.</div> <div>B.3 Annexation</div> <div>B.3.a If Portuguese Disaster in Africa (III-6) has not happened yet and HIS achieves an unconditional victory over PORTUGALLIA, this minor is considered to have been annexed to HIS in a special way and Portugal in Annexation (§a) is applied. The political marker of PORTUGALLIA is placed in AN of HIS.</div> <div>B.3.b If Portuguese Disaster in Africa has happened, PORTUGALLIA is at war by its own (neither full nor limited intervention), HIS can annex PORTUGALLIA by winning a peace of level 2 against it.</div>
---	---

<div>[E]398</div> <div>Political Events of Period III</div> <div>B.3.c If Portuguese Disaster in Africa has happened and PORTUGALLIA has help from a MAJ, HIS will annex PORTUGALLIA by winning a peace of level 4 against it.</div> <div>α PORTUGAL IN ANNEXATION</div> <div>α-C Diplomatic Phase</div> <div>α-C.1 PORTUGALLIA is permanently annexed to HIS, and its political marker is placed accordingly. The counters of PORTUGALLIA are not removed from play.</div> <div>α-C.2 In game terms PORTUGALLIA is treated as a part of HIS mainly for VP purposes. In most other respects it becomes a special, permanent VA of HIS. This applies to separate wars and peace treaties, placement of units and markers, etc. and covers all aspects not specially modified in this event description. If PORTUGALLIA was currently engaged in a separate war against someone else than HIS, its enemies must immediately sign a white peace with it, or declare war to HIS with a free CB (unless they are already at war with HIS).</div> <div>α-C.3 HIS annexes all non national provinces of PORTUGALLIA except Açores.</div> <div>α-C.4 HIS cannot voluntarily cede any part of PORTUGALLIA, including COL/TP to other players. Neither can it sell Portuguese sea charts or grant authorisation of trade in a sea bordering a Portuguese COL/TP.</div> <div>α-C.5 A War declared against annexed PORTUGALLIA gives a free CB (Overseas CB if this is an Overseas war) to HIS to intervene in the war. A war against HIS does not imply necessarily PORTUGALLIA in the war.</div> <div>α-D Administrative Phase</div> <div>α-D.1 HIS receives a part of the incomes of PORTUGALLIA: it receives all income from TP/COL, Exotic Resources, TF (but no income from European provinces, foreign or domestic commerce, manufactures – these are removed). This income can not be higher than 400 ₮, plus the East Indies convoy.</div> <div>α-D.1.a HIS gains the VP for the monopolies detained by PORTUGALLIA. It does not combine resources or fleets of PORTUGALLIA with it to determine monopolies or the ownership of a Commercial Centre.</div> <div>α-D.2 HIS must pay for the maintenance and recruitment of Portuguese units and fortresses as if they were Spanish units (except that their content remains that of Portuguese units and they can only be placed within Portuguese territory, including COL/TP). HIS has 3ID of basic forces and an additional limit of recruitment of 1LD and 1ND to maintain or raise Portuguese units. One unnamed Portuguese leads the naval forces.</div> <div>α-D.3 HIS can make administrative actions for Portuguese TF and COL/TP, but using Portuguese FTI/DTI (without the former Portuguese bonus for ROTW actions). HIS has 2 (in periods III and IV) or 1 (period V) actions for Portuguese COL and can use also its own actions for Portuguese establishments. One of these actions can be used on a Portuguese TP each turn. HIS has one action of TF in periods III and IV for Portuguese fleets.</div> <div>α-E Military Phase</div> <div>α-E.1 HIS must pay for all campaign activations of Portuguese units jointly with Spanish units.</div> <div>α-F Peace Phase</div> <div>α-F.1 HIS can renounce annexation at the end of any peace phase (except on the same turn when event IV-4 (1) (National Revolt of the Portugal) occurs) losing control of PORTUGALLIA and 3 Stability.</div> <div>α-F.1.a If HIS renounces the inheritance before event IV-4 (1) occurs, PORTUGALLIA is placed in forced EW of HIS until the death of current Spanish monarch. After that, it is treated as normal minor and subject to diplomacy.</div> <div>α-F.1.b If HIS renounces the inheritance after event IV-4 (1) has occurred, PORTUGALLIA becomes neutral and it makes a white peace with HIS. The rebels are considered to have won.</div> <div>III-8 SECULARISATION OF FRATRES MILITIÆ CHRISTI PB</div> <div>Date: 1561.</div> <div>A Condition:</div> <div>Α.1 If event I-H (Secularisation of D.S.M. Theutonicorum) was not played, it is played this turn as a supplementary event.</div>	<div>Political Events of Period III— master – 2016-04-14</div> <div>[E]399</div> <div>B Event Phase</div> <div>B.1 Minor country FRATRES MILITIÆ CHRISTI is destroyed. Its provinces are shared as follows:</div> <div>B.1.a Estland is given to SUE*.</div> <div>B.1.b Memel joins the DUCHY OF PRUSSIA and is given to whoever controls this Duchy (POL* or BRANDENBURGUM).</div> <div>B.1.c Livonija and Kurland are associated as the DUCHY OF COURLAND. This Duchy is claimed by SUE* and POL*.</div> <div>B.1.d If one of these provinces was conquered by another country than the one that should take it, this wronged country has a CB against the country possessing the province. A minor country will always use this CB.</div> <div>B.1.e All other provinces are given to their legitimate owner in 1492 (as indicated on the map).</div> <div>B.2 War for Kurland</div> <div>B.2.a POL* has a CB against SUE*; refusal to use it costs 1 Stability and gives all the DUCHY OF COURLAND to SUE*. minor POLONIA always uses the CB.</div> <div>B.2.b SUE* has a CB against POL; refusal to use it costs 1 Stability and gives all the DUCHY OF COURLAND to POL. Minor SUECIA always uses the CB.</div> <div>B.2.c If both countries use their CB against the other one, POL* owns both provinces, but SUE has initially the military control of Livonija. They can make no Armistice on the first turn of this war.</div> <div>B.2.d If neither SUE nor POL use this CB, CURLANDIA is created as a normal minor country with the two provinces.</div> <div>C Diplomatic Phase</div> <div>C.1 Any country which was at war against FRATRES MILITIÆ CHRISTI has an immediate free CB to be used jointly against POL* and SUE* (and CURLANDIA if it exists). This might provoke a three-sided war (excepted if one of POL or SUE at least has abandoned the DUCHY OF COURLAND) in which the invading country keeps its eventual initial military control of any province in FRATRES MILITIÆ CHRISTI.</div> <div>C.2 If such a country does not declare war, its forces are withdrawn from FRATRES MILITIÆ CHRISTI and it gives up any conquered province that was owned by FRATRES MILITIÆ CHRISTI in 1492 to their new owner (as defined above).</div> <div>C.3 Any other country adjacent to FRATRES MILITIÆ CHRISTI when they disappear has a CB to be used jointly against POL* and SUE* (and CURLANDIA if it exists).</div> <div>III-9 WAR BETWEEN PERSIA AND TURKEY Risto</div> <div>Date: 1606-1639.</div> <div>A Condition:</div> <div>A.1 If main provinces of PERSIA are conquered, activate a Persian Uprising (§B of XIV.13.4.4).</div> <div>A.2 First time : if PERSIA is inactive, use Persian Attack of Turkey (§α).</div> <div>A.3 Second time, or first time and PERSIA is currently at war against TUR, use Annexation of Iraq (§β).</div> <div>A.4 Otherwise, re-roll and do not mark off.</div> <div>α Persian Attack of Turkey</div> <div>α-B Activation:</div> <div>α-B.1 If TUR does not own provinces that were Persian at the beginning of the game, it may refuse the event in two ways:</div> <div>α-B.1.a By losing 3 Stability and 150 ₮.</div> <div>α-B.1.b Or, by surrendering immediately to PERSIA conceding a peace of level 2 and ceding a province bordering Persian territory (in priority a province adjacent to PERSIA).</div> <div>α-B.2 In this case the box is marked off, but the event can happen later if rolled for anew.</div> <div>α-C Event Phase</div> <div>α-C.1 PERSIA declares war against TUR.</div> <div>α-C.2 TUR can immediately call for allies as per normal rules.</div>
---	---

**α-C.3** If this leads to declarations of war against PERSIA, the controller of PERSIA may come to its help as per normal rules, and so on.

**α-C.4** If PERSIA is neutral, it is played by HIS (which cannot then come to its aid).

#### α-D Administrative Phase

**α-D.1** PERSIA receives reinforcements in offensive status for the duration of the event.

### β Annexation of Iraq

#### β-E Event Phase

**β-E.1** MESOPOTAMIA is annexed to PERSIA and removed from game.

**β-E.2** If TUR owns any province initially in MESOPOTAMIA, place there a *Revolt*⊕ and one or 2 *Revolt*⊖ controlled by PERSIA; one *Revolt* in each province, the *Revolt*⊕ is placed at random.

#### β-F Administrative Phase

**β-F.1** If either of the conditions above are met with, Iraqi basic force is added to the forces of PERSIA until the end of the war.

### III-10 REVOLT IN SIERRA NEVADA Risto

*Date: 1568-1570.*

#### A Event Phase

**A.1** Place a *Revolt*⊖ in non-Muslim **Granada**, **Córdoba** and **La Mancha**. The *Revolt* are controlled by TUR.

#### B Diplomatic Phase

**B.1** TUR has a CB against all the owners of revolted provinces.

*B.1.a* Exceptionally, TUR may make a limited intervention at the side of the *Revolt* as if this was a civil war.

**B.2** If TUR declares war to the controller of **Granada** or is in limited intervention against it, it receives 5 VP at the moment its (or its minor allies) troops arrive to any of the revolted provinces. This does not have to be done during the current turn, but the bonus VP are gained only once.

#### C Military Phase

**C.1** During the rebellion there exists an additional malus of **-3** to all attempts to suppress *Revolt* in **Granada** if HIS is Catholic/Counter-Reformation. An additional malus of **-1** is received for each Turkish or minor allied LID inside any province in *Revolt* (even if besieged).

#### D Interphase

**D.1** *Revolt* caused by this event can never extend beyond **Granada**, **Córdoba**, **Murcia** and **La Mancha** (with a maximum of two *Revolt* counters per province).

**D.2** If the *Revolt* survives the first turn, place a minor general on it.

**D.3** For each interphase this event continues TUR receives 2 VP. This bonus is increased to 10 VP per interphase whenever TUR or its minor ally units are within **Granada** (a war must have been declared to the controller to do this).

**D.4** If a *Revolt*⊕ exists for a whole turn in **Granada** without being suppressed at any point during this turn, a new minor GRANADA is created and becomes a permanent VA of TUR (but the war is not necessarily ended). It owns any of the 4 mentioned provinces having a *Revolt* in them, but has no capital (so can be destroyed by any country).

**D.5** If **Granada** is later annexed by any other player than TUR, place a *Revolt*⊖ in the province during the peace phase and consider this event as having been activated again, but without the malus of **-3** for suppress of *Revolt*. If GRANADA still exists (owning other provinces than **Granada**), consider this *Revolt* as being controlled by it.

#### E Lasting Effects

**E.1 Final expulsion of the Moriscos** Certain effects of the politics of expulsion are removed.

### III-11 WARS OF RELIGION IN FRANCE (×5) PBNew

*Date: 1560-1598.*

#### A Condition:

See at the end of this section the event III-D (Religious Wars in France) which is the detailed description of those wars.

### III-12 REVOLT IN CORSICA Risto

*Date: 1564-1567.*

#### A Event Phase

**A.1** A *Revolt*⊕ is placed in **Corsica**. The preference list for the control of this *Revolt* is the one for the (would-be) CORSICA. However, the *Revolt* cannot be controlled by the controller of GENUA, who is omitted from this list.

**A.2** GENUA immediately offers white peace to any enemy currently engaged in war with it. From now on, it cannot declare war on anyone as long as the event lasts.

**A.3** If no-one controls GENUA at present, the controller is chosen as per normal rules when minor neutral is activated.

**A.4** This event is treated as a civil war in GENUA (see section IV.5.5.5 (Religious Wars, Civil Wars)). Only the controllers of GENUA and of the *Revolt* are allowed to do a *Foreign Intervention* with their own forces.

#### B Administrative Phase

**B.1** This event must be played even if no player country is involved in it. GENUA receives reinforcements and can use its troops as if activated in a war.

#### C Interphase

**C.1** If the *Revolt* survives the first turn, place *Sampiero* who is now available for 5 turns.

**C.2** If the *Revolt* survives four turns, a new minor country CORSICA is created and the rebellion is over. The controller of the *Revolt* gains 10 VPs.

**C.3** If the rebellion is crushed, controller of GENUA gains 10VPs.

### III-13 UNION BETWEEN POLONIA AND SUECIA PB

*Date: 1595-1599.*

#### A Condition:

**A.1** If there is no Major power POL, re-roll and do not mark off.

**A.2** If there is no Major power SUE and POL is not Supporter of Orthodoxy, re-roll and do not mark off.

**A.3** If the Polish Monarch is *Zygmunt I* during its first 5 turns of reign, re-roll and do not mark off.

**A.4** Apply one of the following events, according to the religious attitudes:

*A.4.a* If SUE is Catholic, apply event III-B (Religious War in Sweden);

*A.4.b* If POL is Supporter of Orthodoxy, apply event III-A (Union between Polonia and Russia);

*A.4.c* If POL and SUE are Protestant, apply event III-C (Religious War in Poland).

*A.4.d* If SUE is Protestant and POL is Catholic, use this present event.

*A.4.e* If none of the preceding situations happened, mark off the box and apply R/D.

#### B Event Phase

**B.1** The Polish Monarch dies and the Heir of the Swedish Crown is elected in Poland. POL has now the Monarch *Zygmunt III*, with values 5/5/6 and is also general *Zygmunt III* (♣ A 4.3.4 [Event III-13]). Its reign will last 9 turns.

**B.2** The Vasa Dynasty remains on the Polish throne until a Dynastic crisis occurs in Poland or an event (or some elected specific general) changes the Dynasty; POL has to lose 2 Stability to keep its Dynastic Claims or this terminates the event. From now on, POL has Dynastic Claims over SUE.

#### C Lasting Effects

**C.1** POL can renounce its Claims at any diplomatic phase (that is a declaration) and that terminates the event. POL loses 1 Stability.

<div>[E]402</div> <div>Political Events of Period III</div> <p><b>C.2</b> Each time there is a new monarch in SUE, POL has a CB against SUE at this turn to claim for its Inheritance. In case of Dynastic Crisis in SUE, POL is a valid pretender as long as it has Dynastic Claims over Sweden.</p> <p><b>C.2.a</b> The first time after the beginning of the event that this situation happens, POL must either use the CB or lose 2 Stability or renounce its Claims (costs 2 Stability).</p> <p><b>C.3</b> The first new Swedish Monarch after this event will be <b>Karl IX</b>, with values 8/6/6 (but not a general) and random duration (ignore <i>Fragile health</i> and <i>Dynastic crisis</i>. Exception: if <b>Gustav Adolf</b> was to be the new monarch due to another event, use <b>Gustav Adolf</b>.</p> <p><b>D Diplomatic Phase</b></p> <p><b>D.1</b> If a war is declared because of its CB, SUE is now in Civil Religious War (see section IV.5.5.5 (Religious Wars, Civil Wars)). Apart from POL, only foreign intervention in the war is allowed.</p> <p><b>D.2</b> The first time a war is declared due to Dynastic Claims, POL gains the military control of one province owned by SUE, chosen by POL (the capital is forbidden). This effect is not applied for subsequent wars.</p> <p><b>E Administrative Phase</b></p> <p><b>E.1</b> POL can recruit troops in Swedish provinces that are under its military control, at double price (because those are not normal recruitment provinces).</p> <p><b>E.2</b> POL can use outside its own territory only land forces paid with ducats and not paid with free maintenance (mercenaries only). There is no such restriction for naval forces, nor if the kings of SUE are Protestant/Rigorous in which case the war is not limited for POL. Note that it is not mandatory to use the free maintenance.</p> <p><b>F Peace Phase</b></p> <p><b>F.1</b> If SUE wins the war, a valid peace term is to ask for renouncement to Dynastic Claims (equivalent of one province).</p> <p><b>F.2</b> If POL wins the war with a peace of level 3 or more, or forces an unconditional peace, the Monarch of POL becomes ruler of SUE as one of the Victory conditions (instead of one province).</p> <p><b>F.2.a</b> The Monarch of SUE is executed; now SUE uses the values of the Monarch of POL. SUE is considered Catholic during the Union (in every aspects).</p> <p><b>F.2.b</b> SUE has a mandatory offensive alliance with POL in which she is complied to answer any call.</p> <p><b>F.2.c</b> SUE can not declare war without a CB or the agreement of POL. It can not declare war against POL.</p> <p><b>F.2.d</b> The alliance is in question when the Monarch of POL dies or if POL refuses to answer a call for defensive war (not offensive war), or if POL declares a war against SUE. A new monarch is rolled for SUE. POL having still Dynastic Claims over Sweden, it can renew the war to impose its ruler but it renews the Union if POL wins a peace of any level against SUE. As long as the war continues, the union exists for Victory Conditions, if not in its consequences.</p> <p><b>F.2.e</b> Note that if this event is rolled for a new time when the Union exists, SUE is Catholic and event III-B (Religious War in Sweden) is thus applied.</p> <div>III-14 UNION OF LUBLIN PB</div> <p><i>Date: 1569.</i></p> <p><b>A Condition:</b></p> <p><b>A.1</b> This event is described in event II-13 (Union of Lublin).</p> <p><b>A.2</b> If it has already occurred, mark off and apply either event III-15 (1) (Oprichnina) or event III-15 (2) (The Time of Troubles in Russia).</p> <div>III-15 (1) OPRICHNINA PB</div> <p><i>Date: 1565-1572.</i></p> <p><i>Duration:</i> as long as there is a <b>Revolt</b> in Russia.</p> <p><b>A Condition:</b></p> <p><b>A.1</b> If <b>Ivan IV</b> has not been yet Monarch of RUS, do not mark off and re-roll.</p>	<div>Political Events of Period III— master – 2016-04-14</div> <div>[E]403</div> <p><b>A.2</b> If <b>Ivan IV</b> is already dead, mark off and apply R/D the first time (with a <b>Revolt</b> in RUS), the second event the next time.</p> <p><b>B Event Phase</b></p> <p><b>B.1</b> RUS is in Civil War for the duration of the event.</p> <p><b>B.2</b> <b>Revolt</b> are placed in <b>Moskva</b> and <b>Novgorod</b>; their force is randomly decided.</p> <p><b>B.3</b> Another <b>Revolt</b> is rolled for in Russia.</p> <p><b>B.4</b> The Russian leader <b>Kurbsky</b> is withdrawn from game as long as <b>Ivan IV</b> rules in RUS and can not be used.</p> <p><b>C Administrative Phase</b></p> <p><b>C.1</b> RUS is not restricted by limits of land building this turn only, and has no penalty for doing so. However, the cost for building new troops is doubled for the duration of this event.</p> <p><b>D Military Phase</b></p> <p><b>D.1</b> <b>Ivan IV</b> must take the field and lead a land stack as long as this event last, respecting the usual hierarchy rules.</p> <p><b>D.2</b> The land force of <b>Ivan IV</b> pillages every province it is in at the end of each round.</p> <p><b>E Peace Phase</b></p> <p><b>E.1</b> If at the peace phase there is no <b>Revolt</b> left in RUS, one Russian A (one counter and the equivalent of 4 LD) is destroyed by RUS and RUS gains 1 in Stability.</p> <div>III-15 (2) THE TIME OF TROUBLES IN RUSSIA PB</div> <p><i>Date: 1605-1613.</i></p> <p><b>A Condition:</b></p> <p><b>A.1</b> If event III-15 (1) (Oprichnina) is still in effect, mark off and apply R/D.</p> <p><b>A.2</b> If not, apply event IV-17 (1) (The Times of Troubles in Russia).</p> <div>III-16 WAR IN SIBERIA Risto</div> <p><i>Date: non-historical.</i></p> <p><b>A Condition:</b></p> <p>Can occur only after the elimination of SIBERIA. Otherwise re-roll.</p> <p><b>B Event Phase</b></p> <p><b>B.1</b> Place a Turkish controlled <b>Revolt</b> in each Russian COL/TP in <b>SIBERIA</b>.</p> <p><b>C Administrative Phase</b></p> <p><b>C.1</b> Native forces within the revolted provinces return to their full strength and are activated.</p> <p><b>C.2</b> Furthermore, during the first turn only, an unmodified die-roll is made for rebel reinforcements in offensive attitude. Troops thus received fill the former SIBERIA counters and can be placed in any of the revolted provinces.</p> <p><b>D Military Phase</b></p> <p><b>D.1</b> Rebels using SIBERIA counters draw supplies from native territories (the same way as natives do), but can only do so either if there is no RUS controlled forts/fortresses in the province, or from the <b>Revolt</b> counters, which they can use as supply bases.</p> <p><b>D.2</b> Rebels using SIBERIA counters can move also outside their original provinces.</p> <p><b>D.3</b> Rebel natives and SIBERIA units automatically try to destroy Russian COL/TP in provinces they occupy at the end of a full round, if these are not protected by Russian units or fortresses. Roll one die: on 7 or more, the COL/TP is destroyed.</p> <p><b>E Interphase</b></p> <p><b>E.1</b> <b>Revolt</b> caused by this event never extend during the redeployment phase.</p> <p><b>E.2</b> During the native attacks phase count each <b>Revolt</b> counter as 2 native LD when counting the modifications to the attack die-roll, and rebel forces using SIBERIA counters are also used.</p>

See section XIV.14.8.6 (The Manila Galleon).</div> </div>
--	--

### β Commercial dynamism of CHINA

#### β-D Event Phase

**β-D.1** CHINA gains a TP with level 6 in every coastal city of its territories. An automatic concurrence with any existing establishment is made until only one TP survives in each province. Its fleet in STZ **Mer de Chine** rises to level 5 (and automatic concurrence might also be necessary).

**β-D.2** Japanese TP in **CHOSŎN** and **FORMOSE** are destroyed (by Chinese invasions).

#### β-E Lasting Effects

**β-E.1** CHINA has a FTI of 2 (raised to 3 from period V on) and a DTI of 3 and uses both FTI and DTI for concurrence in its own provinces. From now on, consider STZ **Mer de Chine** as its CTZ.

**β-E.2** TP of CHINA exploit the resources in their region and those are counted as normal exploitation for monopolies and evolution of prices.

**β-E.3** European countries having monopoly in STZ **Mer de Chine** may declare a commercial embargo against CHINA. No TP (not COL) may exploit anything in CHINA as long as the embargo continues (both Chinese and European TP); so they are not counted in for monopolies and evolution of prices. Moreover, no commercial fleet in STZ **Mer de Chine** gives any income. This embargo gives an oversea CB to every European country having a TP in CHINA.

**β-E.4** Each turn, all Chinese TP in continental CHINA gain one level (with a maximum of 6), overseas TP one level (with a maximum of 3) and CHINA gains one TF level in STZ **Mer de Chine** (with a maximum level of 6). Destroyed TP do not come back but the commercial fleet keeps coming back even if destroyed.

**β-E.5** Basic reinforcements are increased to one  $\Delta\oplus$  in mainland, and 2 LID, 2 NID for the garrisons.

### III-22 (2) SULTANATE OF ACEH PB/Jym [BLP]

Date: 1565.

#### A Event Phase

**A.1** Create the Sultanate of ACEH. Place its TP $\ominus$  with 3 levels in **SUMATRA** (in the first empty province: Centre, North then South; if none, place it in the Northern one and make automatic concurrence).

A.1.a It proposes a AT to TUR that has the choice to accept it or not immediately.

A.1.b Forces are deployed as per the Annex.

**A.2 Malahayati** [BLP] ACEH receives the admiral *Malahayati* ( $\pm$  <@> A 6.4.5 [Event III-22(2)]) for 9 turns.

#### B Lasting Effects

**B.1** Before 1700 ACEH has a TP action every turn (strong investment) to increase its TP up to the original level 3, if ever its level is less (or was destroyed).

**B.2** The TP of ACEH may never be annexed at peace.

**B.3 Malahayati** [BLP] As long as *Malahayati* is alive, increase the basic forces of ACEH by  $\mathbb{F}\oplus$ .

B.3.a As long as there is at least  $\mathbb{F}\ominus$  of ACEH in play (including if it is at peace), the Malacca fortified strait is closed to every country without a AT on ACEH.

**B.4** No other establishment (COL or TP) may be created in the province if the TP of ACEH is here.

B.4.a Existing establishments, including those that would be created while the TP of ACEH is temporarily destroyed, stay without harm.

### III-23 JAPANESE EXPEDITION IN CHOSŎN PB

Date: 1592/1597. Both invasions failed, historically.

#### A Event Phase

**A.1** Place a Japanese TP in a province of **CHOSŎN**, **Seoul** if possible, **P'yŏngyang** if **Seoul** is occupied; if both are occupied, this event is marked off but ignored.

**A.2** The TP has 3 levels and exploits all resources of **CHOSŎN** (other countries will have to take them by regular concurrence).

**A.3** A Japanese colonial force of 1  $\Delta\oplus$  defends the TP; it may gain  $\Delta\ominus$  in reinforcement each turn if needed. This army does not activate the Natives and an attack in this region may be aimed at the Japanese only and so does not activate the Natives of **CHOSŎN**. As soon as the TP is no more Japanese or destroyed, normal activation rules for Natives apply and the colonial force is removed.

### III-23 Some Alternative History Events

#### III-A UNION BETWEEN POLONIA AND RUSSIA PB

Date: Alternative history.

#### A Event Phase

**A.1** The Polish Monarch dies and the Heir of Russia is elected in Poland. POL has now the Monarch **Dmitry**. Its values and its reign length are random, as if an heir from RUS.

**A.2** The Russian dynasty remains on the Polish throne until a Dynastic crisis occurs in Poland or an event (or some elected specific general) changes the Dynasty; this terminates the event. From now on, RUS has Dynastic Claims on POL.

#### B Activation:

**B.1** When the current Tsar of RUS dies, **Dmitry** becomes the Monarch of RUS for its remaining reign length.

**B.2** He can choose to abandon the Polish crown; that costs 1 Stability to RUS, a new dynasty is elected in POL (as if after a Dynastic Crisis, or a general-monarch may be elected if one is available), and the event is ended.

**B.3** It can choose to keep both crowns and Effect of the Union (§α) is now applied.

#### C Lasting Effects

**C.1** At each time there is a new Tsar in RUS, beginning with **Dmitry**, POL can accept the Union or try to break it.

C.1.a If the Union is accepted, the new Tsar becomes (or remains) the ruler in POL and RUS gains 20 VP each time.

C.1.b If it is refused, a new Monarch is rolled for POL, as if after a Dynastic Crisis, or a general-monarch may be elected if one is available. A War for Dynastic Union might happen, see underneath.

C.1.c Any other event calling for a change of Polish Monarch is impossible when the Union holds; do not mark off this event and roll anew.

#### α Effect of the Union

#### α-D Lasting Effects

**α-D.1** RUS and POL shares the same Monarch; RUS has the control on the Monarch (what he is doing, its values, and so on).

**α-D.2** POL has a mandatory offensive alliance with RUS in which it is complied to answer any call.

**α-D.3** POL may not declare war without a CB or the agreement of RUS. If it has a CB against RUS, it can declare war to it and lose Stability due to breaking of alliance (but this one is renewed afterwards).

**α-D.4** RUS has no specific obligation regarding the alliance, and does not lose Stability if it doesn't answer the call. It can declare war to POL but that breaks the union and this war is now as described in War for Dynastic Union (§β). Determine a new Polish Monarch.

**α-D.5** POL does not change of religious attitude because of the Union.

#### β War for Dynastic Union

#### β-E Diplomatic Phase

**β-E.1** If POL has refused a continuation of the Union, RUS has a free CB against POL to be used immediately, and will lose 1 Stability if it refuses the CB. In that case, RUS renounces also to its Dynastic Claims on POL.

<div>[E]408</div> <div>Political Events of Period III</div> <p><b>β-E.2</b> If a war is declared, POL is in Civil War against RUS (see section IV.5.5.5 (Religious Wars, Civil Wars)). RUS is permitted full intervention in this war.</p> <p><b>β-E.3</b> Roll for 2 <i>Revolt</i> in POL when such a war erupts.</p> <div>β-F Peace Phase</div> <p><b>β-F.1</b> If POL wins the war or signs a white peace, the Union and the Dynastic Claims of RUS are forfeited.</p> <p><b>β-F.2</b> If RUS wins the war with a peace of level 2 or more, the Monarch of RUS becomes ruler of POL also as an victory condition (instead of 1 province).</p> <p><i>β-F.2.a</i> The previous Monarch of POL is executed; now POL uses the values of the Monarch of RUS and the Union (see above) is renewed.</p> <div>III-B RELIGIOUS WAR IN SWEDEN PB</div> <p><i>Date: Alternative history.</i></p> <div>A Condition:</div> <p><b>A.1</b> SUE proposes an immediate white peace to every countries is at war against. Minor countries sign it, and Major Countries have the choice to sign such a white peace or to sign an Armistice. If an Armistice is decided, military occupation remains in provinces where the city is controlled (other are evacuated), no combat is possible between the enemy sides, and Swedish provinces that are occupied by enemies are out for the Religious War (see section IV.5.5.5 (Religious Wars, Civil Wars)). The Armistice will last until the end of the Religious War and causes no loss of Stability at the end of each turn.</p> <div>Turn 1</div> <div>B Event Phase</div> <p><b>B.1</b> Roll for 4 <i>Revolt</i> in SUE. Those <i>Revolt</i> has to be all in Swedish provinces and in different provinces. The force of the <i>Revolt</i> is random but they all control the city. This forms the side of Rebels. They are opposed to Loyalists.</p> <p><b>B.2</b> The player of SUE chooses its side:</p> <p><i>B.2.a</i> If his initial choice was Catholic, he must play the Loyalists;</p> <p><i>B.2.b</i> If SUE is Catholic because of Union with POL or because of Forced Conversion, the player can choose Loyalists or Rebels.</p> <p><i>B.2.c</i> If the player chooses to play Rebels, a new Monarch is rolled for on the last column for values, with a random reign length (ignore Dynastic Crisis). The characteristics of the previous Monarch has to be written down (in case of victory of Loyalists) and this Monarch can be used as a general by Loyalists.</p> <p><b>B.3</b> A test is made for each military unit (per counter deployed), each leader and each COL or TP with 1d10:</p> <p>1–5 controlled by Loyalists;</p> <p>6–10 controlled by Rebels.</p> <p><b>B.4</b> The side not played by SUE is controlled by:</p> <p><i>B.4.a</i> POL if this is the Loyalists and POL is Catholic;</p> <p><i>B.4.b</i> AUS* if this is the Loyalists and POL is not Catholic (Protestant or Orthodox);</p> <p><i>B.4.c</i> ANG if this is the Rebels and ANG is Protestant;</p> <p><i>B.4.d</i> [HOL/VEN/DAN] if this is the Rebels and ANG is Catholic.</p> <p><b>B.5</b> During the Religious War, SUE may not declare any war, nor make diplomacy on minors (except in reaction). Events calling for an intervention of SUE are played as if SUE makes an immediate Armistice or White Peace.</p> <p><b>B.6</b> Foreign countries can be involved in this war only by foreign intervention, excepted for what is listed below.</p> <div>C Diplomatic Phase</div> <p><b>C.1</b> If POL* is Catholic, it has a CB against the Rebels to join war alongside Loyalists. minor POLONIA always uses this CB.</p>	<div>Political Events of Period III— master – 2016-04-14</div> <div>[E]409</div> <p><b>C.2</b> If DAN* is Protestant, it has a CB against the Loyalists to join war alongside Rebels. Minor DANIA uses this CB only if POL uses one.</p> <div>as long as the war continues</div> <div>D Administrative Phase</div> <p><b>D.1</b> The side played by SUE uses the normal rules for Major Powers. It controls the province where its owns the city and, if playing the Rebels, disregards any <i>Revolt</i> (they don't affect its income because they are allied to it).</p> <p><i>D.1.a</i> Its initial treasury is at most two thirds of the treasury at the end of the event phase. The loss is of at least 50 ₮.</p> <div>Accounting v1:</div> <p><i>D.1.b</i> The initial treasury is 2/3 of the treasury at the end of the event phase.</p> <p><b>D.2</b> The other side has a basic maintenance equal to that of SUE in the current period and receives reinforcements as a minor country. It uses the fully controlled provinces (minus <i>Revolt</i> for the side of Loyalists) as their basic income (for the modifier).</p> <p><b>D.3</b> Each side has only a minimum of one general (and has any general coming from the initial test).</p> <div>E Military Phase</div> <p><b>E.1</b> If POL is at war, it can not have more than one stack in National provinces of SUECIA and provinces of NORWAY.</p> <div>F Interphase</div> <p><b>F.1</b> The <i>Revolt</i> extend as usual.</p> <div>G Peace Phase</div> <p><b>G.1</b> Only unconditional surrender is permitted to Loyalists and Rebels. If there are no <i>Revolt</i> left and no cities owned by Rebels, the Rebels surrender (whether played by SUE or as a minor). If there are no national provinces of Sweden not in <i>Revolt</i> or controlled by the Rebels, a minor Loyalists surrender automatically.</p> <p><i>G.1.a</i> If the Loyalists win, SUE remains Catholic and has its Monarch ruling before the event.</p> <p><i>G.1.b</i> If the Rebels win, SUE becomes Protestant/Tolerant (with a new ruler if they were not played by SUE).</p> <p><b>G.2 Consequences for Poland</b></p> <p><i>G.2.a</i> If POL was at war and the Loyalists win, POL gains 40 VP.</p> <p><i>G.2.b</i> If POL was at war and the Rebels win, the war continues as a normal war between POL and SUE (a peace can be signed now at the same turn).</p> <p><b>G.3 Consequences for DANIA</b></p> <p><i>G.3.a</i> If DAN* was at war and the Rebels win, a province of SUE is given to DAN* (choice of SUE, if possible a province that was once owned by DAN*).</p> <p><i>G.3.b</i> If DAN* was at war and the Loyalists win, the war continues as a normal war between DAN* and POL/SUE. A peace can be proposed at the same turn.</p> <p><b>G.4</b> The player of SUE on the losing side loses 20 VP.</p> <div>III-C RELIGIOUS WAR IN POLAND PBNew</div> <p><i>Date: Alternative history.</i></p> <div>A Activation:</div> <p>Replaces event III-13 (Union between Polonia and Suecia) if POL is protestant. The Swedish heir is elected as king of Poland, but remains protestant. He must fight a religious war in its new kingdom. Will be a variation on event IV-B (Civil War in Poland).</p>

<div data-bbox="114 90 1117 124"> <div>[E]410</div> <div>Political Events of Period III</div> </div> <div data-bbox="114 167 1117 204"> <div>III-D RELIGIOUS WARS IN FRANCE (× 5)</div> <div>PBNw</div> </div> <div data-bbox="114 220 1117 1513"> <p><i>Date: 1562-1598.</i></p> <p>The wars are fragmented in 5 parts.</p> <p>(1) First, Second and Third wars (1562-1570) with many truces broken by one side or the other.</p> <p>(2) Fourth and Fifth wars (1570-1575), where the Massacre of the Saint-Barthélémy heightens the intensity of the war.</p> <p>(3) Sixth and Seventh wars (1575-1580) where the Catholic League and the Duke of Guise seem almighty, and a background announced Dynastic Crisis.</p> <p>(4) Eighth war (1585-1598) that is the war of Succession for the French Crown.</p> <p>(5) Alternative history: more troubles if France is not Conciliant (mainly with foreign support).</p> <p><i>Duration:</i> until the end of event III-D (5) (Last Stand of the Heretics) or event III-D (4) (War of Succession) (as specified in these events) or at the end of period III.</p> <div data-bbox="114 512 255 539"> <b>A Activation:</b> </div> <p>This event is composed by many sections describing first the general conditions under which the wars are fought, then specifics of the evolution of the Wars: from a set of strictly Religious Wars that go harder and harder to a War of Succession. The passage from one event to another is described hereafter.</p> <p><b>A.1</b> This event can not happen before turn 11 (1540). If the turn is 10 or before, re-roll and do not mark off.</p> <p><b>A.2</b> Only one event III-11 (Wars of Religion in France) can be rolled and marked off each turn. If a second one is obtained, do not mark off and re-roll.</p> <p><b>A.3</b> After the end of this event, event III-11 (Wars of Religion in France) triggers an event R/D, and the box is marked.</p> <p><b>A.3.a</b> If FRA is Catholic/Conciliatory, its Monarch will have a malus of +2 to his Survival Test next turn.</p> <p><b>A.3.b</b> If FRA is Catholic/Counter-Reformation or Protestant, the <i>Revolt</i> is rolled on the table of FRA.</p> <p><b>A.4</b> From the first to the end of the last event, FRA is in religious Civil War and is limited in many aspects.</p> <div data-bbox="114 834 268 861"> <b>B Event Phase</b> </div> <p><b>B.1 The states within the State</b> Two minor countries, HUGUENOTIS and SANCTA LEGA are created for this event. No diplomacy is authorised on them; they have the same technology and military features as FRA.</p> <p><b>B.2 Les Huguenots</b></p> <p><b>B.2.a</b> HUGUENOTIS has the following provinces (if in FRA): <b>Caux, Touraine, Poitou, Quercy, Guyenne, Languedoc, Béarn, Dauphiné, Cévennes</b> (those provinces have a white shield border).</p> <p><b>B.2.b</b> HUGUENOTIS is protestant.</p> <p><b>B.2.c</b> Its main controller is ANG (if Protestant) or HOL (if it exists) or SUE (if Protestant), else [HOL/VEN/DAN]. This major power will be noted HUG (and the minor HUGUENOTIS); it may change at each turn (depending on the changes of religion).</p> <p><b>B.3 La Ligue</b></p> <p><b>B.3.a</b> SANCTA LEGA has the following provinces (if in FRA): <b>Normandie, Maine, Île-de-France, Orléanais, Picardie, Champagne, Berry, Bourgogne, Lyonnais, Provence</b> (those provinces have a yellow shield border).</p> <p><b>B.3.b</b> SANCTA LEGA is Catholic/Counter-Reformation.</p> <p><b>B.3.c</b> Its main controller is the Sole Defender of Catholic Faith (XIV.14.3.1) (if it is not FRA), HIS (if Catholic/Counter-Reformation), ANG (if Catholic), or HIS (Catholic/Conciliatory) in the last possibility. This major power will be noted LIG (and the minor SANCTA LEGA); it may change at each turn (depending on the changes of religion).</p> <p><b>B.4</b> The Loyalists are FRA and its allies. The Rebels are the revolted minor country (SANCTA LEGA or HUGUENOTIS) and its allies. REB is the Major Power that controls the Rebels (LIG or HUG).</p> <p><b>B.5</b> The Catholic side is the one of SANCTA LEGA else of Catholic FRA.</p> <p><b>B.6</b> The Protestant side is the one of HUGUENOTIS else of Protestant FRA.</p> <p><b>B.7 Military units</b></p> </div>	<div data-bbox="1120 90 2121 124"> <div>Political Events of Period III— master – 2016-04-14</div> <div>[E]411</div> </div> <div data-bbox="1120 167 2121 1513"> <p><b>B.7.a</b> Basic forces of FRA drops to <math>\Delta\ominus</math> (or <math>\Delta\ominus</math>, LID if in period II). Counters limit for FRA drops to 3 <math>\Delta</math> (and 2 <math>\Delta</math> for each minor).</p> <p><b>B.7.b</b> Basic forces of the new minors is <math>\Delta\ominus</math>, LID (or <math>\Delta\oplus</math> if in period II) if it has not the same religion than FRA and <math>\Delta\ominus</math> (<math>\Delta\ominus</math>, LID if in period II) if it has the same religion than FRA.</p> <p><b>B.7.c</b> If the minor is at war against FRA, then it is controlled by its main controller (either HUG or LIG). Else, if FRA is at war (even civil war against the other minor) then FRA may use its troops as if they were french troops.</p> <p><b>B.7.d</b> If FRA is at peace, the main controller of each minor may declare a limited intervention (following usual rules) of this minor in any existing war during the diplomatic phase. If the minor has the same religion than FRA, this can only be done if FRA agrees to. The main controller plays the troops of the minor and pay for its campaign or reinforcements.</p> <p><b>B.7.e</b> If FRA is at peace, and the main controller doesn't want to use the troops of the minor (or can't), then FRA may use them as if they were its own troops.</p> <p><b>B.7.f</b> If FRA is at peace, it may build troops of any of the two minors at regular cost. This counts toward purchase limit of the turn.</p> <p><b>B.7.g</b> If the minor is not used by somebody else, FRA has to pay the maintenance of any troops in addition to the basic maintenance of the minor.</p> <p><b>B.7.h</b> If FRA is at peace and the minor has less than its basic forces and is not used in another war by its main controller, then FRA has to build troops of the minor. It is not complied to buy more than the turn limit or to go bankruptcy, but it must build troops for the minor prior to any other administrative action. If both minors lack troops, FRA must start building troops of the minor having a different religion than its own.</p> <p><b>B.7.i</b> If FRA is at peace with the minor, it cannot voluntary dismiss (i.e. by not paying upkeep) troops of the minor below what was left at the end of the last civil war. Yet, if the loss is due to any other reason (such as being used in another war or by its main controller in a foreign intervention), FRA is not complied to buy new troops up to this value (just up to the basic maintenance of the minor).</p> <p><b>B.8 Incomes</b></p> <p><b>B.8.a</b> If FRA is at war against the minor, then it get no land income from the provinces of the minor (this also may change the industrial and commercial incomes of FRA). Manufactures in these provinces do not provide income either.</p> <p><b>B.8.b</b> If FRA is at peace, the provinces of the minor having the same religion as FRA are treated exactly like french provinces: they provide full land income, manufactures and gold mines provide also full income.</p> <p><b>B.8.c</b> If FRA is at peace, the provinces of the minor having different religion than FRA only provide half their regular income: land income is halved (this also change industrial and commercial income), manufactures provide only half their facial value and half their percentage, gold mines provide only 10 <math>\text{⌘}</math>, . . .</p> <p><b>B.8.d</b> If FRA is in civil war (but not against the minor), provinces of the minor only provide half their regular income (as above).</p> <p><b>B.8.e</b> The (land) income not perceived by FRA does not increase its foreign trade.</p> <p><b>B.8.f</b> If FRA is at peace, it only gets 75% of its colonial income if its catholic.</p> <p><b>B.9 Military control</b></p> <p><b>B.9.a</b> If FRA is not at war against the minor, then both may use provinces belonging to both of them as supply sources.</p> <p><b>B.9.b</b> If FRA is at war against the minor, then supply may go through any province not containing an unbesieged hostile troop or <i>Revolt</i>.</p> <div data-bbox="1120 1326 1296 1353"> <b>C Lasting Effects</b> </div> <p><b>C.1 Fragile Health of the Valois</b></p> <p><b>C.1.a</b> From the beginning of the event, and as long as the French Monarch is a Valois, it adds +3 to its Survival Test.</p> <p><b>C.2 Lack of Heirs</b></p> <p><b>C.2.a</b> An additional test of Dynastic Crisis is made at the beginning of each turn (at the Monarch Survival Phase). A malus of -1 is applied for each event III-11 (Wars of Religion in France) rolled since the beginning of the game.</p> </div>
--	--

C.2.b If a Dynastic Crisis occurs (because of the previous test or of a normal test after the death of the Monarch), apply directly event III-D (4) (War of Succession) as the first event of the turn. If a Dynastic Crisis occurs without the death of the Monarch, the rules of the event use the historical name **Henri III** to designate the current Monarch of FRA.

**C.3 Mandatory Change of Religious Attitude** FRA can be compelled to change its Religious choice during the war because of a Coup (event III-D (4) (War of Succession)), or an unconditional surrender caused by foreign powers. The following points occur (but not if the change is voluntary when designating an Heir of the Valois).

C.3.a FRA goes down to **-3** in Stability, loses **-1** in FTI, and loses 30 VP.

C.3.b The controller of the side imposing its Heir by a Coup, or the countries that force a unconditional surrender gain 30 VP each time a mandatory change is made.

General troubles in France each time an event happens

#### α POLITIC CRISIS

##### α-D Event Phase

**α-D.1** FRA may not be part of a new loan treaty until event III-D (Final) (End of the Wars of Religion)

**α-D.2** FRA loses **2** Stability.

**α-D.3** The diplomacy of FRA is lowered by **-2** (minimum of 3).

**α-D.4** FRA and its adversaries make a mandatory white peace (exception: see event III-D (5) (Last Stand of the Heretics)).

**α-D.5** FRA is involved in religious civil war when at war against Rebels. No-one can declare a war to FRA at those times, but MAJ may do *Foreign Intervention* in the war each time the war resumes (new event or broken Truce) excepted if explicitly forbidden.

#### β ECONOMIC CRISIS

##### β-E Event Phase

**β-E.1** On the first event, the Royal Treasury of FRA is diminished by half and loses at least 100 ⚡. On subsequent events, the Royal Treasury of FRA is halved with a minimum loss of 50 ⚡.

**β-E.1.a** If FRA makes a bankruptcy while at war against the rebels, they will receive  $\Delta\ominus$  extra reinforcement (LD each if there are two rebels).

**β-E.2** FRA (and also HUGUENOTIS and SANCTA LEGA) makes a mandatory trade refusal against all other countries. This does not provide CB or entail loss of stability and only last while FRA is in civil war.

**β-E.2.a** FRA only gets 75% of its colonial income if protestant, 50% if Catholic/Conciliatory and 25% if Catholic/Counter-Reformation.

**β-E.3** FRA can make no economic action (COL, TP, TFI, Concurrence) during the wars (even if the Truce was broken this turn), except as a reaction to concurrence.

**β-E.4** A **Pirate**⊕ is placed in CTZ of FRA; at most one **Pirate** can be here due to this event.

**β-E.5** FRA has to pay separate campaigns for any troop going in the ROTW or whose movement end on the ROTW map (so, it can bring back troops from the ROTW without penalty).

#### γ UPRISINGS IN FRANCE

##### γ-F Event Phase

**γ-F.1** If FRA is Catholic/Counter-Reformation or Catholic/Conciliatory, the Rebels are HUGUENOTIS. If FRA is Protestant, the Rebels are SANCTA LEGA. FRA is at war against the Rebels (it is not a declaration of war by the Rebels).

**γ-F.2** If FRA is Catholic/Counter-Reformation or Catholic/Conciliatory, roll 1d10 and place **Revolt**⊖ in the following provinces, excepted in the first province where the **Revolt** is⊕:

**γ-F.2.a** result odd: **Poitou, Quercy, Guyenne, Languedoc, Auvergne**;

**γ-F.2.b** result even: **Caux, Poitou, Guyenne, Touraine, Vendée**.

**γ-F.3** If FRA is Catholic/Counter-Reformation, add a **Revolt**⊕ in **Dauphiné** and a **Revolt**⊖ in **Armor**.

**γ-F.4** If the die-roll was 9 or 10 (between 7 and 10 if FRA is Catholic/Counter-Reformation), place a **Revolt**⊖ on a randomly chosen colony (or TP if no colony is available).

**γ-F.5** If FRA is Protestant, place a **Revolt**⊕ in **Île-de-France**, a **Revolt**⊖ in **Lyonnais** and roll 1d10 for the other ones (the **Revolt** is⊕ in the first province of the list and⊖ in the others):

**γ-F.5.a** result even: **Provence, Normandie, Maine, Troyes, Vendée**;

**γ-F.5.b** result odd: **Orléanais, Champagne, Touraine, Caux, Picardie**.

**γ-F.6** If the die-roll was 10, place a **Revolt**⊖ on a randomly chosen colony (or TP if no colony is available).

**γ-F.7** The Rebels receive 2 minor unnamed generals to be placed on **Revolt** (they can only lead **Revolt**, not forces of the Rebels, and are eliminated when the **Revolt** is finally suppressed).

**γ-F.8** The Rebels own its provinces and control those where there is a **Revolt**⊕

#### δ MILITARY TROUBLES

##### δ-G Event Phase

**δ-G.1** On the first event, only the basic forces of FRA are kept ( $\Delta\oplus$ ,  $\Delta\ominus$ , LD), in veteran status. If FRA has less than this, it will receive less troops than stated. The rebels takes their forces first, then the non-rebelled minors and lastly FRA.

**δ-G.2** Roll 1d10:

**δ-G.2.a** result even: FRA keeps  $\Delta\ominus$  and LD; the Rebels have  $\Delta\ominus$ ; the minor of the same religion as FRA has  $\Delta\ominus$ ;

**δ-G.2.b** result odd; FRA keeps LD, the Rebels have  $\Delta\oplus$ ; the minor of the same religion as FRA has  $\Delta\ominus$ .

**δ-G.3** If the current turn is in period II, FRA adds  $\Delta\ominus$  to its forces and the minor sharing its religion add LD.

**δ-G.4** If FRA is Emperor of the HRE, it can use the  $\Delta$  of HRE as a help in this war.

**δ-G.5** Minor country LOTHARINGIA is activated and allied of the Catholic side. It gives 1 LD, both sides can pass or stop in its provinces but the **Revolt** never extend in those.

**δ-G.6** The forces of the Rebels are deployed in their provinces that are in **Revolt**. The forces of FRA are placed in any province of FRA that does not belong to the Rebels.

**δ-G.7** The naval forces of FRA may defect as follows. Roll 1d10.

**δ-G.7.a** result 1-8: FRA keeps all the naval forces.

**δ-G.7.b** result of 9: 1 ND is given to the Major Power controlling the Rebels and the rest are Rebel forces.

**δ-G.7.c** result of 0: 1 ND is given to the first Protestant country of the list: ANG, HOL, SUE, POL, or to the Major Power controlling the rebels if there is none, and the rest are Rebel forces.

**δ-G.7.d** Naval forces of the Rebels have to go in a port of Rebels. When, at the end of a round, there is no port left to Rebels, the navy comes back in the ownership of FRA.

##### δ-H Administrative Phase

**δ-H.1** FRA can build reinforcements as usual and deploys them in provinces not owned by the Rebels.

**δ-H.2** The Rebels gain reinforcements in offensive mode on the minor table, with a bonus of **+2** and some other modifiers (see the various steps of the events). It gains only the LD written in the table, not the F, CM or leaders.

**δ-H.2.a** If FRA is not Catholic/Conciliatory, add **+1** to the roll.

**δ-H.2.b** The Rebels receive 1f if the result is even, or 2f if the result is equal to 11 or higher.

**δ-H.2.c** The reinforcements of the Rebels are deployed in provinces in **Revolt**, and the fortresses can only be deployed in provinces with **Revolt**⊕.

**δ-H.3 Leaders** After the building of forces, the loyalty of the leaders is tested.

**δ-H.3.a** *Montmorency* is always loyal to FRA.

**δ-H.3.b** SANCTA LEGA receives *Henri de Guise*.

**δ-H.3.c** HUGUENOTIS receives *Coligny*, *Condé* and, beginning with event III-D (2) (The Saint-Barthelemy), *Navarre*.

**δ-H.3.d** Every other named leader is checked by rolling 1d10: used by the Catholic side if result 1-7; used by the Protestant side if the result is 8-10.

**β-D.3** FRA may choose to commit The Saint-Barthelemy (III-D (2)) on any later turn. Consider that III-D (2) is one of the four events rolled this turn and apply all the relevant effects.

#### Turn 2 and following: Extension of the War

#### γ EXTENSION OF THE WAR

##### γ-E Event Phase

##### γ-E.1 *Revolt* extension

γ-E.1.a For each two *Revolt* still existing in France (including colonial empire), roll die on the *Revolt* table for FRA. If the province is neither occupied by loyalist troops or part of the non-rebelling minor, place a *Revolt*⊖ which takes the city there.

γ-E.1.b Roll a die. Add 2 if FRA is Catholic/Counter-Reformation, subtract 2 if FRA is protestant. On a roll of 6 or more, place a *Revolt*⊖ in a randomly chosen french colony (if there is no french colony or all have 2 *Revolt*⊕, in a randomly chosen TP).

##### γ-F Administrative Phase

γ-F.1 Rebel will receive reinforcement as on turn 1.

##### γ-G Diplomatic Phase

γ-G.1 Foreign interventions are now permitted.

γ-G.2 REB can make a limited intervention as an ally on the Rebels (and it is not limited to naval forces only from now on).

γ-G.3 HOL can make a limited intervention as an ally of a rebel HUGUENOTIS.

γ-G.4 HIS can make a limited intervention as an ally of a rebel SANCTA LEGA.

##### γ-H Military Phase

γ-H.1 **Intervention of PALATINATUS** If inactive, PALATINATUS makes a limited intervention as an ally of the Rebels (it is a mercenary army). It is played by REB. The intervention force is *Johann Kasimir*, one Ⓐ⊕ and 1 LID. If the War of the Schmalkaldic League or the League of Nassau exists, and the Rebels are HUGUENOTIS, this intervention is made with 2 Ⓐ⊕. *Johann Kasimir* is a general of PALATINATUS (and serves this country if it is at war elsewhere) that will stay as long as event III-D (2) (The Saint-Barthelemy) is not finished. After that, PALATINATUS is without leader (for intervention) or has normal generals (for other wars).

#### Turn 2 and following: Breaking of Truces

#### δ BREAKING OF TRUCES

##### δ-I Event Phase

δ-I.1 If a Dynastic Crisis occurs, event III-D (4) (War of Succession) will happen at this turn. If III-11 is rolled for at this turn, mark off the box and consider that it triggers III-D (4).

δ-I.2 As long as a new III-11 is not rolled for, the Truce can be broken as explained in event part III-D.ζ (Truces during the Wars of Religion). A war begins anew, as explained there.

δ-I.3 If a new event III-11 is rolled for in the Political Event Phase, the next phase of event III-11 begins (III-D (2), III-D (3) or III-D (4)). Go to this event.

δ-I.4 If none of this happens, FRA is in civil peace, and has its activity limited by event part III-D.ζ (Truces during the Wars of Religion) only.

##### δ-J Administrative Phase

δ-J.1 If the Truce has been broken, apply the full effects of event part III-D.α (Politic crisis), event part III-D.β (Economic crisis), event part III-D.γ (Uprisings in France) and event part III-D.δ (Military Troubles), and the following points.

##### δ-K Diplomatic Phase

δ-K.1 Foreign interventions are now permitted.

δ-K.2 REB can make a limited intervention as an ally on the Rebels (and it is not limited to naval forces only from now on).

δ-K.3 HOL can make a limited intervention as an ally of a rebel HUGUENOTIS.

δ-K.4 HIS can make a limited intervention as an ally of a rebel SANCTA LEGA.

##### δ-L Military Phase

δ-L.1 The war is prosecuted according to event part III-D.ε (Military operations during the wars), and event part §α (Military operations during the first event).

δ-L.2 **Intervention of PALATINATUS** If inactive, PALATINATUS makes a limited intervention as an ally of the Rebels (it is a mercenary army). It is played by REB. The intervention force is *Johann Kasimir*, one Ⓐ⊕ and 1 LID. If the War of the Schmalkaldic League or the League of Nassau exists, and the Rebels are HUGUENOTIS, this intervention is made with 2 Ⓐ⊕. *Johann Kasimir* is a general of PALATINATUS (and serves this country if it is at war elsewhere) that will stay as long as the event III-D (2) (The Saint-Barthelemy) is not finished. Beginning with next event, PALATINATUS is back to normal (no leader for intervention or normal generals for other wars).

##### δ-M Peace Phase

δ-M.1 If a Major Power makes a limited intervention and the side it helps obtains a Truce in its favour, the Major Power gains 10 VP if it had land forces in at least one battle or one siege (including voluntary surrender) against the enemy side.

◀ end of specific conditions of the first event ▶

#### III-D (2) THE SAINT-BARTHELEMY PB

#### Turn 1

##### A Event Phase

A.1 A new war breaks out. Apply the full effects of event part III-D.α (Politic crisis), event part III-D.β (Economic crisis), event part III-D.γ (Uprisings in France) and event part III-D.δ (Military Troubles).

A.2 *Navarre* is available as a HUGUENOTIS general.

##### B Diplomatic Phase

B.1 No Foreign intervention is allowed.

B.2 REB can make a somewhat limited intervention in the war, only with naval forces (in order to make or break blockade; no naval movement of Rebel land forces) or with land forces in coastal besieged provinces of the Rebels, in order to stop the siege; afterwards it can withdraw or remain in this province only.

B.3 The Rebels control all cities in the rebel minor country (and not only those with a *Revolt* in there).

B.4 FRA can then announce an attempt of Massacre of the Saint-Barthélémy (§α), and resolves this odious deed. This is of course mandatory if this event happen due to FRA's choice during event III-D (1) (The first 3 Wars of Religion).

B.5 If FRA is Catholic/Counter-Reformation, LIG can make a limited intervention as an ally of FRA.

▶ Specific conditions of the second event ▶

#### α MASSACRE OF THE SAINT-BARTHÉLÉMY

##### α-C Diplomatic Phase

α-C.1 1d10 is rolled for every rebel leader, excepted *Henri de Guise* and *Navarre*. An even result means that the leader was killed in the Massacre.

α-C.2 Each city in the rebel minor country is taken by FRA by rolling 1d10 higher than the level of the fortress; one die is rolled for each city. The cities taken this way are military controlled by FRA but still owned by the rebel minor country.

α-C.3 The Rebels will have a malus of −1 to receive its reinforcements at this turn.

α-C.4 The Rebels can no longer make a limited intervention in event III-1 (1) (Revolt of the United Provinces).

α-C.5 FRA loses 1 Stability.

**α-C.6** The Survival roll of the French Monarch is modified by an additional **+1** until the end of the Wars of Religion.

### β MILITARY OPERATIONS AFTER THE SAINT-BARTHÉLÉMY

#### β-D Military Phase

**β-D.1** Use the general rules of event part III-D.ε (Military operations during the wars).

**β-D.2** If all the leaders of on side are captured, wounded or killed, this side signs a level 1 peace in favour of its enemy at the end of the round.

**β-D.3** At the beginning of each military round (except the first), a new *Revolt* is rolled for in France. If this *Revolt* is in the rebel minor country and has no *Revolt* nor Loyalist land force in it, place a new *Revolt* which takes the city.

**β-D.4** FRA (and its allies) perform automatic surrenders of rebel fortresses as in the previous war.

→ end of specific conditions of the second event →

#### E Peace Phase

**E.1** If LIG was in intervention, allied to a Catholic/Counter-Reformation FRA, it wins 15 VP if the Truce is in favour of FRA and LIG had forces in at least one battle or one siege (including voluntary surrender) against the Rebels.

Turn 2 and following

#### F Event Phase

**F.1** The event goes on as described in event part III-D (1).δ (Breaking of Truces), except that the military operations follow the rules of event part §β (Military operations after the Saint-Barthélémy), or as in event part III-D (1).γ (Extension of the war) if no peace was signed.

### III-D (3) THE RISE AND FALL OF THE LEAGUE PB

Turn 1

#### A Event Phase

**A.1** A new war breaks out. Apply the full effects of event part III-D.α (Politic crisis), event part III-D.β (Economic crisis), event part III-D.γ (Uprisings in France) and event part III-D.δ (Military Troubles).

**A.2** If REB spends 50 ⚔, the Rebels will have a bonus of **+1** to their reinforcement roll.

**A.3** If FRA is Catholic/Counter-Reformation or Catholic/Conciliatory, LIG may give finances to SANCTA LEGA. It spends 100 ⚔ and takes the control of the stack commanded by *Henri de Guise* (he can take new forces during the military rounds as long as the hierarchy is respected). One purpose of this is to attempt a Coup by the League (as explained in event part §β (Guise Coup and assassination)).

#### B Diplomatic Phase

**B.1** Usual Foreign interventions are permitted (even during the first turn).

→ Specific conditions of the third event →

### α MILITARY OPERATIONS DURING THE LEAGUE

#### α-C Military Phase

**α-C.1** Use the general rules of event part III-D.ε (Military operations during the wars).

**α-C.2** At the beginning of each military round (except the first), a new *Revolt* is rolled for in France. If this *Revolt* is in the rebel minor country and has no *Revolt* nor Loyalist land force in it, place a new *Revolt* which takes the city.

**α-C.3** FRA (and its allies) perform automatic surrenders of rebel fortresses as in the previous wars.

### β GUISE COUP AND ASSASSINATION

#### β-D Peace Phase

**β-D.1** If LIG has taken control of *Henri de Guise* and this general is not Captured, it may attempt a Coup that will make *Henri de Guise* the Heir of the kingdom, by spending 100 ⚔ more.

**β-D.2** If FRA is Catholic/Conciliatory, or if LIG has taken control of *Henri de Guise*, FRA may attempt to murder this pretender, even if LIG does not attempt a Coup.

**β-D.3** Both those operations are described in the following event, event III-D (4) (War of Succession) and are resolved as described in Coup and Murder of the Pretender (III-D (4).η).

**β-D.3.a** If the Coup is successful, event III-D (4) (War of Succession) begins the very next turn, with *Henri de Guise* as the mandatory Heir (see afterwards).

**β-D.3.b** If *Henri de Guise* was murdered and no event event III-11 happens (by Dynastic Crisis or rolled event), the Truce is broken by the SANCTA LEGA who is the Rebel for one particular war. Apply the procedure for a Truce broken, with SANCTA LEGA as the Rebels.

→ end of specific conditions of the third event →

Turn 2 and following

#### E Event Phase

**E.1** The event goes on as described in event part III-D (1).δ (Breaking of Truces), except that the military operations follow the rules of event part §α (Military operations during the League), or as in event part III-D (1).γ (Extension of the war) if no peace was signed.

**E.1.a** If *Henri de Guise* was murdered the previous turn and no event III-11 happens (either by Dynastic Crisis or rolled event), the Truce is now broken by the SANCTA LEGA who is the Rebel for this particular war. Apply the procedure for the breaking of a Truce, with SANCTA LEGA as the Rebels. SANCTA LEGA receives the general *Mayenne* (× B 2.2.2 [Event III-D]).

**E.1.b** Else, the Rebels are those of the previous war if the Truce is broken.

**E.2 Foreign limited interventions** (added to those already allowed).

**E.2.a** Some limited interventions are allowed here; a country can help only the first at-war country listed, or none at all.

**E.2.b** HOL can help HUGUENOTIS else a non Catholic/Counter-Reformation FRA.

**E.2.c** ANG Protestant or Catholic/Counter-Reformation can help HUGUENOTIS else a non Catholic/Counter-Reformation FRA.

**E.2.d** ANG Catholic/Counter-Reformation can help SANCTA LEGA, else a non Protestant FRA.

**E.2.e** HIS can help SANCTA LEGA, else a non Protestant FRA.

### III-D (4) WAR OF SUCCESSION PB

#### A Activation:

This events is activated by a Dynastic Crisis during the Wars of Religion, or as the fourth event of III-11, or after a successful Coup by *Henri de Guise*.

Turn 1

#### B Event Phase

**B.1** HUGUENOTIS and SANCTA LEGA revolt and will fight to impose their pretender on the French Crown. Every one is sure now that there is no direct Heir of the last Valois Monarch, *Henri III*.

**B.2** If the French Monarch *Henri III* died at the beginning of this turn, FRA has to choose its Heir. Apply now the effects of Designation of the Heir (§α), followed by the effect of the new Religious attitude.

**B.3** If a Coup was successful at the previous turn, the designated Heir is now the one of the side having made this Coup. Apply his choice of Religious Attitude.

**B.4** Otherwise, apply only the event corresponding to the current Religious attitude of FRA; FRA will have the opportunity to modify the would-be Heir at the time of the death of the last Valois Monarch.

**B.5** Only a Coup or a mandatory change of religion can change the Heir once he is appointed.

<div>[E]420</div> <div>Political Events of Period III</div> <div> <p><b>B.6</b> Apply the full effects of event part III-D.α (Politic crisis), event part III-D.β (Economic crisis), event part III-D.γ (Uprisings in France) and event part III-D.δ (Military Troubles). Also apply event part §ε (Military operations during the War of Succession) and event part §ζ (How to end the War of Succession?).</p> <p>◀ <b>The choice of the Heir</b> ▶</p> <p><b>α DESIGNATION OF THE HEIR</b></p> <p><b>α-C Event Phase</b></p> <p><b>α-C.1</b> There are three possible Heirs. Each one is linked to the choice of a Religious attitude, and FRA can not change completely its attitude on its own: Catholic/Counter-Reformation can not choose Protestant and a Protestant FRA can not choose Catholic/Counter-Reformation. Any other choice is permitted. FRA can be forced to change its attitude because of a Coup.</p> <p><b>α-C.2 Catholic/Counter-Reformation</b> The Heir is <b>Henri de Guise</b>. If <i>Henri de Guise</i> is alive, the general is also the Heir; if not it's a cousin with random military capacities. The Heir has values 6/9/7. When the Monarch is <b>Henri de Guise</b>, FRA gains a free maintenance for one ⚠, event if it is still in Civil War. FRA immediately annexes <b>Lorraine</b>.</p> <p><b>α-C.3 Catholic/Conciliatory</b> The Heir would be <b>Henri IV</b>, that is a converted <b>Henri de Navarre</b>. If <i>Navarre</i> is alive, the general is also the Heir; if not it's a cousin with random military capacities. The Heir has values 9/9/9. When the Monarch is <b>Henri IV</b>, FRA gains a free maintenance for one ⚠, event if it is still in Civil War.</p> <p><b>α-C.4 Protestant</b> The Heir is <b>Henri de Navarre</b> who remains Protestant. If <i>Navarre</i> is alive, the general is also the Heir; if not it's a cousin with random military capacities. The Heir has values 9/9/9.</p> <p><b>α-C.5 A new religious attitude</b> The designation of an Heir changes immediately the Religious Stand of FRA.</p> <p><i>α-C.5.a</i> The Heir is Crowned now if the king is dead, or assists the king and will be crowned at the time of its death.</p> <p><i>α-C.5.b</i> If the Heir dies, another of the same family (and same characteristics) will stand forward.</p> <p><i>α-C.5.c</i> An Heir does not make Survival Test before its crowning; it will last 5 turns beginning with the turn of its crowning.</p> <p><b>α-C.6</b> Apply one of France is Protestant (§β), France is Catholic/Counter-Reformation (§γ) or France is Catholic/Conciliatory (§δ).</p> <p><b>β FRANCE IS PROTESTANT</b></p> <p><b>β-D Event Phase</b></p> <p><b>β-D.1</b> SANCTA LEGA rebels, following the general rules.</p> <p><b>β-D.2</b> If <b>Henri III</b> is dead and the Heir is crowned, LIG can make a limited intervention from the first turn of the war. Moreover, SANCTA LEGA will have a bonus of <b>+2</b> to its reinforcement roll.</p> <p><b>β-D.3</b> If <i>Henri de Guise</i> is dead, SANCTA LEGA receive the general <i>Mayenne</i> (B.2.2.2).</p> <p><b>β-D.4</b> LIG can always make a limited intervention from the second turn of the war onward.</p> <p><b>β-D.5</b> HUGUENOTIS is immediately annexed by FRA: its provinces become french provinces (and provide income as such) and its units (armies, leaders) become french units. Both the counter limits and free maintenance of FRA resumes their regular values.</p> <p><b>γ FRANCE IS CATHOLIC/COUNTER-REFORMATION</b></p> <p><b>γ-E Event Phase</b></p> <p><b>γ-E.1</b> HUGUENOTIS rebels, following the general rules.</p> <p><b>γ-E.2</b> If <b>Henri III</b> is dead and the Heir is crowned, HUG and HOL can make a limited intervention from the first turn of the war.</p> <p><b>γ-E.3</b> HUG and HOL can always make a limited intervention from the second turn of the war onward.</p> <p><b>γ-E.4</b> SANCTA LEGA is immediately annexed by FRA: its provinces become french provinces and its units become french units. Both the counter limit and maintenance of FRA resume their regular values.</p> </div>	<div>Political Events of Period III— master – 2016-04-14</div> <div>[E]421</div> <div> <p><b>δ FRANCE IS CATHOLIC/CONCILIATORY</b></p> <p><b>δ-F Event Phase</b></p> <p><b>δ-F.1</b> If the king is <b>Henri III</b>, a Valois</p> <p><i>δ-F.1.a</i> Both SANCTA LEGA and HUGUENOTIS rebel, and a three-sided war begins between FRA and the two Rebels.</p> <p><i>δ-F.1.b</i> <i>Navarre</i> is a possible Heir but is hesitant. He is used as a general by FRA, excepted if HUGUENOTIS controls or besieges Paris. He will go the side of FRA as soon as he is chosen as Heir at the death of <b>Henri III</b>, or could go back to the Protestant side if <b>Henri de Navarre</b> is the chosen Heir, or if a Protestant Coup is made.</p> <p><b>δ-F.2</b> Notice that as soon as <b>Henri III</b> die, one of the minor (the one having the chosen heir) will sign peace with FRA and be immediately annexed.</p> <p><b>δ-F.3</b> If the king is the Heir, (brand-new catholic <b>Henri IV</b>).</p> <p><i>δ-F.3.a</i> SANCTA LEGA rebels, following the general rules.</p> <p><b>δ-F.4</b> If <i>Henri de Guise</i> is dead, SANCTA LEGA receive the general <i>Mayenne</i> (B.2.2.2).</p> <p><b>δ-F.5</b> If <i>Henri de Guise</i> is alive, SANCTA LEGA will have a bonus of <b>+2</b> to its reinforcement roll.</p> <p><b>δ-F.6</b> HUGUENOTIS is immediately annexed by FRA.</p> <p>◀ <b>end of the choice of the heir</b> ▶</p> <p><b>G Diplomatic Phase</b></p> <p><b>G.1</b> Foreign intervention are allowed.</p> <p><b>H Administrative Phase</b></p> <p><b>H.1</b> FRA gets full income of all non-revolted, controlled provinces, including those belonging to a revolted rebel or in the ROTW.</p> <p><b>H.2</b> As soon as the last Valois dies, FRA is no more restricted in administrative actions.</p> <p><b>H.3 Reinforcements of Rebels</b></p> <p><i>H.3.a</i> If LIG spends 50 ⚡, the SANCTA LEGA will have a bonus of <b>+1</b> to their reinforcement roll.</p> <p><i>H.3.b</i> If HUG spends 50 ⚡, the HUGUENOTIS will have a bonus of <b>+1</b> to their reinforcement roll.</p> <p>Turn 2 and afterwards</p> <p><b>I Event Phase</b></p> <p><b>I.1</b> Except for what follows, use the same rules as turn 1.</p> <p><b>I.2</b> If the French Monarch <b>Henri III</b> died at the beginning of some turn, FRA has to choose its Heir (if no Coup has imposed an Heir). Apply the effect of event part §α (Designation of the Heir), and then the effect of the (possibly new) Religious attitude that follows. The revolted side receives new <b>Revolt</b> according to event part III-D.γ (Uprisings in France).</p> <p><b>I.3</b> Else, if a Coup was successful, apply event part III-D.γ (Uprisings in France) to roll for new <b>Revolt</b> of the now rebel side. The war resumes with rebels depending on the new religious attitude.</p> <p><b>I.4</b> If a pretender was murdered on the previous turn, new <b>Revolt</b> are rolled for according to event part III-D.γ (Uprisings in France) for this side only.</p> <p><b>I.5</b> SABAUDIA will make (or continue) a limited intervention as an ally of SANCTA LEGA (or FRA if Catholic/Counter-Reformation), with an ⚠ and one unnamed minor general.</p> <p><b>J Administrative Phase</b></p> <p><b>J.1 Reinforcements of Rebels</b></p> <p><i>J.1.a</i> Reinforcements will be received for the rebel side(s) according to event part III-D.δ (Military Troubles) but the initial repartition of forces is not made anew (it has already been done).</p> <p><i>J.1.b</i> If LIG spends 50 ⚡, the SANCTA LEGA will have a bonus of <b>+1</b> to their reinforcement roll.</p> <p><i>J.1.c</i> If HUG spends 50 ⚡, the HUGUENOTIS will have a bonus of <b>+1</b> to their reinforcement roll.</p> <p>◀ <b>Specific conditions of the War of Succession</b> ▶</p> </div>

In this case this is the only condition of the peace, and FRA has a mandatory defensive alliance with the winners during the reign of the new Monarch.</div> </div> </div> <div data-bbox="1122 1423 2121 1513"> <div>θ-N.4</div> <div>As soon as FRA is at peace at an end-of-turn and Catholic/Conciliatory, event III-D (Final) (End of the Wars of Religion) is applied.</div> </div> <div data-bbox="1122 1487 2121 1513"> <div>◀ end of specific conditions of the war of succession ▶</div> </div> </div>
---	--

**III-D (5) LAST STAND OF THE HERETICS** PB

Date: Alternate history.

**A Condition:**

**A.1** If event III-D (4) (War of Succession) is not finished, do not mark off and reroll.

**A.2** If FRA is Catholic/Conciliatory and no unconditional surrender was obtained by FRA against HUGUENOTIS in a previous war, mark off the event, play R/D instead and the French king will have a malus of +2 to his Survival test for the next turn.

**A.3** If FRA is Catholic/Conciliatory but did force an unconditional surrender of HUGUENOTIS in a previous war, HUGUENOTIS rebels itself.

**A.4** If FRA is Protestant or Catholic/Counter-Reformation at the end of event III-D (4) (War of Succession) and event III-D (Final) (End of the Wars of Religion) was not applied, the rest of the event happens.

**A.5** If FRA is Protestant or Catholic/Counter-Reformation but event III-D (Final) (End of the Wars of Religion) already occurred, play R/D instead with the *Revolt* on the table of FRA.

**B Event Phase**

**B.1** One of SANCTA LEGA or HUGUENOTIS rebels itself depending on the religion of FRA. Apply the full effects of event part III-D.α (Politc crisis), event part III-D.β (Economic crisis), event part III-D.γ (Uprisings in France) and event part III-D.δ (Military Troubles). Also apply event part §α (Military operations during the fifth event) and event part §β (How to end the Last Stand?).

**B.2** If the revolting minor was already annexed by FRA (this may happen if a mandatory religious change is then forced on FRA), recreate it immediately. It will get no troops at beginning.

**B.3** If the non-rebelling minor still exists, it is immediately annexed by FRA: its provinces become regular French provinces and its units become french units.

**B.4** REB is not obliged to do a white peace with FRA.

**B.4.a** If it chooses to continue a war, it can make a full military intervention in the Civil War. But it will continue to suffer a normal loss of Stability at the end of turns, whereas FRA will lose at most 2 Stability each turn during the Civil War.

**B.4.b** If it chooses to sign a white peace, or if it was at peace, REB can make a limited intervention in the war.

**B.5** LIG can make a limited intervention as an ally of a Catholic/Counter-Reformation FRA.

**B.6** HOL can make a limited intervention as an ally of Protestant FRA. Else it can make a limited intervention as an ally of HUGUENOTIS.

**C Diplomatic Phase**

**C.1** Usual foreign interventions are allowed.

→ **Specific conditions of the last event** →

**α MILITARY OPERATIONS DURING THE FIFTH EVENT****α-D Military Phase**

**α-D.1** Use the rules of event part III-D.ε (Military operations during the wars).

**α-D.2** A city in FRA that had not a *Revolt* at the beginning of the turn, makes an immediate voluntary surrender if besieged by a land stack of FRA (or its allies) that sets a siege with at least one ⚠ and there is no more *Revolt* in the province (including if the *Revolt* was just crushed this round).

**β HOW TO END THE LAST STAND?****β-E Peace Phase**

**β-E.1** FRA loses at most 2 Stability per turn because of the war.

**β-E.2** No Truce happens ever in this civil war. It keeps going until one side wins.

**β-E.3** The War ends if FRA controls Paris, all the places of safety and the fortresses in provinces where there was a *Revolt* at some point in the war and wins a Major Victory over Rebel forces (at least 3 LD of Rebels) or if all Rebel forces and *Revolt* have been eliminated.

**β-E.4** The War ends if FRA has no land forces left and the Rebel controls the city of Paris. An change of Heir in favour of the Rebels is automatically made (with no possible murder attempt by FRA) that causes a mandatory change of Religious attitude. The new Monarch of FRA is the Heir of the winning side.

**β-E.5** FRA ends as barely victorious if the last turn of period III has ended (now or previously).

**γ END OF THE LAST STAND****γ-F Peace Phase**

**γ-F.0.a** The new Monarch is the last designated Heir (if it did change; the former one is pushed aside)

**γ-F.0.b** All *Revolt* are removed.

**γ-F.0.c** Minor countries having forces left in FRA propose an immediate white peace to FRA. If it is accepted, they withdraw and are at peace with FRA. Else, they are now in a regular war with FRA (but no one is victim of a declaration of war).

**γ-F.0.d** Any Major power having forces left in FRA has to sign a white peace, or are from now on in regular war with FRA. Their military activity is no more limited; nobody is victim of a declaration of war (but FRA and its enemies are at war), and regular call to allies will be possible on the next turn. This war causes normal loss of Stability, beginning with a loss of 2 Stability this turn for everyone. The Sole Defender of Catholic Faith (XIV.14.3.1) could impose a change of Religion, but by normal rules and not by specific rules of this event.

**γ-F.0.e** When this War ends, apply event III-D (Final) (End of the Wars of Religion).

→ **end of specific conditions of the last event** →

**III-D (FINAL) END OF THE WARS OF RELIGION** PB**A Activation:**

**A.1** This event is applied when the fifth event III-11 (Wars of Religion in France) is at last resolved.

**A.2** This event is applied also as soon as FRA is at peace and Catholic/Conciliatory after the end of the fourth event.

**A.3** At the end of the last turn of the period III (or the first turn of period IV if event III-D (4) (War of Succession) is happening), this event is applied regardless of other conditions.

**B Interphase**

**B.1** The Wars of Religion are ended. Further events III-11 cause R/D with the *Revolt* in FRA.

**B.2** The Monarch should be the designated Heir, or the Heir is crowned right now.

**B.3** Minor countries HUGUENOTIS and SANCTA LEGA are immediately annexed by FRA. All their provinces are now regular provinces of FRA. All their land forces become french land forces. FRA gets back its regular counter limit and maintenance. The navy is given back to FRA. If alive, *Condé*, *Coligny*, *Mayenne*, *Navarre* and *Henri de Guise* retire (excepted the now Monarch); all other french leaders are now regular french leaders.

**B.4** If the king is *Henri de Guise* or *Henri IV*, FRA gains a free maintenance of one ⚠ until the end of his reign. This is not the case if the Monarch is *Henri de Navarre*.

**B.5 Victory Points** ANG, HOL and HIS win each 25 VP if they have been allied at least once to the side of the Heir that won finally the wars. They lose 25 VP if they have fought against this winning side.

**B.6 Economic consequences** Roll 1d10 and add +1 for each favourable truce conceded to the rebels, +1 if FRA has been complied to change its Religious attitude, and +1 if FRA is Catholic/Counter-Reformation.

**B.6.a** Result 1-3: 1 level of French TF is lost to HOL;

**B.6.b** Result 4-5: 1 level of French TF is lost to HOL, and 1 to ANG;

**B.6.c** Result 6-10: 2 levels of French TF are lost to HOL, and 1 to ANG; the FTI of FRA is diminished by -1;

B.6.d Result 11+: 2 levels level of French TF are lost to HOL, and 2 to ANG; both FTI and DTI of FRA are diminished by -1;

B.6.e HOL chooses first the TF it takes, then ANG chooses.

B.6.f If FRA is Catholic/Counter-Reformation, the level chosen by HOL are lost but not received by HOL; ANG gains the levels if it is Catholic, if not those levels are lost for everyone.

B.6.g if ANG is Catholic/Counter-Reformation and FRA is not, SUE chooses and gains the levels instead of ANG.

### B.7 Undesired policy

B.7.a If the chosen Heir was Protestant but FRA is no more Protestant at the end of the Wars of Religion, FRA has a malus of -2 to all its colonial actions during the period IV and its FTI and DTI are diminished by a further 1.

B.7.b If the chosen Heir was Catholic/Conciliatory but FRA is Catholic/Counter-Reformation at the end of the Wars of Religion, FRA has a malus of -1 to all its colonial actions during the period IV. Each event R/D obtained in period IV has a chance to make appear a second **Revolt** in FRA. Roll 1d10: 1-3 **Poitou**, 4-6: **Guyenne**, 7-10: none.

B.7.c If the chosen Heir was Catholic/Counter-Reformation but FRA is no more Catholic/Counter-Reformation, FRA has a malus of -2 to all its Technological actions during the period IV. Each event R/D obtained in period IV has a chance to make appear a second **Revolt** in FRA. Roll 1d10: 1-3 **Armor**, 4-6: **Orléanais**, 7-10: none.

### Out of table events

- A Thirty Years' War
- B Civil War in Poland

<div>[E]428</div> <div>Political Events of Period IV</div> <div>IV-1 (1) BOHEMIAN REVOLT PBNew</div> <div>Date: 1618-1621.</div> <div>[This event describes the War for BOHEMIA, whereas the break out of a general German conflict (that historically followed this event) is dealt with in event IV-A (Thirty Years' War).]</div> <div>A Event Phase</div> <div>A.1 The Winter King The minor country BOHEMIA is created / separated / breaks alliance (depending on its previous status) from its current allegiance (even a GE), and allies itself with PALATINATUS (which would also breaks from an existing GE). The first Major power in the list: FRA (except if Catholic/Counter-Reformation), POL (if Protestant), else SUE (even if Catholic) controls both those countries and have them placed in EW on its diplomatic track.</div> <div>A.2 BAVARIA and minor HABSBURGUM declares war to these two countries. This is a Religious Civil War (see section IV.5.5.5 (Religious Wars, Civil Wars)) in the HRE.</div> <div>A.2.a AUS has a free CB against BOHEMIA and must use it or lose 2 Stability.</div> <div>A.2.b If AUS* declares war, BAVARIA is placed in EW of AUS* and is controlled by [AUS/HIS].</div> <div>A.2.c HIS is allowed a limited intervention in the war as an ally of AUS*. Other countries are constrained by usual rules.</div> <div>A.3 The Revolt of Bethlén</div> <div>A.3.a A <b>Revolt</b>⊕ is placed in a randomly chosen province belonging to AUS* in HUNGARIA. It controls the city. The <b>Revolt</b> is controlled by RUS.</div> <div>A.3.b The military forces of the Revolt of Bethlén can use up to 1 ⚡ and 2 LD of the Hungarian counters (and the AUS* can use at most one ⚡ and 2 LD from Hungarian counters).</div> <div>A.4 TUR cannot declare war against AUS* at this turn.</div> <div>B Administrative Phase</div> <div>B.1 Minor HABSBURGUM receives its usual forces and reinforcements.</div> <div>B.2 BAVARIA has 1 ⚡⊕, 3 LD (all Veterans), 1 ♠ and is commanded by Tilly (× A 4.4.4 -1 [Event IV-1]) (lasting 4 turns). It has 2 Multiple Campaigns. BAVARIA has 2 ⚡ counters at its disposition during the whole length of this event.</div> <div>B.2.a Tilly's training [BLP] Troops of BAVARIA (not its allies) stacked with Tilly are always Tercios.</div> <div>B.3 BOHEMIA has 1 ⚡⊕, 1 LD (Conscripts) and 1 ♠.</div> <div>B.4 PALATINATUS has 1 ⚡⊕ (Veterans) led by Mansfeld (× A 2.3.4 [Event IV-1]) (lasting 3 turns). It has 1 Multiple Campaign.</div> <div>B.5 The Revolt of Bethlén consists of one Hungarian ⚡⊕ (Conscripts) and Bethlén (× A 4.2.3 [Event IV-1]) (lasting 4 turns) placed in the province of the <b>Revolt</b>.</div> <div>B.6 None of BAVARIA, BOHEMIA, PALATINATUS and the Revolt of Bethlén receive reinforcements on the first turn. They receive normal reinforcements beginning with the second turn of the war.</div> <div>B.7 The reinforcements of the Revolt of Bethlén are based only on the provinces in HUNGARIA that he controls or that are in <b>Revolt</b>. If there are none, or if Bethlén is not in play (dead or wounded), it receives no reinforcements.</div> <div>C Military Phase</div> <div>C.1 Tilly may lead any stack of BAVARIA or its allies.</div> <div>C.2 Mansfeld may lead any stack of PALATINATUS or its allies. It can retreat with 1 LD (only) in any neutral Protestant or mixed HRE country and remain there (after a battle or a retreat before battle).</div> <div>C.3 Destruction of Bohemia If Prahá is captured, BOHEMIA is destroyed at the end of the current round. All its provinces are now owned by AUS*. Its military forces are disbanded and its provinces not yet military controlled by AUS* are considered controlled by rebels (use Control markers of BOHEMIA); they surrender as soon as an ⚡⊕ besieges them, or by regular siege with smaller forces.</div> <div>C.4 Bethlén</div>	<div>Political Events of Period IV— master – 2016-04-14</div> <div>[E]429</div> <div>C.4.a The forces of Bethlén are always in restricted supply in the national provinces of HUNGARIA (provinces with Hungarian shield). They use the <b>Revolt</b> in HUNGARIA and the cities they control as regular supply sources.</div> <div>C.4.b A force lead by Bethlén can withdraw in TRANSILVANIA or national provinces of HUNGARIA owned by TUR (by retreat or movement). If he retreats there, he must stay there until the end of turn but may go out on any following turn.</div> <div>C.4.c If Bethlén and/or its forces are in TRANSILVANIA or national provinces of HUNGARIA owned by TUR, TUR may make a foreign intervention against both the revolt of Bethlén and AUS*. Declaring the intervention cost 1Stability to TUR.</div> <div>D Peace Phase</div> <div>D.1 Before any peace is made, roll a test for the possible breakout of a Religious war, according to event IV-A (Thirty Years' War). A –2 is applied to this roll.</div> <div>D.2 Add a Revolt⊖ in a national province of HUNGARIA if Bethlén is therein.</div> <div>D.3 Survival of BOHEMIA If no such war occurs and Włq is controlled by the enemies of AUS*, the war end as a victory of BOHEMIA. The minor country is fully recreated ; AUS* has a mandatory peace for 3 turns with BOHEMIA. AUS* loses 1 Stability and 30 VP; The controller of BOHEMIA gains 30 VP. AUS* gains the permanent right to make the complete conquest of BOHEMIA. BOHEMIA and PALATINATUS are placed in MA of their controlling MAJ.</div> <div>D.4 AUS* and BOHEMIA stop war only when BOHEMIA is destroyed or if Włq is occupied by enemies. Other countries use normal peace rules (but are allied to AUS* and BOHEMIA and subjects to Separate Peace modifiers if any).</div> <div>D.5 Victory conditions if the war becomes the TYW</div> <div>D.5.a if the Peace of Prague favours the ALLIANCE and they control Włq, apply §D.3 (Survival of Bohemia) of this event if BOHEMIA still exists.</div> <div>D.5.b If the Peace of Prague favours the LEAGUE, BOHEMIA is destroyed as in §C.3 (Destruction of Bohemia) of this event.</div> <div>D.5.c Else, BOHEMIA remains at war after the Peace of Prague and will survive the Peace of Westphalie if not destroyed before that during the war.</div> <div>Turn 2 and following</div> <div>E Diplomatic Phase</div> <div>E.1 If this event does not evolve in Thirty Years' War (IV-A) (because there has already been one, or an Appeasement of the religious fight was obtained), the controller of BOHEMIA and PALATINATUS may make a full intervention in the war.</div> <div>IV-1 (2) REVOCATION OF THE TRUCE OF AUGSBURG PBNew</div> <div>Date: Alternative history.</div> <div>A Condition:</div> <div>Check the conditions in the given order until one is found true.</div> <div>A.1 If events IV-1 (1) (Bohemian Revolt), IV-2 (2) (War for the Unity of the HRE) or IV-A (Thirty Years' War) are happening now, do not mark off and re-roll.</div> <div>A.2 If there is a GE, apply the Revolt of a Northern Alliance (§α).</div> <div>A.3 If event IV-A (Thirty Years' War) has not yet happened, apply the War of Revocation of the Truce of Augsburg (§β).</div> <div>A.4 Else, apply Troubles in the Holy Roman Empire (§γ).</div> <div>α Revolt of a Northern Alliance</div> <div>α-B Event Phase</div> <div>α-B.1 A Northern Alliance of countries of the HRE is created. The countries WESTFALLIA, HANOVERE, HASSIA, HANSA, and CLIVIA breaks free from the GE and are allied.</div> <div>α-B.2 GE and minor HABSBURGUM declare war to all those countries (and are controlled by HIS). The GE is in Civil War (see section IV.5.5.5 (Religious Wars, Civil Wars)).</div>
---	---

<div>[E]430</div> <div>Political Events of Period IV</div> <p><i>α-B.2.a</i> AUS has a free CB against the whole Northern Alliance (to be used immediately, or forfeited at the cost of <b>2 Stability</b>).</p> <p><b>α-B.3</b> The Northern Alliance is controlled by the first Protestant MAJ in the list that accepts the alliance: HOL, ANG, SUE, FRA, POL. It has a CB to enter the war. If it declines, the next country in the list has the opportunity to do the same (and so on). The MAJ gains all the MIN of the Alliance in EW. If nobody enters the war, SUE controls the Northern Alliance (but is not involved and does not gain diplomatic control).</p> <p><b>α-B.4</b> If HOL controls the Northern Alliance, it gains the advantages of event part IV-A.κ (Northern HRE Alliance), as long as the Alliance exists.</p> <div>α-C Diplomatic Phase</div> <p><b>α-C.1</b> HIS can make a full intervention as an ally of AUS*.</p> <p><b>α-C.2</b> If they have not declined control of the Alliance, FRA and ANG (if they are not Counter-Reformation) and SUE can make a limited intervention in the war alongside the Northern alliance.</p> <div>α-D Peace Phase</div> <p><b>α-D.1</b> If no MAJ entered the war to control the Northern Alliance, it is dealt with as one country for the peace in this war (except attempts of Separate Peace), with a malus of <b>-4</b> to make peace.</p> <p><b>α-D.2</b> A peace of level 3 or higher against the MAJ in control (or the Northern Alliance itself if there is none) would dissolve the Alliance in addition to the peace.</p> <p><b>α-D.3</b> If the war ends and the Alliance is not dissolved:</p> <p><i>α-D.3.a</i> The MIN are now normal independent countries that are no more part of the GE.</p> <p><i>α-D.3.b</i> If the MAJ was HOL, it gains the benefits of event part IV-A.κ (Northern HRE Alliance). Otherwise, the Alliance is dissolved for game purpose.</p> <p><b>α-D.4</b> Remember that, according to event part IV-A.μ (German Empire), a peace of level 3 or higher against the [AUS/HIS] may dissolve the GE. Conversely, any Unconditional Peace against a country once part of the GE forces is back in the GE.</p> <div>β War of Revocation of the Truce of Augsburg</div> <div>β-E Event Phase</div> <p><b>β-E.1</b> The Emperor of the HRE has the possibility to revoke this Truce (even if it was not given in game terms). If he declines to do so, his country loses <b>2 Stability</b> and the event terminates. If the Truce of Augsburg is revoked, alliances are created in the HRE and the HRE is in Civil War.</p> <p><b>β-E.2 Northern Alliance</b> If a Northern Alliance already exists, skip this paragraph.</p> <p><i>β-E.2.a</i> A Northern Alliance of countries of the HRE is created. The countries are WESTFALLIA, HANOVERE, HASSIA, HANSA, and CLIVIA (if they exist). If there was no <i>Truce of Augsburg</i> at the beginning of the event, HASSIA and CLIVIA are not in the Alliance.</p> <p><i>β-E.2.b</i> The Northern Alliance is controlled by the first Protestant MAJ in the list that accepts the alliance: HOL, ANG, SUE, FRA, POL. It has a CB to enter the war. If it declines, the next country in the list has the opportunity to do the same (and so on). The MAJ gains all the MIN of the Alliance at EW. If nobody enters the war, SUE controls the Northern Alliance (but is not involved and does not gain diplomatic control).</p> <p><i>β-E.2.c</i> If HOL controls the Northern Alliance, it gains the advantages of event part IV-A.κ (Northern HRE Alliance), as long as the Alliance exists.</p> <p><b>β-E.3 Southern Alliance</b> If a Southern alliance already exists, skip this paragraph.</p> <p><i>β-E.3.a</i> A Southern HRE Alliance is created by association of BAVARIA, MOGENTIUM, ALSATIA, FRIBURGENSIS and WIRTENBERGA (if they exist).</p>	<div>Political Events of Period IV— master – 2016-04-14</div> <div>[E]431</div> <p><i>β-E.3.b</i> The Southern Alliance is controlled by the first Catholic MAJ in the list that accepts the alliance: AUS, HIS, POL, FRA. It has a CB to enter the war. If it declines, the next country in the list has the opportunity to do the same (and so on). The MAJ gains all the MIN of the Alliance at EW. If nobody enters the war, [AUS/HIS] controls the Southern Alliance (but is not involved and does not gain diplomatic control).</p> <p><i>β-E.3.c</i> Minor HABSBURGUM gains the MIN on its track, not HIS, if HIS accepts the alliance.</p> <p><i>β-E.3.d</i> If [AUS/HIS] controls the Southern Alliance, it gains the advantages of event part IV-A.λ (Southern HRE Alliance), as long as the Alliance exists.</p> <p><b>β-E.4</b> Both Alliances are at war against each other. The HRE is in Civil War.</p> <div>β-F Diplomatic Phase</div> <p><b>β-F.1</b> HIS can make a limited or full intervention alongside the Southern Alliance (excepted if it declined the control and involvement).</p> <p><b>β-F.2</b> SUE can make a limited intervention alongside the Northern Alliance (excepted if it declined the control and involvement).</p> <div>β-G Peace Phase</div> <p><b>β-G.1</b> A test to begin a Religious War in HRE is made at the end of the first turn of this war, with a <b>-4</b> modifier. See event IV-A (Thirty Years' War) for the result of the test and the possibility of this Religious War, and the renewal or not of the test on following turns. If no such war occurs, peace can be made as usual.</p> <p><b>β-G.2</b> The alliances after the war</p> <p><i>β-G.2.a</i> If HOL was controlling the Northern Alliance, the Alliance may last after the war at the condition of event part IV-A.κ (Northern HRE Alliance).</p> <p><i>β-G.2.b</i> If [AUS/HIS] was controlling the Southern Alliance, the Alliance may last after the war at the condition of event part IV-A.λ (Southern HRE Alliance).</p> <p><i>β-G.2.c</i> In other cases, the Alliances would not last after the end of the war.</p> <div>γ Troubles in the Holy Roman Empire</div> <div>γ-H Condition:</div> <p>This event may happen twice, once because of Revocation of the Truce of Augsburg (IV-1 (2)) and another time because of War for the Unity of the HRE (IV-2 (2))</p> <div>γ-I Event Phase</div> <p><b>γ-I.1</b> AUS, HOL and HIS rolls for one <i>Revolt</i>.</p> <p><b>γ-I.2</b> The effect of a diplomatic event is made on every minor country that is part of the HRE (fidelity/religion): ALSATIA (16/†), BAVARIA (16/†), BOHEMIA (15/†), BRANDENBURGUM (16/†), BRUNSVICUM (14/†), CLIVIA (14/†), COLONIA (12/†), FRIBURGENSIS (14/†), HABSBURGUM (18/†), HANOVERE (15/†), HANSA (14/†), HASSIA (14/†), LEODIUM (16/†), LOTHARINGIA (16/†), MOGENTIUM (10/†), PALATINATUS (9/†), SAXONIA (11/†), TREVORUM (14/†), TURINGIA (14/†), WESTFALLIA (12/†), WIRTENBERGA (14/†), HABSBURGENSIS BOHEMIA (??/†).</p> <div>IV-2 (1) OLIVARES Risto</div> <p><i>Date:</i> 1621-1643.</p> <p><i>Duration:</i> as long as <b>Olivares (Gaspar de Guzmán y Pimentel)</b> remains the excellent minister</p> <div>A Condition:</div> <p><b>A.1</b> HIS can refuse this event if it so wishes. In that case mark-off as played.</p> <p><b>A.2</b> HIS can freely remove <b>Olivares</b> from office at the end of any following monarch survival phase and the event terminates.</p> <div>B Event Phase</div> <p><b>B.1</b> HIS receives the excellent minister <b>Olivares</b>, with values 8/9/7. These minister values supersede the current values of the Monarch (if they are inferior). This Minister will last for a random length of Excellent Minister, see event E-2</p>
---	--

<div>[E]432</div> <div>Political Events of Period IV</div> <p>(Excellent ministers).</p> <p><b>B.2</b> If HIS monarch dies while the this event is still in effect, use the minister values as a basis for rolling for the values of the new monarch. Otherwise the monarch returns with its original values when the minister dies and play continues normally.</p> <p><b>B.3</b> HIS may receive an additional Art manufacture of level <b>2</b> (if available, and if HIS wants so) placed according to normal rules, and also 2 additional TF levels placed in any eligible trade zone (even if it had no HIS commercial fleet counter before, and may be in different zones).</p> <p><i>B.3.a</i> HIS may now move the Cloth MNU without any drawback (see section XIV.10.3.8 (The Flanders Factories)).</p> <p><b>B.4</b> The CTZ <b>HISPANIA</b> can no more be attacked by Pirates and Privateers in the Mediterranean Sea. Attacks are to be made from the Atlantic.</p> <p><b>B.5</b> The malus for foreign occupation for Stability improvement is changed from <b>-3</b> to <b>-5</b> in national provinces only, and none for other provinces (normal rule).</p> <p><b>B.6</b> The reference level of GENUA in CTZHIS is reduced to 0 if the Spanish player chooses so.</p> <p><b>B.7</b> From now on, HIS can raise a second privateer that can go in any STZ of the CC Atlantic (in Europe or in the ROTW).</p> <div>IV-2 (2) WAR FOR THE UNITY OF THE HRE PBNew</div> <p><i>Date: alternative history.</i></p> <p><b>A Condition:</b></p> <p>Check the conditions in the given order until one is found true.</p> <p><b>A.1</b> If events IV-1 (1) (Bohemian Revolt), IV-1 (2) (Revocation of the Truce of Augsburg) or IV-A (Thirty Years' War) are happening now, do not mark off and re-roll.</p> <p><b>A.2</b> If event IV-A (Thirty Years' War) finished during the current period, mark off and roll for one <i>Revolt</i> in each of the following countries: AUS, and FRA.</p> <p><b>A.3</b> If there is a GE, apply the Revolt of Brandenburg and allies (§α).</p> <p><b>A.4</b> If event IV-A (Thirty Years' War) never happened, apply the War between Brandenburgum and Bavaria (§β).</p> <p><b>A.5</b> Else, use Troubles in the Holy Roman Empire (IV-1 (2).y).</p> <div>α Revolt of Brandenburg and allies</div> <div>α-B Event Phase</div> <p><b>α-B.1</b> A Northern Alliance of countries of the HRE is created. Minor BRANDENBURGUM, SAXONIA and PALATINATUS are created anew and break free from the GE. They are allied.</p> <p><b>α-B.2</b> GE and minor HABSBURGUM declare war to all those countries (and are controlled by HIS). The GE is in Civil War.</p> <p><i>α-B.2.a</i> AUS has a free CB against the whole Northern Alliance (to be used immediately, or forfeited at the cost of <b>2</b> Stability).</p> <p><b>α-B.3</b> This countries are controlled by the first Protestant MAJ in the list that accepts the alliance: SUE, ANG, HOL, FRA, POL. It has a CB to enter the war. If it declines, the next country in the list has the opportunity to do the same (and so on). The MAJ gains all the MIN of the Alliance in EW. If nobody enters the war, SUE controls the Northern Alliance (but is not involved).</p> <div>α-C Diplomatic Phase</div> <p><b>α-C.1</b> HIS can make a full intervention as an ally of AUS*.</p> <p><b>α-C.2</b> If they have not declined control of the Alliance, FRA and ANG (if they are not Counter-Reformation) and SUE can make a limited intervention in the war alongside the Northern alliance.</p> <div>α-D Peace Phase</div> <p><b>α-D.1</b> If no MAJ entered the war to control of the MIN involved, they are dealt with as one country for the peace in this war (except attempts of Separate Peace), with a malus of <b>-4</b> to make peace.</p>	<div>Political Events of Period IV— master – 2016-04-14</div> <div>[E]433</div> <p><b>α-D.2</b> A peace of level 3 or higher against the MAJ in control (or the Alliance itself if there is none) would dissolve the Alliance.</p> <p><b>α-D.3</b> If the war ends and the Alliance is not dissolved, the MIN are now normal separate countries that are no more part of the GE. The Alliance is then dissolved.</p> <p><b>α-D.4</b> Remember that, according to event part IV-A.μ (German Empire), a peace of level 3 or higher against the [AUS/HIS] may dissolve the GE. Conversely, any Unconditional Peace against a country once part of the GE forces is back in the GE.</p> <div>β War between BRANDENBURGUM and BAVARIA</div> <div>β-E Event Phase</div> <p><b>β-E.1</b> BRANDENBURGUM declares a war to BAVARIA. SAXONIA and PALATINATUS are allied to BRANDENBURGUM and declares also a war to BAVARIA.</p> <p><b>β-E.2</b> Minor HABSBURGUM declares a full war against the enemies of BAVARIA.</p> <p><i>β-E.2.a</i> AUS has instead a free CB to enter war as an ally of BAVARIA, and will lose <b>2</b> Stability if it does not use it.</p> <div>β-F Diplomatic Phase</div> <p><b>β-F.1</b> Each MAJ that controls one of the involved countries may react as per the usual rules to enter in limited intervention (only).</p> <p><b>β-F.2</b> HIS may make a limited intervention as an ally of the side of BAVARIA.</p> <div>β-G Peace Phase</div> <p><b>β-G.1</b> A test to begin a Religious War in HRE is made at the end of the first turn of this war, with a <b>-2</b> modifier. See event IV-A (Thirty Years' War) for the result of the test and the possibility of this Religious War, and the renewal or not of the test on following turns. If no such war occurs, peace can be made as usual.</p> <div>IV-3 (1) WAR BETWEEN TURKEY AND PERSIA Risto</div> <p><i>Date: 1606-1639.</i></p> <p><b>A Condition:</b></p> <p>This event has the same conditions and effects as event III-9 (War between Persia and Turkey). It is nonetheless a different event (thus both can happen separately).</p> <div>IV-3 (2) PERSIAN SAFAVIDS PB</div> <p><i>Date: 1590-1722 – The high tide of Shah Abbas..</i></p> <p><b>A Condition:</b></p> <p><b>A.1</b> This event is the same as event III-18 (Persian Safavids). If it did not happen, apply immediately its effects. Apply additionally §B.1 (Fall of Ormus) of this event.</p> <p><b>A.2</b> If it happened and main provinces of PERSIA are conquered, activate a Persian Uprising as per the rules.</p> <p><b>A.3</b> Else, apply the following events.</p> <div>B Event Phase</div> <p><b>B.1 Fall of Ormus</b> AT and FR status with ORMUS are immediately broken to NR. This might cause an Activation of PERSIA against a TP in ORMUS.</p> <p><b>B.2 Conquest of Oman</b> PERSIA attacks AYMAN and that results in breaking all diplomatic status of AYMAN. This applies also to military AT imposed by minor PORTUGALLIA (troops are redeployed).</p> <p><b>B.3 Submission of AFGHANISTAN</b></p> <p><i>B.3.a</i> <b>AFGHANISTAN</b> is no more part of the MOGOLIS IMP. or DURRANIS IMP. (which is destroyed at this point), but submitted to PERSIA. The Natives are used by PERSIA in this region.</p>
---	--

**B.3.b** As long as PERSIA masters **AFGHANISTAN**, the Silk resources of this region may be exploited by **Ormus** (usual concurrence with TP or COL in **AFGHANISTAN**).

**B.3.c** Persian units can go in **AFGHANISTAN** and have supply in every provinces. But only **Ḥerāṭ** and the European provinces of PERSIA are supply sources.

**B.3.d** RUS and TUR have Overseas CB against PERSIA as long as it owns **AFGHANISTAN**.

**B.3.e** **AFGHANISTAN** can be conquered later by MOGOLIS IMP., or can become DURRANIS IMP. again by subevent VI-18.β (Afghan Empire).

**B.3.f** PERSIA also loses the area in a losing Peace of level 2 or higher (in regular or Overseas war) that has no other condition of peace. In Overseas Wars, the occupation of a province without city counts as a province occupied. In every war, the control of **Ḥerāṭ** and its province counts as for a Persian province.

**B.3.g** When PERSIA loses the area, all the effects described here are nullified.

#### IV-4 (1) NATIONAL REVOLT OF THE PORTUGAL

Risto

**TODO:** Province Tanger should go to Morocco. Helper of POR should gain a presidio on Tanger + a TP of POR in case of victory (no reannexion). HIS should not be able to attack if at war otherwise. Helper should be first in order at Methuen. Helper should be Catholic?

Maybe swap Portuguese revolt with Alaouite dynasty and re-add Portuguese revolt as secondary event in pV (typically of WoSS which is four times in the table). The real war only started in 1660, the turning point between pIV and pV.

*Date:* 1640-1668.

##### A Condition:

Occurs only if Portugal in Annexation (III-7.α) is currently in effect.

**A.1** Else, if event III-7 (Annexion of Portugal by Spain) was never rolled for, do not mark off and re-roll.

**A.2** Otherwise treat as a R/D instead, with a **Revolt** in HIS.

##### B Event Phase

**B.1** All effects of the Portugal in Annexation (III-7.α) are cancelled and PORTUGALLIA returns to play as a minor country. PORTUGALLIA receives the same provinces it had at the time of its annexation to HIS notwithstanding who currently owns such provinces. It also receives all Portuguese COL/TP, missions, forts/fortresses, commercial fleets etc. that are currently in Spanish hands.

**B.2** All non-Portuguese COL in **BRAZIL** receive a **Revolt**⊕ controlled by PORTUGALLIA. They can't extend outside the regions of **BRAZIL**.

**B.3** All non-Portuguese troops inside its territories are removed as per normal peace phase.

**B.4** All Portuguese troops are removed from the map, as PORTUGALLIA is initially at peace (keep the basic forces in the ROTW where needed).

**B.5** ANG may accept PORTUGALLIA in EW; if ANG declines, same to FRA, then to SUE; if no country accepts, it remains neutral.

##### C Diplomatic Phase

**C.1** All players who are forced to cede provinces to Portugal by this event receive a temporary free CB to be used this turn.

**C.2** Players who want to fight against Portuguese **Revolt** in their own COL have to declare an Overseas war against PORTUGALLIA and have a free Overseas CB to do so. Else, their COL is freely given to PORTUGALLIA (no loss of Stability or VPs).

**C.3** HIS receives a free CB that lasts until the end of the next period and can be used multiple times.

##### D Peace Phase

**D.1** The Portuguese Revolt in a COL causes the loss of at most 1 Stability to each MAJ.

**D.2** Any COL having 2 Portuguese **Revolt**⊕ in it is immediately annexed by PORTUGALLIA.

**D.3** If HIS uses its free CB against PORTUGALLIA and wins an enforced unconditional surrender over Portugal, it can reapply Portugal in Annexation (III-7.α). All Portuguese possessions as they are now are reannexed to HIS as described there. Reannexion of Portugal as by III-7.α is only possible in wars HIS started using its free CB. In addition, HIS gains a *Præsidio* in **Tânger** if the province was Portuguese.

**D.4** If HIS uses its free CB against PORTUGALLIA, but does not win an enforced unconditional surrender over it, the controller of PORTUGALLIA receives 30 VP when peace is made. This can occur several times. refshortpIII:POR Ann.:Portugal Annexed is only possible in wars HIS started using its free CB. +

**D.4.a** In addition, HIS gains a *Præsidio* in **Tânger** if + the province was Portuguese.

**D.5** If HIS does use its free CB against PORTUGALLIA, but does not win an enforced unconditional surrender over it, the controller of PORTUGALLIA receives 30 VP when peace is made. This can occur several times.

**D.6** Whatever the result of the war, if ANG was intervening in the war, it gains **Tânger** if the province was Portuguese.

#### IV-4 (2) ALAOUITE DYNASTY IN MAURETANIA

PB+JymNew

**TODO:** Maybe here for giving back Tangier (except presidio?) to Morocco?

*Date:* 1631.

*Duration:* Until the end of the game

##### A Lasting Effects

**A.1** TUR has a malus of −3 to diplomacy with MAURETANIA.

**A.2** MAURETANIA loses its IP counter.

**A.3** Fidelity of MAURETANIA is now 10.

#### IV-5 ACT OF NAVIGATION

RistoMod

*Date:* 1651.

*Duration:* until English defeat in a war caused by this event, or by event event V-3 (The Glorious Revolution in England)

##### A Condition:

**A.1** Can occur only if ANG is currently Protestant/Anglican. Otherwise re-roll.

**A.2** Can occur only if event IV-7 (1) (English Civil War) has already occurred (not necessarily ended). Otherwise re-roll.

**A.3** ANG can refuse the event, in which case it is marked off and R/D is applied instead.

##### B Event Phase

**B.1** All non-English commercial fleet counters in CTZ **ANGLIA** are eliminated and ANG receives 2 TF levels in CTZ **ANGLIA** (up to 6 levels). All powers that lose their counters as a result of this, receive a CB against England until the end of current period.

**B.2** From now on, only ANG can place TF levels in CTZ **ANGLIA**.

**B.3** From now on, all MAJ have an Overseas CB against ANG, usable once each period.

##### C Administrative Phase

**C.1** ANG may ignore restriction of section VI.7.4.2 (Pioneering [TBD]) for this turn.

##### D Peace Phase

**D.1** If a CB against ANG received through this event has been used by a player, and if such a player wins at least a level 4 victory against ANG, he may renounce the effects of this event instead of any other peace conditions (all the allies must agree with this as per normal peace procedure).

**D.2** In such a case all non-English TF levels in CTZ **ANGLIA** lost due to this event are returned and ANG TF in CTZ **ANGLIA** is reduced to 1 whatever its current level.

The event is marked off and considered as played.</p> <p><b>B Event Phase</b></p> <p>B.1 Place 2 <b>Revolt</b> ⊕ and a LID in <b>Poitou</b>. Retreat all other units from the province.</p> <p>B.1.a Roll for two Revolts in FRA. Place a <b>Revolt</b> ⊖ if the province is Protestant (or mixed if FRA is Catholic/Counter-Reformation) and nothing otherwise.</p> <p>B.2 The fortress of La Rochelle is controlled by the Rebels and upgraded to the highest level available to the owner of the province.</p> <p>B.3 Place a <b>Pirate</b> ⊕ in CTZ of FRA.</p> <p>B.4 The Rebels/<b>Revolt</b> are controlled by ANG, or FRA if ANG owns the province. This war is a Religious Civil War (see section IV.5.5.5 (Religious Wars, Civil Wars)) between Protestants and Catholics and normal Foreign interventions are allowed.</p> <p><b>C Administrative Phase</b></p> <p>C.1 As long as the event lasts, the owner of <b>Poitou</b> has a malus of −1 to all its administrative actions in the ROTW.</p> <p><b>D Military Phase</b></p> <p>D.1 If a Foreign power enters a land province in the power at war that is not <b>Poitou</b> during its intervention, it loses 1 Stability.</p> <p>D.2 If the owner of <b>Poitou</b> is FRA and <b>Richelieu</b> is in the game, consider that the port of the fortress is under blockade if a french army besieges it.</p> <p><b>E Peace Phase</b></p> <p>E.1 If the fortress is controlled by the Rebels, it counts has a <b>Revolt</b> ⊖ for the loss of Stability by the owner of <b>Poitou</b> due to <b>Revolt</b>.</p> <p>E.2 The owner of <b>Poitou</b> may cede the province to the controller of the <b>Revolt</b>, losing 30 VP for doing this.</p> <p>E.3 The controller of the <b>Revolt</b> earns 5 VP at the end of each turn that the Rebels exist (<b>Revolt</b> or fortress in <b>Poitou</b>).</p> <div>IV-15 RICHELIEU RistoMod</div> <p>Date: 1624-1642. Duration: as long as <b>Richelieu (Armand Jean du Plessis de)</b> remains the excellent minister</p> <p><b>A Condition:</b></p> <p>A.1 If event III-11 (Wars of Religion in France) is not finished yet, do not mark off and re-roll.</p> <p>A.2 FRA can refuse this event if it so wishes. In that case mark-off a played.</p> <p>A.3 FRA can freely remove <b>Richelieu</b> from office at the end of any following monarch survival phase and the event terminates.</p> <p><b>B Event Phase</b></p> <p>B.1 FRA receives automatically the excellent minister <b>Richelieu</b>, with values 9/8/7. These minister values supersede the current values of the Monarch (if they are inferior). This Minister will last for a random length of Excellent Minister, see event E-2 (Excellent ministers).</p>	<div>Political Events of Period IV— master – 2016-04-14</div> <div>[E]443</div> <p>B.2 FRA gains one level of TF in any CTZ or STZ of its choice.</p> <p><b>C Administrative Phase</b></p> <p>C.1 As long as <b>Richelieu</b> lives, FRA has a bonus of +2 to any die-roll for External Administrative Actions and to improve its FTI.</p> <p>C.2 FRA may ignore restriction of section VI.7.4.2 (Pioneering [TBD]) for this turn (only).</p> <p><b>D Interphase</b></p> <p>D.1 When FRA monarch dies, his successor is <b>Louis XIV</b>.</p> <div>IV-16 THE FRONDE PB</div> <p>Date: 1648-1653. Duration: 3 turns or as long as <b>Louis XIV</b> is not adult (whichever is the latest). In any case, it ends after the turn of revolts.</p> <p><b>A Event Phase</b></p> <p>A.1 If <b>Louis XIV</b> has not already been king of FRA, the current king of FRA dies and the new king is <b>Louis XIV</b>.</p> <p>A.1.a <b>Louis XIV</b> has values 7/6/9, scheduled to last 12 turns and starts as a baby.</p> <p>A.1.b He'll become adult at the beginning of the fourth turn of reign, thus ending the event.</p> <p>A.2 If due to Richelieu (IV-15), <b>Richelieu</b> was still in charge, then during the first two turns of reign of <b>Louis XIV</b>, <b>Mazarin</b> will be minister with values 7/8/7.</p> <p>A.3 If <b>Louis XIV</b> is already king, or if his reign is already finished, then the event lasts for 2 turns.</p> <p><b>B Diplomatic Phase</b></p> <p>B.1 Until the end of the event, FRA may only offer a white or losing peace to all minors, and peace based on the peace differential to each major countries, with a maximum level of 1 in the favour of FRA.</p> <p>B.1.a At each turn, FRA offer and cannot refuse Armistices with opponents.</p> <p>B.1.b Neutral minor countries always accept that peace.</p> <p>B.1.c At the third turn of the event, if <b>Mazarin</b> is minister, then major countries cannot refuse an armistice.</p> <p>B.2 FRA may not declare war as long as the event lasts (except Thirty Years' War (IV-A) and The War of Spanish Succession (V-4)).</p> <p>B.3 If, at the end of a diplomacy phase, FRA is not at war (don't count armistices), the Fronde happens.</p> <div>Turn of the revolts</div> <p><b>C Diplomatic Phase</b></p> <p>C.1 Half of French troops in Europe become rebel. FRA choose a stack of troops staying loyal, thus taking up to half the total number of LID (rounded down). The rest becomes the troops of the Fronde.</p> <p>C.1.a If in play, <b>Condé</b> becomes leader of the Fronde. Otherwise, a randomly chosen general (a named one if there is one in play) becomes leader of the Fronde.</p> <p>C.2 The Fronde is controlled by a country currently at armistice with FRA. If none exists, the order of priority to control the Fronde is: HIS, ANG, HOL, AUS, POL, RUS, SUE, TUR.</p> <p>C.3 Naval forces, admirals, everything in the ROTW as well as administrative counters (MNU, . . . ) stay in the control of FRA.</p> <p><b>D Administrative Phase</b></p> <p>D.1 FRA collects neither land nor vassals income this turn. FRA does get other incomes.</p> <p>D.2 The Fronde rolls for reinforcements with offensive attitude and no modifier.</p> <p>D.3 No side may get reinforcements such that its total force (in Europe) is above the basic force of FRA for the current period.</p> <p><b>E Military Phase</b></p> <p>E.1 Countries in armistice with FRA can enter the civil war on the side they want.</p>
--	---

<div>[E]444</div> <div>Political Events of Period IV</div> <div>E.2 Fleet of FRA may stay in ports controlled by the rebels without penalties.</div> <div>E.3 Except for the capital of FRA, fortresses in France are friendly to both sides.</div> <div>E.3.a A province is controlled by one side if it has an army in the province and there is no enemy troop besieged in the fortress.</div> <div>E.3.b Other provinces are considered friendly to both sides for supply or movement cost.</div> <div>E.4 The capital of FRA is always controlled by the loyalists until the Fronde takes the fortress.</div> <div>F Peace Phase</div> <div>F.1 The side controlling the capital of FRA at the end of turn wins.</div> <div>F.1.a If the Rebels win, <b>Louis XIV</b> (and <b>Mazarin</b>) is overthrown. During the next turn, there will be a dynastic crisis in FRA. The player controlling the Fronde gains 10 VP.</div> <div>F.1.b In any case, both the loyalist and Fronde's units become units of FRA as soon as the event is finished.</div> <div>IV-17 (1) THE TIMES OF TROUBLES IN RUSSIA PB</div> <div>Date: 1605-1613.</div> <div>A Condition:</div> <div>A.1 If <b>Ivan IV</b> is not dead yet, do not mark-off and re-roll.</div> <div>A.2 If RUS chose <i>Religious Tolerance</i>, mark off and use R/D instead.</div> <div>A.3 If RUS is at war, the event is pending. It will activate at the beginning of the first turn where RUS is at peace and a roll of 6 or higher is obtained on 1d10.</div> <div>Turn 1</div> <div>B Event Phase</div> <div>B.1 The Russian monarch dies and is replaced by <b>Boris Godunov</b>. His values are 5/8/4 and he will reign 5 turns; he is a general <i>Godunov</i> (X. A 2.3.2 [Event IV-17]).</div> <div>B.2 RUS is now in Religious Civil War (see section IV.5.5.5 (Religious Wars, Civil Wars)). Rebels are Catholic; loyalists (RUS) are Orthodox.</div> <div>B.3 Roll for 6 <i>Revolt</i> in Russia. Only provinces actually in RUS revolt, other rolled-for are ignored. The <i>Revolt</i> are controlled by POL.</div> <div>B.4 Rebels gain one <math>\Delta\oplus</math> in one province in <i>Revolt</i>, and the control of the city.</div> <div>B.5 Rebels own any revolted province with no Russian armies in there (except <b>Moskva</b>) and provinces they control. These provinces are their supply sources.</div> <div>B.6 RUS owns all non-revolted provinces they control. They are their supply sources.</div> <div>B.7 All other provinces are disputed. Supply of both sides may cross those provinces if there is no enemy force within.</div> <div>C Diplomatic Phase</div> <div>C.1 During the event, RUS may ask for help of SUE. The condition is the cession of one Russian province to SUE; if this province is revolted, it becomes Swedish only when it is no more revolted and its is controlled by RUS or SUE. During the rest of the event, this province (even Swedish) can be entered and attacked by all belligerents.</div> <div>C.1.a If an intervention of SUE is agreed upon, SUE has to commit at least 4 LD in Russia, following the conditions of limited intervention. SUE can not withdraw any force sent in Russia.</div> <div>C.2 Major countries may make <i>Foreign Intervention</i> in this war.</div> <div>D Administrative Phase</div> <div>D.1 Rebels receive offensive reinforcements at each turn, using the provinces they own.</div> <div>D.2 Rebels have the general <i>Dmitry</i> (until he dies) for 5 turns.</div> <div>E Peace Phase</div> <div>E.1 See the explanations hereafter, valid for all turns.</div>	<div>Political Events of Period IV— master – 2016-04-14</div> <div>[E]445</div> <div>Turn 2 and afterwards</div> <div>F Event Phase</div> <div>F.1 <b>Boris Godunov</b> has a malus of +3 to his survival roll. If he dies, a period of anarchy follows and RUS has values 3/3/3 as a monarch. On the next turn, <b>Romanov</b> (in fact Fyodor and Michael) is the new monarch 6/5/6; as this monarch represents the whole family, do not roll for his survival (it is automatic).</div> <div>F.2 If <b>Boris Godunov</b> is dead (on this turn or a previous one), <i>Dmitry</i> also rolls for survival with a +3 as sole modifier during the event.</div> <div>F.3 As long as the event continues, roll for 3 <i>Revolt</i> in RUS (that occur only is in a Russian owned province).</div> <div>G Diplomatic Phase</div> <div>G.1 POL may make a full or limited intervention as ally of the Rebels. It has a CB to do so, or a free CB is <i>Dmitry</i> is alive. This intervention is not affected by excessive foreign intervention.</div> <div>G.2 If POL was involved in this war on the previous turn and SUE is making an intervention allied to the loyalists, POL may generalise the war with a free CB in a full war between SUE and POL. This does not change the terms of their respective interventions in the Civil War.</div> <div>H Peace Phase</div> <div>H.1 <i>Revolt</i> in provinces that are controlled or occupied by POL do not extend and do not count for the conditions of victory of this event.</div> <div>H.2 If half (round-up) of the Russian national provinces are in <i>Revolt</i>, <b>Boris Godunov</b> is overthrown and killed with no further consequences.</div> <div>H.3 A side fulfils the military condition of victory if it won a major victory against the enemy or if it controls all cities in national provinces, or if the enemy (not their foreign allies) has no <math>\Delta</math> left.</div> <div>H.4 The event ends as a victory for the Rebels or the Loyalists under the following conditions.</div> <div>H.4.a Rebels win if <b>Boris Godunov</b> is dead and they control <i>Мошкѡ</i> and they fulfil the military condition of victory; or they win if <b>Boris Godunov</b> is dead and Loyalists surrender willingly.</div> <div>H.4.b The Loyalists win if all the <i>Revolt</i> are eliminated in owned national provinces and they fulfil the military condition of victory.</div> <div>H.4.c When the victory is obtained, all the <i>Revolt</i> and the Rebel armies are destroyed.</div> <div>H.4.d The intervention of SUE ends; RUS has now a free CB (one use) against SUE until the end of the period.</div> <div>H.5 If the Loyalists win, <i>Dmitry</i> is eliminated.</div> <div>H.5.a If <b>Boris Godunov</b> is alive, he is now legitimate ruler of Russia. He has now values 6/8/5. RUS gains 10VP.</div> <div>H.5.b If he is not, the new ruler is <b>Romanov</b> for 5 turns, with values 6/5/6. Russian Stability is increased by 1.</div> <div>H.6 If the Rebels win, <b>Boris Godunov</b> is eliminated.</div> <div>H.6.a If <i>Dmitry</i> is alive, he becomes tsar <b>Dmitry</b> with values 4/7/5 (and the turns left). RUS loses 3 in Stability. If POL is still intervening in the war, RUS is now in mandatory defensive alliance with POL during <b>Dmitry</b>'s reign. In addition, POL gains one province in RUS that it currently controls or occupies (its choice).</div> <div>H.6.b If <i>Dmitry</i> is dead, the new ruler is <b>Romanov</b> for 5 turns, with values 6/5/6. Russian Stability is decreased by 2. If POL is still intervening in the war, it gains one province in RUS that it currently controls or occupies (its choice).</div> <div>H.6.c In both cases, POL gains 10 VP and signs a white peace with RUS.</div> <div>IV-17 (2) REVOLT OF THE COSSACKS PB</div> <div>Date: 1654-1667.</div> <div>Duration: until the end of the wars caused by the event.</div> <div>A Condition:</div> <div>If the religious attitude of POL is Tolerance of Orthodoxy, the event does not occur. Mark off and play R/D instead.</div>
--	---

<div>[E]446</div> <div>Political Events of Period IV</div> <div>Turn 1</div> <div>B Event Phase</div> <div>B.1 One province of UKRAINA belonging to POL (if none, belonging to AUS*) secedes and create the new minor UKRAINA. The province is <b>Poltava</b> if available, else, the closest to this one (chosen by the new protector or controller of UKRAINA). Units of other countries inside are immediately redeployed.</div> <div>B.2 The new minor is a special VA of its protector. No diplomacy is allowed on it.</div> <div>B.2.a The protector stops being protector if it declares war to UKRAINA. The next possible protector in the list becomes the new protector.</div> <div>B.3 UKRAINA never makes a separate peace without its protector and must be included in the same peace treaty.</div> <div>B.4 Possible protectors are (in order): POL (if Orthodox), RUS, TUR, POL (if not Orthodox). If there are no (more) protectors, UKRAINA becomes a normal minor country.</div> <div>C Diplomatic Phase</div> <div>C.1 POL has a free CB against UKRAINA if it loses at least one province during the formation of that country.</div> <div>C.2 If UKRAINA (as a special Polish VA) owns a province of CRIMEA (a province with a Crimean shield, even blurred), then POL may ask for a limited intervention of CRIMEA in this war.</div> <div>C.2.a This does not change the diplomatic status of CRIMEA nor its controller. CRIMEA is played by its usual controller decided by the usual rules.</div> <div>C.2.b If POL wins after an intervention of CRIMEA, it must give one province back to it.</div> <div>D Administrative Phase</div> <div>D.1 If POL is at war against another MAJ during the event, AUS* can make a limited intervention as an ally of POL.</div> <div>E Lasting Effects</div> <div>E.1 section XIV.3.2.5 (Polish Ukraine) is no more valid.</div> <div>Turn 2 and after</div> <div>F Event Phase</div> <div>F.1 If POL is at war against UKRAINA, SUE has a free CB against POL.</div> <div>F.1.a If SUE is at war against POL, RUS has a free CB against SUE (can be used in reaction).</div> <div>F.1.b If RUS uses this CB and DANIA is either inactive or already at war with SUE, then DANIA is put in EW of RUS and enters war against SUE (if not already at war).</div> <div>G Peace Phase</div> <div>G.1 Normal rules for peace apply, except that allies of POL cannot annex provinces of UKRAINA that they didn't own before the event.</div> <div>IV-18 EXTENSION OF THE MOGHOL EMPIRE (×2) PB</div> <div>Date: 1635-1638 / 1653-1657.</div> <div>A Event Phase</div> <div>A.1 If the non-European minor country MOGOLIS IMP. does not exist, it is created now. Its ruler is now <i>Great Mughal</i> (if period is IV or later, it replaces <i>Akbar</i> if he was in play).</div> <div>A.2 The MOGOLIS IMP. will try to invade 3 regions during the turn, according to event II-A (Mogolis Imp. Expansions).</div> <div>A.3 Even if the country has no region after the invasions, it still exists (and can gain provinces with new events).</div> <div>A.4 BĀŅGLĀ and KARNĀṬAKA become rich region, with 2 resources of each kind shown on the map (instead of 1).</div> <div>IV-19 WARS IN INDIA (×2) PB</div> <div>Date: 1631-1635 / 1656-1659.</div>	<div>Political Events of Period IV— master – 2016-04-14</div> <div>[E]447</div> <div>A Event Phase</div> <div>A.1 If it was still existing, minor country BISINAGAR is destroyed (by internal fights). Every TP (not COL) that is in the minor country BISINAGAR at the time of its disappearance will face an attack by Natives that are activated against every country this turn.</div> <div>A.2 If BISINAGAR had already been destroyed, choose randomly 2 TP and/or COL in <b>INDIA</b> that will be attacked by the Natives in the region, due to internal strife in India.</div> <div>A.3 KARNĀṬAKA has from now on 2 Spices and 2 Products of Orient available instead on 1 (if not yet done).</div> <div>A.4 If the MOGOLIS IMP. exist, they invade one province with a modifier of <b>-2</b>, the next in the list according to event II-A (Mogolis Imp. Expansions).</div> <div>IV-20 REVOLTS IN SINGALA/FORMOSE (×2) PB</div> <div>Date: 1630.</div> <div>A Condition:</div> <div>If there is no TP/COL in <b>SINGALA</b> nor <b>FORMOSE</b>, do not mark off and re-roll.</div> <div>B Event Phase</div> <div>B.1 Choose randomly the province of the revolt between <b>SINGALA</b> or <b>FORMOSE</b> if both contain a TP/COL. If not, the chosen province is the one containing the TP/COL.</div> <div>B.2 Place a <i>Revolt</i> in the chosen region. This <i>Revolt</i> is not connected to the Natives but military forces sent there to suppress it may have to confront the Natives if they react.</div> <div>IV-21 CHINA COLONIAL ATTITUDE PB</div> <div>Date: 1557 / 1637.</div> <div>A Condition:</div> <div>This event is the same as event III-22 (1) (China colonial attitude). Exception: if Closure of China (III-22 (1).a) is already effective, apply Vassalisation of Korea (§a) instead.</div> <div>α Vassalisation of Korea</div> <div>α-B Event Phase</div> <div>α-B.1 Two Chinese armies and the natives of <b>CHOSŎN</b> attack any TP/COL that are in the area (even Japanese TP).</div> <div>α-B.2 CHOSŎN is now part of CHINA.</div> <div>α-C Peace Phase</div> <div>α-C.1 If a TP has survived, CHINA concedes a new AT to the owner of the TP, if it didn't have any. The owner still has to pay as for usual AT with CHINA.</div> <div>IV-22 IAPONIA COLONIAL ATTITUDE PB</div> <div>Date: 1638. Tokugawa's Commercial Restrictions in history</div> <div>A Condition:</div> <div>A.1 If IAPONIA has no TP, use Tokugawa's Commercial Restrictions (§a).</div> <div>A.2 If IAPONIA has a TP on the map (in <b>CHOSŎN</b>), use Commercial dynamism of Iaponia (§β).</div> <div>α Tokugawa's Commercial Restrictions</div> <div>α-B Event Phase</div> <div>α-B.1 One country having a TP in IAPONIA may sign immediately a Treaty with IAPONIA, and so gains AT. If more than one country have a TP in IAPONIA, all owners (except minor powers) make a secret bidding (minimum bid is 50 ₮). The largest bidder wins and gains the AT; all the bids are lost and all other TP are removed from IAPONIA.</div>
---	---

<div>[E]448</div> <div>Political Events of Period IV</div> <p><b>α-B.2</b> When the AT is accepted, only one TP of the country is kept in IAPONIA; excess TP are destroyed. If refused, IAPONIA declares an Overseas War against the power.</p> <p><b>α-B.3</b> From now on, AT allow one country to keep only one TP in IAPONIA (and not one per region). The remaining TP can be upgraded, and it causes no reaction by IAPONIA.</p> <p><b>α-B.4</b> The basic forces and reinforcements of IAPONIA are now its mainland army only (no overseas garrisons or fleets).</p> <div>α-C Lasting Effects</div> <p><b>α-C.1</b> From now on, no new TP counter can be placed in any area belonging to IAPONIA by means of administrative actions.</p> <p><b>α-C.2</b> No regular diplomacy is permitted on IAPONIA. The Activation level of IAPONIA becomes 11.</p> <div>β Commercial dynamism of IAPONIA</div> <div>β-D Event Phase</div> <p><b>β-D.1</b> IAPONIA gains a TP with level 6 in <b>Seoul, P'yŏngyang</b> and with level 3 in <b>FORMOSE</b>, if those provinces do not contain foreign TP. IAPONIA has a FTI of 2, raised to 3 from period V on.</p> <p><b>β-D.2</b> If there are TP in any of those provinces, IAPONIA declares an Overseas War against all the country having those. This war may not be ended by an automatic white peace.</p> <div>β-E Administrative Phase</div> <p><b>β-E.1</b> Basic forces of IAPONIA are increased to 2 ⚡⊕ in IAPONIA, plus 1 ⚡⊕ (in <b>CHOSŎN</b> at start), 2 LD and 1 F⊖ overseas.</p> <p><b>β-E.2</b> Basic reinforcements are increased to one ⚡⊕ in mainland, and 1 ⚡⊖, 1 ND for the garrisons.</p> <p><b>β-E.3</b> If IAPONIA has a TP counter, it gains 1 level, up to level 6 in <b>Seoul</b> and <b>P'yŏngyang</b>, and level 3 in <b>FORMOSE</b>. Choose one randomly for this increase if there are several TP. These TP exploit the resources in the region and are counted as normal exploitation for monopolies and evolution of prices.</p> <div>β-F Military Phase</div> <p><b>β-F.1</b> Japanese forces outside <b>JAPON</b> do not activate the Natives and an attack in regions with Japanese TP may be aimed at the Japanese only and so does not activate the Natives of the region. As soon as the TP is no more Japanese or destroyed, normal activation rules for Natives apply.</p> <div>β-G Peace Phase</div> <p><b>β-G.1</b> If IAPONIA does not lose the war and there is no TP in any of the 3 provinces claimed, it places a TP in there of level 1.</p> <div>IV-y SWEDISH DELUGE PBNotEvenWritten</div> <p><i>Date: 1648 (Khmelnytsky Uprising)-1667 (Truce of Andrusovo).</i>  [Russo-Swedo-Polish wars, Second Northern war] <i>Duration: 2 turns.</i>  If POL is at war, fortresses in LITUANIA let enemy supply go through their province.  Should appear either during IV-17(2), or as IV-10(2).</p> <div>IV-z Köprülü RistoMod</div> <p>Same as event V-15 (Köprülü). Should appear late in the table only. No peace is made for the war of this turn in the HRE (except for specific rules of this war about conquered minor countries). The Thirty Years' War is now about to begin.</p> <div>B Event Phase</div> <p><b>B.1</b> For the duration of the war, all countries have an additional trade refusal of 150 ₮.</p> <div>War setup</div>
--	---

**α CREATION OF THE GERMANIC ALLIANCES**

**α-B.1** Two German sides are made up for this war: the (German) Catholic LEAGUE and the Protestant ALLIANCE (more properly called: *Protestant Union* or *League of Evangelical Union*). All minor countries of the HRE at war will be part of one or another. When a minor country joins one alliance, it is placed in Neutral diplomatic position and will change of status before the end of the war only if specified by this event or another political event. The HRE is now in Civil and Religious War (see section IV.5.5.5 (Religious Wars, Civil Wars)), with all the usual restrictions.

**α-B.1.a** The ALLIANCE is formed by all the German minor countries that were enemies of the AUS\* during the previous turn.

**α-B.1.b** AUS\* and its German allies (minor countries at war with it) form the LEAGUE. Minor HABSBURGUM is part of the LEAGUE as any other minor. BAVARIA automatically joins this alliance.

**α-B.1.c** The stability of both sides is placed on **+2**, modified by any Major Victory of the preceding turn of their side (battles with troops of German minor countries or AUS\*). This stability will evolve during the turn because of the major victory/defeat of any forces in their alliance that is in any province of the HRE (even if there are only forces of non Germanic major powers).

**α-B.2 Attitude of the Netherlands** If HOL is not a Major Power, the following conditions apply:

**α-B.2.a** If HOLLANDIA is either owned by HIS or is TERRÆ DEPRESSÆ or PRIMA HOLLANDIA, apply event III-1 (1) (Revolt of the United Provinces). This gives a new status to HOLLANDIA (it may trigger the following points if still a MIN).

**α-B.2.b** If HOLLANDIA is a VA of HIS (special or regular), HOLLANDIA breaks its special status with HIS. HIS has an immediate free CB against HOLLANDIA; if used, HOLLANDIA revolts against the Spanish Crown, (re)apply III-1 (1) and HOL is now a Major Power. If it does not use it, apply §α-B.3 (Transfer to HOL) of this event part. For the rest of the event HOL\* is neutral, and may not be involved in any manner in the incoming war. Ignore any reference to HOL\* hereafter for this event.

**α-B.2.c** If HOLLANDIA is a normal minor country, apply §α-B.3 (Transfer to HOL) of this event part. HOL\* is involved in the war.

**α-B.3 Transfer to HOL** If HOLLANDIA is liberated by the preceding paragraph, VEN may be allowed to choose between incarnating AUS or HOL according to the rules of the Grand Campaign.

**α-B.3.a** If VEN chooses Minor HABSBURGUM (which becomes AUS), HOLLANDIA is now a normal minor country.

**α-B.3.b** If VEN chooses minor HOLLANDIA (which becomes HOL), HOL is created with no Revolt (using the current position of minor HOLLANDIA).

**α-B.3.c** TODO: establish full starting position of non-revolted HOL.

**α-B.4** The ALLIANCE is controlled according to the order of preference (a player may not refuse control): HOL, ANG (Protestant), FRA (Protestant), SUE (Protestant), RUS.

**α-B.5** The LEAGUE is controlled according to the order of preference (a player may not refuse control): HIS (Counter-Reformation), AUS (if it exists), HIS (Conciliatory).

**α-B.6** If the War of the Schmalkaldic League or the League of Nassau still do exist, the countries part of the League immediately join the Protestant ALLIANCE and the Leagues are dissolved.

**α-B.7** If the period IV has not begun yet, the Major Powers: HIS, HOL, SUE, FRA and AUS have to choose immediately if they take or not the Objectives relevant to this war. The Objective are conditions to be true at the end of period IV (and not especially this war).

**β EXTENSION OF THE ALLIANCES**

**β-B.1** Every minor country of the HRE that is not part of the war is checked for war entry at the beginning of each turn. One rolls 1d10, added to the Stability of the side it could join, the current turn of the war (+1 this first turn), and specific modifier for some countries. On a result of **6 or higher**, this country enters the war.

Country	Side	Mod.	Forces
BAVARIA	LEAGUE	Auto.	Ⓐ⊕, LD, ♠ and at least 1 General (see below); may use 2 Ⓐ counters for all the duration of the war; starting forces are Veterans.
COLONIA	LEAGUE		LD, 1 ♠
LEODIUM	LEAGUE		♠
MOGENTIUM	LEAGUE		♠
TREVORUM	LEAGUE		♠
ALSATIA	LEAGUE	-2	LD, ♠
LOTHARINGIA	LEAGUE	-4	LD
WIRTEMBERGA	LEAGUE	-2	2 LD
TURINGIA	LEAGUE	-2	none
FRIBURGENSIS	ALLIANCE		2 LD and ✕ (Georg Friedrich of Baden)
PALATINATUS	ALLIANCE		Ⓐ⊖ and ♠
CLIVIA	ALLIANCE	-2	LD
BRANDENBURGUM	ALLIANCE	-2	Ⓐ⊖ and ✕
BRUNSVICUM	ALLIANCE		Ⓐ⊖ and ✕ (Christian of Brunswick)
HANOVERE	ALLIANCE		LD and ♠
WESTFALLIA	ALLIANCE	-2	♠
HANSA	ALLIANCE		LD, ND
HASSIA	ALLIANCE	-2	Ⓐ⊖ and ♠
SAXONIA	ALLIANCE	-4	Ⓐ⊖, LD and ♠
BOHEMIA	ALLIANCE		Ⓐ⊖ and LD

Table XX.2: Extension of the Alliances during the Thirty Years' War

**β-B.2** The list of the countries of the HRE is given in table XX.2 (Extension of the Alliances during the Thirty Years' War), with the side they will join and their starting force. All those forces are conscripts, except where indicated. It is possible that, given the peculiar conditions of the war triggering the Religious War, a country ends up in a different side of the one which should be expected.

**β-B.3 Mercy** If there is no named ✕ of BAVARIA in play, it receives *Mercy*.

**β-B.3.a** If there is one, as soon as he dies (wound is not enough), BAVARIA immediately receives *Mercy*.

**β-B.3.b** *Mercy* stays in play for 4 turns. If he arrives in the middle of a turn (due to death of his predecessor), this turn fully counts as his first turn of activity.

**β-B.4** The forces written may be inferior to the basic forces of the country (representing the confused situation). They are only used when the country join the alliance. If already at war a previous turn, a country keeps all that is deployed and gains nothing new.

**β-B.5** If minor HABSBURGUM joins war at this time, they receive their basic force plus 1 Ⓐ⊕ (but no supplementary random reinforcement; that will be part of those of the LEAGUE) as Veterans.

**β-B.6** No intervention (full or limited) of foreign countries are allowed if it is not explicitly written in this event.

**β-B.7** SAXONIA may be used as mercenaries during this event once it surrendered all its home territory to the enemy. Its army is available to the side that controls its home territories; if this side loses subsequently part of the provinces, it still uses the army but can no more recruit Saxons; if it loses all the provinces, the Saxon forces are removed (and available now to the enemy).

► end of war setup ►

## Turn 1 (1624–1629)

**C Event Phase**

**C.1** From now, and until the war is ended by the Peace of Westphalie (§I), no Diplomacy is possible on minor countries of the HRE, no attempt to have them enter in a war also, and no declaration of war against them is possible outside the rules of this event.

**C.2** After the creation and the extension of both German sides in the war, some foreign countries can be involved in it also.

**C.3** The controller of each alliance can declare war to German minor countries that refused to be in war this turn, precipitating them in the enemy alliance (regardless of their religion).

**C.4** HIS enters the war as an ally of LEAGUE. This is not a formal declaration of war and costs no Stability.

**C.5** HOL\* enters war as an ally of ALLIANCE. This is not a formal declaration of war and costs no Stability. Minor HOLLANDIA receives its full basic forces, has a separate die-roll for reinforcements, is allied to the ALLIANCE but not part of it (for the conditions specifying that the ALLIANCE sues for peace).

**C.6** ANG can do a limited intervention. Its side is the ALLIANCE if ANG is Protestant, the LEAGUE if it is Catholic/Counter-Reformation, or the one of its choice if it has chosen Catholic/Conciliatory.

**C.7** SUE, if Protestant/Rigorous, can do a limited intervention as an ally of the ALLIANCE.

**C.8** The Emperor of the HRE, if he is not AUS\*, can begin a limited intervention in the War as an ally of the LEAGUE.

**C.9** Any Major Power that was doing a limited intervention during the previous turn (as defined in the original war) can continue this limited intervention to help the same side.

**C.10 The Danish Crusade** Minor DANIA makes a mandatory white peace with all its adversaries. It then enters the war as an ally of ALLIANCE (but not part of it). It has 2 A⊕ (Veteran), 1 F⊖, 1 F, 2 Multiple Campaigns and is led by its general-king *Christian IV* present for 4 turns. It does not receive reinforcements on this turn. Minor DANIA is played by ANG.

**C.11** All those alliances and interventions during the whole war are made with the German alliances; the foreign countries are not allied with each other except if they decide to sign a specific alliance. Else, they are not obliged to continue the fight together (no penalty to sign peace) and only separate peace from the German alliance is required.

→ **Specific rules for the war** →**γ THE TURKISH FRONTIER**

**γ-C.1** As long as there are 2 A⊕ of AUS\* in WİEN or any province once owned by HUNGARIA and a X, TUR may not declare a war to AUS\* (but may continue one). For the first turn, this restriction is enforced if AUS\* has this force available anywhere in the HRE instead.

**γ-C.2** If WİEN is conquered by the ALLIANCE, or the previous condition is not respected at the Diplomatic Phase, TUR has no such restriction.

**γ-C.3** If TUR takes WİEN, the LEAGUE will concede a winning peace to the ALLIANCE at the end of the turn. A Crusade might then happen.

**γ-C.4** [BLP] §B (The Little war and The Long war) of section XIV.13.4.3 (Bohemia, Hungaria and Transilvania) is reactivated for TUR only, and only with a small stack (up to 5 LID plus one *Pasha*).

**γ-C.4.a** That is, TUR (not CRIMEA) may send one (small) stack in non controlled former provinces of HUNGARIA and loses Stability accordingly.

**γ-C.4.b** Additionally, TUR may also send this stack in national provinces of AUS.

**δ GERMAN REINFORCEMENTS****δ-D Administrative Phase**

**δ-D.1** Reinforcements for both ALLIANCE and LEAGUE are determined globally for all German minor countries involved in an alliance.

**δ-D.2** The ALLIANCE is due to receive 4 LID and the result of random reinforcements with a global modifier of +2.

**δ-D.2.a** The attitude chosen must be offensive during the first two turns of the war and may be either offensive or defensive afterwards.

**δ-D.3** The controller of the ALLIANCE can pay 50 ₮ to give a further +1 to the reinforcement roll, or 100 ₮ for a +2. If it does not pay, SUE has the opportunity to do so and in this case will control ALLIANCE for this turn only.

**δ-D.4** The reinforcements of the ALLIANCE are lowered by 1 LID for each one of the following cities that have been conquered by the enemies (even if liberated later on): Magdeburg and:

- Stuttgart, Erfurt if the war follows War of the Schmalkaldic League (II-9),
- Münster, Rostock if the war follows League of Nassau (III-1 (3)),
- Speyer, Praha if the war follows Bohemian Revolt (IV-1 (1))
- Braunschweig, Weimar if the war follows Revocation of the Truce of Augsburg (IV-1 (2)) or War for the Unity of the HRE (IV-2 (2)).

**δ-D.5** The reinforcements of the ALLIANCE are also lowered by 1 LID for each two cities in the following list that have been conquered by the enemies (even if liberated later on): Hannover, Cassel, Dresden, Berlin, Lübeck, Hamburg.

**δ-D.6** If minor HABSURGUM is part of the LEAGUE, the LEAGUE is due to receive 3 LID and the result of random reinforcements with a global modifier of +2. Else (AUS is a MAJ), the LEAGUE receives only a random reinforcements with a global modifier of +2. The LEAGUE uses the A counter of the HRE regardless of who the Emperor is.

**δ-D.6.a** The attitude chosen must be offensive during the first two turns of the war and may be either offensive or defensive afterwards.

**δ-D.7** The controller of the LEAGUE can pay 50 ₮ to give a further +1 to the reinforcement roll, or 100 ₮ for a +2.

**δ-D.8** The reinforcements of the LEAGUE are lowered by 1 LID for each one of the following cities that have been conquered by the enemies (even if liberated later on): WİEN, Salzburg and München.

**δ-D.9** Placement: ALLIANCE then LEAGUE

**δ-D.9.a** The reinforcements obtained are freely distributed among the countries part of the alliance. AUS as a Major power buys its own reinforcements but may take up to 2 LID from the LEAGUE as its own reinforcements.

**δ-D.9.b** They can only be placed in provinces not pillaged, not controlled by the enemy and free of enemy forces.

**δ-D.9.c** They have to be placed in a province of their nationality, or with at least one LID of the same nationality if their country is not completely occupied by the enemy.

**δ-D.10 Wallenstein** AUS\* may hire mercenary general *Wallenstein* (X A 4.5.5 -1 [Event IV-A]). He costs 40 ₮ (paid by the controller of LEAGUE) to recruit him for one turn.

**δ-D.10.a** If *Wallenstein* is not hired at turn 1 or 2 of this war, he will not be available later. He can not be hired anew after the Peace of Prague (§η). The first time *Wallenstein* is hired, he appears anywhere in a friendly province of HABSURGUM or BOHEMIA with one Veteran A⊕ (use an AUS or HRE counter).

**δ-D.10.b** *Wallenstein* can command any stack of the LEAGUE (including AUS\*) but no Bavarian counter.

**δ-D.10.c** If at the end of a turn the Stability of the LEAGUE is positive or its situation favourable, *Wallenstein* is automatically dismissed. He can be hired again on the round and/or turn after LEAGUE suffered a Major Defeat.

**δ-D.10.d** [AUS/HIS] can assassinate *Wallenstein* at any time (even if he is currently dismissed). He is eliminated and LEAGUE (and AUS) gain immediately 1 in Stability.

**δ-D.10.e** After the Peace of Prague, *Wallenstein* is no more available (and cannot be murdered anymore).

**δ-D.11** Three mercenary generals are available each turn of this war. They can be recruited by the LEAGUE or the ALLIANCE. A general is recruited for one turn only. He can lead any stack of the alliance (including allied MAJ); by paying 10 ₮ more, he can lead a stack even if there is a general with higher rank.

<div>[E]454</div> <div>Political Events of Period IV</div> <div> <div>ε GENERAL CONDITIONS OF THE WAR</div> <div> <div>ε-E Military Phase</div> <p><b>ε-E.1</b> Each alliance has a Simple Campaign available each round. Major or Multiple Campaign could be paid for by the controller of the alliance (cost lowered by 20 ⚔).</p> <p><b>ε-E.2</b> Each alliance and their allies draw supply in the HRE from any province controlled by their side that is not pillaged or that has an unblockaded port.</p> <p><b>ε-E.3</b> Supply can be traced through any neutral province, or controlled province (pillaged or not).</p> <p><b>ε-E.4</b> Both alliances can freely cross any neutral HRE minor countries ; this is also permitted to DAN*, SUE, ANG in limited intervention, AUS* of course and HIS but not to other allies.</p> <p><b>ε-E.5</b> Alternatively, a side may, before its movement, declare war against any neutral country of the HRE. Its forces are immediately deployed.</p> <p><b>ε-E.6</b> All pillages of the LEAGUE and of the ALLIANCE are decided by their controller and goes in their Treasury.</p> <p><b>ε-E.7</b> A Major Victory involving forces of one or both alliances adjust the Stability of this side accordingly of the usual rules.</p> </div> <div> <div>ζ WHO IS WINNING THE WAR ?</div> <div> <div>ζ-F Peace Phase</div> <p><b>ζ-F.1</b> No minor country of an alliance ever makes a regular peace (even unconditional) outside of the peace of its alliance.</p> <p><b>ζ-F.2</b> One side may be in favoured position depending on the military control of the following cities.</p> <p><i>ζ-F.2.a</i> The ALLIANCE is awarded 2 points for the control of <u>Wien</u>.</p> <p><i>ζ-F.2.b</i> One point is awarded for each of those: <u>Speyer</u>, <u>Praha</u>, <u>München</u>, <u>Freiburg</u>, <u>Strasbourg</u>, <u>Hannover</u>, <u>Kleve</u>, <u>Cassel</u>, <u>Magdeburg</u>, <u>Berlin</u>, <u>Dresden</u>, <u>Frankfurt</u> and <u>Braunschweig</u></p> <p><i>ζ-F.2.c</i> ½point is awarded for each of these: <u>Köln</u>, <u>Stuttgart</u>, <u>Ulm</u>, <u>Mainz</u>, <u>Trier</u>, <u>Hamburg</u>, <u>Münster</u> and <u>Erfurt</u></p> <p><i>ζ-F.2.d</i> A side has a favoured position of it has at least 3 points more than the other alliance.</p> <p><b>ζ-F.3</b> Both the ALLIANCE and the LEAGUE lose each <b>2</b> Stability.</p> <p><b>ζ-F.4</b> Then if a side is favoured, it gains <b>1</b> Stability.</p> <p><b>ζ-F.5</b> HIS, HOL and AUS lose <b>1</b> Stability if they were not in the original war (in full intervention, not just a limited one) on the previous turn.</p> <p><b>ζ-F.6</b> HIS, HOL, AUS lose <b>2</b> Stability if they were at war (full intervention) on the previous turn (even if it was a war that lasted since more than one turn ; this war counts as one turn of the current one): their second turn of war just ended.</p> <div> <div>▶ end of specific rules for the war ▶</div> </div> <p><b>F.7 Result of the Danish Crusade</b></p> <p><i>F.7.a</i> If DAN* wins a battle against at least 1 ⚔ of the LEAGUE (or its allies) in the HRE, is never routed in battle and has forces left in HRE at the end of the turn, then its Crusade is successful.</p> <p><i>F.7.b</i> Thus the ALLIANCE gains <b>1</b> Stability; minor DANIA is placed in EW of ANG, annexes immediately <b>Lübeck</b> and <b>Holstein</b> (or <b>Mecklenburg</b> if it owns already both) and will continue its intervention until the end of the war, or when it signs any separate peace (in this war or another). It will not receive reinforcements <i>per se</i>, but some can be given from those of the ALLIANCE.</p> <p><i>F.7.c</i> If the Danish Crusade failed, minor DANIA makes a white peace and withdraws from the war. <i>Christian IV</i> remains as a Danish general for the full 4 turns.</p> </div> </div> <div> <div>Turn 2 – The Lion of the North (1629–1632)</div> <div> <div>G Event Phase</div> <p><b>G.1</b> Check for a possible extension of each alliance, see event part §§ (Extension of the alliances).</p> </div> </div> </div>	<div>Political Events of Period IV— master – 2016-04-14</div> <div>[E]455</div> <div> <p><b>G.2</b> SUE has to enter the war as an ally of the Protestant ALLIANCE. If it is Catholic, roll for <b>2 <i>Revolt</i></b> in SUE and it loses <b>1</b> Stability; nothing happens if it is Protestant – no CB is necessary and this is not a declaration of war.</p> <p><b>G.3 Military revolution</b> SUE receives <b>Gustav Adolf</b>. He is due to last 7 turns.</p> <p><i>G.3.a</i> If the current Monarch has 1 or 2 turns of life left, <b>Gustav Adolf</b> would be his heir. If <b>Gustav Adolf</b> dies (in battle) before the current Monarch, SUE will use the columns 7 to roll its next Monarch.</p> <p><i>G.3.b</i> If the current Monarch has more than 2 turns left, <b>Gustav Adolf</b> replaces him entirely and will last for the remaining of the 7 turns as a Monarch (but a death in battle).</p> <p><i>G.3.c</i> <b>Gustav Adolf</b> is a military genius, a general <i>Gustav Adolf</i> (♣ A 6.6.6 [Event IV-A]). As long as the war goes on for SUE, it benefits from a Military Revolution (see section VI.8.1.6 (Military Revolutions))</p> <p><i>G.3.d</i> [BLP] The moment <i>Gustav Adolf</i> dies (even in the middle of a round), SUE receives <i>Banér</i> for 3 turns. <i>Banér</i> replaced the deceased king (replace one counter by the other).</p> <p><i>G.3.e</i> <i>Sachsen-Weimar Sachsen-Weimar</i> (× A 3.4.4 -1 [Event IV-A]) joins SUE for 7 turns also.</p> <p><i>G.3.f</i> If <b>Gustav Adolf</b> dies, FRA (if allied to SUE) may hire <i>Saxe-Weimar</i> as a mercenary general to fight in the present war. It costs 30 ⚔ the first turn, then 20 ⚔ to keep <i>Saxe-Weimar</i>; when <i>Saxe-Weimar</i> is not paid one turn, he is eliminated (he does not go back to SUE). <i>Saxe-Weimar</i> takes command of one German stack of the ALLIANCE when he goes to FRA; at each following turns, FRA can take half (round down) of the reinforcements of the ALLIANCE (up to 4⚔) to be placed with <i>Saxe-Weimar</i>. If he dies the forces go back to normal status in the ALLIANCE.</p> <p><b>G.4</b> FRA, if Protestant, can begin a limited intervention in the war on the side of the ALLIANCE.</p> <p><b>G.5</b> Any MAJ that was doing a limited intervention during the previous turn (as defined in the original war) can continue this limited intervention to help the same side.</p> <p><b>G.6</b> The Turkish frontier (♣) is in effect this turn.</p> <div> <div>H Administrative Phase</div> <p><b>H.1</b> Roll for reinforcements as in the first turn, see German reinforcements (§5).</p> </div> <div> <div>I Military Phase</div> <p><b>I.1</b> The war is conducted according to General conditions of the war (§ε).</p> <p><b>I.2</b> SUE takes the control of the forces of one minor country of the ALLIANCE (its choice). This country can change from one turn to the other and is chosen at the beginning of any military round of the turn.</p> <p><b>I.3</b> SUE may force a minor country to enter the war in the ALLIANCE if it is one of the countries that could join the ALLIANCE and SUE has at least 1 ⚔ and <b>Gustav Adolf</b> in a province of the country.</p> <p><b>I.4</b> If SUE makes a siege of allied or neutral <b>Mecklenburg</b>, <b>Hinterpommern</b> or <b>Vorpommern</b> with at least one ⚔, then the city surrenders without fighting at the end of the round.</p> <p><b>I.5</b> All cities taken (by siege, assault or automatic surrender) with at least one Swedish ♠, or only Swedish troops, have now Swedish garrisons (and the town counts as Swedish presence in the HRE). Other Major powers put their garrison if the city is taken with only their own forces (else, German garrisons are in charge).</p> </div> <div> <div>J Peace Phase</div> <p><b>J.1</b> The balance of the war is checked as in Who is winning the war ? (§ζ). The losses of Stability are applied except that now there is one turn more:</p> <p><i>J.1.a</i> Both the ALLIANCE and the LEAGUE lose each <b>3</b> Stability.</p> <p><i>J.1.b</i> Then if a side is favoured, it gains <b>2</b> Stability.</p> <p><i>J.1.c</i> Any Major Power in its second turn of war lose <b>2</b> Stability.</p> <p><i>J.1.d</i> HIS, HOL, AUS lose <b>3</b> Stability if they are in their third turn of war.</p> <p><i>J.1.e</i> SUE and ANG if continuing their intervention lose <b>1</b> Stability.</p> </div> <p><b>J.2 Suing for peace</b></p> <p><i>J.2.a</i> A German alliance sues for the Peace of Prague (§η) when it is at <b>–3</b> in Stability at the end of two consecutive turns, and the position in the HRE is not in its favour. The enemy side grants necessarily this peace.</p> </div>
--	--

<div>[E]456</div> <div>Political Events of Period IV</div> <p><i>J.2.b</i> If both alliances are at <b>−3</b> in Stability at the end of any turn, their controllers can agree to a Status Quo and sign the Peace of Prague.</p> <p><i>J.2.c</i> When the Peace of Prague is signed, the German alliances are partly dissolved; their stability will not be recorded further and most of the minor countries in these alliances make a peace. The alliances want to stop the war and sign a peace so, from now on, all foreign countries have no constraint to sign peaces also. It would not be a separate peace from the German alliance point of view (but could be from another country...)</p> <p><i>J.2.d</i> However, if some Major Powers want to keep fighting in the HRE and refuse to sign the Peace of Prague, see event part §0 (The War after Prague). Keeping fighting means that the Major power does not sign treaty of peace with every enemy (that are MAJ, the enemy German alliance, and possibly minor HOLLANDIA and minor DANIA); moreover this country is not allowed to sign a Truce next turn. Minor HABSBURGUM signs or not the Peace of Prague alongside HIS.</p> <p><i>J.2.e</i> If no Major Power contests the Peace of Prague by continuing the fight, apply now the Peace of Westphalie (§1).</p> <div>Turn 3 (1632–1636) and after: a Foreign War</div> <p><i>Date: Turn 4: 1637–1641 (first turn after the Peace of Prague); Turn 5: 1642–1648 (from Rocroi and Jankov to Lens); Turn 6: 1648-1654 (La Fronde); Turn 7: 1654–1660..</i></p> <div>K Event Phase</div> <p><b>K.1</b> Check for a possible extension of each alliance, see Extension of the alliances (§β).</p> <p><b>K.2</b> No limited intervention of the previous turn can be carried on.</p> <p><b>K.3</b> At any turn, FRA and ANG can enter the war as an ally of the side they chose. They have a CB against a side which has not their Religious Stand, and none against an alliance having the same Religious Attitude; the ALLIANCE is Protestant and the LEAGUE is Catholic/Counter-Reformation.</p> <p><b>K.4</b> At any turn, POL (unless it is Orthodox) can make a full or limited intervention in the war as an ally of any side. POL can do such an intervention only once during the war. It has a CB only against an alliance that has not the exact same Religious Attitude (relative to Catholicism) as itself.</p> <div>L Administrative Phase</div> <p><b>L.1</b> Roll for reinforcements as in the first turn, see German reinforcements (§δ).</p> <p><b>L.2</b> Two turns after a Military Revolution caused by SUE, the Land Technology of the Latin minor countries reaches this new Technology.</p> <div>M Military Phase</div> <p><b>M.1</b> The war is conducted according to General conditions of the war (§ε).</p> <p><b>M.2</b> SUE takes the control of the forces of one minor country of the ALLIANCE (its choice). This country can change from one turn to the other and is chosen at the beginning of any military round of the turn.</p> <p><b>M.3</b> On the third turn only (not after), if SUE makes a siege of allied or neutral <b>Mecklenburg, Hinterpommern</b> or <b>Vorpommern</b> with at least one ⚔, then the city surrenders without fighting at the end of the round.</p> <p><b>M.4</b> All cities taken (by siege, assault or automatic surrender) with at least one Swedish ⚔, or only Swedish troops, have now Swedish garrisons (and the town counts as Swedish presence in the HRE). Other Major powers put their garrison if the city is taken with only their own forces (else, German garrisons are in charge).</p> <div>N Peace Phase</div> <p><b>N.1</b> The balance of the war is checked as in Who is winning the war ? (§ζ). The losses of Stability are applied with one turn more. This war can not cause a loss more than <b>4</b> Stability at the end of turn. On turn 3 of the Religious War, the losses should be:</p> <p><i>N.1.a</i> the ALLIANCE and the LEAGUE lose <b>4</b> Stability;</p> <p><i>N.1.b</i> the favoured side then gains 2 Stability;</p> <p><i>N.1.c</i> any Major Power in its third turn of war lose <b>3</b> Stability.</p> <p><i>N.1.d</i> HIS, HOL, AUS lose <b>4</b> Stability if they were at war before the Religious War in the HRE.</p>	<div>Political Events of Period IV— master – 2016-04-14</div> <div>[E]457</div> <p><i>N.1.e</i> SUE loses <b>2</b> Stability.</p> <p><i>N.1.f</i> Any other Major Power intervening in the war at this turn lose <b>1</b> Stability.</p> <p><b>N.2 Suing for peace</b> As described in §J.2 (Suing for peace) of event IV-A.ζ (Thirty Years' War).</p> <p><b>N.3</b> If SUE, ANG or POL (in full intervention) do not hold any city nor have any ⚔ left in the HRE, they make a mandatory white peace against all its enemies in this war. This will count as a losing position in Peace of Westphalie (§1).</p> <p><b>N.4</b> If POL is doing a limited intervention and wins a battle against at least one ⚔ of the enemy side (any nationality) in the HRE, then loses no battle in the HRE, the alliance it helps gains <b>1</b> in Stability (AUS also). POL may then annex <b>Hinterpommern</b> or any province in the HRE that once was Polish. Its limited intervention lasts only one turn.</p> <div>Between Prague and Westphalie</div> <div>η PEACE OF PRAGUE</div> <p><b>η-N.1</b> If the LEAGUE is favoured by the Peace:</p> <p><i>η-N.1.a</i> The Southern HRE Alliance (§λ) is created</p> <p><i>η-N.1.b</i> BAVARIA gains permanently its second ⚔ and PALATINATUS loses its own; BAVARIA is now an Electorate. It also gains a permanent <b>+1</b> to its reinforcement rolls.</p> <p><i>η-N.1.c</i> BAVARIA annexes <b>Oberpfalz</b>, except if this war follows War of the Schmalkaldic League (II-9), in which case it annexes <b>Schwaben</b>.</p> <p><i>η-N.1.d</i> BAVARIA is now in MA with AUS* (move its diplomatic marker accordingly).</p> <p><i>η-N.1.e</i> A Total Victory of the LEAGUE in the Peace of Westphalie (§1) is possible.</p> <p><i>η-N.1.f</i> Any specific consequence given by the victory of the side of the LEAGUE in the war having caused event IV-A (Thirty Years' War) is applied.</p> <p><i>η-N.1.g</i> The Truce of Augsburg is revoked.</p> <p><i>η-N.1.h</i> HIS and AUS gain 30 VP, SUE loses 10 VP.</p> <p><i>η-N.1.i</i> DAN* loses its second ⚔ counter, unless its crusade was successful.</p> <p><b>η-N.2</b> If the Peace is a Status Quo:</p> <p><i>η-N.2.a</i> BAVARIA keeps its second army for the continuation of this war (but not permanently).</p> <p><i>η-N.2.b</i> The Truce of Augsburg is in effect.</p> <p><i>η-N.2.c</i> No side can achieve Total Victory in the Peace of Westphalie (§1).</p> <p><b>η-N.3</b> If the ALLIANCE is favoured by the Peace:</p> <p><i>η-N.3.a</i> The Truce of Augsburg is in effect.</p> <p><i>η-N.3.b</i> A Northern HRE Alliance (§κ) is created and allied to HOL.</p> <p><i>η-N.3.c</i> WESTFALLIA, HANOVERE, HASSIA, HANSA and CLIVIA are placed in EW of HOL.</p> <p><i>η-N.3.d</i> A Total Victory of the ALLIANCE is now possible.</p> <p><i>η-N.3.e</i> HOL and SUE gain 30 VP.</p> <div>θ THE WAR AFTER PRAGUE</div> <p><b>θ-N.1</b> Only some minor countries continue the war. All other minor countries of the HRE surrender: their forces are withdrawn and their cities are considered as taken for the reinforcements.</p> <p><i>θ-N.1.a</i> On the side of the LEAGUE: AUS* and, if the Peace is not in favour of the ALLIANCE, BAVARIA.</p> <p><i>θ-N.1.b</i> On the side of the ALLIANCE: the controller is now SUE and it chooses 2 countries, (only 1 if LEAGUE won the Peace of Prague), that will continue the fight from the following list: HASSIA, HANOVERE, PALATINATUS, SAXONIA.</p> <p><i>θ-N.1.c</i> If the Peace is favourable to the LEAGUE, SAXONIA reverses its alliance and enters war with the Catholics. All its forces are withdrawn from the map, and the cities of SAXONIA surrender immediately to the Catholics; Protestant forces in the provinces are withdrawn.</p> <p><i>θ-N.1.d</i> BRANDENBURGUM will continue (or enter) the war as an ally of the Protestant if SUE gives up its claims on <b>Vorpommern</b> to BRANDENBURGUM in Peace of Westphalie (§1).</p>
---	--

<p>[E]458</p> <p>Political Events of Period IV</p> <p><i>θ-N.1.e</i> If FRA hires <i>Saxe-Weimar</i> at this turn (continuing from a previous turn or not), he keeps one stack of any one protestant country. This country remains at war (until it surrendered unconditionally or <i>Saxe-Weimar</i> is no more at the service of FRA). It will receive reinforcements for this stack (using the mechanism for the stack of <i>Saxe-Weimar</i>).</p> <p><i>θ-N.1.f</i> Provinces of HANSA that are controlled by a country still at war stay at war even if HANSA itself is not at war anymore.</p> <p><b>θ-N.2</b> The minor countries that continue the war are allied in their alliance, and with the Major countries in the war. But they want peace so they will stop fighting as soon as all foreign minor/major countries do likewise.</p> <p><i>θ-N.2.a</i> A minor country of the HRE can now be ejected from its alliance and from the war, but only by imposing an unconditional surrender on it; other regular peaces are not possible.</p> <p><b>θ-N.3</b> All other minor countries that were in both alliances are now at peace; they all have now a Neutral diplomatic status. All the cities in those countries are considered conquered in order to check for reinforcements.</p> <p><b>θ-N.4</b> Foreign minor country minor DANIA stops the war whereas minor HOLLANDIA continues. A regular peace has to be obtained against it.</p> <p><b>θ-N.5</b> Do not forget that this war causes at most a loss of <b>4</b> Stability for each country at the end of turn. If the War caused by the Revolt of the United Provinces continue, it resumes its normal loss in Stability only if an Armistice is made (at least 1 turn) between HIS and HOL at the end of the present war; else the present war has to continue and so does the loss of <b>4</b> Stability each turn.</p> <p><b>I PEACE OF WESTPHALIE</b></p> <p><b>ι-N.1</b> This Peace is signed at the end of a turn, beginning with the turn of the Peace of Prague, if all Major countries in the war agree to end the war, that is to sign Peaces or Armistices between them. The following effects are implemented as further consequences of the regular Peace Treaties.</p> <p><b>ι-N.2</b> The Emperor of the HRE is now AUS* if this was not, for the rest of the game.</p> <p><b>ι-N.3</b> The Major Countries that can be involved in the war are HIS (and minor HABSBURGUM), AUS, FRA, HOL, SUE, ANG and POL.</p> <p><i>ι-N.3.a</i> A Major Power that stops the war (it has signed Peaces or Armistices with all other Major Powers at the end of some turn) before the end has a losing position for this Peace; it has also this position if it signs a mandatory white peace (for any reason).</p> <p><i>ι-N.3.b</i> A Major Power has a dominant position if it signs only winning Treaties of Peace with countries of the other side (no Armistices or White Peaces either) on the last turn of this war.</p> <p><i>ι-N.3.c</i> A Major Power has a losing position if it signs only losing Treaties of Peace with countries of the other side (no Armistices or White Peaces either) on the last turn of this war.</p> <p><i>ι-N.3.d</i> In other cases, the position is neutral.</p> <p><b>ι-N.4 Spain or Austria</b></p> <p><i>ι-N.4.a</i> These specific conditions are for [AUS/HIS].</p> <p><i>ι-N.4.b</i> A minor HABSBURGUM will continue to fight with HIS until the end of the war (except by unconditional surrender, following the rules for all minor countries from the HRE still at war after the Peace of Prague).</p> <p><i>ι-N.4.c</i> If both HIS and AUS are in dominant position and a Catholic Total Victory was possible, the GERMANUM IMPERIUM is created (see event part §u).</p> <p><i>ι-N.4.d</i> If AUS* is in dominant position but no Catholic Total Victory was possible, a Southern HRE Alliance (§λ) is associated to AUS*. The countries in this alliance are put in EW of AUS*: BAVARIA, TREVORUM, ALSATIA, FRIBURGENSIS and WIRTENBERGA.</p> <p><i>ι-N.4.e</i> AUS* in neutral position: nothing more.</p> <p><i>ι-N.4.f</i> AUS* in loosing position: destruction of the Southern HRE Alliance (§λ).</p> <p><b>ι-N.5 Spain</b> If HIS is in dominant position, it gains a permanent <b>+1</b> bonus in Diplomacy on Catholic countries of the HRE.</p>	<p>Political Events of Period IV— master – 2016-04-14</p> <p>[E]459</p> <p><b>ι-N.6 Austria</b> If AUS is in neutral position, it gains a permanent <b>+1</b> bonus in Diplomacy on Catholic countries of the HRE.</p> <p><b>ι-N.7 The Netherlands</b></p> <p><i>ι-N.7.a</i> If HOL* has a dominant position and a Protestant Total Victory is possible, HANSA annexes <b>Oldenburg</b> and HOL gains HANSA as a permanent VA. Eliminating the Northern HRE Alliance (§κ) will now need a Peace of level 5 against HOL.</p> <p><i>ι-N.7.b</i> If HOL* has a dominant position (but without possible Protestant Total Victory), it gains HANSA as a normal VA and HANSA annexes <b>Oldenburg</b>. The Northern HRE Alliance (§κ) is created and allied to HOL* with the corresponding effects.</p> <p><i>ι-N.7.c</i> If HOL has a neutral position, it has the choice to allow or not to the destruction of HANSA (its controller in the case of a minor HOLLANDIA).</p> <p><i>ι-N.7.d</i> Else, if HOL (or minor HOLLANDIA) is in losing position, the HANSA is destroyed and the Northern HRE Alliance (§κ) is dissolved.</p> <p><b>ι-N.8 Sweden</b></p> <p><i>ι-N.8.a</i> If SUE has a dominant position, it annexes <b>Mecklenburg</b>, then <b>Vorpommern</b> if it has not renounced its claims on this province (else it gains BRANDENBURGUM in EW) and <b>Bremen</b> or <b>Lübeck</b> (its choice). It then chooses one Protestant minor country (or 3 minor countries if a Protestant Total Victory was possible) of the HRE that is (are) placed in EW on its Diplomatic chart.</p> <p><i>ι-N.8.b</i> If SUE is in neutral position, it annexes <b>Mecklenburg</b>, then <b>Vorpommern</b> if it has not renounced its claims on this province; else it gains BRANDENBURGUM in EW. It then chooses one Protestant minor country of the HRE that is placed in EW on its Diplomatic chart.</p> <p><i>ι-N.8.c</i> If SUE is in losing position, it gains nothing.</p> <p><b>ι-N.9 France</b></p> <p><i>ι-N.9.a</i> If FRA is in dominant position, it gains a <b>+1</b> bonus for Diplomacy on countries of the HRE until the end of the period and a free CB against HIS, to be used during this period.</p> <p><i>ι-N.9.b</i> If FRA is in dominant or neutral position, it gains ALSATIA as a VA and COLONIA in EC.</p> <p><b>ι-N.10 England</b> If ANG is in dominant position, it gains a <b>+1</b> bonus for Diplomacy on countries of the HRE until the end of period V. It also gains a minor country of its choice, having the same religion as ANG, that is placed in EW on its chart.</p> <p><b>ι-N.11 Poland</b> If POL is in dominant position after a full intervention, it gains a <b>+1</b> bonus for Diplomacy on countries of the HRE until the end of period V. It also gains a minor country of its choice, having the same religion as POL, that is placed in EW on its chart.</p> <p><b>ι-N.12</b> When a major country can take a the diplomatic control of a minor country, the order of choice is the order written here, and a power can only choose neutral minor country of the HRE (not those already allied to someone else).</p> <p><b>ι-N.13</b> BRANDENBURGUM annexes <b>Hinterpommern</b> if it is in HANSA.</p> <p><b>ι-N.14</b> Then, if HANSA has to be destroyed, its remaining provinces are now given as follows: SUE takes <b>Bremen</b>, BRANDENBURGUM takes <b>Vorpommern</b> and <b>Mecklenburg</b>, then minor DANIA all the remaining ones.</p> <p><i>ι-N.14.a</i> Otherwise, HANSA is considered to have no capital (its provinces may thus be annexed by anybody).</p> <p><b>ι-N.15</b> From now on, any major power that owns a province in HRE or adjacent to a province of the HRE may, when at war, enter and remain in any neutral province of the HRE. The cost in MP is the same as enemy territory. The neutral provinces can not be pillaged, besieged nor give supply (but supply lines can cross those if there are no enemy force within).</p> <p><b>ι-N.16</b> In any cases, HANSA has no more capital (all its provinces can be annexed regularly).</p> <p><b>ι-N.17 Victory Points</b></p>
--	---

*I-N.17.a* A Major Power in dominant position at the end of the war wins 30 VP (added to those of the treaties of Peace).

*I-N.17.b* A Major Power in losing position at the end of the war loses 30 VP.

➤ end of between prague and westphalie ➤

➤ **German alliances emerging from the war** ➤

**K NORTHERN HRE ALLIANCE**

### κ-O Lasting Effects

**κ-0.1** When this alliance exists, it is allied to HOL\*. It represents treaties between WESTFALLIA, HANOVERE, HASSIA, HANSA and CLIVIA.

κ-O.1.a These countries are put in MA of HOL.

**κ-0.2** HOL has a permanent bonus of **+2** in Diplomacy on these countries.

**κ-0.3** HOL gains also a income of 10  $\text{D}$  for each coastal city in HANSA if it is on his diplomatic track.

**k-O.3.a** This Northern alliance is dissolved when HOL signs a losing Peace of level 3 or higher, or when it controls no country of the alliance. The bonuses are permanently lost.

λ SOUTHERN HRE ALLIANCE

### $\lambda$ -P Lasting Effects

**λ-P.1** A Southern HRE alliance is associated to AUS\*, composed by the following countries: BAVARIA, MOGENTIUM, ALSATIA, FRIBURGENSIS and WIRTENBERGA.

*λ-P.1.a* These countries are put in MA of AUS\*.

**λ-P.2** Each of these countries on the AUS\* or [AUS/HIS] diplomatic chart will give an income of 10 \$ to [AUS/HIS].

**λ-P.3** [AUS/HIS] gains a **+1** bonus in Diplomacy on every Catholic countries in the HRE.

**A-P.4** This Southern alliance is dissolved when [AUS/HIS] signs a losing Peace of level 3 or more, or when neither [AUS/HIS] nor AUS\* controls any country of the Alliance. The bonuses are permanently lost.

**λ-P.5** When a GE is created, the Southern alliance is also dissolved (and becomes part of the GE).

μ GERMAN EMPIRE

### **μ-Q Lasting Effects**

**µ-Q.1** All minor countries of the HRE (except AUS\* which remains independent) are associated in one minor country, called the GERMANUM IMPERIUM. This country is a permanent VA of [AUS/HIS]. It can use 4  $\blacktriangle$  counters, and 12 LD (for practical ease, use the counter of the HRE and any counter of some part of the empire, with no notion of nationality – there are all from the GE). Its basic forces are one  $\blacktriangle\oplus$  and one  $\blacktriangle\ominus$ . It has a modifier of **+2** for reinforcements and always makes peace with [AUS/HIS].

**μ-Q.2** [AUS/HIS] receives an income of 100 \$ from the HRE (and not the exact value of the country) and can use its port on the Baltic Sea.

**μ-Q.3** When the GERMANUM IMPERIUM exists, the Dynastic Alliance between minor HABSBURGUM and HIS is both defensive and offensive.

**µ-Q.4** Some events may dissolve part of the GERMANUM IMPERIUM by creating a League (War of the Schmalkaldic League (II-9), League of Nassau (III-1 (3)), Bohemian Revolt (IV-1 (1)), Revocation of the Truce of Augsburg (IV-1 (2)), War for the Unity of the HRE (IV-2 (2))) which ceases to be in the Empire, and is (depending on the event) at war with the Emperor. An unconditional peace of the Emperor on any of those countries bring it back in GERMANUM IMPERIUM.

**µ-Q.5** Event V-13 (Creation of the Kingdom of Prussia) liberates BRANDENBURGUM from GERMANUM IMPERIUM (and it can't be forced back in).

**µ-Q.6** When any province with a capital of GERMANUM IMPERIUM is lost as the result of a Peace, the minor country having this capital is renewed as a free country, having status EW or VA (if possible) with the MAJ that liberated it (player's choice). AUS\* can force the MIN back in the GERMANUM IMPERIUM by means of an unconditional peace on it.

**μ-Q.7** Some events (Revocation of the Truce of Augsburg (IV-1 (2)), War for the Unity of the HRE (IV-2 (2)) and War of Devolution (V-1)) can cause Civil War in GERMANUM IMPERIUM that foreign countries can help in order to dissolve GERMANUM IMPERIUM.

**μ-Q.8** The The War of Spanish Succession (V-4) may separate the Spanish dynasty from the Austrian dynasty because of a Crisis of Succession.

μ-Q.8.a If HIS chooses a minor HABSBURGUM Heir, the GERMANUM IMPERIUM fights along their side with no Dynastic Separation.

**μ-Q.8.b** If HIS chooses another Heir than a minor HABSBUGUM, the GERMANUM IMPERIUM is dissolved but BAVARIA, MOGENTIUM, LOTHARINGIA, FRIBURGENSIS and WIRTENBERGA are placed in MA of AUS\* and enters war at its side; and AUS\* gains the benefits of Southern HRE Alliance (§A). All other countries that are recreated at this time are Neutral.

$\mu$ -Q.8.c AUS (if major) keeps the GERMANUM IMPERIUM.

$\mu$ -Q.8.d See the other conditions in this event.

**μ-Q.9** The GERMANUM IMPERIUM ceases to exist as soon as its controller is forced to sign any peace of level 3 or more. In addition to the normal peace conditions, GERMANUM IMPERIUM is dissolved: all minor countries of the HRE are back to previous frontiers, and are neutral.

→ end of german alliances emerging from the war →

**IV-B CIVIL WAR IN POLAND** PB

*Date: alternative history.*

*Duration: Until the end of the war*

**A Event Phase**

**A.1** Can only happen once, either as explained in event IV-10 (1) (Liberum Veto) or in event V-12 (Augustus II, a Saxon king in Poland).

**A.2** POL is now in civil war. One side, called "Absolutists" remain loyal to the King and try to impose Absolutism in POL while the other side, called "Rebels" is lead by the great nobles of the kingdom trying to keep the Republic and the elective monarchy.

**A.2.a** The player plays the Absolutists.

**A.3** If they have a province bordering POL, the following countries can enter a full war against any of the side: RUS, SUE, AUS\*, PRU.

**A.3.a** They have a free CB this turn against both sides of the civil war.

**A.3.b** Other countries can only make a foreign intervention as per normal rules.

**A.4 Economic and Political crisis:** The RT of POL is diminished by half and loses at least 50 ₰. POL loses 2 Stability.

**Accounting v1:**

**A.4.a** Do not take into account the minimal loss of 50 ₰.

**A.5** The Rebels control the following provinces:

**A.5.a** **Małopolska, Lietuva;**

**A.5.b** one other province randomly chosen in **POLONIA**;

**A.5.c** two other provinces randomly chosen in **LITUANIA**.

**A.5.d** The 5 provinces must be different and all possessed by POL at the beginning of the event.

**A.6** Roll for two **Revolt** in POL. There are ⊖ and do not control the cities.

**A.7** If event IV-17 (1) (The Times of Troubles in Russia) already happened but not event IV-17 (2) (Revolt of the Cossacks) and the religious attitude of POL is not Tolerance of the Orthodoxy, Revolt of the Cossacks happens immediately.

**A.8** The Rebels side is played by the first country at war against the Absolutists in the following list: RUS, SUE, AUS\*, TUR, HOL, ANG, FRA, PRU.

**A.8.a** If none is at war against the Absolutists, then the Rebels are played by the first country in the same list which is not at war as an ally of the Absolutists.

**B Administrative Phase**

**B.1** Lands forces of POL equal to the basic forces for the period (excluding Ukraine) become Rebels.

**B.1.a** If POL does not have enough troops raised, an immediate levy happens, paid for by the treasure of POL (even if this causes a bankruptcy).

**B.2** The basic upkeep for the Absolutists is the one of POLONIA only (⊕).

**B.2.a** The player may use the counters of POLONIA and two ⚠ (they can be taken from any unused country, and are similar to any other Polish Army)

**B.2.b** Absolutists receive normal income from the provinces they control.

**B.2.c** Absolutists troops in rebel provinces (at the beginning of the war) are retreated normally.

**B.2.d** Fleet stay loyal to the Absolutists.

**B.2.e** The king of POL must be used as a general of the Absolutists, except if he is **August II**.

**B.3** The Rebels side uses the counters of LITUANIA as well as two revolts ⚠.

**B.3.a** He does not get reinforcement at the first turn of the war.

**B.3.b** At the first turn of the war, the Rebels forces can be freely redeployed in the controlled provinces.

**B.3.c** If a named general (other than *Patkul* when **August II** is king) is in play, he takes side for the Rebels. Otherwise, the Rebels are lead by a random mercenary general and get an extra random general.

**B.4** **Revolt** in POL are friendly to the Rebels.

**B.4.a** A rebel general can lead a **Revolt**. A **Revolt** ⊖ count as 2LD for hierarchy rules.

**B.5** Starting with the second turn of the war, Rebels get reinforcement either in offensive or defensive attitude based on the income of the province they control (control the city with no absolutist army in the province).

**B.6** If UKRAINA is not in revolt or independent due to event IV-17 (2) (Revolt of the Cossacks), the Ukrainian army can be used by the Absolutists (but without the basic upkeep for it).

**B.7** If the king is member of the dynasty of SAXONIA, he can use the forces of the minor as per the rules of event V-12 (Augustus II, a Saxon king in Poland).

**B.7.a** In that case, SAXONIA is at war against the Rebels and their allies can freely cross the HRE and wage war in SAXONIA.

**C Military Phase**

**C.1** Absolutists and Rebels get supply from the cities they control.

**C.1.a** They can cross enemy provinces without besieging the city.

**C.1.b** This is only true for polish forces. Not for the foreign allies.

**C.1.c** The Absolutists cannot cross freely the provinces with a **Revolt**.

**D Peace Phase**

**D.1** Victory in the civil war occurs as soon as one side gets two out of the following three conditions:

**D.1.a** controlling the capital (controlling **Małopolska** and, if *Warszawa* has been made capital, **Mazowia**) ;

**D.1.b** controlling the country (military control of at least 60% of the provinces, that is controlling the city without enemy presence ; provinces with a **Revolt** and the city still controlled by the Absolutists count for nobody) ;

**D.1.c** military victory (having one more major victory than the other side this turn, or the other side as no more ⚠ in play).

**D.2** The war lasts as long as no side wins.

**D.3** Wars with foreign countries can be ended by separate peaces.

**D.3.a** If the Absolutists are not fully at war against another major country, POL does not lose Stability due to the war (but does so due to **Revolt**).

**D.3.b** A (foreign) peace in the civil war is also a peace with POL (if another war was occurring), or a separate peace with loss of 2 Stability for breaking the alliance with the side of the civil war the foreign country was allied to.

**D.4 Absolutists victory**

**D.4.a** The effect of §A (Liberum Veto.) of section XIV.3.2.4 (Liberum Veto or Absolutism) are cancelled.

**D.4.b** Events VI-1 (The Great Northern War), VII-6 (The Confederation of the Bar), VII-7 (First Partition of Poland), VII-8 (Second Partition of Poland) and VII-9 (National Revival of Poland) are modified.

**D.4.c** Any country fully allied with the Absolutists who accept the peace annexes a province of POL (POL choose which).

**D.4.d** The Rebels armies are eliminated.

**D.4.e** The **Revolt** stay in place.

**D.5 Rebels victory**

**D.5.a** A dynastic crisis occurs and a new king is elected (this is a change of polish dynasty), a general cannot be elected king unless he took the side of the Rebels.

**D.5.b** A Polish provinces is given to each MAJ who was fully at war against the Absolutists (choice is made by the MAJ receiving the province, in order of initiative).

**D.5.c** The Stability of POL immediately becomes -1.

**D.5.d** The **Revolt** and the Absolutists armies are removed.

### V-1 WAR OF DEVOLUTION Risto

Date: 1667-1668.

#### A Condition:

Can occur only if FRA is not currently in a war (including Civil Wars). Otherwise, re-roll.

#### B Diplomatic Phase

B.1 FRA receives a free CB for this turn against one owner of either **Picardie**, **Artois**, **Flandre** or **Hainaut**. This event is triggered off by FRA using this CB to declare a war, and if it declines to do this the rest of the event does not occur.

B.2 HOL and ANG may each sign a Defensive Alliance with the victim of FRA declaration of war per above, provided both sides agree, immediately at this turn or on the following turn. The alliance provides an immediate CB as reaction against the declaration of war of FRA.

#### C Administrative Phase

C.1 FRA can collect incomes in the above mentioned provinces whenever they are militarily conquered by FRA.

#### D Peace Phase

D.1 If FRA is not victorious, HOL receives, if it was at war, 30 VP at the end of a war against FRA triggered by this event.

### V-2 (1) CHAMBER OF REUNION Risto

Date: 1681-1684.

#### A Condition:

A.1 Cannot occur if there is a German Empire. In that case mark off, but do not consider as played for the first time.

A.2 Cannot occur if **Alsace** is not part of ALSATIA. In that case mark off and considered as played for the first time.

#### B Event Phase

B.1 FRA annexes **Alsace**. This provides HIS, HOL, ANG and AUS a temporary CB against FRA for this turn.B.2 If FRA currently militarily occupies **Picardie**, **Rosseló**, **Franche-Comté** and/or **Artois**, it can immediately annex any such province without any peace treaty.

#### C Diplomatic Phase

C.1 The current Emperor (or HIS if minor HABSURGUM is Emperor) receives a bonus of +3 for its diplomacy on all HRE minors this turn.

### V-2 (2) WAR OF THE LEAGUE OF AUGSBURG Risto

Date: 1688-1697.

#### A Condition:

A.1 Can occur only if FRA is not involved in a war (including civil war). Otherwise re-roll.

A.2 Cannot occur if event V-1 (War of Devolution) has not already been finished. Otherwise re-roll.

#### B Event Phase

B.1 FRA may immediately annex one of the following provinces: **Picardie**, **Rosseló**, **Franche-Comté**, **Luxemburg**, **Alsace** or **Lorraine**. Such annexation is regarded as a free declaration of war against the owner of the province chosen (unless eliminated in the process).

B.2 If FRA uses this opportunity to annex a province, HOL and ANG receive a temporary free CB against FRA for this turn. They do not necessarily have to be in alliance with the victim of French aggression or with each other (but they may decide so if both sides agree).

**V-3 THE GLORIOUS REVOLUTION IN ENGLAND**

PBMod

Date: 1688-1690.

**A Condition:****TODO:** If ANG is Catholic/Counter-Reformation?**A.1** If ANG is Protestant/Rigorous:

**A.1.a** Put a *Revolt*⊖ in each Irish province except **Uladh**, one LID and one general in one of the revolted provinces. ANG is not in Civil war, the *Revolt* are controlled by HOL.

**A.1.b** SCOTIA declares war on ANG (breaking any alliance it may have with ANG) and call for allies as per normal rules.

**A.2** Otherwise (Catholic/Counter-Reformation, Catholic/Conciliatory or Protestant/Anglican), use the rest of the event.

**B Event Phase**

**B.1** ANG is considered to have overthrown its current monarch. ANG is now in Civil war between two sides: the Rebels, called "Royalists" (followers of the old king) are Catholic/Counter-Reformation, and the Loyalists, called "Orange" are Protestant/Anglican (see section IV.5.5.5 (Religious Wars, Civil Wars)).

**B.1.a** The Royalists are controlled by a Catholic FRA, or HIS otherwise. They use the counters of FIDELIS REGI.

**TODO:** ANG choose be able to choose the order in which he propose the crown to other protestant countries. Clarify the rules for the union in case "Orange" is not HOL.

**B.1.b** The loyalists are controlled by the English player and use the counters of ANG. They are automatically allied with the first country in the following list who accept: HOL, Protestant FRA, SUE. These countries are allied as per (REF NEEDED, See Special Rule for ANG) and immediately makes a white peace.

**B.2** In support of the overthrown monarch, two *Revolt* are rolled for in England. Furthermore a *Revolt*⊕ is placed both in **Connacht** and **Mumhan** and the rebels control both fortresses. A LID and a general are placed in one Irish province.

**B.2.a** If this event is caused by event IV-7 (2) (The Parliament and the English Kings), a royalist A⊕ is raised in **Cymru** (or in any province of Scotland if event IV-6 (Personal Union between England and Scotland) is effective). The Royalists control the fortress in this province and one other (or two other provinces if in Scotland). Otherwise, Royalists get an A⊖ and control of the fortress in this province and one other.

**B.3** If event IV-6 (Personal Union between England and Scotland) is effective, SCOTIA allies itself to FIDELIS REGI and is at war with the Loyalists (with no declaration of war).

**C Diplomatic Phase**

**C.1** The controller of the rebels has a CB against ANG to make a limited intervention against ANG this turn, that can become a full intervention on the second turn. If ANG was Catholic/Counter-Reformation or the event was caused by event IV-7 (2) (The Parliament and the English Kings), the controller may make a full intervention from the first turn on.

**D Administrative Phase**

**D.1** The Royalists roll for reinforcements in offensive or naval status (but with -2 for naval).

**D.2** All reinforcements must be placed in a province with existing rebel or allied units, not just *Revolt* or cities. If none, no reinforcements are received.

**E Peace Phase**

**E.1** Peace is determined with usual rules except that:

**E.1.a** The Royalists surrender unconditionally if they have no forces nor *Revolt* left (fortresses do not count).

**E.2** If the the new English king is overthrown by *Revolt*, it also surrenders unconditionally to the Royalists and their controller.

**E.3 Victory of Royalists** If the Royalists win (alone or with their controller), the king is restored (with his values as a monarch) and the House of Orange is expelled.

**E.3.a** ANG becomes Catholic/Counter-Reformation (except if it was Catholic/Conciliatory, in which case it remains so). It loses 50 VP.

**E.3.b** Act of Union (VI-8) is broken. If it did not happen yet, it may occur later.

**E.4 Total Victory of Royalists** If the Royalists and their controller (making a full intervention) impose an unconditional surrender to ANG, additional consequences are:

**E.4.a** ANG makes a mandatory Dynastic Alliance with the controller of the Rebels and must give a COL or TP as dowry.

**E.4.b** Act of Union (VI-8) is broken. If it did not happen yet, it may not occur later (with some modifications).

**E.4.c** ANG makes a mandatory offensive alliance with the controller of the rebels for 2 turns. It cannot declare war against it (except with CB from events; in this case the alliance has to be broken with the usual cost in Stability).

**V-4 THE WAR OF SPANISH SUCCESSION**

PBMod

Date: 1700-1713.

**A Activation:**

**A.1** This event cannot occur before period V. Re-roll and do not mark off if this is not the case.

**A.2** When the event occurs, its effects are not actually applied. They will be triggered at the death of the current Spanish Monarch.

**A.3** If there is a GE, see the specific modifications in event part IV-A.μ (German Empire).

## Death of the Monarch

**B Event Phase**

**B.1** HIS may concede immediately white or losing peace to all its current enemies. Unaligned MIN always accept a white peace.

**C Diplomatic Phase**

**C.1** HIS designates an heir to the Spanish throne. The choice must be made among the following countries:

**C.1.a** One of the following MAJ that is Catholic: FRA, AUS, ANG;

**C.1.b** Minor HABSBURGUM;

**C.1.c** Another Catholic minor country.

**C.2** A MAJ may decline the offer, but cannot then take part in any war ensuing from this event, nor can it be positively affected by the event (for objectives or any possible gain in the event).

**C.2.a** In that case, HIS proposes a different Heir, and so on, until one accepts (minor powers always accept).

**C.2.b** The power that accepts will be designated as the *Heir* in the rest of the event.

**C.2.c** If the Heir is a minor power, all its decisions are made on its behalf by HIS.

**C.3** If AUS\* is not the chosen Heir, the dynastic alliance between the Habsburg powers is now cancelled.

**C.3.a** Minor HABSBURGUM becomes also the major AUS.

**C.4** The Heir has to propose a settlement for the Spanish possessions. Three attitudes are possible:

- Integrity of the Inheritance (§a)

- Seizing the Inheritance (§β)

- Dividing the Inheritance (§γ)

**C.5** Several parts of the Inheritance are desired by some Major Powers. Here is the list of the different parts at stake, especially the regional groups for all province owned by HIS that are not in its National territory and the MAJ that can be nominated for receiving these parts:

**C.5.a** *Spanish Low Countries* In national territory of **HOLLANDIA** or in former country BURGUNDIA except for **Franche-Comté**. Interested: FRA, ANG, AUS, HOL, HIS.

**C.5.b** *South Italy* Provinces of Kingdom of Naples and Sicily (SICILIÆ). Interested: FRA (if Catholic), ANG (if Catholic), AUS, HIS.

**C.5.c** *North Italy* All the remaining provinces in ITALY and HELVETIA (except **Nice**) plus **Malta**. Interested: FRA (if Catholic), AUS, HIS.

<div>[E]470</div> <div>Political Events of Period V</div> <p> <b>ε-G.4</b> If the Heir Alliance is victorious, with a PD of 1 or 2: the proposed Inheritance project is applied but the Heir has to give a group as a compensation to one of the MAJ in the enemy alliance (chosen by the Heir).  <b>ε-G.5</b> If a white Peace is signed: the proposed Inheritance project is applied but the Heir has to give two groups as a compensation to MAJ in the enemy alliance (proposed by the Heir).  <b>ε-G.6</b> If the Opposing Alliance is victorious, with a PD of 1: the proposed Inheritance project is applied but the Heir has to give two groups as a compensation to MAJ in the enemy alliance (chosen by the Opposing Alliance).  <b>ε-G.7</b> If the Opposing Alliance is victorious, with a PD of 2: the proposed Inheritance project is not applied. The Opposing Alliance decides of a new Inheritance project based on the rules of Dividing the Inheritance (§y) that is applied and cannot be contested.  <b>ε-G.8</b> If the Opposing Alliance is victorious, with a PD of 3 or more: the proposed Inheritance project is not applied. The Opposing Alliance decides of a new Inheritance project based on the rules of Dividing the Inheritance (§y) that is applied and cannot be contested. The restriction that at most 2 groups may be given to a power is lifted.  <b>ε-G.9</b> If AUS* was the Heir and the Inheritance project is overruled, the Dynastic Alliance between the Habsburg ends and minor HABSBURGUM becomes AUS.  <b>ε-G.10</b> If HIS is victim of an Unconditional Peace, the new dynasty is overthrown.  <i>ε-G.10.a</i> The Heir loses 30 VP and the Dynastic Alliance is cancelled.  <i>ε-G.10.b</i> HIS lose all the groups at stake in the Inheritance.  <i>ε-G.10.c</i> If the war still goes on, they are temporarily given to the Heir until the end of the war. If the Heir wins the war anyway, any group that should have been attributed to HIS is considered to be his before applying the Peace conditions. If there are groups he is not interested into that are still his afterwards, he has to freely give them to any power (including HIS, as an exception to this rule and the following).  <b>ε-G.11</b> If a power makes a Separate Peace, it forfeits all the possible benefits to be gained in the war (all the groups mentioned before).  <i>ε-G.11.a</i> If it already had any (thanks to a Division of Inheritance), the objective are given back to HIS (or the Heir if HIS is out of the war).  <b>ε-G.12</b> If, at the end of the war, <b>Campania</b> is owned by someone else than HIS (or an autonomous VA of HIS), then SABAUDIA annex <b>Saldigna</b> </p> <div> <b>TODO:</b> It should be both provinces of Sicily, exchanged for Sardinia after event VI-u (War of the Quadruple Alliance). </div> <div> <b>ε-H Lasting Effects</b> </div> <p> <b>ε-H.1</b> <b>Gibraltar</b> becomes an <i>arsenal</i> if attributed and owned by this event to a player that is not HIS. </p> <div>     ◀ end of conditions of the war of spanish succession ▶ </div>	<div>Political Events of Period V— master – 2016-04-14</div> <div>[E]471</div> <p> <b>B.4</b> All major powers who lost at least two levels of TF in the process have an Overseas CB against FRA until the end of the next period.  <b>B.5</b> FRA receives an additional Art MNU level, if available. </p> <div> <b>C Diplomatic Phase</b> </div> <p> <b>C.1</b> For the rest of the game, FRA has an Overseas CB against everyone with TF in CTZ <b>FRANCIA</b>, and a CB against a power having a TF⊕ in this CTZ. </p> <div> <b>D Administrative Phase</b> </div> <p> <b>D.1</b> Some French turn and period limits and basic forces are raised during some periods.  <b>D.2</b> As long as <b>Colbert</b> is Minister, FRA increases by half its basic naval construction limit.  <b>D.3</b> From now on, all new non-French TF levels placed in CTZ <b>FRANCIA</b> cost 10 ⌘ tax to be payed directly to French Treasury at the moment such fleet levels are placed on the map.  <b>D.4</b> FRA receives a permanent additional bonus of +5 for all competition attempts it makes in CTZ France. However there is no malus for making competition attempts against FRA.  <b>D.5</b> FRA may ignore restriction of section VI.7.4.2 (Pioneering [TBD]) for this turn (only). </p> <div> <b>E Peace Phase</b> </div> <p> <b>E.1</b> The permanent tax implied in the event and the CB can be later annulled and <b>Colbert</b> dismissed by scoring an unconditional victory against FRA and claiming their annulment in place of the taking of one province. FRA retains the other benefits (§D.1, §D.4). </p> <div> <b>V-6 EXPULSION OF THE FRENCH PROTESTANTS</b> <div>PBNew</div> </div> <p> <i>Date:</i> 1685. </p> <div> <b>A Condition:</b> </div> <p> <b>A.1</b> If FRA is Protestant, roll for one (Catholic) <b>Revolt</b> in France and consider the event as played (mark off, do not reroll).  <b>A.2</b> If FRA is Catholic/Conciliatory, it can refuse the event and loses 3 Stability and 10 VP.  <b>A.3</b> If FRA is Catholic/Counter-Reformation, it can refuse the event and loses 4 Stability and 30 VP.  <b>A.4</b> If FRA refuses the event, it can no more use CB given by events event V-3 and event VI-4. </p> <div> <b>B Event Phase</b> </div> <p> <b>B.1</b> FRA loses 1 level from both its current FTI and DTI.  <b>B.2</b> The first protestant in the following list of precedence: HOL/ANG/SUE, gains one TF level of its choice taken from a TF fleet in a STZ where both countries are present (does not apply if none available) and two free COL attempt with strong investments.  <i>B.2.a</i> The country receiving these actions may ignore restriction of section VI.7.4.2 (Pioneering [TBD]) for this turn.  <i>B.2.b</i> If there is no Protestant power, FRA loses one TF of his choice. </p> <div> <b>V-7 “LE GRAND SIÈCLE”</b> <div>PBNew</div> </div> <p> <i>Date:</i> 1661-1702. </p> <div> <b>A Event Phase</b> </div> <p> <b>A.1</b> FRA chooses, when all events of this turn have been drawn, to apply one of the following events (that did not happen yet): event V-1 (War of Devolution), event V-2 (1) (Chamber of Reunion) (or event V-2 (2) (War of the League of Augsburg) if it already happened), event V-5 (Colbertian Mercantilism in France) or event V-6 (Expulsion of the French Protestants). </p> <div> <b>B Administrative Phase</b> </div> <p> <b>B.1</b> FRA may ignore restriction of section VI.7.4.2 (Pioneering [TBD]) for this turn (only). </p>
<div>V-5 COLBERTIAN MERCANTILISM IN FRANCE</div> <div>RistoMod</div> <p> <i>Date:</i> 1661-1683. </p> <div> <b>A Condition:</b> </div> <p> <b>A.1</b> FRA may decline the event if he wants so. Mark off the event as played and ignore the rest. </p> <div> <b>B Event Phase</b> </div> <p> <b>B.1</b> FRA receives an Excellent Minister <b>Colbert (Jean-Baptiste)</b> with values 8/9/8. He will last a random length for Minister, see event E-2 (Excellent ministers).  <b>B.2</b> All major powers with commercial fleets in CTZ <b>FRANCIA</b> must pay 10 ⌘ per level they want to keep. The money goes to French treasury. All minor commercial fleets in CTZ <b>FRANCIA</b> are permanently removed (their reference level is 0).  <b>B.3</b> Moreover, if either Catholic/Counter-Reformation or Catholic/Conciliatory, FRA receives 5 levels of TF in CTZ <b>FRANCIA</b>. Mandatory competition is solved immediately if need be. </p>

V-Z THE GREAT KURUC UPRISING PBNotEvenWritten

Date: 1678-1684.

[Part of the Great Turkish War (series of wars fought from 1662 to 1699) that lead to the famous (second) siege and battle of Vienna of 1684] Duration: Until the end of the war caused by the event.

A Event Phase

A.1 [BLP] If HUNGARIA still exists, it is immediately destroyed and all its provinces are annexed by AUS. No VPs are gained for these annexations.

A.2 [BLP] \$B (The Little war and The Long war) of section XIV.13.4.3 (Bohemia, Hungaria and Transilvania) is no more active.

<div>[E]480</div> <div>Political Events of Period VI</div> <div>VI-1 THE GREAT NORTHERN WAR PBNew</div> <div>Date: 1700-1721.</div> <div>Duration: until the end of the war caused by the event.</div> <div>A Diplomatic Phase</div> <div>A.1 Russian aggression of SUE RUS has a free CB against SUE if they have a common frontier.</div> <div>A.1.a This CB can be used at this turn or the next one.</div> <div>A.1.b If RUS does not use this CB, it loses 2 Stability at the end of the diplomacy phase of the next turn. This becomes a loss of 3 Stability during and after the reign of <i>Peter the Great</i>.</div> <div>A.2 Polish aggression of SUE POL* has a normal CB against SUE if they have a common frontier.</div> <div>A.2.a This CB can be used at this turn or the next one.</div> <div>A.2.b POL* is affected by Polish Civil War (§§).</div> <div>A.2.c If POL does not use this CB, it loses 2 Stability at the end of the diplomacy phase of the next turn. This becomes a loss of 3 Stability if either event IV-10 (1) (Liberum Veto) never happened, or Absolutism has been established (§B (War for Absolutism.) of section XIV.3.2.4 (Liberum Veto or Absolutism)) or the dynasty of SAXONIA currently rules POL per event V-12 (Augustus II, a Saxon king in Poland).</div> <div>A.2.d This CB can be used as a reaction to the CB of RUS above, or as a regular CB.</div> <div>A.2.e If there is a minor POLONIA (special or normal), apply event part §y (Minor Poland).</div> <div>A.3 Forfeit If neither RUS nor POL use their CB by the end of next turn, consider the event played and SUE is considered to have won the war for all purposes (especially for the lasting effects).</div> <div>A.3.a If either RUS or POL are already at war against SUE, either can declare that they transform the war into this event. This is considered as using the CB provided by the event (with no Stability cost in the case of POL) and triggers everything triggered by the use of the CB.</div> <div>A.4 Swedish generalisation of the war If one of RUS or POL uses its CB to declare war on SUE, then SUE has a free CB against the other one.</div> <div>A.4.a This CB is used as a reaction to the CB of RUS or POL.</div> <div>A.4.b Surprise aggression As an exception, this CB can be used at the beginning of any military round of any turn of the war. In this case, the country enters war without a call for allies.</div> <div>A.5 Prussian involvement If PRU is a major country, it has a CB against either POL or SUE (its choice).</div> <div>A.5.a This CB can be used at the turn of the event or at the next one. There is no penalty for not using it.</div> <div>A.6 Danish aggression DANIA may enter the war against SUE (see War in Dania (§o)).</div> <div>A.7 Alliances RUS, POL, PRU or SUE are not necessarily allied in the war. They have to sign a formal alliance if they want to be allied.</div> <div>After the war begins</div> <div>B Administrative Phase</div> <div>B.1 At the first turn of the war (only), SUE receive reinforcements as a minor country. It makes one roll in offensive attitude and one in defensive attitude.</div> <div>B.1.a These reinforcements are Veterans. They do not count toward this turn purchase limit.</div> <div>C Military Phase</div> <div>C.1 If the dynasty of SAXONIA rules in POL, troops of POL and SUE can cross the HRE in order to wage war in SAXONIA.</div> <div>C.1.a No side may besiege or pillage provinces of the HRE belonging to countries not at war.</div> <div>C.2 Troops of SUE may enter provinces of UKRAINE even if they belong to a country not at war (they may thus trigger event VI-19 (Revolt of Mazepa)).</div>	<div>Political Events of Period VI— master – 2016-04-14</div> <div>[E]481</div> <div>C.2.a This gives a free CB against SUE to both the owner of the province and the protector of UKRAINE to be used during the next turn.</div> <div>C.3 Fortress owned by POL and controlled by SUE gives full supply to SUE.</div> <div>D Peace Phase</div> <div>D.1 Starting the Revolt of Mazepa If there is any A counter of SUE in any province of UKRAINE at the beginning of the peace phase then event VI-19 (Revolt of Mazepa) will occur next turn. Consider it as the first event rolled for during the next event phase.</div> <div>D.1.a This revolt will occur even if the peace is signed at this turn. In this case, the revolt is considered to have occurred at the very end of the turn, before signing the peace.</div> <div>D.2 If SUE signs no unfavourable peace for this war (including if the war does not occur), it immediately wins 50 VP.</div> <div>E Lasting Effects</div> <div>E.1 If SUE signs no unfavourable peace for this war (including if the war does not occur), then SUE may use up to 3 A counters in Europe with no condition on the number of provinces and even if the politics of ROTW expansion was chosen earlier.</div> <div>→ POLONIA and DANIA in the Great Northern War →</div> <div>α WAR IN DANIA</div> <div>α-E.1 If DANIA is inactive:</div> <div>α-E.1.a If RUS declares war on SUE, then DANIA is put in EC of RUS and fully enters war against SUE.</div> <div>α-E.1.b If RUS does not declares war on SUE, but POL does, then DANIA is put in EC of POL and fully enters war against SUE.</div> <div>α-E.2 If DANIA is already at war against SUE:</div> <div>α-E.2.a If its controller is RUS or POL and uses its CB, then it is raised in EW of its controller.</div> <div>α-E.2.b If it is not allied to any MAJ, it is put in EC of the first MAJ to use its CB against SUE (RUS first, then POL).</div> <div>α-E.2.c If its controller is RUS or POL and does not use its CB, the war goes on but SUE can now obtain the truce (see §α-F.1 of this event part).</div> <div>α-E.2.d If DANIA is at war against a MAJ declaring war to SUE, it immediately proposes a white peace. If another MAJ declares war to SUE, DANIA is then put in EC of this MAJ and enters war against SUE.</div> <div>α-E.3 Otherwise (DANIA at war against someone not part of the Great Northern War), DANIA does not partake to the Great Northern War.</div> <div>α-F Peace Phase</div> <div>α-F.1 If the capital of DANIA is controlled by SUE at the beginning of a peace phase, or if DANIA loses a major defeat (on land or on sea) against SUE (not its allies), it proposes a truce to SUE.</div> <div>α-F.1.a If SUE accepts the truce, SUE evacuates the capital of DANIA but keeps other controlled provinces.</div> <div>α-F.1.b If the peace is signed during this truce, provinces of DANIA controlled by SUE must be taken into account when computing peace differential.</div> <div>α-F.1.c The truce lasts for 3 turns after which DANIA automatically enters back in the war.</div> <div>α-F.1.d During the truce, DANIA stays on the diplomatic track of its patron and is still considered at war for all purposes.</div> <div>β POLISH CIVIL WAR</div> <div>Tumult in Poland Multiples candidates losing the Polish crown when Augustus II of Saxony was elected in 1697 were still trying to influence the Polish politics. They all played a complex political game for the crown during this war. Even if he was military forced to abdicate at the treaty of Altranstädt, Augustus was soon back in the war and got his throne back. Sweden did not manage to impose a lasting king, even if Stanislas Leszinski was elected for a short and contested reign in 1706. Stanislas tried to come back at the death of Augustus, this time with the help of France, yielding to the War of Polish Succession.</div>
--	--

<div>[E]482</div> <div>Political Events of Period VI</div> <div> <div>β-G Condition:</div> <p><b>β-G.1</b> If Absolutism has been established in POL, ignore this sub-event.</p> <p><b>β-G.2</b> If POLONIA is a special EW of either FRA or SUE per event part VI-11.α (Polish Victory) or a regular MIN (without Absolutism), see the modifications of the Civil War in event part §γ (Minor Poland).</p> </div> <div> <div>β-H Military Phase</div> <p><b>β-H.1</b> If a Swedish ♠ first enters a province owned by POL and no battle (except overrun) occurs, the fortress may surrender to SUE.</p> <p><b>β-H.1.a</b> Roll 1d10, add the current Stability of POL (0 if it is a MIN), add the level of the fortress. If the result is 5 or less, the fortress immediately surrenders to SUE.</p> <p><b>β-H.1.b</b> SUE has to stop movement in the province in order to try this surrender, but it occurs during its movement segment and not during the siege segment.</p> <p><b>β-H.1.c</b> Troops inside the fortress are redeployed as if <i>Honor of war</i> had been granted. The fortress does not lose one level for being taken.</p> <p><b>β-H.1.d</b> Provinces of SAXONIA are not subject to automatic surrender to SUE.</p> </div> <div> <div>β-I Peace Phase</div> <p><b>β-I.1</b> If, at the beginning of a peace phase, SUE controls <i>Wąrszawa</i> or the Stability of POL is 0 or lower, SUE manages to impose its pretender as a king for (part of) POL.</p> <p><b>β-I.1.a</b> If POLONIA is a MIN, this can only occurs if SUE controls <i>Wąrszawa</i>.</p> <p><b>β-I.1.b</b> SUE receives <i>Poniatowski</i> (× C 3.2.2 [Event VI-1]). Remove Polish <i>Poniatowski</i> if in play. If he was not in play (even if already dead), he will stay with SUE for 2 turns.</p> <p><b>β-I.1.c</b> Starting with next turn, SUE can raise up to one ♠ in any controlled or owned national province of POL. This ♠ has the class, technology and cost of Polish troops. It does not decrease the number of Polish (or regular Swedish) counters available. It does not count toward purchase limits for SUE nor for POL.</p> <p><b>β-I.1.d</b> SUE may not have more than 4LD worth of “Polish” troops and may not split them. It may, however, use one LD counter if needed.</p> <p><b>β-I.1.e</b> This is a Swedish ♠ and can thus trigger event VI-19 (Revolt of Mazepa).</p> <p><b>β-I.2</b> If at the beginning of a peace phase, SUE controls both <i>Wąrszawa</i> and either <i>Dresden</i> (if the SAXONIA dynasty rules POL) or <i>Kraków</i> (otherwise), POL propose a mandatory truce to SUE.</p> <p><b>β-I.2.a</b> If SUE accepts the truce, it may immediately annex one province of POL (SUE chooses which).</p> <p><b>β-I.2.b</b> This truce can only be imposed once during the war.</p> <p><b>β-I.2.c</b> During the truce, SUE keeps control of the fortresses it controls at the beginning of the truce.</p> <p><b>β-I.2.d</b> However, POL gives back to SUE the provinces of SUE it controls at the beginning of the truce.</p> <p><b>β-I.2.e</b> As long as the truce lasts, SUE can freely cross provinces controlled by POL. They count as enemy provinces for movement purpose and SUE cannot stop in them or pillage them. Supply may cross these provinces.</p> <p><b>β-I.2.f</b> During the truce, POL do not lose Stability because of the war (as if in armistice).</p> <p><b>β-I.2.g</b> The truce can be broken by POL either after 3 turns of truce or during a turn following a major defeat of SUE</p> <p><b>β-I.3</b> If POL signs an unfavourable peace after a truce was imposed (even if broken), then SUE manage to impose its pretender on the throne.</p> <p><b>β-I.3.a</b> The new king of POL is <i>Stanislas</i> with values 6/5/6. He will last as long as a random length for Minister, see event E-2 (Excellent ministers). This is a new dynasty.</p> <p><b>β-I.3.b</b> As long as <i>Stanislas</i> rules, POL and SUE are in defensive alliance and POL must answer any call for ally made by SUE.</p> </div> <div> <div>γ MINOR POLAND</div> <div> <div>γ-J Activation:</div> <p>These effects modify and overrules the effects of event part §β (Polish Civil War) if POLONIA is already a minor country.</p> </div> </div>	<div>Political Events of Period VI— master – 2016-04-14</div> <div>[E]483</div> <div> <div>γ-K Diplomatic Phase</div> <p><b>γ-K.1</b> If POLONIA is a regular minor country, it makes a mandatory white peace with all its enemies (except SUE and allies) and uses its CB to declare war on SUE. It will call for allies as per regular rules.</p> <p><b>γ-K.2</b> If POLONIA is a regular minor country, apply all the effects of event part §β (Polish Civil War) except §β-I.3.b of event part VI-1.β (Polish Civil War). Use the following instead: For the reign of <i>Stanislas</i>, POLONIA is put in EW of SUE and no diplomacy is allowed on it, after which POLONIA becomes a normal minor country.</p> <p><b>γ-K.2.a</b> For all purposes except incomes (declarations of war, victory conditions, . . . ) consider that special EW as if POLONIA were a VA of SUE.</p> <p><b>γ-K.2.b</b> As an exception to the normal rules, the order of preference for controlling POLONIA during this war is: PRU, FRA, AUS, HOL, ANG, RUS.</p> <p><b>γ-K.2.c</b> If POLONIA signs no unfavourable peace during this war, it is put in EW of the country that controlled it. Otherwise, it becomes neutral.</p> </div> <div> <p><b>γ-K.3</b> POLONIA <b>special minor of SUE</b> Due to event part VI-11.α (Polish Victory), any declaration of war against SUE also includes POLONIA. Apply event part §β (Polish Civil War) substituting RUS for SUE (including the benefits of <i>Poniatowski</i> and his ♠). RUS can impose its pretenders on the throne.</p> <p><b>γ-K.3.a</b> If RUS imposes its pretender on the Polish throne, POLONIA it put in EW of RUS, with no diplomacy possible, for the reign of <i>Stanislas</i> after which POLONIA becomes a normal minor country.</p> </div> <div> <p><b>γ-K.4</b> POLONIA <b>special minor of FRA</b> Due to event part VI-11.α (Polish Victory), FRA decides whether POLONIA uses its CB against SUE or not.</p> <p><b>γ-K.4.a</b> If POLONIA is at war, it is played by FRA but FRA does not have to enter war against SUE (it <i>may</i> choose to do so, using the normal CB of POL).</p> <p><b>γ-K.4.b</b> If SUE manages to impose its pretender, this breaks the special status of POLONIA. It becomes a special EW of SUE (as above) for the reign of <i>Stanislas</i> and after that a regular minor country.</p> <p><b>γ-K.4.c</b> If SUE does not manage to impose its pretender, POLONIA stays a special EW of FRA.</p> </div> <div> <div> <div>VI-2 THE WAR OF SPANISH SUCCESSION</div> <div>PBMod</div> </div> <div> <div> <div>TODO: Add possibility to gives “compensations” to some minors to “buy” them in the war and make them change side. Historically: Sicily for SABAUDIA and bid on the imperial throne for BAVARIA.</div> </div> </div> <div> <div> <div>A Condition:</div> <p>This event is the same as event V-4 (The War of Spanish Succession) which happens now if it did not occur yet. Else, treat as R/D and mark off.</p> </div> </div> <div> <div> <div>VI-3 CREATION OF THE KINGDOM OF PRUSSIA</div> <div>RistoMod</div> </div> <div> <div> <div>A Condition:</div> <p>This event is the same as event V-13 (Creation of the Kingdom of Prussia) which happens now if it did not occur yet. Else, treat as R/D and mark off.</p> </div> </div> <div> <div> <div>VI-4 JACOBITE REBELLION (×2)</div> <div>RistoMod</div> </div> <div> <div> <div>Date: 1715/1745-46.</div> <div> <div>A Condition:</div> <p><b>A.1</b> If ANG is Catholic/Counter-Reformation or Catholic/Conciliatory, roll for two <i>Revolt</i> in ANG, then mark off and consider as played.</p> </div> </div> </div> </div> </div></div>
--	--

<div>[E]484</div> <div>Political Events of Period VI</div> <p><b>A.2</b> This event can only happen if SCOTIA is on the diplomatic track of ANG or if ANG owns at least four provinces of SCOTIA. Otherwise, do not mark off and re-roll.</p> <p><b>A.3</b> There are two rebellions with slightly different initial conditions. Apply the rules hereafter, but read initial placement in First Jacobite Rebellion (§α) or Bonny Prince Charlie (§β).</p> <div>B Diplomatic Phase</div> <p><b>B.1</b> The rebellion is controlled by FRA if Catholic, otherwise by HIS.</p> <p><b>B.2</b> If FRA is Catholic/Counter-Reformation, it has a CB to make a full intervention at the side of SCOTIA.</p> <p><i>B.2.a</i> If FRA is Catholic, it can make a limited intervention at the side of SCOTIA.</p> <p><i>B.2.b</i> If FRA is Protestant, it can make a limited intervention at the side of ANG.</p> <p><b>B.3</b> HOL can make a limited intervention at the side of ANG.</p> <p><b>B.4</b> HIS can make a limited intervention at the side of SCOTIA.</p> <div>TODO: Intervention only if Alberoni is or was minister. Need to write Alberoni before enforcing this condition.</div> <p><b>B.5</b> Other countries can make foreign intervention as per normal religious wars rules (see section IV.5.5.5 (Religious Wars, Civil Wars)). SCOTIA is considered to be Catholic during this war.</p> <div>C Administrative Phase</div> <p><b>C.1</b> Rebels roll for reinforcements in offensive attitude for the duration of the war.</p> <p><i>C.1.a</i> Rebels can use the counters of both SCOTIA and FIDELIS REGI.</p> <p><i>C.1.b</i> reinforcements must be put in provinces where there are already rebels or allied troops (not just <i>Revolt</i>). If none exist, the rebels receive no reinforcements.</p> <div>D Military Phase</div> <p><b>D.1</b> The <i>Revolt</i> are supply sources for the rebels and limited supply sources for their allies.</p> <div>E Peace Phase</div> <p><b>E.1</b> ANG wins if there are no more <i>Revolt</i> and either there is no more rebel A or the rebels and their allies have suffered one more major defeat that ANG this turn.</p> <p><i>E.1.a</i> In this case, remove all rebel counters from the map.</p> <p><i>E.1.b</i> SCOTIA get back to the diplomatic position it had before the war on the English track.</p> <p><i>E.1.c</i> If FRA was fully at war, a normal peace has still to be signed.</p> <p><b>E.2</b> The rebels win if the king is overthrown by the <i>Revolt</i> or if they control London and there is at least one <i>Revolt</i> still in play or if a fully allied FRA manages to impose an unconditional surrender to ANG.</p> <p><i>E.2.a</i> If the rebels win and were not allied to any Catholic/Counter-Reformation country, ANG becomes Catholic/Conciliator.</p> <p><i>E.2.b</i> If the rebels win and were allied to a Catholic/Counter-Reformation country, ANG becomes Catholic/Counter-Reformation.</p> <p><i>E.2.c</i> At the beginning of the next turn, the king of ANG dies and an automatic <i>Dynastic Crisis</i> occurs in ANG. This overrules event VI-5 (Act of Establishment).</p> <p><b>E.3</b> Apply the following additional effects if FRA was fully at war and manages to impose an unconditional surrender to ANG:</p> <p><i>E.3.a</i> ANG loses 50VP.</p> <p><i>E.3.b</i> Events event IV-5 and event VI-8 are cancelled.</p> <p><i>E.3.c</i> ANG makes an enforced dynastic alliance with FRA and must give a COL or TP of its choice as a dowry.</p> <p><i>E.3.d</i> ANG makes an enforced offensive alliance with FRA for two turns and must respect it when FRA calls it as ally.</p> <p><i>E.3.e</i> ANG cannot declare war to FRA for the duration of the new king and his successor.</p> <div>α First Jacobite Rebellion</div> <p><i>Date: 1715.</i></p> <div>α-F Event Phase</div> <p><b>α-F.1</b> If SCOTIA was allied to ANG, remove all its troops from the map.</p>	<div>Political Events of Period VI— master – 2016-04-14</div> <div>[E]485</div> <p><i>α-F.1.a</i> SCOTIA is not considered to be VA or AN by ANG as long as the war lasts (for incomes or victory condition purpose).</p> <p><b>α-F.2</b> Place a <i>Revolt</i>⊖ in each of the following provinces: <b>Highlands, Moray</b> and <b>Alba</b>.</p> <div>β Bonny Prince Charlie</div> <p><i>Date: 1745-1746.</i></p> <div>β-G Event Phase</div> <p><b>β-G.1</b> If SCOTIA was allied to ANG, remove all its troops from the map.</p> <p><i>β-G.1.a</i> SCOTIA is not considered to be VA or AN by ANG as long as the war lasts (for incomes or victory condition purpose).</p> <p><b>β-G.2</b> Place a <i>Revolt</i>⊖ in each of the following provinces: <b>Highlands, Moray</b> and <b>Alba</b>.</p> <p><i>β-G.2.a</i> Place a A⊕ of SCOTIA and general <i>Prince Charles</i> in one of the revolted provinces.</p> <div>VI-5 ACT OF ESTABLISHMENT Risto</div> <p><i>Date: 1701.</i></p> <div>A Lasting Effects</div> <p><b>A.1</b> From now on ANG can no longer suffer dynastic crisis due to a roll on the Monarch Reign table.</p> <p><b>A.2</b> However, it can still suffer dynastic crisis due to events.</p> <div>VI-6 VASSALISATION OF HANOVERE Risto</div> <p><i>Date: 1714.</i></p> <div>A Condition:</div> <p><b>A.1</b> Cannot occur if ANG is not Protestant. In that case mark as played.</p> <p><b>A.2</b> Cannot occur if event VI-8 (Act of Union) and event VI-5 (Act of Establishment) have not already occurred both. In that case re-roll and do not mark off.</p> <div>B Event Phase</div> <p><b>B.1</b> If HANOVERE is currently in a war against ANG, it offers immediately a white peace.</p> <p><b>B.2</b> HANOVERE becomes a permanent VA of ANG for the rest of the game. No diplomacy is allowed on HANOVERE.</p> <div>C Lasting Effects</div> <p><b>C.1</b> Revolts in HANOVERE are no more automatically suppressed if inactive.</p> <p><i>C.1.a</i> ANG may now use the troops of HANOVERE to fight revolts inside its territory and use its troops to fight revolts inside HANOVERE.</p> <div>VI-7 TREATY OF METHUEN RistoMod</div> <p><i>Date: 1703.</i></p> <div>A Condition:</div> <p><b>A.1</b> This event can normally only happen once, either triggered by event V-4 (The War of Spanish Succession) (at the beginning of the war or at peace time) or by rolling for it in the table.</p> <p><i>A.1.a</i> If the event has already been rolled for when event V-4 (The War of Spanish Succession) occurs, then <i>Dynastic link and alliance with Portugal</i> is not at stake in the war, except if HIS managed to re-annex PORTUGALLIA after the event.</p> <p><i>A.1.b</i> If <i>Dynastic link and alliance with Portugal</i> was chosen by a MAJ during event V-4 (The War of Spanish Succession), then consider the event as already played, mark off and play R/D instead as per normal rules.</p> <p><b>A.2</b> If this event was triggered by event V-4 (The War of Spanish Succession), apply Dynastic link and alliance with Portugal (§β), else apply Treaty of Methuen (§α)</p>
---	---

<div>[E]486</div> <div>Political Events of Period VI</div> <div> <div>α Treaty of Methuen</div> <div>Date: 1703.</div> <div>α-B Condition:</div> <div>α-B.1 If PORTUGALLIA is annexed by HIS as per event part III-7.α (Portugal in Annexation), play event IV-4 (1) (National Revolt of the Portugal) in addition to this event (even if IV-4 (1) already occurred and was won by HIS).</div> <div>α-B.2 If ANG is at war against PORTUGALLIA allied to a MAJ, PORTUGALLIA breaks its alliance, sign a white peace with ANG, becomes neutral and the event occurs.</div> <div>α-B.2.a Allies of ANG have the choice to either sign a white peace with PORTUGALLIA or break their alliance with ANG and stay at war with PORTUGALLIA.</div> <div>α-B.2.b If ANG is at war against PORTUGALLIA (not allied to a MAJ), then the event cannot occur. It will be activated as soon as the year is 1700 or more and the king of POL dies.</div> <div>A.1.a If the event is pending while POL becomes a minor, continue to roll for survival of the king every turn until his death (either scheduled or premature) activate the event.</div> <div>B Event Phase</div> <div>B.1 If this was not already the case, POL becomes the minor POLONIA. Minor BRANDENBURGUM becomes the major PRU. See subevent XXVI.1 (Becoming Prussia) for details.</div> <div>B.2 The crown of POLONIA is proposed to the step-father of a foreign king and POLONIA looks for the protection of this foreign king.</div> </div>
--	--

<div>[E]488</div> <div>Political Events of Period VI</div> <div> <p><i>B.2.a</i> If event VI-1 (The Great Northern War) happened and SUE managed to impose its candidate on the throne of POLONIA, then the potential protectors are, in order, SUE then FRA.</p> <p><i>B.2.b</i> In all other cases (VI-1 did not happen or wasn't won by SUE), the potential protectors are, in order, FRA then SUE.</p> <p><i>B.2.c</i> The first potential protector must immediately accept or refuse the crown. If it refuses, then the second one must either accept or refuse.</p> <p><b>B.3</b> POLONIA immediately signs a white peace with its protector and is put in EW of its protector.</p> <p><i>B.3.a</i> If both protectors refuse, POLONIA will fight alone in the upcoming war. Apply only the first point of the diplomatic phase (CB for RUS) as well as the effects of the peace phase on the future of POLONIA</p> <div>C Diplomatic Phase</div> <p><b>C.1</b> RUS has a free CB against POLONIA this turn.</p> <p><b>C.2</b> AUS has a free CB against POLONIA this turn.</p> <p><b>C.3</b> SUE (if not protector) and PRU both have a (normal) CB against POLONIA this turn.</p> <p><b>C.4</b> If SAXONIA was ruling POLONIA due to event V-12 (Augustus II, a Saxon king in Poland) and a war against POLONIA is declared due to this event, SAXONIA also declares war on POLONIA and is put in EW of the first country at war against POLONIA in the following list: RUS, AUS, SUE, PRU.</p> <p><b>C.5</b> All countries entering war against POLONIA due to this event are considered allied for the duration of the war without need to sign a formal alliance.</p> <p><b>C.6</b> If nobody declares war on POLONIA, it becomes a permanent EW of its protector as if there has been a Polish victory. Apply all the effects of Polish Victory (§α).</p> <div>D Peace Phase</div> <p><b>D.1</b> An extra malus of <b>-4</b> is applied for all separate peace against POLONIA or SAXONIA (if it entered war due to being allied with POLONIA by event V-12 (Augustus II, a Saxon king in Poland)) for this war.</p> <div>Conditions of Victory</div> <div>α POLISH VICTORY</div> <p><b>α-D.1</b> If POLONIA (and its side) signs a favourable peace of level 3 or more, POLONIA becomes a permanent EW of its protector.</p> <p><i>α-D.1.a</i> For all purposes except incomes (declarations of war, victory conditions, . . . ) consider that POLONIA is a VA of its protector.</p> <p><i>α-D.1.b</i> No diplomacy is allowed on POLONIA anymore.</p> <p><i>α-D.1.c</i> The protector immediately wins 50 VP.</p> <p><b>α-D.2</b> Absolutism is established in POLONIA.</p> <p><b>α-D.3</b> At the peace, the protector can annex any province, even the capital, of one minor country.</p> <p><i>α-D.3.a</i> This province must be adjacent to the territory of the protector.</p> <p><i>α-D.3.b</i> This can destroy the country.</p> <p><i>α-D.3.c</i> The minor must be either on the diplomatic track of the protector or on the diplomatic track of one of its enemies (even if not at war).</p> <p><i>α-D.3.d</i> This count as one peace condition if the province is occupied by the protector (or its allies) or as all peace conditions (for the protector and its allies) otherwise (minor not at war, or even allied with the protector).</p> <p><i>α-D.3.e</i> If SUE is the protector, it can annex this way the whole <i>NORWAY</i> whatever the current diplomatic status of DANIA (or NORVEGIA). This always count as all the peace conditions for the alliance of SUE.</p> <div>β POLISH DEFEAT</div> <p><b>β-D.1</b> If POLONIA (and its side) signs an unfavourable peace of level 3 or more, the protector loses 15VP (even if it was not at war).</p> <p><i>β-D.1.a</i> POLONIA becomes neutral. From now on, it will never be able to go above SUB on the diplomatic track.</p> </div>	<div>Political Events of Period VI— master – 2016-04-14</div> <div>[E]489</div> <div> <p><i>β-D.1.b</i> Absolutism is abolished in POLONIA.</p> <p><b>β-D.2</b> From now on, RUS, AUS, PRU and all countries of the HRE can freely cross provinces of POLONIA. The provinces are considered enemy and don't give supply, it is not allowed to stop in POLONIA or pillage its provinces because of attrition.</p> <p><b>β-D.3</b> If they were still at war against POLONIA when the peace is signed, both RUS and AUS win 50VP.</p> <div>γ STATUS QUO</div> <p><b>γ-D.1</b> If neither side gets a full victory as per the previous cases, apply these effects.</p> <p><b>γ-D.2</b> POLONIA is put in EW of its protector. It is a normal minor.</p> <p><b>γ-D.3</b> The protector loses 15VP (even if not at war).</p> <p><b>γ-D.4</b> If they were still at war against POLONIA when the peace is signed, both RUS and AUS win 30VP.</p> <p><b>γ-D.5</b> Absolutism is abolished in POLONIA.</p> <p><b>γ-D.6</b> From now on, RUS, AUS, PRU and all countries or the HRE can freely cross provinces of POLONIA. The provinces are considered enemy and don't give supply, it is not allowed to stop in POLONIA or pillage its provinces because of attrition.</p> <p><i>γ-D.6.a</i> Crossing polish provinces gives a CB to POLONIA for the next diplomacy phase.</p> <p><b>γ-D.7</b> At the peace, the protector can annex the last province of one minor country who only has one province left, even if this is a capital.</p> <p><i>γ-D.7.a</i> This province must be adjacent to the territory of the protector.</p> <p><i>γ-D.7.b</i> This destroys the country.</p> <p><i>γ-D.7.c</i> The minor must be either on the diplomatic track of the protector or on the diplomatic track of one of its enemies (even if not at war).</p> <p><i>γ-D.7.d</i> This does not count as a peace condition and is done in addition to the normal peace.</p> <p><i>γ-D.7.e</i> If the protector chooses to annexe a province of a minor country not on its track (but on the track of one of its enemies), it must gives to its diplomatic patron the diplomatic control of a minor from its own track which is at least at the same level of diplomatic control. The enemy of the protector chose which diplomatic compensation he takes.</p> <p><i>γ-D.7.f</i> If SUE is the protector, it can annex this way the whole <i>NORWAY</i> as if it was only one province. DANIA (or NORVEGIA) must be on its track, or on the track of one enemy (in which case diplomatic compensation apply as above).</p> <div>end of conditions of victory</div> <div>VI-12 WAR AGAINST TURKEY (×2) RistoMod</div> <p><i>Date:</i> 1716-18/1737-39.</p> <div>A Condition:</div> <p>The first eligible in the following list occurs, each case can only happen once per game</p> <p><b>A.1</b> AUS receives a free CB against TUR for this turn. It can choose to decline this offer, in which case proceed with the list.</p> <p><b>A.2</b> If inactive, minor HABSBURGUM declares war against TUR. It calls for allies as usual.</p> <p><b>A.3</b> If inactive, VENETIA declares war against TUR. It calls for allies as usual and will have <b>+2</b> to all the reinforcements check made during this war.</p> <p><b>A.4</b> If none of the conditions apply, nothing happens.</p> <div>VI-13 WAR OF AUSTRIAN SUCCESSION PB</div> <p><i>Date:</i> 1740-1748.</p> <p><i>Duration:</i> Until the end of the war</p> <div>A Condition:</div> <p><b>A.1</b> Cannot happen if there is a GE. In this case, mark off and play R/D instead.</p> </div>
---	---

<div>[E]490</div> <div>Political Events of Period VI</div> <p><b>A.2</b> Cannot happen before period VI (thus, minor HABSBURGUM has become AUS anyway). In this case, do not mark off and re-roll.</p> <p><b>A.3</b> Cannot happen before the start of the war caused by event V-4 (The War of Spanish Succession). In this case, do not mark off and re-roll.</p> <div>B Event Phase</div> <p><b>B.1 The Pragmatic Sanction</b></p> <p><i>B.1.a</i> The king of AUS dies. The new queen is <b>Maria Theresia</b> (values 8/8/7, lasts 8 turns, does not roll for survival during 5 turns, adds A⊕ as basic forces).</p> <p><i>B.1.b</i> Mandatory dynastic dies between HIS and AUS are voided (if still existent).</p> <p><i>B.1.c</i> If BAVARIA won the electorate during event IV-A (Thirty Years' War), it opposes the Sanction and pretends to the throne of AUS. Otherwise, PALATINATUS does.</p> <p><b>B.2</b> AUS loses control of the pretending country.</p> <p><b>B.3</b> The pretending country proposes a white peace to its current enemies and then declares war to AUS.</p> <p><b>B.4</b> If this is not already the case, POL becomes the minor POLONIA. Minor BRANDENBURGUM becomes the major country PRU.</p> <p><i>B.4.a</i> See subevent XXVI.1 (Becoming Prussia) for details on how to handle this.</p> <div>C Diplomatic Phase</div> <p><b>C.1</b> PRU has a free CB against AUS at this turn (only).</p> <p><i>C.1.a</i> If it uses it, PRU and the pretending country are allied for the duration of the war.</p> <p><b>C.2</b> FRA has a CB against AUS during every turn of the war caused by the event.</p> <p><i>C.2.a</i> If it uses it, place the pretending country in EW of FRA.</p> <p><i>C.2.b</i> If PRU and FRA use it, they are allied for the war without need for signing a formal alliance.</p> <p><i>C.2.c</i> If FRA does not use this CB at the first turn of war, the pretending country will call for allies as per normal rules.</p> <p><b>C.3</b> ANG has a free CB against FRA as a reaction of the previous CB (only).</p> <p><i>C.3.a</i> This CB can only be used in reaction to FRA declaring war to AUS.</p> <p><i>C.3.b</i> If it uses it, ANG and AUS are allied for the war, without need for signing a formal alliance.</p> <div>D Administrative Phase</div> <p><b>D.1</b> At the first turn of the war (only), PRU rolls for reinforcements as a minor country (in offensive attitude).</p> <p><i>D.1.a</i> These reinforcements are <i>Veterans</i>. They do not count toward this turn purchase limit.</p> <p><b>D.2</b> At the first turn of the war (only), AUS rolls for reinforcements as a minor country (in defensive attitude).</p> <p><i>D.2.a</i> These reinforcements are <i>Conscscripts</i>. They do not count toward this turn purchase limit.</p> <div>E Peace Phase</div> <p><b>E.1</b> If AUS signs an unconditional surrender, it loses the imperial throne. The pretending country becomes Emperor for the rest of the game.</p> <p><i>E.1.a</i> In that case, PRU automatically gets the royal dignity as per event V-13 (Creation of the Kingdom of Prussia). If that event didn't happen yet, consider it to be the first event rolled next turn with any mention to BRANDENBURGUM referring to PRU instead (in that case, AUS <b>must</b> give the royal crown to PRU in the following diplomacy phase). (JCD) TODO there is probably a problem with that, since AUS will no more be Emperor...</p> <p><b>E.2</b> Extra VP are granted for the control of certain provinces at the end of the war.</p> <p><i>E.2.a</i> PRU gains 25VP per province annexed from AUS. It loses 20VP if it annexes none.</p> <p><i>E.2.b</i> AUS gains 20VP per province annexed from PRU. It loses 25VP if it annexes none.</p> <p><i>E.2.c</i> The player controlling the pretending country gains 30VP per province annexed from AUS and loses 15VP if the pretending country annexes no province. These VP are also lost (or won) by AUS.</p>	<div>Political Events of Period VI— master – 2016-04-14</div> <div>[E]491</div> <div>VI-14 WAR OF SUCCESSION IN KURLAND PBnew</div> <p><i>Date:</i> 1730-1731.</p> <p><i>Duration:</i> As long as CURLANDIA exists.</p> <div>A Event Phase</div> <p><b>A.1</b> The provinces <b>Kurland</b> and <b>Livonija</b> declare independence from their current owner and form the minor country CURLANDIA.</p> <p><b>A.2</b> <i>von Sachsen</i>, or, if he's not alive, a random mercenary general lasting 4 turns, takes command in the new duchy and look for a protector.</p> <p><i>A.2.a</i> The following countries must immediately accept or refuse to become protector of the duchy (in order): FRA, AUS, PRU, HOL.</p> <p><i>A.2.b</i> If all of them refuse, then the general wisely chooses to stand back. CURLANDIA doesn't get a general and won't get reinforcements in any war.</p> <p><i>A.2.c</i> If there is a protector, then CURLANDIA becomes a permanent VA of its protector and no diplomacy is allowed on it.</p> <div>B Diplomatic Phase</div> <p><b>B.1</b> Any country owning one province or more of the minor when the event happens gets a free CB against CURLANDIA.</p> <p><i>B.1.a</i> A minor country uses this CB only if there is already a major country using this CB (for the other province).</p> <div>C Administrative Phase</div> <p><b>C.1</b> The general of CURLANDIA can lead troops of its protector.</p> <div>D Peace Phase</div> <p><b>D.1</b> CURLANDIA has no capital and can thus be annexed by anybody.</p> <div>E Lasting Effects</div> <p><b>E.1</b> The protector loses 30 VP at the end of the game if CURLANDIA does not exist.</p> <div>VI-15 SLAVE REVOLTS IN THE WEST INDIES (×*) Risto</div> <p><i>Date:</i> No precise date.</p> <div>A Event Phase</div> <p><b>A.1</b> Roll 1d10 for each power having COL in areas <b>CUBA</b>, <b>HAÏTI</b> and/or <b>ANTILLES</b>. --	---

**A.2** Mogolis Imp. Expansions (II-A) cannot happen anymore.

**A.3** The basic forces of MOGOLIS IMP. becomes  $\Delta\oplus$ .

**A.4** Reaction of country MOGOLIS IMP. becomes 3.

**A.5** MOGOLIS IMP. loses 1d10/3 (round to closest) areas (the ones with the largest numbers).

### B Lasting Effects

**B.1** MYSURIA and HYDERABADA are created as soon as their respective province does not belongs to MOGOLIS IMP. anymore.

**B.1.a** This can happen either at the start of this event, due to the provinces lost by this event or at some other point in the game if MOGOLIS IMP. loses provinces.

**B.1.b** Both countries are not necessarily created at the same time.

**B.2** Colonial powers may now raise Indian troops (“Sepoy”) as per their respective specific rules.

## VI-18 WARS IN INDIA (×3) PBnew

### A Condition:

**A.1** Roll 1d10 and apply the correct subevents.

**A.1.a** 1-4 = A) War between MOGOLIS IMP. and PERSIA. Apply Mogolis Imp.-Persia War (§α).

**A.1.b** 5-8 = B) War between DURRANIS IMP. and PERSIA. Apply both Afghan Empire (§β) and Fall of the Persian Safavids (§γ).

**A.1.c** 9-10 = C) War between DURRANIS IMP. and MOGOLIS IMP.. Apply both Afghan Empire (§β) and Rise of the Marathi (§δ). This case may not happen before either event VI-17 (The Last of the Great Mughals), re-roll another case if needed.

**A.2** Each of the three previous cases can only happen once. If it already happen, re-roll another case.

**A.3** Each of the following sub-event can only happen once. Afghan Empire (§β) may occur due to two different cases (B and C). The second time, ignore it and only plays the other sub-event.

**A.4** In each of the three case, natives in one random province in **INDIA** are activated.

### α MOGOLIS IMP.-PERSIA War

*Date: 1739.*

### α-B Event Phase

**α-B.1** MOGOLIS IMP. loses all provinces except the areas **DELLĪ**, **AYODHYĀ**, **BĀNGLĀ**, **GONDĀNĀ** and **ORISSĀ**.

**α-B.2** Lower the difficulty and tolerance (for COL and TP implantation) by 2 in every province controlled by MOGOLIS IMP.

**α-B.3** PERSIA gets the general *Nādir Shāh Afshār* (𐰽 <R> A 3.4.4 -1 [Event VI-18]) for 5 turns.

### α-C Diplomatic Phase

**α-C.1** Test fidelity of PERSIA and ORMUS.

### β Afghan Empire

*Date: 1747.*

### β-D Event Phase

**β-D.1** The minor country DURRANIS IMP. is created and owns area **AFGHANISTAN** except **Herāt** if owned by PERSIA.

### γ Fall of the Persian Safavids

*Date: 1749.*

### γ-E Event Phase

**γ-E.1** The lasting effect of event III-18 (Persian Safavids) are cancelled.

**γ-E.2** **Herāt** is annexed by DURRANIS IMP.

### γ-F Diplomatic Phase

**γ-F.1** Test fidelity of PERSIA and ORMUS.

### δ Rise of the Marathi

*Date: 1746-1761.*

### δ-G Event Phase

**δ-G.1** MOGOLIS IMP. only loses all provinces except the areas **DELLĪ**, **AYODHYĀ**, **BĀNGLĀ** and **GONDĀNĀ**.

**δ-G.2** Lower the difficulty and tolerance (for COL and TP implantation) by 2 in every province in **INDIA**.

**δ-G.2.a** This is not cumulative with the decrease caused inside MOGOLIS IMP. by Mogolis Imp.-Persia War (§α).

## VI-19 REVOLT OF MAZEPA PBnew

*Date: 1708-1709.*

### A Condition:

**A.1** UKRAINA is looking for a new protector.

**A.1.a** If this event is triggered during event VI-1 (The Great Northern War), either by troops of SUE entering *UKRAINE* or by rolling for it on the table, then the new protector is SUE.

**A.1.b** If the current protector of UKRAINA is at war against another MAJ, then the new protector is chosen among the countries at war against the current protector in the following list: RUS, POL, TUR, AUS, SUE, PRU.

**A.1.c** If the current protector of UKRAINA is not at war against any other MAJ, then the new protector is chosen in the following list: POL (if Orthodox), RUS, TUR, POL, AUS, SUE, PRU.

### B Event Phase

**B.1** The potentials protectors are asked in order if they accept or not to protect UKRAINA.

**B.1.a** If all refuse, UKRAINA will not have a protector for the duration of the war.

**B.2** UKRAINA declares war on its former protector and the new protector must immediately join this war with no cost in Stability.

**B.3** Counters of UKRAINA are immediately removed from play.

**B.4** Place a *Revolt*  $\oplus$  in a province of *UKRAINE*.

**B.4.a** If the event is triggered by Swedish presence, then the *Revolt* is put in the province where the Swedish  $\Delta$  is. Otherwise, a random province is chosen in UKRAINA.

**B.5** Place general *Mazepa* (× C 2.2.3 [Event VI-19]) with the *Revolt*, scheduled to last 4 turns.

**B.6** Place a LID of UKRAINA in the revolted province.

**B.6.a** If the new protector either has a common border with UKRAINA or a “king ranked” general in a province adjacent to UKRAINA, place an  $\Delta\ominus$  instead.

**B.6.b** “King ranked” generals are those bearing the king symbol, namely monarchs, *Carl XII* as an heir to the throne (§F (Karl XII) of section XIV.7.4.1 (Monarchs of Sweden)) or *Unknown leader Sadrazam* and other Viziers (?chSpecific:Turkey:Vizier?).

**B.7** The revolt is considered active as long as *Mazepa* is alive and at least one *Revolt* exists in one of the provinces of *UKRAINE*.

### C Diplomatic Phase

**C.1** Any country possessing a province of *UKRAINE* with a *Revolt* in it has a free CB against either the former or the current protector (its choice).

**C.1.a** Minor countries use this CB against the new protector.

<div>[E]494</div> <div>Political Events of Period VI</div> <div>C.2 As long as the revolt is active, TUR as a free CB against either the former or the new protector (its choice).</div> <div>D Administrative Phase</div> <div>D.1 If the revolt is active UKRAINA roll for reinforcements in offensive attitude, base on the income of the provinces with a <i>Revolt</i> in them.</div> <div>D.1.a The reinforcement roll has a malus of <b>-2</b> unless a “king ranked” leader of the new protector is in or adjacent to UKRAINA.</div> <div>E Military Phase</div> <div>E.1 <i>Revolt</i> are limited supply sources for the troops of UKRAINA but are not supply source for the protector.</div> <div>E.2 If a stack containing troops of UKRAINA takes a fortress, place a <i>Revolt</i>⊖ in the province.</div> <div>F Peace Phase</div> <div>F.1 The <i>Revolt</i> can extend in any province of UKRAINE.</div> <div>F.1.a <i>Revolt</i> in UKRAINA cause loss of Stability to the <b>former</b> protector. ### VII-1 THE SEVEN YEARS WAR PBnew

Date: 1756-1763.

Duration: until the end of the war caused by the event.

#### A Condition:

A.1 Cannot happen before period VII if PRU is not a major country and at peace.

A.1.a In this case, do not mark of an re-roll.

#### B Event Phase

B.1 PRU has a free CB against SAXONIA to be used at this turn or the next one.

B.1.a Refusal to use this CB cost PRU 3 Stability and PRU is considered to have lost the war for all the effects described below.

B.1.b When PRU uses this CB, SAXONIA propose an immediate white peace to all its other enemies.

B.1.c If PRU does not use this CB this turn, apply (in addition) The French and Indian War (§α).

B.2 As a reaction to PRU declaring war to SAXONIA, AUS has an immediate free CB against PRU.

B.3 As a reaction to PRU declaring war to SAXONIA, FRA has an immediate normal CB against PRU.

B.3.a If both FRA and AUS use these CB, they are considered allied in the war without need to sign a formal alliance.

B.4 As a reaction to FRA declaring war to PRU, ANG has a free CB against FRA.

B.4.a If ANG uses this CB, ANG and PRU are considered allied in the war without needing to sign a formal alliance.

B.5 RUS has a CB against PRU and a CB against AUS (if at war) for the duration of the war.

B.5.a If RUS uses one of these CB, it is considered allied with the other side in the war without need to sign a formal alliance.

B.6 Normal calls for allies may occur as a reaction to any of these declarations of war.

B.7 As long as the event last, RUS as a malus of +3 to the survival rolls of its monarch before **Peter II**.

#### C Diplomatic Phase

C.1 If SAXONIA is at war against PRU but its controller is not, SAXONIA is put in EW of the first country at war against PRU in the following list: AUS, ANG, SUE, FRA, RUS.

C.1.a During the war, the controller of SAXONIA has a bonus of +5 for diplomacy on any minor of the HRE except BAVARIA.

#### D Administrative Phase

D.1 Purchase limits for PRU are doubled for the duration of the war.

D.1.a During the war, PRU may raise troops in any province belonging to a minor it controls.

D.2 At the first turn of the war, all minors at war must choose their reinforcements in offensive attitude.

D.2.a At the following turns, it must be either offensive or naval attitude.

#### E Peace Phase

E.1 As long as **Friedrich II** is alive, PRU cannot be forced to peace if at -3 in Stability for two consecutive turns.

E.1.a It can, however, be forced to peace if all its provinces are occupied.

E.2 If PRU signs an unfavourable peace, FRA and AUS win 50 VP (each) if they were at war against PRU.

E.2.a In this case, if ANG was at war it loses 25 VP or 50 VP is this was an unconditional surrender.

E.3 If its side imposes an unconditional surrender (to either PRU or AUS), RUS can annex all provinces of POLONIA adjacent to RUS territory.

E.3.a This counts as one peace condition for the alliance of RUS.

E.3.b The allies of RUS will have a CB against RUS at the following turn to contest this annexation.

E.3.c If POLONIA is a special EW of FRA or SUE per either event part VI-11.α (Polish Victory) or §β-I.3.b of event part VI-1.β (Polish Civil War), this annexation can only be done if RUS is not allied with the protector of POLONIA.

E.3.d This annexation is impossible if Absolutism is established in POLONIA.

E.4 If PRU forces SAXONIA to an unconditional surrender, it wins 25 VP.

<div>[E]498</div> <div>Political Events of Period VII</div> <p><b>E.5</b> If AUS is forced to unconditional surrender it loses 50 VP and 1 Stability.</p> <div>α The French and Indian War</div> <p><i>Date: Colonial tensions erupted into a state of war in 1754 in America.</i></p> <div>α-F Event Phase</div> <p><b>α-F.1</b> FRA and ANG are now in a state of overseas war.</p> <p><i>α-F.1.a</i> This is not a declaration of war, hence there is no cost of Stability for any of them.</p> <p><b>α-F.2</b> Reactions are allowed as if the war was continuing from a previous turn except:</p> <p><i>α-F.2.a</i> They may not generalise the war at this turn, unless using another CB.</p> <p><i>α-F.2.b</i> They may not sign an armistice this turn.</p> <div>VII-2 THE WAR OF BAVARIAN SUCCESSION RistoMod</div> <p><i>Date: 1778-1779.</i></p> <div>A Condition:</div> <p><b>A.1</b> Cannot occur if BAVARIA is currently at war against AUS. In that case mark off and play R/D instead.</p> <div>B Event Phase</div> <p><b>B.1</b> BAVARIA offers to become a permanent MA of AUS.</p> <p><i>B.1.a</i> If this offer is accepted, BAVARIA cannot anymore fall below MA of AUS, but diplomacy is still possible on it.</p> <p><i>B.1.b</i> If the offer is refused, ignore the rest of the event.</p> <p><b>B.2</b> If the offer is accepted, PRU as free CB against AUS to be used immediately.</p> <p><b>B.3</b> If PRU does not use the CB, AUS is considered to have won the war for all relevant effects and VP.</p> <p><i>B.3.a</i> Normal calls for allies follow if a war is declared.</p> <p><i>B.3.b</i> It is possible that BAVARIA stays out of the war. . .</p> <div>C Peace Phase</div> <p><b>C.1</b> If AUS signs a white or unfavourable peace, BAVARIA becomes a normal minor again and PRU win 20 VP.</p> <p><b>C.2</b> If AUS signs a favourable peace, AUS win 25 VP and the previous controller of BAVARIA (if any) has a temporary CB against AUS at the next turn.</p> <div>VII-3 BATAVIAN REVOLUTION RistoMod</div> <p><i>Date: 1785-1787.</i></p> <p><i>Duration:</i> Until the <i>Revolt</i> are crushed or the government is overthrown.</p> <div>A Condition:</div> <p><b>A.1</b> If HOLLANDIA is a minor country, apply subevent §α (Minor Holland in Revolution). The second time, apply R/D and mark off.</p> <p><b>A.2</b> Else apply subevent §β (War between Orangists and Patriots) (twice if needed).</p> <div>α Minor Holland in Revolution</div> <div>α-B Event Phase</div> <p><b>α-B.1</b> Place a <i>Revolt</i> in each province owned by minor HOLLANDIA.</p> <p><b>α-B.2</b> Minor HOLLANDIA immediately proposes a peace based on the current peace differential (or a white peace if the situation favours minor HOLLANDIA) to all its enemies.</p> <p><i>α-B.2.a</i> Minor countries accept this peace.</p> <div>α-C Diplomatic Phase</div> <p><b>α-C.1</b> If minor HOLLANDIA and PRU are allied, PRU may intervene to help.</p>	<div>Political Events of Period VII— master – 2016-04-14</div> <div>[E]499</div> <p><i>α-C.1.a</i> No other major may intervene.</p> <div>α-D Administrative Phase</div> <p><b>α-D.1</b> Minor HOLLANDIA does not get any reinforcement roll for the first turn of this event.</p> <div>α-E Military Phase</div> <p><b>α-E.1</b> PRU may not send more than two stacks in provinces owned by minor HOLLANDIA.</p> <div>α-F Peace Phase</div> <p><b>α-F.1</b> Minor HOLLANDIA keeps proposing peace to its enemies as long as <i>Revolt</i> still exist during the peace phase.</p> <p><b>α-F.2</b> If at the end of a turn, there are <i>Revolt</i> in more than half of provinces belonging to minor HOLLANDIA, the minor has gone through a revolution. Return the diplomatic marker of minor HOLLANDIA to neutral status (unless activated in a war; in this case place it in MA of the controller).</p> <div>β War between Orangists and Patriots</div> <div>β-G Event Phase</div> <p><b>β-G.1</b> If at war, HOL makes a mandatory white peace with all its enemies.</p> <p><i>β-G.1.a</i> MAJ allied to or at war with HOL will be able to make a foreign intervention in the Civil War (on any side).</p> <p><i>β-G.1.b</i> Other countries will be able to intervene as mentioned below. No other countries may intervene in the Civil War.</p> <p><b>β-G.2</b> HOL is in Civil War (see section IV.5.5.5 (Religious Wars, Civil Wars)) between the Patriots, the Republicans and the Orangists.</p> <p><i>β-G.2.a</i> The Orangists use up to one A, 5LD/ND and one IF counter (for example, from FIDELIS REGI).</p> <p><i>β-G.2.b</i> The Patriots use up to two A and 6LD from REBELLIS.</p> <p><i>β-G.2.c</i> Republicans use up to one A, 5 LD/ND and all possible naval forces of HOLLANDIA.</p> <p><i>β-G.2.d</i> HOL can choose to take either the side of Patriots or Orangists. The choice is made after the revolts have been rolled for.</p> <p><b>β-G.3 Rise of the Patriots</b> For each province of HOL in Europe, roll 2d10. Add –3 if event VII-5 (The French Revolution) already started. If the roll is lower or equal to the income of the province, the province is in <i>Revolt</i>. Roll for the strength of the revolt in table XVI.3 (Revolt table: target area and strength).</p> <p><i>β-G.3.a</i> The Patriots control <b>Holland</b>.</p> <p><b>β-G.4</b> For all COL, roll 1d10. On 1, put a <i>Revolt</i> and a Patriot LD; on 10, put an Orangists LD and a control for the Orangists in the province. All other ROTW counters of HOL are owned by the Republicans.</p> <p><i>β-G.4.a</i> HOL has to announce its support of one side at this point. It will play this side.</p> <p><b>β-G.5 Orangists resistance</b> The Orangists call for help in that order: PRU, SUE, non-revolutionary FRA, the owner of the <i>Spanish Low Countries</i> after event V-4 (The War of Spanish Succession).</p> <p><i>β-G.5.a</i> The first to answer the call will play the Orangists (if HOL supports the Patriots) and will be allowed an intervention of at most two stacks (not one as per usual rules) of at most one A.</p> <p><i>β-G.5.b</i> Other countries will not be able to intervene.</p> <p><i>β-G.5.c</i> If no country wishes to intervene in this list and HOL chose the Patriots, PRU will play the Orangists.</p> <p><i>β-G.5.d</i> The Orangists decide of one safe place (historically <b>Gelderland</b>) that they own (even if in <i>Revolt</i>). This must not be <b>Holland</b> nor <b>Utrecht</b>. The <i>Revolt</i> is removed if there was one, but a LD or a X is moved in another <i>Revolt</i>.</p> <p><b>β-G.6 Republicans and the VOC</b> Naval forces and most ROTW Dutch settlements will mostly stay out of the war. The moves of these forces will be played by ANG.</p> <p><i>β-G.6.a</i> ANG will be able to intervene with a normal foreign intervention.</p> <p><i>β-G.6.b</i> Administrative actions will be very limited and played by HOL, using 3/3/3 as Monarch values during all the war.</p>
--	--

<div>[E]500</div> <div>Political Events of Period VII</div> <p><b>β-G.7 Call for the Revolution</b> Revolutionary FRA (after The French Revolution started) may be able to send one stack of conventional troops and two stacks of Revolutionary troops to help Patriots. It can declare its intervention during the military rounds if sending Revolutionary troops; but it may not gain as much by doing so.</p> <p>β-G.7.a If HOL supports the Orangists, and nobody supports the Patriots, then TUR will play the Patriots.</p> <p><b>β-G.8 The Dutch Fleet</b> Orangists pick one ⚑ counter, moved to one port they control (if none, one port of their supporter or simply at sea). All other naval forces go to Republicans.</p> <p><b>β-H Diplomatic Phase</b></p> <p><b>β-H.1</b> HOL can react to attacks on its minor countries. It can not do any other diplomatic actions.</p> <p><b>β-I Administrative Phase</b></p> <p><b>β-I.1 Incomes</b> Orangists and Republicans get land income from the provinces they (or their allies) control in European provinces of HOL.</p> <p>β-I.1.a Patriots get the land income from the provinces they control or that are in <i>Revolt</i>.</p> <p>β-I.1.b Half (rounded down) of Vassal income goes to Orangists. The rest goes to Republicans.</p> <p>β-I.1.c There is no commercial income. ROTW income goes to whoever controls the place (usually Republicans).</p> <p>β-I.1.d MNU give their basic income (the fixed part) to the side getting revenues from the province.</p> <p><b>β-I.2 Administrative actions</b> The only actions that can be done are paid on HOL RT directly. They are: reactions to concurrence, improving already existing COL or TP, improving already existing TF.</p> <p><b>β-I.3 Raising armies</b> Republicans have to pay for the maintenance of naval and land forces in their keep first of all (what can not be paid for is dismantled). With the rest, they may purchase troops only to be bought in territories they control or in ANG. ANG may give money to Republicans. Republican land forces are always <i>Conscsripts</i>.</p> <p>β-I.3.a On the first turn, land forces in Europe of HOL are disbanded.</p> <p>β-I.3.b Patriots and Orangists have their own budget and a purchase limit of 2LD. The first ⚔ they buy on the first turn is <i>Veterans</i>, the rest is <i>Conscsripts</i>. Their supporter may give money.</p> <p><b>β-J Military Phase</b></p> <p><b>β-J.1</b> Province flooding (section XIV.11.4.2 (Dutch Flood)) can not be used during this event.</p> <p><b>β-J.2</b> For movement, supply and attrition, provinces with <i>Revolt</i> are friendly to Patriots unless an enemy force is within.</p> <p>β-J.2.a Patriots consider all cities with <i>Revolt</i> in the province as blockaded.</p> <p>β-J.2.b <i>Revolt</i> are weak supply points for Patriots.</p> <p><b>β-K Peace Phase</b></p> <p><b>β-K.1</b> HOL loses 1 Stability. No Stability increase is possible during the event.</p> <p><b>β-K.2</b> No armistice may be signed by the various sides.</p> <p><b>β-K.3 Victory of Orangists</b> If there are no more revolts and no more troops of Patriots in national territory, Orangists get an automatic victory.</p> <p>β-K.3.a The Monarch is reinstated. Stability of HOL becomes +3 minus one per turn of revolution.</p> <p>β-K.3.b If this event happens again, HOL will have a -2 to the strength of <i>Revolt</i>.</p> <p>β-K.3.c The supporters of Orangists get 20 VP (possibly including HOL). Supporters of Patriots lose 20 VP.</p> <p><b>β-K.4 Victory of Patriots</b> If there are <i>Revolt</i> in all national provinces or no more Orangists (or allies) troops in national territory or it is the third turn of the revolution and there is still at least one <i>Revolt</i> or this is the last turn of the game or Stability is at -3 for two consecutive turns, Patriots get an automatic victory.</p> <p>β-K.4.a All revolts are removed. The government is overthrown. Read below for the lasting consequences.</p> <p>β-K.4.b A Monarch will be rolled anew at next turn, as if there were a <i>Dynastic Crisis</i>.</p> <p>β-K.4.c Stability of HOL becomes 0.</p> <p>β-K.4.d The supporters of Patriots get 20 VP (possibly including HOL). Supporters of Orangists lose 20 VP.</p>	<div>Political Events of Period VII— master – 2016-04-14</div> <div>[E]501</div> <p><b>β-K.5 Victory of Republicans</b> Republicans are considered victors if any other side wins in one turn or two turns. They lose if the revolution ends after three turns.</p> <p>β-K.5.a ANG is entitled to 1 or 2 compensations (given by the Orangists or the Patriots or taken to the VOC during the troubles) of HOL's choice: 1 level in a CTZ, 2 levels in a STZ, one COL, one TP. Automatic concurrence may follow from this. There are two compensations if the victory was in one turn. ANG gets two compensations for a victory of either side in 1 turn.</p> <p>β-K.5.b If ANG lost military forces (either naval or land) during the Revolution, it is entitled to 20 VP in addition. If the Republicans lost, ANG loses 20 VP.</p> <p><b>β-K.6</b> There are no other peace outcomes.</p> <p><b>β-K.7</b> In case of victory, supporters (including HOL) of the winning side gain 20VP and the forces of the winning side are converted to HOL counters. Supporters of the losing side lose 20VP and the forces of the losing side are disbanded.</p> <p><b>β-L Lasting Effects</b></p> <p><b>β-L.1</b> In case the Patriots win, apply the following points:</p> <p>β-L.1.a The <i>Stadhouder</i> government is no more possible.</p> <p>β-L.1.b All monarchs have a +2 to their survival roll. <i>Dynastic Crisis</i> will cost 1 Stability with no other consequences.</p> <p>β-L.1.c The maximum ADM value of the Monarch (or Minister) is now 7. However, the real rolled-for value is used for rolling the next Monarch.</p> <p>β-L.1.d The maximum DIP value of the Monarch is now 5. However, the real rolled-for value is used for rolling the next Monarch.</p> <p>β-L.1.e The minimum MIL value of the Monarch is now 7.</p> <p>β-L.1.f If the event happens again, the <i>Revolt</i> strength will have a +2 modifier.</p> <p>β-L.1.g The VOC is dissolved. The basic ⚡ is available each turn only if 1d10 (rolled during the Monarch Survival phase) is even. This also removes some constraints on TFI and turns the TP placement available each turn into a TP placement or COL placement, at the choice of HOL.</p> <p>β-L.1.h National provinces of HOL will count in favour of FRA for the "natural frontier" objectives (not for the rest).</p> <p>β-L.1.i HOL loses 1 diplomatic action.</p> <p>β-L.1.j HOL has a mandatory defensive alliance with Revolutionary FRA for at least three turns (as soon as possible)</p> <p><b>VII-4 WAR OF INDEPENDENCE IN THE COLONIES (×*)</b> RistoMod</p> <p><i>Duration:</i> Until the end of the rebellion.</p> <p><b>A Condition:</b></p> <p><b>A.1</b> If none of the following already occurred, do not mark off and re-roll:</p> <p>A.1.a subevent VII-1.α (The French and Indian War) (only if the war is already finished).</p> <p>A.1.b event VII-20 (William Pitt).</p> <p>A.1.c event VII-5 (The French Revolution)</p> <p><b>A.2</b> The first time, apply American Revolutionary War (§β), the second and subsequent times, apply Bolivarian Revolutions (§γ). Each time, Where does the revolt occurs ? (§α) is used to determine which colonies try to get their independence.</p> <p><b>α WHERE DOES THE REVOLT OCCURS ?</b></p> <p>A revolutionary war erupts in a group of colonies. The target group is chosen by first selecting a subcontinent and then a major country. The major country must have a certain number of colonies in the target subcontinent in order to start the revolt. The first major country meeting the criteria is subject to the revolution.</p> <p><b>α-A.1</b> The possible target subcontinents are, in order:</p> <p>α-A.1.a <b>NORTH AMERICA</b></p> <p>α-A.1.b <b>SPANISH WORLD</b></p>
---	--

*α-A.1.c* **BRAZIL**

*α-A.1.d* **INDIA**

*α-A.1.e* **ASIA** (except **INDIA**)

**α-A.2** The possible target players are the protestant ones in the following list:

*α-A.2.a* ANG, FRA, HIS, HOL

**α-A.3** The target group of colonies is elected by first looking for players meeting the criteria in the first subcontinent, then the second and so on.

**α-A.4** The target group of colonies must contain at least 10 levels of COL in four adjacent provinces (with land access between them).

*α-A.4.a* It is possible that some of these provinces have no COL in them as long as there are 10 levels of COL or more in four provinces.

**α-A.5** If no target exists, nothing happens but the event is nonetheless considered played (mark off, do not re-roll, do not play R/D).

**α-A.6** Once the target group of colonies is found, roll 1d10 with the following modifiers:

–5 If no other player has a COL inside the four target provinces.

+1 For each other player that has COL or TP within two provinces of the group or

+2 For each other player that has COL or TP adjacent to the group.

–1 If the player has any LD in the group or

–2 If the player has any A in the group.

–2 If the player has FR or AT with a minor adjacent to the group.

+3 If another player has FR or AT with a minor adjacent to the group and the player has neither FR nor AT with this minor country.

**α-A.7** If the result is 5 or more, the rebellion occurs. A non-modified 10 is an automatic rebellion while a non-modified 1 always means that no rebellion occurs.

*α-A.7.a* If no rebellion occurs, nothing happens but the event is nonetheless considered played (mark off, do not re-roll, do not play R/D).

## β American Revolutionary War

### β-B Condition:

Choose a target MAJ and group of colonies as indicated in event part §α (Where does the revolt occurs?).

### β-C Event Phase

**β-C.1** The MAJ choose one COL within the revolted group. Place a *Revolt* in each other COL of the group.

*β-C.1.a* Place 3LD (of UNITED STATES) on one of the *Revolt*.

*β-C.1.b* Rebels control all the fortresses in the revolted colonies.

### β-D Diplomatic Phase

**β-D.1** The rebels calls for allies as indicated in the preferences of UNITED STATES.

### β-E Administrative Phase

**β-E.1** The MAJ does not get income from the COL that initially revolted, even if the *Revolt* are suppressed.

*β-E.1.a* It cannot either raise troops there or use the colonial militia.

*β-E.1.b* It can, however, build fortresses in these COL.

**β-E.2** The MAJ receives no income from TF in STZ adjacent to a COL that initially revolt, even if the *Revolt* are suppressed.

*β-E.2.a* All other player get double income (but not double bonus) from TF in these STZ.

**β-E.3** Rebels can choose reinforcements in either offensive or defensive attitude. They use the counters of UNITED STATES.

**β-E.4** If the MAJ has a general that can be used by UNITED STATES (either *Washington* or *La Fayette*), this general goes to the side of the rebels.

*β-E.4.a* If *Arnold* is alive, he joins the rebels.

*β-E.4.b* The rebels must have at least two generals for the duration of the event. Use the unnamed generals of UNITED STATES if needed.

**β-E.5** The MAJ receives at no cost a mercenary that can be used in the ROTW and is considered to have rank Z.

**β-E.6** *Washington* and *La Fayette*, if not already rebels, can be sent by their owner (ANG or FRA) to help them.

*β-E.6.a* The owner chooses each turn whether it keeps the general or send him to help the rebels.

*β-E.6.b* This general is in addition to the minimum two generals of the rebels.

*β-E.6.c* Once the event is finished, this leader goes back to his major country.

### β-F Military Phase

**β-F.1** *Revolt* are supply sources for the rebel troops.

**β-F.2** Remember that UNITED STATES (hence, the rebels) roll for reinforcements after each winter round and not only once per turn.

### β-G Peace Phase

**β-G.1** The event stops at the end of the second turn of revolt.

*β-G.1.a* If all *Revolt* have been suppressed by the end of the second turn, MAJ wins the war.

*β-G.1.b* Otherwise, the rebels win.

**β-G.2** If the rebels are crushed, remove all the units of the rebels, remove the named leaders of UNITED STATES from the game (not the one sent by a major).

**β-G.3** If the rebels win, the minor country UNITED STATES is created.

*β-G.3.a* All the COL in the initial group of revolt are part of UNITED STATES, even those where the *Revolt* were suppressed.

*β-G.3.b* All the provinces of UNITED STATES are considered as European provinces for all game purposes.

## γ Bolivarian Revolutions

*Date: Spanish American Wars of Independence (Bolivar): 1808-1829/Independence of Brazil: 1823-1825.*

### γ-H Condition:

**γ-H.1** If another War of Independence in the Colonies (VII-4) is currently occurring, do not mark off and re-roll.

**γ-H.2** If another War of Independence in the Colonies (VII-4) is already finished and was won by the rebels, if Storming the Bastille (VII-5.a) did not occur yet, apply it instead.

**γ-H.3** Otherwise (revolt crushed or Storming the Bastille already occurred or a previous occurrence resulted in “no revolt” after the test of §α-A.7 of event part VII-4.α (Where does the revolt occurs ?)), choose a target country as indicated in event part §α (Where does the revolt occurs ?), ignoring the religion condition of §α-A.2 of event part VII-4.α (Where does the revolt occurs ?).

**γ-H.4** Once a target is found, if the die roll of §α-A.7 of event part VII-4.α (Where does the revolt occurs ?) indicated a revolt, roll another die and apply the corresponding result:

10 Another revolt occurs

9 Extension to a near continent

6–8 Small revolt

1–5 Nothing happens. The event is nonetheless considered played (mark off, do not re-roll, do not play R/D).

**γ-H.5 Another revolt occurs** Another revolt occurs as described in subevent §β (American Revolutionary War). Both revolts are separate one from another and, if created, both countries are different. Use whatever name and counters you wish to refer to the second and subsequent ones (Canada, Bolivia, Brazil, Indonesia, . . .)

**γ-H.6 Extensions to a near continent** If the target subcontinent is adjacent to the original one (either **NORTH AMERICA** and **SPANISH WORLD** or **INDIA** and **ASIA**), a new revolt occurs as above, otherwise treat as a *Small revolt* below.

**γ-H.7 Small revolt** Place three **Revolt** in the target group of colonies. Don't use any minor forces. No independence may result from these **Revolt**. Another event VII-4 (War of Independence in the Colonies) may occur before all the **Revolt** are crushed.

## VII-5 THE FRENCH REVOLUTION (×2) PMod

Date: 1789-1799.

*The first event corresponds to the bankruptcy of the French monarchy as well as the peasant crisis leading to the Storming of the Bastille and a change of government. Several possible new forms of government can exist depending on the choices of the player and the other majors. The second event corresponds to the internal dynamics of the Revolution yielding to uncontrolled effects.*

Duration: until the end of the game.

### α Condition:

**α.1** If none of the following happened, do not mark off and re-roll:

**α.1.a** End of The Seven Years War (VII-1).

**α.1.b** Beginning of War of Independence in the Colonies (VII-4) (the revolt must have started).

**α.1.c** Batavian Revolution (VII-3) is finished and was successful.

**α.2** The first time, apply Storming the Bastille (§α). The second time, apply Reign of Terror (Robespierre) (§ι).

**Design note:** “À partir de la Révolution, les règles de bon sens cessent de s'appliquer.”  
(Pierre, August 2007).

## α Storming the Bastille

### α-B Event Phase

#### α-B.1 Political and social crisis

**α-B.1.a** If FRA is at war against another MAJ, it loses 1 Stability. Otherwise, it loses 3 Stability.

**α-B.1.b** FRA is considered to have broken its alliances with all countries (major or minor). This does not cause any extra loss of Stability.

**α-B.1.c** Roll for two **Revolt** in **FRANCIA**.

**α-B.1.d** Future survival rolls for the French monarch get a malus of **+2**. The malus will be **+5** if FRA goes to the **Convention** government.

**α-B.1.e** The following countries have a free CB against FRA until the end of the game: ANG, AUS, PRU, HIS, HOL (unless if event VII-3 (Batavian Revolution) was won by the rebels).

**α-B.1.f** FRA has a normal CB until the end of the game against each major country and against each minor country adjacent to its territory.

**α-B.1.g** These CB can be used as diplomatic reaction to any other diplomatic announcement.

#### α-B.2 Economical crisis

**α-B.2.a** FRA loses 100 ₣. Then its Royal Treasure is halved with a minimum loss of 50 ₣.

**α-B.2.b** From now on, FRA loses 10% of its gross income (line **B24** of **ERS**).

**α-B.2.c** From now on, FRA pays inflation as if it were bringing gold from **AMERICA**.

### α-C Diplomatic Phase

**α-C.1** If **POLONIA** is a special EW of FRA (per event part VI-11.α (Polish Victory)), as soon as another MAJ declares war on FRA, so does **POLONIA**. Troops of **POLONIA** are allowed to cross the HRE.

**α-C.2** At the end of each diplomatic phase, test for a change of government in **FRANCIA**. Roll 1d10 modified as follows:

–4 if War of Independence in the Colonies (VII-4) never occurred;

–2 if War of Independence in the Colonies is finished and the rebellion was crushed;

+2 if War of Independence in the Colonies is finished and **UNITED STATES** has been created;

+2 if FRA used this turn a CB provided by this event;

+4 if FRA is at war without declaring any war this turn;

+6 if the king of FRA died during this event.

**α-C.3** The result of the die roll tells which is the new government of FRA:

1–6 The government is unchanged.

7–13 The government switches to (or remains) **Convention**. Apply **Convention** (and constitutional monarchy) (§β).

14+ The government switches to **Terror**. It won't be able to change back to anything else: stop doing this test each turn. Apply **Reign of Terror** and **Directoire** (§γ).

### α-D Military Phase

**α-D.1** During all wars caused by this event, enemies of FRA are considered allied inside the territory of FRA or when fighting French troops. They may be at war elsewhere and nonetheless be allied (and stack together or intercept French troops attacking the other country, . . . ) fighting FRA.

**α-D.2** Countries at war against FRA are limited to 1 stack inside the national territory of FRA.

**α-D.2.a** They are not limited if fighting out of the national territory of FRA.

**α-D.2.b** The Δ provided by Émigrés (§δ) does not count toward this limit. It is always allowed inside FRA.

### α-E Peace Phase

**α-E.1** If **Paris** is controlled by the enemies of FRA and there are no Revolutionary Δ of FRA in play, the Revolution is crushed and a new king is put on the throne of FRA.

**α-E.1.a** The game ends at the end of this turn.

**α-E.1.b** Each country at war against FRA wins 30 VPs.

**α-E.1.c** FRA wins 15 VPs at the end of the game if the revolution has not been crushed.

## → Effects of the Revolution →

## β Convention (and constitutional monarchy)

Date: 1789-1792.

### β-F Diplomatic Phase

**β-F.1** When the government changes to **Convention**:

**β-F.1.a** Apply Émigrés (§δ), Chouans and Royalist Uprisings (§ε), Revolutionary Armies (§η) and Natural Frontiers (§ζ).

**β-F.1.b** Roll for one **Revolt** in FRA.

### β-G Lasting Effects

**β-G.1** If still alive, the king of FRA has a **+5** malus to all his survival rolls (instead of the **+2** for the Revolution).

**β-G.2** If the king dies, he is replaced by **Convention** with values 3/6/7. This government never rolls for survival.

**β-G.3** During each event phase of **Convention**, roll for one **Revolt** in FRA.

## γ Reign of Terror and Directoire

Date: 1792-1799.

### γ-H Diplomatic Phase

**γ-H.1** When the government switch to **Terror**:

**γ-H.1.a** The French king (or **Convention**) is immediately killed, he is replaced by **Terror** with values 5/6/9. This government never rolls for survival.

**γ-H.1.b** Roll for 3 **Revolt** in FRA.

**γ-H.1.c** If they were not already activated, apply Émigrés (§δ), Chouans and Royalist Uprisings (§ε) and Natural Frontiers (§ζ).

<div>[E]506</div> <div>Political Events of Period VII</div> <p><i>γ-H.1.d</i> Apply “La Patrie en danger” (§9)</p> <p><i>γ-H.1.e</i> Increase the DTI and FTI of FRA by 1 each (max. 5).</p> <p><i>γ-H.1.f</i> Each MAJ has a free CB against FRA to be used immediately.</p> <div>γ-I Administrative Phase</div> <p><b>γ-I.1</b> At the turn the government switch to <b>Terror</b>, the gross income of FRA is halved (round down, line <b>B24</b> of <i>ERS</i>). This is not cumulative with the permanent <b>–10%</b> caused by the event.</p> <div>γ-J Lasting Effects</div> <p><b>γ-J.1</b> During each event phase of <b>Terror</b>, roll for two <i>Revolt</i> in FRA.</p> <div>γ-K Peace Phase</div> <p><b>γ-K.1 End of Modern History</b> The game ends at the end of the second turn of <b>Terror</b>.</p> <div>δ ÉMIGRÉS</div> <div>δ-L Administrative Phase</div> <p><b>δ-L.1</b> The first country at war against FRA in the following list gets the benefits of the Émigrés: AUS, PRU, HIS, ANG, POLONIA (and its controller).</p> <p><b>δ-L.2</b> The MAJ gets a French Royal ♠ with a × of FRA.</p> <p><i>δ-L.2.a</i> This ♠ can appear in any province owned by FRA or by the MAJ receiving it.</p> <p><i>δ-L.2.b</i> It is considered class III with 4 artilleries per ♠.</p> <p><b>δ-L.3</b> This ♠ can be reinforced (or recreated if destroyed) at the cost of the French royal troops.</p> <p><i>δ-L.3.a</i> This ♠ can be raised again or receive reinforcements in any province owned by the MAJ receiving it or any French province either in <i>Rebellion</i> or <i>Revolt</i> or controlled by another country.</p> <p><b>δ-L.4</b> This ♠ is freely maintained in veteran (new troops are conscripts as per normal rules).</p> <p><b>δ-L.5</b> This ♠ must fight against FRA. If in FRA it cannot leave the provinces in or adjacent to FRA national territory and if created out of FRA it must goes to FRA by the shortest path. It is considered allied with all countries except FRA. It can co-exist with troops all countries but FRA and will never take part in any battle except against FRA.</p> <div>ε CHOUANS AND ROYALIST UPRISINGS</div> <div>ε-M Diplomatic Phase</div> <p><b>ε-M.1</b> <i>Chouans</i> are played by ANG (even if not at war against FRA).</p> <p><b>ε-M.2</b> Place a <i>Rebellion</i> in each <b>Poitou</b> and <b>Vendée</b>.</p> <p><i>ε-M.2.a</i> French troops in these provinces must retreat.</p> <p><b>ε-M.3</b> Place a rebel ♠ and a general in one of these provinces.</p> <div>ε-N Administrative Phase</div> <p><b>ε-N.1</b> As long as a <i>Rebellion</i> exists in either <b>Poitou</b>, <b>Vendée</b>, <b>Morbihan</b>, <b>Armor</b> or <b>Finistère</b>, the <i>Chouans</i> get 1LID in reinforcement (except the first turn).</p> <div>ε-O Military Phase</div> <p><b>ε-O.1</b> Instead of moving, 1LID may “hide” in <b>Vendée</b> (only). It does not count as military presence any more but gives a malus of <b>–2</b> to suppress the <i>Rebellion</i>.</p> <p><i>ε-O.1.a</i> If the <i>Rebellion</i> is suppressed, this LID is destroyed.</p> <p><b>ε-O.2</b> These <i>Rebellion</i> are friendly to any enemy of FRA. <i>Rebellion</i> are also supply sources for any enemy of FRA.</p> <div>ζ NATURAL FRONTIERS</div> <div>ζ-P Condition:</div> <p><b>ζ-P.1</b> The “Natural Frontiers” of FRA consist in:</p> <p><i>ζ-P.1.a</i> All national provinces of FRA.</p> <p><i>ζ-P.1.b</i> All provinces adjacent to national provinces of FRA except those in HIS or HELVETIA.</p>	<div>Political Events of Period VII— master – 2016-04-14</div> <div>[E]507</div> <p><i>ζ-P.1.c</i> All provinces on the left-hand side of river Rhine, that is all the provinces between FRA and (included) <b>Alsace</b>, <b>Pfalz</b>, <b>Trier</b>, <b>Köln</b>, <b>Limburg</b>, <b>Utrecht</b> and <b>Zeeland</b>.</p> <div>ζ-Q Administrative Phase</div> <p><b>ζ-Q.1</b> FRA automatically gets income from any province within its Natural Frontier that it militarily controls, unless the province is besieged, in revolt, flooded, or any other situation that normally prevents income.</p> <p><i>ζ-Q.1.a</i> Exception: provinces that belong to Patriotic HOL (see event VII-3 (Batavian Revolution)) and are occupied by FRA still give their income to HOL, even if occupied provinces normally provide no income.</p> <div>η REVOLUTIONARY ARMIES</div> <div>η-R Administrative Phase</div> <p><b>η-R.1</b> FRA can now use the Revolutionary ♠ counters.</p> <p><i>η-R.1.a</i> Each new ♠ raised from now on is Revolutionary.</p> <p><i>η-R.1.b</i> Already existent (royal) ♠ are not affected and stay until destroyed or disbanded.</p> <p><i>η-R.1.c</i> FRA may not have more than 6 ♠ counters in play at the same time.</p> <p><i>η-R.1.d</i> Both the royal counters (of FRA) and the new revolutionary counters (labelled “Révolutionnaires”) belong to the same country for all purpose of leadership.</p> <p><b>η-R.2</b> Recruitment and upkeep cost of Revolutionary ♠ is halved (upkeep of royal ♠ is unchanged).</p> <p><b>η-R.3</b> Land recruitment limit is doubled.</p> <p><b>η-R.4</b> Naval recruitment cost is doubled.</p> <p><b>η-R.5</b> FRA may not used Licensed privateers as described in section XIV.2.1.1 (French Privateers).</p> <p><b>η-R.6 Revolutionary leaders</b> [BLP]</p> <p><i>η-R.6.a</i> All leaders of FRA are dismissed. FRA now uses the revolutionary leaders (excluding <i>Bonaparte</i>).</p> <p><i>η-R.6.b</i> The leaders limits for FRA is now 3×/1±.</p> <p><i>η-R.6.c</i> The revolutionary leaders are treated as leaders rather than named ones. That is, FRA draws them at random in order to reach its limits and they change every turn.</p> <div>θ “LA PATRIE EN DANGER”</div> <p>All the effects of Revolutionary Armies (§η) are applied. In addition:</p> <div>θ-S Diplomatic Phase</div> <p><b>θ-S.1</b> All French ♠ are immediately replaced by Revolutionary ♠.</p> <p><b>θ-S.2</b> FRA may have up to 8 ♠ counters in play.</p> <p><b>θ-S.3 Revolutionary leaders</b> [BLP]</p> <p><i>θ-S.3.a</i> All leaders of FRA are dismissed. FRA now uses the revolutionary leaders.</p> <p><i>θ-S.3.b</i> The leaders limits for FRA is now 5×/1±.</p> <p><i>θ-S.3.c</i> The revolutionary leaders are treated as leaders rather than named ones. That is, FRA draws them at random in order to reach its limits and they change every turn.</p> <p><b>θ-S.4</b> General <i>Bonaparte</i> (× B 6.6.6 -3 [Event VII-5(2)]) is available for FRA during the first turn of <b>Terror</b>, starting with the first round after W2.</p> <div>→ end of effects of the revolution →</div> <div>ι Reign of Terror (Robespierre)</div> <p><i>Date</i>: 1792.</p> <p><i>Duration</i>: until the end of the game.</p> <div>ι-T Condition:</div> <p><b>ι-T.1</b> Can happen only if War of Independence in the Colonies (VII-4) is ongoing or if UNITED STATES has already been created.</p>

---	--

**VII-8 SECOND PARTITION OF POLAND (×\*)**

PBnew

Date: 1791, 1793.

**A Condition:****A.1** If event VII-7 (First Partition of Poland) did not occur yet, do not mark off and re-roll.**A.2** If there is a war between at least two of the following countries: RUS, AUS, PRU, do not mark off and re-roll.**A.3** If POLONIA doesn't exist any more, mark off, play and R/D with the *Revolt* in POL.**A.3.a** In addition, if event VII-4 (War of Independence in the Colonies) already occurred at least once, play that event again.**A.4** The event is resolved in the same way as event VII-7 (First Partition of Poland) (depending on the status of POLONIA) but with the partition plan described here.**A.5** This event may occur several times.**α SECOND AND FOLLOWING PARTITION PLANS****α-A.1** The proposed partition of POLONIA gives the following provinces to each major country:**α-A.1.a** RUS gets all the Polish provinces in *UKRAINE*, **Severia**, **Baltarusija** and **Polacak**. If none of the belong to POLONIA, RUS gets instead **Lietuva**, **Žemaitija** and **Prypeč**.**α-A.1.b** PRU gets all the provinces of *DUCHY OF PRUSSIA* and **West Preußen**. If none of the belong to POLONIA, PRU gets instead **Danzig**, **Wielkopolska** and **Mazowia**.**α-A.1.c** AUS gets all the Polish provinces formerly part of HUNGARIA, **Morava** and **Małopolska**. If none of them belong to POLONIA, AUS gets instead **Wołyń** and **Lublin**.**α-A.1.d** SUE gets a province of its choice, adjacent to its territory, even one part of the share of another country.**α-A.2** If some of the provinces explicitly mentioned (not those part of a group) no more belongs to POLONIA, the major instead gets a free CB against the owner of the province for the next diplomacy phase.**α-A.3** If some provinces are claimed by several countries, the one occupying it at the time of the partition annexes the province. SUE does if nobody occupy it.**VII-9 NATIONAL REVIVAL OF POLAND (×2)**

PBnew

Date: 1795.

**A Condition:**

Cannot occur before event VII-7 (First Partition of Poland). In that case, do not mark off and re-roll.

**A.1** Each of these events can happen only once.**A.1.a** If there no more POLONIA, apply Kosciusko's revolt (§α).**A.1.b** If POLONIA still exists, apply Commonwealth's Revival (§β).**α Kosciusko's revolt**

Date: 1795.

**α-B Event Phase****α-B.1** Place *Revolt* in the following provinces: **Lietuva**, **Mazowia**, **Lublin** and **Wielkopolska**.**α-B.1.a** The *Revolt* are ⊕ if event VII-5 (The French Revolution) already occurred at least once and ⊖ otherwise.**α-B.1.b** Military troops in these provinces must retreat.**α-B.1.c** Only the fortress of *Wąrszawa* is taken by the rebels.**α-B.1.d** Put an *A* ⊖ of POLONIA with general *Kościuszko* (× D 3.4.4 [Event VII-9]) (lasting until the end of the game) in a revolted province.**α-B.2** The minor country POLONIA is created anew with these troops and provinces.**α-B.3** POLONIA is looking for a foreign help. The following countries must immediately accept or refuse, in order:**α-B.3.a** FRA, if event VII-5 (The French Revolution) already occurred at least once.**α-B.3.b** FRA or SUE, whichever last got POLONIA as a special EW due either to event part VI-11.α (Polish Victory) or §β-I.3 of event part VI-1.β (Polish Civil War)**α-B.3.c** FRA, SUE, AUS, PRU.**α-B.4** The country who accepts to help POLONIA immediately declares war (with a CB) against all the countries owning a national province of POL.**α-B.4.a** This is just one declaration of war, not one per enemy country. Hence the Stability loss is only 1.**α-B.5** POLONIA is put in EW of its helper.**α-C Diplomatic Phase****α-C.1** The MAJ who accepted to help POLONIA must immediately give to POLONIA all the national provinces of POL it currently owns.**α-C.1.a** There is no loss of VP for these provinces.**α-D Administrative Phase****α-D.1** POLONIA get reinforcements as a regular minor based on the income of provinces it owns and control (as per normal rules).**α-E Military Phase****α-E.1** Troops of POLONIA stacked with *Kościuszko* are always veterans.**α-F Peace Phase****α-F.1** *Revolt* may spread only in national provinces of POL but may do so even through frontiers of major countries.**α-F.2** POLONIA will not sign a white or unfavourable peace in this war.**α-F.3** If there are no more *Revolt* and no more troops of POLONIA, the minor is destroyed again.**α-F.3.a** Ownership of provinces goes back to whoever owned them at the beginning of the war.**α-F.3.b** Other countries involved in the war may either sign a white peace or continue fighting.**α-F.4** If POLONIA and its allies sign a favourable peace, all provinces annexed at the peace must be national provinces of POL and are given to POLONIA.**α-F.4.a** POLONIA becomes a permanent EW of its protector as described in event part VI-11.α (Polish Victory).**α-F.4.b** POLONIA should now own: the four initially revolted provinces, the provinces given by the protector and the provinces annexed at the peace.**α-F.4.c** This may happen also if the *Revolt* and troops were crushed but the protector kept on fighting and won the war.**β Commonwealth's Revival**

Date: not historic.

**β-G Administrative Phase****β-G.1** POLONIA receives the general *Kościuszko* (× D 3.4.4 [Event VII-9]) for the rest of the game.**β-G.2** Until the end of the game, each turn where there is a declaration of war against POLONIA, roll for two *Revolt* in POL.**β-G.2.a** The *Revolt* may happen in any country (not only POLONIA) and their force is rolled at random.**β-G.2.b** The *Revolt* must occur in national territory of POL. If they fall out of it, re-roll another *Revolt*. However, both *Revolt* may occur in the same province.**β-G.2.c** If event VII-5 (The French Revolution) occurred at least once in a previous turn, roll four *Revolt* instead of two.**β-H Military Phase****β-H.1** Troops of POLONIA stacked with *Kościuszko* are always veterans.**β-H.2** *Revolt* created by this event (and their fortresses or troops) are allied with POLONIA.**β-H.2.a** *Revolt* counters are limited supply sources for the troops of POLONIA (only, not its allies).**β-I Peace Phase****β-I.1** The *Revolt* may only spread in national provinces of POL but can do so through national borders of major countries.

**β-I.2** Revolted provinces count as if controlled by POLONIA for the peace procedure.

## VII-10 INDEPENDENCE OF THE MAMELUKS IN EGYPT RistoMod

Date: 1795 (Bonaparte in Egypt).

### A Condition:

**A.1** If the current monarch of TUR has an ADM of at least 8, he can choose to cancel the event.

A.1.a In this case, place a *Revolt* (with random strength) in all the former provinces of ÆGYPTUS.

### B Event Phase

**B.1** ÆGYPTUS is recreated. It owns all the provinces it had at the start of the game that now belong to TUR.

B.1.a Its basic forces are ⚡, LD and it can use all its counters.

B.1.b TUR loses VP for the provinces lost.

### C Diplomatic Phase

**C.1** TUR has a temporary free CB against ÆGYPTUS for this turn only.

### D Peace Phase

**D.1** If TUR achieves an enforced unconditional victory over ÆGYPTUS during a war caused by this event, it can annex it again, gaining VP for the provinces annexed.

### E Lasting Effects

**E.1** FRA, ANG, HOL and HIS have a permanent CB against ÆGYPTUS.

E.1.a If several of them use this CB without being formally allied, they can fight inside the territory of ÆGYPTUS and **Bassin Levantin** even if not at war elsewhere.

**E.2** If, at the beginning of a peace phase, one of them controls the capital and half the other provinces of ÆGYPTUS, ÆGYPTUS becomes a permanent VA of the major occupying it and no diplomacy is possible on it.

E.2.a If the major later signs an unfavourable peace, one peace condition can be to turn back ÆGYPTUS into a regular normal country who then becomes neutral.

E.2.b It is also always possible to wage war against ÆGYPTUS and “steal” the special VA status by occupying it.

**E.3** From now on, FRA, ANG and HOL can declare war on ORDO HOSPITALIS at normal cost (instead of the one mentioned in section XIV.13.1.2 (Ordo Hospitalis)) and they can annex the capital province of ORDO HOSPITALIS thus destroying the country.

## VII-11 REVOLT IN INDONESIA (×\*) Risto

Date: No precise date.

### A Event Phase

**A.1** Place one *Revolt*⊖ and one *Revolt*⊕ in two randomly chosen COL/TP in areas **JAVA**, **SUMATRA**, **BORNÉO** and **CÉLÈBES**. Both *Revolt* can occur in the same place. Roll on table XVI.3 (Revolt table: target area and strength) for the control of these *Revolt*.

## VII-12 SALE OF CORSICA Risto

Date: 1759.

### A Condition:

If **Corsica** does not belong to either CORSICA or GENUA, treat this as a *Revolt* in **Corsica** (roll for strength as usual) and mark off.

### B Event Phase

**B.1** **Corsica** is for sale. Each player must immediately make a secret bid for it and the highest bid annexes **Corsica**. Only the winning bid is actually paid. If it bids at least 1 ⚡, FRA receives a bonus of 50 ⚡ for its bid.

### C Diplomatic Phase

**C.1** If **Corsica** is currently occupied by foreign troops, the owner of those troops must either declare a war to the new controller of this province profiting from a CB, or withdraw its forces as per peace process.

## VII-13 REVOLT OF PUGATCHEV RistoMod

Date: 1773-1774.

Duration: Until the end of the civil war.

### The initial revolt

### A Event Phase

**A.1** A civil war erupts in RUS. The rebels are controlled by HIS, or by SUE if HIS is allied to RUS.

**A.2** Place a *Revolt*⊖ in the former provinces of the following minor countries currently belonging to RUS: CAZAN, ASTRACAN, TARTARIA, CRIMEA and all ROTW provinces adjacent to RUS European territory that have RUS COL/TP in them. Roll for two additional *Revolt* in RUS. If the result is outside RUS territory, ignore and do not re-roll.

**A.3** Place a revolt ⚡ and general *Pugachev* in any revolted province (he can either lead the ⚡ or a *Revolt*).

A.3.a The class of rebels armies is the same as RUS.

### B Diplomatic Phase

**B.1** Countries adjacent to RUS can make a foreign intervention in any side of the war.

### C Administrative Phase

**C.1** The rebels roll for reinforcements in offensive status during each turn of the civil war.

C.1.a The modifier for reinforcement is computed based on the income of the provinces in *Revolt*, even if the rebel does not control the fortress.

### D Military Phase

**D.1** All rebel units can use *Revolt* counters as supply bases in the same way as fortresses as long as there are no non-defeated enemy units present at the moment supply is needed.

### E Peace Phase

**E.1** The war end either by suppressing all the *Revolt* or if the *Revolt* cause the government to be overthrown.

**E.2** There is no extension of *Revolt* if the rebels suffer a major defeat or if there is no more ⚡ counter of the rebels.

### Siberian revival

### F Administrative Phase

**F.1** Starting from the third turn of the revolt, if a rebel army is located during this phase in any former province of CAZAN, ASTRACAN, or TARTARIA, the rebels receive the SIBERIA ⚡ as extra reinforcement this turn.

F.1.a This extra reinforcement can only happen once in the war.

F.1.b This army can freely stack with the rebels or exchange LD in order to replenish one or another.

## VII-14 POTECHKIN Risto

Date: 1783-1791.

Duration: as long as *Potemkin* (*Григорий Александрович Потёмкин-Таврический*) remains the excellent minister

### A Condition:

RUS can refuse this event if it so wishes. In that case mark off as played.

If *Peter II* rules Russia, RUS may choose to postpone the event for one turn.

<div>[E]514</div> <div>Political Events of Period VII</div> <p><b>A.1</b> RUS can freely dismiss <i>Potemkin</i> at the end of any following monarch survival phase and the event terminates.</p> <div>B Event Phase</div> <p><b>B.1</b> RUS receives an excellent minister <i>Potemkin</i>, with values 9/8/8. He will last for a random length for Minister, see event E-2 (Excellent ministers).</p> <div>C Administrative Phase</div> <p><b>C.1</b> RUS basic force is increased by <math>\mathbb{F}\ominus</math> during every turn RUS is engaged in a war and <i>Potemkin</i> is in charge.</p> <div>D Military Phase</div> <p><b>D.1</b> As long as this event is in effect RUS receives an additional bonus of +1 to all attempts to suppress <i>Revolt</i>.</p> <div>VII-15 WAR IN CRIMEA (×2) PBnew</div> <div>TODO: Add something about Orlov's revolt in the first occurrence of the event. Plus probably something to allow RUS to go out of Black sea and help the Greek revolt.</div> <p>Date: 1768-1774, 1787-1792.</p> <div>A Event Phase</div> <p><b>A.1</b> RUS has a Free CB against TUR at this turn or the next one.</p> <div>VII-16 WAR IN FINLAND PBnew</div> <p>Date: 1788-1790.</p> <div>A Event Phase</div> <p><b>A.1</b> SUE has a free CB against RUS if RUS owns at least one province in <i>FINLAND</i>.  <b>A.2</b> RUS has a free CB against SUE if SUE owns at least one province in <i>FINLAND</i> or on the <i>BALTIC SEA</i> (between <i>Ingermanland</i> and <i>Kurland</i> included).</p> <div>VII-17 FORWARD TO THE BALKANS PBnew</div> <p>Date: No precise date.</p> <div>A Event Phase</div> <p><b>A.1</b> AUS has a Free CB against TUR at this turn or the next one.</p> <div>VII-18 WARS IN INDIA (×3) PBnew</div> <div>A Condition:</div> <p><b>A.1</b> If event VI-17 (The Last of the Great Mughals) did not happen yet, apply it instead.  <b>A.2</b> Otherwise, apply Wars in India (VI-18) but with the following die roll:  A.2.a 1-4 = A) War between MOGOLIS IMP. and PERSIA. Apply Mogolis Imp.-Persia War (VI-18.α).  A.2.b 5-6 = B) War between DURRANIS IMP. and PERSIA. Apply both Afghan Empire (VI-18.β) and Fall of the Persian Safavids (VI-18.γ).  A.2.c 7-10 = C) War between DURRANIS IMP. and MOGOLIS IMP.. Apply both Afghan Empire (VI-18.β) and Rise of the Marathi (VI-18.δ). This case may not happen before either case A above, re-roll another case if needed.</p> <div>VII-19 (1) VASSALISATION OF HANOVERE Risto</div> <div>A Event Phase</div> <p><b>A.1</b> Same event as event VI-6 (Vassalisation of Hanovere).  <b>A.2</b> If already occurred, apply event VII-20 (William Pitt).</p>	<div>Political Events of Period VII— master – 2016-04-14</div> <div>[E]515</div> <div>VII-20 WILLIAM PITT Risto</div> <p>Date: 1757-1761.  Duration: as long as <i>Pitt (William, 1st Earl of Chatham)</i> remains the excellent minister</p> <div>A Condition:</div> <p>ANG can refuse this event if it so wishes. In that case mark off as played.  <b>A.1</b> ANG can freely dismiss <i>Pitt</i> at the end of any following monarch survival phase and the event terminates.</p> <div>B Event Phase</div> <p><b>B.1</b> ANG receives an excellent Minister <i>Pitt</i>, with values 9/8/8. ## Chapter XXIV

### XXIV.1 Generic Leaders

**A Neutral leaders** Here is the list of all *random leaders*:

② 1 × A 1.1.1, ② 10 × K 4.2.2, ② 11 × L 1.1.2, ② 12 × M 3.2.1, ② 2 × B 3.4.2, ② 3 × C 2.4.4, ② 4 × D 4.1.3, ② 5 × E 3.2.3, ② 6 × F 2.3.4, ② 7 × G 2.2.2, ② 8 × I 2.2.1 -1, ② 9 × J 3.3.3

② 1 ± A 4.3.4, ② 10 ± J 4.2.2, ② 11 ± K 2.2.1, ② 12 ± L 1.3.2, ② 2 ± B 1.1.1, ② 3 ± C 2.2.2, ② 4 ± D 2.4.3, ② 5 ± E 2.2.1, ② 6 ± F 1.2.1, ② 7 ± G 4.4.4, ② 8 ± H 3.2.2, ② 9 ± I 4.1.2

**B Mercenaries** ② 1 × B 2.2.3, ② 2 × C 3.2.2, ② 3 × D 4.2.4, ② 4 × B 3.2.3, ② 5 × B 4.2.2

② 10 <R> B 2.4.3, ② 12 <R> B 2.1.2, ② 9 <R> B 4.2.3

② 6 <R> B 5.1.1, ② 7 <R> B 2.3.3, ② 8 <R> B 3.1.2

### XXIV.2 Short list of all minor countries

**A Countries of Europe** These are the regular countries of Europe:

Ⓒ ÆGYPTUS	† DANIA	Ⓒ MAURETANIA	† SICILIÆ
Ⓒ ALGERIA	Ⓒ DON CASSACKIA	† MAZOVIA	Ⓒ SYRIA
† ALSATIA	† D.S.M. THEUTONICORUM	Ⓒ MESOPOTAMIA	Ⓒ TARTARIA
Ⓒ ARABIA	† FRATRES MILITIÆ CHRISTI	† MOGENTIUM	† TERRÆ DEPRESSÆ
Ⓒ ASTRACAN	† FRIBURGENSIS	‡ MOLDAVIA	† TOSCANA
† BAVARIA	† GENUA	† MONTE FERRATO	† TRANSILVANIA
† BOHEMIA	‡ GEORGIANI	† MUTINA	† TREVORUM
† BRANDENBURGUM	Ⓒ GRANADA	† ORDO HOSPITALIS	Ⓒ TRIPOLIS
† BRUNSVICUM	† HANOVERE	† PALATINATUS	Ⓒ TUNESIA
† BURGUNDIA	† HANSA	† PARMA	† TURINGIA
Ⓒ CAZAN	† HASSIA	Ⓒ PERSIA	‡ UKRAINA
† CLIVIA	†-† HELVETIA	‡ PSKOVE	†/† UNITED STATES
† COLONIA	† HUNGARIA	‡ REZANE	‡ WALACHIA
† CORSICA	† LEODIUM	† SABAUDIA	† WESTFALLIA
Ⓒ CRIMEA	† LOMBARDIA	† SANCTA SEDES	† WIRTEMBERGA
† CURLANDIA	† LOTHARINGIA	† SAXONIA	
Ⓒ CYRENAICA	† LUCA	† SCOTIA	

**B Minor/Major countries** These countries are minor countries, but can also be major countries: † HABSBUURGUM, † HOLLANDIA, † POLONIA, † PORTUGALLIA, † SUECIA, † VENETIA

**C ROTW** The countries of the ROTW are:

Ⓒ ACEH	Ⓒ CHINA	Ⓒ INCA	Ⓒ SIBERIA
Ⓒ ADEN	Ⓒ DURRANIS IMP.	Ⓒ IROQUOIS	Ⓒ SUDANIA
Ⓒ AYMAN	Ⓒ GUZARATE	Ⓒ MOGOLIS IMP.	
Ⓒ AZTECA	Ⓒ HYDERABADA	Ⓒ MYSURIA	
Ⓒ BISINAGAR	Ⓒ IAPONIA	Ⓒ ORMUS	

**D Splitting from a major country** These countries can gain their independence:

† BELGICA	† FINLANDIA	† LIVONIA	† PRIMA HOLLANDIA
† CATALANA	† HIBERNIA	† NORVEGIA	† PRIMA UKRAINA
† EASTERN PRUSSIA	† LITUANIA	† POMMERANIA	

**E Habsburg autonomous countries** The following minor vassals can be created by AUS\*: † HABSBUURGENSIS BOHEMIA, † HABSBUURGENSIS HUNGARIA, † HABSBUURGENSIS LOMBARDIA, † HASBUURGENSIS SICILIÆ

**F Other entities** These may exist to some extent: Ⓒ BARBARIA, † FIDELIS REGI, † HUGUENOTIS, † SANCTA LEGA, † GERMANUM IMPERIUM, † PARLIAMENT, Ⓒ PIRATÆ, Ⓒ REBELLIS, † SRI

**G** Some not-so-evident countries names:

ÆGYPTUS Egypt	LEODIUM Liège	SCOTIA Scotland
CLIVIA Kleve/Berg	LOTHARINGIA Lorraine	TERRÆ DEPRESSÆ Low countries
DON CASSACKIA Cossacks of the Don	MAURETANIA Morocco	SICILIÆ Naples
FRATRES MILITIÆ CHRISTI Teutonic Knights	MESOPOTAMIA Iraq	AYMAN Oman
D.S.M. THEUTONICORUM Livonian Knights	MOGENTIUM Mainz	GUZARATE Gujarat
FRIBURGENSIS Baden	MUTINA Modena	BISINAGAR Vijayanagar
HELVETIA Switzerland	ORDO HOSPITALIS Knights (of Malta)	IAPONIA Japan
	REZANE Ryazan	DURRANIS IMP. Afghanistan
	SABAUDIA Savoy	
	SANCTA SEDES Papacy	

## XXIV.3 Minor countries of Europe

ÆGYPTUS<sup>®</sup>

Sultanat of Cairo

**Control:** TUR, VEN, POL, HIS, AUS, ANG, POR, FRA, SUE, RUS, HOL, PRU.

RM: 12, SUB: 20, MA: 1, EC: 1, EW: 1, VA: 8, AN: 15

Fidelity: 8

**Basic forces:** 2A<sup>+</sup>, Unknown leader Caliph.**Counter limits:** 2 A, F, 2 LD/ND, 2 LDE/NDE.**Basic reinforcements:** 1 LD/ND, 1 LD.**Military doctrine:** Islam, class II.Provinces: **Tobrouk** [0], **Nil** [6], **Delta** [3], **Nubie** [1], **Égypte** [9], **Sinai** [0], **Cataractes** [2]

Other income: • Commercial center [70]

Income: 91

If not at war, VEN earns the income of the commercial center.

Before subevent I-13.α (War in Indian Sea), cannot use its F. Afterwards, 1 A is lost and basic forces switch to F<sup>+</sup>, A<sup>+</sup>, LD until destruction by TUR.Knows **Mer rouge** at the beginning of the game.

Has a mandatory defensive alliance with SYRIA and answers it with limited intervention. May go in SYRIA even if reinforcement where taken in defensive attitude.

May be entirely destroyed by TUR if all its armies are destroyed and the capital is taken.

[BLP] If destroyed by TUR, *Selman Reis* becomes a Turkish .

May be recreated by event VII-10 (Independence of the Mameluks in Egypt).

*Selman Reis* (سلمان ريس): <PR> [T4–T9] D 4.3.3 — Egyptian commander who later served the Ottomans.

Expelled the Portuguese from the Red sea and went as far as Sumatra. Failed to retake Diu.

*Al-Ashraf Qansuh Al-Ghawri* (الأشرف قانصو الغوري): A 3.1.4 ↔ *Al-Ashraf Tuman Bay II* (ÆGYPTUS) —

Second-to-last Sultan of the Burji dynasty. Tried to repulse the Portuguese from the Red Sea and the Indian trade. Died loosing at Marj Dabiq during the Turkish conquest.

*Al-Ashraf Tuman Bay II* (الأشرف طومان با): A 5.1.4 ↔ *Al-Ashraf Qansuh Al-Ghawri* (ÆGYPTUS) — Last Sultan of the Burji dynasty. Died loosing at Ridaniya during the Turkish conquest.ALGERIA<sup>®</sup>

Barbary regency of Algeria

**Control:** TUR, FRA, HIS, SUE, AUS, POR, PRU, POL, RUS, ANG, HOL, VEN.

RM: 6, SUB: 40, MA: 1, EC: 1, EW: 2, VA: 3, AN: 10

Fidelity: 15, Geopolitics: TUR +1

**Basic forces:** A<sup>+</sup>, F<sup>+</sup>, P<sup>+</sup>.**Counter limits:** A, F, 3 LD/ND, P.**Basic reinforcements:** 1 LD/ND, 1 P<sup>+</sup> [BLP] if there is no *Præsidio* in **Algérie**. **Reinforcement bonus:** +1 during periods I and II.**Military doctrine:** Islam, class II.Provinces: **Atlas** [1], **Oran** [4], **Kabylie** [2], **Algérie** [5], **Aurès** [1], **Annābah** [4]

Income: 17

If turkish vassal while *Barbaros* is in play, this admiral may become ottoman.*Oruç Reis* (عروج بربروس): <Pm> [T1–T5] C 5.1.4 — Elder brother of Barbaros, died prematurely in 1518.

Corsair who took Algiers and seek protection of the Ottoman.

*Barbarossa* (خير الدين): <Pm♥\*> [T5–T11] A 5.4.5 ↔ *Barbaros* (TURCIA) — Bey of Algiers, famous corsair.

Raided Western Mediterranean, Italy and Spain for years, forged the Algerian alliance with Turkey.

ALSATIA<sup>+</sup>

Dekapolis and Duchy of Alsace

**Control:** HIS, AUS, POL, FRA, HOL, ANG, PRU, VEN, POR, SUE, RUS, TUR. [HRE]

RM: 8, SUB: 50, MA: 1, EC: 2, EW: 4, VA: 8, AN: \*

Fidelity: 16, Geopolitics: HIS +1

**Basic forces:** 1 LD.**Counter limits:** 1 LD.**Basic reinforcements:** None.**Military doctrine:** Latin, class III.Provinces: **Alsace** [8]

Income: 8

May be annexed by FRA due to events.

ARABIA<sup>®</sup>

Territory of the Hedjaz

**Control:** TUR, FRA, HIS, POR, PRU, POL, RUS, AUS, ANG, VEN, HOL, SUE.

RM: 4, SUB: 50, MA: 1, EC: 1, EW: 2, VA: 3, AN: 10

Fidelity: 17

**Basic forces:** LD.**Counter limits:** 2 LD.**Basic reinforcements:** None.**Military doctrine:** Islam, class II.Provinces: **Jordanie** [3], **Nefud** [1], **Arabie** [3]

Income: 7

ASTRACAN<sup>®</sup>

Khanate of Astrakhan

**Control:** TUR, FRA, SUE, PRU, HIS, POR, ANG, VEN, HOL, AUS, POL, RUS.

RM: 6, SUB: 40, MA: 1, EC: 3, EW: 4, VA: 3, AN: 10

Fidelity: 14

**Basic forces:** A<sup>+</sup>.**Counter limits:** A, LD.**Basic reinforcements:** None.**Military doctrine:** Islam, class I.Provinces: **Terek** [2], **Astragan** [8]

Income: 10

BAVARIA<sup>+</sup>

Duchy of Bavaria

**Control:** HIS, FRA, HOL, VEN, POR, ANG, SUE, AUS, RUS, TUR, PRU. [HRE]

RM: 10, SUB: 20, MA: 2, EC: 4, EW: 6, VA: \*, AN: \*

Fidelity: 16, Geopolitics: FRA+1

**Basic forces:** A<sup>+</sup>, LD.**Counter limits:** A, 3 LD.**Basic reinforcements:** LD.**Military doctrine:** Latin, class III.Provinces: **Bayern** [9]

Income: 9

After dynastic action C-4 has been played, HIS has a +1 geopolitical bonus for diplomatic actions on Bavaria.

May use two A during event IV-A (Thirty Years' War) and event IV-1 (1) (Bohemian Revolt).

May permanently gain a second A, **Oberpfalz** and an electorate as a consequence of event IV-A (Thirty Years' War).*Mercy* (Franz Freiherr von): ✕ [Event IV-A] A 2.4.4 — Great defender of Bavaria during the Thirty Years War. Fought the French and was killed at Nördlingen.*Tilly* (Johann t'Serclaes von): ✕ [Event IV-1] A 4.4.4 -1 — A great catholic commander of the Bohemian revolt and Thirty Years War. Victorious at White mountain, defeated at Breitenfeld, deadly wounded at Rain.*Maximilian II.* (Maximilian Emmanuel): [T39–T44] A 3.2.3 — Elector of Bavaria. Took part in the defense of Vienna, captured Belgrade. Governor of the Spanish Netherlands during the League of Augsburg, he witnessed the fire of Brussels. During the War of Spanish Succession, he sided with France.

BOHEMIA†

Electorat of Bohemia

**Control:** HOL, ANG, FRA, VEN, PRU, POL, POR, RUS, HIS, SUE, TUR, AUS. Elector

RM: 15, SUB: 20, MA: 1, EC: 3, EW: 3, VA: 5, AN: 15

Fidelity: 15

**Basic forces:** A⊕.**Counter limits:** A, 2 LD.**Basic reinforcements:** LD.**Military doctrine:** Latin, class III.Provinces: **Bohème** [14], **Silésie** [6], **Morava** [5], **Lausitz** [4]

Income: 29

Electorate of the HRE.

May be inherited by AUS\* due to event I-C (Habsburg Bohemia). May become independent again after event IV-A (Thirty Years' War).

BRANDENBURGUM†

Electorate of Brandenburg

**Control:** POL, ANG, FRA, HOL, HIS, AUS, POR, VEN, RUS, SUE, TUR. Elector

RM: 3, SUB: 70, MA: 2, EC: 3, EW: 4, VA: \*, AN: \*

Fidelity: 16

**Basic forces:** A⊖, LD, 1 ×.**Counter limits:** A, 2 LD.**Basic reinforcements:** LD or 2 LD after V-13.**Military doctrine:** Latin, class III.Provinces: **Brandenburg** [11], **Altmark** [9], **Neumark** [5]

Income: 25

Fidelity becomes 9 after event IV-11 (The Great Elector Friedrich-Wilhelm of Prussia).

Electorate of the HRE.

After event IV-11 (The Great Elector Friedrich-Wilhelm of Prussia), base forces become A⊕, LD, 1 ♢, 1 × and counter limits become 2 A and 5LD.

After event V-13 (Creation of the Kingdom of Prussia), base forces become 2 A⊕, 3 ♢, 1 × base reinforcements are 2 LD, and counter limits become 3A and 5LD.

Uses the **PRUSSIA** counters, with army class III instead of IV.

BRUNSVICUM†

10	7	8	9	9	9	-1 col. if former<base

## Monarchs' Military Skills

1d10		Average value as a leader									
MIL	1	2	3	4	5	6	7	8	9	10	
3	0	0	0	0	0	0	0	1	1	1	
4	0	0	0	0	0	1	1	1	1	2	
5	0	0	1	1	1	1	1	1	2	3	
6	0	1	1	1	1	1	2	2	3	3	
7	0	1	1	1	1	2	2	2	3	3	
8	1	1	1	1	2	2	3	3	4	4	
9	1	1	1	1	2	2	3	3	4	5	

Siege value: 0, unless \* is present ⇒ 1 + mod.

## Modifier for each value

1d10	1	2-3	4-7	8-9	10	Roll 1d10+?
Modifier	-2	-1		+1	+2	Final value is min 0, max 6

\* = POL +1 in Manoeuvre/Shock; \* SUE +1 in Fire/Shock

## Periods

I Turns 1-6 (6 turns)  
II Turns 7-14 (8 turns)  
III Turns 15-25 (11 turns)  
IV Turns 26-34 (9 turns)  
V Turns 35-42 (8 turns)  
VI Turns 43-52 (10 turns)  
VII Turns 53+ (<10 turns)

## Results (1d10+mod-2d10)

<0 Failed, missionary killed  
≥2 one level gained  
≥5 goes to AT

## Overseas CB not coming from events

- TUR vs. all Christian countries in periods II and III;
- Permanent CB against any country that has the monopoly of the player's CTZ;
- Permanent CB against any country that is in *Trade Refusal* against him;
- VEN vs. TUR (both ways) as long as the *BALKANS* are troubled;
- HIS (before III-1 (1)), HOL, FRA, ANG have a permanent CB against owner of CC Atlantic;
- HIS against powers having TP or COL in *SPANISH WORLD* (free) or in *CARIBBEAN*;
- Any Protestant country against HIS and POR (or PORTUGALLIA) during periods I to IV;
- HOL against catholics having COL/TP in Asia in period III and IV after creation of the VOC;
- All Christian countries have a permanent CB against the *Barbaresque* countries;
- All MAJ have a permanent CB against minor countries from the ROTW (excepted ORMUS);
- POR with a Vice-Roy, against ROTW minor countries (except ORMUS) (free CB).

## Permanent overseas CB

## Reactions immediately after a declaration of war

- Call for help by a MIN at war of its Patron
- Call for a MAJ Ally

- Use of an offensive or defensive alliance

- Signing an Alliance for Intervention

- CB to transform an Overseas War into a full-blown war (free CB)

## Reactions at any turn

- Begin/End a limited intervention of a MIN in MA, EC, EW or VA
- Begin/End a limited intervention of a country from the ROTW with which one has AT
- Call for full intervention of one of its own minor in EW; requires a test, not permitted in Overseas Wars
- Full implication of one of its VA, no further than 12 MP or 4 sea zones
- Full implication of one of the VA of the enemy, no further than 12 MP or 4 sea zones
- Association of two alliances at war against the same third alliance; not on the first turn
- Declaration of War against an alliance that is at war against the same third alliance as the declaring country (this is done with a CB and is not allowed in Overseas Wars)
- Armistice in a war continuing from a previous turn
- CB to transform a continuing Overseas War into a full-blown war (normal CB)
- Foreign Intervention in a Religious War, or a Civil War
- Declaration of complete Trade Refusal against powers that are at war with the reacting power

## Diplomacy modifiers

- +? DIP value of his monarch
- +0/+2/+5 Investment (20, 50, 100, 100, 100)
- +1 per other player supporting the action
- +1 RM or SUB box (controlling player only)
- +2 MA or EC box (controlling player only)
- +3 EW, VA or AN box (controlling player only)
- +1 same religion
- 4 different religion (until the end of Religious Enmities)
- 2 between Islam and Christianity (after the end of Religious Enmities)
- 3 For TUR against some *Barbaresque* countries
- +1 bonus of player's country as per the diplomatic marker of the minor country
- 3 on POLONIA (not applicable if Absolutism was established, or due to some events)
- +? as per applicable event
- +N if the MAJ gives a province of value N to the minor country this turn
- 1 for each province of the minor country owned by the MAJ.
- 3 if the player is or was at war (full or limited) against the minor during the current or preceding turn

## Entry in war of a minor country in EW on 6+

- +? political bonus of the MAJ on the country
- +2 if the enemy has a common border with the MIN
- 2 if the closest enemy province is 6 MP or more from the minor territory, and more than 2 sea zones away from a minor coastal province
- 2 if the religion of all enemies is the same as that of the minor (until the end of Religious Enmities).
- 3 for POLONIA (not applicable if Absolutism was established, or due to some events)
- 4 if the minor country is already involved in a different war

## Modifiers to the diplomacy die-roll

- +0/+2/+5 Investment (20, 50, 100, 100, 100)
- +FTI (the one applicable in the ROTW)
- +? Manoeuvre of one emissary (3 for Mission; Bonus+Manoeuvre for Missionary)
- +2 if same religion (TUR with AYMAN, ADEN, GUZARATE, and SUDANIA)
- 2 for Christian on Muslims (until the end of Religious Enmities)
- +2 in defence if the MAJ has already in AT

## Diplomacy on ROTW nations

## Income, Reinforcements, General Expenses

T2

## Foreign Trade Income

Blocked Trade	1	2	3	4	5
≤49	30	60	90	120	150
50-99	27	54	81	108	135
100-149	24	48	72	96	120
150-199	21	42	63	84	105
200-299	18	36	54	72	90
300-399	15	30	45	60	75
400-549	12	24	36	48	60
550-699	9	18	27	36	45
700-899	6	12	18	24	30
900-1099	3	6	9	12	15
≥1100	1	2	3	4	5

## Domestic Trade Income

Land Income+?	1	2	3	4	5
1-40	1	2	3	4	5
41-80	3	6	9	12	15
81-120	5	10	15	20	25
121-160	7	14	21	28	35
161-190	9	18	27	36	45
191-220	12	24	36	48	60
221-240	15	30	45	60	75
241-250	18	36	54	72	90
≥251	20	40	60	80	100

\* = +20 × sides of Cereals MNU

## Basic blocked trade per country: FRA 200, ANG 100, HOL, SUE 50

HIS 50, or 100 if owns 2 of: BURGUNDIA, SICILIE, HOLLANDIA  
AUS 50, or 100 if owns 2 of: BURGUNDIA, BOHEMIA, HUNGARIA  
RUS 50 if owns 3 Khanates (or Cossacks) countries  
TUR 100, or 200 if owns 2 of: HUNGARIA, SYRIA, ÆGYPTUS

NB: a country is owned when half (round up) its provinces are owned.

## Extra blocked trade: Vassals, Trade refusals, wars, events.

Wine and Cloth MNU: reduces extra blocked trade by 50 × sides

If UNITED STATES exists and is at peace, up one line in the table

## Reinforcements of Minor countries Fully at War

1d10 +mod.	Minor country attitude			
	Offensive	Defensive	Naval	Leader
≤1	1LD	1LD	de	0

\* -1 LD after reform.

LD per turn

ND per turn/max ND

## Cost of Fortresses

Level	Cost	Required Technology	Maint. EU/ROTW
Miss.	EU/ROTW	NA/one missionary	NA/1
Fort	(25)/25 or COL level 6	NA/1	1/2
1	25/50	Medieval	2/4
2	*50/(100+)	Renaissance	*3/6
3	**75/(150+)	Baroque	**4/8
4	100/NA	Turn 40&Man.	5/NA

\* = x2 before Arquebuse \*\* = x2 before Turn 40

† = in ROTW, only arsenal may be at level 3 or more.

† = 10/20

-1 ND in construction limit per side

Explorer, Conquistador: 1d10, 1-6 → 0, 7-10 → 1. Blind bid

Generals: 1d10, 1-4 → 0, 5-6 → 1, 7-8 → 2, 9-10 → 3. Blind bid

## Bankruptcy Roll

1d10 +mod.	Stability lost	TF lost	Actions lost
≤1	-2	2†	2TFI, *
2-5	-2	1†	2TFI, *
6-10	-1	1†	1TFI, *
11-14	-1	1	1TFI, *
15-17	-1	0	1TFI
18+	0	0	0

## Test: 1d10+ADM Monarch's Stability

+1 has a Stock Exchange

-3 if larger than 100 Small Bankruptcy

-1 per MNU counter above limit

± per event (HIS: +1 if Expulsions)

## Types of Bankruptcy

Small (up to 200 National Loan): test (-5VPs?)

Major (all National Loans or up to 200 International Loan): lose 15 VP, apply the worst result

Complete (all Loans, RT-0): lose 30 VP, automatically worst result, DTI -1, counts as 2 Bankruptcies

## Maintenance of Minors

- Minors maintain only basic forces.
- VA Controller can maintain fortress.
- Controller of Minor in Full war can pay for extra maintenance.
- non-VA at war maintain their fortresses.
- At war without MAJ: maintain all forces.

## Recruitment of Minors

- At peace: rebuild basic forces.
- Intervention or Overseas: no more than basic forces
- MA or less: basic reinforcements (BR)
- EC, EW: BR+1D
- VA: Patron can buy up to BR+2D
- Full war: Reinforcement roll.
- Free Campaigns Passive each round Intervention/Overseas: 1 active/turn (Exc. VA)
- Full war: 1 active/round + reinforcements
- Always: Controller may pay for more.

## Administrative actions of minors

- Actions are at medium investment.
- FTI of minors (periods I-III/periods IV-VII):
- 2/3 ROTW countries, HANSA, SCOTIA and POLONIA
- 3/4 VENETIA, PORTUGALLIA, GENUA, DANIA, SUECIA
- HOLLANDIA DTI: 4
- DTI: same as FTI for others.
- PORTUGALLIA (unless HIS vassal)
- Before III-6, 1 TFI, 1 COL, and 1 TP
- After III-6, 1 TFI, 1 COL or 1 TP
- After VI-7, 1 TFI or 1 COL or 1 TP (VENETIA)
- Periods IV-V: 1 TFI
- Periods VI-VII: as others

## Other minor countries

use actions of patron/other minor countries for their actual level (not mandatory)

## Administrative Actions, Exchequer test, Piracy and Economy

T3

Administrative Actions									
Die	-4	-3	-2	-1	0	1	2	3	4

<b>Exceptional levies:</b>	Stability -1 (unless enemy forces on National Territory), get (1d10+3×Stability+ADM)×10 ⚡		
<b>Enhance FTI or DTI or Develop a MNU</b>	30/50/100 +1/+3	<b>+S</b> Stability <b>-1</b> TUR and POL <b>-1</b> RUS before S: Petersburg <b>-2</b> HIS after Gold flow <b>+2</b> ANG after 1700 (turn 43)	
<b>Enhance technology (land or naval)</b>	30/50/100 +1/+3	Relevant MNU: Metal for Land, Instruments for Naval <b>+?</b> Technological lateness (#boxes needed to reach the minor marker-5) <b>-1</b> TUR for some Technology levels, depending on Reforms done Results S, S* = +2 Tech. boxes, Result 1/2 = +1 Tech. box (no test under FTI) Result S* = +2 Tech. boxes, S = +1 Tech. boxes (includes 1/2 if test under FTI successful)	

Random Piracy and Economy		Exotic resources variations		STZ Cap des tempêtes: America, STZ Côte du Pérou: Asia, STZ Mer des Canaries: Asia & America.	
condition	rare	low	medium	large	high
Crisis	0	0	-1	-1	-1
Normal	+2	+1	+1	0	0
Boom	+2	+2	+2	+1	+1

• Accumulate Piracy from Random piracy and Economical events before rolling  
• **Piracy ground attacks:** If 1d10+number of pirates sides+Shock of Leader ≥ 10, a pirate counter (⊕) if any) targets a random COL/TP in the STZ.  
• Use same die roll for economy and piracy  
• For each resource, roll 1d10+price. If result ≤ low threshold, add +1 to variation; if result ≥ high threshold, add -1 to variation.  
• Inflation increase: 1 box if 1d10 ≥ 7 (≥ 3 after Gold flow), plus some other cases.

## Movement, Attrition

T4

Supply segment		Causes for attrition		Discoveries and Attrition		Results	
Weak land supply:	6MP ≤ LoS ≤ 12MP except LD in ROTW	LoS through/in Desert	SoS not owned, nor allied (exc. Desert)	By a fleet not adjacent to port/arsenal	No Supply or Besieged force	Not controlled Cold Area after Winter	Timarlar after Winter (Special)
Movement segment	Massed force (≥ 6LD, no logistics: ≥ 3LD)	Movement ≥ 3MP if bad weather	Movement ≥ 6MP	Embarking/Landing without port/arsenal	if at sea (moving or staying at sea)	Siege Attrition	Retreats. End of round or turn
Land Attrition (supply/mvt/siege/redeployment)	+8 if entering or in at least one enemy province	+6 if entering or in friendly provinces only	+2 if no LoS	-2 Peace redeployment	+1/+2 per <b>Pillage</b> ⊕ ⊗ (unless besieged)	+1/+2 per unfriendly Revolt ⊕ ⊗ ⊕ ⊗ (besieged)	+? ROTW Gold malus
Siege Attrition	-? Siege of one leader (BLP) land or naval	-3 if besieged in port and no blockade	+1/+3 if besieged, per Siegeworks ⊕ ⊗ ⊕ ⊗	-2 for besieger,			

Movement points costs		Remaining troops after attrition (naval and ROTW)	
Condition	Europe	ROTW	% lost
Friendly/Enemy Clear Terrain	1/2	2/4	d
Enemy Mountain	3	6	2d
Other Rough Terrain	2	6(4)	1d
Strait, river, pass	+1	+2	2d
In or out of swamps	+1	+2	3d
Naval move	3(2)	6(3)	4d

ROTW: Moving along a river = clear terrain for LD movement  
Out of national territory:  
Wasteland 2×MP for movement and LoS unless waste-native.  
Through Desert 2×MP for LoS, always weak supply.

Campaigns costs		Naval Supply

 +6/+3 routed/defeated this round.  
 +? # sides of TF targeted  
 +N level of fortress (x2 in Europe).

• One Fire, one Shock  
 • Any side routed during Fire does not roll for Shock  
 • A fortress is *Veteran*; use a replacement leader if needed  
 • Fortress falls if the besieged has no more resistance or morale. Losses are first taken on the troops inside the fortress.

## Fire stage

*Medieval* no Fire  
*Renaissance* only if A present or against ROTW, no losses  
*Arquebus* Divide losses by two (round to lesser 1/3)

## Losses modifiers

Besieger size ≤6LD: 1/3 or ≤4LD: 2/3; no A: 2/3 (cumulative); One A: 1/3 or POL (p-II), RUS (p-III), TUR  
 Yeniçiler (before M-1a, p-III): 2/3

Besieger: cap by 2x resistance + #LD inside, then add 2/3 if besieger is routed

Fortresses Resistance

Level	Fort	1	2	3	4	5
Resistance	2/3	1	2	3	3	3
If Breach	1/3	2/3	2/3	1	1 1/3	1 2/3

## Naval Size for Blockade

Level	Fort	1	2/3	4/5
Size	1NDE	ND	F	F
1NGD=1ND; F > 2ND; F > 3ND				

## Siege impossible

If #LD < Fortress level, before roll → forced redeployment

## Siege results

S Put a Siegeworks counter (2 = 1, max. 2 counters)  
 B Breach: the besieger may attempt an immediate assault  
 WH War Honor: fortress falls and besieged gains 1LD  
 R Rendition: the fortress falls, no survivors  
 The falling fortress loses 2 levels (1 if 1LD is given by the besieger)  
 The minimum level is one, even if it is lower than the map

Add to the unmodified siege roll:  
 +4 First siege round  
 -2 If second turn of siege  
 -S Siege value of the besieged  
 -? #LD in the fortress  
 If result < #MP from supply source  
 → Siege attrition (double cause if massed force or bad weather)

-2 If port (plain, no blockade) or non-plain terrain  
 -3 Any other terrain with port (no blockade)  
 Exc.: ROTW = terrain does not count if port  
 Exc.: fort= terrain or port: -1 only  
 +2 Breach during this turn  
 +1/+3 Per Siegeworks

-S Siege value of one besieged leader (BLP) land or naval  
 +S Siege value of one besieger leader (BLP) land or naval  
 +1/+3 If at least one LD/A in the fortress  
 +? Artillery bonus against fortress

-N level of the fortress (if revolted)  
 -? #LD inside friendly fortress  
 -3 if not in plain

-? #LD of natives  
 -1 per COL/TP of another country in the area.  
 +6/+3 routed/defeated this round.  
 +? # sides of TF targeted  
 +N level of fortress (x2 in Europe).

-N level of the fortress (if revolted)

 +6/+3 routed/defeated this round.  
 +? # sides of TF targeted  
 +N level of fortress (x2 in Europe).

## Peace, redeployment, interphase – End of turn

T8'

## Enhance Stability

1d10+mod	Stability adjust.
≤5	-1
6-10	0
11-14	+1
15-17	+2
18+	+3

+ADM Monarch  
 +0/+2/+4 Investment (30/50/100)  
 -5 Enemy A controls national territory  
 -3 Exc. HIS: owned (≤IV2(1) or V7)  
 -3 At war with another MAJ  
 -2 At war with a MIN  
 +2 if declared war upon this turn  
 +1 if has a level 2 Art MNU  
 +3 for a Prosperous Power  
 -3 for an Anti-Prosperous Power

## Specific conditions for peace with Minors

• Minor monarch ransom is 50 or bonus to peace proposal or allowing separate peace.  
 • 1 proposal per alliance, plus separate peace to minors either at war by event or with at least 1 province occupied (by or on the minor).  
 • No separate peace against VA or AN unless either Capital occupied or monarch captured (instead of ransom).  
 • Minors always accept global white peace in Overseas wars.  
 • Maximum indemnity is 4 times total provinces income.  
 • Forced diplomacy: 1 cond. for RM, 2 for MA and 3 for VA.  
 • Minor always accept unconditional victory if either attacking by event or global peace.  
 • If all provinces are occupied, mandatory unconditional surrender against all opponents.  
 • Goes to Neutral after unconditional surrender (only).

## Military Index of a Major Country

Peace differential: the difference between the average Stability of each side.

Count the differential of the number of occupied provinces:

+3 if at least ≥6  
 +2 if at least ≥4  
 +1 if at least ≥2

A capital counts for 2 provinces, COL and TP count for 1/2, unless during Overseas War.

Privateer effect: During Overseas War, each TF reduced to 0 or 1 level counts as an occupied province (2 in CTZ).

Before 1615 only, Call for Crusade max. mod. +5

Success: natural 10/1d10+mod>9

+N Christian prov. annexed by TUR in the last 5 turns

+5 If Wjen or Romja controlled by TUR

-2 Per catholic MAJ at war vs Christian country

-3 If I-8 (1) (Reformation) has already happened

## Peace conditions at each level

Peace level	1	2	3	4	5
# conditions	1	1	2	3	3
Terr. choice	L	W	WL	WLW	WWW
per cond.	50	75	75	100	150
Diplomacy	not on VA or AN			May go to RM	

W/L: province chosen by Winner/Loser.

Major monarch ransom: 200 and -2Stability.

Stability +1 Full peace after war against MAJ or attacking MIN.

## Possible peace levels between majors

• Always: Peace level = Peace differential  
 • If differential ≤ 2: Peace level -1, 0 or 1 is allowed.  
 • If capital and half national provinces are conquered: Unconditional peace is allowed (also as separate peace).  
 • Mandatory peace if two consecutive turns at -3 Stability (after Stability improvement); must propose a white or losing peace based on differential (another peace may be signed, if allowed). If this is a separate peace, no CB to former allies.

-2 if the capital province of the MIN was conquered this turn  
 -2 if the MIN has captured a capital province of a MAJ this turn  
 -2 Per major battle won by the MIN on the other party  
 +2 Per major battle lost by the MIN on the other party  
 -1 Per battle or siege won by the MIN on the other party  
 +1 Per battle or siege won by the other party to the MIN  
 -1 Per chief killed or captured by the MIN on the other party  
 +1 Per chief killed or captured by the other party on the MIN  
 +2 Ransoming a captured king.

1 LDE or 1 NDE costs ½ (rounded up) of the price of 1 LD or ND; Δ ⊕ are created with 2 Δ ⊖ or Δ ⊖ +2LD.

• **João II:** at start.

• **Manuel I:** Successor of **João II**.

## Named Kings

## Colonial militias

• 1LDE/level (plus one LDE if there is a mission), always veteran.

## ROTW effects

## Exclusivity

• POR cannot give TP, COL, discoveries or authorisation of trade in STZ.

## Gold in Elmina

• 40 ⊕ exploitable as European gold and only by POR.

## Missions

• Missionaries appear at fixed turns

• -10 VP at end of each period per COL without mission out of **BRAZIL**

## or CABO VERDE.

+2/+1 to TP placement in the same area in/out **ASIA**.

+2/+1 to COL placement in the same area in/out **BRAZIL**.

+1 to tests of reaction of minors and natives in the same area.

• **Da Gama, Almeida, Albuquerque, Albergaria, de Castro**

• Give free overseas CB against ROTW countries.

• +2 to Concurrence in the same region.

• Allow to raise Exceptional Taxes in Oversea war.

• Allow to do Exceptional Levies in Overseas war or War in ROTW:

• at -1 Stability cost if land/naval defeat or no cost if Major defeat;

• troops raised only in ROTW but reinforcement limit is not divided.

• Possible occupation of ADEN and AYMAN.

• Facilitate the transformation of TP to COL.

• 1<sup>st</sup> time: increase diplomacy with ORMUS.

• Can switch side at any time.

## Double-sided Leaders

• Are counted as their \* side (for limits).

## POR

For each Wood (max. 3):

+1 ND to basic force

+1 ND to purchase

## Recruitment in ROTW

## Land recruitment

• COL/TP: 1LDE at normal cost,

1LD at double cost (⊕)

• COL level 6: 2LD at normal

cost, Δ ⊖ at double cost (⊕)

• Forts/Missions: none

## Sea recruitment

• ROTW building at double cost

(⊕ limit)

1 LDE or 1 NDE costs ½ (rounded up) of the price of 1 LD or ND; A⊕ are created with 2 A⊕ or A⊕ +2LD.

- **Ivan III (Иван III Васильевич)**: at start.
  - **Ivan IV (Иван IV Васильевич Грозный)**: first star of period II.
  - **Boris Godunov/Romanov/Dmitry**: during IV-17 (1) (The Times of Troubles in Russia).
  - **Peter the Great (Пётр I Алексеевич Великий)**:
    - in period V+, if ADM ≥ 8 and sum of values ≥ 18.
    - or by event V-11 (Peter the Great).
  - **Peter II (Пётр II)**: first monarch of period VII. Lasts one turn.
  - **Catherine II (Екатерина II Великая)**: replaces **Peter II**.
- Wastelands**
- Wastelands-native → not hampered for movement and LOS.
  - Recruiting out of **Moskva** or S<sup>1</sup>Petersburg costs double.
- Before the reform**
- Only 5A and 1F.
  - Surrenders if 3 turn at -3 Stability.
  - Tech. marker no further than Orthodox marker.
- The reform** (diplomatic phase)
- If **Peter the Great** star, roll for 1 revolt.
  - Else, 3 revolts and -1 Stability.
- After the reform**
- 6A, 3F, increased artillery, decreased recruitment.
  - Surrenders if 2 turns at -3 Stability.
  - Regular tech marker (no Orthodox limit).
- Named Tsars**
- Only available if owns 1 province of UKRAINE or conquered Cossacks all of either CAZAN or ASTRACAN.
  - Adds 2LD (conscript) to basic forces and one LD to purchase limit for Cossacks LD (raised in these provinces only).
  - In periods III and IV, gain one free simple campaign per turn in SIBIRIE.
  - Starting with **Peter the Great**, 1 F can be built and stored: **Fluvial fleet**
    - on the Donets river (in **Donets**) or the Don river (in **Don**) acting as a port on **Mer Noire occidentale** only;
    - on the Dnieper river (in **Zaporozhye**) acting as a port on **Mer Noire orientale** only;
    - or on the Volga river (in **Samara**) acting as a port on **Mer Caspienne** only.
  - This F can only go in the target sea zone for naval interceptions and battles or put blockade on Azov, Odessa or Astragan until it gains a regular port.
- Boysars Army**

1 LDE or 1 NDE costs ½ (rounded up) of the price of 1 LD or ND; A⊕ are created with 2 A⊖ or A⊖ +2LD.

- **Bāyezid-i sāni** (بازید ثانی): at start.
- **I. Süleyman** (سلیمان): first Sultan of period II.
- **I. Selim** (سلیم اول): successor of **Bāyezid-i sāni** in period I.
- **Sadrazam (Grand Vizier)**: always available as general Unknown leader Sadrazam ([stats of Sadrazam]).

- No diplomacy on ORDO HOSPITALIS and PERSIA.
- pl-pV: CB against Christians and PERSIA, no offensive alliance.
- Lose 1 Stability when I<sup>1</sup> of ORDO HOSPITALIS inflict losses on TF.
- May annex capitals & cause crusade by annexing Christian provinces.
- **La Valette**: period III+ or out of Rhodos, 1d10≥4.

## Ragusa

- Owner/controller of Montenegro receives I⊖ for STZ **Adriatique** or 1 free (basic) TFI in **MEDITERRANEAN SEA** up to period III.

- Test to hold them: 1d10<#period+dipl. bonus.
- **Barbaresques Pirates**
- ALGERIA→**Bassin Levantin** (both CTZ **HISPANIA** and STZ **Golfe du Lion**) or STZ **Golfe du Lion**;

- TRIPOLIS and CYRENAICA→STZ **Mer Ionienne** or CTZ **VENETIA**

- TUNESIA→STZ **Golfe du Lion** or STZ **Mer Ionienne**

- MAURETANIA→CTZ **HISPANIA**.

- ALGERIA a I⊖ each turn; pl-pIII: NID or 2NGD; plV+ NGD or NDE.

- Other countries: a I⊖ 2 turns after destruction.

- Exc.: if *Dragut* used, raise I⊖ of TUNESIA

## Named Sultans

## Great Orient CC

- 100 I⊖ +10 I⊖ per 3 non-european COL/TP (1<sup>1</sup>-10 I⊖) per 5 Christian COL/TP (2<sup>1</sup>-10 I⊖) per 5 Christian TF in STZ **Mer d'Arabie** or STZ **Océan Indien**+10 I⊖ for each of **Ormuz**, **Soqatra**, **S. Malacca/Central Sumatra**(<sup>1</sup>).

- (1): not in AT with other than TUR or VEN; (2): in **ASIA** not in **SIBERIA**;

- (3): TUR TP/COL or no Christian TP/COL and owner in AT of TUR.

- If CC Grand Orient in ÆGYPTUS, half of it for TUR if owns **Syrie** or diplomatic control of **SYRIA** not at war.

- **SYRIA** or ÆGYPTUS annexed if A destroyed and capital conquered.

- ÆGYPTUS annexed→CC Grand Orient moved, Convoy available.

## Levant Convoy

- Contains 3NTD×15 I⊖; +20 I⊖ when given, -20 I⊖ +1Stability else.
- Given to controller of CC Mediterranean (CB else) or any MAJ with port on **MEDITERRANEAN SEA** not in Trade Refusal.

## Development

- May only place COL by land contact (or straits).

- plII/plV: one Admiral can go in **ASIA** (if any TP; not m of lowest rank).

- Recruitment area limited to **Trakya** and **Angora**.

## Yearly Campaigning of Timarlar

- After each winter, attrition with # of *Timarlar* LD on Attrition table
- Roll 1d10+2x the distance in provinces to the National Territory of TUR
- Consider only LD loss (P ignored) as *Timarlar* LD losses.
- Each loss is temporary (refit out of limits, half-cost on next round, free on next turn)

## Oriental Policy

1 LDE or 1 NDE costs ½ (rounded up) of the price of 1 LD or ND; A⊕ are created with 2 A⊖ or A⊖ +2LD.

One VGD costs twice the cost of 1 NGD and counts as 2 ND for the construction limits.

- **Barbarigo**: at start.

## Specific rules for the Doges

- Reign length: -2 to die-roll; no Dynastic Crisis.

- Used as an admiral.

- Characteristics rolled with +1 to die-roll, and minimal value of 4.

- No diplomacy allowed on GENUA

- The Pope in Venice: if Roma conquered, +1 to diplomacy on catholics.

## Itali e San Marco

- Must be declared during a diplomacy phase; -30VP.

- Can be used on GENUA, LOMBARDIA, MUTINA, MONTE FERRATO, SICILIA, SANCTA SEDES, PARMA, LUCA, SABAUDIA, TOSCANA.

- These minors can be in AN diplomatically (level 10).

- This gives one CB against each of these minors [TBD].

## Great Orient CC

- 100 I⊖ +10 I⊖ per 3 non-european COL/TP (1<sup>1</sup>-10 I⊖) per 5 Christian COL/TP (2<sup>1</sup>-10 I⊖) per 5 Christian TF in STZ **Mer d'Arabie** or STZ **Océan Indien**+10 I⊖ for each of **Ormuz**, **Soqatra**, **S. Malacca/Central Sumatra**(<sup>1</sup>).

- (1): not in AT with other than TUR or VEN; (2): in **ASIA** not in **SIBERIA**;

- (3): TUR TP/COL or no Christian TP/COL and owner in AT of TUR.

- If CC Grand Orient in ÆGYPTUS, half of it for VEN if diplomatic control of ÆGYPTUS not at war.

- **SYRIA** or ÆGYPTUS annexed if A destroyed and capital conquered.

- ÆGYPTUS annexed→CC Grand Orient moved, Convoy available.

## Salt trade

- Can exploit all Mediterranean salt with a MNU level 2 in **Veneto**.

## Ragusa

- Owner/controller of Montenegro receives I⊖ for STZ **Adriatique** or 1 free (basic) TFI in **MEDITERRANEAN SEA**.

## Italia e San Marco

## Galleasses

- When technology reached, up to 2 VGD

- can be bought, one per turn.

- Before **Battery**: 1 VGD = use full fire damage against Galleys; 2 VGD =>1 to Fire roll.

- **Battery** or after: presence of 1 VGD =>1 to Fire roll.

- One VGD must be lost when losing in a Rout.

- Each turn, roll 1d10→number of HOL TF to be placed by **Dutch Trade VEN** [TBD?].

- 1-2 none ; 3-5 one ; 6-8 two; 9-10 three (1 in Mediterranean Sea).

1 LDE or 1 NDE costs ½ (rounded up) of the price of 1 LD or ND; ⊕ are created with 2 ⊕ or ⊕ +2LD.

• **Willem I:** at start of the rebellion, 7 turns, 7/9/9, **Named Stadhouders** Stadhouder. Also *Willem I* (⊕ A 3.3.2 -1 [Event III-1]).

• **Oldenbarnevelt:** T19-26, 9/7/7, Parliament.

• **Maurits:** T20-27, 7/7/9, Stadhouder. Also *M. Nassau* (⊕ A 4.5.5 -1 [T20-T27]).

• **Frederik Hendrik:** T27-32, Stadhouder, 8/7/9. Also *Frederik Hendrik* (⊕ A 4.4.3 -1 [T27-T32]).

• **de Witt:** by V-10, random duration, 9/7/9, Parliament or minister of a Stadhouder. Adds ⊕ and ⊕ to Basic forces when at war.

• **Willem III:** T37-43, 7/9/7, Stadhouder, see V-3. Adds ⊕ to Basic forces, also *Willem III* (⊕ A 3.3.3 [T37-T43]).

### Changing government

• After the death of a sovereign.

• Immediately after being victim of a declaration of war → Stadhouder

• Following the acknowledgement of sovereignty by HIS.

• When a named character is available.

### Stadhouder

• MIL is at least 5; limits are changed; at most one A in the ROTW.

• At the beginning of full involvement in war, gain ⊕ and one fortress of maximum level in Europe.

### Parliament

• ADM is at least 5; limits are changed; at most two A in Europe.

• CC Atlantic is worth 150 ⊕ if IV-5 (Act of Navigation) is not enforced.

### Naval Construction

• If the monarch has at least 7 in both ADM and MIL, two TFI actions can be traded for a free ⊕ (in addition of Construction limits) if Naval Technology is not Three-Decker of higher.

• Any national province can be flooded during movement of enemy troops.

• Enemy must retreat and suffer attrition at +2.

• Only dutch troops can move in flooded provinces at the cost of 6 MP.

• Flooding a province cost 5VP and 1 Stability.

• Place a **Pillage** ⊕ marker in flooded provinces (not adjusted this turn). Flood last as long as the province is looted.

### Indiërs

• After VI-17 (The Last of the Great Mughals), *Indiërs* can be raised in ASIA.

• 1 LD can be raised in each TP ⊕ and COL ⊕ each turn.

• 1LD of *Indiërs* cost 5 ⊕ to raise and 3/1 ⊕ to maintain as Veteran/Conscript.

• *Indiërs* never cause activation of natives.

### Conquistadors

• *Coen/van Diemen/Maetsuycker* may use the table of conquistadors in Indonesia.

### Exclusivity

• HOL cannot sell, give or trade discoveries as well as COL/TP before period VII.

• May loan up to 150 ⊕ per turn.

• Add 100 ⊕ after III-2 (Amsterdam Stock Exchange).

• If Recognised by HIS, no penalty to lend money to MAJ having a different Religion.

### Loan treaties

## Habsburg Empire/Austria

## HAB

1 LDE or 1 NDE costs ½ (rounded up) of the price of 1 LD or ND; A⊕ are created with 2 A⊖ or A⊖ +2LD.

- John and Alexander:** at start.
- Zygmunt I:** successor of **John and Alexander**.
- Báthory:** values 8/7/9, Also a general **Báthory** (X B 5.2.4 [T17–T22]).
- Sobiesky:** values 8/7/9, Also a general **Sobieski** (X A 4.2.5 ↔ A 4.2.5 [T37–T42]).
- Zygmunt III:** after III-13 (Union between Polonia and Suecia).
- August II:** after V-12 (Augustus II, a Saxon king in Poland).
- Patkul:** values 5/9/4, Also a general **Patkul** (X A 4.2.2 ↔ A 4.2.2 [T42–T46]). May also be a minister. During his service, no alliance with SUE, POL may sign limited offensive alliances against SUE.
- Stanislas:** by VI-1 (The Great Northern War).

## Elective monarchy

- Generals above can be chosen as kings instead of rolling for a new one.
- If retired by event, remains available as a normal leader.
- +1 to the die for Manoeuvre and Shock of kings.
- POL may only use 3 TF if not Protestant.

## Named Kings

## Before Union of Lublin

- 2 to the die for DC/reign length.
- Separate forces for **POLANIA** and **LITUANIA**.
- After Liberum Veto**
- 2 to the die for DC/reign length.
- 5 to raise Stability if at war with a MAJ.
- 2/-3 Stability to declare war with/without CB.
- War for **Absolutism** may be started.
- Cannot maintain fortress of level >3 at peace.

## Warsaw

- Mazowia** can be annexed starting from **Zygmunt I**.
- Warszawa** can be made a second capital → immediate +2 Stability.
- A and 4LD can be used by POL and raised in **UKRAINA** if at least one province owned.
- If A present and not at war against TUR or CRIMEA, agitations possible (remove army for the turn).
- Choose RUS or TUR, roll a revolt if die+M ≥ 10.
- +2 if target is TUR.
- +2 if A⊖.
- Revolt does not happen if south (included) of **Alep**, **Kordistan** and **Azarbāyadjān**.

## Internal Policy

1 LDE or 1 NDE costs ½ (rounded up) of the price of 1 LD or ND; A⊕ are created with 2 A⊖ or A⊖ +2LD.

- Friedrich-Wilhelm:** at start (8/5/9, dies turn 51).
- Named Kings**
- Friedrich II:** Beginning of VII-1 (The Seven Years War) or after **Friedrich-Wilhelm** (9/9/9), also **Friedrich II** (A 6.6.6 -1 [T51–T59]), no survival for 6 turns.
- No -1 at survival tests after battle.
- Escape the first death in battle (by hiding in hay).
- During his Reign, PRU may break any Alliance for the cost of 1 Stability (instead of 2).
- Military revolution with **Friedrich II** during certain wars. [TBD]
- Troops recruited below purchase limit are veterans.
- Can make exceptional recruitment after a major defeat without losing 1 Stability.
- One free multiple campaign each turn (two if **Friedrich II** reigns).
- Silesia**
- Gains 1 lv. of MNU (Metal/Silesia) as soon as both **Silésie** and **Lausitz** are owned.

For each Wood (max. 3):  
+1 ND to basic force  
+1 ND to purchase

Part V

# Scenarios

# Scenarios

## Chapter XXVI

**TODO:** Add battle scenarios, war scenarios and short campaigns (from EU6).

### XXVI.1 The Great Campaign

**Design note:** The Great Campaign is the way this game is meant to be played. It retraces history of the world from the European perspective between the discovery of the New World and the French Revolution.

The Great Campaign is currently designed for 9 players. One of them only starts to play in period III, taking the role of the Dutch as they revolt against the Spanish empire. Six of the players play each a single country while the three other play several countries.

We start here by describing the setup at the beginning of the game, followed by indications on what happens whenever a player has to change and play another country. Lastly, we give the indications for who plays which country both for the standard nine players game and for variants with fewer players.

#### XXVI.1.1 Placement in 1492 (turn 1)

##### XXVI.1.1.1 Miscellaneous

**A** During round 1 of turn 1, No country may explore a STZ adjacent to **AMERICA**, unless the stack is commanded by *Colón*.

**B** No monarch survival roll is made for turn 1.

**C Marco Polo** All coastal provinces in the areas between **BALOUCHISTAN** and **NANKIN** (included) are known by all players.

##### XXVI.1.1.2 Global markers

**A** Inflation is on the leftmost 5% box.

**B** The prices of all exotic resources are at their respective minimums, as shown on the track.

**C** Land Technologies: *Latin* 6, *Orthodox* 4, *Islam* 4, *Asia* 1. Naval Technologies: *Latin* 7, *Orthodox* 4, *Islam* 5, *Asia* 1.

**C.1** Technological goal are on the boxes shown on the counters.

**D** **KARNĀṬAKA** and **BĀṄGLĀ** only produce 1 of each resource: put the “1 resource” markers there.

**E** There is no Russian CTZ. Put a counter there.

**F** Sund taxes are not raised. Put the “Free trade” counter.

##### XXVI.1.1.3 ANGLIA

**A** The monarch is **Henry VII** (6/7/7), followed by **Henry VIII**. The Stability is +1, and ANG is *Catholic*.

**B Owned provinces.**

**B.1 National territory :** **Cumberland, Durham, Yorkshire, Lancashire, Cymru, Midlands, Lincolnshire, East Anglia, Gloucester, Cornwall, Wessex, Kent.**

**B.2 Other provinces :** **Connacht, Mumhan, Laighean, Brega, Uladh and Calais.**

**B.3 Known sea zones :** **Mer des Açores.**

**C Diplomatic track :**

I VA SCOTIA

**D Economical situation :**

**D.1** MNU of Metal on side⊖ in **Midlands**, MNU of Cloth on side⊖ in **East Anglia**, MNU of Fish on side⊖ in **Wessex**, FTI is 2 and DTI is 1.

**D.2** Initial treasury is 50 ₧.

**D.3** TF level 2 in CTZ **ANGLIA**, level 2 in STZ **Mer du Nord**, level 2 in STZ **Baltique** and level 2 in STZ **Mer des Canaries.**

**E** *Land technology* is 5 and *Naval technology* is 9. 1A⊖, 1LD, 1F⊖ (2NWD/1NTD), 1ND, 1NTD are raised.

##### XXVI.1.1.4 FRANCIA

**A** The monarch is **Charles VIII** (5/7/9). The Stability is +3, and FRA is *Catholic*.

**B Owned provinces.**

**B.1 National territory :** **Finistère, Armor, Morbihan, Vendée, Poitou, Limousin, Touraine, Maine, Normandie, Caux, Île-de-France, Orléanais, Berry, Auvergne, Cévennes, Quercy, Guyenne, Béarn, Languedoc, Provence, Dauphiné, Lyonnais, Bourgogne, Troyes, Champagne and Picardie.**

**B.2** [BLP] SABAUDIA has an occupation in **Dauphiné.**

**B.3 Known sea zones :** **Mer des Açores, Mer des Canaries.**

**C Diplomatic track :**

I MA SABAUDIA

**D Economical situation :**

**D.1** MNU of Metal on side⊖ in **Champagne**, MNU of Wine on side⊖ in **Guyenne**, FTI is 1 and DTI is 2.

**D.2** Initial treasury is 100 ₧.

**D.3** TF level 2 in CTZ **FRANCIA**, level 1 in STZ **Golfe du Lion**, level 1 in STZ **Mer Ionienne** and level 1 in STZ **Mer des Canaries.**

**E** *Land technology* is 9 and *Naval technology* is 7. 1A⊕, 1A⊖, 1ND and 2NGID are raised.

##### XXVI.1.1.5 HISPANIA

**A** The monarch is **Isabel and Fernando** (6/7/6). The Stability is +2, and HIS is *Catholic*.

**B Owned provinces.**

**B.1 National territory :** **Galiza, Salamanca, Extremadura, Huelva, Gibraltar, Granada, Murcia, La Mancha, Toledo, Castilla La Nueva, Castilla La Vieja, Asturias, Vizcaya, Navarra, Pirineos, Catalunya, León, Cáceres, Andalucía, Córdoba, València, Aragón.**

**B.2 Other provinces :** **Illes Balears, Rosseló, Saldigna, Sicilia, Palermo, Malta, Islas Canarias.**

**B.3 Known sea zones :** **Mer des Açores, Mer des Canaries.**

**C Diplomatic track :**

I SUB GENUA

I RM SANCTA SEDES and SICILIE

**D Economical situation :**

**D.1** MNU of Metal on side⊖ in **Toledo**, FTI is 2 and DTI is 1. A MNU of Cloth on side⊕ is placed in **Vlaanderen**, and will be available only after event I-B (Burgundy Inheritance).

<p>[S]604</p> <p>The Great Campaign</p> <p>D.2 Initial treasury is 150 ₴.</p> <p>D.3 TF level 2 in CTZ <b>HISPANIA</b>, level 2 in STZ <b>Golfe du Lion</b> and level 1 in STZ <b>Mer des Canaries</b>.</p> <p>E Land technology is 7 and Naval technology is 9. 1A⊕, 1F⊖ (4NGD/1NTD), 3ND are raised. [BLP] 1 Præsidio of level 1 in <b>Algérie</b> (Spanish presence on the Peñon started during the Middle ages, the island was only fortified in 1510).</p> <p><b>XXVI.1.1.6 POLONIA</b></p> <p>A The monarch is <b>John and Alexander</b> (4/5/4), followed by <b>Zygmunt I</b>. Their initial situation is described here.</p> <p>A.1 The precise moment of change, as well as the player playing these countries, depends on the number of players in the campaign.</p> <p><b>XXVI.1.2.1 Becoming SUECIA</b></p> <p><b>A</b> If event event II-4 (End of the Union of Kalmar) did not occur before SUE becomes a MAJ, it will happen as one event of the turn (as if rolled for) and one less event is rolled for.</p> <p><b>B Ruling Monarch.</b> The ruling monarch is <b>Gustav I</b> if the <i>union of Kalmar</i> is still active, <b>Erik XIV</b> else. The Stability is +2, minus the number of turns of an ongoing war.</p> <p><b>C Owned provinces:</b> the ones already owned by MINSUECIA before the transfer, usually <b>Småland</b>, <b>Jämtland</b>, <b>Gästrikland</b>, <b>Bergslagen</b>, <b>Svealand</b>, <b>Finland</b>, <b>Tavastland</b>, <b>Nyland</b>, <b>Karelen</b>.</p> <p><b>D Diplomatic track</b> No special rules. Ongoing wars continue.</p> <p><b>E Economical situation</b></p> <p>E.1 1MNU of Wood on side⊕ in <b>Svealand</b>, 1 MNU of Metal on side⊖ in <b>Jämtland</b>, FTI is 2 and DTI is 3. TF: those that are here (3 levels in <b>Baltique</b> in 1492).</p> <p>E.2 Initial treasury is 150 ₮.</p> <p><b>F Military</b></p> <p>F.1 <i>Land technology</i> is placed 3 boxes behind the most advanced counter (but at least at the level of the <i>Latin</i> counter). <i>Naval technology</i> is 1 box ahead of the <i>Latin</i> counter.</p> <p>F.2 1A⊕, 2LD, 1F⊖ (2NWD/1NTD), the Transport F⊕ (with 4NTD) and 2 fortress levels are already raised if SUECIA was at peace and may be placed freely. If already at war, the equivalent of 3LD, the Transport F⊕ (with 4NTD) and 2 fortress levels are raised for free in the owned territory, up to the limit above (excess forces are lost). Forces already present remain in place.</p> <p><b>XXVI.1.2.2 Becoming HOLLANDIA</b></p> <p><b>A</b> HOL becomes a major power when event III-1 (1) (Revolt of the United Provinces) occurs. This usually happens in the first turns of period III.</p> <p>A.1 It is played by a new player.</p> <p><b>B</b> See section XIV.11.2 (Revolt of the United provinces) and event III-1 (1) (Revolt of the United Provinces) for the initial state of <b>HOLLANDIA</b>.</p> <p><b>XXVI.1.2.3 Becoming AUSTRIA</b></p> <p><b>A The Austrian Habsburgs.</b> If AUS becomes a major country in period IV or earlier, the monarch is <b>Ferdinand II</b>, whose values and length are obtained at random (a Dynastic Crisis is not possible).</p> <p><b>B The dissociation of the Habsburgs</b> (caused by event V-4 (The War of Spanish Succession)). If AUS becomes a major country in period V or later, the monarch is <b>Ferdinand III</b>, with values 6/8/7, whose reign length should be rolled for (a Dynastic Crisis is not possible).</p> <p><b>C General Situation</b></p> <p>C.1 The Stability is +3, minus the number of turns of an ongoing war, adjusted with the Major battles of the previous turn (only).</p> <p>C.2 AUS* is <i>Catholic/Counter-Reformation</i>.</p>
---	--

<p>[S]608</p> <p>The Great Campaign</p> <p><i>C.3 Owned provinces:</i> the territory of HABSBURGUM, or the ones decided by event V-4 (The War of Spanish Succession) if the transfer takes place at the time of the Dissociation.</p> <p><b>D Diplomacy</b> A white peace or a negotiated peace (but not a formal peace) may be negotiated and signed immediately in wars, excepted for the ones that can be aggravated in event IV-A (Thirty Years' War).</p> <p><i>D.1</i> The minor powers on the Diplomatic Tracks are now liege of AUS.</p> <p><b>E Economical situation</b></p> <p><i>E.1</i> 1 MNU in period I or II, 2 MNU in period III or IV, 3 MNU in period V, and 4 if in period VI or VII; one being ⊖ and the rest (if any) ⊕. Initial DTI is 2 in periods I to III, and 3 in period IV and afterwards. Initial FTI is 2 in periods I to IV, and 3 in period V or afterwards.</p> <p><i>E.2</i> Initial treasury is 400 ₮.</p> <p><b>F military</b></p> <p><i>F.1</i> Unless already placed, <i>Land technology</i> is placed on the same box as HIS.</p> <p><i>F.2</i> The equivalent of 3△⊕ and 2 fortress levels are already raised and may be placed freely. If already at war, the excess forces are kept, and the missing forces are raised for free, but these will be <i>Conscripts</i>.</p> <p><b>XXVI.1.2.4 Becoming PRUSSIA</b></p> <p><b>A Kingdom of Prussia</b> If event IV-11 (The Great Elector Friedrich-Wilhelm of Prussia) or event V-13 (Creation of the Kingdom of Prussia) were not played yet, they are considered as the first political event(s) rolled for this turn. However, the provinces of <i>DUCHY OF PRUSSIA</i> still owned by POLONIA are transferred immediately to PRU (no VPs are won for this transfer).</p> <p><b>B Ruling Monarch.</b> Before turn 51, the monarch is <i>Friedrich-Wilhelm</i>. At the beginning of turn 51, the monarch becomes <i>Friedrich II</i>. The Stability is +3, minus the number of turns of an ongoing war, and PRU is <i>Protestant</i>.</p> <p><b>C Owned provinces:</b> the ones already owned by BRANDENBURGUM, plus the ones of <i>DUCHY OF PRUSSIA</i>.</p> <p><b>D Diplomatic track</b> No special rules. Ongoing wars continue.</p> <p><b>E Economical situation</b></p> <p><i>E.1</i> 2MNU on side⊕, FTI and DTI is 4. No TF.</p> <p><i>E.2</i> Initial treasury is 200 ₮.</p> <p><b>F Military</b></p> <p><i>F.1</i> <i>Land technology</i> is placed 3 boxes ahead of the <i>Latin</i> counter.</p> <p><i>F.2</i> The equivalent of 2△⊕ and 3 fortress levels are already raised if BRANDENBURGUM was at peace and may be placed freely. If already at war, only the remaining forces of BRANDENBURGUM are raised.</p> <p><b>XXVI.1.2.5 Position of the now Minor country</b></p> <p><b>A Military and Economical situation</b> Unless explicitly mentioned otherwise, the abandoned country keeps its position of the beginning of the turn.</p> <p><i>A.1</i> The military forces raised and the fortresses remain and are maintained as <i>Veteran</i> for the turn, in case of an ongoing conflict or a war beginning at the turn of the transfer. At the turn following the transfer, the basic forces of the country become the ones of the MIN, excepted for the fortresses: they stay all as they are and are maintained freely (until destroyed militarily).</p> <p><i>A.2</i> The belongings of the MAJ (COL, TP, provinces, TF) remain in place. The TF levels serve as the reference level for future trade operations of the MIN (minimum levels are given in the annexes).</p>	<p>Scenarios— master – 2016-04-14</p> <p>[S]609</p> <p><i>A.3 Colonisation</i> In the case of PORTUGALLIA and HOLLANDIA that may continue their overseas expansion and developing COL as minor countries, the MAJ having them on its diplomatic track (or the first in the preferences, should the country be Neutral) manages the COL placement. The FTI used is 3 (and 4 from period IV onward), and the investment is a medium one.</p> <p><b>B Diplomatic track of minor countries</b> The countries becoming minor countries keep their diplomatic track and the MIN on it. They defend these against diplomatic actions with a medium investment and a DIP of 3 (total modifier +5).</p> <p><i>B.1</i> In case of war, they defend these countries if attacked, and they systematically ask for their help in a conflict, if possible.</p> <p><b>C Diplomatic position of the new minor country</b> If at the time of transfer, the country was allied with another MAJ, it is put on the diplomatic track of this MAJ: RM for a dynastic alliance (see §C (Dynastic Ties) of section IV.2.1.3 (Alliances)), SUB for a defensive alliance (see §G (Defensive Alliance) of section IV.2.1.3 (Alliances)) and MA for an offensive alliance (see §H (Offensive Alliance) of section IV.2.1.3 (Alliances)).</p> <p><i>C.1</i> If several MAJ were allied to the new MIN, a diplomatic action must be undertaken by all willing MAJ (this counts as one of the diplomatic actions of the turn). This roll is however done as soon as possible (before the political events of the turn are rolled for even) and in all cases before the diplomatic reactions.</p> <p><b>D VP summary</b> When a country is abandoned, an end of game VP count has to be done for this country. This is detailed in section XIII.5 (End of game VPs)</p> <p><b>XXVI.1.3 Countries played by each player</b></p> <p><b>XXVI.1.3.1 The almost 9 players game</b></p> <p><b>A</b> The game is currently designed to be played by 9 players, one of which only starting to play at the beginning of period III.</p> <p><i>A.1</i> The diagram in Figure figure XXVI.1 (Standard game) shows the countries played by each one (each solid line corresponds to one player).</p> <p><i>A.2</i> Six players only play one country: ANG, FRA, HIS, TUR, RUS and HOL (from period III onwards).</p> <p><i>A.3</i> Three players change country mid-game: POR then SUE, VEN then AUS and POL then PRU.</p> <p><i>A.4</i> The player playing POR switch to SUE at the interphase between turns 14 and 15 (end of period II/beginning of period III).</p> <p><i>A.5</i> A new player starts playing HOL as soon as event III-1 (1) (Revolt of the United Provinces) occurs (usually during the first turns of period III).</p> <p><i>A.6</i> The player playing VEN starts playing AUS when event IV-A (Thirty Years' War) occurs or at the interphase between turns 25 and 26 (end of period III/beginning of period IV), whichever occurs first.</p> <p><i>A.7</i> The player playing POL starts playing PRU when the first occurs among: event VI-11 (War of Polish Succession), event VI-13 (War of Austrian Succession), interphase between turns 50 and 51.</p> <p><b>XXVI.1.3.2 Eight-players game</b></p> <p><b>A</b> Initial powers are TUR, HIS, FRA, ANG, RUS, VEN, POR and POL. The last three players will change powers during the course of play.</p> <p><b>B Portugal-Sweden</b> The player of PORTUGALLIA abandons this MAJ during the interphase between period II and III (turns 14–15, 1560) and becomes SUECIA.</p> <p><b>C VENETIA-VENETIA</b> As long as event III-1 (1) (Revolt of the United Provinces) does not happen, HOLLANDIA does not exist and the player continues with playing VENETIA. At the turn of this revolt, the player switches to HOLLANDIA.</p>
---	--

Figure XXVI.1: Standard game

C.1 **VENETIA** chooses objectives as if it were to play a complete period III among the objectives of period II. It will mark (or lose) half of the objectives value if at least 4 turns are played as VEN in period III, and mark it completely if at least 9 turns are played as VEN in period III.

D **HOLLANDIA-AUSTRIA** The choice of the HOL-AUS transfer must be made at the time where event V-4 (The War of Spanish Succession) is *rolled* (not activated) or at the beginning of period VI, whichever is first.

D.1 **AUSTRIA** becomes a new major country played by the former player of **HOLLANDIA** at the time of the dissociation.

D.2 During the War of Spanish Succession, AUS also remains the ruler of **HOLLANDIA** as a major country until the conflict ends (and the player scores VP following the general situation of **HOLLANDIA** at this moment).

D.3 However, if period V is not finished, **HOLLANDIA** remains played as a MAJ until the end of the period. While playing the two countries, HOL/AUS is restricted for HOL to sign only defensive alliances, and cannot declare war for HOL without a CB.

D.4 **Sweden-Austria** If HOL refuses the transfer to AUS, SUE may opt for the transfer instead. The choice is made just after the refusal by HOL. The same conditions apply: both countries are played during event V-4 (The War of Spanish Succession), SUE is played as a MAJ until the peace or the end of period V (whichever is the latest), etc.

E **Poland-Prussia** The player for **POLONIA** takes the control of **PRUSSIA** at the beginning of period VI (at the earliest) and at the beginning of turn 51, according to the political events rolled for (see chapter III (Events)).

E.1 The events event VI-11 (War of Polish Succession), event VI-13 (War of Austrian Succession) and event VII-1 (The Seven Years War) trigger the change to **PRUSSIA** if in period VI. If none of those happen, the transfer happens at the beginning of turn 51.

#### XXVI.1.3.3 Nine-players game: full AUS

A This is a variant for 9 players all along the game with a major AUS from the beginning. **AUSTRIA** is added as a MAJ from period I. There is a mandatory offensive and defensive alliance with HIS at all time, that may evolve in an weak defensive alliance with HIS after the end of event IV-A (Thirty Years' War), and it disappears in any case with event V-4 (The War of Spanish Succession).

Figure XXVI.2: 8 players game

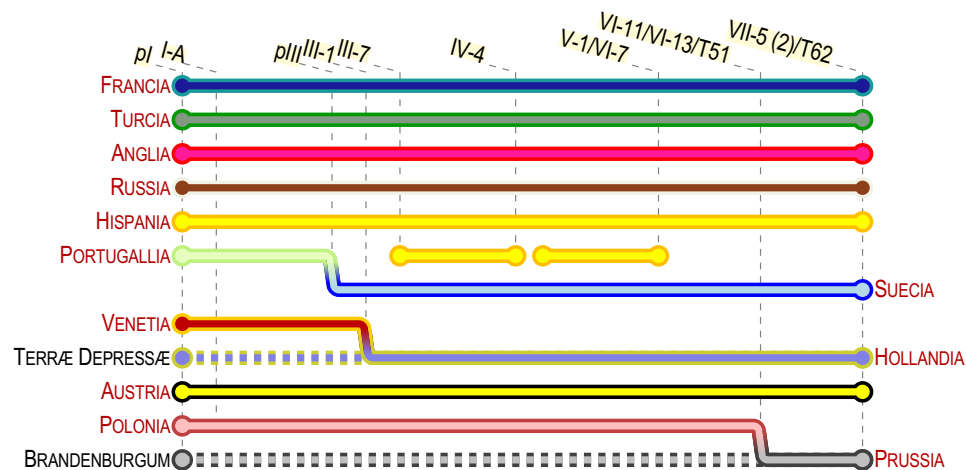

Figure XXVI.3: 9 players game with full AUS

Figure XXVI.4: 9 players game with DAN

**B The Habsburg Dynastic Alliance** (see also §B (The Habsburg Dynastic Alliance) of section XIV.12.4.1 (Diplomacy of Austria))

B.1 At the beginning, HIS and AUS are always linked by a mandatory alliance, even if they fail to answer it or even at war against one another (so that they still may answer the alliance against other powers). They can do full or limited intervention, both in offensive or defensive stance.

B.2 During that time, HIS does not lose Stability to use the defensive alliance to help AUS.

B.3 However, if they are not using the CB given by this Alliance, they are not necessarily allied unless they announce it (and could so make separate peace at no cost, and so on).

B.4 They may be at war against one another, but only if using a legitimate CB to do so.

B.5 They are no limit to money transfer between them.

B.6 At the end of event IV-A (Thirty Years' War), if both HIS and AUS has achieved Neutral or Losing positions, the mandatory alliance becomes defensive only and is weakened in the sense that a limited intervention is sufficient to fulfil it. The mandatory alliance is not offensive anymore.

B.7 At the beginning of event V-4 (The War of Spanish Succession), there isn't anymore a Dynastic Alliance. Note however that, depending on the choice of the Heir, there might be different kinds of Dynastic Ties as described in this event.

#### XXVI.1.3.4 Nine-players game: DAN

**A Alternate version: 9 players with DAN** DANIA is played in the first two periods. This setting is not completely thought-out yet, and may never see the light (DAN does not interact with enough other players to the conceptors' taste).

#### XXVI.1.3.5 Seven-players game

**A Solution 1** POLONIA becomes a MIN. SUECIA is transferred to PRUSSIA.

**B Solution 2** SUECIA becomes a MIN. RUSSIA is a MIN in periods I-II. PORTUGALLIA is transferred to RUSSIA, and POLONIA is transferred to PRUSSIA.

B.1 The chapter on SUE is to ignore/rewrite, but for the limits of counters and the leaders. 53.27 is resurrected.

B.2 Some events have to be rewritten: III-4 becomes II-2 of Risto, but SUE obtains **Gotland** and **Skåne**. III-22 is to be rewritten (POL may declare war to SUE only once) ; IV-0 is deleted ; IV-2 (1 and 2), SUE uses the CB; IV-17, use the one of Risto (SUE obtains **Västergötland**; V-1, V-3, V-13 play as written by Risto).

#### XXVI.1.3.6 Six-players game

**A** As in the normal game, POLONIA, SUECIA, PRUSSIA and RUSSIA (in periods I and II) become minor countries.

A.1 The player playing PORTUGALLIA takes the control of RUSSIA at the beginning of period III.

**B** Political events have to be modified to take all this into account. One would rather choose to use the Risto events, that are a coherent and historically plausible set.

# Playing the game

## Chapter XXVII

**TODO:** Technical details and advices: how to sort the counter, build the player aid, use the generic record (TF, exotic resources, . . . ) and generally how to hold a game session.

# Strategical advices

## Chapter XXVIII

**TODO:** Strategical advice both global and specific to each country. Boka started some stuff in this direction.
